

# Tunnel Ventilation System Test at Laird Station

## Project Overview

Metrolinx's Eglinton Crosstown LRT will be a new 19-kilometre light rail transit line in midtown Toronto. With 25 stations and stops along the dedicated route, getting across town will be up

Information as of: September 26, 2024

to 60% faster than before. The Crosstown will link to 54 bus routes, three TTC subway stations and GO lines, providing important transit connections to get people to where they need to go faster than ever before.

## What You Need to Know

On Wednesday, October 16, 2024, between approximately 2:00 p.m. and 6:00 p.m. crews will be testing the Tunnel Ventilation System at Laird Station. The Tunnel Ventilation System helps release smoke in the event of a fire and/or other emergencies while providing fresh air to the tunnel and station. To facilitate this test, training smoke may be visible coming from Laird Station for approximately twenty (20) minutes once the test has started. Should an actual emergency occur, emergency services will respond accordingly. No changes to the traffic or pedestrian routes are expected as a result of this work. Upon completion of this work short-term periodic lane reductions may be required on Eginton Avenue East to facilitate special activities.

### WHAT TO EXPECT

- Training smoke may be visible coming from Laird Station for approximately twenty (20) minutes once the test has started.

### HOURS OF WORK

- On Wednesday, October 16, 2024, between approximately 2:00 p.m. and 6:00 p.m.

### TRAFFIC DETAILS

- No changes to the current traffic routes are expected as a result of this work.

### PEDESTRIAN DETAILS

- No changes to the current pedestrian routes are expected as a result of this testing.

### TRANSIT INFORMATION

- Access to TTC will be maintained at all times.
