

Daytime and overnight track work in the Lakeshore East rail corridor between Jones Ave. and Eastern Ave.

Expected Duration: Ongoing until early June 2026

Hours of work: Work will be 24 hours on weekdays. Less disruptive work will take place overnight.

Overnight track installation schedule:

Location	Work start date
Jones Ave. to Pape Ave.	Commenced
Pape Ave. to Carlaw Ave.	Late March 2026
Carlaw Ave. to Logan Ave.	Early April 2026
Logan Ave. to Dundas St. E.	Late April 2026
Dundas St. E. to Queen St. E.	Early May 2026
Queen St. E. to Eastern Ave.	Mid May 2026

What is happening?

- Work is underway to install a new track in the rail corridor, which is required for planned enhancements to GO service.
- Preparatory construction activities will take place during daytime hours in the rail corridor in advance of track installation.
- Starting from Jones Ave. and working towards Eastern Ave., crews will place material that the tracks will sit on top (ballast), compact the material, and install the tracks.

- Overnight work in each segment is expected to take approximately 2 weeks to complete. All work is expected to be completed by early June 2026. Further updates on the location and timing of overnight work will be provided where possible.
- Overnight work will be required for the duration of this work. Some activities, such as installing the tracks, can only be safely completed when trains are not running.
- The construction activities will take place entirely within the work corridor.
- Between 9 p.m. and 7 a.m., crews will focus on excavation and backfilling activities. During the day, granular materials will be placed and compacted. Residents in the surrounding area may feel vibrations from the compaction work.

What to expect

- Construction activities will include backfilling material, placing stones, compaction, and installing track in the rail corridor.
- Disruptive activities will be scheduled during the daytime wherever possible, and noise mitigations, such as barriers and coverings, will be used to reduce impacts.
- This work will take place between Pape Ave. to Eastern Ave. No new traffic or pedestrian impacts are expected.
- Construction vehicles will enter and exit from the existing access roads.
- Site lighting will be required at night and will be positioned away from residential properties.
- Noise and vibration from construction equipment, including excavators, track surfacing equipment, rollers, loaders, dump trucks and hand tools (hammers), can be expected.
- Monitoring instruments are in place to ensure that noise and vibration levels stay within acceptable limits.
- Construction equipment and materials will be properly secured within the work zone.
- This work may be delayed or rescheduled due to inclement weather and/or unforeseen circumstances.

About the Ontario Line

- 15.6-kilometre subway line that will make it faster and easier to travel within Toronto and beyond.
- 15 stops and more than 40 connections to other transit, including GO train, subway, LRT, streetcar, and bus lines.
- Less than 30 minutes from one end of the line to the other.
- 28,000 fewer car trips each day.
