

Oakville GO Station Improvements

Mobilization: April 13, 2026

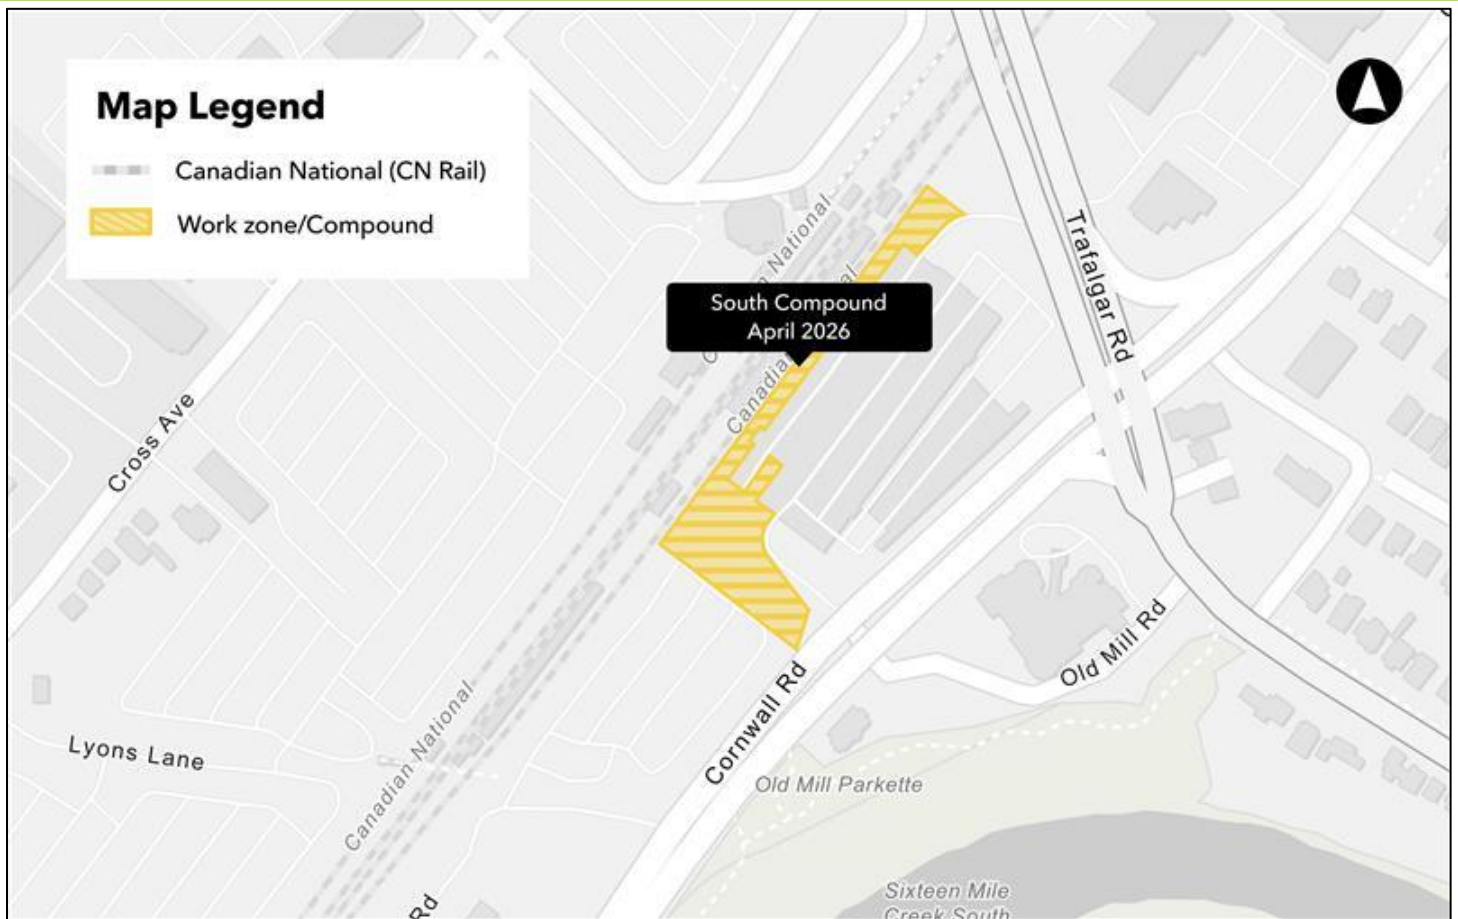

Figure 1: Map showing the approximate location of the works. Metrolinx image.

WHAT TO EXPECT

Starting April 13, 2026, we will be setting up a construction laydown area on the south side of Oakville GO Station to support construction of station upgrades and renovations. This project will refurbish the platforms with canopies, shelters and new mini-platforms, build a new accessible pedestrian bridge with four elevators and staircases to platforms and parking structures, improve the bus loop with new platforms, shelters and signage, and updates to the station building.

Local residents and businesses may experience some noise and increased construction traffic during the project. Station-users may also experience some temporary pedestrian diversions.

WHAT WORK IS TAKING PLACE?

Starting April 13, 2026, we will be setting up our south construction compound to support the station improvement works. Fencing will be installed to keep the site secure and appropriate signage will communicate any diversions that station-users may need to take to access the station and platforms. We may also need to set up a storage compound in the northwest part of the parking lot. If needed, this will be fenced to keep it secure and appropriate signage installed.

Following the site mobilization, temporary planked crossings will be constructed to allow access for heavy duty equipment. The northern side of the existing platform 2 will be widened to form a temporary platform 1A. Temporary platform curbs, temporary mini-platforms and tactiles will be installed.

WHAT TO EXPECT

Reasonable precautions will be taken to minimize disturbances to residents and businesses, including but not limited to:

- **Noise:** Residents and businesses near the work zone may hear noise caused by trucks, heavy equipment and material delivery and other construction equipment required for this work. Work will be conducted as efficiently as possible to minimize disturbances in the area. Monitors will be used.
- **Lights:** Lights will be directed into the work site to minimize light pollution into nearby buildings and businesses.
- **Vibration:** Vibration monitors will be used as needed to ensure levels stay below allowable limits.

WORK HOURS

- Mobilization will take place during daytime hours.
- Construction in the corridor will take place during nighttime hours.

PEDESTRIAN DETAILS

- There are no expected impacts on municipal sidewalks or walking routes.
- There may be some temporary diversions to route pedestrians around the working areas.

TRANSIT INFORMATION

- There are no expected impacts to transit.
- Any future service interruptions will be communicated in advance.

TRAFFIC DETAILS

- There are no expected impacts on local roads.
- Vehicles will be diverted around the site area shown on the map.
- There will be increased construction vehicle activity within the area shown on the map.
- Parking reductions are expected. Customers are encouraged to utilize the parking structure.

COMMUNITY ENGAGEMENT

- Metrolinx has dedicated community engagement teams available to connect with residents and businesses.
- If you have any questions, please email us at haltonregion@metrolinx.com
