Dear Ms O'Hara

I have asked on numerous occasions that Metrolinx cease and desist with contacting anyone other than myself.

I would ask that you please honour our request. As discussed the archaeology that you are proposing will not be proceeding without the consent of HDI where this would run contrary to the archaeologists professional obligations.

Mr. Williams is not participating in the broader negotiations and was unaware of Metrolinx's refusal to date to honour free prior and informed consent.

Please advise the names of the archeologists so that we can speak with them directly.

Regards,

[REDACTED]

Hello Todd,

Thank you for expressing HCCC's interest in participating in the anticipated archaeological fieldwork. This work is set to occur in the fall, and so we will ensure the HCCC is kept apprised once we have more details on the fieldwork and the consultant. You can feel free to send me a copy of your agreement and we can hold it on file if that's preferable.

Please let me know if you have any further questions.

We are also aware of emails received by [REDACTED], but wanted to ensure that we responded to your last email and [REDACTED] is cc'd here as per his request.

Thanks
Jaimi

Dear Ms. General,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. Attached you will find a letter providing an update on the project. The purpose of this letter is to:

- Provide an update on the scope of the project work
- share the initial draft of the Early Works Report for the proposed Corktown Station
- Invite your Nation to participate in upcoming archaeological fieldwork

In an effort to streamline your review, we draw your attention to the attachment which provides an overview of the expected environmental impacts and proposed mitigations, as we know this may be of specific interest to you.

Metrolinx is also preparing a letter specific to works being planned within the Don Valley as we recognize the significance of this waterway to many Nations. We hope to share that letter soon. We are happy to meet with your Nation to discuss the Ontario Line and address any questions or concerns that your Nation may have.

We ask that any comments on the draft Corktown Station Early Works Report be provided no later than April 15, 2021. Please note that the Noise and Vibration Report, which will be part of the Early Works Report is still being prepared and we will share with your Nation by March 19, 2021.

The draft Corktown Station Early Works Report is available at the following link: [REDACTED]

Please let us know as soon as possible if your Nation has interest in participating in future archaeological fieldwork.

We appreciate the volume of documents that Metrolinx has shared with your Nation.

If you have any questions or concerns, please do not hesitate to contact me.
Miigwetch,

Fallon

Hello Wayne,

Thank you for your interest in this archaeological work. We are happy to work with HDI to coordinate a site visit. I was hoping to confirm with you if HDI's interest is to visit the Moss Park and Ordinance Ave sites, or if this request applies to the broader archaeological assessment area associated with Corktown Station, including the First Parliament Site, which is a multi-component site.

Metrolinx staff could also attend any arranged site visit to answer any project specific questions you may have. Please let us know if you have an estimate for any costs associated with this site visit. As always, we are also happy to arrange for HDI to provide monitors as part of these archaeological assessments.

Once you confirm the details of the site visit, I can connect with the environmental team who can coordinate a date with HDI and Stantec.

Please let me know if you have any further questions or if I can be of any further assistance.

Thank you,
Jaimi

Good evening,

I'm inquiring about the on going archaeological work with your consultant Stantec specifically. I would like to arrange a site visit for myself to understand the details and scope Metrolinx proposed endeavor.

It has come to my attention a significant archaeological site and or sites is planning to be mitigated.

I look forward to hearing back.

Good afternoon Ms. O'Hara,

Further to [REDACTED] email, there has been no engagement on the application and HDI will need more information and capacity funding in order to be in a position to respond.

Ideally discussions will commence between Metrolinx and HDI later this month, however, at present there are no ongoing discussions. To the contrary, dialogue between Metrolinx and HDI has stalled since March 2021. Since that time, Metrolinx has not followed through on scheduling meetings, nor has Metrolinx substantively responded to HDI's questions and information requests regarding Metrolinx activities on Haudenosaunee territory or provided a response to HDI's formal objection to one of Metrolinx's projects, the Electrification EPR Addendum.

Given what has transpired over the last many months and the complete lack of engagement, HDI is seriously concerned by how Metrolinx is proceeding to move projects forward on Haudenosaunee territory. HDI continues to wait for Metrolinx to respond to the above and is hopeful that a meeting between Metrolinx and HDI will be scheduled shortly.

Kind regards,

[REDACTED]

Dear Ms. O'Hara:

I am interested in making sure the archaeology does not proceed where we have not provided consent for it to proceed ... please advise on who the licensed archaeologist who is responsible for this project because if it does proceed we are going to commence a professional complaint and attempt to have their license revoked. And as an aside how do you cope internally with ignoring treaty rights and participating in a project that simply treats indigenous people as an afterthought. It must be hard to do your job and have any sense of honour.

Dear Ms O'Hara:

I understand that this may seem redundant for you - it certainly is redundant from my perspective but we are opposed to all of the Projects that you've set out below where you know they interfere infringe and impair Haudenosaunee rights and interests.

We have been provided no means to review any of these projects and as such any comments I would make now would be meaningless. You are fully aware of this however you continue to insult me by sending me these emails asking for comment.

Metrolinx has failed to provide us with notification and it has failed to justify infringements caused by the activity contemplated by the reports set out below.

I very much resent the attempt, in a very colonial manner, to somehow limit our ability to comment by way of time frames that are being unilaterally imposed.

I do not believe it reasonable or appropriate that you set artificial deadlines to somehow imply that our constitutional rights can be impaired if we don't reply by a certain date. I find your email offensive where you know over and over again my comments in relation to Metrolinx's ability to completely ignore the need to obtain consent and/or justify infringements.

You indicate that you are prepared to meet to discuss how you might support our review but we have told you time and time again that the means for review involves your application which you steadfastly refuse to acknowledge or provide. To be honest we really don't need your 'help' but acknowledging our treaty rights as a starting point would be a good thing to do and at the same time acknowledge the need to obtain consent for projects in our treaty territory.

It is unfortunate that you have chosen to pursue this avenue instead of the process that we had put to you at our last meeting. I am not going to let you prejudice our position with these emails any further.

I now understand that the commitments made at that meeting by Metrolinx were meaningless and we will deal with Metrolinx accordingly through litigation where negotiation has obviously come to an end.

Please direct your emails to our legal counsel and do not send any further emails to me or anyone else with HDI.

Regards

Dear Metrolinx Representative:

We are writing in response to your February 7, 2022 notice of the Draft Environmental Impact and Assessment report concerning the Ontario Line.

HCCC/HDI has established rights within the Nanfan Treaty and Haldimand Treaty territories. An email attaching technical documents relating to development within that territory, and with a short timeframe for response, is not consistent with Haudenosaunee inherent Indigenous and treaty rights, including rights to free, prior and informed consent as well as Haudenosaunee rights to

determine and develop priorities and strategies for the development or use of their lands or territories and other resources.

In the absence of an Engagement Framework, we refer you to HDI's established process for engagement: <https://www.haudenosauneeconfederacy.com/departments/haudenosaunee-development-institute/development/>

[REDACTED]

[REDACTED]

Until meaningful engagement has taken place, HCCC/HDI objects to the approval of any Metrolinx projects within Haudenosaunee territory with the placement of our monitors on those projects expressly not constituting consent, approval or any form of engagement/consultation. An extension of the stated deadline will be needed for such engagement to occur.

Haudenosaunee Development Institute

Delivered Via Email:

Re: Ontario Line: Notice of Publication of Draft EIAR - HCCC/HDI

Dear ,

In response to correspondence received on February 9, 2022 from the Haudenosaunee Development Institute (HDI) on behalf of the Haudenosaunee Confederacy Chiefs Council (HCCC) regarding the Notice of Publication of the Draft Environmental Impact Assessment Report (EIAR), we are providing the following information and clarifications.

The Project

Metrolinx is overseeing the Ontario Line which will bring 15.6 kilometres of subway service to Toronto. The Ontario Line will stretch across the city, from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line will have 15 new stations, including six interchange stations, connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable service.

For more information about this project, please visit:

<https://www.metrolinxengage.com/en/engagement-initiatives/ontario-line>

Please see Figure 1 below for the proposed Ontario Line.

Figure 1 - Ontario Line

Project Engagement

Metrolinx has provided communications, project information, invitation to fieldwork and draft technical reports to HCCC/HDI for the Ontario Line (the “**Project**”). Please see the table below for a summary of communications sent, feedback received, and Metrolinx’s response.

Table 1 - Ontario Line Communication Summary

Ontario Line Communications with HCCC/HDI	Response Status	Feedback (summary of response received from HCCC/HDI)	Metrolinx Response
July 30, 2020 - Letter introducing the Ontario Line Project and sharing the initial drafts of the Early Works Report	No response received		
September 17, 2020 - Metrolinx provided a copy of the Draft Environmental Conditions Report and the Notice of Publication of the draft report.	No response received		
November 30, 2020 - Metrolinx provided a copy of the Final Environmental Conditions Report and Draft Exhibition Station Early Works Report	No response received		
January 19, 2021 - HCCC/HDI was invited to provide monitors to attend geotechnical and environmental site investigations in relation to borehole drilling on/near known archaeological sites at 271 Front St E, 44 Parliament St and 25 Berkeley St.	Response received on January 21, 2021	HCCC/HDI reached out to Metrolinx and the consultant and expressed interest in participating in this fieldwork	Metrolinx's contractor signed an agreement with HCCC/HDI and HCCC/HDI was able to participate in the fieldwork. Fieldwork notes were also sent to HCCC/HDI on February 4, 2021

February 1, 2021 - Metrolinx provided a copy of the Final Exhibition Station Early Works Report	No response received		
February 8, 2021 - Addendum to the Ontario Line South Stage 1 Archaeological Assessment	No response received		
March 11, 2021 - Metrolinx provided an update on the scope of the project work, shared an initial draft of the Early Works Report for the proposed Corktown Station and an invitation to participate in upcoming archaeological fieldwork	Responses received on April 1 2021 and April 8, 2021	<p>On April 1, 2021, HCCC confirmed they are interested in participating in the upcoming archaeological fieldwork. HCCC requested the names of the archeologists so HCCC could speak with them directly.</p> <p>On April 8, 2021, Aaron Detlor noted that he has asked Metrolinx to cease and desist with contacting anyone other than Aaron himself, and asked Metrolinx to honour this request. He also noted that the proposed archaeological fieldwork will not be proceeding without the consent of HDI.</p>	Metrolinx informed HCCC on April 8, 2021 that the work is planned to occur in the fall, and that Metrolinx will ensure the HCCC is kept apprised once we have more details on the fieldwork and the consultant.
March 22, 2021 - Metrolinx provided a copy of the Initial draft of Noise and Vibration for the Corktown Station Early Works Report	No response received		

April 12, 2021 - HCCC/HDI was invited to participate in Archaeological fieldwork associated with the Corktown Station and First Parliament site.	No response received		
April 30, 2021 - HCCC/HDI was invited to participate in future Archaeological fieldwork related to the Lower Don River Crossings	No response received		
May 12, 2021 - Metrolinx provided a copy of the Draft Corktown Station Early Works Report	No response received		
June 22, 2021 - Metrolinx provided a copy of the Draft Lower Don Bridge and Don Yard Early Works Report	No response received		
July 7, 2021 - HCCC/HDI was invited to provide monitors to attend geotechnical borehole drilling on/near known archaeological sites at 265 Front Street E	No response received		
July 15, 2021 - Metrolinx provided a copy of the Final Corktown Station Early Works Report	No response received		

July 28, 2021 - Metrolinx provided a copy of the Initial draft of Lakeshore East Joint Corridor Noise and Vibration Operations Report	No response received		
August 6, 2021 - HCCC/HDI was invited to participate in Stage 2 Archaeological Assessment and Natural Environment fieldwork related the Ontario Line Project	No response received		
August 18, 2021 - Metrolinx provided a copy of the Initial draft of Environmental Impact Assessment Report Stage 1 Archaeological Assessment Report and Natural Environment Report	No response received		
August 25, 2021 - Metrolinx provided a copy of the Final Lower Don Bridge and Don Yard Early Works Report	No response received		
September 23, 2021 - Metrolinx provided a copy of the Draft Lakeshore East Joint Corridor Early Works Report	No response received		

<p>October 7, 2021 - Draft Marine Archeological Overview Assessment for the Ontario Line - Lower Don Bridge Project</p>	<p>No response received</p>		
<p>October 12, 2021 - HCCC/HDI was invited to participate in Stage 2 Archaeological Assessment at Moss Park and Ordnance Park</p>	<p>Response received on October 13, 2021</p>	<p>HCCC/HDI requested a site visit to understand the details and scope of the archaeological assessment work planned for Corktown station and First Parliament site.</p>	<p>Metrolinx responded that they would be happy to coordinate a site visit with HDI and asked HDI to confirm how many individuals would attend and the best dates for the visit.</p>
<p>November 3, 2021 - Metrolinx shared a letter providing an overview of the Metrolinx application for a permit under the Endangered Species Act to support the Ontario Line Project.</p>	<p>Response received on November 3, 2021 and November 4, 2021.</p>	<p>HDI responded on November 3, 2021 noting that they do not characterize anything passing between HDI and Metrolinx as ongoing discussions, and noted that there has been no engagement on the application for the permit.</p> <p>On November 4, 2021, HDI's counsel noted that there has been a lack of engagement between Metrolinx and HDI and is concerned about how Metrolinx is proceeding to move projects forward on Haudenosaunee territory. They also expressed their wishes to have a meeting scheduled between Metrolinx and HDI.</p>	

November 17, 2021 - Metrolinx provided a copy of the Final Lakeshore East Joint Corridor Early Works Report	No response received		
November 18, 2021 - Metrolinx provided a copy of the Initial draft of Environmental Impact Assessment Report	No response received		
November 18, 2021 - HCCC/HDI was invited to participate in Stage 2 Archaeological fieldwork associated with the Thorncliffe segment of the Ontario Line project	Response received on November, 18 2021	On November 18, 2022, the Haudenosaunee Development Institute, as agents of the Haudenosaunee Confederacy Chiefs Council, stated their concern that fieldwork was planned to take place without consent having been provided by the Nation. They requested information on the licensed archaeologist leading the fieldwork.	
December 17, 2021 - HCCC/HDI was invited to participate in the planned Stage 2 Archaeological Assessment work associated with Corktown Station	No response received		

February 7, 2022 - Metrolinx provided a copy of the Draft Environmental Impact Assessment Report	Response received on February 9, 2022	On February 9, 2022, the Haudenosaunee Development Institute, as agents of the Haudenosaunee Confederacy Chiefs Council, stated that until meaningful engagement has taken place, they object to all Metrolinx projects within Haudenosaunee territory. The Haudenosaunee Development Institute requested an extension of the stated deadline.	
February 23, 2022 - HCCC/HDI was invited to participate in the archaeological monitoring of borehole drilling planned to occur in the Lower Don Bridge area	No response received		
March 23, 2022 - Invitation to participate in Stage 2 Fieldwork at Ordnance Park for the Ontario Line Project.	No response received		
April 8, 2022 - Metrolinx provided a copy of the Final Environmental Impact Assessment Report	No response received		

Technical Environmental Details

We have summarized some technical details from the EIAR relating to impacts identified and their associated mitigation measures and future commitments.

Archaeology

In support of the EIAR, a Stage 1 Archaeological Assessment (Stage 1 AA) report (provided in *Appendix A3*) was prepared as part of the EIAR. The Stage 1 AA identified areas with known archaeological resources and areas of archaeological potential, where archaeological remains could be found. The Stage 1 AA was conducted in accordance with the MHSTCI's Standards and Guidelines for Consultant Archaeologists (Government of Ontario 2011). Potential impacts, mitigation measures and monitoring activities for archaeology are identified in *Section 5.5, Table 5-5* of the EIAR.

Subsequent archaeological investigations - consisting of one or more of Stage 2 archaeological assessment, Stage 3 archaeological assessment, and Stage 4 archaeological mitigation - will be carried out prior to construction, with follow-up archaeological monitoring during construction if required. These archaeological investigations will also be conducted in accordance with the Ministry of Heritage, Sport, Tourism and Culture Industries' Standards and Guidelines for Consultant Archaeologists (Government of Ontario 2011). If the Project footprint extends beyond what has been previously assessed, or if previously unknown archaeological resources are unexpectedly exposed or known archaeological resources are subject to accidental disturbance, subsequent archaeological investigations may be required to either determine the potential for the recovery of archaeological resources or to document archaeological resources, as appropriate. Indigenous Nations will be invited to participate in all archaeological investigations.

The Stage 1 AA determined that approximately 31 hectares of the study area possesses archaeological potential for which a Stage 2 archaeological assessment is recommended. Additionally, the desktop review identified two registered archaeological sites located in the Ontario Line South study area with outstanding cultural heritage value or interest. These are the Parliament Site and the Lime Kiln works site. Stage 4 mitigations are recommended for these sites.

With the implementation of the mitigation measures and monitoring activities identified in *Section 5.5, Table 5-5* of the EIAR (including the completion of further studies and adherence to the recommendations from those studies), potential negative impacts to archaeological resources from the Project will be successfully minimized or mitigated.

Cultural Heritage

A Heritage Detailed Design Report (HDDR), found in *Appendix A2* of the EIAR, was completed for this Project identifying Built Heritage Resources (BHRs), Cultural Heritage Landscapes (CHLs) and Heritage Conservation Districts (HCDs) which the Project will likely directly impact.

The HDDR identified a total of 272 BHRs, CHLs and HCDs located in the study area with 36 of such BHRs, CHLs and HCDs anticipated to be directly impacted by the Project, as follows:

- 19 in the Ontario Line West study area:
 - Liberty Trail CHL
 - University Avenue, east and west side, Front Street north to Queen's Park
 - Cenotaph, north side of Queen Street West at University Avenue
 - 16 resources containing buildings with some level of heritage value or interest
- 10 in the Ontario Line South Study Area:
 - Former location of the first railway crossing of the Don River
 - Corktown Common
 - Osgoode Hall
 - First Parliament Site
 - Seven resources containing buildings with some level of heritage value or interest
- 5 in the Ontario Line North Study Area:
 - Ontario Science Centre
 - Four resources containing buildings with some level of heritage value or interest

Encroachment will also occur into five HCDs in the Study Area (King-Spadina, Queen Street West, Riverdale, St. Lawrence Neighbourhood, and Garden District), which will cause a physical impact including introduction of new elements to the HCD, alterations to a contributing property, or diminishment in integrity of the HCD due to the introduction of new elements. In addition, 123 of the BHRs in the Study Area may experience indirect vibration impacts during construction and require vibration monitoring.

The HDDR also describes how conditions associated with consent from the Minister of Heritage, Sport, Tourism and Culture Industries (Minister's Consent) will be met based on the proposed/recommended design. The Project will directly impact four Provincial Heritage Properties of Provincial Significance (PHPPS):

- First Parliament (OLS-034);
- Osgoode Hall (OLS-113);
- University Avenue Streetscape (OLW-136) and South African War Memorial (OLW-137); and
- Ontario Science Centre (OLN-005).

Metrolinx worked closely with the Ministry of Heritage, Sport, Tourism and Culture Industries, Infrastructure Ontario, and the Ontario Ministry of Transportation to prepare an application for Minister's Consent for First Parliament, Osgoode Hall, and the University Avenue Streetscape including the South African War Memorial. Consent from the MHSTCI Minister for proposed impacts associated with these sites was received, with conditions, on March 18, 2021. Upon review and further discussion, it was determined that there was not sufficient information regarding extent of impacts and mitigation options available at the Ontario Science Centre to warrant an application at this time.

Impacts, mitigation measures, and monitoring activities for directly impacted BHRs, CHLs, and HCDs are outlined in *Section 5.4, Table 5-4* of the EIAR. Further details can also be found in the HDDR (see *Appendix A2* of the EIAR). For details of each heritage resource, please refer to *Appendix B to D* of the HDDR (*Appendix A2* of the EIAR).

With the implementation of the mitigation measures and future commitments identified in *Table 5-4* of the EIAR (including the completion of further studies and adherence to the recommendations from those studies), potential negative impacts to cultural heritage resources from the Project will be successfully minimized or mitigated.

Hunting and Trapping

The Ontario Line study area is heavily urbanized with a mix of residential, commercial and industrial uses abutting the majority of the corridor to either side. As there is little to no opportunity for hunting or trapping in the Project area due to these land uses, the Project is therefore not anticipated to affect hunting or trapping activities.

Natural Environment

In support of the EIAR, a Natural Environment Report (NER), provided in *Appendix A1* of the EIAR was prepared. Potential impacts, mitigation measures and monitoring activities are identified in *Section 5.2, Table 5-2* of the EIAR.

During the construction phase, removal of vegetation communities and anthropogenic structures will be required for the above-ground Project footprint. This has the potential to negatively impact wildlife, including Species at Risk, that may be using the vegetation and/or structures to nest, breed and/or roost. Construction activities also have the potential to impact adjacent vegetation and natural features that will be retained.

Mitigation measures are outlined in the EIAR (see *Section 5.2, Table 5-2*) to reduce potential impacts on vegetation and wildlife and to compensate for the loss of vegetation and/or wildlife habitat, where applicable. Monitoring activities are also outlined to confirm that the mitigation measures are in place and effective, and that compensation measures are successful. Mitigation measures include, but are not limited to, pre-construction surveys to confirm the presence of wildlife and Species at Risk, implementation of construction timing windows and installation of appropriate exclusion measures and fencing.

No natural environment impacts are anticipated during construction for the below-ground Project footprint. The general impacts of construction for above ground development are well-known and appropriate mitigation has been recommended based on the knowledge of the elements of conceptual design available at the time of the EIAR. It should be noted that the design is evolving and as details are finalized, it is recommended that a quantitative review of the areas of impact (e.g., area in hectares of temporary and permanent construction footprints based on final design) be verified to assess and facilitate the understanding of additional mitigation measures and the implementation of design specific mitigation where applicable.

Watercourse Crossings and Fish Habitat

The Don River provides a direct fish habitat to a generally tolerant warm to cold water fish community and conditions were non-limiting throughout. No habitat classified as critical by the federal *Species at Risk Act* and no aquatic Species at Risk that are afforded protection under the Ontario *Endangered Species Act, 2007* or the federal *Species at Risk Act* were identified within the Ontario Line study area.

The proposed in-water work required for bridge construction has potential for temporary effects on fish and fish habitat including sedimentation, spills and leaks and underwater noise. The effects on fish and fish habitat can be reduced with the design and implementation of mitigation measures including a restricted activity construction timing window, and erosion and sediment control measures among others. No long-term impacts to the aquatic habitat are anticipated.

Potential impacts, mitigation measures, and monitoring activities for aquatic habitat are outlined in *Section 5.2, Table 5-2* of the EIAR. Further details can be found in the Natural Environment Technical Report (see *Appendix A1*).

Species at Risk

The Ontario Line study area has the potential to support various Species at Risk. Habitat for Barn Swallow, Chimney Swift and Species at Risk bats has the potential to occur in the anthropogenic structures and buildings located within the Ontario Line study area. Woodland and forest communities in the Ontario line study area also have the potential to support Species at Risk bats as well as Butternut. Wetlands in the Ontario Line study area and the Don River have the potential to support Blanding's Turtle. Eroded banks along the Don River and associated valleys (i.e., Walmsley Brook Valley) have the potential to support Bank Swallow.

All requirements of the *Endangered Species Act, 2007* will be met and species-specific mitigation measures will be implemented, in consultation with the Ministry of the Environment, Conservation and Parks (MECP).

Potential impacts, mitigation measures, and monitoring activities for Species at Risk are outlined in *Section 5.2, Table 5-2* of the EIAR. Further details can be found in the Natural Environment Technical Report (see *Appendix A1*).

Construction

Construction activities associated with the scope of work being assessed as part of the EIAR are generally anticipated to occur on previously disturbed lands and within the Ontario Line Project footprint. Through the application of the mitigation and monitoring measures detailed within the EPR (*Section 5*), potential negative impacts associated with the construction and operation of Project components will be successfully minimized or mitigated.

Noise, Vibration, and Air Quality

Noise, vibration and air quality studies have been undertaken to assess potential impacts associated with the construction and operation of the Ontario Line and to determine where mitigation measures and monitoring activities are warranted, as documented in the EIAR, (refer to *Sections 5.7 and 5.8* of the EIAR), and the Noise and Vibration and Air Quality Reports

provided in *Appendix A5 and A6* respectively. Mapping of noise and vibration receptors and recommended locations for noise mitigation and monitoring are included within the Noise and Vibration Report (*Appendix A6*). Mapping of current and potential future air quality sensitive receptors are included within the Air Quality Report (*Appendix A6*). Through the application of the mitigation and monitoring measures detailed within the EIAR (refer to *Sections 5.7 and 5.8* of the EIAR), potential negative impacts associated with the construction and operation of Project components will be successfully minimized or mitigated.

Commitments for Future Work

As described in *Section 6.8* of the EIAR, Metrolinx is committed to continuing stakeholder and public engagement and consultation beyond the regulatory requirements set out in the Ontario Line Regulation, including with Indigenous Nations. This includes:

- Maintaining the Project Engagement Webpage (www.metrolinx.com/ontarioline) so interested parties can access updated Project information;
- Maintaining the Project Distribution List to help ensure all interested parties receive Project updates; and
- Continuing discussions with Indigenous Nations, members of the public, and local stakeholders with respect to potential impacts and mitigation throughout planning and construction, as appropriate.

Based on the information provided to the HCCC/HDI, Metrolinx respectfully asks that HCCC/HDI advise if there are any negative project impacts that HCCC/HDI has identified or that we have not considered.

The final EIAR and Technical Reports are available at the following link: metrolinxengage.com/en/content/full-report-environmental-impact-assessment-report

Should you have any questions, please do not hesitate to contact us.

Sincerely,

Jesse Pakkala, Manager, Environmental Programs and Assessment, Metrolinx

Importance : Haute

Hi Maxime – I'm including James Francis on this email chain, as I understand he is the current point person for confirming the status of this work.

James – please advise ASAP as Maxime's representative needs to travel today if they are to be present at the site tomorrow.

Thanks,

Krista

Good morning, Maxime.

Schedule remains the same, Feb 2 – 10 for the Stantec drilling. Your monitor can arrive on-site for 8:00 am on Tuesday February 2, 2021 at 271 Front Street. Crew will be parking in public parking; there is a lot immediately south of the site (see attached map).

Our archaeologist on-site will be Christian Meier (cc'd). He can be reached at (226) 971-3831.

The site supervisor will be Scott Duncan (cc'd). He can be reached at (416) 938-9652.

I'm working to get a subcontractor agreement together for this work and will send it over to you as soon as it is ready.

If you have any questions or concerns please do not hesitate to let me know.

Sincerely,

PDR

Good morning Paul,

Thanks for your email and clarification.

We will definitely have a representative on field with you and your team to participate in those assessment.

Can you effectively please provide us the exact logistic details when you can.

Regarding our rates they are effectively still the same.

We can provide an estimate of our fees for this particular project if it can help.

Best and stay safe,

Maxime

Good afternoon, Maxime.

Wood and Stantec are conducting two separate drilling programs which will require monitoring. Wood's BH drilling is planned to begin this Friday January 22, 2021. I will leave to Peter to advise further there.

Stantec's drilling program is scheduled for Feb 2 until Feb 10, 2021. I can advise shortly on more logistics details for this work.

Can you please advise on any changes to your rates since last year?

Sincerely,

PDR

Hi Maxime,

I am Flavia, the project coordinator for the Ontario Line and will be assisting with the borehole drilling monitoring.

The archaeological monitoring work will be carried out by Stantec (Paul Ritchie) and Wood (Peter Popkin), that are cc'd in this email and contact info is presented below. The work is planned to occur from Jan 22 to Feb 10.

Peter Popkin
Mobile: +1 (905) 329-6456

Paul Ritchie

Subject: RE: Ontario Line - Archaeological monitoring for Borehole Drilling

Good afternoon Fallon,

First of all let me thank you for your letter and invitation in participating in the upcoming Archaeological monitoring for Borehole Drilling.

We will effectively want to have a representative present during this work.

Would you be able to put us in contact with the appropriate person to coordinated the logistic ?

Thanks and best regards,

Maxime

Objet : Ontario Line - Archaeological monitoring for Borehole Drilling

Dear Maxime,

Please find attached a letter inviting participation in upcoming archaeological monitoring for borehole drilling that is taking place at various locations to support environmental assessment and geotechnical studies related to the Ontario Line Subway project. The boreholes are being drilled in locations that have known archaeological potential and as such Metrolinx is ensuring that a consultant archaeologist is on-site to monitor. We'd like to extend this invite to your Nation as well. We appreciate that during these uncertain times of COVID-19 this may not be possible or safe for your Nation. We are happy to provide any fieldnotes taken by the consultant archaeologist and/or provide a summary of the data collected if this is at all helpful to you. Please let us know if there is any other way we can support your Nation during this time.

The boreholes are anticipated to be completed over the next several weeks beginning this Friday on **January 22, 2021**. Please let me know if you have interest in participating as soon as possible, and we will work with you and the project team to coordinate.

Miigwetch,

Fallon

Objet : Ontario Line - Project Update and Draft Corktown Station Early Works Report for Review + Invitation to Participate in Archaeological Fieldwork

Dear Maxime,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. Attached you will find a letter providing an update on the project. The purpose of this letter is to:

- Provide an update on the scope of the project work
- share the initial draft of the Early Works Report for the proposed Corktown Station
- Invite your Nation to participate in upcoming archaeological fieldwork

In an effort to streamline your review, we draw your attention to the attachment which provides an overview of the expected environmental impacts and proposed mitigations, as we know this may be of specific interest to you.

Metrolinx is also preparing a letter specific to works being planned within the Don Valley as we recognize the significance of this waterway to many Nations. We hope to share that letter soon. We are happy to meet with your Nation to discuss the Ontario Line and address any questions or concerns that your Nation may have.

We ask that any comments on the draft Corktown Station Early Works Report be provided no later than **April 15, 2021**. Please note that the Noise and Vibration Report, which will be part of the Early Works Report is still being prepared and we will share with your Nation by March 19, 2021.

The draft Corktown Station Early Works Report is available at the following link:

Please let us know as soon as possible if your Nation has interest in participating in future archaeological fieldwork.

We appreciate the volume of documents that Metrolinx has shared with your Nation.

If you have any questions or concerns, please do not hesitate to contact me.

Miigwetch,

Fallon

À : Mélanie Vincent; mario gros-louis; louis lesage

Cc : Maria Zintchenko; Merlin Yuen; Crystal Ho

Objet : Ontario Line Project - Invitation to Meet & provide input on First Parliament Site

Dear Ms. Vincent, Mr. Gros-Louis, and Mr. Lesage,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. We recently communicated with your Nation about the proposed Corktown Station which is along the planned alignment of the Ontario Line. This location includes parcels of land which were once the site of Upper Canada's First Parliament buildings. Metrolinx and its partners are exploring opportunities to commemorate the history of this site, and have been engaging with various parties including the City of Toronto and the Mississaugas of the Credit First Nation, on whose treaty territory this project is occurring.

Given the significant chance of recovering Indigenous and European artifacts during the Corktown Station Early Works, a detailed archaeological workplan is being developed. Metrolinx recognizes the importance and value of Indigenous monitors for any archaeology related to the Ontario Line Project. In our previous communication, an invitation was included for your Nation to participate in any archaeological fieldwork and monitoring during the Corktown Station Early Works, including demolition of modern buildings currently on the First Parliament site.

This work is anticipated to commence in Fall 2021, and if you have not yet expressed interest in participating, please feel free to do so at your earliest convenience. As a reminder any comments on the draft Corktown Station Early Works Report should be provided no later than **April 15, 2021**.

Metrolinx recognizes that the history of this location extends beyond European use, and as such, wants to take the opportunity to understand any significance it may have to Indigenous Nations. Metrolinx would like to meet with your Nation to discuss the First Parliament site, its commemoration, as well as review the broader Ontario Line project if you wish. We recognize that traditional knowledge of this area may be sacred and/or not appropriate to be shared, but would appreciate any information that may be appropriate for Metrolinx to consider.

We would very much appreciate meeting with your Nation to discuss in more detail. Please let me know if you have any questions or concerns.

Miigwetch,

Fallon

Date: Friday, April 30, 2021 1:24:02 PM
Attachments: [OL-Don River Letter 2021 HWN.pdf](#)

Dear Mr. Gros-Louis and Ms. Janssen,

Metrolinx continues to progress its environmental studies for the Ontario Line Project. We wanted to keep you aware that part of the project scope falls within the Don Valley and River System, and we recognize the importance of Valley and the waters within. Attached you will find a letter providing an update on the project and information regarding the planned work and environmental assessments that are anticipated to take place within the Don Valley. We also wanted to invite your Nation to participate in the planned Stage 2 Archaeological Assessments that are anticipated to occur as part of the upcoming field season.

We would very much appreciate meeting with your Nation to discuss in more detail. Please let me know if you have any questions or concerns.

April 30, 2021

Grand Chief Rémy Vincent
Huron-Wendat Nation
255 Place Chef Michel Laveau
Delivered by email

Dear Grand Chief Vincent,

RE: Ontario Line Project - Don River Crossings & Stage 2 Archaeological Assessment Update

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Huron-Wendat Nation. Metrolinx appreciates and respects Huron-Wendat Nation's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to provide more information to Huron-Wendat Nation about the Ontario Line crossings of the Don River and its tributaries. Metrolinx appreciates the significance of the waters and wishes to better understand how the potential impacts of construction around the Don River may be of interest to Huron-Wendat Nation.

Background

The Project is a new subway line with connections to Line 1 (Yonge-University) subway service at Osgoode and Queen Stations, Line 2 (Bloor-Danforth) subway service at Pape Station, and Line 5 (Eglinton Crosstown) service at the future Science Centre Station. Fifteen stations are proposed, with additional connections to three GO Transit lines (Lakeshore East, Lakeshore West and Stouffville), and the Queen, King, Bathurst, Spadina, Harbourfront and Gerrard/Carlton streetcar routes. The Project will reduce crowding on Line 1 and provide connections to new high-order rapid transit neighbourhoods. More information on the Project can be found on our website: <http://www.metrolinx.com/ontarioline>.

Work in the Don River System

As part of the Ontario Line Project, the following four crossings within the Don River system are proposed:

- Location 1: Lower Don River Crossing (Lower Don Bridge);
- Location 2: Millwood Road Crossing;

- Location 3: Walmsley Brook Crossing; and
- Location 4: West Don River Crossing north of Overlea Boulevard.

Locations 1-4 are shown in **Figure 1** and described in further detail below.

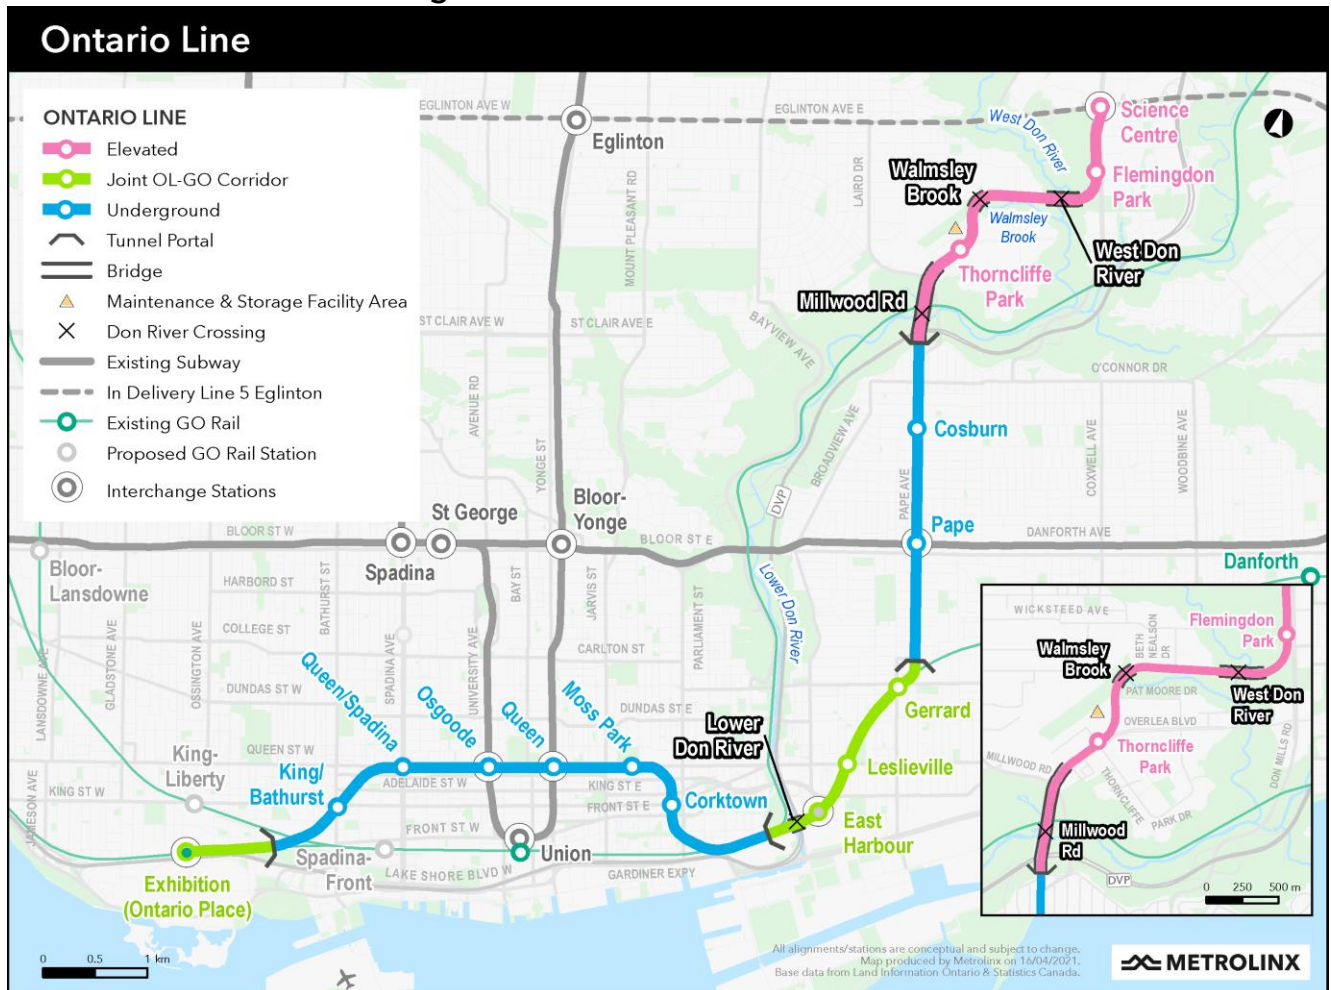

Figure 1: Ontario Line Project - Proposed Don River System Crossings

The environmental assessment for the Ontario Line Project is being completed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20) made under the *Environmental Assessment Act*. Construction of the Lower Don Crossing (Location 1) will be assessed in the Lower Don Bridges and Don Yard Early Works Report, that is anticipated to be shared with Huron-Wendat Nation in summer 2021. Construction of the other three crossings (Locations 2-4) will be assessed in the Environmental Impact Assessment Report, that is planned to be shared with Huron-Wendat Nation in early 2022.

Location 1: Lower Don River Crossing (Lower Don Bridge)

A new bridge is planned to be built on the north side of the existing Lakeshore East rail bridge at the Lower Don River, with space for Ontario Line tracks going in both

directions. We are also planning pedestrian and cycling connections across the Lower Don River.

Location 2: Millwood Road Crossing

The underground section of the Ontario Line running under Pape Avenue will emerge from the southern embankment of the Don Valley on an elevated guideway crossing the Don River, west of the Leaside Bridge (Millwood Road). The elevated guideway will connect to Thorncliffe Park in the north.

Location 3: Walmsley Brook Crossing

An elevated guideway will cross the Walmsley Brook tributary of the West Don River north of Pat Moore Drive. The guideway will then continue east across Beth Nealson Drive.

Location 4: West Don River Crossing (north of Overlea Boulevard)

The elevated guideway will cross the West Don River, north of Overlea Boulevard. This section of the route will connect to Don Mills Road and the future Flemingdon Park Station.

Field Surveys and Studies

As project planning is still in progress, environmental field surveys and studies as well as the timing of this work are being determined. Environmental field surveys and studies that may occur within or near the Don River include Stage 2 archaeological assessment and natural environment surveys (e.g., Species at Risk and tree surveys). Studies, surveys and their timing will be confirmed as project planning progresses. Further details are anticipated to be available in mid-Summer 2021.

Update on Archaeology

Metrolinx is currently planning to undertake Stage 2 Archaeological Assessments (AA) near the Don River starting in Fall 2021. The Stage 2 AA investigations will assess areas of identified archaeological potential within the Ontario Line study area which may be affected by the construction of the Project. Stage 2 AA fieldwork consists of test pit surveys at 5 m intervals within areas of previously identified archaeological potential.

Metrolinx would appreciate any interest Huron-Wendat Nation may have in participating in the Stage 2 AA fieldwork. Some of the Stage 2 AA may occur on lands within the Toronto and Region Conservation Authority's (TRCA) property boundaries and regulated area. Metrolinx will coordinate with TRCA to ensure that Indigenous

Nations are provided the opportunity to participate in Stage 2 AA investigations. Upon receipt of Huron-Wendat Nation's interest in participating, Metrolinx will work to coordinate your Nation's involvement.

As Metrolinx continues to undertake environmental due diligence for this project, additional archaeological assessment reports are anticipated to be completed. Metrolinx will ensure that Huron-Wendat Nation will be made aware of and engaged regarding any future archaeological assessments, and especially the discovery and preservation of Indigenous artifacts. Metrolinx will also ensure that future archaeological assessments are provided to Huron-Wendat Nation in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries

Invitation for Input

We are committed to an open, respectful, and transparent engagement with Huron-Wendat Nation. We recognize the potential significance of this project to Huron-Wendat Nation and wanted to keep you apprised of this project. We welcome meeting in the near future to discuss this project and its possible impacts and ways to appropriately engage with Huron-Wendat Nation.

We are happy to address any questions that Huron-Wendat Nation may have about the work proposed in the Don River system or the Ontario Line Project as a whole. If you require additional information or materials, or if you wish to discuss this Project in more detail or set up an in-person meeting, please contact the Indigenous Relations Office at your earliest convenience at IndigenousRelations@metrolinx.com.

Metrolinx thanks you for the time in reviewing this letter. Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*.

Yours Truly,

A handwritten signature in dark ink, appearing to read 'f. melander'.

Objet : RE: Ontario Line Project – Archaeological Monitoring for Borehole Drilling - 265 Front St East
- Huron - Wendat Nation

Dear Grand Chief Vincent,

Please find attached a letter inviting participation in upcoming archaeological monitoring for borehole drilling that is taking place next week at 256 Front Street in Toronto to support environmental assessment and geotechnical studies related to the Ontario Line Subway project. The boreholes are being drilled in locations that have known archaeological potential and as such Metrolinx is ensuring that a consultant archaeologist is on-site to monitor. If you are not able to attend, we are happy to provide any fieldnotes taken by the consultant archaeologist and/or provide a summary of the data collected if this is at all helpful to you.

The boreholes are anticipated to be completed between July 12 and July 16, 2021. Please let me know as soon as possible if you have interest in participating, and we will work with you and the project team to coordinate. And just a final note for your information, both Fallon Melander and Jaimi O'Hara, who are usually Metrolinx's main point of contact with your Nation, are away from the office this week. Hence you are receiving this communication from me.

Miigwetch,

Make today great,

Christine Parris (she, her, hers)

Hi Isabelle-

Thank you for confirming your interest in participating in the upcoming works. The Stage 2AA work will be carried out by OLTA and the main contacts are Marci Roan-Polk and Paul Ritchie (cc'd in this email). The work is planned to start on **September 24** and Marci will contact you with the agreement details.

The natural environment field work we have butternut surveys planned for mid-September, pending on obtaining authorization.

Are you also interested in participating in the Natural Environment work?

Make today great,

Subject: Invitation for Participation – Ontario Line Project - Archaeological Assessments and Natural Environment Surveys

Dear Stéphanie,

Metrolinx is working with its consultant HDR to provide opportunities for participation in upcoming Archaeological Assessment and Natural Environment fieldwork associated with the Ontario Line. Please find attached a letter inviting your Nation to participate.

The fieldwork is anticipated to late August - early September 2021. Please let me know if you have interest in participating as soon as possible, and we will work with you, the project team and HDR to coordinate.

If you have any questions or concerns, please feel free to contact the Indigenous Relations Office at anytime.

Thank you,

Jaimi O'Hara

**Re: Ontario Line Project – Stage 1 AA and Natural Environment Technical Report
for Review_HWN**

Dear Ms. O'Hara,

Further to your email addressed to the Huron-Wendat Nation dated August 18, 2021, on Stantec's 2021 Stage 1 Archaeological Assessment for the Ontario Line Project, the Huron-Wendat Nation (HWN) would like to thank you for giving us this opportunity to provide comments and feedback.

The report indicates that the project is situated on various lots and concessions (listed in Table 1 of the report) in the Former Geographic Township of York, York County, now City of Toronto. It consists of a new, approximately 16km long, subway line from Exhibition/Ontario Place to the Ontario Science Centre, including various connections and fifteen stations. It will be constructed in a dedicated ROW, and include elevated, tunneled, and at-grade segments.

The report contextualizes the study area by providing an adequate summary of the Post-Contact Indigenous Resources and the Euro-Canadian Resources (describing the development of York Township, the City of Toronto, the Toronto and Nipissing Railway, and the Grand Trunk Railway). For more precise information on the study area specifically, Tremaine's 1860 map of County of York, Canada West, and Miles and Co.'s 1878 Illustrated Historical Atlas of County of York were reviewed (while noting the limits of using such sources). In 1860, the study area included various historic features and

transportation routes. In 1878, settlement had increased in and around the study area. Fire Insurance Plans from 1880 to 1903 were also reviewed, and showed that “Much of the study area was historically occupied by residences throughout the late 19th and into the early 20th centuries. Most of these properties have small structures indicated at the rear of the property which would have been used as privies, latrines, cisterns, wells, or a combination of these.”

Regarding the environmental context, the report indicates that the study area is part of the Iroquois Plain physiographic region and of the South Slope physiographic region. The soils present are also indicated, and the report notes that “A large part of the City of Toronto would have historically consisted of a variety of soils; however, subsequent urban and suburban development has resulted in many of the natural soils being obscured by development activities and they are presently unidentifiable (Department of Agriculture 1954).” Additionally, the presence of several water sources in the vicinity (Garrison Creek, Russell Creek, Taddle Creek, and the Don River) is noted.

The Pre-Contact Indigenous Resources are also described adequately. The report mentions that the study area is situated near the Don River settlement sequence which includes sites from the early 14th century (like the Moatfield site) to the late 15th century (like the Keffer site). Still, Toronto’s extensive development during the 20th century removed many sites from the archaeological record.

79 archaeological sites (the vast majority of which are Euro-Canadian) are known within 1km of the study area. 42 of them are within 300m, and, of these, four are directly within the study area: the Grand Trunk Bridge Abutments (AjGu-56, a Euro-Canadian transportation site; no CHVI), the Pilings next to Service Bridge (AjGu-57, a Euro-Canadian transportation site; no CHVI), the Parliament site (AjGu-41, a Euro-Canadian administrative building; Stage 4 recommended), and the Toronto Lime Kiln Works (AjGu-61 and AjGu-64, a Euro-Canadian industrial lime kiln and homestead; Stage 4 recommended). 54 previous archaeological assessments have been conducted within 50m of the study area, and are summarized in the report. ASI’s 2004 Master Plan of

Archaeological Resources for the City of Toronto was also consulted. It indicates that the study area includes areas of archaeological potential.

The assessment included a random spot check property inspection. The existing conditions of the study area are well described, and the exact route and the new stations proposed along this route are indicated. The report states that “The station footprints and temporary workspaces within the downtown Toronto section of the route between Exhibition and the Don River are predominantly occupied by either paved parking lots or existing multi-story structures with below-grade foundations. Station and temporary workspace footprints east of the downtown section, along the Lakeshore East, Pape Avenue, and Thorncliffe sections of the route are predominantly suburban areas of the City, which were largely only developed at the end of the 19th century and into the 20th century. Many of these areas are also former industrial lands which were demolished and paved over in the 20th century. There are small areas of parkland throughout the study area east of the downtown.”

The study area meets several criteria indicative of archaeological potential: it is within 250m of several watercourses, and it includes registered archaeological sites, areas of historic settlement, and historical landmarks. In multiple areas however disturbance has removed this potential. The report indicates that most of the study area had already had a Stage 1 AA by AECOM. The majority of AECOM’s conclusions and recommendations were confirmed by Stantec, but some were changed because of additional information from reports not previously consulted and the property inspection. Notably, some areas that AECOM recommended for a Stage 2 AA were documented by Stantec to be extensively disturbed.

Stantec’s final conclusions are illustrated in Figures 12.1-12.22. There are areas that retain archaeological potential and where a Stage 2 AA is recommended. The areas associated with sites AjGu-41 and AjGu-61/64 require Stage 4 mitigation. Parts of the study area were previously assessed and no further assessment was recommended. Some areas were documented during the property inspection to be steeply sloped, and others are disturbed,

and no further assessment is recommended for them. Finally, the report indicates that no further assessment is required for the parts of the study area where the Ontario Line will be tunneled through bedrock, because this will not disturb any archaeological resources that may be present within the soil above it.

In conclusion, the report adequately contextualizes the study areas from a historical, environmental, and archaeological point of view, and the conclusions are logical. The report is satisfactory for the purposes of the Stage 1 assessment for the Ontario Line project. Regarding future archaeological work, the Huron-Wendat Nation is requesting to be consulted at every stage and, of course, provide liaisons for all field work. Please do not hesitate to contact our team should you have questions and to follow up with the next steps.

Best regards,

Alexandra Bédard-Daigle

**Re: Ontario Line Project – Stage 1 AA and Natural Environment Technical Report
for Review_HWN**

Dear Ms. O'Hara,

Further to your email addressed to the Huron-Wendat Nation dated August 18, 2021, on Stantec's 2021 Stage 1 Archaeological Assessment for the Ontario Line Project, the Huron-Wendat Nation (HWN) would like to thank you for giving us this opportunity to provide comments and feedback.

The report indicates that the project is situated on various lots and concessions (listed in Table 1 of the report) in the Former Geographic Township of York, York County, now City of Toronto. It consists of a new, approximately 16km long, subway line from Exhibition/Ontario Place to the Ontario Science Centre, including various connections and fifteen stations. It will be constructed in a dedicated ROW, and include elevated, tunneled, and at-grade segments.

The report contextualizes the study area by providing an adequate summary of the Post-Contact Indigenous Resources and the Euro-Canadian Resources (describing the development of York Township, the City of Toronto, the Toronto and Nipissing Railway, and the Grand Trunk Railway). For more precise information on the study area specifically, Tremaine's 1860 map of County of York, Canada West, and Miles and Co.'s 1878 Illustrated Historical Atlas of County of York were reviewed (while noting the limits of using such sources). In 1860, the study area included various historic features and

transportation routes. In 1878, settlement had increased in and around the study area. Fire Insurance Plans from 1880 to 1903 were also reviewed, and showed that “Much of the study area was historically occupied by residences throughout the late 19th and into the early 20th centuries. Most of these properties have small structures indicated at the rear of the property which would have been used as privies, latrines, cisterns, wells, or a combination of these.”

Regarding the environmental context, the report indicates that the study area is part of the Iroquois Plain physiographic region and of the South Slope physiographic region. The soils present are also indicated, and the report notes that “A large part of the City of Toronto would have historically consisted of a variety of soils; however, subsequent urban and suburban development has resulted in many of the natural soils being obscured by development activities and they are presently unidentifiable (Department of Agriculture 1954).” Additionally, the presence of several water sources in the vicinity (Garrison Creek, Russell Creek, Taddle Creek, and the Don River) is noted.

The Pre-Contact Indigenous Resources are also described adequately. The report mentions that the study area is situated near the Don River settlement sequence which includes sites from the early 14th century (like the Moatfield site) to the late 15th century (like the Keffer site). Still, Toronto’s extensive development during the 20th century removed many sites from the archaeological record.

79 archaeological sites (the vast majority of which are Euro-Canadian) are known within 1km of the study area. 42 of them are within 300m, and, of these, four are directly within the study area: the Grand Trunk Bridge Abutments (AjGu-56, a Euro-Canadian transportation site; no CHVI), the Pilings next to Service Bridge (AjGu-57, a Euro-Canadian transportation site; no CHVI), the Parliament site (AjGu-41, a Euro-Canadian administrative building; Stage 4 recommended), and the Toronto Lime Kiln Works (AjGu-61 and AjGu-64, a Euro-Canadian industrial lime kiln and homestead; Stage 4 recommended). 54 previous archaeological assessments have been conducted within 50m of the study area, and are summarized in the report. ASI’s 2004 Master Plan of

Archaeological Resources for the City of Toronto was also consulted. It indicates that the study area includes areas of archaeological potential.

The assessment included a random spot check property inspection. The existing conditions of the study area are well described, and the exact route and the new stations proposed along this route are indicated. The report states that “The station footprints and temporary workspaces within the downtown Toronto section of the route between Exhibition and the Don River are predominantly occupied by either paved parking lots or existing multi-story structures with below-grade foundations. Station and temporary workspace footprints east of the downtown section, along the Lakeshore East, Pape Avenue, and Thorncliffe sections of the route are predominantly suburban areas of the City, which were largely only developed at the end of the 19th century and into the 20th century. Many of these areas are also former industrial lands which were demolished and paved over in the 20th century. There are small areas of parkland throughout the study area east of the downtown.”

The study area meets several criteria indicative of archaeological potential: it is within 250m of several watercourses, and it includes registered archaeological sites, areas of historic settlement, and historical landmarks. In multiple areas however disturbance has removed this potential. The report indicates that most of the study area had already had a Stage 1 AA by AECOM. The majority of AECOM’s conclusions and recommendations were confirmed by Stantec, but some were changed because of additional information from reports not previously consulted and the property inspection. Notably, some areas that AECOM recommended for a Stage 2 AA were documented by Stantec to be extensively disturbed.

Stantec’s final conclusions are illustrated in Figures 12.1-12.22. There are areas that retain archaeological potential and where a Stage 2 AA is recommended. The areas associated with sites AjGu-41 and AjGu-61/64 require Stage 4 mitigation. Parts of the study area were previously assessed and no further assessment was recommended. Some areas were documented during the property inspection to be steeply sloped, and others are disturbed,

and no further assessment is recommended for them. Finally, the report indicates that no further assessment is required for the parts of the study area where the Ontario Line will be tunneled through bedrock, because this will not disturb any archaeological resources that may be present within the soil above it.

In conclusion, the report adequately contextualizes the study areas from a historical, environmental, and archaeological point of view, and the conclusions are logical. The report is satisfactory for the purposes of the Stage 1 assessment for the Ontario Line project. Regarding future archaeological work, the Huron-Wendat Nation is requesting to be consulted at every stage and, of course, provide liaisons for all field work. Please do not hesitate to contact our team should you have questions and to follow up with the next steps.

Grand Chief Rémy Vincent
Huron-Wendat Nation
255 Place Chef Michel Laveau
Delivered by email

Dear Grand Chief Vincent,

RE: Ontario Line Project - Lower Don Bridge Marine Archaeological Overview Assessment for Review

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Huron-Wendat Nation ("HWN"). Accordingly, Metrolinx takes its engagement efforts with HWN seriously, recognizing: (1) the Huron-Wendat Nation's connection to the areas in which Metrolinx will be constructing infrastructure; and (2) that Metrolinx is a public agency of the Province of Ontario with limited resources and a mandate to implement transit infrastructure projects and operations.

Metrolinx appreciates and respects HWN's desire to be aware of and, to the degrees possible, engaged regarding the discovery and preservation of HWN artifacts and sacred burial grounds. Metrolinx understands that HWN may not have access to capacity-building support otherwise available through Ontario's Ministry of Indigenous Affairs and therefore wishes to provide HWN capacity-building support pursuant to the following terms.

Project Description

The Lower Don Bridge and Don Yard early works are planned for where the Ontario Line will run alongside GO train operations. These early works will set the groundwork for other major construction on the Ontario Line project and include:

- building a new bridge north of the existing rail bridge over the Lower Don River that will carry the Ontario Line tracks;
- shifting GO tracks in the Don Yard and nearby rail corridor to accommodate Ontario Line infrastructure;
- modifying the existing rail bridge to accommodate GO track shifts and Ontario Line infrastructure; and
- relocating and protecting utilities and signal infrastructure in the area.

Marine Archaeological Overview Assessment

On behalf of Metrolinx, Stantec has undertaken a Marine Archaeological Overview Assessment for the proposed Lower Don Bridge. The purpose of the Marine Archaeological Overview Assessment is to determine the marine archaeological potential of the study area.

The proposed bridge will cross over the Don River on the north side of the existing GO Transit Lakeshore East rail bridge. As a result, a large portion of the study area overlaps with the Don River. While the bridge will have no permanent in-water components, Metrolinx anticipates that in-water construction activities may impact potential submerged cultural resources. The marine archaeological potential of the study area is being considered as part of the Marine Archeological Overview Assessment.

The assessment determined that despite the study area for the Lower Don Valley Arch Bridge Superstructure having indicators of marine archaeological potential, there has been extensive river-bed disturbance to date. The riverbed has been previously disturbed by engineered channeling, modern dredging, and modern construction. The assessment determined that the study area retains low to no potential for the identification and documentation of in situ Indigenous and Euro-Canadian marine archaeological resources. As a result no further marine archaeological work is required for the study area.

Good morning Jaimi,

The Nation will gladly participate to this fieldwork. We already have a monitor who is working on a stage 2 archaeological assessment with Stantec for the Ontario Line Project. Will it be the same team who will be doing the fieldwork at Moss Park and Ordnance Park ? Also, if you could tell me who is in charge of this project for Stantec, I will be able to send them a quote for this archaeological assessment.

Thank you,
Marie-Sophie

October 12, 2021

Grand Chief Rémy Vincent
Huron-Wendat Nation
255 Place Chef Michel Laveau

Delivered by email

Dear Grand Chief Vincent,

**RE: Ontario Line Project - Stage 2 Archaeological Assessment - Moss Park and Ordinance Park
Invitation to Participate in Archaeological Fieldwork**

Metrolinx and its consultant, Stantec continue to progress the archaeological studies for the Ontario Line project and wanted to invite Huron-Wendat Nation to participate in Stage 2 Archaeological Assessments planned to occur at Moss Park and Ordinance Park in the upcoming weeks. The locations of Moss Park and Ordinance Park study areas can be viewed in **Figure 1 and 2** below.

Moss Park and Ordnance Park have been previously assessed in a desktop study, the *Ontario Line Stage 1 Archaeological Assessment Report - South* which was shared with Huron-Wendat Nation in March 2020 and was subject to an Addendum shared with Huron-Wendat Nation in February 2021. The Stage 1 report recommended that a Stage 2 archaeological assessment is required for Moss Park and Ordnance Park parcels.

The Stage 2 archaeological field work will be conducted by test pit survey, in accordance with the Ministry of Heritage, Sport, Tourism and Culture Industries' (MHSTCI) 2011 *Standards and Guidelines for Consultant Archaeologists*. The Stage 2 test pit survey method consists of hand excavating test pits by shovel at a five-metre interval on the park lands. The test pits are at least 30 centimetres in diameter and dug through the topsoil (which has a variable depth generally between 15 and 25 centimetres, but may be deeper or shallower) and at least five centimetres into subsoil. Once complete, test pits will be backfilled. Areas disturbed by utility infrastructure or recent construction will not be surveyed but will be photo documented. Based upon the Stage 2 field work, subsequent archaeological investigations may be recommended depending on what is found during the Stage 2 test pit survey.

Please see the fieldwork details below:

MOSS PARK:

Start Date: Tentatively October 25, 2021. If the start date changes, we will reach out to you.

Duration: Approximately two to three days

Start Time: 8am

Consultant Company: Stantec

Contact information: Jeffrey Muir - (289) 208-5298; Heather Kerr - (416) 602-3271; Patrick Hoskins - (613) 716-4687

Assessment: Stage 2 Archaeological Assessment

Meeting Location Address: 150 Sherbourne St

10 Bay Street
Toronto, ON M5J 2N8

Size of Field Crew: 2 (1 Field director, 1 field tech)

Parking location: Above-ground parking lot at the southwest corner of Jarvis Street and Queen Street East; approximate three minute walk

ORDNANCE PARK

Start Date: Work on Ordnance Park will begin after the Moss Park work is completed

Duration: Approximately two weeks

Start Time: 8am

Consultant Company: Stantec

Contact information: Jeffrey Muir - (289) 208-5298; Heather Kerr - (416) 602-3271; Patrick Hoskins - (613) 716-4687

Assessment: Stage 2 Archaeological Assessment

Size of Field Crew: 4 (1 Field director, 3 field techs)

Required PPE:

Item	Specifications
Clothing and Attire	Loose clothing, long hair, dangling accessories, jewelry, or other similar items that are likely to be a hazard will not be worn unless they are tied, covered, or otherwise secured so they prevent the hazard.
Foot Protection	Canadian Standards Association (CSA) approved work boots (Steel-toed boots, minimum 6" from top of sole, grade 1 with sole protection [CSA Standard Z195-09]).
Hand Protection	Cut, puncture, and abrasion-resistant gloves shall be worn when conducting archaeological hand digging and screening activities.
Eye and Face Protection	CSA approved safety glasses with rigid side shields. Regular prescription glasses are not permitted unless they are designed as CSA safety glasses complete with rigid shields. An ASTM level 1 (or higher) face covering is mandatory.
Head Protection	CSA approved Type II, Class E (side impact) hard hat. Hard hats shall be worn with the brim pointed forward.
Hearing Protection	Not needed.
High Visibility Safety Apparel	Mandatory class 2, level 2 High Visibility Safety Apparel (HVSA). Full length sleeves and pants with reflective stripes on both arms and legs are required.
*Although not considered PPE, face coverings for COVID-19 shall be worn when applicable	

Invitation to Participate in Fieldwork

Metrolinx would appreciate any interest Huron-Wendat Nation may have in participating in the archaeological monitoring fieldwork. Upon receipt of Huron-Wendat Nation's interest in participating, Metrolinx will work to coordinate Huron-Wendat Nation's involvement.

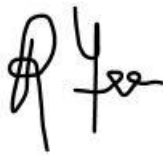

Engagement

Regardless of whether or not Huron-Wendat Nation participates in the fieldwork, Metrolinx will inform you of discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will also ensure that future Archaeological Assessment reports are provided to your community in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries.

If Huron-Wendat Nation wishes to participate in the fieldwork, or if you'd prefer to receive fieldnotes and/or a summary of the borehole and geotechnical data, please let us know at your earliest convenience. If you require additional information or materials, or if you wish to discuss this project in more detail or set up an in-person meeting, please contact, Indigenous Relations at Metrolinx. We can be contacted at IndigenousRelations@metrolinx.com.

Thank you for your time and consideration.

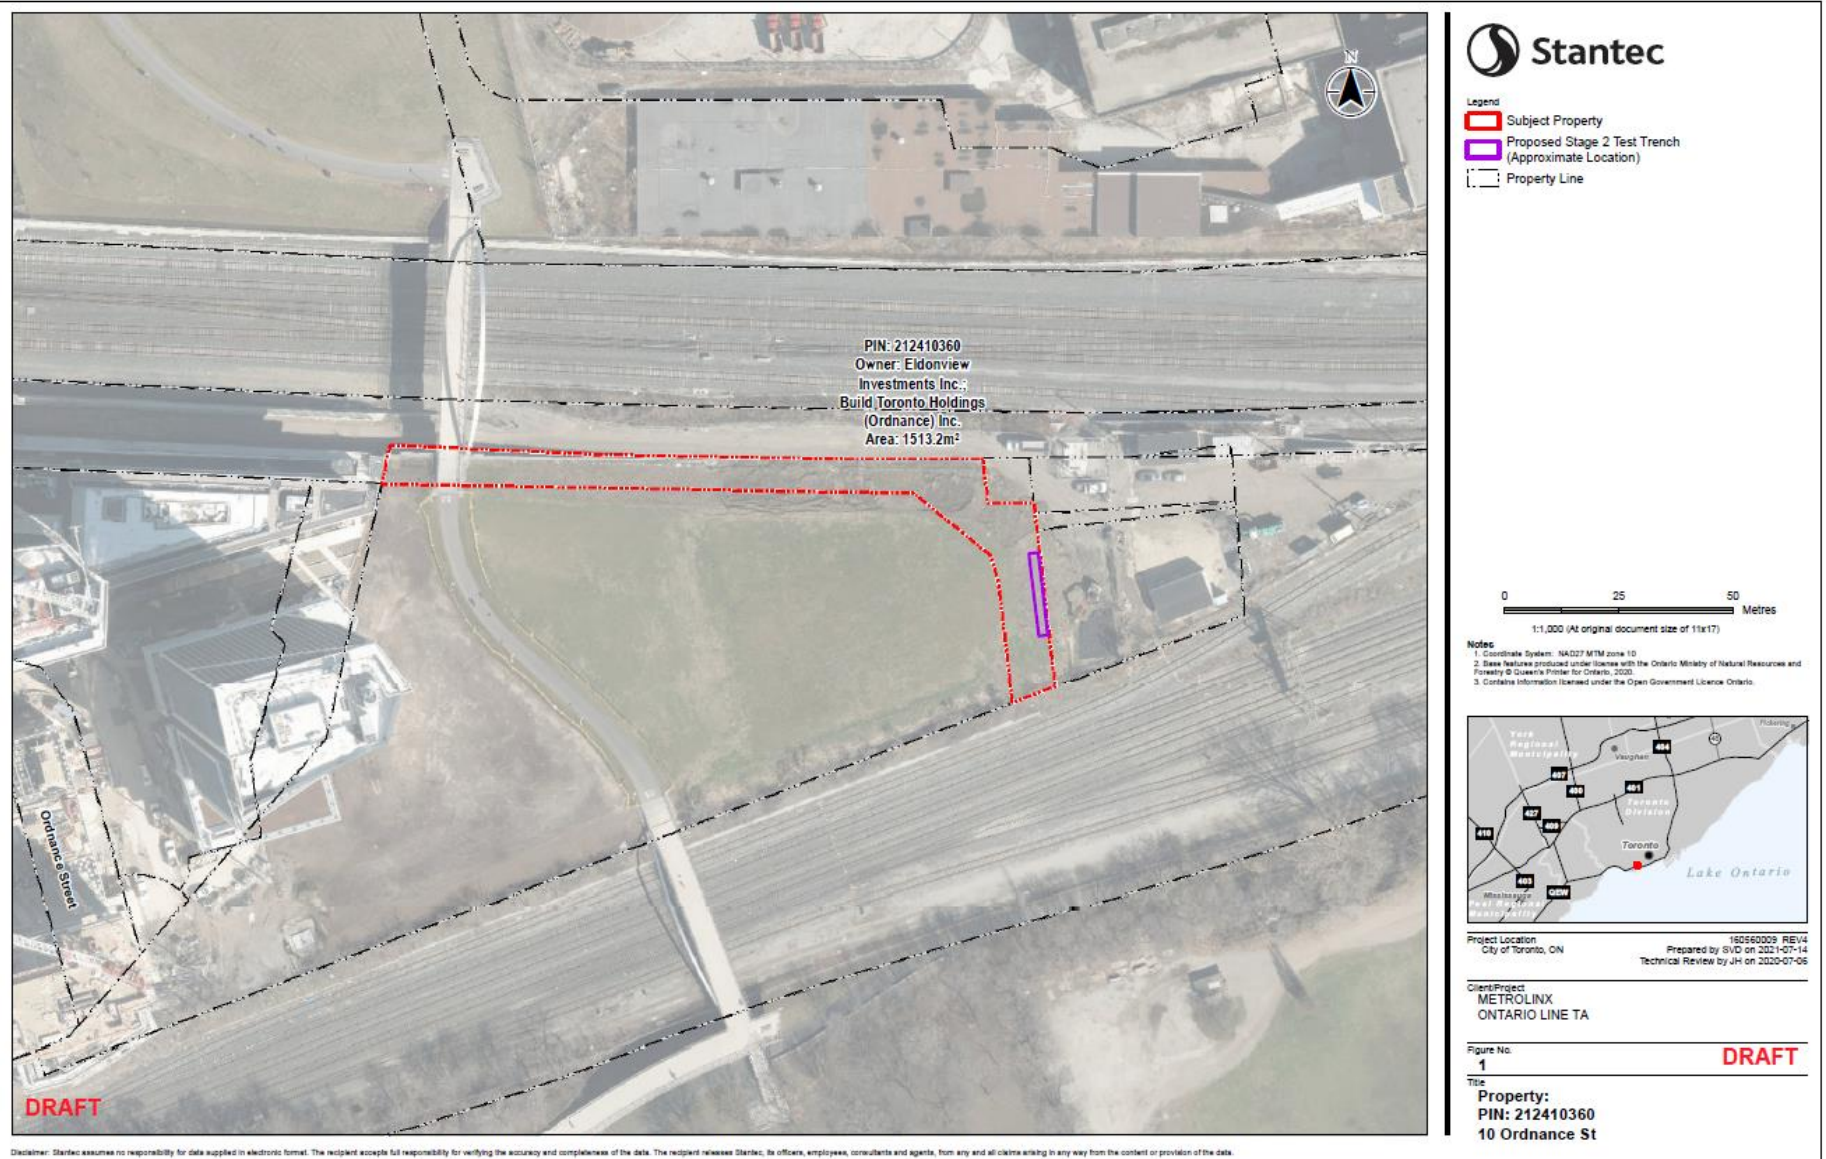

Yours Truly,

Objet : Ontario Line - Corktown/First Parliament Site - Delays to Archaeology Schedule

Dear Marie-Sophie,

Thank you for your participation in the archaeological fieldwork at the First Parliament site as part of the Ontario Line project.

As you're aware, the archaeological program is now underway with Indigenous monitors on site. Some inclement weather events at the onset of this work has resulted in some delays to our

schedule. To compensate for this, Metrolinx is looking to extend archaeology work to Saturdays from 8am-3pm for the remainder of this field season (approximately late November). This would commence on October 23rd.

Metrolinx welcomes continued participation from HWN on Saturdays. Please confirm that a monitor from your Nation will be present on these additional days.

If you have any questions or concerns, please let me know at your earliest convenience.

Thank you
Jaimi

Dear Lori-Jeanne,

Please find enclosed, a letter providing an overview of the Metrolinx application for a permit under the Endangered Species Act to support the Ontario Line Project. We have also attached two appendices for your review.

We value building a relationship with your Nation which we recognize requires transparency and meaningful engagement. Please let me know if you have any further questions or would like to meet to discuss this permit, the Ontario Line Project or any other Metrolinx projects.

Thank you,

Jaimi O'Hara

November 3, 2021

Grand Chief Rémy Vincent
Huron-Wendat Nation
255 Place Chef Michel Laveau
Delivered by email

Dear Grand Chief Vincent,

**RE: Ontario Line Project – Species at Risk 17(2)(d) Permit Amendment Under the
*Endangered Species Act***

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with Huron-Wendat Nation. Metrolinx appreciates and respects Huron-Wendat Nation's desire to be appropriately informed and aware of projects. To that end, Metrolinx is sharing with Huron-Wendat Nation information regarding the Species at Risk (SAR) 17 (2) (d) Permit under *the Endangered Species Act* (ESA, 2007) obtained in support of the Ontario Line Project, and the proposed amendment to this permit.

Project Description

Metrolinx, a regional transportation agency, is helping transform the way the Greater Golden Horseshoe region moves by building a fast, convenient, and integrated transit network. As part of this work, Metrolinx is proceeding with the Ontario Line Project which will bring 15.6 kilometres of subway service to Toronto.

Ontario Line Permit #CR-D-002-19

Metrolinx, as part of the Ontario Line Project, previously received approval for a 17(2)(d) permit (Permit #CR-D-002-19) under the *Endangered Species Act* (ESA, 2007) issued by the Ministry of the Environment, Conservation, and Parks (MECP) on August 10, 2020. The permit provides approval for those project activities that may have adverse impacts on identified Species at Risk (SAR) and/or their habitat. The permit allows for those activities to take place and provides direction to Metrolinx regarding mitigation measures and compensation requirements that would be necessary to support those impacted species to support no net loss.

To inform this permit, Metrolinx completed SAR screening through the Ontario Line Environmental Conditions Report and Natural Environment Report using various

information sources. While the results of this screening were shared within the initial draft of the Environmental Conditions Report circulated to Huron-Wendat Nation on June 15 2020, Draft Environmental Conditions Report circulated on September 17 2020 and Final Environmental Conditions Report circulated on November 30 2020, we regret that we did not engage with Huron-Wendat Nation directly on the screening process or the findings.

Potentially Impacted Species and Summary of Permit Conditions and Requirements

Based on the SAR screening completed to date, some activities required to support the Ontario Line Project may result in the following species at risk being impacted:

- Bank Swallow - Threatened
- Barn Swallow - Threatened
- Blanding's Turtle - Threatened
- Butternut - Endangered
- Chimney Swift - Threatened
- Little Brown Myotis - Endangered
- Northern Myotis - Endangered
- Small-footed Myotis - Endangered
- Tri-colored Bat - Endangered

Activities that may result in impacts to species listed above are associated with project construction and include activities such as removal or alteration of SAR habitat features (e.g., structures that may support SAR bird nesting, and trees).

Prior to commencing any activities that may impact SAR and/or SAR habitat, Metrolinx will complete species-specific screening for areas where project activities are planned to take place, and, if necessary (if screening determines that SAR/SAR habitat is likely to be present), surveys to detect SAR and SAR habitat presence and conduct an impact assessment if presence is confirmed, to characterize species-specific impacts (e.g., amount of habitat removed).

Metrolinx will meet the ESA permit conditions such as implementing species-specific mitigation measures, monitoring their effectiveness, and taking corrective action as required. Species-specific mitigation measures include scheduling activities to take place outside of species-specific timing windows (e.g., outside of active season or breeding window), implementing exclusion measures to prevent individuals of certain species from being impacted by project activities, and others.

If project activities result in SAR habitat removal, Metrolinx will implement species-specific compensation measures such as creating habitat (e.g., nesting habitat features replacing habitat features removed). Compensation habitat will be regularly monitored, and appropriate corrective actions will be taken as required to ensure habitat functions as intended.

Proposed Permit Amendment

Metrolinx is proposing an amendment to the previously approved SAR 17(2)(d) Permit (Permit #CR-D-002-19) under the *Endangered Species Act* (ESA, 2007), approved on August 10, 2020. The purpose of this permit amendment is to seek approval for additional study area not included in the current Permit #CR-D-002-19, as shown in **Appendix 1**. There are no changes to the permit conditions, including species-specific mitigation measures and compensation requirements, and no additional species are being added at this time. The SAR screening developed in support of the current permit has been updated to provide occurrence probability of SAR that may be present in the areas Metrolinx is seeking to include in the permit as part of the proposed amendment, and is included as **Appendix 2**.

Permit Amendment Process - Next Steps

The Proposal for the 17(2)(d) Permit Amendment is anticipated to be available on the Environmental Registry of Ontario (ERO) for a 30-day public review period this Fall 2021, and Metrolinx will notify Huron-Wendat Nation when the ERO posting is available. While not specifically required under the Environmental Bill of Rights, the Ministry of the Environment, Conservation and Parks (MECP) voluntarily posts all ESA permit proposals for public review to ensure transparency and inclusion.

Metrolinx is seeking Huron-Wendat Nation's comments, questions, or requests for additional information upon review of the material presented in this letter at any time in advance of the public ERO posting. Questions or comments can also be submitted directly to MECP through the ERO posting during the 30-day public review period.

Following the 30-day public review period, the proposed permit amendment will be submitted to the Minister for review and consideration. The amendment may only be issued if the Minister is of the opinion that the legal requirements set out in clause 17(2)(d) of the *Endangered Species Act* (ESA, 2007) have been satisfied. Should the amendment be issued, Metrolinx will be obligated to adhere to the requirements and standards as stipulated under the permit.

Huron-Wendat Nation will be kept apprised should any new SAR be identified within the project area as project planning progresses. In such cases we will endeavor to engage Huron-Wendat Nation prior to seeking any necessary permit amendments.

Metrolinx is committed to building a long-term relationship with Huron-Wendat Nation, and we recognize that this requires transparency. We appreciate that we have much work to do in this regard and we hope to move forward in a positive way. The original SAR permit was obtained as part of the normal course of Metrolinx business, which had yet to be identified by the Indigenous Relations Office as necessitating engagement and information sharing with Indigenous Nations.

The Indigenous Relations Office has begun guiding the organization and identifying opportunities to flag such actions in advance, so that we can more meaningfully engage with Indigenous Nations as we move forward. We appreciate your patience as Metrolinx continues to learn more about Indigenous Nations and with the help of the Indigenous Relations Office, becomes aware of additional opportunities for engagement with Indigenous Nations.

We appreciate that previous engagement activities may not have met the needs of Huron-Wendat Nation, and the volume of materials may have resulted in Huron-Wendat Nation not having been made adequately aware of the possible identified impacts to several Species at Risk under this permit. Metrolinx remains committed to meaningful engagement; we are committed to identifying and prioritizing the sharing of the most relevant and appropriate information with Huron-Wendat Nation.

If Huron-Wendat Nation requires additional information or materials, or you wish to discuss this project in more detail, please reach out to Jaimi O'Hara in the Indigenous Relations Office at Metrolinx and she would be pleased to facilitate a meeting. She can be contacted at IndigenousRelations@metrolinx.com.

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*, except where information is provided to Metrolinx in confidence, pursuant to section 15.1.

Thank you for your time in reviewing this letter.

Yours Truly,

Hello Lori-Jeanne and Dominic,

We noticed that the Noise and Vibration Operations Report, was not outlined in the previous letter which provided an overview of the Draft Environmental Impact and Assessment Report for the Ontario Line Project. We apologize for this omission and note that the report has now been added to the Dropbox shared below. We apologize that this report was overlooked earlier, and is not referenced directly in the letter. If you have any questions, please don't hesitate to reach out.

Best,

Marilyn Stoye *(she/her)*

Subject: Ontario Line - Draft Environmental Impact and Assessment Report for Review

Dear Lori-Jeanne and Dominic,

Please find attached, a letter outlining the Draft Environmental Impact and Assessment Report (EIAR) for the Ontario Line. The report is available for review at the following link:

Any comments you may have regarding this report received by **December 6, 2021**, will be incorporated in the Draft EIAR planned to be released in January 2022. Feedback received after December 6, will be reflected in the Final EIAR, planned for release in March 2022.

If you have any questions or concerns, please feel free to reach out to me at any

time.

Thank you for your time and assistance.

Good Afternoon Marie-Sophie,

Hope you are doing well.

The monitoring work in the Don Valley area ([REDACTED] - Wastewater treatment plant) has been confirmed for March 4th. Please let us know if you will have a monitor available for this work. I will reach out again if there are any further delays.

Best regards,
Andrew

Good morning Marilyn,

Thank you for this update. We would like to send a monitor for the work. I would need at least 48h notice to be able to send someone. Let me know as soon as possible the day for work and I will confirm with you the contact information of our monitor.

I hope you have a great day!

Hi Marie-Sophie,

I wanted to follow up with you about the planned fieldwork set to take place in the Don Valley area, as discussed in the emails below. I know that you had expressed interest in participating and so I'm reaching out to provide an update on the dates of fieldwork. There will be one day of archaeological monitoring to drill one borehole planned to occur between Feb 24 and Mar 4. The exact date will be confirmed once we receive the necessary permits, but we wanted to give you a head-up and confirm if you are still interested in participating.

Please see the exact location of the borehole and further details below.

Let me know what you think!

Warmly,

Marilyn

Archaeological monitoring during borehole drilling

Start Date: one day of monitoring planned to occur between Feb 24- Mar 4 (permit pending). Additional work schedule to be provided soon for work in March to mid-April.

Duration: 3-5 day, Thurber requested 5 days to account for unforeseen delays including weather.

Start Time: 8am

Consultant Company: Stantec, Thurber

Contact information: Jeffrey Muir - (289) 208-5298; Heather Kerr - (416) 602-3271; Patrick Hoskins - (613) 716-4687

Assessment: Archaeological monitoring for borehole drilling

Size of Field Crew: 1 field supervisor

Meeting location: See below – 21 Redway Road wastewater treatment plant

Required PPE:

- Class 3 PPE
 - § High-visibility material jacket (which includes reflective arm bands) and pants (which includes reflective stripes/bands)
 - § Both pants and jacket have to be long sleeve
- CSA Type 2 Hard Hat with foam insert (bump caps)
- CSA approved eye protection
- CSA approved 6" laced safety shoes
- CSA Hearing protection, in ear or over ear
- Appropriate clothing for weather conditions

Re: Ontario Line Lower Don Bridge - Marine Archeological Over Assessment Review

Dear Ms. O'Hara,

Further to your email addressed to the Huron-Wendat Nation dated October 7, 2021, on the Marine Archaeological Overview Assessment for the Lower Don Valley Arch Bridge Superstructure as part of the Ontario Line Project, the Huron-Wendat Nation (HWN) would like to thank you for giving us this opportunity to provide comments and feedback.

The proposed bridge will cross over the Don River on the north side of the existing GO Transit Lakeshore East rail bridge. A marine archaeological assessment was necessary even though there will be no part of the bridge permanently in the water, because the construction activities might result in the disturbance of potential submerged cultural resources. The study area for this assessment is a zone of approximately 0.60ha in the Don River, historically considered part of Lot 15, Broken Front, Geographic Township of York, former York County, now City of Toronto.

The Pre-Contact Indigenous Resources are clearly and concisely described, mentioning the main known sites in the Don River watershed. The Post-Contact Indigenous Resources section of the report is also adequate, and multiple sources are used to understand the Euro-Canadian Resources, regarding York County, the Town of York which became the City of Toronto, and specifically the Don River and the study area. The report illustrates in Figures 4-13 the development of the lower part of the river, from 1793 until its straightening in the 1880s as part of the Don River Improvement Plan. The historical shoreline is shown for 1857, 1874, 1882, 1891, 1894, 1909, and 1918 on Figures 15.1 and 15.2. Figures 16.1 and

16.2 are aerial photographs illustrating the development that continued to occur during the 20th century.

Regarding the environmental context of the study area, the report notes that it is part of the Iroquois Plain physiographic region, and that from a geological point of view it is “characterized by the Georgian Bay Formation which is part of the Paleozoic sequence of the Late Ordovician age”. The soils include deposits of sand, silty sand, and silty clay.

No marine archaeological sites are known within 1km of the study area, but there are 17 land-based archaeological sites within that radius: 15 are Euro-Canadian sites of various types, one is an Afro-Canadian homestead, and one, St. Paul’s Catholic Cemetery, is Euro-Canadian as well as Pre-Contact Indigenous Middle Archaic. Three of these sites (AjGu-55 Bala Subdivision Track Supports, AjGu-56 Grand Trunk Bridge Abutments, AjGu-57 Pilings next to Service Bridge) are within 50m and consist of transportation infrastructure. The report also notes that 14 archaeological assessments were conducted within 50m (no marine archaeological assessment within 100m), but while some of them overlap with the current study area none specifically assessed the potential for submerged cultural resources within the Don River. A review of literature on shipwrecks indicated that a vessel named the Starling burnt in the Don River in 1895. However, the report states that because this is after the Don River Improvement Plan was completed and larger vessels could not access the Don River beyond the GTR bridge, it is probable that the Starling burnt near the mouth of the Don River and was removed from the Toronto Harbour as a navigational hazard.

The study area meets criteria indicative of marine archaeological potential: it is in proximity to multiple known (terrestrial) archaeological sites, and it is within the Don River, which is a primary source of water, a transportation route for Indigenous and early Euro-Canadian travelers, and numerous sources indicate the river’s use by Indigenous groups for fishing and clay extraction. However, despite these archaeological potential indicators, the report shows that this part of the Don River was subject to complex changes, encountering historic and modern disturbances such as its straightening, widening, and multiple dredging episodes. Consequently, the report states that “preservation of in situ

marine cultural resources is unlikely and the archaeological potential for marine archaeological resources within the study area is considered low.”, and no further marine archaeological assessment is necessary for the study area.

In conclusion, the report adequately contextualizes the study area from a historical, environmental, and archaeological point of view, and the conclusions are clear and logical. The report is satisfactory for the purposes of the marine archaeological assessment for the Ontario Line Lower Don Bridge project. Regarding future archaeological work, the Huron-Wendat Nation is requesting to be consulted at every stage and, of course, provide liaisons for all field work. Please do not hesitate to contact our team should you have questions and to follow up with the next steps.

Best regards,

Alexandra Bédard-Daigle

Dear Lori-Jeanne and Dominic,

As a follow up to the letter sent on November 3, 2021 regarding the Ontario Line Project Species at Risk 17(2)(d) Permit Amendment Under the *Endangered Species Act*, the Proposal for the 17(2)(d) Permit Amendment was posted on the Environmental Registry of Ontario (ERO) on December 3rd, 2021 for a 30-day public review period, ending January 2nd, 2022.

The ERO posting can be found in the following link:

<https://ero.ontario.ca/notice/019-4601> Comments can be submitted directly to the Ministry of the Environment, Conservation and Parks.

If you have any questions or concerns, please feel free to reach out to me at any time. Additionally, we are happy to arrange a meeting to discuss the Permit, if that would be of interest.

Thank you for your time and assistance.

Jaimi

Good evening Jaimi,

Thank you for this invitation. The HWN will gladly participate to the archaeological monitoring at Corktown Station as well as at the Don Valley Area. Please, let me know if you need a quote for our participation or to whom I should send it.

Thank you,

Marie-Sophie

Objet : Ontario Line: Invitation to Participate - Archaeological Monitoring for Corktown Station Demolition and Don Valley Area Borehole Drilling

Dear Marie-Sophie,

As the Ontario Line Project continues to progress into the new year, we wanted to provide an update and invitation for participation in upcoming fieldwork. Please find attached a letter outlining upcoming Archaeological monitoring activities for the Corktown Station/First Parliament site and Don Valley area. These works are set to begin mid-January through February 2022.

If Huron-Wendat Nation is interested in participating in either or both of these works, please let me know as soon as possible in the new year, and we will work with you and the project team to coordinate. We can also provide fieldnotes and/or geotechnical data at your request.

If you have any questions or concerns, please feel free to reach out to me at any

time.

Thank you for your time and assistance. Happy Holidays!

Jaimi

[Appendix 2 - EIAR Arc and Natural Env Impacts and Mitigation.pdf](#)
[Notice of Draft EIAR HWN.pdf](#)

Dear Lori-Jeanne and Dominic,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. We wish to share with you that the Draft Environmental Impact and Assessment Report (EIAR) has now been published. Attached you will find a letter outlining the Draft Environmental Impact Assessment Report (EIAR) prepared for the Ontario Line Project, as well as the Notice of Publication for the report.

The full report can be found using the following dropbox link:

[REDACTED]

The Notice of Publication commences a 30-day public review period which will continue from February 7, 2022 until March 9, 2022. As such, we ask that your Nation provide any comments in writing no later than March 9, 2022. We appreciate the size of these documents and would be happy to arrange a meeting to review the report and project with you.

In an effort to streamline your review, we draw your attention to the attachments which provide an overview of the expected environmental impacts and proposed mitigations for Natural Environment and Archaeological Resources, as we know this may be of specific interest to you.

Thank you for your time and assistance. If you have any questions or concerns, please do not hesitate to contact me.

Grand Chief Rémy Vincent
Huron-Wendat Nation
255 Place Chef Michel Laveau
Delivered by email

Dear Grand Chief Vincent,

RE: Ontario Line Project - Notice of Publication of Draft Environmental Impact Assessment Report (EIAR)

Metrolinx remains committed to meaningful consultation and values its relationship with engagement with Huron-Wendat Nation. It is our wish to continue to work with your Nation as we move forward. In November of 2021, Metrolinx shared with Huron-Wendat Nation the preliminary Draft Environmental Impact Assessment Report (EIAR) for comment and review. The purpose of this letter is to share with your Nation that the Notice of Publication for the Draft EIAR has now been posted, and to continue to invite any comment or feedback you may wish to share on this report.

Project Description

Metrolinx is proceeding with the Ontario Line which will bring 15.6 kilometres of subway service to Toronto. The Ontario Line will stretch across the city, from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line will have 15 new stations, including six interchange stations, connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable service.

Figure 1 - Ontario Line

Ontario Line Environmental Assessment & Project Timeline

Environmental impacts of the Ontario Line Project are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*.

Table 1 below provides a summary of the Ontario Line Reports that have been shared, or will be shared with Huron-Wendat Nation:

Table 1: Ontario Line Reporting Timeline

Report	Date Shared/to be Shared with Nations
Draft Early Works Report (included Exhibition Station, Lower Don Bridge, Lakeshore East Joint Corridor and East Harbour Station)	June 5, 2020
Draft Environmental Conditions Report	September 17, 2020
Final Environmental Conditions Report and Draft Exhibition Station Early Works Report	November 30, 2020
Final Exhibition Station Early Works Report	February 1, 2021
Initial draft of Corktown Station Early Works Report	March 22, 2021
Draft Corktown Station Early Works Report	May 12, 2021
Final Corktown Station Early Works Report	July 15, 2021
Draft Lower Don Bridge and Don Yard Early Works Report	June 22, 2021
Final Lower Don Bridge and Don Yard Early Works Report	August 25, 2021
Initial draft of Lakeshore East Joint Corridor Noise and Vibration Operations Report	July 28, 2021
Draft Lakeshore East Joint Corridor Early Works Report	September 23, 2021
Final Lakeshore East Joint Corridor Early Works Report	November 17, 2021
Draft East Harbour Station Early Works Report	September 23, 2021
Final East Harbour Station Early Works Report	November 17, 2021
Initial draft of Environmental Impact Assessment Report Stage 1 Archaeological Assessment Report and Natural Environment Report	August 18, 2021
Initial draft of Environmental Impact Assessment Report	November 18, 2021
Draft Environmental Impact Assessment Report	February 7, 2022 (shared with this letter)
Final Environmental Impact Assessment Report	April 19, 2022*

*Date is subject to change.

Draft Environmental Impact Assessment Report (EIAR)

The Draft EIAR summarizes the local environmental conditions in the discipline-specific study areas developed for the Project. The local environmental conditions were characterized through a combination of desktop review and field studies by practitioners using industry standard techniques and provincial standards, protocols, and guidelines, where appropriate. The resulting Draft Stage 1 AA and Natural Environment Report was shared with Huron-Wendat Nation for review in August 2021.

The Draft EIAR also provides an assessment and evaluation of the impacts that the Project might have on the environment. Based on the potential impacts, a description of mitigation measures and monitoring activities is outlined. A list of municipal, provincial, federal, or other permits and approvals that may be required for the Project is also provided.

Discipline-specific assessment and evaluation of impacts were undertaken for the following disciplines:

- Natural Environment
- Soil and Groundwater
- Cultural Heritage
- Archaeological Resources
- Socio-Economic and Land Use
- Air Quality
- Noise and Vibration
- Traffic and Transportation

Effective February 7, 2022, the Draft Environmental Impact Assessment Report will be available for a 30-day public review period. The report is posted on the Ontario Line project webpage, which can be accessed using the following link:

<https://www.metrolinxengage.com/en/content/full-report-draft-environmental-impact-assessment-report>

The Notice of Publication of Draft EIAR can be found in **Attachment 1**.

Potential Impacts and Mitigation Measures

The tables found enclosed in **Attachment 2** provide a summary of natural environment

and archaeology potential impacts and mitigation measures identified as part of the Draft EIAR that may be of interest to Huron-Wendat Nation. If your Nation has any feedback about these potential impacts and/or mitigation strategies, or any other aspects of the Ontario Line, we welcome the opportunity to discuss further.

Engagement

Metrolinx welcomes any comments or feedback on the EIAR during the 30-day public review period, from February 7 to **March 9, 2022**. Metrolinx is committed to an open and respectful relationship with Huron-Wendat Nation. We appreciate the significant volume of documents related to the Ontario Line Project that have been shared with Huron-Wendat Nation. We are happy to assist in the review of these documents by meeting with your Nation.

Metrolinx is willing to address any questions that Huron-Wendat Nation may have about the Ontario Line Project. If you require additional information or materials or if you wish to discuss the Project in more detail or set up a meeting, please contact Jaimi O'Hara, Manager of Indigenous Relations Office at Metrolinx. She can be reached at

IndigenousRelations@metrolinx.com.

With the exception of personal information, all comments will become part of the public record. Kindly note that any information you provide to Metrolinx, or its delegates, will be subject to the Freedom of Information and Protection of Privacy Act, except where information is provided to Metrolinx in confidence, pursuant to section 15.1, which protects the confidentiality of Indigenous knowledges.

Thank you for your time in reviewing this letter. Yours

Truly,

A handwritten signature in black ink, appearing to read 'J. Pakkala'.

Notice of Publication of Draft Environmental Impact Assessment Report and Virtual Open Houses Ontario Line Project

The Project

The Ontario Line will bring 15.6 kilometres of new subway service to Toronto, making it faster and easier for people to get where they need to be each day. The line will stretch across the city, from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line will have 15 new stations, including six interchange stations, connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable service.

Environmental Impact Assessment Report

Environmental impacts of the Ontario Line are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*. In accordance with Section 15 of O. Reg. 341/20, Metrolinx has prepared the Draft Environmental Impact Assessment Report that is now available for review.

The Draft Environmental Impact Assessment Report describes existing environmental conditions in the Project study area, environmental impacts, mitigation and monitoring measures, consultation, and required permits and approvals for the Ontario Line.

The Draft Environmental Impact Assessment Report Review and Consultation Process

Effective **February 7, 2022**, the Draft Environmental Impact Assessment Report will be available for review on the Ontario Line project webpage (www.metrolinx.com/ontarioline). You can view and comment on the report from **February 7 to March 9, 2022** via the online form provided.

You can also participate in virtual open houses, where you can hear from project experts and ask questions about the report in real time, at MetrolinxEngage.com/OntarioLine/live on:

- **February 22, 2022 and February 24, 2022** from 6:30 to 8:00 p.m., with a focus on the portion of the project from Science Centre Station to Gerrard Station
- **March 1, 2022 and March 3, 2022** from 6:30 to 8:00 p.m., with a focus on the portion of the project from Gerrard Station to Exhibition Station

Those who wish to provide comments on the Draft Environmental Impact Assessment Report must do so by **March 9, 2022** and submit them using the webpage form or address them to the following email: ontarioline@metrolinx.com.

Section 17 of O. Reg. 341/20 requires Metrolinx to establish an issues resolution process to attempt to resolve any concerns raised by the public or Indigenous Nations during the review period. At the end of the review period, Metrolinx will update the Draft Environmental Impact Assessment Report by adding a description of the issues resolution process, what Metrolinx did to address any concerns, and if the Ontario Line implementation timeline will be impacted as a result of addressing concerns. Metrolinx will then publish the Final Environmental Impact Assessment Report on the Ontario Line project webpage: www.metrolinx.com/ontarioline and issue a Notice of Publication of the Final Environmental Impact Assessment Report.

To obtain a copy of the Draft Environmental Impact Assessment Report, please contact the Ontario Line project email listed above.

Mark Clancy (T: 416-202-5100, E: ontarioline@metrolinx.com) may be contacted on behalf of Metrolinx.

**Metrolinx
130 Adelaide Street West
Toronto, Ontario

Environmental Component	Potential Impact	Mitigation Measure(s)	Monitoring Activities
Aquatic Habitat			
Aquatic Environment – Wetlands and Waterbodies	<p>Construction</p> <p><u>OLS Study Area</u></p> <ul style="list-style-type: none"> Impacts to riparian vegetation, erosion and sedimentation to waterbodies from construction; risk of contamination to waterbodies as a result of spills. <p><u>OLN Study Area</u></p> <ul style="list-style-type: none"> Removal or impacts to wetland; aquatic and riparian vegetation; degradation of wetlands as result of dewatering and discharge activities; erosion and sedimentation to wetlands/waterbodies from construction; and risk of contamination to wetlands/waterbodies as a result of spills. <p>Operations</p> <ul style="list-style-type: none"> Potential impacts are not anticipated during operations 	<p>Construction</p> <ul style="list-style-type: none"> Construction activities will maintain the buffers established during the design phase to reduce potential negative impacts to wetlands and waterbodies. Shorelines or banks disturbed by construction activities will be immediately stabilized by any activity associated with the project to prevent erosion and/or sedimentation, preferably through re-vegetation with native species suitable for the site. An Erosion and Sediment Control Plan, in accordance with the Greater Golden Horseshoe's Erosion and Sediment Control Guideline for Urban Construction (2006) and the Erosion and Sediment Control Guide for Urban Construction (TRCA 2019), as amended from time to time, will be prepared prior to and implemented during construction to reduce the risk of sedimentation. A Spill Prevention and Response Plan will be developed before work commences so that procedures and policies are in place to reduce impacts to wetlands and watercourses during construction. In wetland areas where vernal pooling occurs, prior to dewatering isolated work areas, wildlife will be captured and relocated to suitable habitat outside of the work area. Vegetation removals will also consider and mitigate potential impacts to wetland communities. Until such a time, that an Ontario Wetland Evaluation System evaluation is completed and evaluated by NDMNRF, unevaluated wetlands will be considered as significant for the purposes of assessing impacts. Wetland communities potentially affected by the Project will be clearly staked out on site. If dewatering is proposed, then it is recommended to be undertaken during the winter when the potential impacts of changes in water levels are less significant in wetland communities. During detailed design, the need for a dewatering zone of influence assessment and dewatering monitoring plan should be evaluated. The dewatering monitoring plan, if required, will monitor for potential negative impacts on nearby wetlands and adjacent vegetation communities to confirm if they would be affected due to dewatering activities. An adaptive management plan will be prepared if negative impacts are observed. Prior to dewatering isolated work areas, fish will be captured and relocated to suitable habitat outside of the work area under a Licence to Collect Fish for Scientific Purposes from the NDMNRF. <p>Operations</p> <ul style="list-style-type: none"> As no impacts are anticipated to wetlands and waterbodies during operations, no mitigation measures are recommended. 	<p>Construction</p> <ul style="list-style-type: none"> Onsite inspection will be undertaken to confirm the implementation of the mitigation measures and identify corrective actions, if required. Corrective actions may include alteration of activities to reduce impacts and enhance mitigation measures. <p>Operations</p> <ul style="list-style-type: none"> As no impacts are anticipated to wetlands and waterbodies during operations, no monitoring activities are recommended.
Aquatic Environment – Fish and Fish Habitat	<p>Construction</p> <p><u>OLS Study Area</u></p> <ul style="list-style-type: none"> No in-water works, no direct impacts to fish and fish habitat Indirect - Dewatering activities and water discharge resulting in changes in water velocity or temperature, soil 	<p>Construction</p> <ul style="list-style-type: none"> All requirements of the <i>Fisheries Act</i> will be met. Hello Marilyn,

We have a monitor available to be present next week. I will wait for the details about the work from Jeff.

Thank you,
Marie-Sophie

Hi Marie-Sophie,

Happy Friday! I just wanted to touch base with you again about the Corktown Demolitions as part of

the Ontario Line. Jeff Muir from Stantec will be your point of contact for arranging the details if you or a representative is able to attend. Once you confirm, he will be reaching out but please don't hesitate to connect with him if you need information before then. He can be reached at Jeff.Muir@stantec.com.

Let me know how your schedule is looking and if HWN would like to attend.

Have a lovely weekend!
Marilyn

Good morning, Marie-Sophie!

I wanted to follow up with you about the dates for the Corktown Demolitions – apologies it has taken me a little while. Right now the dates are tentatively set for February 28/March 1. As we get closer to the dates, we will keep you updated.

Hope this helps!

Best,
Marilyn

Good afternoon Jaimi,

Thank you for the update. The HWN will happily collaborate on this project.

Stantec already reach out to us earlier this week about a project for the Ontario Line in the Don Valley area ([REDACTED] – Wastewater treatment plant). He told me that the work was tentatively schedule for March 4th. Is it the same project as the Ontario Line : Borehole Drilling?

Thank you,
Marie-Sophie

Dear Marie-Sophie,

Please find attached a letter inviting participation in the archaeological monitoring of borehole drilling planned to occur in the Lower Don Bridge area as part of the Ontario Line Project.

The date of this fieldwork is tentatively set for March 7, 2022. If you are interested in participating, please let me know as soon as possible and we will work with you and the project team to coordinate.

If you have any questions or concerns, please feel free to reach out to me at any time.

Thank you for your time and assistance.

Jaimi

February 23, 2022

Grand Chief Rémy Vincent
Huron-Wendat Nation
255 Place Chef Michel Laveau
Delivered by email

Dear Grand Chief Vincent,

RE: Ontario Line Project - Invitation to Participate in Archaeological Monitoring for Borehole Drilling - Lower Don Bridge Area

Metrolinx continues to progress the Archaeological studies for the Ontario Line project and wanted to invite Huron-Wendat Nation to participate in further Archaeological monitoring for borehole drilling planned for the Lower Don Bridge area.

A Stage 1 Archaeological Assessment (AA) was completed as part of the Ontario Line Environmental Impact Assessment Report (EIAR). This report identified the area for the proposed boreholes as having archaeological potential. Both the Stage 1AA report and the EIAR were shared with Nations, in both August and November 2021.

Metrolinx is completing an Environmental Site Assessment in the Lower Don area (please see **Figure 1**). Given the identified archaeological potential of the area, archaeological monitoring will take place for the planned borehole drilling. This approach will provide for the on-site identification of archaeological resources and, if necessary, stop-work order of drilling by a licensed archaeologist in the event potential archaeological resources are encountered. A licensed archaeologist will be on-site during drilling to visually inspect spoil removed during borehole drilling as well as intermittent borehole samples to visually identify the presence of artifacts. Metrolinx would value any participation that Huron-Wendat Nation may wish to have in this monitoring program.

Please see the fieldwork details below:

Start Date: March 7, 2022 (potentially March 8 as well depending on drilling)

Duration: 1 day

Start Time: 8:30am

Consultant Company: Stantec

Contact information: Jeffrey Muir - (289) 208-5298

Assessment: Archaeological monitoring for borehole drilling

Size of Field Crew: 1 field supervisor

Parking and meeting location: See Figure 2. Meet and park at yellow star - along Bayview Ave and Mill St

Required PPE:

- Class 2 PPE (hi-viz vest)

- CSA Type 2 Hard Hat with foam insert (bump caps)
- CSA approved eye protection
- CSA approved 6" laced safety shoes
- CSA Hearing protection, in ear or over ear
- Appropriate clothing for weather conditions

Invitation to Participate in Fieldwork

Metrolinx would value the involvement of Huron-Wendat Nation in the upcoming archaeological monitoring fieldwork outlined above. Should your Nation wish to participate, please let us know at your earliest convenience. We welcome any requests for a meeting to discuss opportunities to participate or to explore this project in more detail with Huron-Wendat Nation. Upon receipt of Huron-Wendat Nation's interest in participating, Metrolinx will work to coordinate your Nation's involvement. Metrolinx is also willing to share fieldnotes and/or a summary of the borehole and geotechnical data in addition to the open invitation to participate directly in the monitoring.

Engagement

Regardless of whether or not your Nation participates in the fieldwork, Metrolinx will inform you of discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will also ensure that future Archaeological Assessment reports are provided to your Nation in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries.

If you require additional information or materials, or if you wish to discuss this project in more detail, please contact, Jaimi O'Hara, Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Thank you for your time and consideration.

Yours Truly,

Sarah Chowdhury, Environmental Project Manager
Environmental Programs & Assessment

Subject: Ontario Line - Archaeological monitoring for Borehole Drilling
Attachments: OL Archaeological Monitoring Invitation for Participation in monitoring for Boreholes_KNFN.pdf

Dear Chief Nahrgang,

Please find attached a letter inviting participation in upcoming archaeological monitoring for borehole drilling that is taking place at various locations to support environmental assessment and geotechnical studies related to the Ontario Line Subway project. The boreholes are being drilled in locations that have known archaeological potential and as such Metrolinx is ensuring that a consultant archaeologist is on-site to monitor. We'd like to extend this invite to your Nation as well. We appreciate that during these uncertain times of COVID-19 this may not be possible or safe for your Nation. We are happy to provide any fieldnotes taken by the consultant archaeologist and/or provide a summary of the data collected if this is at all helpful to you. Please let us know if there is any other way we can support your Nation during this time. We know your Nation does not have funding as per emails sent to us by . We welcome any opportunity to discuss this and see what we can do.

The boreholes are anticipated to be completed over the next several weeks beginning this Friday on **January 22, 2021**. Please let me know if you have interest in participating as soon as possible, and we will work with you and the project team to coordinate.

Miigwetch,

Fallon

[OL_CS_EWR_Initial_Draft_Letter_KNFN.pdf](#)

Dear Chief Nahrgang,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. Attached you will find a letter providing an update on the project. The purpose of this letter is to:

- Provide an update on the scope of the project work
- share the initial draft of the Early Works Report for the proposed Corktown Station
- Invite your Nation to participate in upcoming archaeological fieldwork

In an effort to streamline your review, we draw your attention to the attachment which provides an overview of the expected environmental impacts and proposed mitigations, as we know this may be of specific interest to you.

Metrolinx is also preparing a letter specific to works being planned within the Don Valley as we recognize the significance of this waterway to many Nations. We hope to share that letter soon. We are happy to meet with your Nation to discuss the Ontario Line and address any questions or concerns that your Nation may have.

We ask that any comments on the draft Corktown Station Early Works Report be provided no later than **April 15, 2021**. Please note that the Noise and Vibration Report, which will be part of the Early Works Report is still being prepared and we will share with your Nation by March 19, 2021.

The draft Corktown Station Early Works Report is available at the following link:

Please let us know as soon as possible if your Nation has interest in participating in future archaeological fieldwork.

We know that your First Nation does not have capacity as per emails received from
We would be happy to address a way to assist you with capacity for these projects and welcome an opportunity to speak further about what we can do.

If you have any questions or concerns, please do not hesitate to contact me.

Miigwetch,

Fallon

Subject: Ontario Line Project - Invitation to Meet & provide input on First Parliament Site
Date: Monday, April 12, 2021 4:00:21 PM
Attachments: [First Parliament_KNFN.pdf](#)

Dear Chief Nahrgang,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. We recently communicated with your Nation about the proposed Corktown Station which is along the planned alignment of the Ontario Line. This location includes parcels of land which were once the site of Upper Canada's First Parliament buildings. Metrolinx and its partners are exploring opportunities to commemorate the history of this site, and have been engaging with various parties including the City of Toronto and the Mississaugas of the Credit First Nation, on whose treaty territory this project is occurring.

Given the significant chance of recovering Indigenous and European artifacts during the Corktown Station Early Works, a detailed archaeological workplan is being developed. Metrolinx recognizes the importance and value of Indigenous monitors for any archaeology related to the Ontario Line Project. In our previous communication, an invitation was included for your Nation to participate in any archaeological fieldwork and monitoring during the Corktown Station Early Works, including demolition of modern buildings currently on the First Parliament site.

This work is anticipated to commence in Fall 2021, and if you have not yet expressed interest in participating, please feel free to do so at your earliest convenience. As a reminder any comments on the draft Corktown Station Early Works Report should be provided no later than **April 15, 2021**.

Metrolinx recognizes that the history of this location extends beyond European use, and as such, wants to take the opportunity to understand any significance it may have to Indigenous Nations. Metrolinx would like to meet with your Nation to discuss the First Parliament site, its commemoration, as well as review the broader Ontario Line project if you wish. We recognize that traditional knowledge of this area may be sacred and/or not appropriate to be shared, but would appreciate any information that may be appropriate for Metrolinx to consider.

This letter is not intended to replace engagement but to provide a high level summary for your information. We would very much appreciate meeting with your Nation to discuss in more detail. Please let me know if you have any questions or concerns. We know that your First Nation does not have capacity as per emails received from . We would be happy to address a way to assist you with capacity for these projects and welcome an opportunity to speak further about what we can do.

If you have any questions or concerns, please do not hesitate to contact me.

Date: Friday, April 30, 2021 1:25:48 PM
Attachments: [OL-Don River Letter 2021 KNFN.pdf](#)

Dear Chief Nahrgang,

Metrolinx continues to progress its environmental studies for the Ontario Line Project. We wanted to keep you aware that part of the project scope falls within the Don Valley and River System, and we recognize the importance of Valley and the waters within. Attached you will find a letter providing an update on the project and information regarding the planned work and environmental assessments that are anticipated to take place within the Don Valley. We also wanted to invite your Nation to participate in the planned Stage 2 Archaeological Assessments that are anticipated to occur as part of the upcoming field season.

We know that your First Nation does not have capacity as per emails received from . We would be happy to address a way to assist you with capacity for these projects and welcome an opportunity to speak further about what we can do.

We would very much appreciate meeting with your Nation to discuss in more detail. Please let me know if you have any questions or concerns.

Subject: RE: Ontario Line Project – Archaeological Monitoring for Borehole Drilling - 265 Front St East - KNFN

Dear Chief Nahrgang,

Please find attached a letter inviting participation in upcoming archaeological monitoring for borehole drilling that is taking place next week at 256 Front Street in Toronto to support environmental assessment and geotechnical studies related to the Ontario Line Subway project. The boreholes are being drilled in locations that have known archaeological potential and as such Metrolinx is ensuring that a consultant archaeologist is on-site to monitor. If you are not able to attend, we are happy to provide any fieldnotes taken by the consultant archaeologist and/or provide a summary of the data collected if this is at all helpful to you.

The boreholes are anticipated to be completed between July 12 and July 16, 2021. Please let me know as soon as possible if you have interest in participating, and we will work with you and the project team to coordinate. And just a final note for your information, both Fallon Melander and Jaimi O'Hara, who are usually Metrolinx's main point of contact with your Nation, are away from the office this week. Hence you are receiving this communication from me.

We know that your First Nation does not have capacity as per emails received from

. We would be happy to address a way to assist you with capacity for these projects and welcome an opportunity to speak further about what we can do.

October 7, 2021

Chief Kris Nahrgang
Kawartha Nishnawbe First Nation
Box 1432 RR#4
Lakefield, ON K0L 2H0
Delivered by email

Dear Chief Nahrgang,

RE: Ontario Line Project - Lower Don Bridge Marine Archaeological Overview Assessment for Review

Metrolinx wishes to build a strong and respectful relationship with Kawartha Nishnawbe First Nation. Metrolinx appreciates and respects Kawartha Nishnawbe First Nation's desire to be appropriately informed and aware of projects. Metrolinx wishes to share with you the development of the Marine Archaeological Overview Assessment (MAOA) report for the proposed construction of the Lower Don Valley Bridge over the Don River. This proposed bridge is a component of the Ontario Line Project as part of the Lower Don Bridge and Don Yard Early Works. We invite Kawartha Nishnawbe First Nation's feedback on the marine Archeological Overview Assessment prepared for the Ontario Line Project.

Project Description

The Ontario Line will bring 15.6 kilometres of subway service to Toronto. The Ontario Line will stretch from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line will have 15 new stations, including six interchange stations, connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable service.

Lower Don Bridge and Don Yard Early Works

The Lower Don Bridge and Don Yard early works are planned for where the Ontario Line will run alongside GO train operations. These early works will set the groundwork for other major construction on the Ontario Line project and include:

- building a new bridge north of the existing rail bridge over the Lower Don River that will carry the Ontario Line tracks;
- shifting GO tracks in the Don Yard and nearby rail corridor to accommodate Ontario Line infrastructure;
- modifying the existing rail bridge to accommodate GO track shifts and Ontario Line infrastructure; and
- relocating and protecting utilities and signal infrastructure in the area.

The location of the Lower Don Bridge and Don Yard early works project footprint and study area can be viewed in **Figure 1** below.

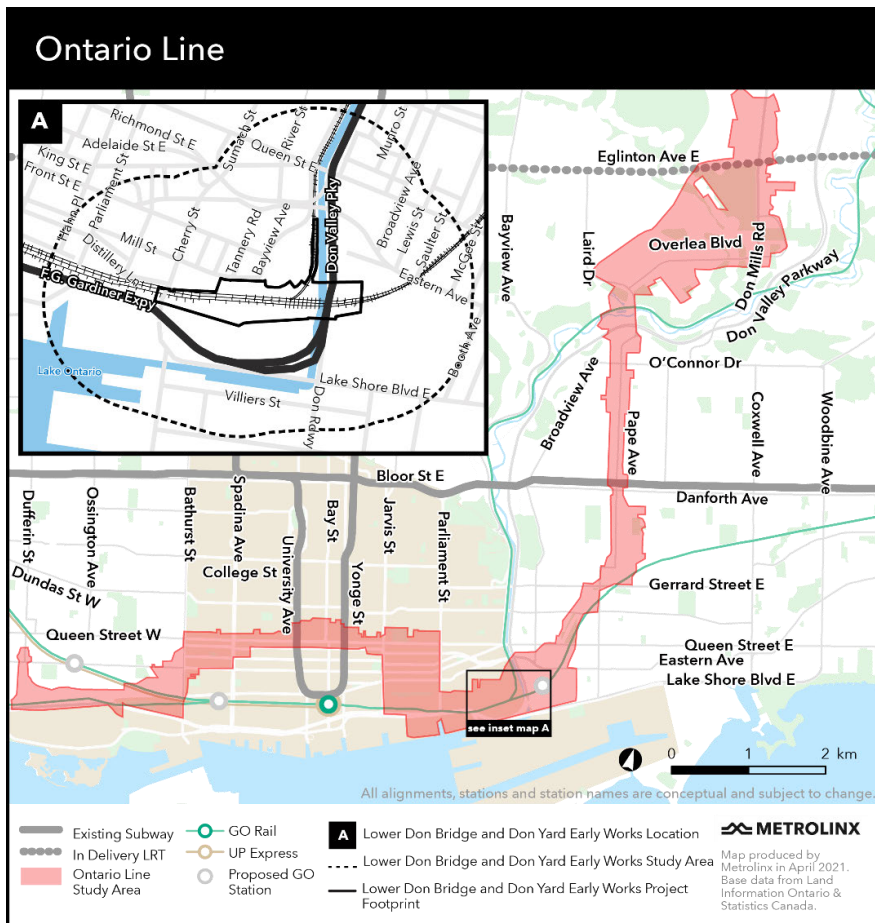

Figure 1: Map of Lower Don Bridge and Don Yard Early Works

Marine Archaeological Overview Assessment

On behalf of Metrolinx, Stantec has undertaken a Marine Archaeological Overview Assessment for the proposed Lower Don Bridge. The purpose of the Marine Archaeological Overview Assessment is to determine the marine archaeological potential of the study area for the bridge shown in **Figure 2** below.

The proposed bridge will cross over the Don River on the north side of the existing GO Transit Lakeshore East rail bridge. As a result, a large portion of the study area overlaps with the Don River. While the bridge will have no permanent in-water components, Metrolinx anticipates that in-water construction activities may impact potential submerged cultural resources. The marine archaeological potential of the study area is being considered as part of the Marine Archeological Overview Assessment.

The assessment determined that despite the study area for the Lower Don Valley Arch Bridge Superstructure having indicators of marine archaeological potential, there has been extensive river-bed disturbance to date. The riverbed has been previously disturbed by engineered

channeling, modern dredging, and modern construction. The assessment determined that the study area retains low to no potential for the identification and documentation of in situ Indigenous and Euro-Canadian marine archaeological resources. As a result no further marine archaeological work is required for the study area.

A copy of the marine Archeological Overview Assessment has been included in the Dropbox link for your review. Please provide any comments you may have by **November 19, 2021**.

Invitation for Input

We are committed to an open, respectful, and transparent engagement with Kawartha Nishnawbe First Nation. Metrolinx values any input that Kawartha Nishnawbe First Nation is willing to provide on the Marine Archaeological Overview Assessment report.

We are happy to meet with your Kawartha Nishnawbe First Nation to go over the project and development of the Marine Archaeological Overview Assessment report and answer any questions Kawartha Nishnawbe First Nation may have on the report or the project as a whole.

If you require additional information or materials, or if you wish to discuss this project in more detail or set up a meeting, please contact Jaimi O'Hara, Acting Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Please submit your feedback in writing by **November 19, 2021**.

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*, except where information is provided to Metrolinx in confidence, pursuant to section 15.1.

Yours Truly,

Maria Zintchenko, Environmental Project Manager

November 3, 2021

Chief Kris Nahrgang
Kawartha Nishnawbe First Nation
Box 1432 RR#4
Lakefield, ON K0L 2H0
Delivered by email

Dear Chief Nahrgang,

**RE: Ontario Line Project - Species at Risk 17(2)(d) Permit Amendment Under the
*Endangered Species Act***

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with Kawartha Nishnawbe First Nation. Metrolinx appreciates and respects Kawartha Nishnawbe First Nation's desire to be appropriately informed and aware of projects. To that end, Metrolinx is sharing with Kawartha Nishnawbe First Nation information regarding the Species at Risk (SAR) 17 (2) (d) Permit under *the Endangered Species Act* (ESA, 2007) obtained in support of the Ontario Line Project, and the proposed amendment to this permit.

Project Description

Metrolinx, a regional transportation agency, is helping transform the way the Greater Golden Horseshoe region moves by building a fast, convenient, and integrated transit network. As part of this work, Metrolinx is proceeding with the Ontario Line Project which will bring 15.6 kilometres of subway service to Toronto.

Ontario Line Permit #CR-D-002-19

Metrolinx, as part of the Ontario Line Project, previously received approval for a 17(2)(d) permit (Permit #CR-D-002-19) under the *Endangered Species Act* (ESA, 2007) issued by the Ministry of the Environment, Conservation, and Parks (MECP) on August 10, 2020. The permit provides approval for those project activities that may have adverse impacts on identified Species at Risk (SAR) and/or their habitat. The permit allows for those activities to take place and provides direction to Metrolinx regarding mitigation measures and compensation requirements that would be necessary to support those impacted species to support no net loss.

To inform this permit, Metrolinx completed SAR screening through the Ontario Line Environmental Conditions Report and Natural Environment Report using various information sources. While the results of this screening were shared within the initial draft of the Environmental Conditions Report circulated to Kawartha Nishnawbe First Nation on June 15 2020, Draft Environmental Conditions Report circulated on September 17 2020 and Final Environmental Conditions Report circulated on November 30 2020, we regret that we did not engage with Kawartha Nishnawbe First Nation directly on the screening process or the findings.

Potentially Impacted Species and Summary of Permit Conditions and Requirements

Based on the SAR screening completed to date, some activities required to support the Ontario Line Project may result in the following species at risk being impacted:

- Bank Swallow - Threatened
- Barn Swallow - Threatened
- Blanding's Turtle - Threatened
- Butternut - Endangered
- Chimney Swift - Threatened
- Little Brown Myotis - Endangered
- Northern Myotis - Endangered
- Small-footed Myotis - Endangered
- Tri-colored Bat - Endangered

Activities that may result in impacts to species listed above are associated with project construction and include activities such as removal or alteration of SAR habitat features (e.g., structures that may support SAR bird nesting, and trees).

Prior to commencing any activities that may impact SAR and/or SAR habitat, Metrolinx will complete species-specific screening for areas where project activities are planned to take place, and, if necessary (if screening determines that SAR/SAR habitat is likely to be present), surveys to detect SAR and SAR habitat presence and conduct an impact assessment if presence is confirmed, to characterize species-specific impacts (e.g., amount of habitat removed).

Metrolinx will meet the ESA permit conditions such as implementing species-specific mitigation measures, monitoring their effectiveness, and taking corrective action as required. Species-specific mitigation measures include scheduling activities to take place outside of species-specific timing windows (e.g., outside of active season or breeding window), implementing exclusion measures to prevent individuals of certain species from being impacted by project activities, and others.

If project activities result in SAR habitat removal, Metrolinx will implement species-specific compensation measures such as creating habitat (e.g., nesting habitat features replacing habitat features removed). Compensation habitat will be regularly monitored, and appropriate corrective actions will be taken as required to ensure habitat functions as intended.

Proposed Permit Amendment

Metrolinx is proposing an amendment to the previously approved SAR 17(2)(d) Permit (Permit #CR-D-002-19) under the *Endangered Species Act* (ESA, 2007), approved on August 10, 2020. The purpose of this permit amendment is to seek approval for additional study area not included in the current Permit #CR-D-002-19, as shown in **Appendix 1**. There are no changes to the permit conditions, including species-specific mitigation measures and compensation requirements, and no additional species are being added at this time. The SAR screening developed in support of the current permit has been updated to provide occurrence probability of SAR that may be present in the areas Metrolinx is seeking to include in the permit as part of the proposed amendment, and is included as **Appendix 2**.

Permit Amendment Process - Next Steps

The Proposal for the 17(2)(d) Permit Amendment is anticipated to be available on the Environmental Registry of Ontario (ERO) for a 30-day public review period this Fall 2021, and Metrolinx will notify Kawartha Nishnawbe First Nation when the ERO posting is available. While not specifically required under the Environmental Bill of Rights, the Ministry of the Environment, Conservation and Parks (MECP) voluntarily posts all ESA permit proposals for public review to ensure transparency and inclusion.

Metrolinx is seeking Kawartha Nishnawbe First Nation's comments, questions, or requests for additional information upon review of the material presented in this letter at any time in advance of the public ERO posting. Questions or comments can also be submitted directly to MECP through the ERO posting during the 30-day public review period.

Following the 30-day public review period, the proposed permit amendment will be submitted to the Minister for review and consideration. The amendment may only be issued if the Minister is of the opinion that the legal requirements set out in clause 17(2)(d) of the *Endangered Species Act* (ESA, 2007) have been satisfied. Should the amendment be issued, Metrolinx will be obligated to adhere to the requirements and standards as stipulated under the permit.

Kawartha Nishnawbe First Nation will be kept apprised should any new SAR be identified within the project area as project planning progresses. In such cases we will endeavor to engage Kawartha Nishnawbe First Nation prior to seeking any necessary permit amendments.

Metrolinx is committed to building a long-term relationship with Kawartha Nishnawbe First Nation, and we recognize that this requires transparency. We appreciate that we have much work to do in this regard and we hope to move forward in a positive way. The original SAR permit was obtained as part of the normal course of Metrolinx business, which had yet to be identified by the Indigenous Relations Office as necessitating engagement and information sharing with Indigenous Nations.

The Indigenous Relations Office has begun guiding the organization and identifying opportunities to flag such actions in advance, so that we can more meaningfully engage with Indigenous Nations as we move forward. We appreciate your patience as Metrolinx continues to learn more about Indigenous Nations and with the help of the Indigenous Relations Office, becomes aware of additional opportunities for engagement with Indigenous Nations.

We appreciate that previous engagement activities may not have met the needs of Kawartha Nishnawbe First Nation, and the volume of materials may have resulted in Kawartha Nishnawbe First Nation not having been made adequately aware of the possible identified impacts to several Species at Risk under this permit. Metrolinx remains committed to meaningful engagement; we are committed to identifying and prioritizing the sharing of the most relevant and appropriate information with Kawartha Nishnawbe First Nation.

If Kawartha Nishnawbe First Nation requires additional information or materials, or you wish to discuss this project in more detail, please reach out to Jaimi O'Hara in the Indigenous Relations Office at Metrolinx and she would be pleased to facilitate a meeting. She can be contacted at IndigenousRelations@metrolinx.com.

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*, except where information is provided to Metrolinx in confidence, pursuant to section 15.1.

Thank you for your time in reviewing this letter.

Yours Truly,

Hello Chief Nahrgang,

We noticed that the Noise and Vibration Operations Report, was not outlined in the previous letter which provided an overview of the Draft Environmental Impact and Assessment Report for the Ontario Line Project. We apologize for this omission and note that the report has now been added to the Dropbox shared below. We apologize that this report was overlooked earlier, and is not referenced directly in the letter. If you have any questions, please don't hesitate to reach out.

Best,

Marilyn Stoye *(she/her)*

Subject: Ontario Line - Draft Environmental Impact and Assessment Report for Review

Dear Chief Nahrgang,

Please find attached, a letter outlining the Draft Environmental Impact and Assessment Report (EIAR) for the Ontario Line. The report is available for review at the following link:

Any comments you may have regarding this report received by **December 6, 2021**, will be incorporated in the Draft EIAR planned to be released in January 2022. Feedback received after December 6, will be reflected in the Final EIAR, planned for release in March 2022.

We know that your First Nation does not have capacity as per emails received from . We would be happy to address a way to assist you with capacity for

these projects and welcome an opportunity to speak further about what we can do.

If you have any questions or concerns, please feel free to reach out to me at any time.

Thank you for your time and assistance.

Dear Chief Nahrgang,

Please find attached a letter inviting participation in Stage 2 Archaeological Assessments planned to occur in the upcoming weeks as part of the Ontario Line Project.

The date of this fieldwork is tentatively set for December 2, 2021. If you are interested in participating, please let me know as soon as possible and no later than next **Friday, November 26, 2021**, and we will work with you and the project team to coordinate.

We know that your First Nation does not have capacity as per emails received from . We would be happy to address a way to assist you with capacity for these projects and welcome an opportunity to speak further about what we can do.

If you have any questions or concerns, please feel free to reach out to me at any time.

Thank you for your time and assistance.

Delivered by email

Dear Chief Nahrgang,

**RE: Ontario Line Project - Stage 2 Archaeological Assessment - Thorncliffe Segment
Invitation to Participate in Archaeological Fieldwork**

Metrolinx and its consultant, Stantec continue to progress the archaeological studies for the Ontario Line project and wanted to invite Kawartha Nishnawbe First Nation to participate in Stage 2 Archaeological Assessments planned to occur in the Thorncliffe Segment in the upcoming weeks. The locations of the Thorncliffe Segment study areas can be viewed in **Figure 1** below.

Stage 2 archaeological test pit survey at five metre intervals is planned in areas of archaeological potential on the illustrated PINs (please see Figure 1). This includes the archaeological crew of four (one field supervisor and three field technicians) digging by hand each test pit, each of which is at least 30 centimetres in diameter. The pit is dug to subsoil (approximately 20 to 30 centimetres in depth depending on soil conditions, plus another five centimetres into the subsoil) at five metre intervals across the areas of archaeological potential. The topsoil would be screened through six-inch mesh to recover artifacts. We also have three additional days of Stage 1 field work within the Don Valley area, where a field supervisor would photograph the landscape in detail to document areas of steep slope, permanently wet areas, and areas of archaeological potential.

Please see the fieldwork details below:

THORNCLIFFE SEGMENT:

Start Date: Tentatively December 2, 2021. If the start date changes, we will reach out to you.

Duration: Approximately two weeks

Start Time: 8am

Consultant Company: Stantec

Contact information: Jeffrey Muir - (289) 208-5298; Heather Kerr - (416) 602-3271; Patrick Hoskins - (613) 716-4687

Assessment: Stage 2 Archaeological Assessment

Size of Field Crew: 4 (1 field supervisor and 3 field technicians)

Invitation to Participate in Fieldwork

Metrolinx would appreciate any interest Kawartha Nishnawbe First Nation may have in participating in the archaeological monitoring fieldwork. Upon receipt of Kawartha Nishnawbe First Nation's interest in participating, Metrolinx will work to coordinate your Nation's involvement.

Engagement

Regardless of whether or not your Nation participates in the fieldwork, Metrolinx will inform you of discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will also ensure that future Archaeological Assessment reports are provided to your Nation in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries.

If your Nation wishes to participate in the fieldwork, or if you'd prefer to receive fieldnotes and/or a summary of the borehole and geotechnical data, please let us know at your earliest convenience. If you require additional information or materials, or if you wish to discuss this project in more detail or set up an in-person meeting, please contact, Jaimi O'Hara, Acting Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Should you wish to provide input to the above questions, please submit your feedback in writing. Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*, except where information is provided to Metrolinx in confidence, pursuant to section 15.1.

Thank you for your time and consideration.

Dear Chief Nahrgang,

As the Ontario Line Project continues to progress into the new year, we wanted to provide an update and invitation for participation in upcoming fieldwork. Please find attached a letter outlining upcoming Archaeological monitoring activities for the Corktown Station/First Parliament site and Don Valley area. These works are set to begin mid-January through February 2022.

If Kawartha Nishnawbe First Nation is interested in participating in either or both of these works, please let me know as soon as possible in the new year, and we will work with you and the project team to coordinate. We can also provide fieldnotes and/or geotechnical data at your request.

If you have any questions or concerns, please feel free to reach out to me at any time.

Thank you for your time and assistance. Happy Holidays!

Delivered by email

Dear Chief Nahrgang,

RE: Ontario Line Project - Stage 2 Archaeological Assessment - Corktown Station and Don Valley Area: Invitation to Participate in Archaeological Fieldwork

Metrolinx and its consultant, Stantec continue to progress the archaeological studies for the Ontario Line project and wanted to invite Kawartha Nishnawbe First Nation to participate in further archaeological monitoring for Corktown Station and Don Valley area.

CORKTOWN STATION

Archaeological monitoring for building demolitions is planned to occur at Corktown Station in the upcoming weeks. The locations of the Corktown Station study areas can be viewed in **Figure 1** below. Please note that this work is separate from the Stage 2 & Stage 4 archaeological investigations, which has ceased for the 2021 field season and will resume in Spring 2022. Metrolinx will ensure that Kawartha Nishnawbe First Nation is informed of when the Stage 2 & Stage 4 archaeological investigations resume.

The archaeological monitoring will occur for building demolition activities on the First Parliament site that may be capping archaeological deposits at Corktown Station (please see Figure 1). This includes an archaeological crew of two (one field supervisor and one field technician) monitoring the demolition of modern buildings in the areas of archaeological potential. Metrolinx would value any participation that Kawartha Nishnawbe First Nation may wish to have in this monitoring program.

Please see the fieldwork details below:

CORKTOWN STATION:

Start Date: Tentatively January 17-18, 2022. If the start date changes, we will reach out to you.

Duration: Approximately two to four months (demo work occurring intermittently during time period; schedule to be confirmed closer to start date)

Start Time: 8am

Consultant Company: Stantec

Contact information: Jeffrey Muir - (289) 208-5298; Heather Kerr - (416) 602-3271; Patrick Hoskins - (613) 716-4687

Assessment: Archaeological monitoring during building demolition

Size of Field Crew: 2 (1 field supervisor and 1 field technician)

DON VALLEY AREA

As part of the Ontario Line, Hydro One Network Infrastructure (HONI) needs to relocate several hydro towers to accommodate subway maintenance facilities. Metrolinx is carrying out a borehole drilling program in the Don Valley to provide HONI with geotechnical data for proposed hydro tower relocations.

Archaeological monitoring will occur for borehole drilling in areas with archaeological potential (please see Figure 2). This approach will provide for the on-site identification and, if necessary, stop-work order of drilling by a licensed archaeologist in the event potential archaeological resources are encountered. A licensed archaeologist will be on-site during drilling to visually inspect spoil removed during borehole drilling as well as intermittent borehole samples to visually identify the presence of artifacts. Metrolinx would value any participation that Kawartha Nishnawbe First Nation may wish to have in this monitoring program.

Please see the fieldwork details below:

DON VALLEY AREA:

Start Date: Mid-February. Exact dates will be confirmed in January 2022

Duration: 1-2 weeks

Start Time: 8am

Consultant Company: Stantec

Contact information: Jeffrey Muir - (289) 208-5298; Heather Kerr - (416) 602-3271; Patrick Hoskins - (613) 716-4687

Assessment: Archaeological monitoring for borehole drilling

Size of Field Crew: 2 (1 field supervisor and 1 field technician)

Invitation to Participate in Fieldwork

Metrolinx would value the involvement of Kawartha Nishnawbe First Nation in the upcoming archaeological monitoring fieldwork outlined above. Should your Nation wish to participate, please let us know at your earliest convenience. We welcome any requests for a meeting to discuss opportunities to participate or to explore this project in more detail with Kawartha Nishnawbe First Nation. Upon receipt of Kawartha Nishnawbe First Nation's interest in participating, Metrolinx will work to coordinate your Nation's involvement. If Metrolinx is also willing to share fieldnotes and/or a summary of the

borehole and geotechnical data in addition to the open invitation to participate directly in the monitoring.

Engagement

Regardless of whether or not your Nation participates in the fieldwork, Metrolinx will inform you of discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will also ensure that future Archaeological Assessment reports are provided to your community in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries.

If you require additional information or materials, or if you wish to discuss this project in more detail or set up an in-person meeting, please contact, Jaimi O'Hara, Manager of Indigenous Relations at Metrolinx. We can be contacted at IndigenousRelations@metrolinx.com.

Thank you for your time and consideration.

Dear Chief Nahrgang,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. We wish to share with you that the Draft Environmental Impact and Assessment Report (EIAR) has now been published. Attached you will find a letter outlining the Draft Environmental Impact Assessment Report (EIAR) prepared for the Ontario Line Project, as well as the Notice of Publication for the report.

The full report can be found using the following dropbox link:

[REDACTED]

The Notice of Publication commences a 30-day public review period which will continue from February 7, 2022 until March 9, 2022. As such, we ask that your Nation provide any comments in writing no later than March 9, 2022. We appreciate the size of these documents and would be happy to arrange a meeting to review the report and project with you.

In an effort to streamline your review, we draw your attention to the attachments which provide an overview of the expected environmental impacts and proposed mitigations for Natural Environment and Archaeological Resources, as we know this may be of specific interest to you.

Thank you for your time and assistance. If you have any questions or concerns, please do not hesitate to contact me.

Dear Chief Nahrgang,

RE: Ontario Line Project - Notice of Publication of Draft Environmental Impact Assessment Report (EIAR)

Metrolinx remains committed to meaningful consultation and engagement, especially where our projects have impacts to the Treaty and traditional lands of Kawartha Nishnawbe First Nation. In November of 2021, Metrolinx shared with Kawartha Nishnawbe First Nation the preliminary Draft Environmental Impact Assessment Report (EIAR) for comment and review. The purpose of this letter is to share with your Nation the that the Notice of Publication for the Draft EIAR has now been posted, and to continue to invite any comment or feedback you may wish to share on this report.

Project Description

Metrolinx is proceeding with the Ontario Line which will bring 15.6 kilometres of subway service to Toronto. The Ontario Line will stretch across the city, from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line will have 15 new stations, including six interchange stations, connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable service.

Figure 1 - Ontario Line

Ontario Line Environmental Assessment & Project Timeline

Environmental impacts of the Ontario Line Project are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*.

Table 1 below provides a summary of the Ontario Line Reports that have been shared, or will be shared with Kawartha Nishnawbe First Nation:

Final Environmental Impact Assessment Report	April 19, 2022*

*Date is subject to change.

Draft Environmental Impact Assessment Report (EIAR)

The Draft EIAR summarizes the local environmental conditions in the discipline-specific study areas developed for the Project. The local environmental conditions were characterized through a combination of desktop review and field studies by practitioners using industry standard techniques and provincial standards, protocols, and guidelines, where appropriate. The resulting Draft Stage 1 AA and Natural Environment Report was shared with Kawartha Nishnawbe First Nation for review in August 2021.

The Draft EIAR also provides an assessment and evaluation of the impacts that the Project might have on the environment. Based on the potential impacts, a description of mitigation measures and monitoring activities is outlined. A list of municipal, provincial, federal, or other permits and approvals that may be required for the Project is also provided.

Discipline-specific assessment and evaluation of impacts were undertaken for the following disciplines:

- Natural Environment
- Soil and Groundwater
- Cultural Heritage
- Archaeological Resources
- Socio-Economic and Land Use
- Air Quality
- Noise and Vibration
- Traffic and Transportation

Effective February 7, 2022, the Draft Environmental Impact Assessment Report will be available for a 30-day public review period. The report is posted on the Ontario Line project webpage, which can be accessed using the following link:

<https://www.metrolinxengage.com/en/content/full-report-draft-environmental-impact-assessment-report>

The Notice of Publication of Draft EIAR can be found in **Attachment 1**.

Potential Impacts and Mitigation Measures

The tables found enclosed in **Attachment 2** provide a summary of natural environment

and archaeology potential impacts and mitigation measures identified as part of the Draft EIAR that may be of interest to Kawartha Nishnawbe First Nation. If your Nation has any feedback about these potential impacts and/or mitigation strategies, or any other aspects of the Ontario Line, we welcome the opportunity to discuss further.

Engagement

Metrolinx welcomes any comments or feedback on the EIAR during the 30-day public review period, from February 7 to **March 9, 2022**. Metrolinx is committed to an open and respectful relationship with Kawartha Nishnawbe First Nation. We appreciate the significant volume of documents related to the Ontario Line Project that have been shared with Kawartha Nishnawbe First Nation. We are happy to assist in the review of these documents by meeting with your Nation.

Metrolinx is willing to address any questions that Kawartha Nishnawbe First Nation may have about the Ontario Line Project. If you require additional information or materials or if you wish to discuss the Project in more detail or set up a meeting, please contact Jaimi O'Hara, Manager of Indigenous Relations Office at Metrolinx. She can be reached at

IndigenousRelations@metrolinx.com.

With the exception of personal information, all comments will become part of the public record. Kindly note that any information you provide to Metrolinx, or its delegates, will be subject to the Freedom of Information and Protection of Privacy Act, except where information is provided to Metrolinx in confidence, pursuant to section 15.1, which protects the confidentiality of Indigenous knowledges.

Thank you for your time in reviewing this letter. Yours

Truly,

Attachments: Attachment 1 - Notice of Publication of Draft Environmental Impact Assessment Report
 Attachment 2 - Draft EIAR Natural Environment and Archaeology Potential Effects, Mitigation Measures and Monitoring

Notice of Publication of Draft Environmental Impact Assessment Report and Virtual Open Houses Ontario Line Project

The Project

The Ontario Line will bring 15.6 kilometres of new subway service to Toronto, making it faster and easier for people to get where they need to be each day. The line will stretch across the city, from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line will have 15 new stations, including six interchange stations, connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable service.

Environmental Impact Assessment Report

Environmental impacts of the Ontario Line are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*. In accordance with Section 15 of O. Reg. 341/20, Metrolinx has prepared the Draft Environmental Impact Assessment Report that is now available for review.

The Draft Environmental Impact Assessment Report describes existing environmental conditions in the Project study area, environmental impacts, mitigation and monitoring measures, consultation, and required permits and approvals for the Ontario Line.

The Draft Environmental Impact Assessment Report Review and Consultation Process

Effective **February 7, 2022**, the Draft Environmental Impact Assessment Report will be available for review on the Ontario Line project webpage (www.metrolinx.com/ontarioline). You can view and comment on the report from **February 7 to March 9, 2022** via the online form provided.

You can also participate in virtual open houses, where you can hear from project experts and ask questions about the report in real time, at MetrolinxEngage.com/OntarioLine/live on:

- **February 22, 2022 and February 24, 2022** from 6:30 to 8:00 p.m., with a focus on the portion of the project from Science Centre Station to Gerrard Station
- **March 1, 2022 and March 3, 2022** from 6:30 to 8:00 p.m., with a focus on the portion of the project from Gerrard Station to Exhibition Station

Those who wish to provide comments on the Draft Environmental Impact Assessment Report must do so by **March 9, 2022** and submit them using the webpage form or address them to the following email: ontarioline@metrolinx.com.

Section 17 of O. Reg. 341/20 requires Metrolinx to establish an issues resolution process to attempt to resolve any concerns raised by the public or Indigenous Nations during the review period. At the end of the review period, Metrolinx will update the Draft Environmental Impact Assessment Report by adding a description of the issues resolution process, what Metrolinx did to address any concerns, and if the Ontario Line implementation timeline will be impacted as a result of addressing concerns. Metrolinx will then publish the Final Environmental Impact Assessment Report on the Ontario Line project webpage: www.metrolinx.com/ontarioline and issue a Notice of Publication of the Final Environmental Impact Assessment Report.

To obtain a copy of the Draft Environmental Impact Assessment Report, please contact the Ontario Line project email listed above.

Mark Clancy (T: 416-202-5100, E: ontarioline@metrolinx.com) may be contacted on behalf of Metrolinx.

Aquatic Habitat			
Aquatic Environment – Wetlands and Waterbodies	<p>Construction</p> <p><u>OLS Study Area</u></p> <ul style="list-style-type: none"> Impacts to riparian vegetation, erosion and sedimentation to waterbodies from construction; risk of contamination to waterbodies as a result of spills. <p><u>OLN Study Area</u></p> <ul style="list-style-type: none"> Removal or impacts to wetland; aquatic and riparian vegetation; degradation of wetlands as result of dewatering and discharge activities; erosion and sedimentation to wetlands/waterbodies from construction; and risk of contamination to wetlands/waterbodies as a result of spills. <p>Operations</p> <ul style="list-style-type: none"> Potential impacts are not anticipated during operations 	<p>Construction</p> <ul style="list-style-type: none"> Construction activities will maintain the buffers established during the design phase to reduce potential negative impacts to wetlands and waterbodies. Shorelines or banks disturbed by construction activities will be immediately stabilized by any activity associated with the project to prevent erosion and/or sedimentation, preferably through re-vegetation with native species suitable for the site. An Erosion and Sediment Control Plan, in accordance with the Greater Golden Horseshoe's Erosion and Sediment Control Guideline for Urban Construction (2006) and the Erosion and Sediment Control Guide for Urban Construction (TRCA 2019), as amended from time to time, will be prepared prior to and implemented during construction to reduce the risk of sedimentation. A Spill Prevention and Response Plan will be developed before work commences so that procedures and policies are in place to reduce impacts to wetlands and watercourses during construction. In wetland areas where vernal pooling occurs, prior to dewatering isolated work areas, wildlife will be captured and relocated to suitable habitat outside of the work area. Vegetation removals will also consider and mitigate potential impacts to wetland communities. Until such a time, that an Ontario Wetland Evaluation System evaluation is completed and evaluated by NDMNRF, unevaluated wetlands will be considered as significant for the purposes of assessing impacts. Wetland communities potentially affected by the Project will be clearly staked out on site. If dewatering is proposed, then it is recommended to be undertaken during the winter when the potential impacts of changes in water levels are less significant in wetland communities. During detailed design, the need for a dewatering zone of influence assessment and dewatering monitoring plan should be evaluated. The dewatering monitoring plan, if required, will monitor for potential negative impacts on nearby wetlands and adjacent vegetation communities to confirm if they would be affected due to dewatering activities. An adaptive management plan will be prepared if negative impacts are observed. Prior to dewatering isolated work areas, fish will be captured and relocated to suitable habitat outside of the work area under a Licence to Collect Fish for Scientific Purposes from the NDMNRF. <p>Operations</p> <ul style="list-style-type: none"> As no impacts are anticipated to wetlands and waterbodies during operations, no mitigation measures are recommended. 	<p>Construction</p> <ul style="list-style-type: none"> Onsite inspection will be undertaken to confirm the implementation of the mitigation measures and identify corrective actions, if required. Corrective actions may include alteration of activities to reduce impacts and enhance mitigation measures. <p>Operations</p> <ul style="list-style-type: none"> As no impacts are anticipated to wetlands and waterbodies during operations, no monitoring activities are recommended.
Aquatic Environment – Fish and Fish Habitat	<p>Construction</p> <p><u>OLS Study Area</u></p> <ul style="list-style-type: none"> No in-water works, no direct impacts to fish and fish habitat Indirect - Dewatering activities and water discharge resulting in changes in water velocity or temperature, soil 	<p>Construction</p> <ul style="list-style-type: none"> All requirements of the <i>Fisheries Act</i> will be met. Design water management system and dewatering operations to prevent erosion and/or release of sediment-laden or contaminated water to the waterbody or adjacent wetlands. Follow Ontario Provincial Standard Specifications PROV 517 Construction Specification for Dewatering (NOV 2016). Prior to dewatering isolated work areas, fish will be captured and relocated to suitable habitat outside of the work area under a Licence to Collect Fish for Scientific Purposes from the NDMNRF. <p>Operations</p> <ul style="list-style-type: none"> As no impacts are anticipated to fish and fish habitat during operations, no mitigation measures are recommended. 	<p>actions may include additional site maintenance and alteration of activities to reduce impacts.</p> <ul style="list-style-type: none"> Monitoring for dewatering will be undertaken to confirm sediment-laden discharge, visible scour/erosion, and/or changes in temperature in any receiving watercourse. <p>Operations</p> <ul style="list-style-type: none"> As no impacts are anticipated to fish and fish habitat during operations, no monitoring activities are recommended.
Stormwater Management and Drainage			
Floodplain	<p>Construction</p> <ul style="list-style-type: none"> Potential to impact flooding conditions in the Don River Floodplain Potential for flooding impacts onsite during construction <p>Operations</p> <ul style="list-style-type: none"> Potential impacts are not anticipated during operations 	<p>Construction</p> <ul style="list-style-type: none"> Floodplain impact assessment will be conducted during detailed design following TRCA guidelines once details on the pier configuration and other detailed bridge design information are available. Design optimizations on abutment, pier, and valley way placement shall be considered to reduce hydraulic impacts. All temporary works including, but not limited to, the temporary bridges, should follow the Greater Golden Horseshoe's Erosion and Sediment Control Guideline for Urban Construction (2006) and the Erosion and Sediment Control Guide for Urban Construction (TRCA 2019), to reduce the chance of flooding during the construction. TRCA staff will be consulted during detailed design to avoid potential infrastructure conflicts and impacts to flood protection measures/initiatives in the Lower Don Bridge and Don Yard Hydrology and Surface Water Study Area with consideration of, but not limited to, the following: <ul style="list-style-type: none"> West Don Lands Flood Protection Landform (TRCA 2005); Broadview and Eastern Flood Protection Municipal Class Environmental Assessment (TRCA 2021); Flood protection measures and tie-in with the existing railway valley way at Don Roadway and Eastern Avenue underpass as identified in the Don Mouth Naturalization and Port Lands Flood Protection Project Environmental Assessment (TRCA 2014b); New Broadview underpass with expanded flood protection tie-ins and drainage with the railway valley way as identified in the Port Lands and South of Eastern Transportation and Servicing Master Plan Class Environmental Assessment (Waterfront Toronto and City of Toronto, 2016); and, Opening of bridge crossing on east side of Don River through railway valley way to accommodate Hybrid 3 as identified in the Gardiner 	<p>Construction</p> <ul style="list-style-type: none"> Develop and undertake a monitoring program of the West Don Flood Protection Landform, as required, in consultation with TRCA. Include a monitoring strategy in the Flood Contingency Plan to monitor surface water levels during construction activities. <p>Operations</p> <ul style="list-style-type: none"> As no impacts are anticipated during operations, no monitoring activities are recommended.

Environmental Component	Potential Impact	Mitigation Measure(s)	Monitoring Activities
		<p>Expressway and Lake Shore Boulevard East Reconfiguration Environmental Assessment (Waterfront Toronto and City of Toronto, 2017).</p> <ul style="list-style-type: none"> In addition, all necessary studies such as fluvial geomorphic process studies, meander belt and erosion studies, and geotechnical and slope stability assessments will be completed. Prior to construction, develop a Flood Contingency Plan with specific mitigation measures for any proposed works or temporary laydown and staging areas, as required. The Flood Contingency Plan may include risk mapping, and a monitoring strategy. Include construction site on TRCA flood warning system to prepare site in advance of possible flood events. <p>Operations</p> <ul style="list-style-type: none"> As no impacts are anticipated during operations, no mitigation measures are recommended. 	
Surface Water / Stormwater and Drainage	<p>Construction</p> <ul style="list-style-type: none"> Change in stormwater quality and quantity, including: <ul style="list-style-type: none"> Erosion of exposed soil and increased sediment loading which may impact receiving waterbodies and/or municipal stormwater drainage system; and, Increased surface water/stormwater runoff <p>Operations</p> <ul style="list-style-type: none"> Potential impacts are not anticipated during operations 	<p>Construction</p> <ul style="list-style-type: none"> Prior to construction, a Stormwater Management Plan that will outline stormwater discharges management associated with construction activities, and an Erosion and Sediment Control plan will be developed. The overall stormwater quality and quantity control strategy will be developed in accordance with all relevant municipal, provincial, and federal requirements, as amended, and outlined in a Stormwater Management Report. Stormwater management design will consider guidance provided by the MECP, formerly the Ministry of the Environment and Climate Change Stormwater Management Planning and Design Manual (2003) and MTO Drainage Management Manual (2008), TRCA Stormwater Management Criteria (2012), and the Low Impact Development Stormwater Management Planning and Design Guide (TRCA/Credit Valley Conservation 2010), as required. The following stormwater management best management practices will be considered and implemented, as required: <ul style="list-style-type: none"> Reduce clearing and amount of exposed soil; Install key sediment control before grading/land alterations begin; Sequence construction activities so that the soil is not exposed for long periods of times; Protect storm drain inlets to filter out debris; and, Stabilize all exposed soil areas as soon as land alterations have been completed. The TRCAs Living City Policies will be followed during detailed design, including those policies related to outfall placement. Continue to consult with the TRCA to align the Lower Don Bridge and Don Yard early works to the Lower Don Special Policy Area requirements, including the approach to flood proofing and flood modelling. The TRCAs Stormwater Management Criteria will be followed, including those policies related to impervious areas. <p>Operations</p>	<p>Construction</p> <ul style="list-style-type: none"> Monitoring activities will be implemented as outlined in the Stormwater Management Plan and/or Erosion and Sediment Control Plan and may include regular inspections and reporting on the performance of implemented erosion and sediment control measures, best management practices, and other monitoring activities, as required. <p>Operations</p> <ul style="list-style-type: none"> As no impacts are anticipated during operations, no monitoring activities are recommended.

Environmental Component	Potential Impact	Mitigation Measure(s)	Monitoring Activities
		<ul style="list-style-type: none">As no impacts are anticipated during operations, no mitigation measures are recommended.

Dear Chief Nahrgang,

Please find attached a letter inviting participation in the archaeological monitoring of borehole drilling planned to occur in the Lower Don Bridge area as part of the Ontario Line Project.

The date of this fieldwork is tentatively set for March 7, 2022. If you are interested in participating, please let me know as soon as possible and we will work with you and the project team to coordinate.

If you have any questions or concerns, please feel free to reach out to me at any time.

Thank you for your time and assistance.

Jaimi

Jaimi O'Hara

Chief Kris Nahrgang
Kawartha Nishnawbe First Nation
Box 1432 RR#4
Lakefield, ON K0L 2H0
Delivered by email

Dear Chief Nahrgang,

RE: Ontario Line Project - Invitation to Participate in Archaeological Monitoring for Borehole Drilling - Lower Don Bridge Area

Metrolinx continues to progress the Archaeological studies for the Ontario Line project and wanted to invite Kawartha Nishnawbe First Nation to participate in further Archaeological monitoring for borehole drilling planned for the Lower Don Bridge area.

A Stage 1 Archaeological Assessment (AA) was completed as part of the Ontario Line Environmental Impact Assessment Report (EIAR). This report identified the area for the proposed boreholes as having archaeological potential. Both the Stage 1AA report and the EIAR were shared with Nations, in both August and November 2021.

Metrolinx is completing an Environmental Site Assessment in the Lower Don area (please see **Figure 1**). Given the identified archaeological potential of the area, archaeological monitoring will take place for the planned borehole drilling. This approach will provide for the on-site identification of archaeological resources and, if necessary, stop-work order of drilling by a licensed archaeologist in the event potential archaeological resources are encountered. A licensed archaeologist will be on-site during drilling to visually inspect spoil removed during borehole drilling as well as intermittent borehole samples to visually identify the presence of artifacts. Metrolinx would value any participation that Kawartha Nishnawbe First Nation may wish to have in this monitoring program.

Please see the fieldwork details below:

Start Date: March 7, 2022 (potentially March 8 as well depending on drilling)

Duration: 1 day

Start Time: 8:30am

Consultant Company: Stantec

Contact information: Jeffrey Muir - (289) 208-5298

Assessment: Archaeological monitoring for borehole drilling

Size of Field Crew: 1 field supervisor

Parking and meeting location: See Figure 2. Meet and park at yellow star - along Bayview Ave and Mill St

Required PPE:

- Class 2 PPE (hi-viz vest)
- CSA Type 2 Hard Hat with foam insert (bump caps)
- CSA approved eye protection
- CSA approved 6" laced safety shoes
- CSA Hearing protection, in ear or over ear
- Appropriate clothing for weather conditions

Invitation to Participate in Fieldwork

Metrolinx would value the involvement of Kawartha Nishnawbe First Nation in the upcoming archaeological monitoring fieldwork outlined above. Should your Nation wish to participate, please let us know at your earliest convenience. We welcome any requests for a meeting to discuss opportunities to participate or to explore this project in more detail with Kawartha Nishnawbe First Nation. Upon receipt of Kawartha Nishnawbe First Nation's interest in participating, Metrolinx will work to coordinate your Nation's involvement. Metrolinx is also willing to share fieldnotes and/or a summary of the borehole and geotechnical data in addition to the open invitation to participate directly in the monitoring.

Engagement

Regardless of whether or not your Nation participates in the fieldwork, Metrolinx will inform you of discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will also ensure that future Archaeological Assessment reports are provided to your Nation in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries.

If you require additional information or materials, or if you wish to discuss this project in more detail, please contact, Jaimi O'Hara, Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Thank you for your time and consideration.

Yours Truly,

Sarah Chowdhury, Environmental Project Manager

Good afternoon Flavia, Peter and Paul,

Thank you for replying so quickly. I have arranged for liaison Curtis McCue to attend. If we can confirm protocols, timing and locations for the work this Friday it would be greatly appreciated. Curtis cannot be reached via email at this time, but I can send his number to Paul and Peter in a separate email for their contact purposes.

Thank you,

Hi Jordon,

I am Flavia, the project coordinator for the Ontario Line and will be assisting with the borehole drilling monitoring. I will send you the COVID-19 protocols shortly and also wanted to let you know that the archaeological monitoring work will be carried out by Stantec (Paul Ritchie) and Wood (Peter Popkin), that are cc'd in this email and contact info is presented below. The work is planned to occur from Jan 22 to Feb 10.

Peter Popkin

Hi Jordon,

We are pleased to hear that your team will be able to make it. I am connecting you with Flavia who is the project coordinator on the environmental side supporting this work. She will be able to get you in contact with the consultant archaeologist and keep you apprised of the field dates/times. She will also be able to advise about any new COVID protocols.

Let us know if you have any questions or concerns,

Thank you!

Jaimi

Good morning Fallon,

I hope your holidays were well. I have received permission from the COO to allow a liaison to attend and monitor in person. I am just working on arranging one now and should be able to notify you this afternoon with who will be attending.

If you could just provide any relevant new covid protocols that will be taking place during these work days so I can properly assure my liaisons of their safety and measures they may need to adhere to it would be greatly appreciated.

Thank you,

Subject: Ontario Line - Archaeological monitoring for Borehole Drilling

Dear Julie,

Please find attached a letter inviting participation in upcoming archaeological monitoring for borehole drilling that is taking place at various locations to support environmental assessment and geotechnical studies related to the Ontario Line Subway project. The boreholes are being drilled in locations that have known archaeological potential and as such Metrolinx is ensuring that a consultant archaeologist is on-site to monitor. We'd like to extend this invite to your Nation as well. We appreciate that during these uncertain times of COVID-19 this may not be possible or safe for your Nation. We are happy to provide any fieldnotes taken by the consultant archaeologist and/or provide a summary of the data collected if this is at all helpful to you. Please let us know if there is any other way we can support your Nation during this time.

The boreholes are anticipated to be completed over the next several weeks beginning this Friday on **January 22, 2021**. Please let me know if you have interest in participating as soon as possible, and we will work with you and the project team to coordinate.

Miigwetch,

Fallon

Dear Sir/Madam,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. Attached you will find a letter providing an update on the project. The purpose of this letter is to:

- Provide an update on the scope of the project work
- share the initial draft of the Early Works Report for the proposed Corktown Station
- Invite MNO to participate in upcoming archaeological fieldwork

In an effort to streamline your review, we draw your attention to the attachment which provides an overview of the expected environmental impacts and proposed mitigations, as we know this may be of specific interest to you.

Metrolinx is also preparing a letter specific to works being planned within the Don Valley as we recognize the significance of this waterway to many Nations. We hope to share that letter soon. We are happy to meet with MNO to discuss the Ontario Line and address any questions or concerns that MNO may have.

We ask that any comments on the draft Corktown Station Early Works Report be provided no later than **April 15, 2021**. Please note that the Noise and Vibration Report, which will be part of the Early Works Report is still being prepared and we will share with MNO by March 19, 2021.

The draft Corktown Station Early Works Report is available at the following link:

Please let us know as soon as possible if MNO has interest in participating in future archaeological fieldwork.

We appreciate the volume of documents that Metrolinx has shared with MNO.

If you have any questions or concerns, please do not hesitate to contact me.

Miigwetch,

Fallon

Subject: Ontario Line Project - Invitation to Meet & provide input on First Parliament Site
Date: Monday, April 12, 2021 4:04:06 PM
Attachments: [First Parliament_MNO.pdf](#)

Dear Sir/Madam,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. We recently communicated with MNO about the proposed Corktown Station which is along the planned alignment of the Ontario Line. This location includes parcels of land which were once the site of Upper Canada's First Parliament buildings. Metrolinx and its partners are exploring opportunities to commemorate the history of this site, and have been engaging with various parties including the City of Toronto and the Mississaugas of the Credit First Nation, on whose treaty territory this project is occurring.

Given the significant chance of recovering Indigenous and European artifacts during the Corktown Station Early Works, a detailed archaeological workplan is being developed. Metrolinx recognizes the importance and value of Indigenous monitors for any archaeology related to the Ontario Line Project. In our previous communication, an invitation was included for your Nation to participate in any archaeological fieldwork and monitoring during the Corktown Station Early Works, including demolition of modern buildings currently on the First Parliament site.

This work is anticipated to commence in Fall 2021, and if you have not yet expressed interest in participating, please feel free to do so at your earliest convenience. As a reminder any comments on the draft Corktown Station Early Works Report should be provided no later than **April 15, 2021**.

Metrolinx recognizes that the history of this location extends beyond European use, and as such, wants to take the opportunity to understand any significance it may have to Indigenous Nations. Metrolinx would like to meet with MNO to discuss the First Parliament site, its commemoration, as well as review the broader Ontario Line project if you wish. We recognize that traditional knowledge of this area may be sacred and/or not appropriate to be shared, but would appreciate any information that may be appropriate for Metrolinx to consider.

This letter is not intended to replace engagement but to provide a high level summary for your information. We would very much appreciate meeting with MNO to discuss in more detail. Please let me know if you have any questions or concerns. We appreciate the volume of documents that Metrolinx has shared with MNO. If you have any questions or concerns, please do not hesitate to contact me.

Métis Consultation Unit
Métis Nation of Ontario
500 Old St. Patrick Street, Unit D
Ottawa, ON K1N 9G4
Delivered by Email

Dear Sir/Madam,

RE: Ontario Line Project - First Parliament Site and Lime Kiln Site

Metrolinx, a regional transportation agency, is helping to transform the way the Greater Golden Horseshoe moves by building a fast, convenient and integrated transit network. As part of this work, Metrolinx is continuing the pre-construction planning of the Ontario Line which will bring nearly 16 kilometres of subway service to Toronto.

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Métis Nation of Ontario. Metrolinx appreciates and respects Métis Nation of Ontario's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to share with Métis Nation of Ontario information regarding Corktown Station early works and additional information regarding upcoming field visits and investigations at the Corktown Station early works site, which includes two registered archaeological sites, the First Parliament site and the Lime Kiln site.

Project Description

The proposed Ontario Line is a new 16-kilometer subway line, which will occupy an exclusive right-of-way system encompassing a combination of below-grade, above-grade, and at-grade alignment. The route (Figure 1) will run from Ontario Place/Exhibition through downtown Toronto to the Ontario Science Centre in the City of Toronto, with six (6) potential interchange stations and 17 new connections to GO Transit, existing subways and streetcars. More information on the Project can be found on our website: www.metrolinx.com/ontarioline

Corktown Station Early Works

As communicated in the letter sent to Métis Nation of Ontario on March 11, 2021, the Corktown Station site has been identified for launching tunnel excavation equipment for the downtown and Don Yard segments of the proposed Ontario Line alignment, as well as the location of the Corktown Station. The First Parliament and Lime Kiln Sites, located within the Corktown Station area, are known archaeological sites which require additional archaeological study ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures, followed by completion of necessary archaeological studies, is required. Completion of this preparatory work on an expedited basis is essential to allow for the timely delivery of the overall Project and is anticipated to begin in the Fall 2021, subject to the completion of the Corktown Station early works process in accordance with Ontario Regulation 341/20: Ontario Line Project.

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These activities will enable completion of environmental due diligence investigations, including archaeological assessments. These activities will occur on properties within the Corktown Station early works project footprint, as shown in **Figure 1**.

Figure 1: Map of Corktown Station Early Works

Environmental impacts of Corktown Station early works are being assessed in accordance with O. Reg. 341/20. Metrolinx shared the draft Corktown Station Early Works Report and associated discipline reports with Métis Nation of Ontario on March 11, 2021 and had requested any comments to be provided by April 9, 2021.

Archaeological Work at the First Parliament Site and Lime Kiln Site

Metrolinx appreciates the significance of archaeology to Métis Nation of Ontario. The properties at 265 Front Street East, 271 Front Street East, and 25 Berkeley Street, in the St. Lawrence neighbourhood of the City of Toronto, are collectively host to the First Parliament Site. It is located on the southwest corner of Parliament Street and King Street, between Parliament Street and Berkeley Street. The First Parliament Site is a registered archaeological site (AjGu-41) which may include resources associated with the First and Second Parliament Buildings, the Home District Gaol, and Consumers' Gas company buildings. The surface of the property is currently occupied by automotive businesses, including a car dealership, car wash, and surface parking lot. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and remnants of early Toronto industry may be found at this site.

North of the First Parliament Site is another registered archaeological site (AjGu-64), the Lime Kiln Site, which includes remains from the Toronto Lime Works Company. A variety of structural features, in various states of preservation, have been documented on this site. The location of the Lime Kiln Site and the First Parliament Site are shown in **Figure 2**.

Figure 2: Location of First Parliament Site and Lime Kiln Site Areas

The First Parliament Site and Lime Kiln Site require additional archaeological studies ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures is necessary. Completion of this preparatory work is essential to allow for the timely delivery of the Ontario Line.

Archaeological fieldwork to remove or protect archaeological resources is anticipated to commence in early Fall 2021, and a workplan for these archaeological investigations is under development. As mentioned in the letter sent on March 11, 2021, Métis Nation of Ontario is invited to participate in all archaeological fieldwork, and to review and provide comments on forthcoming reports.

Feedback on Commemoration of First Parliament Site

Metrolinx appreciates that the history of the First Parliament site is not one simply of Canadian origin, but rather holds longer history and tradition. Metrolinx also appreciates that the site of the First Parliament of Upper Canada is linked to a history of colonization and harmful practices towards Indigenous Peoples. Given the significance of this site, Metrolinx is engaging with Indigenous Nations, City of Toronto and the broader community to identify opportunities for commemoration. Metrolinx is committed to ensuring that any feedback from Métis Nation of Ontario regarding the significance of this site is considered as part of this commemoration. Metrolinx appreciates that traditional or cultural knowledge about this site may be sacred and/or not be appropriate to be shared but welcomes any comments or ideas from Métis Nation of Ontario that may be appropriate to commemorate Indigenous Peoples.

Engagement

Metrolinx is committed to an open, respectful, and transparent relationship with Métis Nation of Ontario. We would like to meet with Métis Nation of Ontario to better understand any significance the First Parliament site may have to Métis Nation of Ontario. We are also happy to assist in reviewing the Corktown Station Early Works Report or reviewing the proposed archaeological workplan for this site. If Métis Nation of Ontario requires additional information or materials, or you wish to discuss this project in more detail or set up a meeting, please contact Fallon Melander, Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*. Thank you for your time in reviewing these assessments.

Thank you for your time in reviewing this letter.

Yours Truly,

A handwritten signature in black ink, appearing to read 'Maria Zintchenko', with a large, sweeping flourish at the end.

Dear Sir/Madam,

Metrolinx continues to progress its environmental studies for the Ontario Line Project. We wanted to keep you aware that part of the project scope falls within the Don Valley and River System, and we recognize the importance of Valley and the waters within. Attached you will find a letter providing an update on the project and information regarding the planned work and environmental assessments that are anticipated to take place within the Don Valley. We also wanted to invite MNO to participate in the planned Stage 2 Archaeological Assessments that are anticipated to occur as part of the upcoming field season.

This letter is not intended to replace engagement but to provide a high level summary for your information. We would very much appreciate meeting with MNO to discuss in more detail. Please let me know if you have any questions or concerns.

Delivered by Email

Dear Sir/Madam,

RE: Ontario Line Project - Don River Crossings & Stage 2 Archaeological Assessment Update

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Métis Nation of Ontario. Metrolinx appreciates and respects Métis Nation of Ontario's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to provide more information to Métis Nation of Ontario about the Ontario Line crossings of the Don River and its tributaries. Metrolinx appreciates the significance of the waters and wishes to better understand how the potential impacts of construction around the Don River may be of interest to Métis Nation of Ontario.

Background

The Project is a new subway line with connections to Line 1 (Yonge-University) subway service at Osgoode and Queen Stations, Line 2 (Bloor-Danforth) subway service at Pape Station, and Line 5 (Eglinton Crosstown) service at the future Science Centre Station. Fifteen stations are proposed, with additional connections to three GO Transit lines (Lakeshore East, Lakeshore West and Stouffville), and the Queen, King, Bathurst, Spadina, Harbourfront and Gerrard/Carlton streetcar routes. The Project will reduce crowding on Line 1 and provide connections to new high-order rapid transit neighbourhoods. More information on the Project can be found on our website: <http://www.metrolinx.com/ontarioline>.

Work in the Don River System

As part of the Ontario Line Project, the following four crossings within the Don River system are proposed:

- Location 1: Lower Don River Crossing (Lower Don Bridge);
- Location 2: Millwood Road Crossing;
- Location 3: Walmsley Brook Crossing; and
- Location 4: West Don River Crossing north of Overlea Boulevard.

Locations 1-4 are shown in **Figure 1** and described in further detail below.

Figure 1: Ontario Line Project - Proposed Don River System Crossings

The environmental assessment for the Ontario Line Project is being completed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20) made under the *Environmental Assessment Act*. Construction of the Lower Don Crossing (Location 1) will be assessed in the Lower Don Bridges and Don Yard Early Works Report, that is anticipated to be shared with Métis Nation of Ontario in summer 2021. Construction of the other three crossings (Locations 2-4) will be assessed in the Environmental Impact Assessment Report, that is planned to be shared with Métis Nation of Ontario in early 2022.

Location 1: Lower Don River Crossing (Lower Don Bridge)

A new bridge is planned to be built on the north side of the existing Lakeshore East rail bridge at the Lower Don River, with space for Ontario Line tracks going in both directions. We are also planning pedestrian and cycling connections across the Lower Don River.

Location 2: Millwood Road Crossing

The underground section of the Ontario Line running under Pape Avenue will emerge from the southern embankment of the Don Valley on an elevated guideway crossing the Don River, west of the Leaside Bridge (Millwood Road). The elevated guideway will connect to Thorncliffe Park in the north.

Location 3: Walmsley Brook Crossing

An elevated guideway will cross the Walmsley Brook tributary of the West Don River north of Pat Moore Drive. The guideway will then continue east across Beth Neilson Drive.

Location 4: West Don River Crossing (north of Overlea Boulevard)

The elevated guideway will cross the West Don River, north of Overlea Boulevard. This section of the route will connect to Don Mills Road and the future Flemingdon Park Station.

Field Surveys and Studies

As project planning is still in progress, environmental field surveys and studies as well as the timing of this work are being determined. Environmental field surveys and studies that may occur within or near the Don River include Stage 2 archaeological assessment and natural environment surveys (e.g., Species at Risk and tree surveys). Studies, surveys and their timing will be confirmed as project planning progresses. Further details are anticipated to be available in mid-Summer 2021.

Update on Archaeology

Metrolinx is currently planning to undertake Stage 2 Archaeological Assessments (AA) near the Don River starting in Fall 2021. The Stage 2 AA investigations will assess areas of identified archaeological potential within the Ontario Line study area which may be affected by the construction of the Project. Stage 2 AA fieldwork consists of test pit surveys at 5 m intervals within areas of previously identified archaeological potential.

Metrolinx would appreciate any interest Métis Nation of Ontario may have in participating in the Stage 2 AA fieldwork. Some of the Stage 2 AA may occur on lands

within the Toronto and Region Conservation Authority's (TRCA) property boundaries and regulated area. Metrolinx will coordinate with TRCA to ensure that Indigenous Nations are provided the opportunity to participate in Stage 2 AA investigations. Upon receipt of Métis Nation of Ontario's interest in participating, Metrolinx will work to coordinate your Nation's involvement.

As Metrolinx continues to undertake environmental due diligence for this project, additional archaeological assessment reports are anticipated to be completed. Metrolinx will ensure that Métis Nation of Ontario will be made aware of and engaged regarding any future archaeological assessments, and especially the discovery and preservation of Indigenous artifacts. Metrolinx will also ensure that future archaeological assessments are provided to Métis Nation of Ontario in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries

Invitation for Input

We are committed to an open, respectful, and transparent engagement with Métis Nation of Ontario. We recognize the potential significance of this project to Métis Nation of Ontario and wanted to keep you apprised of this project. We welcome meeting in the near future to discuss this project and its possible impacts and ways to appropriately engage with Métis Nation of Ontario.

We are happy to address any questions that Métis Nation of Ontario may have about the work proposed in the Don River system or the Ontario Line Project as a whole. If you require additional information or materials, or if you wish to discuss this Project in more detail or set up an in-person meeting, please contact Fallon Melander, Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Metrolinx thanks you for the time in reviewing this letter. Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*.

Yours Truly,

Subject: RE: Ontario Line Project – Archaeological Monitoring for Borehole Drilling - 265 Front St East - MNO

Dear Sir/Madam,

Please find attached a letter inviting participation in upcoming archaeological monitoring for borehole drilling that is taking place next week at 256 Front Street in Toronto to support environmental assessment and geotechnical studies related to the Ontario Line Subway project. The boreholes are being drilled in locations that have known archaeological potential and as such Metrolinx is ensuring that a consultant archaeologist is on-site to monitor. If you are not able to attend, we are happy to provide any fieldnotes taken by the consultant archaeologist and/or provide a summary of the data collected if this is at all helpful to you.

The boreholes are anticipated to be completed between July 12 and July 16, 2021. Please let me know as soon as possible if you have interest in participating, and we will work with you and the project team to coordinate. And just a final note for your information, both Fallon Melander and Jaimi O'Hara, who are usually Metrolinx's main point of contact with your Nation, are away from the office this week. Hence you are receiving this communication from me.

Miigwetch,

Make today great,

Christine Parris (she, her, hers)

Community Relations Specialist, Indigenous Relations Office

Dear Sir/Madam,

Metrolinx is working with its consultant HDR to provide opportunities for participation in upcoming Archaeological Assessment and Natural Environment fieldwork associated with the Ontario Line. Please find attached a letter inviting your Nation to participate.

The fieldwork is anticipated to late August - early September 2021. Please let me know if you have interest in participating as soon as possible, and we will work with you, the project team and HDR to coordinate.

If you have any questions or concerns, please feel free to contact the Indigenous Relations Office at anytime.

Thank you,

Ottawa, ON K1N 9G4
Delivered by Email

Dear Sir/Madam,

RE: Ontario Line Project - Update on Archaeological Assessments and Natural Environment Surveys

Metrolinx and its consultant, Stantec and HDR, will be undertaking Archaeological Assessment and Natural Environment fieldwork associated with the Ontario Line Project. We appreciate Métis Nation's of Ontario's interest in participating in these studies. The following letter provides details about the anticipated surveys to support the planning and coordination of involvement by your Nation.

Invitation to Participate in Fieldwork

Metrolinx would appreciate any interest Métis Nation of Ontario may have in participating in the archaeological fieldwork. Upon receipt of Métis Nation of Ontario interest in participating, Metrolinx will work to coordinate your Nation's involvement.

Update on Archaeology

Metrolinx is planning to undertake various Archaeological Assessments for the Ontario Line Project. This archaeological investigation will assess areas of identified archaeological potential, which may be potentially affected by the construction of the Project. The archaeological works are planned to begin in **September 2021**. Fieldwork dates may change based on field progress and weather.

Metrolinx would appreciate any interest Métis Nation of Ontario name may have in participating in the archaeological fieldwork. Upon receipt of Métis Nation of Ontario interest in participating, Metrolinx will work to coordinate your Nation's involvement.

As Metrolinx continues to undertake environmental studies for this project, additional archaeological assessment reports are anticipated to be completed. Metrolinx acknowledges that Métis Nation of Ontario will be made aware of and engaged regarding any future archaeological assessments, and especially the discovery and preservation of Indigenous artifacts and sacred burial grounds.

Regardless of whether or not your Nation participates in the fieldwork, Metrolinx will inform you of discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will also ensure that future Archaeological Assessment reports are provided to Métis Nation of Ontario in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries.

Natural Environment Field Surveys

Metrolinx is conducting natural environmental studies to review and document existing conditions within the Study Area and to carry out impact assessment reporting. Most of the natural environment fieldwork for Ontario Line is planned to occur in 2022.

However, the surveys detailed in the table below are planned for this year and include butternut survey, tree inventory and aquatic habitat assessment. Please note that these are approximate dates and may be subject to change pending appropriate weather conditions and field survey requirements. Metrolinx will endeavour to keep Métis Nation of Ontario apprised as the work unfolds.

Survey	Date(s)
Butternut Health Assessments (Areas detailed in Figures 1 and 2)	<ul style="list-style-type: none">• August, September/2021
Tree Inventory (Areas detailed in Figures 1 and 2)	<ul style="list-style-type: none">• September/2021
Aquatic Habitat assessment (Don and West Don ravine areas)	<ul style="list-style-type: none">• September/2021

Engagement

If your Nation requires additional information or materials, or if you wish to discuss this project in more detail or set up an in-person meeting, please contact Jaimi O'Hara, Acting Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*.

Ottawa, ON K1N 9G4
Delivered by Email

Dear Sir/Madam,

RE: Ontario Line Project - Lower Don Bridge Marine Archaeological Overview Assessment for Review

Metrolinx wishes to build a strong and respectful relationship with Métis Nation of Ontario. Metrolinx appreciates and respects Métis Nation of Ontario's desire to be appropriately informed and aware of projects. Metrolinx wishes to share with you the development of the Marine Archaeological Overview Assessment (MAOA) report for the proposed construction of the Lower Don Valley Bridge over the Don River. This proposed bridge is a component of the Ontario Line Project as part of the Lower Don Bridge and Don Yard Early Works. We invite Métis Nation of Ontario's feedback on the marine Archeological Overview Assessment prepared for the Ontario Line Project.

Project Description

The Ontario Line will bring 15.6 kilometres of subway service to Toronto. The Ontario Line will stretch from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line will have 15 new stations, including six interchange stations, connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable service.

Lower Don Bridge and Don Yard Early Works

The Lower Don Bridge and Don Yard early works are planned for where the Ontario Line will run alongside GO train operations. These early works will set the groundwork for other major construction on the Ontario Line project and include:

- building a new bridge north of the existing rail bridge over the Lower Don River that will carry the Ontario Line tracks;
- shifting GO tracks in the Don Yard and nearby rail corridor to accommodate Ontario Line infrastructure;
- modifying the existing rail bridge to accommodate GO track shifts and Ontario Line infrastructure; and
- relocating and protecting utilities and signal infrastructure in the area.

The location of the Lower Don Bridge and Don Yard early works project footprint and study area can be viewed in **Figure 1** below.

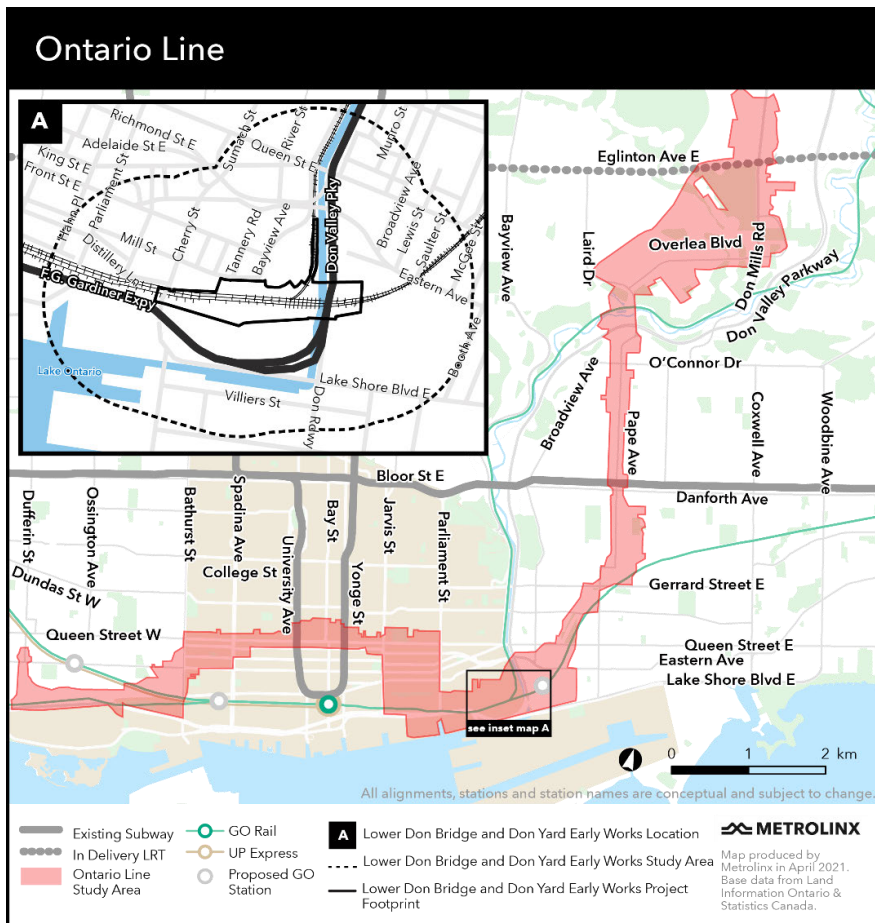

Figure 1: Map of Lower Don Bridge and Don Yard Early Works

Marine Archaeological Overview Assessment

On behalf of Metrolinx, Stantec has undertaken a Marine Archaeological Overview Assessment for the proposed Lower Don Bridge. The purpose of the Marine Archaeological Overview Assessment is to determine the marine archaeological potential of the study area for the bridge shown in **Figure 2** below.

The proposed bridge will cross over the Don River on the north side of the existing GO Transit Lakeshore East rail bridge. As a result, a large portion of the study area overlaps with the Don River. While the bridge will have no permanent in-water components, Metrolinx anticipates that in-water construction activities may impact potential submerged cultural resources. The marine archaeological potential of the study area is being considered as part of the Marine Archeological Overview Assessment.

The assessment determined that despite the study area for the Lower Don Valley Arch Bridge Superstructure having indicators of marine archaeological potential, there has been extensive river-bed disturbance to date. The riverbed has been previously disturbed by engineered

channeling, modern dredging, and modern construction. The assessment determined that the study area retains low to no potential for the identification and documentation of in situ Indigenous and Euro-Canadian marine archaeological resources. As a result no further marine archaeological work is required for the study area.

A copy of the marine Archeological Overview Assessment has been included in the Dropbox link for your review. Please provide any comments you may have by **November 19, 2021**.

Invitation for Input

We are committed to an open, respectful, and transparent engagement with Métis Nation of Ontario. Metrolinx values any input that Métis Nation of Ontario is willing to provide on the Marine Archaeological Overview Assessment report.

We are happy to meet with your Métis Nation of Ontario to go over the project and development of the Marine Archaeological Overview Assessment report and answer any questions Métis Nation of Ontario may have on the report or the project as a whole.

If you require additional information or materials, or if you wish to discuss this project in more detail or set up a meeting, please contact Jaimi O'Hara, Acting Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Please submit your feedback in writing by **November 19, 2021**.

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*, except where information is provided to Metrolinx in confidence, pursuant to section 15.1.

Delivered by Email

Dear Sir/Madam,

**RE: Ontario Line Project - Stage 2 Archaeological Assessment - Moss Park and Ordnance Park
Invitation to Participate in Archaeological Fieldwork**

Metrolinx and its consultant, Stantec continue to progress the archaeological studies for the Ontario Line project and wanted to invite Métis Nation of Ontario to participate in Stage 2 Archaeological Assessments planned to occur at Moss Park and Ordinance Park in the upcoming weeks. The locations of Moss Park and Ordinance Park study areas can be viewed in **Figure 1 and 2** below.

Moss Park and Ordnance Park have been previously assessed in a desktop study, the *Ontario Line Stage 1 Archaeological Assessment Report - South* which was shared with Métis Nation of Ontario in March 2020 and was subject to an Addendum shared with Métis Nation of Ontario in February 2021. The Stage 1 report recommended that a Stage 2 archaeological assessment is required for Moss Park and Ordnance Park parcels.

The Stage 2 archaeological field work will be conducted by test pit survey, in accordance with the Ministry of Heritage, Sport, Tourism and Culture Industries' (MHSTCI) 2011 *Standards and Guidelines for Consultant Archaeologists*. The Stage 2 test pit survey method consists of hand excavating test pits by shovel at a five-metre interval on the park lands. The test pits are at least 30 centimetres in diameter and dug through the topsoil (which has a variable depth generally between 15 and 25 centimetres, but may be deeper or shallower) and at least five centimetres into subsoil. Once complete, test pits will be backfilled. Areas disturbed by utility infrastructure or recent construction will not be surveyed but will be photo documented. Based upon the Stage 2 field work, subsequent archaeological investigations may be recommended depending on what is found during the Stage 2 test pit survey.

Please see the fieldwork details below:

MOSS PARK:

Start Date: Tentatively October 25, 2021. If the start date changes, we will reach out to you.

Duration: Approximately two to three days

Start Time: 8am

Consultant Company: Stantec

Contact information: Jeffrey Muir - (289) 208-5298; Heather Kerr - (416) 602-3271; Patrick Hoskins - (613) 716-4687

Assessment: Stage 2 Archaeological Assessment

Meeting Location Address: 150 Sherbourne St

Size of Field Crew: 2 (1 Field director, 1 field tech)

Parking location: Above-ground parking lot at the southwest corner of Jarvis Street and Queen Street East; approximate three minute walk

ORDNANCE PARK

Start Date: Work on Ordnance Park will begin after the Moss Park work is completed

Duration: Approximately two weeks

Start Time: 8am

Consultant Company: Stantec

Contact information: Jeffrey Muir - (289) 208-5298; Heather Kerr - (416) 602-3271; Patrick Hoskins - (613) 716-4687

Assessment: Stage 2 Archaeological Assessment

Size of Field Crew: 4 (1 Field director, 3 field techs)

Required PPE:

Item	Specifications
Clothing and Attire	Loose clothing, long hair, dangling accessories, jewelry, or other similar items that are likely to be a hazard will not be worn unless they are tied, covered, or otherwise secured so they prevent the hazard.
Foot Protection	Canadian Standards Association (CSA) approved work boots (Steel-toed boots, minimum 6" from top of sole, grade 1 with sole protection [CSA Standard Z195-09]).
Hand Protection	Cut, puncture, and abrasion-resistant gloves shall be worn when conducting archaeological hand digging and screening activities.
Eye and Face Protection	CSA approved safety glasses with rigid side shields. Regular prescription glasses are not permitted unless they are designed as CSA safety glasses complete with rigid shields. An ASTM level 1 (or higher) face covering is mandatory.
Head Protection	CSA approved Type II, Class E (side impact) hard hat. Hard hats shall be worn with the brim pointed forward.
Hearing Protection	Not needed.
High Visibility Safety Apparel	Mandatory class 2, level 2 High Visibility Safety Apparel (HVSA). Full length sleeves and pants with reflective stripes on both arms and legs are required.
*Although not considered PPE, face coverings for COVID-19 shall be worn when applicable	

Invitation to Participate in Fieldwork

Metrolinx would appreciate any interest Métis Nation of Ontario may have in participating in the archaeological monitoring fieldwork. Upon receipt of Métis Nation of Ontario's interest in participating, Metrolinx will work to coordinate Métis Nation of Ontario's involvement.

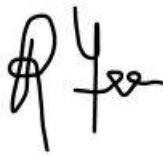

Engagement

Regardless of whether or not Métis Nation of Ontario participates in the fieldwork, Metrolinx will inform you of discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will also ensure that future Archaeological Assessment reports are provided to your community in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries.

If Métis Nation of Ontario wishes to participate in the fieldwork, or if you'd prefer to receive fieldnotes and/or a summary of the borehole and geotechnical data, please let us know at your earliest convenience. If you require additional information or materials, or if you wish to discuss this project in more detail or set up an in-person meeting, please contact, Indigenous Relations at Metrolinx. We can be contacted at IndigenousRelations@metrolinx.com.

Thank you for your time and consideration.

Dear Sir/Madam,

**RE: Ontario Line Project - Species at Risk 17(2)(d) Permit Amendment Under the
*Endangered Species Act***

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with Métis Nation of Ontario. Metrolinx appreciates and respects Métis Nation of Ontario's desire to be appropriately informed and aware of projects. To that end, Metrolinx is sharing with Métis Nation of Ontario information regarding the Species at Risk (SAR) 17 (2) (d) Permit under *the Endangered Species Act* (ESA, 2007) obtained in support of the Ontario Line Project, and the proposed amendment to this permit.

Project Description

Metrolinx, a regional transportation agency, is helping transform the way the Greater Golden Horseshoe region moves by building a fast, convenient, and integrated transit network. As part of this work, Metrolinx is proceeding with the Ontario Line Project which will bring 15.6 kilometres of subway service to Toronto.

Ontario Line Permit #CR-D-002-19

Metrolinx, as part of the Ontario Line Project, previously received approval for a 17(2)(d) permit (Permit #CR-D-002-19) under the *Endangered Species Act* (ESA, 2007) issued by the Ministry of the Environment, Conservation, and Parks (MECP) on August 10, 2020. The permit provides approval for those project activities that may have adverse impacts on identified Species at Risk (SAR) and/or their habitat. The permit allows for those activities to take place and provides direction to Metrolinx regarding mitigation measures and compensation requirements that would be necessary to support those impacted species to support no net loss.

To inform this permit, Metrolinx completed SAR screening through the Ontario Line Environmental Conditions Report and Natural Environment Report using various information sources. While the results of this screening were shared within the initial draft of the Environmental Conditions Report circulated to Métis Nation of Ontario on June 15 2020, Draft Environmental Conditions Report circulated on September 17 2020 and Final Environmental Conditions Report circulated on November 30 2020, we regret that we did not engage with Métis Nation of Ontario directly on the screening process or the findings.

Potentially Impacted Species and Summary of Permit Conditions and Requirements

Based on the SAR screening completed to date, some activities required to support the Ontario Line Project may result in the following species at risk being impacted:

- Bank Swallow - Threatened
- Barn Swallow - Threatened
- Blanding's Turtle - Threatened
- Butternut - Endangered
- Chimney Swift - Threatened
- Little Brown Myotis - Endangered
- Northern Myotis - Endangered
- Small-footed Myotis - Endangered
- Tri-colored Bat - Endangered

Activities that may result in impacts to species listed above are associated with project construction and include activities such as removal or alteration of SAR habitat features (e.g., structures that may support SAR bird nesting, and trees).

Prior to commencing any activities that may impact SAR and/or SAR habitat, Metrolinx will complete species-specific screening for areas where project activities are planned to take place, and, if necessary (if screening determines that SAR/SAR habitat is likely to be present), surveys to detect SAR and SAR habitat presence and conduct an impact assessment if presence is confirmed, to characterize species-specific impacts (e.g., amount of habitat removed).

Metrolinx will meet the ESA permit conditions such as implementing species-specific mitigation measures, monitoring their effectiveness, and taking corrective action as required. Species-specific mitigation measures include scheduling activities to take place outside of species-specific timing windows (e.g., outside of active season or breeding window), implementing exclusion measures to prevent individuals of certain species from being impacted by project activities, and others.

If project activities result in SAR habitat removal, Metrolinx will implement species-specific compensation measures such as creating habitat (e.g., nesting habitat features replacing habitat features removed). Compensation habitat will be regularly monitored, and appropriate corrective actions will be taken as required to ensure habitat functions as intended.

Proposed Permit Amendment

Metrolinx is proposing an amendment to the previously approved SAR 17(2)(d) Permit (Permit #CR-D-002-19) under the *Endangered Species Act* (ESA, 2007), approved on August 10, 2020. The purpose of this permit amendment is to seek approval for additional study area not included in the current Permit #CR-D-002-19, as shown in **Appendix 1**. There are no changes to the permit conditions, including species-specific mitigation measures and compensation requirements, and no additional species are being added at this time. The SAR screening developed in support of the current permit has been updated to provide occurrence probability of SAR that may be present in the areas Metrolinx is seeking to include in the permit as part of the proposed amendment, and is included as **Appendix 2**.

Permit Amendment Process - Next Steps

The Proposal for the 17(2)(d) Permit Amendment is anticipated to be available on the Environmental Registry of Ontario (ERO) for a 30-day public review period this Fall 2021, and Metrolinx will notify Métis Nation of Ontario when the ERO posting is available. While not specifically required under the Environmental Bill of Rights, the Ministry of the Environment, Conservation and Parks (MECP) voluntarily posts all ESA permit proposals for public review to ensure transparency and inclusion.

Metrolinx is seeking Métis Nation of Ontario's comments, questions, or requests for additional information upon review of the material presented in this letter at any time in advance of the public ERO posting. Questions or comments can also be submitted directly to MECP through the ERO posting during the 30-day public review period.

Following the 30-day public review period, the proposed permit amendment will be submitted to the Minister for review and consideration. The amendment may only be issued if the Minister is of the opinion that the legal requirements set out in clause 17(2)(d) of the *Endangered Species Act* (ESA, 2007) have been satisfied. Should the amendment be issued, Metrolinx will be obligated to adhere to the requirements and standards as stipulated under the permit.

Métis Nation of Ontario will be kept apprised should any new SAR be identified within the project area as project planning progresses. In such cases we will endeavor to engage Métis Nation of Ontario prior to seeking any necessary permit amendments.

Metrolinx is committed to building a long-term relationship with Métis Nation of Ontario, and we recognize that this requires transparency. We appreciate that we have much work to do in this regard and we hope to move forward in a positive way. The original SAR permit was obtained as part of the normal course of Metrolinx business, which had yet to be identified by the Indigenous Relations Office as necessitating engagement and information sharing with Indigenous Nations.

The Indigenous Relations Office has begun guiding the organization and identifying opportunities to flag such actions in advance, so that we can more meaningfully engage with Indigenous Nations as we move forward. We appreciate your patience as Metrolinx continues to learn more about Indigenous Nations and with the help of the Indigenous Relations Office, becomes aware of additional opportunities for engagement with Indigenous Nations.

We appreciate that previous engagement activities may not have met the needs of Métis Nation of Ontario, and the volume of materials may have resulted in Métis Nation of Ontario not having been made adequately aware of the possible identified impacts to several Species at Risk under this permit. Metrolinx remains committed to meaningful engagement; we are committed to identifying and prioritizing the sharing of the most relevant and appropriate information with Métis Nation of Ontario.

If Métis Nation of Ontario requires additional information or materials, or you wish to discuss this project in more detail, please reach out to Jaimi O'Hara in the Indigenous Relations Office at Metrolinx and she would be pleased to facilitate a meeting. She can be contacted at IndigenousRelations@metrolinx.com.

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*, except where information is provided to Metrolinx in confidence, pursuant to section 15.1.

Thank you for your time in reviewing this letter.

Yours Truly,

Maria Zintchenko

Hello Sir/Madam,

We noticed that the Noise and Vibration Operations Report, was not outlined in the previous letter which provided an overview of the Draft Environmental Impact and Assessment Report for the Ontario Line Project. We apologize for this omission and note that the report has now been added to the Dropbox shared below. We apologize that this report was overlooked earlier, and is not referenced directly in the letter. If you have any questions, please don't hesitate to reach out.

Best,

Marilyn Stoye *(she/her)*

Subject: Ontario Line - Draft Environmental Impact and Assessment Report for Review

Dear Sir/Madam,

Please find attached, a letter outlining the Draft Environmental Impact and Assessment Report (EIAR) for the Ontario Line. The report is available for review at the following link:

Any comments you may have regarding this report received by **December 6, 2021**, will be incorporated in the Draft EIAR planned to be released in January 2022. Feedback received after December 6, will be reflected in the Final EIAR, planned for release in March 2022.

If you have any questions or concerns, please feel free to reach out to me at any time.

Thank you for your time and assistance.

Jaimi

Date: Friday, December 10, 2021 10:05:48 AM
Attachments: [image003.png](#)

Dear Sir/Madam,

As a follow up to the letter sent on November 3, 2021 regarding the Ontario Line Project Species at Risk 17(2)(d) Permit Amendment Under the *Endangered Species Act*, the Proposal for the 17(2)(d) Permit Amendment was posted on the Environmental Registry of Ontario (ERO) on December 3rd, 2021 for a 30-day public review period, ending January 2nd, 2022.

The ERO posting can be found in the following link:

<https://ero.ontario.ca/notice/019-4601> Comments can be submitted directly to the Ministry of the Environment, Conservation and Parks.

If you have any questions or concerns, please feel free to reach out to me at any time. Additionally, we are happy to arrange a meeting to discuss the Permit, if that would be of interest.

Thank you for your time and assistance.

Subject: Ontario Line - Archaeological monitoring for Borehole Drilling
Date: Tuesday, January 19, 2021 3:29:54 PM
Attachments: [OL Archaeological Monitoring Invitation for Participation in monitoring for Boreholes MNO.pdf](#)

Dear Sir/Madam,

Please find attached a letter inviting participation in upcoming archaeological monitoring for borehole drilling that is taking place at various locations to support environmental assessment and geotechnical studies related to the Ontario Line Subway project. The boreholes are being drilled in locations that have known archaeological potential and as such Metrolinx is ensuring that a consultant archaeologist is on-site to monitor. We'd like to extend this invite to MNO as well. We appreciate that during these uncertain times of COVID-19 this may not be possible or safe for MNO. We are happy to provide any fieldnotes taken by the consultant archaeologist and/or provide a summary of the data collected if this is at all helpful to you. Please let us know if there is any other way we can support MNO during this time.

The boreholes are anticipated to be completed over the next several weeks beginning this Friday on **January 22, 2021**. Please let me know if you have interest in participating as soon as possible, and we will work with you and the project team to coordinate.

Miigwetch,

Fallon

Delivered by Email

Dear Sir/Madam,

RE: Ontario Line Project - Corktown Archaeological Monitoring for Borehole Drilling

Metrolinx and its consultants, Wood and Stantec, will be undertaking geotechnical and environmental site assessment investigations in Corktown. As part of this work boreholes will be drilled at 271 Front St East, 44 Parliament St and 25 Berkeley St. These boreholes will be located on/near potential archaeological sites and an archaeologist will be on site to monitor the drilling activities (see attached figures for location). We are writing to invite Métis Nation of Ontario to participate in the archaeological monitoring associated with this work. Metrolinx appreciates the impacts of COVID-19 on Indigenous Nations and acknowledges that this may impact Métis Nation of Ontario's ability to participate due to safety concerns. If preferable, Metrolinx is happy to share any fieldnotes taken by the consultant archaeologist as well as a summary of the borehole and geotechnical study data for review.

The fieldwork is anticipated to be conducted between January 22nd and February 12th, 2021, as detailed below:

Activity	Anticipated Timeline	Location		
		271 Front St E	44 Parliament St	25 Berkeley St
Drilling – Geotechnical Locations	Jan 22 – Feb 12, 2021		x	
Drilling – Environmental Locations	Feb 2 - 4, 2021	x		
	Feb 5 and 8, 2021		x	
	Feb 9 - 10, 2021			x

Invitation to Participate in Fieldwork

Metrolinx would appreciate any interest Métis Nation of Ontario may have in participating in the archaeological monitoring fieldwork. The attached maps illustrate

the location of the boreholes that will be drilled. Upon receipt of Métis Nation of Ontario's interest in participating, Metrolinx will work to coordinate your Nation's involvement.

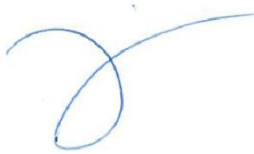

Engagement

Regardless of whether or not your Nation participates in the fieldwork, Metrolinx will inform you of discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will also ensure that future Archaeological Assessment reports are provided to your community in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries.

If your Nation wishes to participate in the fieldwork, or if you'd prefer to receive fieldnotes and/or a summary of the borehole and geotechnical data, please let us know at your earliest convenience. If you require additional information or materials, or if you wish to discuss this project in more detail or set up an in-person meeting, please contact Fallon Melander, Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*. Thank you for your time in reviewing these assessments.

Dear Sir/Madam,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. Attached you will find a letter providing an update on the project. The purpose of this letter is to:

- Provide an update on the scope of the project work
- share the initial draft of the Early Works Report for the proposed Corktown Station
- Invite MNO to participate in upcoming archaeological fieldwork

In an effort to streamline your review, we draw your attention to the attachment which provides an overview of the expected environmental impacts and proposed mitigations, as we know this may be of specific interest to you.

Metrolinx is also preparing a letter specific to works being planned within the Don Valley as we recognize the significance of this waterway to many Nations. We hope to share that letter soon. We are happy to meet with MNO to discuss the Ontario Line and address any questions or concerns that MNO may have.

We ask that any comments on the draft Corktown Station Early Works Report be provided no later than **April 15, 2021**. Please note that the Noise and Vibration Report, which will be part of the Early Works Report is still being prepared and we will share with MNO by March 19, 2021.

The draft Corktown Station Early Works Report is available at the following link:

Please let us know as soon as possible if MNO has interest in participating in future archaeological fieldwork.

We appreciate the volume of documents that Metrolinx has shared with MNO.

If you have any questions or concerns, please do not hesitate to contact me.

Miigwetch,

Fallon

Subject: Ontario Line Project - Invitation to Meet & provide input on First Parliament Site
Date: Monday, April 12, 2021 4:04:06 PM
Attachments: [First Parliament_MNO.pdf](#)

Dear Sir/Madam,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. We recently communicated with MNO about the proposed Corktown Station which is along the planned alignment of the Ontario Line. This location includes parcels of land which were once the site of Upper Canada's First Parliament buildings. Metrolinx and its partners are exploring opportunities to commemorate the history of this site, and have been engaging with various parties including the City of Toronto and the Mississaugas of the Credit First Nation, on whose treaty territory this project is occurring.

Given the significant chance of recovering Indigenous and European artifacts during the Corktown Station Early Works, a detailed archaeological workplan is being developed. Metrolinx recognizes the importance and value of Indigenous monitors for any archaeology related to the Ontario Line Project. In our previous communication, an invitation was included for your Nation to participate in any archaeological fieldwork and monitoring during the Corktown Station Early Works, including demolition of modern buildings currently on the First Parliament site.

This work is anticipated to commence in Fall 2021, and if you have not yet expressed interest in participating, please feel free to do so at your earliest convenience. As a reminder any comments on the draft Corktown Station Early Works Report should be provided no later than **April 15, 2021**.

Metrolinx recognizes that the history of this location extends beyond European use, and as such, wants to take the opportunity to understand any significance it may have to Indigenous Nations. Metrolinx would like to meet with MNO to discuss the First Parliament site, its commemoration, as well as review the broader Ontario Line project if you wish. We recognize that traditional knowledge of this area may be sacred and/or not appropriate to be shared, but would appreciate any information that may be appropriate for Metrolinx to consider.

This letter is not intended to replace engagement but to provide a high level summary for your information. We would very much appreciate meeting with MNO to discuss in more detail. Please let me know if you have any questions or concerns. We appreciate the volume of documents that Metrolinx has shared with MNO. If you have any questions or concerns, please do not hesitate to contact me.

Miigwetch,

Fallon

Métis Consultation Unit
Métis Nation of Ontario
500 Old St. Patrick Street, Unit D
Ottawa, ON K1N 9G4
Delivered by Email

Dear Sir/Madam,

RE: Ontario Line Project - First Parliament Site and Lime Kiln Site

Metrolinx, a regional transportation agency, is helping to transform the way the Greater Golden Horseshoe moves by building a fast, convenient and integrated transit network. As part of this work, Metrolinx is continuing the pre-construction planning of the Ontario Line which will bring nearly 16 kilometres of subway service to Toronto.

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Métis Nation of Ontario. Metrolinx appreciates and respects Métis Nation of Ontario's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to share with Métis Nation of Ontario information regarding Corktown Station early works and additional information regarding upcoming field visits and investigations at the Corktown Station early works site, which includes two registered archaeological sites, the First Parliament site and the Lime Kiln site.

Project Description

The proposed Ontario Line is a new 16-kilometer subway line, which will occupy an exclusive right-of-way system encompassing a combination of below-grade, above-grade, and at-grade alignment. The route (Figure 1) will run from Ontario Place/Exhibition through downtown Toronto to the Ontario Science Centre in the City of Toronto, with six (6) potential interchange stations and 17 new connections to GO Transit, existing subways and streetcars. More information on the Project can be found on our website: www.metrolinx.com/ontarioline

Corktown Station Early Works

As communicated in the letter sent to Métis Nation of Ontario on March 11, 2021, the Corktown Station site has been identified for launching tunnel excavation equipment for the downtown and Don Yard segments of the proposed Ontario Line alignment, as well as the location of the Corktown Station. The First Parliament and Lime Kiln Sites, located within the Corktown Station area, are known archaeological sites which require additional archaeological study ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures, followed by completion of necessary archaeological studies, is required. Completion of this preparatory work on an expedited basis is essential to allow for the timely delivery of the overall Project and is anticipated to begin in the Fall 2021, subject to the completion of the Corktown Station early works process in accordance with Ontario Regulation 341/20: Ontario Line Project.

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These activities will enable completion of environmental due diligence investigations, including archaeological assessments. These activities will occur on properties within the Corktown Station early works project footprint, as shown in **Figure 1**.

Figure 1: Map of Corktown Station Early Works

Environmental impacts of Corktown Station early works are being assessed in accordance with O. Reg. 341/20. Metrolinx shared the draft Corktown Station Early Works Report and associated discipline reports with Métis Nation of Ontario on March 11, 2021 and had requested any comments to be provided by April 9, 2021.

Archaeological Work at the First Parliament Site and Lime Kiln Site

Metrolinx appreciates the significance of archaeology to Métis Nation of Ontario. The properties at 265 Front Street East, 271 Front Street East, and 25 Berkeley Street, in the St. Lawrence neighbourhood of the City of Toronto, are collectively host to the First Parliament Site. It is located on the southwest corner of Parliament Street and King Street, between Parliament Street and Berkeley Street. The First Parliament Site is a registered archaeological site (AjGu-41) which may include resources associated with the First and Second Parliament Buildings, the Home District Gaol, and Consumers' Gas company buildings. The surface of the property is currently occupied by automotive businesses, including a car dealership, car wash, and surface parking lot. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and remnants of early Toronto industry may be found at this site.

North of the First Parliament Site is another registered archaeological site (AjGu-64), the Lime Kiln Site, which includes remains from the Toronto Lime Works Company. A variety of structural features, in various states of preservation, have been documented on this site. The location of the Lime Kiln Site and the First Parliament Site are shown in **Figure 2**.

Figure 2: Location of First Parliament Site and Lime Kiln Site Areas

The First Parliament Site and Lime Kiln Site require additional archaeological studies ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures is necessary. Completion of this preparatory work is essential to allow for the timely delivery of the Ontario Line.

Archaeological fieldwork to remove or protect archaeological resources is anticipated to commence in early Fall 2021, and a workplan for these archaeological investigations is under development. As mentioned in the letter sent on March 11, 2021, Métis Nation of Ontario is invited to participate in all archaeological fieldwork, and to review and provide comments on forthcoming reports.

Feedback on Commemoration of First Parliament Site

Metrolinx appreciates that the history of the First Parliament site is not one simply of Canadian origin, but rather holds longer history and tradition. Metrolinx also appreciates that the site of the First Parliament of Upper Canada is linked to a history of colonization and harmful practices towards Indigenous Peoples. Given the significance of this site, Metrolinx is engaging with Indigenous Nations, City of Toronto and the broader community to identify opportunities for commemoration. Metrolinx is committed to ensuring that any feedback from Métis Nation of Ontario regarding the significance of this site is considered as part of this commemoration. Metrolinx appreciates that traditional or cultural knowledge about this site may be sacred and/or not be appropriate to be shared but welcomes any comments or ideas from Métis Nation of Ontario that may be appropriate to commemorate Indigenous Peoples.

Engagement

Metrolinx is committed to an open, respectful, and transparent relationship with Métis Nation of Ontario. We would like to meet with Métis Nation of Ontario to better understand any significance the First Parliament site may have to Métis Nation of Ontario. We are also happy to assist in reviewing the Corktown Station Early Works Report or reviewing the proposed archaeological workplan for this site. If Métis Nation of Ontario requires additional information or materials, or you wish to discuss this project in more detail or set up a meeting, please contact Fallon Melander, Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*. Thank you for your time in reviewing these assessments.

Thank you for your time in reviewing this letter.

Yours Truly,

A handwritten signature in black ink, appearing to read 'Maria Zintchenko', with a large, sweeping flourish at the end.

Date: Friday, April 30, 2021 1:28:36 PM
Attachments: [OL-Don River Letter 2021 MNO.pdf](#)

Dear Sir/Madam,

Metrolinx continues to progress its environmental studies for the Ontario Line Project. We wanted to keep you aware that part of the project scope falls within the Don Valley and River System, and we recognize the importance of Valley and the waters within. Attached you will find a letter providing an update on the project and information regarding the planned work and environmental assessments that are anticipated to take place within the Don Valley. We also wanted to invite MNO to participate in the planned Stage 2 Archaeological Assessments that are anticipated to occur as part of the upcoming field season.

This letter is not intended to replace engagement but to provide a high level summary for your information. We would very much appreciate meeting with MNO to discuss in more detail. Please let me know if you have any questions or concerns.

Delivered by Email

Dear Sir/Madam,

RE: Ontario Line Project - Don River Crossings & Stage 2 Archaeological Assessment Update

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Métis Nation of Ontario. Metrolinx appreciates and respects Métis Nation of Ontario's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to provide more information to Métis Nation of Ontario about the Ontario Line crossings of the Don River and its tributaries. Metrolinx appreciates the significance of the waters and wishes to better understand how the potential impacts of construction around the Don River may be of interest to Métis Nation of Ontario.

Background

The Project is a new subway line with connections to Line 1 (Yonge-University) subway service at Osgoode and Queen Stations, Line 2 (Bloor-Danforth) subway service at Pape Station, and Line 5 (Eglinton Crosstown) service at the future Science Centre Station. Fifteen stations are proposed, with additional connections to three GO Transit lines (Lakeshore East, Lakeshore West and Stouffville), and the Queen, King, Bathurst, Spadina, Harbourfront and Gerrard/Carlton streetcar routes. The Project will reduce crowding on Line 1 and provide connections to new high-order rapid transit neighbourhoods. More information on the Project can be found on our website: <http://www.metrolinx.com/ontarioline>.

Work in the Don River System

As part of the Ontario Line Project, the following four crossings within the Don River system are proposed:

- Location 1: Lower Don River Crossing (Lower Don Bridge);
- Location 2: Millwood Road Crossing;
- Location 3: Walmsley Brook Crossing; and
- Location 4: West Don River Crossing north of Overlea Boulevard.

Locations 1-4 are shown in **Figure 1** and described in further detail below.

Figure 1: Ontario Line Project - Proposed Don River System Crossings

The environmental assessment for the Ontario Line Project is being completed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20) made under the *Environmental Assessment Act*. Construction of the Lower Don Crossing (Location 1) will be assessed in the Lower Don Bridges and Don Yard Early Works Report, that is anticipated to be shared with Métis Nation of Ontario in summer 2021. Construction of the other three crossings (Locations 2-4) will be assessed in the Environmental Impact Assessment Report, that is planned to be shared with Métis Nation of Ontario in early 2022.

Location 1: Lower Don River Crossing (Lower Don Bridge)

A new bridge is planned to be built on the north side of the existing Lakeshore East rail bridge at the Lower Don River, with space for Ontario Line tracks going in both directions. We are also planning pedestrian and cycling connections across the Lower Don River.

Location 2: Millwood Road Crossing

The underground section of the Ontario Line running under Pape Avenue will emerge from the southern embankment of the Don Valley on an elevated guideway crossing the Don River, west of the Leaside Bridge (Millwood Road). The elevated guideway will connect to Thorncliffe Park in the north.

Location 3: Walmsley Brook Crossing

An elevated guideway will cross the Walmsley Brook tributary of the West Don River north of Pat Moore Drive. The guideway will then continue east across Beth Neilson Drive.

Location 4: West Don River Crossing (north of Overlea Boulevard)

The elevated guideway will cross the West Don River, north of Overlea Boulevard. This section of the route will connect to Don Mills Road and the future Flemingdon Park Station.

Field Surveys and Studies

As project planning is still in progress, environmental field surveys and studies as well as the timing of this work are being determined. Environmental field surveys and studies that may occur within or near the Don River include Stage 2 archaeological assessment and natural environment surveys (e.g., Species at Risk and tree surveys). Studies, surveys and their timing will be confirmed as project planning progresses. Further details are anticipated to be available in mid-Summer 2021.

Update on Archaeology

Metrolinx is currently planning to undertake Stage 2 Archaeological Assessments (AA) near the Don River starting in Fall 2021. The Stage 2 AA investigations will assess areas of identified archaeological potential within the Ontario Line study area which may be affected by the construction of the Project. Stage 2 AA fieldwork consists of test pit surveys at 5 m intervals within areas of previously identified archaeological potential.

Metrolinx would appreciate any interest Métis Nation of Ontario may have in participating in the Stage 2 AA fieldwork. Some of the Stage 2 AA may occur on lands

within the Toronto and Region Conservation Authority's (TRCA) property boundaries and regulated area. Metrolinx will coordinate with TRCA to ensure that Indigenous Nations are provided the opportunity to participate in Stage 2 AA investigations. Upon receipt of Métis Nation of Ontario's interest in participating, Metrolinx will work to coordinate your Nation's involvement.

As Metrolinx continues to undertake environmental due diligence for this project, additional archaeological assessment reports are anticipated to be completed. Metrolinx will ensure that Métis Nation of Ontario will be made aware of and engaged regarding any future archaeological assessments, and especially the discovery and preservation of Indigenous artifacts. Metrolinx will also ensure that future archaeological assessments are provided to Métis Nation of Ontario in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries

Invitation for Input

We are committed to an open, respectful, and transparent engagement with Métis Nation of Ontario. We recognize the potential significance of this project to Métis Nation of Ontario and wanted to keep you apprised of this project. We welcome meeting in the near future to discuss this project and its possible impacts and ways to appropriately engage with Métis Nation of Ontario.

We are happy to address any questions that Métis Nation of Ontario may have about the work proposed in the Don River system or the Ontario Line Project as a whole. If you require additional information or materials, or if you wish to discuss this Project in more detail or set up an in-person meeting, please contact Fallon Melander, Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Metrolinx thanks you for the time in reviewing this letter. Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*.

Yours Truly,

Subject: RE: Ontario Line Project – Archaeological Monitoring for Borehole Drilling - 265 Front St East - MNO

Dear Sir/Madam,

Please find attached a letter inviting participation in upcoming archaeological monitoring for borehole drilling that is taking place next week at 256 Front Street in Toronto to support environmental assessment and geotechnical studies related to the Ontario Line Subway project. The boreholes are being drilled in locations that have known archaeological potential and as such Metrolinx is ensuring that a consultant archaeologist is on-site to monitor. If you are not able to attend, we are happy to provide any fieldnotes taken by the consultant archaeologist and/or provide a summary of the data collected if this is at all helpful to you.

The boreholes are anticipated to be completed between July 12 and July 16, 2021. Please let me know as soon as possible if you have interest in participating, and we will work with you and the project team to coordinate. And just a final note for your information, both Fallon Melander and Jaimi O'Hara, who are usually Metrolinx's main point of contact with your Nation, are away from the office this week. Hence you are receiving this communication from me.

Miigwetch,

Make today great,

Christine Parris (she, her, hers)

Community Relations Specialist, Indigenous Relations Office

Dear Sir/Madam,

Metrolinx is working with its consultant HDR to provide opportunities for participation in upcoming Archaeological Assessment and Natural Environment fieldwork associated with the Ontario Line. Please find attached a letter inviting your Nation to participate.

The fieldwork is anticipated to late August - early September 2021. Please let me know if you have interest in participating as soon as possible, and we will work with you, the project team and HDR to coordinate.

If you have any questions or concerns, please feel free to contact the Indigenous Relations Office at anytime.

Thank you,

Métis Consultation Unit
Métis Nation of Ontario
500 Old St. Patrick Street, Unit D
Ottawa, ON K1N 9G4
Delivered by Email

Dear Sir/Madam,

RE: Ontario Line Project - Update on Archaeological Assessments and Natural Environment Surveys

Metrolinx and its consultant, Stantec and HDR, will be undertaking Archaeological Assessment and Natural Environment fieldwork associated with the Ontario Line Project. We appreciate Métis Nation's of Ontario's interest in participating in these studies. The following letter provides details about the anticipated surveys to support the planning and coordination of involvement by your Nation.

Invitation to Participate in Fieldwork

Metrolinx would appreciate any interest Métis Nation of Ontario may have in participating in the archaeological fieldwork. Upon receipt of Métis Nation of Ontario interest in participating, Metrolinx will work to coordinate your Nation's involvement.

Update on Archaeology

Metrolinx is planning to undertake various Archaeological Assessments for the Ontario Line Project. This archaeological investigation will assess areas of identified archaeological potential, which may be potentially affected by the construction of the Project. The archaeological works are planned to begin in **September 2021**. Fieldwork dates may change based on field progress and weather.

Metrolinx would appreciate any interest Métis Nation of Ontario name may have in participating in the archaeological fieldwork. Upon receipt of Métis Nation of Ontario interest in participating, Metrolinx will work to coordinate your Nation's involvement.

As Metrolinx continues to undertake environmental studies for this project, additional archaeological assessment reports are anticipated to be completed. Metrolinx acknowledges that Métis Nation of Ontario will be made aware of and engaged regarding any future archaeological assessments, and especially the discovery and preservation of Indigenous artifacts and sacred burial grounds.

Regardless of whether or not your Nation participates in the fieldwork, Metrolinx will inform you of discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will also ensure that future Archaeological Assessment reports are provided to Métis Nation of Ontario in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries.

Natural Environment Field Surveys

Metrolinx is conducting natural environmental studies to review and document existing conditions within the Study Area and to carry out impact assessment reporting. Most of the natural environment fieldwork for Ontario Line is planned to occur in 2022.

However, the surveys detailed in the table below are planned for this year and include butternut survey, tree inventory and aquatic habitat assessment. Please note that these are approximate dates and may be subject to change pending appropriate weather conditions and field survey requirements. Metrolinx will endeavour to keep Métis Nation of Ontario apprised as the work unfolds.

Survey	Date(s)
Butternut Health Assessments (Areas detailed in Figures 1 and 2)	• August, September/2021
Tree Inventory (Areas detailed in Figures 1 and 2)	• September/2021
Aquatic Habitat assessment (Don and West Don ravine areas)	• September/2021

Engagement

If your Nation requires additional information or materials, or if you wish to discuss this project in more detail or set up an in-person meeting, please contact Jaimi O'Hara, Acting Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*.

Métis Consultation Unit
Métis Nation of Ontario
500 Old St. Patrick Street, Unit D
Ottawa, ON K1N 9G4
Delivered by Email

Dear Sir/Madam,

RE: Ontario Line Project - Lower Don Bridge Marine Archaeological Overview Assessment for Review

Metrolinx wishes to build a strong and respectful relationship with Métis Nation of Ontario. Metrolinx appreciates and respects Métis Nation of Ontario's desire to be appropriately informed and aware of projects. Metrolinx wishes to share with you the development of the Marine Archaeological Overview Assessment (MAOA) report for the proposed construction of the Lower Don Valley Bridge over the Don River. This proposed bridge is a component of the Ontario Line Project as part of the Lower Don Bridge and Don Yard Early Works. We invite Métis Nation of Ontario's feedback on the marine Archeological Overview Assessment prepared for the Ontario Line Project.

Project Description

The Ontario Line will bring 15.6 kilometres of subway service to Toronto. The Ontario Line will stretch from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line will have 15 new stations, including six interchange stations, connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable service.

Lower Don Bridge and Don Yard Early Works

The Lower Don Bridge and Don Yard early works are planned for where the Ontario Line will run alongside GO train operations. These early works will set the groundwork for other major construction on the Ontario Line project and include:

- building a new bridge north of the existing rail bridge over the Lower Don River that will carry the Ontario Line tracks;
- shifting GO tracks in the Don Yard and nearby rail corridor to accommodate Ontario Line infrastructure;
- modifying the existing rail bridge to accommodate GO track shifts and Ontario Line infrastructure; and
- relocating and protecting utilities and signal infrastructure in the area.

The location of the Lower Don Bridge and Don Yard early works project footprint and study area can be viewed in **Figure 1** below.

Figure 1: Map of Lower Don Bridge and Don Yard Early Works

Marine Archaeological Overview Assessment

On behalf of Metrolinx, Stantec has undertaken a Marine Archaeological Overview Assessment for the proposed Lower Don Bridge. The purpose of the Marine Archaeological Overview Assessment is to determine the marine archaeological potential of the study area for the bridge shown in **Figure 2** below.

The proposed bridge will cross over the Don River on the north side of the existing GO Transit Lakeshore East rail bridge. As a result, a large portion of the study area overlaps with the Don River. While the bridge will have no permanent in-water components, Metrolinx anticipates that in-water construction activities may impact potential submerged cultural resources. The marine archaeological potential of the study area is being considered as part of the Marine Archeological Overview Assessment.

The assessment determined that despite the study area for the Lower Don Valley Arch Bridge Superstructure having indicators of marine archaeological potential, there has been extensive river-bed disturbance to date. The riverbed has been previously disturbed by engineered

channeling, modern dredging, and modern construction. The assessment determined that the study area retains low to no potential for the identification and documentation of in situ Indigenous and Euro-Canadian marine archaeological resources. As a result no further marine archaeological work is required for the study area.

A copy of the marine Archeological Overview Assessment has been included in the Dropbox link for your review. Please provide any comments you may have by **November 19, 2021**.

Invitation for Input

We are committed to an open, respectful, and transparent engagement with Métis Nation of Ontario. Metrolinx values any input that Métis Nation of Ontario is willing to provide on the Marine Archaeological Overview Assessment report.

We are happy to meet with your Métis Nation of Ontario to go over the project and development of the Marine Archaeological Overview Assessment report and answer any questions Métis Nation of Ontario may have on the report or the project as a whole.

If you require additional information or materials, or if you wish to discuss this project in more detail or set up a meeting, please contact Jaimi O'Hara, Acting Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Please submit your feedback in writing by **November 19, 2021**.

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*, except where information is provided to Metrolinx in confidence, pursuant to section 15.1.

Ottawa, ON K1N 9G4
Delivered by Email

Dear Sir/Madam,

**RE: Ontario Line Project - Stage 2 Archaeological Assessment - Moss Park and Ordnance Park
Invitation to Participate in Archaeological Fieldwork**

Metrolinx and its consultant, Stantec continue to progress the archaeological studies for the Ontario Line project and wanted to invite Métis Nation of Ontario to participate in Stage 2 Archaeological Assessments planned to occur at Moss Park and Ordinance Park in the upcoming weeks. The locations of Moss Park and Ordinance Park study areas can be viewed in **Figure 1 and 2** below.

Moss Park and Ordnance Park have been previously assessed in a desktop study, the *Ontario Line Stage 1 Archaeological Assessment Report - South* which was shared with Métis Nation of Ontario in March 2020 and was subject to an Addendum shared with Métis Nation of Ontario in February 2021. The Stage 1 report recommended that a Stage 2 archaeological assessment is required for Moss Park and Ordnance Park parcels.

The Stage 2 archaeological field work will be conducted by test pit survey, in accordance with the Ministry of Heritage, Sport, Tourism and Culture Industries' (MHSTCI) 2011 *Standards and Guidelines for Consultant Archaeologists*. The Stage 2 test pit survey method consists of hand excavating test pits by shovel at a five-metre interval on the park lands. The test pits are at least 30 centimetres in diameter and dug through the topsoil (which has a variable depth generally between 15 and 25 centimetres, but may be deeper or shallower) and at least five centimetres into subsoil. Once complete, test pits will be backfilled. Areas disturbed by utility infrastructure or recent construction will not be surveyed but will be photo documented. Based upon the Stage 2 field work, subsequent archaeological investigations may be recommended depending on what is found during the Stage 2 test pit survey.

Please see the fieldwork details below:

MOSS PARK:

Start Date: Tentatively October 25, 2021. If the start date changes, we will reach out to you.

Duration: Approximately two to three days

Start Time: 8am

Consultant Company: Stantec

Contact information: Jeffrey Muir - (289) 208-5298; Heather Kerr - (416) 602-3271; Patrick Hoskins - (613) 716-4687

Assessment: Stage 2 Archaeological Assessment

Meeting Location Address: 150 Sherbourne St

Size of Field Crew: 2 (1 Field director, 1 field tech)

Parking location: Above-ground parking lot at the southwest corner of Jarvis Street and Queen Street East; approximate three minute walk

ORDNANCE PARK

Start Date: Work on Ordnance Park will begin after the Moss Park work is completed

Duration: Approximately two weeks

Start Time: 8am

Consultant Company: Stantec

Contact information: Jeffrey Muir - (289) 208-5298; Heather Kerr - (416) 602-3271; Patrick Hoskins - (613) 716-4687

Assessment: Stage 2 Archaeological Assessment

Size of Field Crew: 4 (1 Field director, 3 field techs)

Required PPE:

Item	Specifications
Clothing and Attire	Loose clothing, long hair, dangling accessories, jewelry, or other similar items that are likely to be a hazard will not be worn unless they are tied, covered, or otherwise secured so they prevent the hazard.
Foot Protection	Canadian Standards Association (CSA) approved work boots (Steel-toed boots, minimum 6" from top of sole, grade 1 with sole protection [CSA Standard Z195-09]).
Hand Protection	Cut, puncture, and abrasion-resistant gloves shall be worn when conducting archaeological hand digging and screening activities.
Eye and Face Protection	CSA approved safety glasses with rigid side shields. Regular prescription glasses are not permitted unless they are designed as CSA safety glasses complete with rigid shields. An ASTM level 1 (or higher) face covering is mandatory.
Head Protection	CSA approved Type II, Class E (side impact) hard hat. Hard hats shall be worn with the brim pointed forward.
Hearing Protection	Not needed.
High Visibility Safety Apparel	Mandatory class 2, level 2 High Visibility Safety Apparel (HVSA). Full length sleeves and pants with reflective stripes on both arms and legs are required.
*Although not considered PPE, face coverings for COVID-19 shall be worn when applicable	

Invitation to Participate in Fieldwork

Metrolinx would appreciate any interest Métis Nation of Ontario may have in participating in the archaeological monitoring fieldwork. Upon receipt of Métis Nation of Ontario's interest in participating, Metrolinx will work to coordinate Métis Nation of Ontario's involvement.

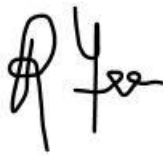

Engagement

Regardless of whether or not Métis Nation of Ontario participates in the fieldwork, Metrolinx will inform you of discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will also ensure that future Archaeological Assessment reports are provided to your community in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries.

If Métis Nation of Ontario wishes to participate in the fieldwork, or if you'd prefer to receive fieldnotes and/or a summary of the borehole and geotechnical data, please let us know at your earliest convenience. If you require additional information or materials, or if you wish to discuss this project in more detail or set up an in-person meeting, please contact, Indigenous Relations at Metrolinx. We can be contacted at IndigenousRelations@metrolinx.com.

Thank you for your time and consideration.

Métis Consultation Unit
Métis Nation of Ontario
500 Old St. Patrick Street, Unit D
Ottawa, ON K1N 9G4
Delivered by Email

Dear Sir/Madam,

**RE: Ontario Line Project - Species at Risk 17(2)(d) Permit Amendment Under the
*Endangered Species Act***

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with Métis Nation of Ontario. Metrolinx appreciates and respects Métis Nation of Ontario's desire to be appropriately informed and aware of projects. To that end, Metrolinx is sharing with Métis Nation of Ontario information regarding the Species at Risk (SAR) 17 (2) (d) Permit under *the Endangered Species Act* (ESA, 2007) obtained in support of the Ontario Line Project, and the proposed amendment to this permit.

Project Description

Metrolinx, a regional transportation agency, is helping transform the way the Greater Golden Horseshoe region moves by building a fast, convenient, and integrated transit network. As part of this work, Metrolinx is proceeding with the Ontario Line Project which will bring 15.6 kilometres of subway service to Toronto.

Ontario Line Permit #CR-D-002-19

Metrolinx, as part of the Ontario Line Project, previously received approval for a 17(2)(d) permit (Permit #CR-D-002-19) under the *Endangered Species Act* (ESA, 2007) issued by the Ministry of the Environment, Conservation, and Parks (MECP) on August 10, 2020. The permit provides approval for those project activities that may have adverse impacts on identified Species at Risk (SAR) and/or their habitat. The permit allows for those activities to take place and provides direction to Metrolinx regarding mitigation measures and compensation requirements that would be necessary to support those impacted species to support no net loss.

To inform this permit, Metrolinx completed SAR screening through the Ontario Line Environmental Conditions Report and Natural Environment Report using various information sources. While the results of this screening were shared within the initial draft of the Environmental Conditions Report circulated to Métis Nation of Ontario on June 15 2020, Draft Environmental Conditions Report circulated on September 17 2020 and Final Environmental Conditions Report circulated on November 30 2020, we regret that we did not engage with Métis Nation of Ontario directly on the screening process or the findings.

Potentially Impacted Species and Summary of Permit Conditions and Requirements

Based on the SAR screening completed to date, some activities required to support the Ontario Line Project may result in the following species at risk being impacted:

- Bank Swallow - Threatened
- Barn Swallow - Threatened
- Blanding's Turtle - Threatened
- Butternut - Endangered
- Chimney Swift - Threatened
- Little Brown Myotis - Endangered
- Northern Myotis - Endangered
- Small-footed Myotis - Endangered
- Tri-colored Bat - Endangered

Activities that may result in impacts to species listed above are associated with project construction and include activities such as removal or alteration of SAR habitat features (e.g., structures that may support SAR bird nesting, and trees).

Prior to commencing any activities that may impact SAR and/or SAR habitat, Metrolinx will complete species-specific screening for areas where project activities are planned to take place, and, if necessary (if screening determines that SAR/SAR habitat is likely to be present), surveys to detect SAR and SAR habitat presence and conduct an impact assessment if presence is confirmed, to characterize species-specific impacts (e.g., amount of habitat removed).

Metrolinx will meet the ESA permit conditions such as implementing species-specific mitigation measures, monitoring their effectiveness, and taking corrective action as required. Species-specific mitigation measures include scheduling activities to take place outside of species-specific timing windows (e.g., outside of active season or breeding window), implementing exclusion measures to prevent individuals of certain species from being impacted by project activities, and others.

If project activities result in SAR habitat removal, Metrolinx will implement species-specific compensation measures such as creating habitat (e.g., nesting habitat features replacing habitat features removed). Compensation habitat will be regularly monitored, and appropriate corrective actions will be taken as required to ensure habitat functions as intended.

Proposed Permit Amendment

Metrolinx is proposing an amendment to the previously approved SAR 17(2)(d) Permit (Permit #CR-D-002-19) under the *Endangered Species Act* (ESA, 2007), approved on August 10, 2020. The purpose of this permit amendment is to seek approval for additional study area not included in the current Permit #CR-D-002-19, as shown in **Appendix 1**. There are no changes to the permit conditions, including species-specific mitigation measures and compensation requirements, and no additional species are being added at this time. The SAR screening developed in support of the current permit has been updated to provide occurrence probability of SAR that may be present in the areas Metrolinx is seeking to include in the permit as part of the proposed amendment, and is included as **Appendix 2**.

Permit Amendment Process - Next Steps

The Proposal for the 17(2)(d) Permit Amendment is anticipated to be available on the Environmental Registry of Ontario (ERO) for a 30-day public review period this Fall 2021, and Metrolinx will notify Métis Nation of Ontario when the ERO posting is available. While not specifically required under the Environmental Bill of Rights, the Ministry of the Environment, Conservation and Parks (MECP) voluntarily posts all ESA permit proposals for public review to ensure transparency and inclusion.

Metrolinx is seeking Métis Nation of Ontario's comments, questions, or requests for additional information upon review of the material presented in this letter at any time in advance of the public ERO posting. Questions or comments can also be submitted directly to MECP through the ERO posting during the 30-day public review period.

Following the 30-day public review period, the proposed permit amendment will be submitted to the Minister for review and consideration. The amendment may only be issued if the Minister is of the opinion that the legal requirements set out in clause 17(2)(d) of the *Endangered Species Act* (ESA, 2007) have been satisfied. Should the amendment be issued, Metrolinx will be obligated to adhere to the requirements and standards as stipulated under the permit.

Métis Nation of Ontario will be kept apprised should any new SAR be identified within the project area as project planning progresses. In such cases we will endeavor to engage Métis Nation of Ontario prior to seeking any necessary permit amendments.

Metrolinx is committed to building a long-term relationship with Métis Nation of Ontario, and we recognize that this requires transparency. We appreciate that we have much work to do in this regard and we hope to move forward in a positive way. The original SAR permit was obtained as part of the normal course of Metrolinx business, which had yet to be identified by the Indigenous Relations Office as necessitating engagement and information sharing with Indigenous Nations.

The Indigenous Relations Office has begun guiding the organization and identifying opportunities to flag such actions in advance, so that we can more meaningfully engage with Indigenous Nations as we move forward. We appreciate your patience as Metrolinx continues to learn more about Indigenous Nations and with the help of the Indigenous Relations Office, becomes aware of additional opportunities for engagement with Indigenous Nations.

We appreciate that previous engagement activities may not have met the needs of Métis Nation of Ontario, and the volume of materials may have resulted in Métis Nation of Ontario not having been made adequately aware of the possible identified impacts to several Species at Risk under this permit. Metrolinx remains committed to meaningful engagement; we are committed to identifying and prioritizing the sharing of the most relevant and appropriate information with Métis Nation of Ontario.

If Métis Nation of Ontario requires additional information or materials, or you wish to discuss this project in more detail, please reach out to Jaimi O'Hara in the Indigenous Relations Office at Metrolinx and she would be pleased to facilitate a meeting. She can be contacted at IndigenousRelations@metrolinx.com.

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*, except where information is provided to Metrolinx in confidence, pursuant to section 15.1.

Thank you for your time in reviewing this letter.

Yours Truly,

cc: Indigenous Relations Office, Metrolinx
Merlin Yuen, Project Coordinator, Metrolinx
Crystal Ho, Junior Project Coordinator, Metrolinx

Hello Sir/Madam,

We noticed that the Noise and Vibration Operations Report, was not outlined in the previous letter which provided an overview of the Draft Environmental Impact and Assessment Report for the Ontario Line Project. We apologize for this omission and note that the report has now been added to the Dropbox shared below. We apologize that this report was overlooked earlier, and is not referenced directly in the letter. If you have any questions, please don't hesitate to reach out.

Best,

Marilyn Stoye *(she/her)*

Dear Sir/Madam,

Please find attached, a letter outlining the Draft Environmental Impact and Assessment Report (EIAR) for the Ontario Line. The report is available for review at the following link:

Any comments you may have regarding this report received by **December 6, 2021**, will be incorporated in the Draft EIAR planned to be released in January 2022. Feedback received after December 6, will be reflected in the Final EIAR, planned for release in March 2022.

If you have any questions or concerns, please feel free to reach out to me at any time.

Thank you for your time and assistance.

Jaimi

Dear Sir/Madam,

As a follow up to the letter sent on November 3, 2021 regarding the Ontario Line Project Species at Risk 17(2)(d) Permit Amendment Under the *Endangered Species Act*, the Proposal for the 17(2)(d) Permit Amendment was posted on the Environmental Registry of Ontario (ERO) on December 3rd, 2021 for a 30-day public review period, ending January 2nd, 2022.

The ERO posting can be found in the following link:

<https://ero.ontario.ca/notice/019-4601> Comments can be submitted directly to the Ministry of the Environment, Conservation and Parks.

If you have any questions or concerns, please feel free to reach out to me at any time. Additionally, we are happy to arrange a meeting to discuss the Permit, if that would be of interest.

Thank you for your time and assistance.

Dear Sir/Madam,

As the Ontario Line Project continues to progress into the new year, we wanted to provide an update and invitation for participation in upcoming fieldwork. Please find attached a letter outlining upcoming Archaeological monitoring activities for the Corktown Station/First Parliament site and Don Valley area. These works are set to begin mid-January through February 2022.

If Métis Nation of Ontario is interested in participating in either or both of these works, please let me know as soon as possible in the new year, and we will work with you and the project team to coordinate. We can also provide fieldnotes and/or geotechnical data at your request.

If you have any questions or concerns, please feel free to reach out to me at any time.

Thank you for your time and assistance. Happy Holidays!

Delivered by Email

Dear Sir/Madam,

RE: Ontario Line Project - Stage 2 Archaeological Assessment - Corktown Station and Don Valley Area: Invitation to Participate in Archaeological Fieldwork

Metrolinx and its consultant, Stantec continue to progress the archaeological studies for the Ontario Line project and wanted to invite Métis Nation of Ontario to participate in further archaeological monitoring for Corktown Station and Don Valley area.

CORKTOWN STATION

Archaeological monitoring for building demolitions is planned to occur at Corktown Station in the upcoming weeks. The locations of the Corktown Station study areas can be viewed in **Figure 1** below. Please note that this work is separate from the Stage 2 & Stage 4 archaeological investigations, which has ceased for the 2021 field season and will resume in Spring 2022. Metrolinx will ensure that Métis Nation of Ontario is informed of when the Stage 2 & Stage 4 archaeological investigations resume.

The archaeological monitoring will occur for building demolition activities on the First Parliament site that may be capping archaeological deposits at Corktown Station (please see Figure 1). This includes an archaeological crew of two (one field supervisor and one field technician) monitoring the demolition of modern buildings in the areas of archaeological potential. Metrolinx would value any participation that Métis Nation of Ontario may wish to have in this monitoring program.

Please see the fieldwork details below:

CORKTOWN STATION:

Start Date: Tentatively January 17-18, 2022. If the start date changes, we will reach out to you.

Duration: Approximately two to four months (demo work occurring intermittently during time period; schedule to be confirmed closer to start date)

Start Time: 8am

Consultant Company: Stantec

Contact information: Jeffrey Muir - (289) 208-5298; Heather Kerr - (416) 602-3271; Patrick Hoskins - (613) 716-4687

Assessment: Archaeological monitoring during building demolition

Size of Field Crew: 2 (1 field supervisor and 1 field technician)

DON VALLEY AREA

As part of the Ontario Line, Hydro One Network Infrastructure (HONI) needs to relocate several hydro towers to accommodate subway maintenance facilities. Metrolinx is carrying out a borehole drilling program in the Don Valley to provide HONI with geotechnical data for proposed hydro tower relocations.

Archaeological monitoring will occur for borehole drilling in areas with archaeological potential (please see Figure 2). This approach will provide for the on-site identification and, if necessary, stop-work order of drilling by a licensed archaeologist in the event potential archaeological resources are encountered. A licensed archaeologist will be on-site during drilling to visually inspect spoil removed during borehole drilling as well as intermittent borehole samples to visually identify the presence of artifacts. Metrolinx would value any participation that Métis Nation of Ontario may wish to have in this monitoring program.

Please see the fieldwork details below:

DON VALLEY AREA:

Start Date: Mid-February. Exact dates will be confirmed in January 2022

Duration: 1-2 weeks

Start Time: 8am

Consultant Company: Stantec

Contact information: Jeffrey Muir - (289) 208-5298; Heather Kerr - (416) 602-3271; Patrick Hoskins - (613) 716-4687

Assessment: Archaeological monitoring for borehole drilling

Size of Field Crew: 2 (1 field supervisor and 1 field technician)

Invitation to Participate in Fieldwork

Metrolinx would value the involvement of Métis Nation of Ontario in the upcoming archaeological monitoring fieldwork outlined above. Should your Nation wish to participate, please let us know at your earliest convenience. We welcome any requests for a meeting to discuss opportunities to participate or to explore this project in more detail with Métis Nation of Ontario. Upon receipt of Métis Nation of Ontario's interest in participating, Metrolinx will work to coordinate your Nation's involvement. If Metrolinx is

also willing to share fieldnotes and/or a summary of the borehole and geotechnical data in addition to the open invitation to participate directly in the monitoring.

Engagement

Regardless of whether or not your Nation participates in the fieldwork, Metrolinx will inform you of discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will also ensure that future Archaeological Assessment reports are provided to your community in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries.

If you require additional information or materials, or if you wish to discuss this project in more detail or set up an in-person meeting, please contact, Jaimi O'Hara, Manger of Indigenous Relations at Metrolinx. We can be contacted at IndigenousRelations@metrolinx.com.

Thank you for your time and consideration.

Yours Truly,

Dear Sir/Madam,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. We wish to share with you that the Draft Environmental Impact and Assessment Report (EIAR) has now been published. Attached you will find a letter outlining the Draft Environmental Impact Assessment Report (EIAR) prepared for the Ontario Line Project, as well as the Notice of Publication for the report.

The full report can be found using the following dropbox link:

[REDACTED]

The Notice of Publication commences a 30-day public review period which will continue from February 7, 2022 until March 9, 2022. As such, we ask that your Nation provide any comments in writing no later than March 9, 2022. We appreciate the size of these documents and would be happy to arrange a meeting to review the report and project with you.

In an effort to streamline your review, we draw your attention to the attachments which provide an overview of the expected environmental impacts and proposed mitigations for Natural Environment and Archaeological Resources, as we know this may be of specific interest to you.

Thank you for your time and assistance. If you have any questions or concerns, please do not hesitate to contact me.

Dear Sir/Madam,

RE: Ontario Line Project - Notice of Publication of Draft Environmental Impact Assessment Report (EIAR)

Metrolinx remains committed to meaningful consultation and engagement, especially where our projects have impacts to the Treaty and traditional lands of Métis Nation of Ontario. In November of 2021, Metrolinx shared with Métis Nation of Ontario the preliminary Draft Environmental Impact Assessment Report (EIAR) for comment and review. The purpose of this letter is to share with your Nation the that the Notice of Publication for the Draft EIAR has now been posted, and to continue to invite any comment or feedback you may wish to share on this report.

Project Description

Metrolinx is proceeding with the Ontario Line which will bring 15.6 kilometres of subway service to Toronto. The Ontario Line will stretch across the city, from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line will have 15 new stations, including six interchange stations, connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable service.

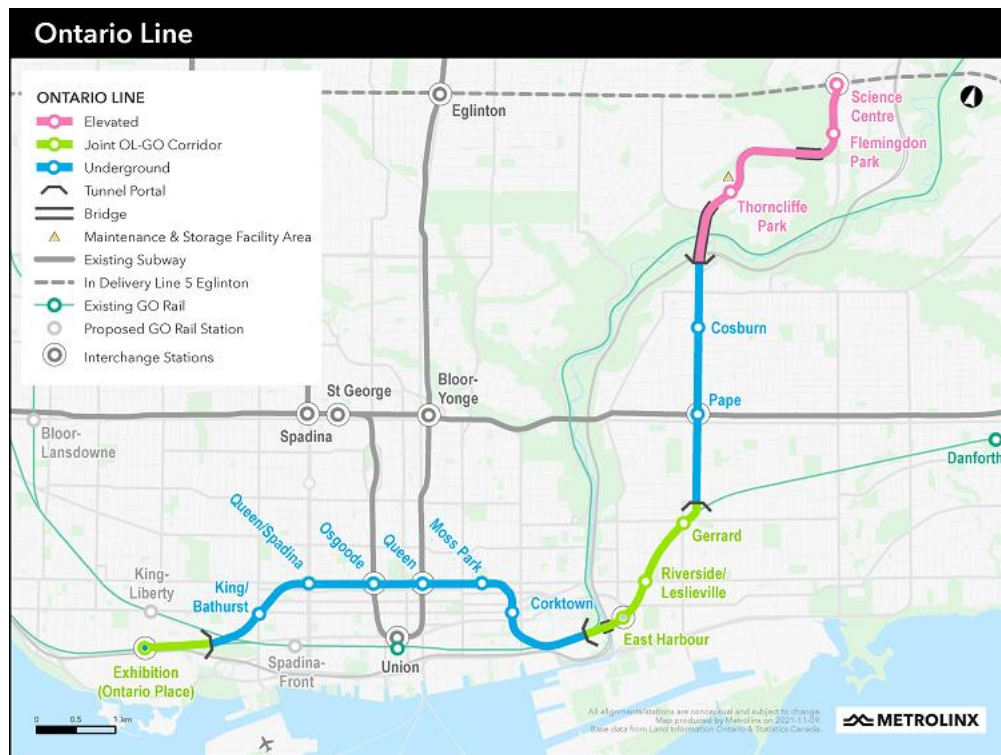

Figure 1 - Ontario Line

Ontario Line Environmental Assessment & Project Timeline

Environmental impacts of the Ontario Line Project are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*.

Table 1 below provides a summary of the Ontario Line Reports that have been shared, or will be shared with Métis Nation of Ontario:

Table 1: Ontario Line Reporting Timeline

Report	Date Shared/to be Shared with Nations
Draft Early Works Report (included Exhibition Station, Lower Don Bridge, Lakeshore East Joint Corridor and East Harbour Station)	June 5, 2020
Draft Environmental Conditions Report	September 17, 2020
Final Environmental Conditions Report and Draft Exhibition Station Early Works Report	November 30, 2020
Final Exhibition Station Early Works Report	February 1, 2021
Initial draft of Corktown Station Early Works Report	March 22, 2021
Draft Corktown Station Early Works Report	May 12, 2021
Final Corktown Station Early Works Report	July 15, 2021
Draft Lower Don Bridge and Don Yard Early Works Report	June 22, 2021
Final Lower Don Bridge and Don Yard Early Works Report	August 25, 2021
Initial draft of Lakeshore East Joint Corridor Noise and Vibration Operations Report	July 28, 2021

Initial draft of Environmental Impact Assessment Report Stage 1 Archaeological Assessment Report and Natural Environment Report	August 18, 2021
Initial draft of Environmental Impact Assessment Report	November 18, 2021
Draft Environmental Impact Assessment Report	February 7, 2022 (shared with this letter)
Final Environmental Impact Assessment Report	April 19, 2022*

*Date is subject to change.

Draft Environmental Impact Assessment Report (EIAR)

The Draft EIAR summarizes the local environmental conditions in the discipline-specific study areas developed for the Project. The local environmental conditions were characterized through a combination of desktop review and field studies by practitioners using industry standard techniques and provincial standards, protocols, and guidelines, where appropriate. The resulting Draft Stage 1 AA and Natural Environment Report was shared with Métis Nation of Ontario for review in August 2021.

The Draft EIAR also provides an assessment and evaluation of the impacts that the Project might have on the environment. Based on the potential impacts, a description of mitigation measures and monitoring activities is outlined. A list of municipal, provincial, federal, or other permits and approvals that may be required for the Project is also provided.

Discipline-specific assessment and evaluation of impacts were undertaken for the following disciplines:

- Natural Environment
- Soil and Groundwater
- Cultural Heritage
- Archaeological Resources
- Socio-Economic and Land Use
- Air Quality
- Noise and Vibration
- Traffic and Transportation

Effective February 7, 2022, the Draft Environmental Impact Assessment Report will be available for a 30-day public review period. The report is posted on the Ontario Line project webpage, which can be accessed using the following link:

<https://www.metrolinxengage.com/en/content/full-report-draft-environmental-impact-assessment-report>

The Notice of Publication of Draft EIAR can be found in **Attachment 1**.

Potential Impacts and Mitigation Measures

The tables found enclosed in **Attachment 2** provide a summary of natural environment

and archaeology potential impacts and mitigation measures identified as part of the Draft EIAR that may be of interest to Métis Nation of Ontario. If your Nation has any feedback about these potential impacts and/or mitigation strategies, or any other aspects of the Ontario Line, we welcome the opportunity to discuss further.

Engagement

Metrolinx welcomes any comments or feedback on the EIAR during the 30-day public review period, from February 7 to **March 9, 2022**. Metrolinx is committed to an open and respectful relationship with Métis Nation of Ontario. We appreciate the significant volume of documents related to the Ontario Line Project that have been shared with Métis Nation of Ontario. We are happy to assist in the review of these documents by meeting with your Nation.

Metrolinx is willing to address any questions that Métis Nation of Ontario may have about the Ontario Line Project. If you require additional information or materials or if you wish to discuss the Project in more detail or set up a meeting, please contact Jaimi O'Hara, Manager of Indigenous Relations Office at Metrolinx. She can be reached at

IndigenousRelations@metrolinx.com .

With the exception of personal information, all comments will become part of the public record. Kindly note that any information you provide to Metrolinx, or its delegates, will be subject to the Freedom of Information and Protection of Privacy Act, except where information is provided to Metrolinx in confidence, pursuant to section 15.1, which protects the confidentiality of Indigenous knowledges.

Thank you for your time in reviewing this letter. Yours

Truly,

Notice of Publication of Draft Environmental Impact Assessment Report and Virtual Open Houses Ontario Line Project

The Project

The Ontario Line will bring 15.6 kilometres of new subway service to Toronto, making it faster and easier for people to get where they need to be each day. The line will stretch across the city, from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line will have 15 new stations, including six interchange stations, connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable service.

Environmental Impact Assessment Report

Environmental impacts of the Ontario Line are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*. In accordance with Section 15 of O. Reg. 341/20, Metrolinx has prepared the Draft Environmental Impact Assessment Report that is now available for review.

The Draft Environmental Impact Assessment Report describes existing environmental conditions in the Project study area, environmental impacts, mitigation and monitoring measures, consultation, and required permits and approvals for the Ontario Line.

The Draft Environmental Impact Assessment Report Review and Consultation Process

Effective **February 7, 2022**, the Draft Environmental Impact Assessment Report will be available for review on the Ontario Line project webpage (www.metrolinx.com/ontarioline). You can view and comment on the report from **February 7 to March 9, 2022** via the online form provided.

You can also participate in virtual open houses, where you can hear from project experts and ask questions about the report in real time, at MetrolinxEngage.com/OntarioLine/live on:

- **February 22, 2022 and February 24, 2022** from 6:30 to 8:00 p.m., with a focus on the portion of the project from Science Centre Station to Gerrard Station
- **March 1, 2022 and March 3, 2022** from 6:30 to 8:00 p.m., with a focus on the portion of the project from Gerrard Station to Exhibition Station

Those who wish to provide comments on the Draft Environmental Impact Assessment Report must do so by **March 9, 2022** and submit them using the webpage form or address them to the following email: ontarioline@metrolinx.com.

Section 17 of O. Reg. 341/20 requires Metrolinx to establish an issues resolution process to attempt to resolve any concerns raised by the public or Indigenous Nations during the review period. At the end of the review period, Metrolinx will update the Draft Environmental Impact Assessment Report by adding a description of the issues resolution process, what Metrolinx did to address any concerns, and if the Ontario Line implementation timeline will be impacted as a result of addressing concerns. Metrolinx will then publish the Final Environmental Impact Assessment Report on the Ontario Line project webpage: www.metrolinx.com/ontarioline and issue a Notice of Publication of the Final Environmental Impact Assessment Report.

To obtain a copy of the Draft Environmental Impact Assessment Report, please contact the Ontario Line project email listed above.

Mark Clancy (T: 416-202-5100, E: ontarioline@metrolinx.com) may be contacted on behalf of Metrolinx.

Aquatic Habitat			
Aquatic Environment – Wetlands and Waterbodies	<p>Construction</p> <p><u>OLS Study Area</u></p> <ul style="list-style-type: none"> Impacts to riparian vegetation, erosion and sedimentation to waterbodies from construction; risk of contamination to waterbodies as a result of spills. <p><u>OLN Study Area</u></p> <ul style="list-style-type: none"> Removal or impacts to wetland; aquatic and riparian vegetation; degradation of wetlands as result of dewatering and discharge activities; erosion and sedimentation to wetlands/waterbodies from construction; and risk of contamination to wetlands/waterbodies as a result of spills. <p>Operations</p> <ul style="list-style-type: none"> Potential impacts are not anticipated during operations 	<p>Construction</p> <ul style="list-style-type: none"> Construction activities will maintain the buffers established during the design phase to reduce potential negative impacts to wetlands and waterbodies. Shorelines or banks disturbed by construction activities will be immediately stabilized by any activity associated with the project to prevent erosion and/or sedimentation, preferably through re-vegetation with native species suitable for the site. An Erosion and Sediment Control Plan, in accordance with the Greater Golden Horseshoe's Erosion and Sediment Control Guideline for Urban Construction (2006) and the Erosion and Sediment Control Guide for Urban Construction (TRCA 2019), as amended from time to time, will be prepared prior to and implemented during construction to reduce the risk of sedimentation. A Spill Prevention and Response Plan will be developed before work commences so that procedures and policies are in place to reduce impacts to wetlands and watercourses during construction. In wetland areas where vernal pooling occurs, prior to dewatering isolated work areas, wildlife will be captured and relocated to suitable habitat outside of the work area. Vegetation removals will also consider and mitigate potential impacts to wetland communities. Until such a time, that an Ontario Wetland Evaluation System evaluation is completed and evaluated by NDMNRF, unevaluated wetlands will be considered as significant for the purposes of assessing impacts. Wetland communities potentially affected by the Project will be clearly staked out on site. If dewatering is proposed, then it is recommended to be undertaken during the winter when the potential impacts of changes in water levels are less significant in wetland communities. During detailed design, the need for a dewatering zone of influence assessment and dewatering monitoring plan should be evaluated. The dewatering monitoring plan, if required, will monitor for potential negative impacts on nearby wetlands and adjacent vegetation communities to confirm if they would be affected due to dewatering activities. An adaptive management plan will be prepared if negative impacts are observed. Prior to dewatering isolated work areas, fish will be captured and relocated to suitable habitat outside of the work area under a Licence to Collect Fish for Scientific Purposes from the NDMNRF. <p>Operations</p> <ul style="list-style-type: none"> As no impacts are anticipated to wetlands and waterbodies during operations, no mitigation measures are recommended. 	<p>Construction</p> <ul style="list-style-type: none"> Onsite inspection will be undertaken to confirm the implementation of the mitigation measures and identify corrective actions, if required. Corrective actions may include alteration of activities to reduce impacts and enhance mitigation measures. <p>Operations</p> <ul style="list-style-type: none"> As no impacts are anticipated to wetlands and waterbodies during operations, no monitoring activities are recommended.
Aquatic Environment – Fish and Fish Habitat	<p>Construction</p> <p><u>OLS Study Area</u></p> <ul style="list-style-type: none"> No in-water works, no direct impacts to fish and fish habitat Indirect - Dewatering activities and water discharge resulting in changes in water velocity or temperature, soil 	<p>Construction</p> <ul style="list-style-type: none"> All requirements of the <i>Fisheries Act</i> will be met. [IN Arch Monitoring fieldwork MNO.pdf](#)

Dear Sir/Madam,

Please find attached a letter inviting participation in the archaeological monitoring of borehole drilling planned to occur in the Lower Don Bridge area as part of the Ontario Line Project.

The date of this fieldwork is tentatively set for March 7, 2022. If you are interested in participating, please let me know as soon as possible and we will work with you and the project team to coordinate.

If you have any questions or concerns, please feel free to reach out to me at any time.

Thank you for your time and assistance.

Jaimi

Métis Consultation Unit
Métis Nation of Ontario
500 Old St. Patrick Street, Unit D
Ottawa, ON K1N 9G4
Delivered by Email

Dear Sir/Madam,

RE: Ontario Line Project - Invitation to Participate in Archaeological Monitoring for Borehole Drilling - Lower Don Bridge Area

Metrolinx continues to progress the Archaeological studies for the Ontario Line project and wanted to invite Métis Nation of Ontario to participate in further Archaeological monitoring for borehole drilling planned for the Lower Don Bridge area.

A Stage 1 Archaeological Assessment (AA) was completed as part of the Ontario Line Environmental Impact Assessment Report (EIAR). This report identified the area for the proposed boreholes as having archaeological potential. Both the Stage 1AA report and the EIAR were shared with Nations, in both August and November 2021.

Metrolinx is completing an Environmental Site Assessment in the Lower Don area (please see **Figure 1**). Given the identified archaeological potential of the area, archaeological monitoring will take place for the planned borehole drilling. This approach will provide for the on-site identification of archaeological resources and, if necessary, stop-work order of drilling by a licensed archaeologist in the event potential archaeological resources are encountered. A licensed archaeologist will be on-site during drilling to visually inspect spoil removed during borehole drilling as well as intermittent borehole samples to visually identify the presence of artifacts. Metrolinx would value any participation that Métis Nation of Ontario may wish to have in this monitoring program.

Please see the fieldwork details below:

Start Date: March 7, 2022 (potentially March 8 as well depending on drilling)

Duration: 1 day

Start Time: 8:30am

Consultant Company: Stantec

Contact information: Jeffrey Muir - (289) 208-5298

Assessment: Archaeological monitoring for borehole drilling

Size of Field Crew: 1 field supervisor

Parking and meeting location: See Figure 2. Meet and park at yellow star - along Bayview Ave and Mill St

Required PPE:

- Class 2 PPE (hi-viz vest)
- CSA Type 2 Hard Hat with foam insert (bump caps)
- CSA approved eye protection
- CSA approved 6" laced safety shoes
- CSA Hearing protection, in ear or over ear
- Appropriate clothing for weather conditions

Invitation to Participate in Fieldwork

Metrolinx would value the involvement of Métis Nation of Ontario in the upcoming archaeological monitoring fieldwork outlined above. Should your Nation wish to participate, please let us know at your earliest convenience. We welcome any requests for a meeting to discuss opportunities to participate or to explore this project in more detail with Métis Nation of Ontario. Upon receipt of Métis Nation of Ontario's interest in participating, Metrolinx will work to coordinate your Nation's involvement. Metrolinx is also willing to share fieldnotes and/or a summary of the borehole and geotechnical data in addition to the open invitation to participate directly in the monitoring.

Engagement

Regardless of whether or not your Nation participates in the fieldwork, Metrolinx will inform you of discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will also ensure that future Archaeological Assessment reports are provided to your Nation in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries.

If you require additional information or materials, or if you wish to discuss this project in more detail, please contact, Jaimi O'Hara, Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Thank you for your time and consideration.

Yours Truly,

Sarah Chowdhury, Environmental Project Manager

Subject: RE: PIF Notification - Ontario South Line Addendum

Hi Megan,

Please find attached a response from the environmental project team with respect to your inquiry about the PIF that was requested as part of the Ontario Line South study area. We trust that this letter will help to provide clarification to this issue.

Attachments and the previous and revised Stage 1 AAs can be found at this dropbox:

We have attached an ARA and appreciate any feedback that MCFN may have with respect to these changes. Please do not hesitate to contact Fallon or myself if you have any further questions or concerns.

I hope you had a safe and happy holiday.

Thank you
Jaimi

Subject: [EXTERNAL] PIF Notification - Ontario South Line Addendum

Hello Samantha and Fallon,

MCFN was notified today that a PIF had been taken out last week by Samantha Markham of AECOM to complete the Stage 1 archaeological assessment of Ontario Line South Addendum.

As a reminder, DOCA expects that it will be circulated on the draft report for our review prior to its submission to the MHSTCI.

Additionally, if any Stage 2 fieldwork is required, MCFN expects that its Field Liaison Representatives will be invited to participate.

Thank you,
Megan.

MonitoringInvitation for Participation in monitoring for Boreholes_MCFN.pdf

Dear Megan,

Please find attached a letter inviting participation in upcoming archaeological monitoring for borehole drilling that is taking place at various locations to support environmental assessment and geotechnical studies related to the Ontario Line Subway project. The boreholes are being drilled in locations that have known archaeological potential and as such Metrolinx is ensuring that a consultant archaeologist is on-site to monitor. We'd like to extend this invite to your Nation as well. We appreciate that during these uncertain times of COVID-19 this may not be possible or safe for your Nation. We are happy to provide any fieldnotes taken by the consultant archaeologist and/or provide a summary of the data collected if this is at all helpful to you.

. Please let us know if there is any other way we can support your Nation during this time.

The boreholes are anticipated to be completed over the next several weeks beginning this Friday on **January 22, 2021**. Please let me know if you have interest in participating as soon as possible, and we will work with you and the project team to coordinate.

Good morning, Megan.

I hope this email finds you well. This is just a quick email to touch base on this project. I understand that MCFN will not be sending an FLR to site for participate in the archaeological monitoring and rather we will be submitting daily reports via DOCA's web portal. To keep you apprised for your records, at present our schedule is Feb 2 – 10 for the Stantec drilling.

If you could advise on DOCA's project number for this work for the daily reporting that will be very much appreciated.

If you have any questions or concerns please do not hesitate to let me know.

Sincerely,

Paul David Ritchie MA

Good afternoon,

MCFN-DOCA has now finished our review of the Stage 1 AA reports you provided us for the “Ontario South Line Addendum”. After reviewing the reports, there are issues that we would like to see addressed.

For a report of this size and scope, it is lacking in a comprehensive description for the First Nations history of the area. From an MCFN perspective, all this report does is list and acknowledge the treaty that this study area falls within. This report does not actually tell the accepted history of how the Mississaugas came to this part of Ontario and settled in what is now our Treaty Territory. We need to see this more detailed history added to the report at this stage. It sets the historical narrative for the rest of the reports that will be produced during this project, and clearly lays out the history and cultural practices that may be observed during any archaeological work done.

Overall, the report contents and recommendations are well done. However, we would like to review one recommendation made in the report by AECOM:

“The types of Stage 2 archaeological assessment that could be required for this project include standard surface-level testing, a combination of mechanical and hand excavation for deeply buried contexts, and a requirement for archaeological monitoring during construction. The type of impact planned could also remove the requirement for certain types of Stage 2 archaeological assessment.”

*For example, it is possible that Stage 2 archaeological assessment could be reduced in segments where tunneling is being proposed, however **this will have to be coordinated in consultation with the MHSTCI** should this approach be contemplated.” (my emphasis)*

It is clear that the overall planning for this subway line is still in the early stages, and the full extent of what needs to be impacted and how those areas will be assessed is yet to be finalized. As this project moves forward, MCFN-DOCA expects to be engaged and consulted during all of these discussions and would expect that this is reflected in the recommendations of this report. Thus, MCFN would like to explicitly see added to the recommendations that MCFN will be engaged/consulted during this process and that MCFN FLRs will be required during all the future archaeological assessments. This would be in addition to the required conversations with the MHSTCI and other involved parties.

If you require further clarification from our office let either myself or Megan know. As always, we thank Metrolinx for their continued engagement with MCFN, and look forward to working on this project with you.

Kind regards,
Adrian Blake, M.S.

Good morning Fallon,

Our Field Archaeologist, Adrian Blake, has reviewed the archaeological information that is part of the Draft Corktown Station Early Works report. At this time, we have no further concerns with the contents and the proposed scope of work. However, we do want to confirm our interest in participating in future archaeological assessment activities associated with the project, including monitoring for deeply buried deposits. We appreciate Metrolinx continuing to keep MCFN-DOCA updated on the project.

Sincerely,
Megan.

Subject: Ontario Line - Project Update and Draft Corktown Station Early Works Report for Review + Invitation to Participate in Archaeological Fieldwork

Dear Fawn and Megan,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. Attached you will find a letter providing an update on the project. The purpose of this letter is to:

- Provide an update on the scope of the project work
- share the initial draft of the Early Works Report for the proposed Corktown Station
- Invite your Nation to participate in upcoming archaeological fieldwork

In an effort to streamline your review, we draw your attention to the attachment which provides an overview of the expected environmental impacts and proposed mitigations, as we know this may be of specific interest to you.

Metrolinx is also preparing a letter specific to works being planned within the Don

Valley as we recognize the significance of this waterway to many Nations. We hope to share that letter soon. We are happy to meet with your Nation to discuss the Ontario Line and address any questions or concerns that your Nation may have.

We ask that any comments on the draft Corktown Station Early Works Report be provided no later than **April 15, 2021**. Please note that the Noise and Vibration Report, which will be part of the Early Works Report is still being prepared and we will share with your Nation by March 19, 2021.

The draft Corktown Station Early Works Report is available at the following link:

Please let us know as soon as possible if your Nation has interest in participating in future archaeological fieldwork. We will be sure to share a signed FLR for the scope of this work, with you shortly.

We appreciate the volume of documents that Metrolinx has shared with your Nation.

If you have any questions or concerns, please do not hesitate to contact me.

Miigwetch,

Fallon

Subject: Ontario Line Project - Invitation to Meet & provide input on First Parliament Site

Dear Fawn,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. We recently communicated with your Nation about the proposed Corktown Station which is along the planned alignment of the Ontario Line. This location includes parcels of land which were once the site of Upper Canada's First Parliament buildings. Metrolinx and its partners are exploring opportunities to commemorate the history of this site, and have been engaging with various parties and we appreciate the contributions of the Mississaugas of the Credit First Nation to the working group and we acknowledge that this project is occurring on your Nation's treaty territory.

Given the significant chance of recovering Indigenous and European artifacts during the Corktown Station Early Works, a detailed archaeological workplan is being developed. Metrolinx recognizes the importance and value of Indigenous monitors for any archaeology related to the Ontario Line Project. In our previous communication, an invitation was included for your Nation to participate in any archaeological fieldwork and monitoring during the Corktown Station Early Works, including demolition of modern buildings currently on the First Parliament site.

This work is anticipated to commence in Fall 2021, and if you have not yet expressed interest in participating, please feel free to do so at your earliest convenience. As a reminder any comments on the draft Corktown Station Early Works Report should be provided no later than **April 15, 2021**.

Metrolinx recognizes that the history of this location extends beyond European use, and as such, wants to take the opportunity to understand any significance it may have to Indigenous Nations. Metrolinx would like to meet with your Nation to discuss the First Parliament site, its commemoration, as well as review the broader Ontario Line project if you wish. We recognize that traditional knowledge of this area may be sacred and/or not appropriate to be shared, but would appreciate any information that may be appropriate for Metrolinx to consider.

This letter is not intended to replace engagement but to provide a high level summary for your information. We would very much appreciate meeting with your Nation to discuss in more detail. Please let me know if you have any questions or concerns. We appreciate the volume of documents that Metrolinx has shared with your Nation. If you have any questions or concerns, please do not hesitate to contact me.

Miigwetch,

Fallon

Subject: RE: Ontario Line – Addendum to Ontario Line South Stage 1 Archaeological Assessment

Hi Adrian,

Thank you for your email received on February 25, 2021 regarding the Ontario Line Stage 1 Archaeological Assessment Report. We passed your comments along to the environmental team that is working on this project. They asked the consultant archaeologist to provide additional background information in the body of the text to provide a more detailed history within the report. Additionally, the recommendations of the Stage 1 Archaeological Assessment have been updated to include consultation with Indigenous Nations, including Mississaugas of the Credit First Nation on any further archaeological work going forward:

Given the nature of the project there will be some combination of surface/above grade and below grade impacts. The type of impact planned in areas requiring Stage 2 archaeology will dictate the type of Stage 2 assessment strategy that should be employed. The types of Stage 2 archaeological assessment that could be required for this project include standard surface level testing, a combination of mechanical and hand excavation for deeply buried contexts, and a requirement for archaeological monitoring during construction. The type of impact planned could also remove the requirement for certain types of Stage 2 archaeological assessment. For example, it is possible that Stage 2 archaeological assessment could be reduced in segments where tunneling is being proposed, however this will have to be coordinated in consultation with the MHSTCI should this approach be contemplated. Metrolinx will continue to consult with MHSTCI and Indigenous Nations for future Ontario Line archaeological assessments.

The final draft of the report, as well as a version with track changes can be found here for your reference.

Please do not hesitate to contact us with any further questions.

Hope you are well,

Jaimi

Good afternoon,

MCFN-DOCA has now finished our review of the Stage 1 AA reports you provided us for the “Ontario South Line Addendum”. After reviewing the reports, there are issues that we would like to see addressed.

For a report of this size and scope, it is lacking in a comprehensive description for the First Nations history of the area. From an MCFN perspective, all this report does is list and acknowledge the treaty that this study area falls within. This report does not actually tell the accepted history of how the Mississaugas came to this part of Ontario and settled in what is now our Treaty Territory. We need to see this more detailed history added to the report at this stage. It sets the historical narrative for the rest of the reports that will be produced during this project, and clearly lays out the history and cultural practices that may be observed during any archaeological work done.

Overall, the report contents and recommendations are well done. However, we would like to review one recommendation made in the report by AECOM:

*"The types of Stage 2 archaeological assessment that could be required for this project include standard surface-level testing, a combination of mechanical and hand excavation for deeply buried contexts, and a requirement for archaeological monitoring during construction. The type of impact planned could also remove the requirement for certain types of Stage 2 archaeological assessment. For example, it is possible that Stage 2 archaeological assessment could be reduced in segments where tunneling is being proposed, however **this will have to be coordinated in consultation with the MHSTCI** should this approach be contemplated."* (my emphasis)

It is clear that the overall planning for this subway line is still in the early stages, and the full extent of what needs to be impacted and how those areas will be assessed is yet to be finalized. As this project moves forward, MCFN-DOCA expects to be engaged and consulted during all of these discussions and would expect that this is reflected in the recommendations of this report. Thus, MCFN would like to explicitly see added to the recommendations that MCFN will be engaged/consulted during this process and that MCFN FLRs will be required during all the future archaeological assessments. This would be in addition to the required conversations with the MHSTCI and other involved parties.

If you require further clarification from our office let either myself or Megan know. As always, we thank Metrolinx for their continued engagement with MCFN, and look forward to working on this project with you.

Kind regards,

Adrian Blake, M.S.

Subject: Ontario Line - Project Update - Don Valley and River - Invitation for Participation in Stage 2 Archaeological Fieldwork

Dear Fawn and Megan,

Metrolinx continues to progress its environmental studies for the Ontario Line Project. We wanted to keep you aware that part of the project scope falls within the Don Valley and River System, and we recognize the importance of Valley and the waters within. Attached you will find a letter providing an update on the project and information regarding the planned work and environmental assessments that are anticipated to take place within the Don Valley. We also wanted to invite your Nation to participate in the planned Stage 2 Archaeological Assessments that are anticipated to occur as part of the upcoming field season. I believe we have signed an FLR that covers the totality of the Ontario Line project.

This letter is not intended to replace engagement but to provide a high level summary for your information. We would very much appreciate meeting with your Nation to discuss in more detail. Please let me know if you have any questions or concerns.

Miigwetch,

Fallon

Dear Ms. Sault,

Please find attached a letter inviting participation in upcoming archaeological monitoring for borehole drilling that is taking place next week at 256 Front Street in Toronto to support environmental assessment and geotechnical studies related to the Ontario Line Subway project. The boreholes are being drilled in locations that have known archaeological potential and as such Metrolinx is ensuring that a consultant archaeologist is on-site to monitor. If you are not able to attend, we are happy to provide any fieldnotes taken by the consultant archaeologist and/or provide a summary of the data collected if this is at all helpful to you.

The boreholes are anticipated to be completed between July 12 and July 16, 2021. Please let me know as soon as possible if you have interest in participating, and we will work with you and the project team to coordinate. And just a final note for your information, both Fallon Melander and Jaimi O'Hara, who are usually Metrolinx's main point of contact with your Nation, are away from the office this week. Hence you are receiving this communication from me.

Miigwetch,

Make today great,

Christine Parris (she, her, hers)

Delivered by email

Dear Ms. Sault,

RE: Ontario Line Project - Lower Don Bridge Marine Archaeological Overview Assessment for Review

Metrolinx wishes to build a strong and respectful relationship with Mississaugas of the Credit First Nation. Metrolinx appreciates and respects Mississaugas of the Credit First Nation's desire to be appropriately informed and aware of projects. Metrolinx wishes to share with you the development of the Marine Archaeological Overview Assessment (MAOA) report for the proposed construction of the Lower Don Valley Bridge over the Don River. This proposed bridge is a component of the Ontario Line Project as part of the Lower Don Bridge and Don Yard Early Works. We invite Mississaugas of the Credit First Nation's feedback on the marine Archeological Overview Assessment prepared for the Ontario Line Project.

Project Description

The Ontario Line will bring 15.6 kilometres of subway service to Toronto. The Ontario Line will stretch from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line will have 15 new stations, including six interchange stations, connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable service.

Lower Don Bridge and Don Yard Early Works

The Lower Don Bridge and Don Yard early works are planned for where the Ontario Line will run alongside GO train operations. These early works will set the groundwork for other major construction on the Ontario Line project and include:

- building a new bridge north of the existing rail bridge over the Lower Don River that will carry the Ontario Line tracks;
- shifting GO tracks in the Don Yard and nearby rail corridor to accommodate Ontario Line infrastructure;
- modifying the existing rail bridge to accommodate GO track shifts and Ontario Line infrastructure; and
- relocating and protecting utilities and signal infrastructure in the area.

10 Bay Street
Toronto, ON M5J 2N8

The location of the Lower Don Bridge and Don Yard early works project footprint and study area can be viewed in **Figure 1** below.

Figure 1: Map of Lower Don Bridge and Don Yard Early Works

Marine Archaeological Overview Assessment

On behalf of Metrolinx, Stantec has undertaken a Marine Archaeological Overview Assessment for the proposed Lower Don Bridge. The purpose of the Marine Archaeological Overview Assessment is to determine the marine archaeological potential of the study area for the bridge shown in **Figure 2** below.

The proposed bridge will cross over the Don River on the north side of the existing GO Transit Lakeshore East rail bridge. As a result, a large portion of the study area overlaps with the Don River. While the bridge will have no permanent in-water components, Metrolinx anticipates that in-water construction activities may impact potential submerged cultural resources. The marine archaeological potential of the study area is being considered as part of the Marine Archeological Overview Assessment.

The assessment determined that despite the study area for the Lower Don Valley Arch Bridge Superstructure having indicators of marine archaeological potential, there has been extensive river-bed disturbance to date. The riverbed has been previously disturbed by engineered

channeling, modern dredging, and modern construction. The assessment determined that the study area retains low to no potential for the identification and documentation of in situ Indigenous and Euro-Canadian marine archaeological resources. As a result no further marine archaeological work is required for the study area.

A copy of the marine Archeological Overview Assessment has been included in the Dropbox link for your review. Please provide any comments you may have by **November 19, 2021**.

Invitation for Input

We are committed to an open, respectful, and transparent engagement with Mississaugas of the Credit First Nation. Metrolinx values any input that Mississaugas of the Credit First Nation is willing to provide on the Marine Archaeological Overview Assessment report.

We are happy to meet with your Mississaugas of the Credit First Nation to go over the project and development of the Marine Archaeological Overview Assessment report and answer any questions Mississaugas of the Credit First Nation may have on the report or the project as a whole.

If you require additional information or materials, or if you wish to discuss this project in more detail or set up a meeting, please contact Jaimi O'Hara, Acting Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Please submit your feedback in writing by **November 19, 2021**.

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*, except where information is provided to Metrolinx in confidence, pursuant to section 15.1.

Dear Megan,

Please find attached a letter inviting participation in upcoming Stage 2 Fieldwork for the Ontario Line project. This fieldwork was previously introduced to your team via Stantec on September 29. We are providing a formal invitation

This fieldwork is now anticipated to take place starting October 25, 2021. Please let me know if you have interest in participating as soon as possible, and we will work with you, the project team to coordinate.

If you have any questions or concerns, please feel free to contact the Indigenous Relations Office at anytime.

Thank you,

Chief Stacey R. LaForme
c/o Ms. Fawn Sault
Mississaugas of the Credit First Nation
2789 Mississauga Road RR #6
Hagersville, ON N0A 1H0
Delivered by email

Dear Ms. Sault,

**RE: Ontario Line Project - Species at Risk 17(2)(d) Permit Amendment Under the
*Endangered Species Act***

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with Mississaugas of the Credit First Nation. Metrolinx appreciates and respects Mississaugas of the Credit First Nation's desire to be appropriately informed and aware of projects. To that end, Metrolinx is sharing with Mississaugas of the Credit First Nation information regarding the Species at Risk (SAR) 17 (2) (d) Permit under the *Endangered Species Act* (ESA, 2007) obtained in support of the Ontario Line Project, and the proposed amendment to this permit.

Project Description

Metrolinx, a regional transportation agency, is helping transform the way the Greater Golden Horseshoe region moves by building a fast, convenient, and integrated transit network. As part of this work, Metrolinx is proceeding with the Ontario Line Project which will bring 15.6 kilometres of subway service to Toronto.

Ontario Line Permit #CR-D-002-19

Metrolinx, as part of the Ontario Line Project, previously received approval for a 17(2)(d) permit (Permit #CR-D-002-19) under the *Endangered Species Act* (ESA, 2007) issued by the Ministry of the Environment, Conservation, and Parks (MECP) on August 10, 2020. The permit provides approval for those project activities that may have adverse impacts on identified Species at Risk (SAR) and/or their habitat. The permit allows for those activities to take place and provides direction to Metrolinx regarding mitigation measures and compensation requirements that would be necessary to support those impacted species to support no net loss.

To inform this permit, Metrolinx completed SAR screening through the Ontario Line Environmental Conditions Report and Natural Environment Report using various information sources. While the results of this screening were shared within the initial draft of the Environmental Conditions Report circulated to Mississaugas of the Credit First Nation on June 15 2020, Draft Environmental Conditions Report circulated on September 17 2020 and Final Environmental Conditions Report circulated on November 30 2020, we regret that we did not engage with Mississaugas of the Credit First Nation directly on the screening process or the findings.

Potentially Impacted Species and Summary of Permit Conditions and Requirements

Based on the SAR screening completed to date, some activities required to support the Ontario Line Project may result in the following species at risk being impacted:

- Bank Swallow - Threatened
- Barn Swallow - Threatened
- Blanding's Turtle - Threatened
- Butternut - Endangered
- Chimney Swift - Threatened
- Little Brown Myotis - Endangered
- Northern Myotis - Endangered
- Small-footed Myotis - Endangered
- Tri-colored Bat - Endangered

Activities that may result in impacts to species listed above are associated with project construction and include activities such as removal or alteration of SAR habitat features (e.g., structures that may support SAR bird nesting, and trees).

Prior to commencing any activities that may impact SAR and/or SAR habitat, Metrolinx will complete species-specific screening for areas where project activities are planned to take place, and, if necessary (if screening determines that SAR/SAR habitat is likely to be present), surveys to detect SAR and SAR habitat presence and conduct an impact assessment if presence is confirmed, to characterize species-specific impacts (e.g., amount of habitat removed).

Metrolinx will meet the ESA permit conditions such as implementing species-specific mitigation measures, monitoring their effectiveness, and taking corrective action as required. Species-specific mitigation measures include scheduling activities to take place outside of species-specific timing windows (e.g., outside of active season or breeding window), implementing exclusion measures to prevent individuals of certain species from being impacted by project activities, and others.

If project activities result in SAR habitat removal, Metrolinx will implement species-specific compensation measures such as creating habitat (e.g., nesting habitat features replacing habitat features removed). Compensation habitat will be regularly monitored, and appropriate corrective actions will be taken as required to ensure habitat functions as intended.

Proposed Permit Amendment

Metrolinx is proposing an amendment to the previously approved SAR 17(2)(d) Permit (Permit #CR-D-002-19) under the *Endangered Species Act* (ESA, 2007), approved on August 10, 2020. The purpose of this permit amendment is to seek approval for additional study area not included in the current Permit #CR-D-002-19, as shown in **Appendix 1**. There are no changes to the permit conditions, including species-specific mitigation measures and compensation requirements, and no additional species are being added at this time. The SAR screening developed in support of the current permit has been updated to provide occurrence probability of SAR that may be present in the areas Metrolinx is seeking to include in the permit as part of the proposed amendment, and is included as **Appendix 2**.

Permit Amendment Process - Next Steps

The Proposal for the 17(2)(d) Permit Amendment is anticipated to be available on the Environmental Registry of Ontario (ERO) for a 30-day public review period this Fall 2021, and Metrolinx will notify Mississaugas of the Credit First Nation when the ERO posting is available. While not specifically required under the Environmental Bill of Rights, the Ministry of the Environment, Conservation and Parks (MECP) voluntarily posts all ESA permit proposals for public review to ensure transparency and inclusion.

Metrolinx is seeking Mississaugas of the Credit First Nation's comments, questions, or requests for additional information upon review of the material presented in this letter at any time in advance of the public ERO posting. Questions or comments can also be submitted directly to MECP through the ERO posting during the 30-day public review period.

Following the 30-day public review period, the proposed permit amendment will be submitted to the Minister for review and consideration. The amendment may only be issued if the Minister is of the opinion that the legal requirements set out in clause 17(2)(d) of the *Endangered Species Act* (ESA, 2007) have been satisfied. Should the amendment be issued, Metrolinx will be obligated to adhere to the requirements and standards as stipulated under the permit.

Mississaugas of the Credit First Nation will be kept apprised should any new SAR be identified within the project area as project planning progresses. In such cases we will endeavor to engage Mississaugas of the Credit First Nation prior to seeking any necessary permit amendments.

Metrolinx is committed to building a long-term relationship with Mississaugas of the Credit First Nation, and we recognize that this requires transparency. We appreciate that we have much work to do in this regard and we hope to move forward in a positive way. The original SAR permit was obtained as part of the normal course of Metrolinx business, which had yet to be identified by the Indigenous Relations Office as necessitating engagement and information sharing with Indigenous Nations.

The Indigenous Relations Office has begun guiding the organization and identifying opportunities to flag such actions in advance, so that we can more meaningfully engage with Indigenous Nations as we move forward. We appreciate your patience as Metrolinx continues to learn more about Indigenous Nations and with the help of the Indigenous Relations Office, becomes aware of additional opportunities for engagement with Indigenous Nations.

We appreciate that previous engagement activities may not have met the needs of Mississaugas of the Credit First Nation, and the volume of materials may have resulted in Mississaugas of the Credit First Nation not having been made adequately aware of the possible identified impacts to several Species at Risk under this permit. Metrolinx remains committed to meaningful engagement; we are committed to identifying and prioritizing the sharing of the most relevant and appropriate information with Mississaugas of the Credit First Nation.

If Mississaugas of the Credit First Nation requires additional information or materials, or you wish to discuss this project in more detail, please reach out to Jaimi O'Hara in the Indigenous Relations Office at Metrolinx and she would be pleased to facilitate a meeting. She can be contacted at IndigenousRelations@metrolinx.com.

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*, except where information is provided to Metrolinx in confidence, pursuant to section 15.1.

Thank you for your time in reviewing this letter.

Yours Truly,

Subject: RE: Invitation for Participation - Stage 2 Archaeological Fieldwork – Ontario Line

Hi Adrian,

I hope you're doing well and having a nice week!

I wanted to follow up with you about the planned fieldwork set to take place in the Don Valley area, as discussed in the emails below. I know that you weren't sure about your capacity and the availability of monitors in the Winter, but I wanted to make sure that we are keeping you up to date regarding the dates of the fieldwork. There will be one day of archaeological monitoring to drill one borehole planned to occur between Feb 24 and Mar 4. The exact date will be confirmed once we receive the necessary permits, and so we wanted to give you a heads-up and confirm if you are interested/able to participate.

Please see the exact location of the borehole and further details below.

Let me know what you think!

Warmly,

Marilyn

Archaeological monitoring during borehole drilling

Start Date: one day of monitoring planned to occur between Feb 24- Mar 4 (permit pending). Additional work schedule to be provided soon for work in March to mid-April.

Duration: 3-5 day, Thurber requested 5 days to account for unforeseen delays including weather.

Start Time: 8am

Consultant Company: Stantec, Thurber

Contact information: Jeffrey Muir - (289) 208-5298; Heather Kerr - (416) 602-3271; Patrick Hoskins - (613) 716-4687

Assessment: Archaeological monitoring for borehole drilling

Size of Field Crew: 1 field supervisor

Meeting location: See below – 21 Redway Road wastewater treatment plant

Required PPE:

- Class 3 PPE
 - § High-visibility material jacket (which includes reflective arm bands) and pants (which includes reflective stripes/bands)
 - § Both pants and jacket have to be long sleeve
- CSA Type 2 Hard Hat with foam insert (bump caps)
- CSA approved eye protection
- CSA approved 6" laced safety shoes
- CSA Hearing protection, in ear or over ear
- Appropriate clothing for weather conditions

Jaimi,

Thank you for the invitation to participate in this project. At this time MCFN-DOCA does not have the capacity to participate in this assessment as seasonal layoffs have begun and are impacting our ability to send FLRs to every project that is still on-going.

If this study isn't, for any reason, completed this December we may want to get involved again in the spring, so if you could send us a notice for when it is completed, I would appreciate it.

Subject: Invitation for Participation - Stage 2 Archaeological Fieldwork – Ontario Line

Dear Adrian,

Please find attached a letter inviting participation in Stage 2 Archaeological Assessments planned to occur in the upcoming weeks as part of the Ontario Line Project.

The date of this fieldwork is tentatively set for December 2, 2021. If you are interested in participating, please let me know as soon as possible and no later than next **Friday, November 26, 2021**, and we will work with you and the project team to coordinate.

If you have any questions or concerns, please feel free to reach out to me at any time.

Thank you for your time and assistance.

Jaimi

Subject: Ontario Line - Species at Risk 17(2)(d) Permit Under Endangered Species Act
Date: Friday, December 10, 2021 10:05:49 AM
Attachments: [image003.png](#)

Dear Fawn,

As a follow up to the letter sent on November 3, 2021 regarding the Ontario Line Project Species at Risk 17(2)(d) Permit Amendment Under the *Endangered Species Act*, the Proposal for the 17(2)(d) Permit Amendment was posted on the Environmental Registry of Ontario (ERO) on December 3rd, 2021 for a 30-day public review period, ending January 2nd, 2022.

The ERO posting can be found in the following link:
<https://ero.ontario.ca/notice/019-4601> Comments can be submitted directly to the Ministry of the Environment, Conservation and Parks.

If you have any questions or concerns, please feel free to reach out to me at any time. Additionally, we are happy to arrange a meeting to discuss the Permit, if that would be of interest.

Thank you for your time and assistance.

Subject: RE: PIF Notification - Ontario South Line Addendum

Hi Megan,

Please find attached a response from the environmental project team with respect to your inquiry about the PIF that was requested as part of the Ontario Line South study area. We trust that this letter will help to provide clarification to this issue.

Attachments and the previous and revised Stage 1 AAs can be found at this dropbox:

We have attached an ARA and appreciate any feedback that MCFN may have with respect to these changes. Please do not hesitate to contact Fallon or myself if you have any further questions or concerns.

I hope you had a safe and happy holiday.

Thank you
Jaimi

Subject: [EXTERNAL] PIF Notification - Ontario South Line Addendum

Hello Samantha and Fallon,

MCFN was notified today that a PIF had been taken out last week by Samantha Markham of AECOM to complete the Stage 1 archaeological assessment of Ontario Line South Addendum.

As a reminder, DOCA expects that it will be circulated on the draft report for our review prior to its submission to the MHSTCI.

Additionally, if any Stage 2 fieldwork is required, MCFN expects that its Field Liaison Representatives will be invited to participate.

Thank you,
Megan.

Subject: Ontario Line - Archaeological monitoring for Borehole Drilling
Attachments: OL Archaeological
MonitoringInvitation for Participation in monitoring for Boreholes_MCFN.pdf

Dear Megan,

Please find attached a letter inviting participation in upcoming archaeological monitoring for borehole drilling that is taking place at various locations to support environmental assessment and geotechnical studies related to the Ontario Line Subway project. The boreholes are being drilled in locations that have known archaeological potential and as such Metrolinx is ensuring that a consultant archaeologist is on-site to monitor. We'd like to extend this invite to your Nation as well. We appreciate that during these uncertain times of COVID-19 this may not be possible or safe for your Nation. We are happy to provide any fieldnotes taken by the consultant archaeologist and/or provide a summary of the data collected if this is at all helpful to you.

. Please let us know if there is any other way we can support your Nation during this time.

The boreholes are anticipated to be completed over the next several weeks beginning this Friday on **January 22, 2021**. Please let me know if you have interest in participating as soon as possible, and we will work with you and the project team to coordinate.

Miigwetch,

Subject: Upcoming Stantec Archaeological Monitoring of Phase 2 ESA BH Drilling Work for Ontario Line

Good morning, Megan.

I hope this email finds you well. This is just a quick email to touch base on this project. I understand that MCFN will not be sending an FLR to site for participate in the archaeological monitoring and rather we will be submitting daily reports via DOCA's web portal. To keep you apprised for your records, at present our schedule is Feb 2 – 10 for the Stantec drilling.

If you could advise on DOCA's project number for this work for the daily reporting that will be very much appreciated.

If you have any questions or concerns please do not hesitate to let me know.

Sincerely,

Paul David Ritchie MA

Project Archaeologist

Good afternoon,

MCFN-DOCA has now finished our review of the Stage 1 AA reports you provided us for the “Ontario South Line Addendum”. After reviewing the reports, there are issues that we would like to see addressed.

For a report of this size and scope, it is lacking in a comprehensive description for the First Nations history of the area. From an MCFN perspective, all this report does is list and acknowledge the treaty that this study area falls within. This report does not actually tell the accepted history of how the Mississaugas came to this part of Ontario and settled in what is now our Treaty Territory. We need to see this more detailed history added to the report at this stage. It sets the historical narrative for the rest of the reports that will be produced during this project, and clearly lays out the history and cultural practices that may be observed during any archaeological work done.

Overall, the report contents and recommendations are well done. However, we would like to review one recommendation made in the report by AECOM:

“The types of Stage 2 archaeological assessment that could be required for this project include standard surface-level testing, a combination of mechanical and hand excavation for deeply buried contexts, and a requirement for archaeological monitoring during construction. The type of impact planned could also remove the requirement for certain types of Stage 2 archaeological assessment.”

*For example, it is possible that Stage 2 archaeological assessment could be reduced in segments where tunneling is being proposed, however **this will have to be coordinated in consultation with the MHSTCI** should this approach be contemplated.” (my emphasis)*

It is clear that the overall planning for this subway line is still in the early stages, and the full extent of what needs to be impacted and how those areas will be assessed is yet to be finalized. As this project moves forward, MCFN-DOCA expects to be engaged and consulted during all of these discussions and would expect that this is reflected in the recommendations of this report. Thus, MCFN would like to explicitly see added to the recommendations that MCFN will be engaged/consulted during this process and that MCFN FLRs will be required during all the future archaeological assessments. This would be in addition to the required conversations with the MHSTCI and other involved parties.

If you require further clarification from our office let either myself or Megan know. As always, we thank Metrolinx for their continued engagement with MCFN, and look forward to working on this project with you.

Kind regards,
Adrian Blake, M.S.

Good morning Fallon,

Our Field Archaeologist, Adrian Blake, has reviewed the archaeological information that is part of the Draft Corktown Station Early Works report. At this time, we have no further concerns with the contents and the proposed scope of work. However, we do want to confirm our interest in participating in future archaeological assessment activities associated with the project, including monitoring for deeply buried deposits. We appreciate Metrolinx continuing to keep MCFN-DOCA updated on the project.

Sincerely,
Megan.

Subject: Ontario Line - Project Update and Draft Corktown Station Early Works Report for Review + Invitation to Participate in Archaeological Fieldwork

Dear Fawn and Megan,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. Attached you will find a letter providing an update on the project. The purpose of this letter is to:

- Provide an update on the scope of the project work
- share the initial draft of the Early Works Report for the proposed Corktown Station
- Invite your Nation to participate in upcoming archaeological fieldwork

In an effort to streamline your review, we draw your attention to the attachment which provides an overview of the expected environmental impacts and proposed mitigations, as we know this may be of specific interest to you.

Metrolinx is also preparing a letter specific to works being planned within the Don

Valley as we recognize the significance of this waterway to many Nations. We hope to share that letter soon. We are happy to meet with your Nation to discuss the Ontario Line and address any questions or concerns that your Nation may have.

We ask that any comments on the draft Corktown Station Early Works Report be provided no later than **April 15, 2021**. Please note that the Noise and Vibration Report, which will be part of the Early Works Report is still being prepared and we will share with your Nation by March 19, 2021.

The draft Corktown Station Early Works Report is available at the following link:

Please let us know as soon as possible if your Nation has interest in participating in future archaeological fieldwork. We will be sure to share a signed FLR for the scope of this work, with you shortly.

We appreciate the volume of documents that Metrolinx has shared with your Nation.

If you have any questions or concerns, please do not hesitate to contact me.

Miigwetch,

Fallon

Subject: Ontario Line Project - Invitation to Meet & provide input on First Parliament Site

Dear Fawn,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. We recently communicated with your Nation about the proposed Corktown Station which is along the planned alignment of the Ontario Line. This location includes parcels of land which were once the site of Upper Canada's First Parliament buildings. Metrolinx and its partners are exploring opportunities to commemorate the history of this site, and have been engaging with various parties and we appreciate the contributions of the Mississaugas of the Credit First Nation to the working group and we acknowledge that this project is occurring on your Nation's treaty territory.

Given the significant chance of recovering Indigenous and European artifacts during the Corktown Station Early Works, a detailed archaeological workplan is being developed. Metrolinx recognizes the importance and value of Indigenous monitors for any archaeology related to the Ontario Line Project. In our previous communication, an invitation was included for your Nation to participate in any archaeological fieldwork and monitoring during the Corktown Station Early Works, including demolition of modern buildings currently on the First Parliament site.

This work is anticipated to commence in Fall 2021, and if you have not yet expressed interest in participating, please feel free to do so at your earliest convenience. As a reminder any comments on the draft Corktown Station Early Works Report should be provided no later than **April 15, 2021**.

Metrolinx recognizes that the history of this location extends beyond European use, and as such, wants to take the opportunity to understand any significance it may have to Indigenous Nations. Metrolinx would like to meet with your Nation to discuss the First Parliament site, its commemoration, as well as review the broader Ontario Line project if you wish. We recognize that traditional knowledge of this area may be sacred and/or not appropriate to be shared, but would appreciate any information that may be appropriate for Metrolinx to consider.

This letter is not intended to replace engagement but to provide a high level summary for your information. We would very much appreciate meeting with your Nation to discuss in more detail. Please let me know if you have any questions or concerns. We appreciate the volume of documents that Metrolinx has shared with your Nation. If you have any questions or concerns, please do not hesitate to contact me.

Miigwetch,

Fallon

Subject: RE: Ontario Line – Addendum to Ontario Line South Stage 1 Archaeological Assessment

Hi Adrian,

Thank you for your email received on February 25, 2021 regarding the Ontario Line Stage 1 Archaeological Assessment Report. We passed your comments along to the environmental team that is working on this project. They asked the consultant archaeologist to provide additional background information in the body of the text to provide a more detailed history within the report. Additionally, the recommendations of the Stage 1 Archaeological Assessment have been updated to include consultation with Indigenous Nations, including Mississaugas of the Credit First Nation on any further archaeological work going forward:

Given the nature of the project there will be some combination of surface/above grade and below grade impacts. The type of impact planned in areas requiring Stage 2 archaeology will dictate the type of Stage 2 assessment strategy that should be employed. The types of Stage 2 archaeological assessment that could be required for this project include standard surface level testing, a combination of mechanical and hand excavation for deeply buried contexts, and a requirement for archaeological monitoring during construction. The type of impact planned could also remove the requirement for certain types of Stage 2 archaeological assessment. For example, it is possible that Stage 2 archaeological assessment could be reduced in segments where tunneling is being proposed, however this will have to be coordinated in consultation with the MHSTCI should this approach be contemplated. Metrolinx will continue to consult with MHSTCI and Indigenous Nations for future Ontario Line archaeological assessments.

The final draft of the report, as well as a version with track changes can be found here for your reference.

Please do not hesitate to contact us with any further questions.

Hope you are well,

Jaimi

Good afternoon,

MCFN-DOCA has now finished our review of the Stage 1 AA reports you provided us for the “Ontario South Line Addendum”. After reviewing the reports, there are issues that we would like to see addressed.

For a report of this size and scope, it is lacking in a comprehensive description for the First Nations history of the area. From an MCFN perspective, all this report does is list and acknowledge the treaty that this study area falls within. This report does not actually tell the accepted history of how the Mississaugas came to this part of Ontario and settled in what is now our Treaty Territory. We need to see this more detailed history added to the report at this stage. It sets the historical narrative for the rest of the reports that will be produced during this project, and clearly lays out the history and cultural practices that may be observed during any archaeological work done.

Overall, the report contents and recommendations are well done. However, we would like to review one recommendation made in the report by AECOM:

*"The types of Stage 2 archaeological assessment that could be required for this project include standard surface-level testing, a combination of mechanical and hand excavation for deeply buried contexts, and a requirement for archaeological monitoring during construction. The type of impact planned could also remove the requirement for certain types of Stage 2 archaeological assessment. For example, it is possible that Stage 2 archaeological assessment could be reduced in segments where tunneling is being proposed, however **this will have to be coordinated in consultation with the MHSTCI** should this approach be contemplated."* (my emphasis)

It is clear that the overall planning for this subway line is still in the early stages, and the full extent of what needs to be impacted and how those areas will be assessed is yet to be finalized. As this project moves forward, MCFN-DOCA expects to be engaged and consulted during all of these discussions and would expect that this is reflected in the recommendations of this report. Thus, MCFN would like to explicitly see added to the recommendations that MCFN will be engaged/consulted during this process and that MCFN FLRs will be required during all the future archaeological assessments. This would be in addition to the required conversations with the MHSTCI and other involved parties.

If you require further clarification from our office let either myself or Megan know. As always, we thank Metrolinx for their continued engagement with MCFN, and look forward to working on this project with you.

Kind regards,

Adrian Blake, M.S.

Subject: Ontario Line - Project Update - Don Valley and River - Invitation for Participation in Stage 2 Archaeological Fieldwork

Dear Fawn and Megan,

Metrolinx continues to progress its environmental studies for the Ontario Line Project. We wanted to keep you aware that part of the project scope falls within the Don Valley and River System, and we recognize the importance of Valley and the waters within. Attached you will find a letter providing an update on the project and information regarding the planned work and environmental assessments that are anticipated to take place within the Don Valley. We also wanted to invite your Nation to participate in the planned Stage 2 Archaeological Assessments that are anticipated to occur as part of the upcoming field season. I believe we have signed an FLR that covers the totality of the Ontario Line project.

This letter is not intended to replace engagement but to provide a high level summary for your information. We would very much appreciate meeting with your Nation to discuss in more detail. Please let me know if you have any questions or concerns.

Miigwetch,

Fallon

Dear Ms. Sault,

Please find attached a letter inviting participation in upcoming archaeological monitoring for borehole drilling that is taking place next week at 256 Front Street in Toronto to support environmental assessment and geotechnical studies related to the Ontario Line Subway project. The boreholes are being drilled in locations that have known archaeological potential and as such Metrolinx is ensuring that a consultant archaeologist is on-site to monitor. If you are not able to attend, we are happy to provide any fieldnotes taken by the consultant archaeologist and/or provide a summary of the data collected if this is at all helpful to you.

The boreholes are anticipated to be completed between July 12 and July 16, 2021. Please let me know as soon as possible if you have interest in participating, and we will work with you and the project team to coordinate. And just a final note for your information, both Fallon Melander and Jaimi O'Hara, who are usually Metrolinx's main point of contact with your Nation, are away from the office this week. Hence you are receiving this communication from me.

Miigwetch,

Make today great,

Christine Parris (she, her, hers)

Subject: Runoff at Today's site

Hi Fawn,

The team on site today identified the runoff water was being caused by the water being used in the coring process by the drillers working under Thurber at . The concrete slabs on site ended up being much thicker than anticipate Water was being used to keep the drill bit clear and from overheating while attempting to get through the asphalt and underlaying concrete. The team flagged the concern to the Thurber technician on site and they made a small berm around the auger area with bentonite to try and contain the water.

They will have a recirculation tank to contain the water when they are soil/rock drilling and have it set-up for any further work. We will also be reviewing our own drilling plans to try and mitigate this issues, recognizing we can expect the same challenges on site.

Thank you for flagging this concern earlier today. If you there any issues or concerns that arise in the future please let our team know and we will work to address the concern.

Thank you,

Jaimi

Dear Megan,

As we mentioned in our meeting earlier this week, please find the attached letter outlining the draft Marine Archeological Overview Assessment for the Ontario Line – Lower Don Bridge Project. The report is available for review at the following link:

Please share any comments you may have by **November 19, 2021**.

We've attached an  to support your review of these documents.

If you have any questions or concerns, please feel free to reach out to me at any time.

Thank you for your time and assistance.

Jaimi

Delivered by email

Dear Ms. Sault,

RE: Ontario Line Project - Lower Don Bridge Marine Archaeological Overview Assessment for Review

Metrolinx wishes to build a strong and respectful relationship with Mississaugas of the Credit First Nation. Metrolinx appreciates and respects Mississaugas of the Credit First Nation's desire to be appropriately informed and aware of projects. Metrolinx wishes to share with you the development of the Marine Archaeological Overview Assessment (MAOA) report for the proposed construction of the Lower Don Valley Bridge over the Don River. This proposed bridge is a component of the Ontario Line Project as part of the Lower Don Bridge and Don Yard Early Works. We invite Mississaugas of the Credit First Nation's feedback on the marine Archeological Overview Assessment prepared for the Ontario Line Project.

Project Description

The Ontario Line will bring 15.6 kilometres of subway service to Toronto. The Ontario Line will stretch from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line will have 15 new stations, including six interchange stations, connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable service.

Lower Don Bridge and Don Yard Early Works

The Lower Don Bridge and Don Yard early works are planned for where the Ontario Line will run alongside GO train operations. These early works will set the groundwork for other major construction on the Ontario Line project and include:

- building a new bridge north of the existing rail bridge over the Lower Don River that will carry the Ontario Line tracks;
- shifting GO tracks in the Don Yard and nearby rail corridor to accommodate Ontario Line infrastructure;
- modifying the existing rail bridge to accommodate GO track shifts and Ontario Line infrastructure; and
- relocating and protecting utilities and signal infrastructure in the area.

10 Bay Street
Toronto, ON M5J 2N8

The location of the Lower Don Bridge and Don Yard early works project footprint and study area can be viewed in **Figure 1** below.

Figure 1: Map of Lower Don Bridge and Don Yard Early Works

Marine Archaeological Overview Assessment

On behalf of Metrolinx, Stantec has undertaken a Marine Archaeological Overview Assessment for the proposed Lower Don Bridge. The purpose of the Marine Archaeological Overview Assessment is to determine the marine archaeological potential of the study area for the bridge shown in **Figure 2** below.

The proposed bridge will cross over the Don River on the north side of the existing GO Transit Lakeshore East rail bridge. As a result, a large portion of the study area overlaps with the Don River. While the bridge will have no permanent in-water components, Metrolinx anticipates that in-water construction activities may impact potential submerged cultural resources. The marine archaeological potential of the study area is being considered as part of the Marine Archeological Overview Assessment.

The assessment determined that despite the study area for the Lower Don Valley Arch Bridge Superstructure having indicators of marine archaeological potential, there has been extensive river-bed disturbance to date. The riverbed has been previously disturbed by engineered

channeling, modern dredging, and modern construction. The assessment determined that the study area retains low to no potential for the identification and documentation of in situ Indigenous and Euro-Canadian marine archaeological resources. As a result no further marine archaeological work is required for the study area.

A copy of the marine Archeological Overview Assessment has been included in the Dropbox link for your review. Please provide any comments you may have by **November 19, 2021**.

Invitation for Input

We are committed to an open, respectful, and transparent engagement with Mississaugas of the Credit First Nation. Metrolinx values any input that Mississaugas of the Credit First Nation is willing to provide on the Marine Archaeological Overview Assessment report.

We are happy to meet with your Mississaugas of the Credit First Nation to go over the project and development of the Marine Archaeological Overview Assessment report and answer any questions Mississaugas of the Credit First Nation may have on the report or the project as a whole.

If you require additional information or materials, or if you wish to discuss this project in more detail or set up a meeting, please contact Jaimi O'Hara, Acting Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Please submit your feedback in writing by **November 19, 2021**.

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*, except where information is provided to Metrolinx in confidence, pursuant to section 15.1.

Yours Truly,

Dear Megan,

Please find attached a letter inviting participation in upcoming Stage 2 Fieldwork for the Ontario Line project. This fieldwork was previously introduced to your team via Stantec on September 29. We are providing a formal invitation

This fieldwork is now anticipated to take place starting October 25, 2021. Please let me know if you have interest in participating as soon as possible, and we will work with you, the project team to coordinate.

If you have any questions or concerns, please feel free to contact the Indigenous Relations Office at anytime.

Thank you,

Chief Stacey R. LaForme
c/o Ms. Fawn Sault
Mississaugas of the Credit First Nation
2789 Mississauga Road RR #6
Hagersville, ON N0A 1H0
Delivered by email

Dear Ms. Sault,

**RE: Ontario Line Project - Species at Risk 17(2)(d) Permit Amendment Under the
*Endangered Species Act***

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with Mississaugas of the Credit First Nation. Metrolinx appreciates and respects Mississaugas of the Credit First Nation's desire to be appropriately informed and aware of projects. To that end, Metrolinx is sharing with Mississaugas of the Credit First Nation information regarding the Species at Risk (SAR) 17 (2) (d) Permit under the *Endangered Species Act* (ESA, 2007) obtained in support of the Ontario Line Project, and the proposed amendment to this permit.

Project Description

Metrolinx, a regional transportation agency, is helping transform the way the Greater Golden Horseshoe region moves by building a fast, convenient, and integrated transit network. As part of this work, Metrolinx is proceeding with the Ontario Line Project which will bring 15.6 kilometres of subway service to Toronto.

Ontario Line Permit #CR-D-002-19

Metrolinx, as part of the Ontario Line Project, previously received approval for a 17(2)(d) permit (Permit #CR-D-002-19) under the *Endangered Species Act* (ESA, 2007) issued by the Ministry of the Environment, Conservation, and Parks (MECP) on August 10, 2020. The permit provides approval for those project activities that may have adverse impacts on identified Species at Risk (SAR) and/or their habitat. The permit allows for those activities to take place and provides direction to Metrolinx regarding mitigation measures and compensation requirements that would be necessary to support those impacted species to support no net loss.

To inform this permit, Metrolinx completed SAR screening through the Ontario Line Environmental Conditions Report and Natural Environment Report using various information sources. While the results of this screening were shared within the initial draft of the Environmental Conditions Report circulated to Mississaugas of the Credit First Nation on June 15 2020, Draft Environmental Conditions Report circulated on September 17 2020 and Final Environmental Conditions Report circulated on November 30 2020, we regret that we did not engage with Mississaugas of the Credit First Nation directly on the screening process or the findings.

Potentially Impacted Species and Summary of Permit Conditions and Requirements

Based on the SAR screening completed to date, some activities required to support the Ontario Line Project may result in the following species at risk being impacted:

- Bank Swallow - Threatened
- Barn Swallow - Threatened
- Blanding's Turtle - Threatened
- Butternut - Endangered
- Chimney Swift - Threatened
- Little Brown Myotis - Endangered
- Northern Myotis - Endangered
- Small-footed Myotis - Endangered
- Tri-colored Bat - Endangered

Activities that may result in impacts to species listed above are associated with project construction and include activities such as removal or alteration of SAR habitat features (e.g., structures that may support SAR bird nesting, and trees).

Prior to commencing any activities that may impact SAR and/or SAR habitat, Metrolinx will complete species-specific screening for areas where project activities are planned to take place, and, if necessary (if screening determines that SAR/SAR habitat is likely to be present), surveys to detect SAR and SAR habitat presence and conduct an impact assessment if presence is confirmed, to characterize species-specific impacts (e.g., amount of habitat removed).

Metrolinx will meet the ESA permit conditions such as implementing species-specific mitigation measures, monitoring their effectiveness, and taking corrective action as required. Species-specific mitigation measures include scheduling activities to take place outside of species-specific timing windows (e.g., outside of active season or breeding window), implementing exclusion measures to prevent individuals of certain species from being impacted by project activities, and others.

If project activities result in SAR habitat removal, Metrolinx will implement species-specific compensation measures such as creating habitat (e.g., nesting habitat features replacing habitat features removed). Compensation habitat will be regularly monitored, and appropriate corrective actions will be taken as required to ensure habitat functions as intended.

Proposed Permit Amendment

Metrolinx is proposing an amendment to the previously approved SAR 17(2)(d) Permit (Permit #CR-D-002-19) under the *Endangered Species Act* (ESA, 2007), approved on August 10, 2020. The purpose of this permit amendment is to seek approval for additional study area not included in the current Permit #CR-D-002-19, as shown in **Appendix 1**. There are no changes to the permit conditions, including species-specific mitigation measures and compensation requirements, and no additional species are being added at this time. The SAR screening developed in support of the current permit has been updated to provide occurrence probability of SAR that may be present in the areas Metrolinx is seeking to include in the permit as part of the proposed amendment, and is included as **Appendix 2**.

Permit Amendment Process - Next Steps

The Proposal for the 17(2)(d) Permit Amendment is anticipated to be available on the Environmental Registry of Ontario (ERO) for a 30-day public review period this Fall 2021, and Metrolinx will notify Mississaugas of the Credit First Nation when the ERO posting is available. While not specifically required under the Environmental Bill of Rights, the Ministry of the Environment, Conservation and Parks (MECP) voluntarily posts all ESA permit proposals for public review to ensure transparency and inclusion.

Metrolinx is seeking Mississaugas of the Credit First Nation's comments, questions, or requests for additional information upon review of the material presented in this letter at any time in advance of the public ERO posting. Questions or comments can also be submitted directly to MECP through the ERO posting during the 30-day public review period.

Following the 30-day public review period, the proposed permit amendment will be submitted to the Minister for review and consideration. The amendment may only be issued if the Minister is of the opinion that the legal requirements set out in clause 17(2)(d) of the *Endangered Species Act* (ESA, 2007) have been satisfied. Should the amendment be issued, Metrolinx will be obligated to adhere to the requirements and standards as stipulated under the permit.

Mississaugas of the Credit First Nation will be kept apprised should any new SAR be identified within the project area as project planning progresses. In such cases we will endeavor to engage Mississaugas of the Credit First Nation prior to seeking any necessary permit amendments.

Metrolinx is committed to building a long-term relationship with Mississaugas of the Credit First Nation, and we recognize that this requires transparency. We appreciate that we have much work to do in this regard and we hope to move forward in a positive way. The original SAR permit was obtained as part of the normal course of Metrolinx business, which had yet to be identified by the Indigenous Relations Office as necessitating engagement and information sharing with Indigenous Nations.

The Indigenous Relations Office has begun guiding the organization and identifying opportunities to flag such actions in advance, so that we can more meaningfully engage with Indigenous Nations as we move forward. We appreciate your patience as Metrolinx continues to learn more about Indigenous Nations and with the help of the Indigenous Relations Office, becomes aware of additional opportunities for engagement with Indigenous Nations.

We appreciate that previous engagement activities may not have met the needs of Mississaugas of the Credit First Nation, and the volume of materials may have resulted in Mississaugas of the Credit First Nation not having been made adequately aware of the possible identified impacts to several Species at Risk under this permit. Metrolinx remains committed to meaningful engagement; we are committed to identifying and prioritizing the sharing of the most relevant and appropriate information with Mississaugas of the Credit First Nation.

If Mississaugas of the Credit First Nation requires additional information or materials, or you wish to discuss this project in more detail, please reach out to Jaimi O'Hara in the Indigenous Relations Office at Metrolinx and she would be pleased to facilitate a meeting. She can be contacted at IndigenousRelations@metrolinx.com.

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*, except where information is provided to Metrolinx in confidence, pursuant to section 15.1.

Thank you for your time in reviewing this letter.

Yours Truly,

cc: Mark LaForme, Director, Department of Consultation & Accommodation,

Jaimi,

Thank you for the invitation to participate in this project. At this time MCFN-DOCA does not have the capacity to participate in this assessment as seasonal layoffs have begun and are impacting our ability to send FLRs to every project that is still on-going.

If this study isn't, for any reason, completed this December we may want to get involved again in the spring, so if you could send us a notice for when it is completed, I would appreciate it.

Hi Adam,

Thank you for a great meeting just now! Speaking of the Ontario Line fieldwork schedule - I wanted to get back to you about the Corktown Demolition. Jeff Muir from Stantec will be your point of contact for arranging the details if you or a representative is able to attend. Once you confirm, he will be reaching out but please don't hesitate to connect with him if you need information before then. He can be reached at Jeff.Muir@stantec.com.

Let me know how your schedule is looking and if MCFN would like to attend.

Have a lovely weekend!

Good Morning Jaimi,

I hope you had a great holiday season.

Thank you for the update and the invitations.

MCFN is interested in participating in both projects, in general MCFN would like to have a representative on site whenever there is a consultant archeologist on site.

Miigwech,

Adam LaForme (he/him)
Archeological Operations Supervisor

Subject: Ontario Line: Invitation to Participate - Archaeological Monitoring for Corktown Station Demolition and Don Valley Area Borehole Drilling

Dear Adam,

As the Ontario Line Project continues to progress into the new year, we wanted to provide an update and invitation for participation in upcoming fieldwork. Please find attached a letter outlining upcoming Archaeological monitoring activities for the Corktown Station/First Parliament site and Don Valley area. These works are set to begin mid-January through February 2022.

If Mississaugas of the Credit First Nation is interested in participating in either or both of these works, please let me know as soon as possible in the new year, and we will work with you and the project team to coordinate. We can also provide fieldnotes and/or geotechnical data at your request.

If you have any questions or concerns, please feel free to reach out to me at any time.

Thank you for your time and assistance. Happy Holidays!

Jaimi

Delivered by email

Dear Ms. Sault,

RE: Ontario Line Project - Stage 2 Archaeological Assessment - Corktown Station and Don Valley Area: Invitation to Participate in Archaeological Fieldwork

Metrolinx and its consultant, Stantec continue to progress the archaeological studies for the Ontario Line project and wanted to invite Mississaugas of the Credit First Nation to participate in further archaeological monitoring for Corktown Station and Don Valley area.

CORKTOWN STATION

Archaeological monitoring for building demolitions is planned to occur at Corktown Station in the upcoming weeks. The locations of the Corktown Station study areas can be viewed in **Figure 1** below. Please note that this work is separate from the Stage 2 & Stage 4 archaeological investigations, which has ceased for the 2021 field season and will resume in Spring 2022. Metrolinx will ensure that Mississaugas of the Credit First Nation is informed of when the Stage 2 & Stage 4 archaeological investigations resume.

The archaeological monitoring will occur for building demolition activities on the First Parliament site that may be capping archaeological deposits at Corktown Station (please see Figure 1). This includes an archaeological crew of two (one field supervisor and one field technician) monitoring the demolition of modern buildings in the areas of archaeological potential. Metrolinx would value any participation that Mississaugas of the Credit First Nation may wish to have in this monitoring program.

Please see the fieldwork details below:

CORKTOWN STATION:

Start Date: Tentatively January 17-18, 2022. If the start date changes, we will reach out to you.

Duration: Approximately two to four months (demo work occurring intermittently during time period; schedule to be confirmed closer to start date)

Start Time: 8am

Consultant Company: Stantec

Contact information: Jeffrey Muir - (289) 208-5298; Heather Kerr - (416) 602-3271; Patrick Hoskins - (613) 716-4687

Assessment: Archaeological monitoring during building demolition

Size of Field Crew: 2 (1 field supervisor and 1 field technician)

DON VALLEY AREA

As part of the Ontario Line, Hydro One Network Infrastructure (HONI) needs to relocate several hydro towers to accommodate subway maintenance facilities. Metrolinx is carrying out a borehole drilling program in the Don Valley to provide HONI with geotechnical data for proposed hydro tower relocations.

Archaeological monitoring will occur for borehole drilling in areas with archaeological potential (please see Figure 2). This approach will provide for the on-site identification and, if necessary, stop-work order of drilling by a licensed archaeologist in the event potential archaeological resources are encountered. A licensed archaeologist will be on-site during drilling to visually inspect spoil removed during borehole drilling as well as intermittent borehole samples to visually identify the presence of artifacts. Metrolinx would value any participation that Mississaugas of the Credit First Nation may wish to have in this monitoring program.

Please see the fieldwork details below:

DON VALLEY AREA:

Start Date: Mid-February. Exact dates will be confirmed in January 2022

Duration: 1-2 weeks

Start Time: 8am

Consultant Company: Stantec

Contact information: Jeffrey Muir - (289) 208-5298; Heather Kerr - (416) 602-3271; Patrick Hoskins - (613) 716-4687

Assessment: Archaeological monitoring for borehole drilling

Size of Field Crew: 2 (1 field supervisor and 1 field technician)

Invitation to Participate in Fieldwork

Metrolinx would value the involvement of Mississaugas of the Credit First Nation in the upcoming archaeological monitoring fieldwork outlined above. Should your Nation wish to participate, please let us know at your earliest convenience. We welcome any requests for a meeting to discuss opportunities to participate or to explore this project in more detail with Mississaugas of the Credit First Nation. Upon receipt of Mississaugas of the Credit First Nation's interest in participating, Metrolinx will work to coordinate your Nation's involvement. If Metrolinx is also willing to share fieldnotes and/or a summary of

the borehole and geotechnical data in addition to the open invitation to participate directly in the monitoring.

Engagement

Regardless of whether or not your Nation participates in the fieldwork, Metrolinx will inform you of discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will also ensure that future Archaeological Assessment reports are provided to your community in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries.

If you require additional information or materials, or if you wish to discuss this project in more detail or set up an in-person meeting, please contact, Jaimi O'Hara, Manager of Indigenous Relations at Metrolinx. We can be contacted at IndigenousRelations@metrolinx.com.

Thank you for your time and consideration.

Yours Truly,

Subject: Ontario Line: Notice of Publication of Draft EIAR
Date: Monday, February 7, 2022 3:55:40 PM
Attachments: [image003.png](#)
[Appendix 2 - EIAR Arc and Natural Env Impacts and Mitigation.pdf](#)
[Attachment 1 - Notice of Publication of Draft EIAR.pdf](#)
[Notice of Draft EIAR MCFN.pdf](#)

Dear Adam and Team,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. We wish to share with you that the Draft Environmental Impact and Assessment Report (EIAR) has now been published. Attached you will find a letter outlining the Draft Environmental Impact Assessment Report (EIAR) prepared for the Ontario Line Project, as well as the Notice of Publication for the report.

The full report can be found using the following dropbox link:

The Notice of Publication commences a 30-day public review period which will continue from February 7, 2022 until March 9, 2022. As such, we ask that your Nation provide any comments in writing no later than March 9, 2022. We appreciate the size of these documents and would be happy to arrange a meeting to review the report and project with you.

In an effort to streamline your review, we draw your attention to the attachments which provide an overview of the expected environmental impacts and proposed mitigations for Natural Environment and Archaeological Resources, as we know this may be of specific interest to you.

Thank you for your time and assistance. If you have any questions or concerns, please do not hesitate to contact me.

Delivered by email

Dear Mr. Adam LaForme,

RE: Ontario Line Project - Notice of Publication of Draft Environmental Impact Assessment Report (EIAR)

Metrolinx remains committed to meaningful consultation and engagement, especially where our projects have impacts to the Treaty and traditional lands of Mississaugas of the Credit First Nation. Metrolinx values its relationship with Mississaugas of the Credit First Nation and it is our wish to continue to work with your Nation as we move forward. In November of 2021, Metrolinx shared with Mississaugas of the Credit First Nation the preliminary Draft Environmental Impact Assessment Report (EIAR) for comment and review. The purpose of this letter is to share with your Nation the that the Notice of Publication for the Draft EIAR has now been posted, and to continue to invite any comment or feedback you may wish to share on this report.

Project Description

Metrolinx is proceeding with the Ontario Line which will bring 15.6 kilometres of subway service to Toronto. The Ontario Line will stretch across the city, from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line will have 15 new stations, including six interchange stations, connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable service.

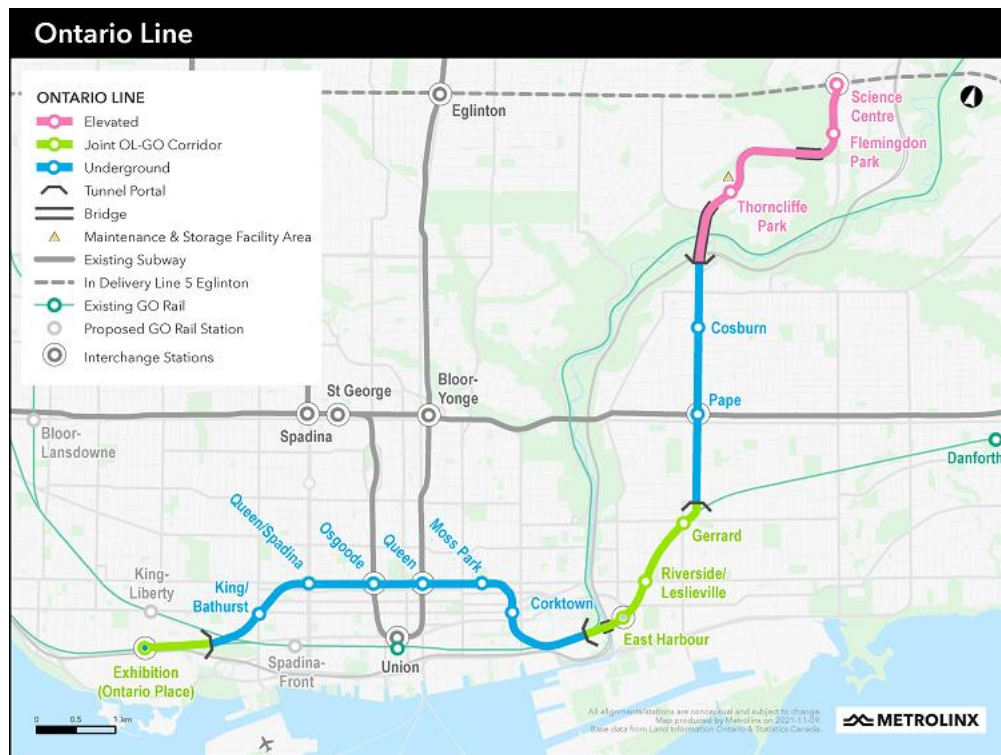

Figure 1 - Ontario Line

Ontario Line Environmental Assessment & Project Timeline

Environmental impacts of the Ontario Line Project are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*.

Table 1 below provides a summary of the Ontario Line Reports that have been shared, or will be shared with Mississaugas of the Credit First Nation:

Table 1: Ontario Line Reporting Timeline

Report	Date Shared/to be Shared with Nations
Draft Early Works Report (included Exhibition Station, Lower Don Bridge, Lakeshore East Joint Corridor and East Harbour Station)	June 5, 2020
Draft Environmental Conditions Report	September 17, 2020
Final Environmental Conditions Report and Draft Exhibition Station Early Works Report	November 30, 2020
Final Exhibition Station Early Works Report	February 1, 2021
Initial draft of Corktown Station Early Works Report	March 22, 2021
Draft Corktown Station Early Works Report	May 12, 2021
Final Corktown Station Early Works Report	July 15, 2021

Initial draft of Environmental Impact Assessment Report	November 18, 2021
Draft Environmental Impact Assessment Report	February 7, 2022 (shared with this letter)
Final Environmental Impact Assessment Report	April 19, 2022*

*Date is subject to change.

Draft Environmental Impact Assessment Report (EIAR)

The Draft EIAR summarizes the local environmental conditions in the discipline-specific study areas developed for the Project. The local environmental conditions were characterized through a combination of desktop review and field studies by practitioners using industry standard techniques and provincial standards, protocols, and guidelines, where appropriate. The resulting Draft Stage 1 AA and Natural Environment Report was shared with Mississaugas of the Credit First Nation for review in August 2021.

The Draft EIAR also provides an assessment and evaluation of the impacts that the Project might have on the environment. Based on the potential impacts, a description of mitigation measures and monitoring activities is outlined. A list of municipal, provincial, federal, or other permits and approvals that may be required for the Project is also provided.

Discipline-specific assessment and evaluation of impacts were undertaken for the following disciplines:

- Natural Environment
- Soil and Groundwater
- Cultural Heritage
- Archaeological Resources
- Socio-Economic and Land Use
- Air Quality
- Noise and Vibration
- Traffic and Transportation

Effective February 7, 2022, the Draft Environmental Impact Assessment Report will be available for a 30-day public review period. The report is posted on the Ontario Line project webpage, which can be accessed using the following link:

<https://www.metrolinxengage.com/en/content/full-report-draft-environmental-impact-assessment-report>

The Notice of Publication of Draft EIAR can be found in **Attachment 1**.

Potential Impacts and Mitigation Measures

The tables found enclosed in **Attachment 2** provide a summary of natural environment

and archaeology potential impacts and mitigation measures identified as part of the Draft EIAR that may be of interest to Mississaugas of the Credit First Nation. If your Nation has any feedback about these potential impacts and/or mitigation strategies, or any other aspects of the Ontario Line, we welcome the opportunity to discuss further.

Engagement

Metrolinx welcomes any comments or feedback on the EIAR during the 30-day public review period, from February 7 to **March 9, 2022**. Metrolinx is committed to an open and respectful relationship with Mississaugas of the Credit First Nation. We appreciate the significant volume of documents related to the Ontario Line Project that have been shared with Mississaugas of the Credit First Nation. We are happy to assist in the review of these documents by meeting with your Nation.

Metrolinx is willing to address any questions that Mississaugas of the Credit First Nation may have about the Ontario Line Project. If you require additional information or materials or if you wish to discuss the Project in more detail or set up a meeting, please contact Jaimi O'Hara, Manager of Indigenous Relations Office at Metrolinx. She can be reached at

IndigenousRelations@metrolinx.com.

With the exception of personal information, all comments will become part of the public record. Kindly note that any information you provide to Metrolinx, or its delegates, will be subject to the Freedom of Information and Protection of Privacy Act, except where information is provided to Metrolinx in confidence, pursuant to section 15.1, which protects the confidentiality of Indigenous knowledges.

Thank you for your time in reviewing this letter. Yours

Truly,

A handwritten signature in black ink, appearing to read 'J. Pakkala'.

 Attachment 2 - Draft EIAR Natural Environment and Archaeology Potential Effects, Mitigation Measures and Monitoring

Notice of Publication of Draft Environmental Impact Assessment Report and Virtual Open Houses Ontario Line Project

The Project

The Ontario Line will bring 15.6 kilometres of new subway service to Toronto, making it faster and easier for people to get where they need to be each day. The line will stretch across the city, from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line will have 15 new stations, including six interchange stations, connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable service.

Environmental Impact Assessment Report

Environmental impacts of the Ontario Line are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*. In accordance with Section 15 of O. Reg. 341/20, Metrolinx has prepared the Draft Environmental Impact Assessment Report that is now available for review.

The Draft Environmental Impact Assessment Report describes existing environmental conditions in the Project study area, environmental impacts, mitigation and monitoring measures, consultation, and required permits and approvals for the Ontario Line.

The Draft Environmental Impact Assessment Report Review and Consultation Process

Effective **February 7, 2022**, the Draft Environmental Impact Assessment Report will be available for review on the Ontario Line project webpage (www.metrolinx.com/ontarioline). You can view and comment on the report from **February 7 to March 9, 2022** via the online form provided.

You can also participate in virtual open houses, where you can hear from project experts and ask questions about the report in real time, at MetrolinxEngage.com/OntarioLine/live on:

- **February 22, 2022 and February 24, 2022** from 6:30 to 8:00 p.m., with a focus on the portion of the project from Science Centre Station to Gerrard Station
- **March 1, 2022 and March 3, 2022** from 6:30 to 8:00 p.m., with a focus on the portion of the project from Gerrard Station to Exhibition Station

Those who wish to provide comments on the Draft Environmental Impact Assessment Report must do so by **March 9, 2022** and submit them using the webpage form or address them to the following email: ontarioline@metrolinx.com.

Section 17 of O. Reg. 341/20 requires Metrolinx to establish an issues resolution process to attempt to resolve any concerns raised by the public or Indigenous Nations during the review period. At the end of the review period, Metrolinx will update the Draft Environmental Impact Assessment Report by adding a description of the issues resolution process, what Metrolinx did to address any concerns, and if the Ontario Line implementation timeline will be impacted as a result of addressing concerns. Metrolinx will then publish the Final Environmental Impact Assessment Report on the Ontario Line project webpage: www.metrolinx.com/ontarioline and issue a Notice of Publication of the Final Environmental Impact Assessment Report.

To obtain a copy of the Draft Environmental Impact Assessment Report, please contact the Ontario Line project email listed above.

Mark Clancy (T: 416-202-5100, E: ontarioline@metrolinx.com) may be contacted on behalf of Metrolinx.

**Metrolinx
130 Adelaide Street West
Toronto, Ontario

Wildlife and wildlife habitat – significant wildlife habitat – Monarch (Species of Conservation Concern) – in the OLS and OLN Study Areas	<p>Construction</p> <ul style="list-style-type: none"> Disturbance or destruction of habitat used by monarchs <p>Operations</p> <ul style="list-style-type: none"> Potential impacts are not anticipated during operations 	<p>Construction</p> <ul style="list-style-type: none"> Identify opportunities to promote pollinator species and habitat in accordance with the Metrolinx Vegetation Guideline (2020b). This may include planting or seeding native flowering plants in temporarily disturbed areas. Opportunities to plant milkweed or forage vegetation outside of and in the rail RoW will be undertaken, where possible, and in accordance with the Metrolinx Vegetation Guideline (2020b). If vegetation clearing proceeds when monarch larvae may be present (April 1 to September 30), milkweed plants should be inspected for monarch larvae prior to their removal. If larvae are present, they may be moved to a location that is suitable and safe, under the direction of a qualified biologist. Monarch caterpillars may be moved to other milkweed plants; for other larval stages (i.e., eggs and chrysalis). Entire milkweed plants will be transplanted. <p>Operations</p> <ul style="list-style-type: none"> As no impacts are anticipated to significant wildlife habitat for monarch during operations, no mitigation measures are recommended. 	<p>Construction</p> <ul style="list-style-type: none"> Regular monitoring will be undertaken during construction to prevent unauthorized impacts to habitats used by Monarchs. This will include regular inspection to confirm that protection fencing around the habitat remains intact, and that there is no encroachment into the habitat. <p>Operations</p> <ul style="list-style-type: none"> As no impacts are anticipated to significant wildlife habitat for monarch during operations, no monitoring activities are recommended.
Wildlife and wildlife habitat – significant wildlife habitat – common nighthawk (Species of Conservation Concern)	<p>Construction</p> <ul style="list-style-type: none"> Removal of candidate nesting habitat for common nighthawk <p>Operations</p> <ul style="list-style-type: none"> Potential impacts are not anticipated during operations 	<p>Construction</p> <ul style="list-style-type: none"> Refer to mitigation measures described for migratory breeding birds and nests. Demolition of buildings should be scheduled outside the breeding bird season of April 1 to August 31. If this is not possible and buildings must be demolished during this period, the following will be completed: <ul style="list-style-type: none"> The roofs will be checked for presence of gravel. If gravel is not present, then the building is unlikely to provide suitable nesting habitat for common nighthawk. If gravel is present, a search for eggs and nesting activity for common nighthawk on the roof will be conducted. If nests or nesting activity of common nighthawk are confirmed, the building cannot be demolished until it is confirmed by a qualified biologist that young have fully fledged and left the nest. <p>Operations</p> <ul style="list-style-type: none"> As no impacts are anticipated to significant wildlife habitat for common nighthawk during operations, no mitigation measures are recommended. 	<p>Construction</p> <ul style="list-style-type: none"> Regular monitoring will be undertaken to confirm that activities do not encroach into nesting areas or disturb active nesting sites. <p>Operations</p> <ul style="list-style-type: none"> As no impacts are anticipated to significant wildlife habitat for common nighthawk during operations, no monitoring activities are recommended.

Environmental Component	Potential Impact	Mitigation Measure(s)	Monitoring Activities
Wildlife and wildlife habitat – migratory breeding birds and nests, including Species of Conservation Concern (birds).	Construction <ul style="list-style-type: none"> Disturbance or destruction of migratory bird nests, including candidate significant wildlife habitat for the following Species of Conservation Concern birds: <u>OLW and OLS Study Areas</u> Common Nighthawk, Eastern Wood-pewee, Peregrine Falcon, Red-headed Woodpecker, and Wood Thrush Note: In the OLS Study Area, impacts to Peregrine Falcon habitat are not anticipated to the Sheraton Centre since the Ontario Line Subway tracks are tunneled underground adjacent to the building and there are no proposed above ground construction activities within approximately 100 metres from the building. <u>OLN Study Area</u> Black-crowned Night Heron, Common Nighthawk, Great Egret, Peregrine Falcon, Red-headed Woodpecker, and Wood Thrush Operations <ul style="list-style-type: none"> Disturbance or destruction of migratory bird nests during operational vegetation maintenance activities, if applicable 	Construction <ul style="list-style-type: none"> All works must comply with the MBCA, including timing windows for the nesting period (April 1 to August 31). If activities are proposed to occur during the general nesting period, a breeding bird and nest survey will be undertaken prior to required activities. Nest searches by an experienced searcher are required and will be completed by a qualified biologist no more than 48 hours prior to vegetation removal. If a nest of a migratory bird is found outside this nesting period, (including a ground nest) it still receives protection. Bird SAR are also protected by the ESA and migratory bird SAR are protected by the federal <i>Species at Risk Act</i>. Mitigation measures for bird SAR are discussed under the Species at Risk heading. Operations <ul style="list-style-type: none"> All works must comply with the MBCA, including timing windows for the nesting period (April 1 to August 31). If operation vegetation maintenance activities are proposed to occur during the general nesting period, a breeding bird and nest survey will be undertaken prior to required activities. Nest searches by an experienced searcher are required and will be completed by a qualified biologist no more than 48 hours prior to vegetation removal. If a nest of a migratory bird is found outside of this nesting period (including a ground nest), it still receives protection 	Construction <ul style="list-style-type: none"> Regular monitoring will be undertaken to confirm that activities do not encroach into nesting areas or disturb active nesting sites. Operations <ul style="list-style-type: none"> Regular monitoring will be undertaken to confirm that activities do not encroach into nesting areas or disturb active nesting sites.
Wildlife and wildlife habitat – significant wildlife habitat – Turtles and Turtle Habitat, including Species of Conservation Concern – in the OLS and OLN Study Areas	Construction <ul style="list-style-type: none"> Potential for impacts to turtles and/or turtle habitat including confirmed habitat for Northern Map Turtle and candidate habitat for Snapping Turtle near the Lower Don River Operations <ul style="list-style-type: none"> Potential for impacts to turtles and/or turtle habitat during operational vegetation maintenance activities, if applicable 	Construction <ul style="list-style-type: none"> Work in turtle habitat will be planned in consideration of turtle overwintering period which occurs from October 1 to April 30 in any given year. It is also possible that turtle surveys would need to be conducted prior to the work. If required, reptile exclusion fencing will be installed according to the Reptile and Amphibian Exclusion Fencing Best Practices (MNR 2013) and fencing should be inspected daily to ensure it is tight and no species are entangled. Post-construction habitat restoration will be implemented as required. Operations <ul style="list-style-type: none"> Work in turtle habitat will be planned in consideration of turtle overwintering period which occurs from October 1 to April 30 in any given year. It is also possible that turtle surveys would need to be conducted prior to the work. 	Construction <ul style="list-style-type: none"> Onsite inspection will be undertaken to confirm the implementation of the mitigation measures and identify corrective actions, if required. Corrective actions may include additional site maintenance and alteration of activities to reduce impacts. Operations <ul style="list-style-type: none"> Onsite inspection will be undertaken to confirm the implementation of the mitigation measures and identify corrective actions, if required. Corrective actions may include additional site maintenance and alteration of activities to reduce impacts.
Wildlife and wildlife habitat – significant wildlife habitat – snake hibernacula – in the OLN Study Area	Construction <ul style="list-style-type: none"> Disturbance or destruction of reptile hibernaculum Operations	Construction <ul style="list-style-type: none"> Where Project activity occurs adjacent to suitable snake hibernacula, exclusionary fencing will be erected along the activity area to fully isolate the area of activity during the active snake season. In the event that exclusionary fencing cannot be installed, follow-up discussions with the MECP will be required to determine adequate alternative mitigation measure(s). 	Construction <ul style="list-style-type: none"> Monitoring will be undertaken prior to construction to survey exclusionary fencing installation and regular monitoring during construction to survey for snakes potentially trapped in exclusionary areas.

Environmental Component	Potential Impact	Mitigation Measure(s)	Monitoring Activities
	<ul style="list-style-type: none"> Potential impacts are not anticipated during operations 	<ul style="list-style-type: none"> For areas where the hibernacula feature requires removal to facilitate development, the exclusion fencing is to be installed during the active snake season and prior to any construction activities commencing to prevent snakes from entering the feature pre-removal. Any snakes encountered in the exclusion fencing will be relocated outside the fencing and in suitable habitat containing suitable vegetation cover/refuge by a qualified biologist in accordance with the required permit(s) in accordance with the MNR's Reptile and Amphibian Exclusion Fencing (2013). <p>Operations</p> <ul style="list-style-type: none"> As no impacts are anticipated to snake hibernacula during operations, no mitigation measures are recommended. 	<ul style="list-style-type: none"> Continuous monitoring of feature removal will be undertaken during activity. <p>Operations</p> <ul style="list-style-type: none"> As no impacts are anticipated to snake hibernacula during operations, no monitoring activities are recommended.
Wildlife and wildlife habitat – wildlife habitat connectivity	<p>Construction</p> <ul style="list-style-type: none"> Decrease of habitat connectivity for wildlife <p>Operations</p> <ul style="list-style-type: none"> Potential impacts are not anticipated during operations 	<p>Construction</p> <p><u>OLW Study Area</u></p> <ul style="list-style-type: none"> Refer to mitigation measures described for Vegetation Communities, Wildlife and Wildlife habitat. Environmental Component	Potential Impact	Mitigation Measure(s)	Monitoring Activities
Aquatic Habitat			
Aquatic Environment – Wetlands and Waterbodies	<p>Construction</p> <p><u>OLS Study Area</u></p> <ul style="list-style-type: none"> Impacts to riparian vegetation, erosion and sedimentation to waterbodies from construction; risk of contamination to waterbodies as a result of spills. <p><u>OLN Study Area</u></p> <ul style="list-style-type: none"> Removal or impacts to wetland; aquatic and riparian vegetation; degradation of wetlands as result of dewatering and discharge activities; erosion and sedimentation to wetlands/waterbodies from construction; and risk of contamination to wetlands/waterbodies as a result of spills. <p>Operations</p> <ul style="list-style-type: none"> Potential impacts are not anticipated during operations 	<p>Construction</p> <ul style="list-style-type: none"> Construction activities will maintain the buffers established during the design phase to reduce potential negative impacts to wetlands and waterbodies. Shorelines or banks disturbed by construction activities will be immediately stabilized by any activity associated with the project to prevent erosion and/or sedimentation, preferably through re-vegetation with native species suitable for the site. An Erosion and Sediment Control Plan, in accordance with the Greater Golden Horseshoe's Erosion and Sediment Control Guideline for Urban Construction (2006) and the Erosion and Sediment Control Guide for Urban Construction (TRCA 2019), as amended from time to time, will be prepared prior to and implemented during construction to reduce the risk of sedimentation. A Spill Prevention and Response Plan will be developed before work commences so that procedures and policies are in place to reduce impacts to wetlands and watercourses during construction. In wetland areas where vernal pooling occurs, prior to dewatering isolated work areas, wildlife will be captured and relocated to suitable habitat outside of the work area. Vegetation removals will also consider and mitigate potential impacts to wetland communities. Until such a time, that an Ontario Wetland Evaluation System evaluation is completed and evaluated by NDMNRF, unevaluated wetlands will be considered as significant for the purposes of assessing impacts. Wetland communities potentially affected by the Project will be clearly staked out on site. If dewatering is proposed, then it is recommended to be undertaken during the winter when the potential impacts of changes in water levels are less significant in wetland communities. During detailed design, the need for a dewatering zone of influence assessment and dewatering monitoring plan should be evaluated. The dewatering monitoring plan, if required, will monitor for potential negative impacts on nearby wetlands and adjacent vegetation communities to confirm if they would be affected due to dewatering activities. An adaptive management plan will be prepared if negative impacts are observed. Prior to dewatering isolated work areas, fish will be captured and relocated to suitable habitat outside of the work area under a Licence to Collect Fish for Scientific Purposes from the NDMNRF. <p>Operations</p> <ul style="list-style-type: none"> As no impacts are anticipated to wetlands and waterbodies during operations, no mitigation measures are recommended. 	<p>Construction</p> <ul style="list-style-type: none"> Onsite inspection will be undertaken to confirm the implementation of the mitigation measures and identify corrective actions, if required. Dear Adrian and Mariah,

Please find attached a letter inviting participation in the archaeological monitoring of borehole drilling planned to occur in the Lower Don Bridge area as part of the Ontario Line Project.

The date of this fieldwork is tentatively set for March 7, 2022. If you are interested in participating, please let me know as soon as possible and we will work with you and the project team to coordinate.

If you have any questions or concerns, please feel free to reach out to me at any time.

Thank you for your time and assistance.

Jaimi

Delivered by email

Dear Mr. Blake,

RE: Ontario Line Project - Invitation to Participate in Archaeological Monitoring for Borehole Drilling - Lower Don Bridge Area

Metrolinx continues to progress the Archaeological studies for the Ontario Line project and wanted to invite Mississaugas of the Credit First Nation to participate in further Archaeological monitoring for borehole drilling planned for the Lower Don Bridge area.

A Stage 1 Archaeological Assessment (AA) was completed as part of the Ontario Line Environmental Impact Assessment Report (EIAR). This report identified the area for the proposed boreholes as having archaeological potential. Both the Stage 1AA report and the EIAR were shared with Nations, in both August and November 2021.

Metrolinx is completing an Environmental Site Assessment in the Lower Don area (please see **Figure 1**). Given the identified archaeological potential of the area, archaeological monitoring will take place for the planned borehole drilling. This approach will provide for the on-site identification of archaeological resources and, if necessary, stop-work order of drilling by a licensed archaeologist in the event potential archaeological resources are encountered. A licensed archaeologist will be on-site during drilling to visually inspect spoil removed during borehole drilling as well as intermittent borehole samples to visually identify the presence of artifacts. Metrolinx would value any participation that Mississaugas of the Credit First Nation may wish to have in this monitoring program.

Please see the fieldwork details below:

Start Date: March 7, 2022 (potentially March 8 as well depending on drilling)

Duration: 1 day

Start Time: 8:30am

Consultant Company: Stantec

Contact information: Jeffrey Muir - (289) 208-5298

Assessment: Archaeological monitoring for borehole drilling

Size of Field Crew: 1 field supervisor

Parking and meeting location: See Figure 2. Meet and park at yellow star - along Bayview Ave and Mill St

Required PPE:

- Class 2 PPE (hi-viz vest)
- CSA Type 2 Hard Hat with foam insert (bump caps)
- CSA approved eye protection
- CSA approved 6" laced safety shoes
- CSA Hearing protection, in ear or over ear
- Appropriate clothing for weather conditions

Invitation to Participate in Fieldwork

Metrolinx would value the involvement of Mississaugas of the Credit First Nation in the upcoming archaeological monitoring fieldwork outlined above. Should your Nation wish to participate, please let us know at your earliest convenience. We welcome any requests for a meeting to discuss opportunities to participate or to explore this project in more detail with Mississaugas of the Credit First Nation. Upon receipt of Mississaugas of the Credit First Nation's interest in participating, Metrolinx will work to coordinate your Nation's involvement. Metrolinx is also willing to share fieldnotes and/or a summary of the borehole and geotechnical data in addition to the open invitation to participate directly in the monitoring.

Engagement

Regardless of whether or not your Nation participates in the fieldwork, Metrolinx will inform you of discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will also ensure that future Archaeological Assessment reports are provided to your Nation in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries.

If you require additional information or materials, or if you wish to discuss this project in more detail, please contact, Jaimi O'Hara, Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Thank you for your time and consideration.

Yours Truly,

Sarah Chowdhury, Environmental Project Manager

Subject: RE: Ontario Line - Archaeological monitoring for Borehole Drilling

Good day Fallon,

Thank you for reaching out in regards to a invitation to participate with the archaeological monitoring for the Borehole drilling and Geotechnical studies relating to the Ontario Subway Line.

We unfortunately do not have any monitors available as archaeological monitoring is a seasonal position April to December. My concern is in the areas to have known archaeological potential, is there a strategy for those areas that consulting archaeologist has proposed, I would like a copy of that report.

I definitely have interest in Archaeological updates daily along with the recommendation for that area as the boreholes are completed . If and when winter archaeology is completed the conditions of the ground have to meet standard.

Will they be borehole drilling with a licenced Archaeologist present and what consulting company is completing the fieldwork?

Kind Regards,

Tanya Hill-Montour BA (Hons)
Archaeology Supervisor
Six Nations Lands & Resources

Subject: Ontario Line - Archaeological monitoring for Borehole Drilling

Dear Lonny and Team,

I am sharing the following with the whole team as this lands somewhere between environmental and archaeology.

Please find attached a letter inviting participation in upcoming archaeological monitoring for borehole drilling that is taking place at various locations to support environmental assessment and geotechnical studies related to the Ontario Line Subway project. The boreholes are being drilled in locations that have known archaeological potential and as such Metrolinx is ensuring that a consultant archaeologist is on-site to monitor. We'd like to extend this invite to your Nation as well. We appreciate that during these uncertain times of COVID-19 this may not be possible or safe for your Nation. We are happy to provide any fieldnotes taken by the consultant archaeologist and/or provide a summary of the data collected if this is at all helpful to you. Please let us know if there is any other way we can support your Nation during this time.

The boreholes are anticipated to be completed over the next several weeks beginning this Friday on **January 22, 2021**. Please let me know if you have interest in participating as soon as possible, and we will work with you and the project team to coordinate.

Miigwetch,

Fallon

Subject: Update on Ontario Line Borehole Drilling - Corktown archaeological monitoring

Hi Tanya,

I tried calling you and left a voicemail. I wanted to confirm that the borehole drilling for tomorrow will be taking place at 271 Front Street East for the Ontario Line Project (as outlined in the letter sent to you on January 19th, 2021). Work did proceed today, however we were unable to have any monitors on site due to contractual issues with liability and waivers. This has now been resolved and we apologize for any inconvenience. We will ensure that this is not an issue again moving forward.

Paul Ritchie from Stantec will be reaching out to you shortly with the details and logistics for tomorrow's drilling and to confirm if you will be sending a monitor. Please do not hesitate to contact me if you need anything further.

Thanks,
Jaimi

Dear Lonny & Team,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. Attached you will find a letter providing an update on the project. The purpose of this letter is to:

- Provide an update on the scope of the project work
- share the initial draft of the Early Works Report for the proposed Corktown Station
- Invite your Nation to participate in upcoming archaeological fieldwork

In an effort to streamline your review, we draw your attention to the attachment which provides an overview of the expected environmental impacts and proposed mitigations, as we know this may be of specific interest to you.

Metrolinx is also preparing a letter specific to works being planned within the Don Valley as we recognize the significance of this waterway to many Nations. We hope to share that letter soon. We are happy to meet with your Nation to discuss the Ontario Line and address any questions or concerns that your Nation may have.

We ask that any comments on the draft Corktown Station Early Works Report be provided no later than **April 15, 2021**. Please note that the Noise and Vibration Report, which will be part of the Early Works Report is still being prepared and we will share with your Nation by March 19, 2021.

The draft Corktown Station Early Works Report is available at the following link:

Please let us know as soon as possible if your Nation has interest in participating in future archaeological fieldwork.

We appreciate the volume of documents that Metrolinx has shared with your Nation.

If you have any questions or concerns, please do not hesitate to contact me.

Miigwetch,

Fallon

Subject: Ontario Line Project - Invitation to Meet & provide input on First Parliament Site
Date: Monday, April 12, 2021 4:06:59 PM
Attachments: [First Parliament_SNGR.pdf](#)

Dear Lonny and Team,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. We recently communicated with your Nation about the proposed Corktown Station which is along the planned alignment of the Ontario Line. This location includes parcels of land which were once the site of Upper Canada's First Parliament buildings. Metrolinx and its partners are exploring opportunities to commemorate the history of this site, and have been engaging with various parties including the City of Toronto and the Mississaugas of the Credit First Nation, on whose treaty territory this project is occurring.

Given the significant chance of recovering Indigenous and European artifacts during the Corktown Station Early Works, a detailed archaeological workplan is being developed. Metrolinx recognizes the importance and value of Indigenous monitors for any archaeology related to the Ontario Line Project. In our previous communication, an invitation was included for your Nation to participate in any archaeological fieldwork and monitoring during the Corktown Station Early Works, including demolition of modern buildings currently on the First Parliament site.

This work is anticipated to commence in Fall 2021, and if you have not yet expressed interest in participating, please feel free to do so at your earliest convenience. As a reminder any comments on the draft Corktown Station Early Works Report should be provided no later than **April 15, 2021**.

Metrolinx recognizes that the history of this location extends beyond European use, and as such, wants to take the opportunity to understand any significance it may have to Indigenous Nations. Metrolinx would like to meet with your Nation to discuss the First Parliament site, its commemoration, as well as review the broader Ontario Line project if you wish. We recognize that traditional knowledge of this area may be sacred and/or not appropriate to be shared, but would appreciate any information that may be appropriate for Metrolinx to consider.

This letter is not intended to replace engagement but to provide a high level summary for your information. We would very much appreciate meeting with your Nation to discuss in more detail. We are hoping to reprise our regular meetings at your earliest convenience and perhaps this could be the next agenda item.

We appreciate the volume of documents that Metrolinx has shared with your Nation. If you have any questions or concerns, please do not hesitate to contact me.

Miigwetch,

Fallon

Chief Mark Hill
c/o Lonny Bomberry, Director, Lands & Resources
Six Nations of the Grand River
1695 Chiefswood Road
Ohsweken, ON N0A 1M0
Delivered by Email

Dear Mr. Bomberry,

RE: Ontario Line Project - First Parliament Site and Lime Kiln Site

Metrolinx, a regional transportation agency, is helping to transform the way the Greater Golden Horseshoe moves by building a fast, convenient and integrated transit network. As part of this work, Metrolinx is continuing the pre-construction planning of the Ontario Line which will bring nearly 16 kilometres of subway service to Toronto.

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Six Nations of the Grand River. Metrolinx appreciates and respects Six Nations of the Grand River's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to share with Six Nations of the Grand River information regarding Corktown Station early works and additional information regarding upcoming field visits and investigations at the Corktown Station early works site, which includes two registered archaeological sites, the First Parliament site and the Lime Kiln site.

Project Description

The proposed Ontario Line is a new 16-kilometer subway line, which will occupy an exclusive right-of-way system encompassing a combination of below-grade, above-grade, and at-grade alignment. The route (Figure 1) will run from Ontario Place/Exhibition through downtown Toronto to the Ontario Science Centre in the City of Toronto, with six (6) potential interchange stations and 17 new connections to GO Transit, existing subways and streetcars. More information on the Project can be found on our website: www.metrolinx.com/ontarioline

Corktown Station Early Works

As communicated in the letter sent to Six Nations of the Grand River on March 11, 2021, the Corktown Station site has been identified for launching tunnel excavation equipment for the downtown and Don Yard segments of the proposed Ontario Line alignment, as well as the location of the Corktown Station. The First Parliament and Lime Kiln Sites, located within the Corktown Station area, are known archaeological sites which require additional archaeological study ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures, followed by completion of necessary archaeological studies, is required. Completion of this preparatory work on an expedited basis is essential to allow for the timely delivery of the overall Project and is anticipated to begin in the Fall 2021, subject to the completion of the Corktown Station early works process in accordance with Ontario Regulation 341/20: Ontario Line Project.

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These activities will enable completion of environmental due diligence investigations, including archaeological assessments. These activities will occur on properties within the Corktown Station early works project footprint, as shown in **Figure 1**.

Figure 1: Map of Corktown Station Early Works

Environmental impacts of Corktown Station early works are being assessed in accordance with O. Reg. 341/20. Metrolinx shared the draft Corktown Station Early Works Report and associated discipline reports with Six Nations of the Grand River on March 11, 2021 and had requested any comments to be provided by April 9, 2021.

Archaeological Work at the First Parliament Site and Lime Kiln Site

Metrolinx appreciates the significance of archaeology to Six Nations of the Grand River. The properties at 265 Front Street East, 271 Front Street East, and 25 Berkeley Street, in the St. Lawrence neighbourhood of the City of Toronto, are collectively host to the First Parliament Site. It is located on the southwest corner of Parliament Street and King Street, between Parliament Street and Berkeley Street. The First Parliament Site is a registered archaeological site (AjGu-41) which may include resources associated with the First and Second Parliament Buildings, the Home District Gaol, and Consumers' Gas company buildings. The surface of the property is currently occupied by automotive businesses, including a car dealership, car wash, and surface parking lot. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and remnants of early Toronto industry may be found at this site.

North of the First Parliament Site is another registered archaeological site (AjGu-64), the Lime Kiln Site, which includes remains from the Toronto Lime Works Company. A variety of structural features, in various states of preservation, have been documented on this site. The location of the Lime Kiln Site and the First Parliament Site are shown in **Figure 2**.

Figure 2: Location of First Parliament Site and Lime Kiln Site Areas

The First Parliament Site and Lime Kiln Site require additional archaeological studies ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures is necessary. Completion of this preparatory work is essential to allow for the timely delivery of the Ontario Line.

Archaeological fieldwork to remove or protect archaeological resources is anticipated to commence in early Fall 2021, and a workplan for these archaeological investigations is under development. As mentioned in the letter sent on March 11, 2021, Six Nations of the Grand River is invited to participate in all archaeological fieldwork, and to review and provide comments on forthcoming reports.

Feedback on Commemoration of First Parliament Site

Metrolinx appreciates that the history of the First Parliament site is not one simply of Canadian origin, but rather holds longer history and tradition. Metrolinx also appreciates that the site of the First Parliament of Upper Canada is linked to a history of colonization and harmful practices towards Indigenous Peoples. Given the significance of this site, Metrolinx is engaging with Indigenous Nations, City of Toronto and the broader community to identify opportunities for commemoration. Metrolinx is committed to ensuring that any feedback from Six Nations of the Grand River regarding the significance of this site is considered as part of this commemoration. Metrolinx appreciates that traditional or cultural knowledge about this site may be sacred and/or not be appropriate to be shared but welcomes any comments or ideas from Six Nations of the Grand River that may be appropriate to commemorate Indigenous Peoples.

Engagement

Metrolinx is committed to an open, respectful, and transparent relationship with Six Nations of the Grand River. We would like to meet with Six Nations of the Grand River to better understand any significance the First Parliament site may have to your Nation. We are also happy to assist in reviewing the Corktown Station Early Works Report or reviewing the proposed archaeological workplan for this site. If Six Nations of the Grand River requires additional information or materials, or you wish to discuss this project in more detail or set up a meeting, please contact Fallon Melander, Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*. Thank you for your time in reviewing these assessments.

Thank you for your time in reviewing this letter.

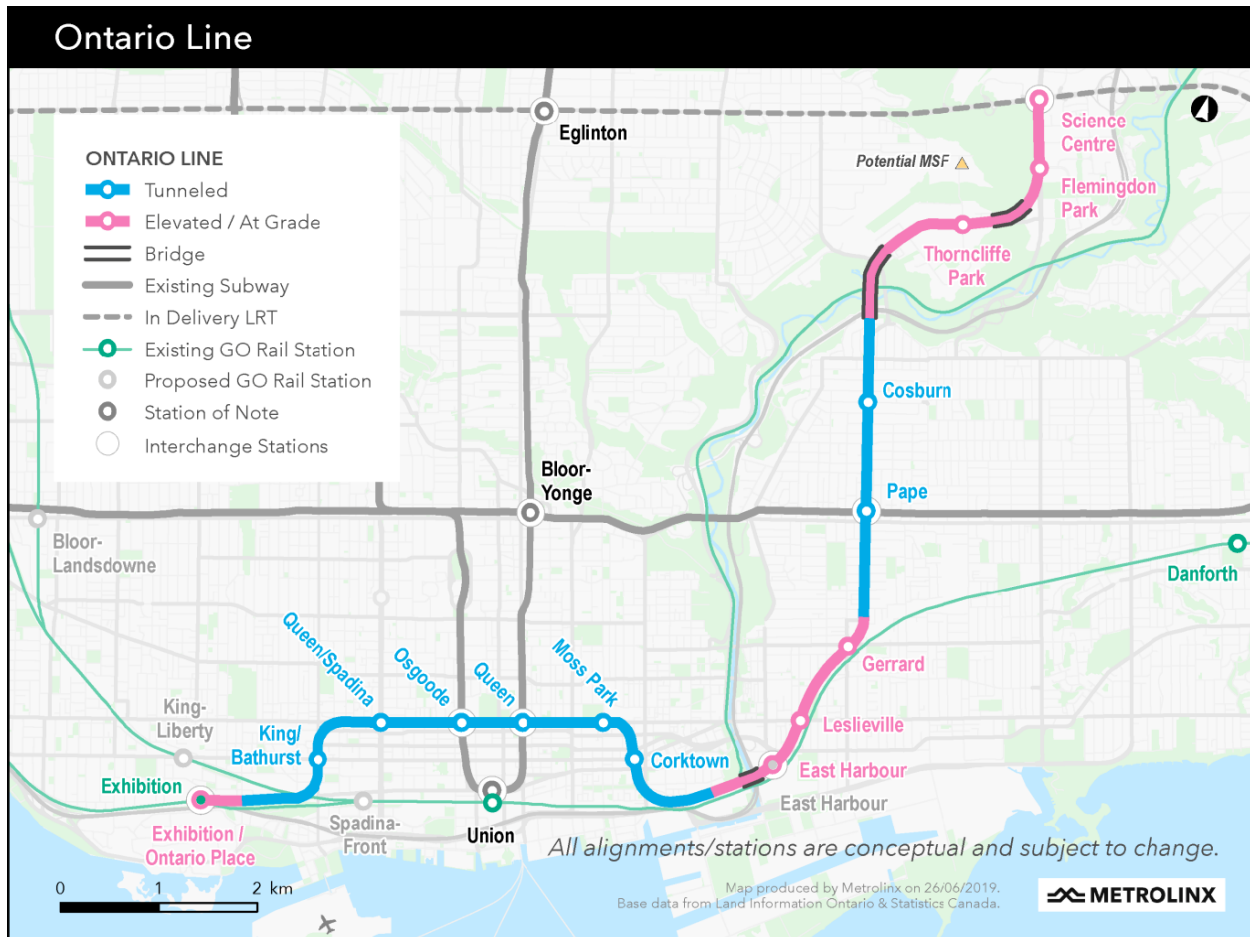

Yours Truly,

Subject: Ontario Line - Project Update - Don Valley and River - Invitation for Participation in Stage 2 Archaeological Fieldwork
Date: Friday, April 30, 2021 1:31:17 PM
Attachments: [OL-Don River Letter 2021_SNGR.pdf](#)

Dear Lonny and Team,

Metrolinx continues to progress its environmental studies for the Ontario Line Project. We wanted to keep you aware that part of the project scope falls within the Don Valley and River System, and we recognize the importance of Valley and the waters within. Attached you will find a letter providing an update on the project and information regarding the planned work and environmental assessments that are anticipated to take place within the Don Valley. We also wanted to invite your Nation to participate in the planned Stage 2 Archaeological Assessments that are anticipated to occur as part of the upcoming field season.

This letter is not intended to replace engagement but to provide a high level summary for your information. We would very much appreciate meeting with your Nation to discuss in more detail. Please let me know if you have any questions or concerns.

Delivered by Email

Dear Mr. Bomberly,

RE: Ontario Line Project - Don River Crossings & Stage 2 Archaeological Assessment Update

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Six Nations of the Grand River. Metrolinx appreciates and respects Six Nations of the Grand River's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to provide more information to Six Nations of the Grand River about the Ontario Line crossings of the Don River and its tributaries. Metrolinx appreciates the significance of the waters and wishes to better understand how the potential impacts of construction around the Don River may be of interest to Six Nations of the Grand River.

Background

The Project is a new subway line with connections to Line 1 (Yonge-University) subway service at Osgoode and Queen Stations, Line 2 (Bloor-Danforth) subway service at Pape Station, and Line 5 (Eglinton Crosstown) service at the future Science Centre Station. Fifteen stations are proposed, with additional connections to three GO Transit lines (Lakeshore East, Lakeshore West and Stouffville), and the Queen, King, Bathurst, Spadina, Harbourfront and Gerrard/Carlton streetcar routes. The Project will reduce crowding on Line 1 and provide connections to new high-order rapid transit neighbourhoods. More information on the Project can be found on our website: <http://www.metrolinx.com/ontarioline>.

Work in the Don River System

As part of the Ontario Line Project, the following four crossings within the Don River system are proposed:

- Location 1: Lower Don River Crossing (Lower Don Bridge);
- Location 2: Millwood Road Crossing;
- Location 3: Walmsley Brook Crossing; and
- Location 4: West Don River Crossing north of Overlea Boulevard.

Locations 1-4 are shown in **Figure 1** and described in further detail below.

Figure 1: Ontario Line Project - Proposed Don River System Crossings

The environmental assessment for the Ontario Line Project is being completed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20) made under the *Environmental Assessment Act*. Construction of the Lower Don Crossing (Location 1) will be assessed in the Lower Don Bridges and Don Yard Early Works Report, that is anticipated to be shared with Six Nations of the Grand River in summer 2021. Construction of the other three crossings (Locations 2-4) will be assessed in the Environmental Impact Assessment Report, that is planned to be shared with Six Nations of the Grand River in early 2022.

Location 1: Lower Don River Crossing (Lower Don Bridge)

A new bridge is planned to be built on the north side of the existing Lakeshore East rail bridge at the Lower Don River, with space for Ontario Line tracks going in both directions. We are also planning pedestrian and cycling connections across the Lower Don River.

Location 2: Millwood Road Crossing

The underground section of the Ontario Line running under Pape Avenue will emerge from the southern embankment of the Don Valley on an elevated guideway crossing the Don River, west of the Leaside Bridge (Millwood Road). The elevated guideway will connect to Thorncliffe Park in the north.

Location 3: Walmsley Brook Crossing

An elevated guideway will cross the Walmsley Brook tributary of the West Don River north of Pat Moore Drive. The guideway will then continue east across Beth Neilson Drive.

Location 4: West Don River Crossing (north of Overlea Boulevard)

The elevated guideway will cross the West Don River, north of Overlea Boulevard. This section of the route will connect to Don Mills Road and the future Flemingdon Park Station.

Field Surveys and Studies

As project planning is still in progress, environmental field surveys and studies as well as the timing of this work are being determined. Environmental field surveys and studies that may occur within or near the Don River include Stage 2 archaeological assessment and natural environment surveys (e.g., Species at Risk and tree surveys). Studies, surveys and their timing will be confirmed as project planning progresses. Further details are anticipated to be available in mid-Summer 2021.

Update on Archaeology

Metrolinx is currently planning to undertake Stage 2 Archaeological Assessments (AA) near the Don River starting in Fall 2021. The Stage 2 AA investigations will assess areas of identified archaeological potential within the Ontario Line study area which may be affected by the construction of the Project. Stage 2 AA fieldwork consists of test pit surveys at 5 m intervals within areas of previously identified archaeological potential.

Metrolinx would appreciate any interest Six Nations of the Grand River may have in participating in the Stage 2 AA fieldwork. Some of the Stage 2 AA may occur on lands

within the Toronto and Region Conservation Authority's (TRCA) property boundaries and regulated area. Metrolinx will coordinate with TRCA to ensure that Indigenous Nations are provided the opportunity to participate in Stage 2 AA investigations. Upon receipt of Six Nations of the Grand River's interest in participating, Metrolinx will work to coordinate your Nation's involvement.

As Metrolinx continues to undertake environmental due diligence for this project, additional archaeological assessment reports are anticipated to be completed. Metrolinx will ensure that Six Nations of the Grand River will be made aware of and engaged regarding any future archaeological assessments, and especially the discovery and preservation of Indigenous artifacts. Metrolinx will also ensure that future archaeological assessments are provided to Six Nations of the Grand River in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries

Invitation for Input

We are committed to an open, respectful, and transparent engagement with Six Nations of the Grand River. We recognize the potential significance of this project to Six Nations of the Grand River and wanted to keep you apprised of this project. We welcome meeting in the near future to discuss this project and its possible impacts and ways to appropriately engage with Six Nations of the Grand River.

We are happy to address any questions that Six Nations of the Grand River may have about the work proposed in the Don River system or the Ontario Line Project as a whole. If you require additional information or materials, or if you wish to discuss this Project in more detail or set up an in-person meeting, please contact Fallon Melander, Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Metrolinx thanks you for the time in reviewing this letter. Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*.

Yours Truly,

Subject: RE: Ontario Line Project – Archaeological Monitoring for Borehole Drilling - 265 Front St East - SN

Dear Mr. Bomberry,

Please find attached a letter inviting participation in upcoming archaeological monitoring for borehole drilling that is taking place next week at 256 Front Street in Toronto to support environmental assessment and geotechnical studies related to the Ontario Line Subway project. The boreholes are being drilled in locations that have known archaeological potential and as such Metrolinx is ensuring that a consultant archaeologist is on-site to monitor. If you are not able to attend, we are happy to provide any fieldnotes taken by the consultant archaeologist and/or provide a summary of the data collected if this is at all helpful to you.

The boreholes are anticipated to be completed between July 12 and July 16, 2021. Please let me know as soon as possible if you have interest in participating, and we will work with you and the project team to coordinate. And just a final note for your information, both Fallon Melander and Jaimi O'Hara, who are usually Metrolinx's main point of contact with

your Nation, are away from the office this week. Hence you are receiving this communication from me.

Miigwetch,

Make today great,

Christine Parris (she, her, hers)

Dear Lonny, Dawn and Tanya,

Our deepest apologies, disregard the previous email, there was a last minute change to the letter-**please refer to the updated letter (attached)**.

Metrolinx is working with its consultant HDR to provide opportunities for participation in upcoming Archaeological Assessment and Natural Environment fieldwork associated with the Ontario Line. Please find attached a letter inviting your Nation to participate.

The fieldwork is anticipated to late August - early September 2021. Please let me know if you have interest in participating as soon as possible, and we will work with you, the project team and HDR to coordinate.

If you have any questions or concerns, please feel free to contact the Indigenous Relations Office at anytime.

Miigwetch,

Make today great,

Delivered by Email

Dear Mr. Bomberly,

RE: Ontario Line Project - Update on Archaeological Assessments and Natural Environment Surveys

Metrolinx and its consultant, Stantec and HDR, will be undertaking Archaeological Assessment and Natural Environment fieldwork associated with the Ontario Line Project. We appreciate Six Nations of the Grand River's interest in participating in these studies. The following letter provides details about the anticipated surveys to support the planning and coordination of involvement by your Nation.

Invitation to Participate in Fieldwork

Metrolinx would appreciate any interest Six Nations of the Grand River may have in participating in the archaeological fieldwork. Upon receipt of Six Nations of the Grand River interest in participating, Metrolinx will work to coordinate your Nation's involvement.

Update on Archaeology

Metrolinx is planning to undertake various Archaeological Assessments for the Ontario Line Project. This archaeological investigation will assess areas of identified archaeological potential, which may be potentially affected by the construction of the Project. The archaeological works are planned to begin in **September 2021**. Fieldwork dates may change based on field progress and weather.

Metrolinx would appreciate any interest Six Nations of the Grand River may have in participating in the archaeological fieldwork. Upon receipt of Six Nations of the Grand River interest in participating, Metrolinx will work to coordinate your Nation's involvement.

As Metrolinx continues to undertake environmental studies for this project, additional archaeological assessment reports are anticipated to be completed. Metrolinx

acknowledges that Six Nations of the Grand River will be made aware of and engaged regarding any future archaeological assessments, and especially the discovery and preservation of Indigenous artifacts and sacred burial grounds. Regardless of whether or not your Nation participates in the fieldwork, Metrolinx will inform you of discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will also ensure that future Archaeological Assessment reports are provided to Six Nations of the Grand River in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries.

Natural Environment Field Surveys

Metrolinx is conducting natural environmental studies to review and document existing conditions within the Study Area and to carry out impact assessment reporting. Most of the natural environment fieldwork for Ontario Line is planned to occur in 2022.

However, the surveys detailed in the table below are planned for this year and include butternut survey, tree inventory and aquatic habitat assessment. Please note that these are approximate dates and may be subject to change pending appropriate weather conditions and field survey requirements. Metrolinx will endeavour to keep Six Nations of the Grand River apprised as the work unfolds.

Survey	Date(s)
Butternut Health Assessments (Areas detailed in Figures 1 and 2)	• August, September/2021
Tree Inventory (Areas detailed in Figures 1 and 2)	• September/2021
Aquatic Habitat assessment (Don and West Don ravine areas)	• September/2021

Engagement

If your Nation requires additional information or materials, or if you wish to discuss this project in more detail or set up an in-person meeting, please contact Jaimi O'Hara, Acting Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*.

Yours Truly,

Delivered by Email

Dear Mr. Bomberly,

RE: Ontario Line Project - Lower Don Bridge Marine Archaeological Overview Assessment for Review

Metrolinx wishes to build a strong and respectful relationship with Six Nations of the Grand River. Metrolinx appreciates and respects Six Nations of the Grand River's desire to be appropriately informed and aware of projects. Metrolinx wishes to share with you the development of the Marine Archaeological Overview Assessment (MAOA) report for the proposed construction of the Lower Don Valley Bridge over the Don River. This proposed bridge is a component of the Ontario Line Project as part of the Lower Don Bridge and Don Yard Early Works. We invite Six Nations of the Grand River's feedback on the marine Archeological Overview Assessment prepared for the Ontario Line Project.

Project Description

The Ontario Line will bring 15.6 kilometres of subway service to Toronto. The Ontario Line will stretch from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line will have 15 new stations, including six interchange stations, connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable service.

Lower Don Bridge and Don Yard Early Works

The Lower Don Bridge and Don Yard early works are planned for where the Ontario Line will run alongside GO train operations. These early works will set the groundwork for other major construction on the Ontario Line project and include:

- building a new bridge north of the existing rail bridge over the Lower Don River that will carry the Ontario Line tracks;
- shifting GO tracks in the Don Yard and nearby rail corridor to accommodate Ontario Line infrastructure;
- modifying the existing rail bridge to accommodate GO track shifts and Ontario Line infrastructure; and
- relocating and protecting utilities and signal infrastructure in the area.

10 Bay Street
Toronto, ON M5J 2N8

The location of the Lower Don Bridge and Don Yard early works project footprint and study area can be viewed in **Figure 1** below.

Figure 1: Map of Lower Don Bridge and Don Yard Early Works

Marine Archaeological Overview Assessment

On behalf of Metrolinx, Stantec has undertaken a Marine Archaeological Overview Assessment for the proposed Lower Don Bridge. The purpose of the Marine Archaeological Overview Assessment is to determine the marine archaeological potential of the study area for the bridge shown in **Figure 2** below.

The proposed bridge will cross over the Don River on the north side of the existing GO Transit Lakeshore East rail bridge. As a result, a large portion of the study area overlaps with the Don River. While the bridge will have no permanent in-water components, Metrolinx anticipates that in-water construction activities may impact potential submerged cultural resources. The marine archaeological potential of the study area is being considered as part of the Marine Archeological Overview Assessment.

The assessment determined that despite the study area for the Lower Don Valley Arch Bridge Superstructure having indicators of marine archaeological potential, there has been extensive river-bed disturbance to date. The riverbed has been previously disturbed by engineered

channeling, modern dredging, and modern construction. The assessment determined that the study area retains low to no potential for the identification and documentation of in situ Indigenous and Euro-Canadian marine archaeological resources. As a result no further marine archaeological work is required for the study area.

A copy of the marine Archeological Overview Assessment has been included in the Dropbox link for your review. Please provide any comments you may have by **November 19, 2021**.

Invitation for Input

We are committed to an open, respectful, and transparent engagement with Six Nations of the Grand River. Metrolinx values any input that Six Nations of the Grand River is willing to provide on the Marine Archaeological Overview Assessment report.

We are happy to meet with your Six Nations of the Grand River to go over the project and development of the Marine Archaeological Overview Assessment report and answer any questions Six Nations of the Grand River may have on the report or the project as a whole.

If you require additional information or materials, or if you wish to discuss this project in more detail or set up a meeting, please contact Jaimi O'Hara, Acting Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Please submit your feedback in writing by **November 19, 2021**.

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*, except where information is provided to Metrolinx in confidence, pursuant to section 15.1.

Delivered by Email

Dear Mr. Bomberly,

**RE: Ontario Line Project - Stage 2 Archaeological Assessment - Moss Park and Ordnance Park
Invitation to Participate in Archaeological Fieldwork**

Metrolinx and its consultant, Stantec continue to progress the archaeological studies for the Ontario Line project and wanted to invite Six Nations of the Grand River to participate in Stage 2 Archaeological Assessments planned to occur at Moss Park and Ordnance Park in the upcoming weeks. The locations of Moss Park and Ordnance Park study areas can be viewed in **Figure 1 and 2** below.

Moss Park and Ordnance Park have been previously assessed in a desktop study, the *Ontario Line Stage 1 Archaeological Assessment Report - South* which was shared with Six Nations of the Grand River in March 2020 and was subject to an Addendum shared with Six Nations of the Grand River in February 2021. The Stage 1 report recommended that a Stage 2 archaeological assessment is required for Moss Park and Ordnance Park parcels.

The Stage 2 archaeological field work will be conducted by test pit survey, in accordance with the Ministry of Heritage, Sport, Tourism and Culture Industries' (MHSTCI) 2011 *Standards and Guidelines for Consultant Archaeologists*. The Stage 2 test pit survey method consists of hand excavating test pits by shovel at a five-metre interval on the park lands. The test pits are at least 30 centimetres in diameter and dug through the topsoil (which has a variable depth generally between 15 and 25 centimetres, but may be deeper or shallower) and at least five centimetres into subsoil. Once complete, test pits will be backfilled. Areas disturbed by utility infrastructure or recent construction will not be surveyed but will be photo documented. Based upon the Stage 2 field work, subsequent archaeological investigations may be recommended depending on what is found during the Stage 2 test pit survey.

Please see the fieldwork details below:

MOSS PARK:

Start Date: Tentatively October 25, 2021. If the start date changes, we will reach out to you.

Duration: Approximately two to three days

Start Time: 8am

Consultant Company: Stantec

Contact information: Jeffrey Muir - (289) 208-5298; Heather Kerr - (416) 602-3271; Patrick Hoskins - (613) 716-4687

Assessment: Stage 2 Archaeological Assessment

Meeting Location Address: 150 Sherbourne St

Size of Field Crew: 2 (1 Field director, 1 field tech)

Parking location: Above-ground parking lot at the southwest corner of Jarvis Street and Queen Street East; approximate three minute walk

ORDNANCE PARK

Start Date: Work on Ordnance Park will begin after the Moss Park work is completed

Duration: Approximately two weeks

Start Time: 8am

Consultant Company: Stantec

Contact information: Jeffrey Muir - (289) 208-5298; Heather Kerr - (416) 602-3271; Patrick Hoskins - (613) 716-4687

Assessment: Stage 2 Archaeological Assessment

Size of Field Crew: 4 (1 Field director, 3 field techs)

Required PPE:

Item	Specifications
Clothing and Attire	Loose clothing, long hair, dangling accessories, jewelry, or other similar items that are likely to be a hazard will not be worn unless they are tied, covered, or otherwise secured so they prevent the hazard.
Foot Protection	Canadian Standards Association (CSA) approved work boots (Steel-toed boots, minimum 6" from top of sole, grade 1 with sole protection [CSA Standard Z195-09]).
Hand Protection	Cut, puncture, and abrasion-resistant gloves shall be worn when conducting archaeological hand digging and screening activities.
Eye and Face Protection	CSA approved safety glasses with rigid side shields. Regular prescription glasses are not permitted unless they are designed as CSA safety glasses complete with rigid shields. An ASTM level 1 (or higher) face covering is mandatory.
Head Protection	CSA approved Type II, Class E (side impact) hard hat. Hard hats shall be worn with the brim pointed forward.
Hearing Protection	Not needed.
High Visibility Safety Apparel	Mandatory class 2, level 2 High Visibility Safety Apparel (HVSA). Full length sleeves and pants with reflective stripes on both arms and legs are required.
*Although not considered PPE, face coverings for COVID-19 shall be worn when applicable	

Invitation to Participate in Fieldwork

Metrolinx would appreciate any interest Six Nations of the Grand River may have in participating in the archaeological monitoring fieldwork. Upon receipt of Six Nations of the Grand River's interest in participating, Metrolinx will work to coordinate Six Nations of the Grand River's involvement.

Engagement

Regardless of whether or not Six Nations of the Grand River participates in the fieldwork, Metrolinx will inform you of discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will also ensure that future Archaeological Assessment reports are provided to your community in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries.

If Six Nations of the Grand River wishes to participate in the fieldwork, or if you'd prefer to receive fieldnotes and/or a summary of the borehole and geotechnical data, please let us know at your earliest convenience. If you require additional information or materials, or if you wish to discuss this project in more detail or set up an in-person meeting, please contact, Indigenous Relations at Metrolinx. We can be contacted at IndigenousRelations@metrolinx.com.

Dear Tanya,

Thank you for your interest and participation in the archaeological fieldwork at the First Parliament site as part of the Ontario Line project.

As you're aware, the archaeological program is now underway with Indigenous monitors on site. Some inclement weather events at the onset of this work has resulted in some delays to our schedule. To compensate for this, Metrolinx is looking to extend archaeology work to Saturdays from 8am-3pm for the remainder of this field season (approximately late November). This would commence on October 23rd.

Metrolinx welcomes continued participation from SNGR on Saturdays. Please confirm that a monitor from your Nation will be present on these additional days.

If you have any questions or concerns, please let me know at your earliest convenience.

Thank you
Jaimi

To: Peter Graham <petergraham@sixnations.ca>
Subject: RE: Corktown Station Interpretation and Commemoration Plan

Hello Peter,

Thank you for your response. We have asked the project team to begin to address your questions. Jaimi can work with you to coordinate a meeting in the coming weeks to support further discussion on the interpretation and commemoration plan for the First Parliament site. Additionally, I wanted to bring to your attention that Metrolinx is arranging site visits for interested individuals. Tanya Hill-Montour has been invited, but we extend the invitation to you and anyone else from Six Nations of the Grand River who might like to attend. It is likely that the site visit will occur during the week of November 15th.

Regards,

David

Hello David,

I would like to have a future meeting on this subject, though later may be better than sooner. What's your timeline for feedback?

Aside from the two First Parliament documents, are there other materials you could send me about this project? I understand there's a provincial plan for the property which was released in April.

Thank you,

Peter Graham
Land Use Officer

Dear Lonny and Team,

Please find enclosed, a letter providing an overview of the Metrolinx application for a permit under the Endangered Species Act to support the Ontario Line Project. We have also attached two appendices for your review.

We value building a relationship with your Nation which we recognize requires transparency and meaningful engagement. Please let me know if you have any further questions or would like to meet to discuss this permit, the Ontario Line Project or any other Metrolinx projects.

Thank you,

Jaimi O'Hara

Chief Mark Hill
c/o Lonny Bomberly, Director, Lands & Resources
Six Nations of the Grand River
1695 Chiefswood Road
Ohsweken, ON N0A 1M0
Delivered by Email

Dear Mr. Bomberly,

**RE: Ontario Line Project - Species at Risk 17(2)(d) Permit Amendment Under the
*Endangered Species Act***

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with Six Nations of the Grand River. Metrolinx appreciates and respects Six Nations of the Grand River's desire to be appropriately informed and aware of projects. To that end, Metrolinx is sharing with Six Nations of the Grand River information regarding the Species at Risk (SAR) 17 (2) (d) Permit under *the Endangered Species Act* (ESA, 2007) obtained in support of the Ontario Line Project, and the proposed amendment to this permit.

Project Description

Metrolinx, a regional transportation agency, is helping transform the way the Greater Golden Horseshoe region moves by building a fast, convenient, and integrated transit network. As part of this work, Metrolinx is proceeding with the Ontario Line Project which will bring 15.6 kilometres of subway service to Toronto.

Ontario Line Permit #CR-D-002-19

Metrolinx, as part of the Ontario Line Project, previously received approval for a 17(2)(d) permit (Permit #CR-D-002-19) under the *Endangered Species Act* (ESA, 2007) issued by the Ministry of the Environment, Conservation, and Parks (MECP) on August 10, 2020. The permit provides approval for those project activities that may have adverse impacts on identified Species at Risk (SAR) and/or their habitat. The permit allows for those activities to take place and provides direction to Metrolinx regarding mitigation measures and compensation requirements that would be necessary to support those impacted species to support no net loss.

To inform this permit, Metrolinx completed SAR screening through the Ontario Line Environmental Conditions Report and Natural Environment Report using various information sources. While the results of this screening were shared within the initial draft of the Environmental Conditions Report circulated to Six Nations of the Grand River on June 15 2020, Draft Environmental Conditions Report circulated on September 17 2020 and Final Environmental Conditions Report circulated on November 30 2020, we regret that we did not engage with Six Nations of the Grand River directly on the screening process or the findings.

Potentially Impacted Species and Summary of Permit Conditions and Requirements

Based on the SAR screening completed to date, some activities required to support the Ontario Line Project may result in the following species at risk being impacted:

- Bank Swallow - Threatened
- Barn Swallow - Threatened
- Blanding's Turtle - Threatened
- Butternut - Endangered
- Chimney Swift - Threatened
- Little Brown Myotis - Endangered
- Northern Myotis - Endangered
- Small-footed Myotis - Endangered
- Tri-colored Bat - Endangered

Activities that may result in impacts to species listed above are associated with project construction and include activities such as removal or alteration of SAR habitat features (e.g., structures that may support SAR bird nesting, and trees).

Prior to commencing any activities that may impact SAR and/or SAR habitat, Metrolinx will complete species-specific screening for areas where project activities are planned to take place, and, if necessary (if screening determines that SAR/SAR habitat is likely to be present), surveys to detect SAR and SAR habitat presence and conduct an impact assessment if presence is confirmed, to characterize species-specific impacts (e.g., amount of habitat removed).

Metrolinx will meet the ESA permit conditions such as implementing species-specific mitigation measures, monitoring their effectiveness, and taking corrective action as required. Species-specific mitigation measures include scheduling activities to take place outside of species-specific timing windows (e.g., outside of active season or breeding window), implementing exclusion measures to prevent individuals of certain species from being impacted by project activities, and others.

If project activities result in SAR habitat removal, Metrolinx will implement species-specific compensation measures such as creating habitat (e.g., nesting habitat features replacing habitat features removed). Compensation habitat will be regularly monitored, and appropriate corrective actions will be taken as required to ensure habitat functions as intended.

Proposed Permit Amendment

Metrolinx is proposing an amendment to the previously approved SAR 17(2)(d) Permit (Permit #CR-D-002-19) under the *Endangered Species Act* (ESA, 2007), approved on August 10, 2020. The purpose of this permit amendment is to seek approval for additional study area not included in the current Permit #CR-D-002-19, as shown in **Appendix 1**. There are no changes to the permit conditions, including species-specific mitigation measures and compensation requirements, and no additional species are being added at this time. The SAR screening developed in support of the current permit has been updated to provide occurrence probability of SAR that may be present in the areas Metrolinx is seeking to include in the permit as part of the proposed amendment, and is included as **Appendix 2**.

Permit Amendment Process - Next Steps

The Proposal for the 17(2)(d) Permit Amendment is anticipated to be available on the Environmental Registry of Ontario (ERO) for a 30-day public review period this Fall 2021, and Metrolinx will notify Six Nations of the Grand River when the ERO posting is available. While not specifically required under the Environmental Bill of Rights, the Ministry of the Environment, Conservation and Parks (MECP) voluntarily posts all ESA permit proposals for public review to ensure transparency and inclusion.

Metrolinx is seeking Six Nations of the Grand River's comments, questions, or requests for additional information upon review of the material presented in this letter at any time in advance of the public ERO posting. Questions or comments can also be submitted directly to MECP through the ERO posting during the 30-day public review period.

Following the 30-day public review period, the proposed permit amendment will be submitted to the Minister for review and consideration. The amendment may only be issued if the Minister is of the opinion that the legal requirements set out in clause 17(2)(d) of the *Endangered Species Act* (ESA, 2007) have been satisfied. Should the amendment be issued, Metrolinx will be obligated to adhere to the requirements and standards as stipulated under the permit.

Six Nations of the Grand River will be kept apprised should any new SAR be identified within the project area as project planning progresses. In such cases we will endeavor to engage Six Nations of the Grand River prior to seeking any necessary permit amendments.

Metrolinx is committed to building a long-term relationship with Six Nations of the Grand River, and we recognize that this requires transparency. We appreciate that we have much work to do in this regard and we hope to move forward in a positive way. The original SAR permit was obtained as part of the normal course of Metrolinx business, which had yet to be identified by the Indigenous Relations Office as necessitating engagement and information sharing with Indigenous Nations.

The Indigenous Relations Office has begun guiding the organization and identifying opportunities to flag such actions in advance, so that we can more meaningfully engage with Indigenous Nations as we move forward. We appreciate your patience as Metrolinx continues to learn more about Indigenous Nations and with the help of the Indigenous Relations Office, becomes aware of additional opportunities for engagement with Indigenous Nations.

We appreciate that previous engagement activities may not have met the needs of Six Nations of the Grand River, and the volume of materials may have resulted in Six Nations of the Grand River not having been made adequately aware of the possible identified impacts to several Species at Risk under this permit. Metrolinx remains committed to meaningful engagement; we are committed to identifying and prioritizing the sharing of the most relevant and appropriate information with Six Nations of the Grand River.

If Six Nations of the Grand River requires additional information or materials, or you wish to discuss this project in more detail, please reach out to Jaimi O'Hara in the Indigenous Relations Office at Metrolinx and she would be pleased to facilitate a meeting. She can be contacted at IndigenousRelations@metrolinx.com.

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*, except where information is provided to Metrolinx in confidence, pursuant to section 15.1.

Thank you for your time in reviewing this letter.

Yours Truly,

Maria Zintchenko

Hello Lonny and Team,

We noticed that the Noise and Vibration Operations Report, was not outlined in the previous letter which provided an overview of the Draft Environmental Impact and Assessment Report for the Ontario Line Project. We apologize for this omission and note that the report has now been added to the Dropbox shared below. We apologize that this report was overlooked earlier, and is not referenced directly in the letter. If you have any questions, please don't hesitate to reach out.

Best,

Marilyn Stoye *(she/her)*

Subject: Ontario Line - Draft Environmental Impact and Assessment Report for Review

Dear Lonny and Team,

Please find attached, a letter outlining the Draft Environmental Impact and Assessment Report (EIAR) for the Ontario Line. The report is available for review at the following link:

Any comments you may have regarding this report received by **December 6, 2021**, will be incorporated in the Draft EIAR planned to be released in January 2022. Feedback received after December 6, will be reflected in the Final EIAR, planned for release in March 2022.

If you have any questions or concerns, please feel free to reach out to me at any time.

Thank you for your time and assistance.

Hi Tanya!

Happy Friday! I left you a voicemail earlier today about the Corktown Demolitions and wanted to follow up with more details. The dates are still set for February 28/March 1. If you are able to attend, Jeff Muir from Stantec will be your point of contact for arranging the details. Should you confirm, he will be reaching out but please don't hesitate to connect with him if you need information before then. He can be reached at Jeff.Muir@stantec.com.

Let me know how your schedule is looking and if SNGR would like to attend.

Have a lovely long weekend!

Demolition and Don Valley Area Borehole Drilling

Dear Lonny, Dawn and Tanya,

As the Ontario Line Project continues to progress into the new year, we wanted to provide an update and invitation for participation in upcoming fieldwork. Please find attached a letter outlining upcoming Archaeological monitoring activities for the Corktown Station/First Parliament site and Don Valley area. These works are set to begin mid-January through February 2022.

If Six Nations of the Grand River is interested in participating in either or both of these works, please let me know as soon as possible in the new year, and we will work with you and the project team to coordinate. We can also provide fieldnotes and/or geotechnical data at your request.

If you have any questions or concerns, please feel free to reach out to me at any time.

Thank you for your time and assistance. Happy Holidays!

Delivered by Email

Dear Mr. Bomberry,

RE: Ontario Line Project - Stage 2 Archaeological Assessment - Corktown Station and Don Valley Area: Invitation to Participate in Archaeological Fieldwork

Metrolinx and its consultant, Stantec continue to progress the archaeological studies for the Ontario Line project and wanted to invite Six Nations of the Grand River to participate in further archaeological monitoring for Corktown Station and Don Valley area.

CORKTOWN STATION

Archaeological monitoring for building demolitions is planned to occur at Corktown Station in the upcoming weeks. The locations of the Corktown Station study areas can be viewed in **Figure 1** below. Please note that this work is separate from the Stage 2 & Stage 4 archaeological investigations, which has ceased for the 2021 field season and will resume in Spring 2022. Metrolinx will ensure that Six Nations of the Grand River is informed of when the Stage 2 & Stage 4 archaeological investigations resume.

The archaeological monitoring will occur for building demolition activities on the First Parliament site that may be capping archaeological deposits at Corktown Station (please see Figure 1). This includes an archaeological crew of two (one field supervisor and one field technician) monitoring the demolition of modern buildings in the areas of archaeological potential. Metrolinx would value any participation that Six Nations of the Grand River may wish to have in this monitoring program.

Please see the fieldwork details below:

CORKTOWN STATION:

Start Date: Tentatively January 17-18, 2022. If the start date changes, we will reach out to you.

Duration: Approximately two to four months (demo work occurring intermittently during time period; schedule to be confirmed closer to start date)

Start Time: 8am

Consultant Company: Stantec

Contact information: Jeffrey Muir - (289) 208-5298; Heather Kerr - (416) 602-3271; Patrick Hoskins - (613) 716-4687

Assessment: Archaeological monitoring during building demolition

Size of Field Crew: 2 (1 field supervisor and 1 field technician)

DON VALLEY AREA

As part of the Ontario Line, Hydro One Network Infrastructure (HONI) needs to relocate several hydro towers to accommodate subway maintenance facilities. Metrolinx is carrying out a borehole drilling program in the Don Valley to provide HONI with geotechnical data for proposed hydro tower relocations.

Archaeological monitoring will occur for borehole drilling in areas with archaeological potential (please see Figure 2). This approach will provide for the on-site identification and, if necessary, stop-work order of drilling by a licensed archaeologist in the event potential archaeological resources are encountered. A licensed archaeologist will be on-site during drilling to visually inspect spoil removed during borehole drilling as well as intermittent borehole samples to visually identify the presence of artifacts. Metrolinx would value any participation that Six Nations of the Grand River may wish to have in this monitoring program.

Please see the fieldwork details below:

DON VALLEY AREA:

Start Date: Mid-February. Exact dates will be confirmed in January 2022

Duration: 1-2 weeks

Start Time: 8am

Consultant Company: Stantec

Contact information: Jeffrey Muir - (289) 208-5298; Heather Kerr - (416) 602-3271; Patrick Hoskins - (613) 716-4687

Assessment: Archaeological monitoring for borehole drilling

Size of Field Crew: 2 (1 field supervisor and 1 field technician)

Invitation to Participate in Fieldwork

Metrolinx would value the involvement of Six Nations of the Grand River in the upcoming archaeological monitoring fieldwork outlined above. Should your Nation wish to participate, please let us know at your earliest convenience. We welcome any requests for a meeting to discuss opportunities to participate or to explore this project in more detail with Six Nations of the Grand River. Upon receipt of Six Nations of the Grand River's interest in participating, Metrolinx will work to coordinate your Nation's involvement. If Metrolinx is also willing to share fieldnotes and/or a summary of the

borehole and geotechnical data in addition to the open invitation to participate directly in the monitoring.

Engagement

Regardless of whether or not your Nation participates in the fieldwork, Metrolinx will inform you of discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will also ensure that future Archaeological Assessment reports are provided to your community in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries.

If you require additional information or materials, or if you wish to discuss this project in more detail or set up an in-person meeting, please contact, Jaimi O'Hara, Manger of Indigenous Relations at Metrolinx. We can be contacted at IndigenousRelations@metrolinx.com.

Thank you for your time and consideration.

Yours Truly,

Dear Lonny and Team,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. We wish to share with you that the Draft Environmental Impact and Assessment Report (EIAR) has now been published. Attached you will find a letter outlining the Draft Environmental Impact Assessment Report (EIAR) prepared for the Ontario Line Project, as well as the Notice of Publication for the report.

The full report can be found using the following dropbox link:

[REDACTED]

The Notice of Publication commences a 30-day public review period which will continue from February 7, 2022 until March 9, 2022. As such, we ask that your Nation provide any comments in writing no later than March 9, 2022. We appreciate the size of these documents and would be happy to arrange a meeting to review the report and project with you.

In an effort to streamline your review, we draw your attention to the attachments which provide an overview of the expected environmental impacts and proposed mitigations for Natural Environment and Archaeological Resources, as we know this may be of specific interest to you.

Thank you for your time and assistance. If you have any questions or concerns, please do not hesitate to contact me.

Dear Mr. Bomberry,

RE: Ontario Line Project - Notice of Publication of Draft Environmental Impact Assessment Report (EIAR)

Metrolinx remains committed to meaningful consultation and engagement, especially where our projects have impacts to the Treaty and traditional lands of Six Nations of the Grand River. Metrolinx values its relationship with Six Nations of the Grand River and it is our wish to continue to work with your Nation as we move forward. In November of 2021, Metrolinx shared with Six Nations of the Grand River the preliminary Draft Environmental Impact Assessment Report (EIAR) for comment and review. The purpose of this letter is to share with your Nation that the Notice of Publication for the Draft EIAR has now been posted, and to continue to invite any comment or feedback you may wish to share on this report.

Project Description

Metrolinx is proceeding with the Ontario Line which will bring 15.6 kilometres of subway service to Toronto. The Ontario Line will stretch across the city, from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line will have 15 new stations, including six interchange stations, connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable service.

Figure 1 - Ontario Line

Ontario Line Environmental Assessment & Project Timeline

Environmental impacts of the Ontario Line Project are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*.

Table 1 below provides a summary of the Ontario Line Reports that have been shared, or will be shared with Six Nations of the Grand River:

Table 1: Ontario Line Reporting Timeline

Draft Environmental Impact Assessment Report (EIAR)

The Draft EIAR summarizes the local environmental conditions in the discipline-specific study areas developed for the Project. The local environmental conditions were characterized through a combination of desktop review and field studies by practitioners using industry standard techniques and provincial standards, protocols, and guidelines, where appropriate. The resulting Draft Stage 1 AA and Natural Environment Report was shared with Six Nations of the Grand River for review in August 2021.

The Draft EIAR also provides an assessment and evaluation of the impacts that the Project might have on the environment. Based on the potential impacts, a description of mitigation measures and monitoring activities is outlined. A list of municipal, provincial, federal, or other permits and approvals that may be required for the Project is also provided.

Discipline-specific assessment and evaluation of impacts were undertaken for the following disciplines:

- Natural Environment
- Soil and Groundwater
- Cultural Heritage
- Archaeological Resources
- Socio-Economic and Land Use
- Air Quality
- Noise and Vibration
- Traffic and Transportation

Effective February 7, 2022, the Draft Environmental Impact Assessment Report will be available for a 30-day public review period. The report is posted on the Ontario Line project webpage, which can be accessed using the following link:

<https://www.metrolinxengage.com/en/content/full-report-draft-environmental-impact-assessment-report>

The Notice of Publication of Draft EIAR can be found in **Attachment 1**.

Potential Impacts and Mitigation Measures

The tables found enclosed in **Attachment 2** provide a summary of natural environment

and archaeology potential impacts and mitigation measures identified as part of the Draft EIAR that may be of interest to Six Nations of the Grand River. If your Nation has any feedback about these potential impacts and/or mitigation strategies, or any other aspects of the Ontario Line, we welcome the opportunity to discuss further.

Engagement

Metrolinx welcomes any comments or feedback on the EIAR during the 30-day public review period, from February 7 to **March 9, 2022**. Metrolinx is committed to an open and respectful relationship with Six Nations of the Grand River. We appreciate the significant volume of documents related to the Ontario Line Project that have been shared with Six Nations of the Grand River. We are happy to assist in the review of these documents by meeting with your Nation.

Metrolinx is willing to address any questions that Six Nations of the Grand River may have about the Ontario Line Project. If you require additional information or materials or if you wish to discuss the Project in more detail or set up a meeting, please contact Jaimi O'Hara, Manager of Indigenous Relations Office at Metrolinx. She can be reached at

IndigenousRelations@metrolinx.com .

With the exception of personal information, all comments will become part of the public record. Kindly note that any information you provide to Metrolinx, or its delegates, will be subject to the Freedom of Information and Protection of Privacy Act, except where information is provided to Metrolinx in confidence, pursuant to section 15.1, which protects the confidentiality of Indigenous knowledges.

Thank you for your time in reviewing this letter. Yours

Truly,

 Attachment 2 - Draft EIAR Natural Environment and Archaeology Potential Effects, Mitigation Measures and Monitoring

Notice of Publication of Draft Environmental Impact Assessment Report and Virtual Open Houses Ontario Line Project

The Project

The Ontario Line will bring 15.6 kilometres of new subway service to Toronto, making it faster and easier for people to get where they need to be each day. The line will stretch across the city, from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line will have 15 new stations, including six interchange stations, connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable service.

Environmental Impact Assessment Report

Environmental impacts of the Ontario Line are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*. In accordance with Section 15 of O. Reg. 341/20, Metrolinx has prepared the Draft Environmental Impact Assessment Report that is now available for review.

The Draft Environmental Impact Assessment Report describes existing environmental conditions in the Project study area, environmental impacts, mitigation and monitoring measures, consultation, and required permits and approvals for the Ontario Line.

The Draft Environmental Impact Assessment Report Review and Consultation Process

Effective **February 7, 2022**, the Draft Environmental Impact Assessment Report will be available for review on the Ontario Line project webpage (www.metrolinx.com/ontarioline). You can view and comment on the report from **February 7 to March 9, 2022** via the online form provided.

You can also participate in virtual open houses, where you can hear from project experts and ask questions about the report in real time, at MetrolinxEngage.com/OntarioLine/live on:

- **February 22, 2022 and February 24, 2022** from 6:30 to 8:00 p.m., with a focus on the portion of the project from Science Centre Station to Gerrard Station
- **March 1, 2022 and March 3, 2022** from 6:30 to 8:00 p.m., with a focus on the portion of the project from Gerrard Station to Exhibition Station

Those who wish to provide comments on the Draft Environmental Impact Assessment Report must do so by **March 9, 2022** and submit them using the webpage form or address them to the following email: ontarioline@metrolinx.com.

Section 17 of O. Reg. 341/20 requires Metrolinx to establish an issues resolution process to attempt to resolve any concerns raised by the public or Indigenous Nations during the review period. At the end of the review period, Metrolinx will update the Draft Environmental Impact Assessment Report by adding a description of the issues resolution process, what Metrolinx did to address any concerns, and if the Ontario Line implementation timeline will be impacted as a result of addressing concerns. Metrolinx will then publish the Final Environmental Impact Assessment Report on the Ontario Line project webpage: www.metrolinx.com/ontarioline and issue a Notice of Publication of the Final Environmental Impact Assessment Report.

To obtain a copy of the Draft Environmental Impact Assessment Report, please contact the Ontario Line project email listed above.

Mark Clancy (T: 416-202-5100, E: ontarioline@metrolinx.com) may be contacted on behalf of Metrolinx.

Dear Lonny and Team,

Please find attached a letter inviting participation in the archaeological monitoring of borehole drilling planned to occur in the Lower Don Bridge area as part of the Ontario Line Project.

The date of this fieldwork is tentatively set for March 7, 2022. If you are interested in participating, please let me know as soon as possible and we will work with you and the project team to coordinate.

If you have any questions or concerns, please feel free to reach out to me at any time.

Thank you for your time and assistance.

Delivered by Email

Dear Mr. Bomberly,

RE: Ontario Line Project - Invitation to Participate in Archaeological Monitoring for Borehole Drilling - Lower Don Bridge Area

Metrolinx continues to progress the Archaeological studies for the Ontario Line project and wanted to invite Six Nations of the Grand River to participate in further Archaeological monitoring for borehole drilling planned for the Lower Don Bridge area.

A Stage 1 Archaeological Assessment (AA) was completed as part of the Ontario Line Environmental Impact Assessment Report (EIAR). This report identified the area for the proposed boreholes as having archaeological potential. Both the Stage 1AA report and the EIAR were shared with Nations, in both August and November 2021.

Metrolinx is completing an Environmental Site Assessment in the Lower Don area (please see **Figure 1**). Given the identified archaeological potential of the area, archaeological monitoring will take place for the planned borehole drilling. This approach will provide for the on-site identification of archaeological resources and, if necessary, stop-work order of drilling by a licensed archaeologist in the event potential archaeological resources are encountered. A licensed archaeologist will be on-site during drilling to visually inspect spoil removed during borehole drilling as well as intermittent borehole samples to visually identify the presence of artifacts. Metrolinx would value any participation that Six Nations of the Grand River may wish to have in this monitoring program.

Please see the fieldwork details below:

Start Date: March 7, 2022 (potentially March 8 as well depending on drilling)

Duration: 1 day

Start Time: 8:30am

Consultant Company: Stantec

Contact information: Jeffrey Muir - (289) 208-5298

Assessment: Archaeological monitoring for borehole drilling

Size of Field Crew: 1 field supervisor

Parking and meeting location: See Figure 2. Meet and park at yellow star - along Bayview Ave and Mill St

Required PPE:

- Class 2 PPE (hi-viz vest)
- CSA Type 2 Hard Hat with foam insert (bump caps)
- CSA approved eye protection
- CSA approved 6" laced safety shoes
- CSA Hearing protection, in ear or over ear
- Appropriate clothing for weather conditions

Invitation to Participate in Fieldwork

Metrolinx would value the involvement of Six Nations of the Grand River in the upcoming archaeological monitoring fieldwork outlined above. Should your Nation wish to participate, please let us know at your earliest convenience. We welcome any requests for a meeting to discuss opportunities to participate or to explore this project in more detail with Six Nations of the Grand River. Upon receipt of Six Nations of the Grand River's interest in participating, Metrolinx will work to coordinate your Nation's involvement. Metrolinx is also willing to share fieldnotes and/or a summary of the borehole and geotechnical data in addition to the open invitation to participate directly in the monitoring.

Engagement

Regardless of whether or not your Nation participates in the fieldwork, Metrolinx will inform you of discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will also ensure that future Archaeological Assessment reports are provided to your Nation in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries.

If you require additional information or materials, or if you wish to discuss this project in more detail, please contact, Jaimi O'Hara, Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Thank you for your time and consideration.

Dear Chief Mowat,

Please find attached a letter inviting participation in upcoming archaeological monitoring for borehole drilling that is taking place at various locations to support environmental assessment and geotechnical studies related to the Ontario Line Subway project. The boreholes are being drilled in locations that have known archaeological potential and as such Metrolinx is ensuring that a consultant archaeologist is on-site to monitor. We'd like to extend this invite to your Nation as well. We appreciate that during these uncertain times of COVID-19 this may not be possible or safe for your Nation. We are happy to provide any fieldnotes taken by the consultant archaeologist and/or provide a summary of the data collected if this is at all helpful to you. Please let us know if there is any other way we can support your Nation during this time.

The boreholes are anticipated to be completed over the next several weeks beginning this Friday on **January 22, 2021**. Please let me know if you have interest in participating as soon as possible, and we will work with you and the project team to coordinate.

Delivered by email

Dear Chief Mowat,

RE: Ontario Line Project - Corktown Archaeological Monitoring for Borehole Drilling

Metrolinx and its consultants, Wood and Stantec, will be undertaking geotechnical and environmental site assessment investigations in Corktown. As part of this work boreholes will be drilled at 271 Front St East, 44 Parliament St and 25 Berkeley St. These boreholes will be located on/near potential archaeological sites and an archaeologist will be on site to monitor the drilling activities (see attached figures for location). We are writing to invite Alderville First Nation to participate in the archaeological monitoring associated with this work. Metrolinx appreciates the impacts of COVID-19 on Indigenous Nations and acknowledges that this may impact Alderville First Nation's ability to participate due to safety concerns. If preferable, Metrolinx is happy to share any fieldnotes taken by the consultant archaeologist as well as a summary of the borehole and geotechnical study data for review.

The fieldwork is anticipated to be conducted between January 22nd and February 12th, 2021, as detailed below:

Activity	Anticipated Timeline	Location		
		271 Front St E	44 Parliament St	25 Berkeley St
Drilling – Geotechnical Locations	Jan 22 – Feb 12, 2021		x	
Drilling – Environmental Locations	Feb 2 - 4, 2021	x		
	Feb 5 and 8, 2021		x	
	Feb 9 - 10, 2021			x

Invitation to Participate in Fieldwork

Metrolinx would appreciate any interest Alderville First Nation may have in participating in the archaeological monitoring fieldwork. The attached maps illustrate the location of the boreholes that will be drilled. Upon receipt of Alderville First Nation's interest in participating, Metrolinx will work to coordinate your Nation's involvement.

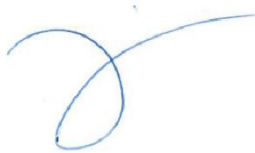

Engagement

Regardless of whether or not your Nation participates in the fieldwork, Metrolinx will inform you of discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will also ensure that future Archaeological Assessment reports are provided to your community in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries.

If your Nation wishes to participate in the fieldwork, or if you'd prefer to receive fieldnotes and/or a summary of the borehole and geotechnical data, please let us know at your earliest convenience. If you require additional information or materials, or if you wish to discuss this project in more detail or set up an in-person meeting, please contact Fallon Melander, Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*. Thank you for your time in reviewing these assessments.

Dear Chief Mowat,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. Attached you will find a letter providing an update on the project. The purpose of this letter is to:

- Provide an update on the scope of the project work
- share the initial draft of the Early Works Report for the proposed Corktown Station
- Invite your Nation to participate in upcoming archaeological fieldwork

In an effort to streamline your review, we draw your attention to the attachment which provides an overview of the expected environmental impacts and proposed mitigations, as we know this may be of specific interest to you.

Metrolinx is also preparing a letter specific to works being planned within the Don Valley as we recognize the significance of this waterway to many Nations. We hope to share that letter soon. We are happy to meet with your Nation to discuss the Ontario Line and address any questions or concerns that your Nation may have.

We ask that any comments on the draft Corktown Station Early Works Report be provided no later than **April 15, 2021**. Please note that the Noise and Vibration Report, which will be part of the Early Works Report is still being prepared and we will share with your Nation by March 19, 2021.

The draft Corktown Station Early Works Report is available at the following link:

Please let us know as soon as possible if your Nation has interest in participating in future archaeological fieldwork.

We appreciate the volume of documents that Metrolinx has shared with your Nation.

If you have any questions or concerns, please do not hesitate to contact me.

Miigwetch,

Fallon

Delivered by email

Dear Chief Mowat,

RE: Ontario Line Project - Corktown Station Early Works Report

Metrolinx, a regional transportation agency, is helping to transform the way the Greater Golden Horseshoe region moves by building a fast, convenient and integrated transit network. As part of this work, Metrolinx is proceeding with the Ontario Line which will bring nearly 16 kilometres of subway service to Toronto. The purpose of this letter is to share information regarding the Ontario Line project with Alderville First Nation.

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Alderville First Nation. Metrolinx appreciates and respects Alderville First Nation's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to share with Alderville First Nation information regarding Corktown Station early works and invite feedback on the initial draft of the Corktown Station Early Works Report.

Project Description

The Project is a new subway line with connections to Line 1 (Yonge-University) subway service at Osgoode and Queen Stations, Line 2 (Bloor-Danforth) subway service at Pape Station, and Line 5 (Eglinton Crosstown) service at the future Science Centre Station. Fifteen stations are proposed, with additional connections to three GO Transit lines (Lakeshore East, Lakeshore West and Stouffville), and the Queen, King, Bathurst, Spadina, Harbourfront and Gerrard/Carlton streetcar routes. The Project will reduce crowding on Line 1 and provide connections to new high-order rapid transit neighbourhoods. More information on the Project can be found on our website: www.metrolinx.com/ontarioline

Ontario Line Environmental Assessment Process and Reports

In 2020, Metrolinx provided Alderville First Nation with an outline of the Ontario Line environmental assessment process. The environmental assessment for the Ontario Line Project is being completed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20) made under the *Environmental Assessment Act*. The regulation outlines a Project-specific environmental assessment that includes an Environmental Conditions Report, an Environmental Impact Assessment Report and provides opportunity for Early Works Reports for assessment of works that are ready to proceed in advance of the Environmental Impact Assessment Report. An overview of the reports is outlined below and their anticipated publication timeline is provided in **Attachment 1**.

Environmental Conditions Report

The Environmental Conditions Report characterizes existing environmental conditions within the Ontario Line study area through a combination of desktop review and field studies and was finalized in November 2020. The report also summarizes potential impacts and mitigation measures for consideration during project planning and design. Potential impacts and mitigation measures identified in the Environmental Conditions Report will be confirmed and refined within the Early Works Reports and the Environmental Impact Assessment Report.

Early Works Reports

Metrolinx is assessing several early works components to support the main construction of the Ontario Line project. Early works are components of the Ontario Line Project that are anticipated to be ready to proceed before completion of the Environmental Impact Assessment Report, such as station construction, rail corridor expansion, utility relocation or bridge replacement or expansion, as defined in O. Reg. 341/20.

Initially, the early works required to support the Ontario Line project were assessed in a single report, which was shared in June 2020 and included Exhibition Station, Lower Don Bridges, Lakeshore East Joint Corridor and East Harbour early works.

Since then, the single Early Works Report has been split into several Early Works Reports, each covering either a single early works location or multiple locations if they are in close proximity. Each Early Works Report provides a description of the early works and alternatives considered, documents local environmental conditions, and outlines early works-specific environmental impacts, mitigation measures,

monitoring activities, potentially required permits and approvals and other components.

It is important to note that two new early works projects, Don Yard and Corktown Station, have been added as well. The Early Works Reports, including this new scope of work are summarized below:

- Exhibition Station Early Works
Exhibition Station early works are documented in the Exhibition Station Early Works Report, finalized in February 2021.
- Lakeshore East Joint Corridor Early Works
Lakeshore East Joint Corridor early works will be documented under a separate Early Works Report which will also include East Harbour Station.
- Lower Don Bridges & Don Yard Early Works
Lower Don Bridges early works will be documented in the Lower Don Bridges and Don Yard Early Works Report. Don Yard is a new early works project that will include construction of Ontario Line tunnel and portal structures between Cherry Street and the Lower Don River and accompanying shift of the Richmond Hill and Lakeshore East GO tracks; installation or upgrading of retaining walls and noise barriers, where appropriate; and utility and signal infrastructure relocation or protection. The initial draft of the Lower Don Bridges and Don Yard Early Works Report is anticipated to be shared with Alderville First Nation in mid to late April.
- Corktown Station Early Works
Corktown Station is a new early works project. Further information on Corktown Station early works is provided below.

Environmental Impact Assessment Report

The main report produced as part of this process is the Environmental Impact Assessment Report. It will cover the construction and operation of the Ontario Line. The report will include a final description of the Ontario Line Project, environmental impact evaluation results, mitigation measures, monitoring activities, potentially required permits and approvals and other components as outlined in O. Reg. 341/20.

Work along the Don River and within the vicinity of the Don Valley

Metrolinx appreciates the significance of waterways to Alderville First Nation. As such, Metrolinx is preparing an information letter specific to work occurring near or along the Don River and within the Valley. Metrolinx will provide details about the scope of work and anticipated natural environmental and archaeological assessments. Metrolinx is committed to exploring opportunities for Alderville First Nation to participate in these assessments should Alderville First Nation express interest.

Corktown Station Early Works

The Corktown Station site has been identified for launching tunnel excavation equipment for the downtown and Don Yard segments of the proposed Ontario Line alignment, as well as the location for the Corktown Station. The First Parliament site, located within the Corktown Station area, is a known archaeological site which requires additional archaeological study ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures, followed by completion of necessary archaeological studies, is required. Completion of this preparatory work on an expedited basis is essential to allow for the timely delivery of the overall Project.

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These activities will enable completion of environmental due diligence investigations, including archaeological assessments. These activities will occur on properties within the Corktown Station early works project footprint, as shown in **Figure 2**.

Environmental impacts of Corktown Station early works are being assessed in accordance with O. Reg. 341/20.

Metrolinx is sharing the initial draft of the Corktown Station Early Works Report, including the Corktown Station Natural Environment Report, via the Dropbox link enclosed in the email for Alderville First Nation's review. The Corktown Station Early Works Report documents the assessment of Corktown Station early works. It also outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures, and a consultation record. For a summary of the potential mitigation measures identified, please see the table found as **Attachment 2**.

Note that the initial draft of the report enclosed in the email currently does not include information on noise and vibration as the Corktown Station Noise and Vibration Report is still being prepared. The initial draft of the Corktown Station Noise and Vibration Report is anticipated to be shared with Alderville First Nation on **March 19, 2021** for review.

Metrolinx welcomes any comments or feedback on the initial draft of the Corktown Station Early Works Report from Alderville First Nation. Please provide these in writing no later than **April 15, 2021**.

Based on our currently anticipated schedule (**Figure 1**), the Notice of Publication of Draft Corktown Station Early Works Report is planned for late-April 2021, at which point the draft report will be available to all interested parties for review, including Alderville First Nation, the public and regulatory agencies.

Archaeology

As outlined above, archaeological assessments are anticipated to take place as part of advancing Corktown Station Early Works. Metrolinx would appreciate any interest Alderville First Nation may have in participating in planned future archaeological fieldwork for this site. The maps in **Attachment 3** illustrate the areas that will be subject to future archaeological assessments that include fieldwork. Upon receipt of Alderville First Nation's interest in participating, Metrolinx will work to coordinate your Nation's involvement.

Metrolinx acknowledges that Alderville First Nation should be aware of and engaged regarding any future archaeological work, especially the discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will ensure that future archaeological assessments are provided to Alderville First Nation in draft form, prior to submission to MHSTCI.

Engagement

Metrolinx is committed to an open, respectful, and transparent relationship with Alderville First Nation. We appreciate the significant volume of documents related to this Project that have been shared with Alderville First Nation. We are happy to assist in the review of these documents by meeting with Alderville First Nation or working to address any questions that Alderville First Nation may have about this Project. If you require additional information or materials or if you wish to discuss these Projects in more detail or set up a meeting, please contact Fallon Melander, Manager of Metrolinx's Indigenous Relations Office at IndigenousRelations@metrolinx.com.

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*. Thank you for your time in reviewing these assessments.

Thank you for your time in reviewing this letter.

Subject: Ontario Line Project - Invitation to Meet & provide input on First Parliament Site
Date: Monday, April 12, 2021 3:46:49 PM
Attachments: [First Parliament_AldervilleFN.pdf](#)

Dear Chief Mowat,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. We recently communicated with your Nation about the proposed Corktown Station which is along the planned alignment of the Ontario Line. This location includes parcels of land which were once the site of Upper Canada's First Parliament buildings. Metrolinx and its partners are exploring opportunities to commemorate the history of this site, and have been engaging with various parties including the City of Toronto and the Mississaugas of the Credit First Nation, on whose treaty territory this project is occurring.

Given the significant chance of recovering Indigenous and European artifacts during the Corktown Station Early Works, a detailed archaeological workplan is being developed. Metrolinx recognizes the importance and value of Indigenous monitors for any archaeology related to the Ontario Line Project. In our previous communication, an invitation was included for your Nation to participate in any archaeological fieldwork and monitoring during the Corktown Station Early Works, including demolition of modern buildings currently on the First Parliament site.

This work is anticipated to commence in Fall 2021, and if you have not yet expressed interest in participating, please feel free to do so at your earliest convenience. As a reminder any comments on the draft Corktown Station Early Works Report should be provided no later than **April 15, 2021**.

Metrolinx recognizes that the history of this location extends beyond European use, and as such, wants to take the opportunity to understand any significance it may have to Indigenous Nations. Metrolinx would like to meet with your Nation to discuss the First Parliament site, its commemoration, as well as review the broader Ontario Line project if you wish. We recognize that traditional knowledge of this area may be sacred and/or not appropriate to be shared, but would appreciate any information that may be appropriate for Metrolinx to consider.

This letter is not intended to replace engagement but to provide a high level summary for your information. We would very much appreciate meeting with your Nation to discuss in more detail. Please let me know if you have any questions or concerns. We appreciate the volume of documents that Metrolinx has shared with your Nation. If you have any questions or concerns, please do not hesitate to contact me.

Miigwetch,

Fallon

Fallon Melander

Delivered by email

Dear Chief Mowat,

RE: Ontario Line Project - First Parliament Site and Lime Kiln Site

Metrolinx, a regional transportation agency, is helping to transform the way the Greater Golden Horseshoe moves by building a fast, convenient and integrated transit network. As part of this work, Metrolinx is continuing the pre-construction planning of the Ontario Line which will bring nearly 16 kilometres of subway service to Toronto.

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Alderville First Nation. Metrolinx appreciates and respects Alderville First Nation's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to share with Alderville First Nation information regarding Corktown Station early works and additional information regarding upcoming field visits and investigations at the Corktown Station early works site, which includes two registered archaeological sites, the First Parliament site and the Lime Kiln site.

Project Description

The proposed Ontario Line is a new 16-kilometer subway line, which will occupy an exclusive right-of-way system encompassing a combination of below-grade, above-grade, and at-grade alignment. The route (Figure 1) will run from Ontario Place/Exhibition through downtown Toronto to the Ontario Science Centre in the City of Toronto, with six (6) potential interchange stations and 17 new connections to GO Transit, existing subways and streetcars. More information on the Project can be found on our website: www.metrolinx.com/ontarioline

Corktown Station Early Works

As communicated in the letter sent to Alderville First Nation on March 11, 2021, the Corktown Station site has been identified for launching tunnel excavation equipment for the downtown and Don Yard segments of the proposed Ontario Line alignment, as well as the location of the Corktown Station. The First Parliament and Lime Kiln Sites, located within the Corktown Station area, are known archaeological sites which require additional archaeological study ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures, followed by completion of necessary archaeological studies, is required. Completion of this preparatory work on an expedited basis is essential to allow for the timely delivery of the overall Project and is anticipated to begin in the Fall 2021, subject to the completion of the Corktown Station early works process in accordance with Ontario Regulation 341/20: Ontario Line Project.

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These activities will enable completion of environmental due diligence investigations, including archaeological assessments. These activities will occur on properties within the Corktown Station early works project footprint, as shown in **Figure 1**.

Figure 1: Map of Corktown Station Early Works

Environmental impacts of Corktown Station early works are being assessed in accordance with O. Reg. 341/20. Metrolinx shared the draft Corktown Station Early Works Report and associated discipline reports with Alderville First Nation on March 11, 2021 and had requested any comments to be provided by April 9, 2021.

Archaeological Work at the First Parliament Site and Lime Kiln Site

Metrolinx appreciates the significance of archaeology to Alderville First Nation. The properties at 265 Front Street East, 271 Front Street East, and 25 Berkeley Street, in the St. Lawrence neighbourhood of the City of Toronto, are collectively host to the First Parliament Site. It is located on the southwest corner of Parliament Street and King Street, between Parliament Street and Berkeley Street. The First Parliament Site is a registered archaeological site (AjGu-41) which may include resources associated with the First and Second Parliament Buildings, the Home District Gaol, and Consumers' Gas company buildings. The surface of the property is currently occupied by automotive businesses, including a car dealership, car wash, and surface parking lot. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and remnants of early Toronto industry may be found at this site.

North of the First Parliament Site is another registered archaeological site (AjGu-64), the Lime Kiln Site, which includes remains from the Toronto Lime Works Company. A variety of structural features, in various states of preservation, have been documented on this site. The location of the Lime Kiln Site and the First Parliament Site are shown in **Figure 2**.

Figure 2: Location of First Parliament Site and Lime Kiln Site Areas

The First Parliament Site and Lime Kiln Site require additional archaeological studies ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures is necessary. Completion of this preparatory work is essential to allow for the timely delivery of the Ontario Line.

Archaeological fieldwork to remove or protect archaeological resources is anticipated to commence in early Fall 2021, and a workplan for these archaeological investigations is under development. As mentioned in the letter sent on March 11, 2021, Alderville First Nation is invited to participate in all archaeological fieldwork, and to review and provide comments on forthcoming reports.

Feedback on Commemoration of First Parliament Site

Metrolinx appreciates that the history of the First Parliament site is not one simply of Canadian origin, but rather holds longer history and tradition. Metrolinx also appreciates that the site of the First Parliament of Upper Canada is linked to a history of colonization and harmful practices towards Indigenous Peoples. Given the significance of this site, Metrolinx is engaging with Indigenous Nations, City of Toronto and the broader community to identify opportunities for commemoration. Metrolinx is committed to ensuring that any feedback from Alderville First Nation regarding the significance of this site is considered as part of this commemoration. Metrolinx appreciates that traditional or cultural knowledge about this site may be sacred and/or not be appropriate to be shared but welcomes any comments or ideas from Alderville First Nation that may be appropriate to commemorate Indigenous Peoples.

Engagement

Metrolinx is committed to an open, respectful, and transparent relationship with Alderville First Nation. We would like to meet with Alderville First Nation to better understand any significance the First Parliament site may have to your Nation. We are also happy to assist in reviewing the Corktown Station Early Works Report or reviewing the proposed archaeological workplan for this site. If Alderville First Nation requires additional information or materials, or you wish to discuss this project in more detail or set up a meeting, please contact Fallon Melander, Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*. Thank you for your time in reviewing these assessments.

Subject: Ontario Line - Project Update - Don Valley and River - Invitation for Participation in Stage 2 Archaeological Fieldwork
Date: Friday, April 30, 2021 1:17:10 PM
Attachments: [OL-Don River Letter 2021 AldervilleFN.pdf](#)

Dear Chief Mowat,

Metrolinx continues to progress its environmental studies for the Ontario Line Project. We wanted to keep you aware that part of the project scope falls within the Don Valley and River System, and we recognize the importance of Valley and the waters within. Attached you will find a letter providing an update on the project and information regarding the planned work and environmental assessments that are anticipated to take place within the Don Valley. We also wanted to invite your Nation to participate in the planned Stage 2 Archaeological Assessments that are anticipated to occur as part of the upcoming field season.

This letter is not intended to replace engagement but to provide a high level summary for your information. We would very much appreciate meeting with your Nation to discuss in more detail. Please let me know if you have any questions or concerns.

Delivered by email

Dear Chief Mowat,

RE: Ontario Line Project - Don River Crossings & Stage 2 Archaeological Assessment Update

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Alderville First Nation. Metrolinx appreciates and respects Alderville First Nation's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to provide more information to Alderville First Nation about the Ontario Line crossings of the Don River and its tributaries. Metrolinx appreciates the significance of the waters and wishes to better understand how the potential impacts of construction around the Don River may be of interest to Alderville First Nation.

Background

The Project is a new subway line with connections to Line 1 (Yonge-University) subway service at Osgoode and Queen Stations, Line 2 (Bloor-Danforth) subway service at Pape Station, and Line 5 (Eglinton Crosstown) service at the future Science Centre Station. Fifteen stations are proposed, with additional connections to three GO Transit lines (Lakeshore East, Lakeshore West and Stouffville), and the Queen, King, Bathurst, Spadina, Harbourfront and Gerrard/Carlton streetcar routes. The Project will reduce crowding on Line 1 and provide connections to new high-order rapid transit neighbourhoods. More information on the Project can be found on our website: <http://www.metrolinx.com/ontarioline>.

Work in the Don River System

As part of the Ontario Line Project, the following four crossings within the Don River system are proposed:

- Location 1: Lower Don River Crossing (Lower Don Bridge);
- Location 2: Millwood Road Crossing;
- Location 3: Walmsley Brook Crossing; and
- Location 4: West Don River Crossing north of Overlea Boulevard.

Locations 1-4 are shown in **Figure 1** and described in further detail below.

Figure 1: Ontario Line Project - Proposed Don River System Crossings

The environmental assessment for the Ontario Line Project is being completed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20) made under the *Environmental Assessment Act*. Construction of the Lower Don Crossing (Location 1) will be assessed in the Lower Don Bridges and Don Yard Early Works Report, that is anticipated to be shared with Alderville First Nation in summer 2021. Construction of the other three crossings (Locations 2-4) will be assessed in the Environmental Impact Assessment Report, that is planned to be shared with Alderville First Nation in early 2022.

Location 1: Lower Don River Crossing (Lower Don Bridge)

A new bridge is planned to be built on the north side of the existing Lakeshore East rail bridge at the Lower Don River, with space for Ontario Line tracks going in both directions. We are also planning pedestrian and cycling connections across the Lower Don River.

Location 2: Millwood Road Crossing

The underground section of the Ontario Line running under Pape Avenue will emerge from the southern embankment of the Don Valley on an elevated guideway crossing the Don River, west of the Leaside Bridge (Millwood Road). The elevated guideway will connect to Thorncliffe Park in the north.

Location 3: Walmsley Brook Crossing

An elevated guideway will cross the Walmsley Brook tributary of the West Don River north of Pat Moore Drive. The guideway will then continue east across Beth Neilson Drive.

Location 4: West Don River Crossing (north of Overlea Boulevard)

The elevated guideway will cross the West Don River, north of Overlea Boulevard. This section of the route will connect to Don Mills Road and the future Flemingdon Park Station.

Field Surveys and Studies

As project planning is still in progress, environmental field surveys and studies as well as the timing of this work are being determined. Environmental field surveys and studies that may occur within or near the Don River include Stage 2 archaeological assessment and natural environment surveys (e.g., Species at Risk and tree surveys). Studies, surveys and their timing will be confirmed as project planning progresses. Further details are anticipated to be available in mid-Summer 2021.

Update on Archaeology

Metrolinx is currently planning to undertake Stage 2 Archaeological Assessments (AA) near the Don River starting in Fall 2021. The Stage 2 AA investigations will assess areas of identified archaeological potential within the Ontario Line study area which may be affected by the construction of the Project. Stage 2 AA fieldwork consists of test pit surveys at 5 m intervals within areas of previously identified archaeological potential.

Metrolinx would appreciate any interest Alderville First Nation may have in participating in the Stage 2 AA fieldwork. Some of the Stage 2 AA may occur on lands

within the Toronto and Region Conservation Authority's (TRCA) property boundaries and regulated area. Metrolinx will coordinate with TRCA to ensure that Indigenous Nations are provided the opportunity to participate in Stage 2 AA investigations. Upon receipt of Alderville First Nation's interest in participating, Metrolinx will work to coordinate your Nation's involvement.

As Metrolinx continues to undertake environmental due diligence for this project, additional archaeological assessment reports are anticipated to be completed. Metrolinx will ensure that Alderville First Nation will be made aware of and engaged regarding any future archaeological assessments, and especially the discovery and preservation of Indigenous artifacts. Metrolinx will also ensure that future archaeological assessments are provided to Alderville First Nation in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries

Invitation for Input

We are committed to an open, respectful, and transparent engagement with Alderville First Nation. We recognize the potential significance of this project to Alderville First Nation and wanted to keep you apprised of this project. We welcome meeting in the near future to discuss this project and its possible impacts and ways to appropriately engage with Alderville First Nation.

We are happy to address any questions that Alderville First Nation may have about the work proposed in the Don River system or the Ontario Line Project as a whole. If you require additional information or materials, or if you wish to discuss this Project in more detail or set up an in-person meeting, please contact Fallon Melander, Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Metrolinx thanks you for the time in reviewing this letter. Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*.

Yours Truly,

Subject: RE: Ontario Line Project – Archaeological Monitoring for Borehole Drilling - 265 Front St East - AFN

Dear Chief Mowat,

Please find attached a letter inviting participation in upcoming archaeological monitoring for borehole drilling that is taking place next week at 256 Front Street in Toronto to support environmental assessment and geotechnical studies related to the Ontario Line Subway project. The boreholes are being drilled in locations that have known archaeological potential and as such Metrolinx is ensuring that a consultant archaeologist is on-site to monitor. If you are not able to attend, we are happy to provide any fieldnotes taken by the consultant archaeologist and/or provide a summary of the data collected if this is at all helpful to you.

The boreholes are anticipated to be completed between July 12 and July 16, 2021. Please let me know as soon as possible if you have interest in participating, and we will work with you and the project team to coordinate. And just a final note for your information, both Fallon Melander and Jaimi O'Hara, who are usually Metrolinx's main point of contact with your Nation, are away from the office this week. Hence you are receiving this communication from me.

Miigwetch,

Make today great,

Christine Parris (she, her, hers)

Chief Dave Mowat
Alderville First Nation
11696 2nd Line Road
P.O. Box 46
Roseneath, ON K0K 2X0
Delivered by email

Dear Chief Mowat,

RE: Ontario Line Project - Update on Archaeological Assessments and Natural Environment Surveys

Metrolinx and its consultant, Stantec and HDR, will be undertaking Archaeological Assessment and Natural Environment fieldwork associated with the Ontario Line Project. We appreciate Alderville First Nation's interest in participating in these studies. The following letter provides details about the anticipated surveys to support the planning and coordination of involvement by your Nation.

Invitation to Participate in Fieldwork

Metrolinx would appreciate any interest Alderville First Nation may have in participating in the archaeological fieldwork. Upon receipt of Alderville First Nation interest in participating, Metrolinx will work to coordinate your Nation's involvement.

Update on Archaeology

Metrolinx is planning to undertake various Archaeological Assessments for the Ontario Line Project. This archaeological investigation will assess areas of identified archaeological potential, which may be potentially affected by the construction of the Project. The archaeological works are planned to begin in **September 2021**. Fieldwork dates may change based on field progress and weather.

Metrolinx would appreciate any interest Alderville First Nation may have in participating in the archaeological fieldwork. Upon receipt of Alderville First Nation interest in participating, Metrolinx will work to coordinate your Nation's involvement.

As Metrolinx continues to undertake environmental studies for this project, additional archaeological assessment reports are anticipated to be completed. Metrolinx acknowledges that Alderville First Nation will be made aware of and engaged

regarding any future archaeological assessments, and especially the discovery and preservation of Indigenous artifacts and sacred burial grounds.

Regardless of whether or not your Nation participates in the fieldwork, Metrolinx will inform you of discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will also ensure that future Archaeological Assessment reports are provided to Alderville First Nation in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries.

Natural Environment Field Surveys

Metrolinx is conducting natural environmental studies to review and document existing conditions within the Study Area and to carry out impact assessment reporting. Most of the natural environment fieldwork for Ontario Line is planned to occur in 2022.

However, the surveys detailed in the table below are planned for this year and include butternut survey, tree inventory and aquatic habitat assessment. Please note that these are approximate dates and may be subject to change pending appropriate weather conditions and field survey requirements. Metrolinx will endeavour to keep Alderville First Nation apprised as the work unfolds.

Survey	Date(s)
Butternut Health Assessments (Areas detailed in Figures 1 and 2)	• August, September/2021
Tree Inventory (Areas detailed in Figures 1 and 2)	• September/2021
Aquatic Habitat assessment (Don and West Don ravine areas)	• September/2021

Engagement

If your Nation requires additional information or materials, or if you wish to discuss this project in more detail or set up an in-person meeting, please contact Jaimi

O'Hara, Acting Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*.

Delivered by email

Dear Chief Mowat,

RE: Ontario Line Project - Lower Don Bridge Marine Archaeological Overview Assessment for Review

Metrolinx wishes to build a strong and respectful relationship with Alderville First Nation. Metrolinx appreciates and respects Alderville First Nation's desire to be appropriately informed and aware of projects. Metrolinx wishes to share with you the development of the Marine Archaeological Overview Assessment (MAOA) report for the proposed construction of the Lower Don Valley Bridge over the Don River. This proposed bridge is a component of the Ontario Line Project as part of the Lower Don Bridge and Don Yard Early Works. We invite Alderville First Nation's feedback on the marine Archeological Overview Assessment prepared for the Ontario Line Project.

Project Description

The Ontario Line will bring 15.6 kilometres of subway service to Toronto. The Ontario Line will stretch from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line will have 15 new stations, including six interchange stations, connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable service.

Lower Don Bridge and Don Yard Early Works

The Lower Don Bridge and Don Yard early works are planned for where the Ontario Line will run alongside GO train operations. These early works will set the groundwork for other major construction on the Ontario Line project and include:

- building a new bridge north of the existing rail bridge over the Lower Don River that will carry the Ontario Line tracks;
- shifting GO tracks in the Don Yard and nearby rail corridor to accommodate Ontario Line infrastructure;
- modifying the existing rail bridge to accommodate GO track shifts and Ontario Line infrastructure; and
- relocating and protecting utilities and signal infrastructure in the area.

10 Bay Street
Toronto, ON M5J 2N8

The location of the Lower Don Bridge and Don Yard early works project footprint and study area can be viewed in **Figure 1** below.

Figure 1: Map of Lower Don Bridge and Don Yard Early Works

Marine Archaeological Overview Assessment

On behalf of Metrolinx, Stantec has undertaken a Marine Archaeological Overview Assessment for the proposed Lower Don Bridge. The purpose of the Marine Archaeological Overview Assessment is to determine the marine archaeological potential of the study area for the bridge shown in **Figure 2** below.

The proposed bridge will cross over the Don River on the north side of the existing GO Transit Lakeshore East rail bridge. As a result, a large portion of the study area overlaps with the Don River. While the bridge will have no permanent in-water components, Metrolinx anticipates that in-water construction activities may impact potential submerged cultural resources. The marine archaeological potential of the study area is being considered as part of the Marine Archeological Overview Assessment.

The assessment determined that despite the study area for the Lower Don Valley Arch Bridge Superstructure having indicators of marine archaeological potential, there has been extensive river-bed disturbance to date. The riverbed has been previously disturbed by engineered

channeling, modern dredging, and modern construction. The assessment determined that the study area retains low to no potential for the identification and documentation of in situ Indigenous and Euro-Canadian marine archaeological resources. As a result no further marine archaeological work is required for the study area.

A copy of the marine Archeological Overview Assessment has been included in the Dropbox link for your review. Please provide any comments you may have by **November 19, 2021**.

Invitation for Input

We are committed to an open, respectful, and transparent engagement with Alderville First Nation. Metrolinx values any input that Alderville First Nation is willing to provide on the Marine Archaeological Overview Assessment report.

We are happy to meet with your Alderville First Nation to go over the project and development of the Marine Archaeological Overview Assessment report and answer any questions Alderville First Nation may have on the report or the project as a whole.

If you require additional information or materials, or if you wish to discuss this project in more detail or set up a meeting, please contact Jaimi O'Hara, Acting Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Please submit your feedback in writing by **November 19, 2021**.

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*, except where information is provided to Metrolinx in confidence, pursuant to section 15.1.

Dear Chief Mowat,

Please find attached a letter inviting participation in upcoming Stage 2 Fieldwork for the Ontario Line project. The fieldwork is anticipated to take place starting October 25, 2021.

Please let me know if you have interest in participating as soon as possible, and we will work with you, the project team to coordinate.

If you have any questions or concerns, please feel free to contact the Indigenous Relations Office at anytime.

Thank you,

Jaimi O'Hara

Dear Chief Mowat,

**RE: Ontario Line Project - Stage 2 Archaeological Assessment - Moss Park and Ordnance Park
Invitation to Participate in Archaeological Fieldwork**

Metrolinx and its consultant, Stantec continue to progress the archaeological studies for the Ontario Line project and wanted to invite Alderville First Nation to participate in Stage 2 Archaeological Assessments planned to occur at Moss Park and Ordnance Park in the upcoming weeks. The locations of Moss Park and Ordnance Park study areas can be viewed in **Figure 1 and 2** below.

Moss Park and Ordnance Park have been previously assessed in a desktop study, the *Ontario Line Stage 1 Archaeological Assessment Report - South* which was shared with Alderville First Nation in March 2020 and was subject to an Addendum shared with Alderville First Nation in February 2021. The Stage 1 report recommended that a Stage 2 archaeological assessment is required for Moss Park and Ordnance Park parcels.

The Stage 2 archaeological field work will be conducted by test pit survey, in accordance with the Ministry of Heritage, Sport, Tourism and Culture Industries' (MHSTCI) 2011 *Standards and Guidelines for Consultant Archaeologists*. The Stage 2 test pit survey method consists of hand excavating test pits by shovel at a five-metre interval on the park lands. The test pits are at least 30 centimetres in diameter and dug through the topsoil (which has a variable depth generally between 15 and 25 centimetres, but may be deeper or shallower) and at least five centimetres into subsoil. Once complete, test pits will be backfilled. Areas disturbed by utility infrastructure or recent construction will not be surveyed but will be photo documented. Based upon the Stage 2 field work, subsequent archaeological investigations may be recommended depending on what is found during the Stage 2 test pit survey.

Please see the fieldwork details below:

MOSS PARK:

Start Date: Tentatively October 25, 2021. If the start date changes, we will reach out to you.

Duration: Approximately two to three days

Start Time: 8am

Consultant Company: Stantec

Contact information: Jeffrey Muir - (289) 208-5298; Heather Kerr - (416) 602-3271; Patrick Hoskins - (613) 716-4687

Assessment: Stage 2 Archaeological Assessment

Meeting Location Address: 150 Sherbourne St

Size of Field Crew: 2 (1 Field director, 1 field tech)

Parking location: Above-ground parking lot at the southwest corner of Jarvis Street and Queen Street East; approximate three minute walk

ORDNANCE PARK

Start Date: Work on Ordnance Park will begin after the Moss Park work is completed

Duration: Approximately two weeks

Start Time: 8am

Consultant Company: Stantec

Contact information: Jeffrey Muir - (289) 208-5298; Heather Kerr - (416) 602-3271; Patrick Hoskins - (613) 716-4687

Assessment: Stage 2 Archaeological Assessment

Size of Field Crew: 4 (1 Field director, 3 field techs)

Required PPE:

Item	Specifications
Clothing and Attire	Loose clothing, long hair, dangling accessories, jewelry, or other similar items that are likely to be a hazard will not be worn unless they are tied, covered, or otherwise secured so they prevent the hazard.
Foot Protection	Canadian Standards Association (CSA) approved work boots (Steel-toed boots, minimum 6" from top of sole, grade 1 with sole protection [CSA Standard Z195-09]).
Hand Protection	Cut, puncture, and abrasion-resistant gloves shall be worn when conducting archaeological hand digging and screening activities.
Eye and Face Protection	CSA approved safety glasses with rigid side shields. Regular prescription glasses are not permitted unless they are designed as CSA safety glasses complete with rigid shields. An ASTM level 1 (or higher) face covering is mandatory.
Head Protection	CSA approved Type II, Class E (side impact) hard hat. Hard hats shall be worn with the brim pointed forward.
Hearing Protection	Not needed.
High Visibility Safety Apparel	Mandatory class 2, level 2 High Visibility Safety Apparel (HVSA). Full length sleeves and pants with reflective stripes on both arms and legs are required.
*Although not considered PPE, face coverings for COVID-19 shall be worn when applicable	

Invitation to Participate in Fieldwork

Metrolinx would appreciate any interest Alderville First Nation may have in participating in the archaeological monitoring fieldwork. Upon receipt of Alderville First Nation's interest in participating, Metrolinx will work to coordinate Alderville First Nation's involvement.

Engagement

Regardless of whether or not Alderville First Nation participates in the fieldwork, Metrolinx will inform you of discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will also ensure that future Archaeological Assessment reports are provided to your community in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries.

If Alderville First Nation wishes to participate in the fieldwork, or if you'd prefer to receive fieldnotes and/or a summary of the borehole and geotechnical data, please let us know at your earliest convenience. If you require additional information or materials, or if you wish to discuss this project in more detail or set up an in-person meeting, please contact, Indigenous Relations at Metrolinx. We can be contacted at IndigenousRelations@metrolinx.com.

Thank you for your time and consideration.

Delivered by email

Dear Chief Mowat,

**RE: Ontario Line Project - Species at Risk 17(2)(d) Permit Amendment Under the
*Endangered Species Act***

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with Alderville First Nation. Metrolinx appreciates and respects Alderville First Nation's desire to be appropriately informed and aware of projects. To that end, Metrolinx is sharing with Alderville First Nation information regarding the Species at Risk (SAR) 17 (2) (d) Permit under *the Endangered Species Act* (ESA, 2007) obtained in support of the Ontario Line Project, and the proposed amendment to this permit.

Project Description

Metrolinx, a regional transportation agency, is helping transform the way the Greater Golden Horseshoe region moves by building a fast, convenient, and integrated transit network. As part of this work, Metrolinx is proceeding with the Ontario Line Project which will bring 15.6 kilometres of subway service to Toronto.

Ontario Line Permit #CR-D-002-19

Metrolinx, as part of the Ontario Line Project, previously received approval for a 17(2)(d) permit (Permit #CR-D-002-19) under the *Endangered Species Act* (ESA, 2007) issued by the Ministry of the Environment, Conservation, and Parks (MECP) on August 10, 2020. The permit provides approval for those project activities that may have adverse impacts on identified Species at Risk (SAR) and/or their habitat. The permit allows for those activities to take place and provides direction to Metrolinx regarding mitigation measures and compensation requirements that would be necessary to support those impacted species to support no net loss.

To inform this permit, Metrolinx completed SAR screening through the Ontario Line Environmental Conditions Report and Natural Environment Report using various information sources. While the results of this screening were shared within the initial draft of the Environmental Conditions Report circulated to Alderville First Nation on June 15 2020, Draft Environmental Conditions Report circulated on September 17 2020 and Final Environmental Conditions Report circulated on November 30 2020, we regret that we did not engage with Alderville First Nation directly on the screening process or the findings.

Potentially Impacted Species and Summary of Permit Conditions and Requirements

Based on the SAR screening completed to date, some activities required to support the Ontario Line Project may result in the following species at risk being impacted:

- Bank Swallow - Threatened
- Barn Swallow - Threatened
- Blanding's Turtle - Threatened
- Butternut - Endangered
- Chimney Swift - Threatened
- Little Brown Myotis - Endangered
- Northern Myotis - Endangered
- Small-footed Myotis - Endangered
- Tri-colored Bat - Endangered

Activities that may result in impacts to species listed above are associated with project construction and include activities such as removal or alteration of SAR habitat features (e.g., structures that may support SAR bird nesting, and trees).

Prior to commencing any activities that may impact SAR and/or SAR habitat, Metrolinx will complete species-specific screening for areas where project activities are planned to take place, and, if necessary (if screening determines that SAR/SAR habitat is likely to be present), surveys to detect SAR and SAR habitat presence and conduct an impact assessment if presence is confirmed, to characterize species-specific impacts (e.g., amount of habitat removed).

Metrolinx will meet the ESA permit conditions such as implementing species-specific mitigation measures, monitoring their effectiveness, and taking corrective action as required. Species-specific mitigation measures include scheduling activities to take place outside of species-specific timing windows (e.g., outside of active season or breeding window), implementing exclusion measures to prevent individuals of certain species from being impacted by project activities, and others.

If project activities result in SAR habitat removal, Metrolinx will implement species-specific compensation measures such as creating habitat (e.g., nesting habitat features replacing habitat features removed). Compensation habitat will be regularly monitored, and appropriate corrective actions will be taken as required to ensure habitat functions as intended.

Proposed Permit Amendment

Metrolinx is proposing an amendment to the previously approved SAR 17(2)(d) Permit (Permit #CR-D-002-19) under the *Endangered Species Act* (ESA, 2007), approved on August 10, 2020. The purpose of this permit amendment is to seek approval for additional study area not included in the current Permit #CR-D-002-19, as shown in **Appendix 1**. There are no changes to the permit conditions, including species-specific mitigation measures and compensation requirements, and no additional species are being added at this time. The SAR screening developed in support of the current permit has been updated to provide occurrence probability of SAR that may be present in the areas Metrolinx is seeking to include in the permit as part of the proposed amendment, and is included as **Appendix 2**.

Permit Amendment Process - Next Steps

The Proposal for the 17(2)(d) Permit Amendment is anticipated to be available on the Environmental Registry of Ontario (ERO) for a 30-day public review period this Fall 2021, and Metrolinx will notify Alderville First Nation when the ERO posting is available. While not specifically required under the Environmental Bill of Rights, the Ministry of the Environment, Conservation and Parks (MECP) voluntarily posts all ESA permit proposals for public review to ensure transparency and inclusion.

Metrolinx is seeking Alderville First Nation's comments, questions, or requests for additional information upon review of the material presented in this letter at any time in advance of the public ERO posting. Questions or comments can also be submitted directly to MECP through the ERO posting during the 30-day public review period.

Following the 30-day public review period, the proposed permit amendment will be submitted to the Minister for review and consideration. The amendment may only be issued if the Minister is of the opinion that the legal requirements set out in clause 17(2)(d) of the *Endangered Species Act* (ESA, 2007) have been satisfied. Should the amendment be issued, Metrolinx will be obligated to adhere to the requirements and standards as stipulated under the permit.

Alderville First Nation will be kept apprised should any new SAR be identified within the project area as project planning progresses. In such cases we will endeavor to engage Alderville First Nation prior to seeking any necessary permit amendments.

Metrolinx is committed to building a long-term relationship with Alderville First Nation, and we recognize that this requires transparency. We appreciate that we have much work to do in this regard and we hope to move forward in a positive way. The original SAR permit was obtained as part of the normal course of Metrolinx business, which had yet to be identified by the Indigenous Relations Office as necessitating engagement and information sharing with Indigenous Nations.

The Indigenous Relations Office has begun guiding the organization and identifying opportunities to flag such actions in advance, so that we can more meaningfully engage with Indigenous Nations as we move forward. We appreciate your patience as Metrolinx continues to learn more about Indigenous Nations and with the help of the Indigenous Relations Office, becomes aware of additional opportunities for engagement with Indigenous Nations.

We appreciate that previous engagement activities may not have met the needs of Alderville First Nation, and the volume of materials may have resulted in Alderville First Nation not having been made adequately aware of the possible identified impacts to several Species at Risk under this permit. Metrolinx remains committed to meaningful engagement; we are committed to identifying and prioritizing the sharing of the most relevant and appropriate information with Alderville First Nation.

If Alderville First Nation requires additional information or materials, or you wish to discuss this project in more detail, please reach out to Jaimi O'Hara in the Indigenous Relations Office at Metrolinx and she would be pleased to facilitate a meeting. She can be contacted at IndigenousRelations@metrolinx.com.

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*, except where information is provided to Metrolinx in confidence, pursuant to section 15.1.

Thank you for your time in reviewing this letter.

Dear Chief Mowat,

**RE: Ontario Line Project - Stage 2 Archaeological Assessment - Thorncliffe Segment
Invitation to Participate in Archaeological Fieldwork**

Metrolinx and its consultant, Stantec continue to progress the archaeological studies for the Ontario Line project and wanted to invite Alderville First Nation to participate in Stage 2 Archaeological Assessments planned to occur in the Thorncliffe Segment in the upcoming weeks. The locations of the Thorncliffe Segment study areas can be viewed in **Figure 1** below.

Stage 2 archaeological test pit survey at five metre intervals is planned in areas of archaeological potential on the illustrated PINs (please see Figure 1). This includes the archaeological crew of four (one field supervisor and three field technicians) digging by hand each test pit, each of which is at least 30 centimetres in diameter. The pit is dug to subsoil (approximately 20 to 30 centimetres in depth depending on soil conditions, plus another five centimetres into the subsoil) at five metre intervals across the areas of archaeological potential. The topsoil would be screened through six-inch mesh to recover artifacts. We also have three additional days of Stage 1 field work within the Don Valley area, where a field supervisor would photograph the landscape in detail to document areas of steep slope, permanently wet areas, and areas of archaeological potential.

Please see the fieldwork details below:

THORNCLIFFE SEGMENT:

Start Date: Tentatively December 2, 2021. If the start date changes, we will reach out to you.

Duration: Approximately two weeks

Start Time: 8am

Consultant Company: Stantec

Contact information: Jeffrey Muir - (289) 208-5298; Heather Kerr - (416) 602-3271; Patrick Hoskins - (613) 716-4687

Assessment: Stage 2 Archaeological Assessment

Size of Field Crew: 4 (1 field supervisor and 3 field technicians)

Invitation to Participate in Fieldwork

Metrolinx would appreciate any interest Alderville First Nation may have in participating in the archaeological monitoring fieldwork. Upon receipt of Alderville First Nation's interest in participating, Metrolinx will work to coordinate your Nation's involvement.

Engagement

Regardless of whether or not your Nation participates in the fieldwork, Metrolinx will inform you of discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will also ensure that future Archaeological Assessment reports are provided to your Nation in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries.

If your Nation wishes to participate in the fieldwork, or if you'd prefer to receive fieldnotes and/or a summary of the borehole and geotechnical data, please let us know at your earliest convenience. If you require additional information or materials, or if you wish to discuss this project in more detail or set up an in-person meeting, please contact, Jaimi O'Hara, Acting Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Should you wish to provide input to the above questions, please submit your feedback in writing. Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*, except where information is provided to Metrolinx in confidence, pursuant to section 15.1.

Thank you for your time and consideration.

Yours Truly,

Dear Chief Mowat,

As a follow up to the letter sent on November 3, 2021 regarding the Ontario Line Project Species at Risk 17(2)(d) Permit Amendment Under the *Endangered Species Act*, the Proposal for the 17(2)(d) Permit Amendment was posted on the Environmental Registry of Ontario (ERO) on December 3rd, 2021 for a 30-day public review period, ending January 2nd, 2022.

The ERO posting can be found in the following link:

<https://ero.ontario.ca/notice/019-4601> Comments can be submitted directly to the Ministry of the Environment, Conservation and Parks.

If you have any questions or concerns, please feel free to reach out to me at any time. Additionally, we are happy to arrange a meeting to discuss the Permit, if that would be of interest.

Thank you for your time and assistance.

Dear Chief Mowat,

As the Ontario Line Project continues to progress into the new year, we wanted to provide an update and invitation for participation in upcoming fieldwork. Please find attached a letter outlining upcoming Archaeological monitoring activities for the Corktown Station/First Parliament site and Don Valley area. These works are set to begin mid-January through February 2022.

If Alderville First Nation is interested in participating in either or both of these works, please let me know as soon as possible in the new year, and we will work with you and the project team to coordinate. We can also provide fieldnotes and/or geotechnical data at your request.

If you have any questions or concerns, please feel free to reach out to me at any time.

Thank you for your time and assistance. Happy Holidays!

Delivered by email

Dear Chief Mowat,

RE: Ontario Line Project - Stage 2 Archaeological Assessment - Corktown Station and Don Valley Area: Invitation to Participate in Archaeological Fieldwork

Metrolinx and its consultant, Stantec continue to progress the archaeological studies for the Ontario Line project and wanted to invite Alderville First Nation to participate in further archaeological monitoring for Corktown Station and Don Valley area.

CORKTOWN STATION

Archaeological monitoring for building demolitions is planned to occur at Corktown Station in the upcoming weeks. The locations of the Corktown Station study areas can be viewed in **Figure 1** below. Please note that this work is separate from the Stage 2 & Stage 4 archaeological investigations, which has ceased for the 2021 field season and will resume in Spring 2022. Metrolinx will ensure that Alderville First Nation is informed of when the Stage 2 & Stage 4 archaeological investigations resume.

The archaeological monitoring will occur for building demolition activities on the First Parliament site that may be capping archaeological deposits at Corktown Station (please see Figure 1). This includes an archaeological crew of two (one field supervisor and one field technician) monitoring the demolition of modern buildings in the areas of archaeological potential. Metrolinx would value any participation that Alderville First Nation may wish to have in this monitoring program.

Please see the fieldwork details below:

CORKTOWN STATION:

Start Date: Tentatively January 17-18, 2022. If the start date changes, we will reach out to you.

Duration: Approximately two to four months (demo work occurring intermittently during time period; schedule to be confirmed closer to start date)

Start Time: 8am

Consultant Company: Stantec

10 Bay Street
Toronto, ON M5J 2N8

Contact information: Jeffrey Muir - (289) 208-5298; Heather Kerr - (416) 602-3271; Patrick Hoskins - (613) 716-4687

Assessment: Archaeological monitoring during building demolition

Size of Field Crew: 2 (1 field supervisor and 1 field technician)

DON VALLEY AREA

As part of the Ontario Line, Hydro One Network Infrastructure (HONI) needs to relocate several hydro towers to accommodate subway maintenance facilities. Metrolinx is carrying out a borehole drilling program in the Don Valley to provide HONI with geotechnical data for proposed hydro tower relocations.

Archaeological monitoring will occur for borehole drilling in areas with archaeological potential (please see Figure 2). This approach will provide for the on-site identification and, if necessary, stop-work order of drilling by a licensed archaeologist in the event potential archaeological resources are encountered. A licensed archaeologist will be on-site during drilling to visually inspect spoil removed during borehole drilling as well as intermittent borehole samples to visually identify the presence of artifacts. Metrolinx would value any participation that Alderville First Nation may wish to have in this monitoring program.

Please see the fieldwork details below:

DON VALLEY AREA:

Start Date: Mid-February. Exact dates will be confirmed in January 2022

Duration: 1-2 weeks

Start Time: 8am

Consultant Company: Stantec

Contact information: Jeffrey Muir - (289) 208-5298; Heather Kerr - (416) 602-3271; Patrick Hoskins - (613) 716-4687

Assessment: Archaeological monitoring for borehole drilling

Size of Field Crew: 2 (1 field supervisor and 1 field technician)

Invitation to Participate in Fieldwork

Metrolinx would value the involvement of Alderville First Nation in the upcoming archaeological monitoring fieldwork outlined above. Should your Nation wish to participate, please let us know at your earliest convenience. We welcome any requests for a meeting to discuss opportunities to participate or to explore this project in more detail with Alderville First Nation. Upon receipt of Alderville First Nation's interest in participating, Metrolinx will work to coordinate your Nation's involvement. If Metrolinx is

also willing to share fieldnotes and/or a summary of the borehole and geotechnical data in addition to the open invitation to participate directly in the monitoring.

Engagement

Regardless of whether or not your Nation participates in the fieldwork, Metrolinx will inform you of discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will also ensure that future Archaeological Assessment reports are provided to your community in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries.

If you require additional information or materials, or if you wish to discuss this project in more detail or set up an in-person meeting, please contact, Jaimi O'Hara, Manger of Indigenous Relations at Metrolinx. We can be contacted at IndigenousRelations@metrolinx.com.

Thank you for your time and consideration.

Yours Truly,

Dear Chief Mowat,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. We wish to share with you that the Draft Environmental Impact and Assessment Report (EIAR) has now been published. Attached you will find a letter outlining the Draft Environmental Impact Assessment Report (EIAR) prepared for the Ontario Line Project, as well as the Notice of Publication for the report.

The full report can be found using the following dropbox link:

The Notice of Publication commences a 30-day public review period which will continue from February 7, 2022 until March 9, 2022. As such, we ask that your Nation provide any comments in writing no later than March 9, 2022. We appreciate the size of these documents and would be happy to arrange a meeting to review the report and project with you.

In an effort to streamline your review, we draw your attention to the attachments which provide an overview of the expected environmental impacts and proposed mitigations for Natural Environment and Archaeological Resources, as we know this may be of specific interest to you.

Thank you for your time and assistance. If you have any questions or concerns, please do not hesitate to contact me.

Delivered by email

Dear Chief Mowat,

RE: Ontario Line Project - Notice of Publication of Draft Environmental Impact Assessment Report (EIAR)

Metrolinx remains committed to meaningful consultation and engagement, especially where our projects have impacts to the Treaty and traditional lands of Alderville First Nation. In November of 2021, Metrolinx shared with Alderville First Nation the preliminary Draft Environmental Impact Assessment Report (EIAR) for comment and review. The purpose of this letter is to share with your Nation the that the Notice of Publication for the Draft EIAR has now been posted, and to continue to invite any comment or feedback you may wish to share on this report.

Project Description

Metrolinx is proceeding with the Ontario Line which will bring 15.6 kilometres of subway service to Toronto. The Ontario Line will stretch across the city, from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line will have 15 new stations, including six interchange stations, connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable service.

Figure 1 - Ontario Line

Ontario Line Environmental Assessment & Project Timeline

Environmental impacts of the Ontario Line Project are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*.

Table 1 below provides a summary of the Ontario Line Reports that have been shared, or will be shared with Alderville First Nation:

Table 1: Ontario Line Reporting Timeline

Report	Date Shared/to be Shared with Nations

Initial draft of Environmental Impact Assessment Report	November 18, 2021
Draft Environmental Impact Assessment Report	February 7, 2022 (shared with this letter)
Final Environmental Impact Assessment Report	April 19, 2022*

*Date is subject to change.

Draft Environmental Impact Assessment Report (EIAR)

The Draft EIAR summarizes the local environmental conditions in the discipline-specific study areas developed for the Project. The local environmental conditions were characterized through a combination of desktop review and field studies by practitioners using industry standard techniques and provincial standards, protocols, and guidelines, where appropriate. The resulting Draft Stage 1 AA and Natural Environment Report was shared with Alderville First Nation for review in August 2021.

The Draft EIAR also provides an assessment and evaluation of the impacts that the Project might have on the environment. Based on the potential impacts, a description of mitigation measures and monitoring activities is outlined. A list of municipal, provincial, federal, or other permits and approvals that may be required for the Project is also provided.

Discipline-specific assessment and evaluation of impacts were undertaken for the following disciplines:

- Natural Environment
- Soil and Groundwater
- Cultural Heritage
- Archaeological Resources
- Socio-Economic and Land Use
- Air Quality
- Noise and Vibration
- Traffic and Transportation

Effective February 7, 2022, the Draft Environmental Impact Assessment Report will be available for a 30-day public review period. The report is posted on the Ontario Line project webpage, which can be accessed using the following link:

<https://www.metrolinxengage.com/en/content/full-report-draft-environmental-impact-assessment-report>

The Notice of Publication of Draft EIAR can be found in **Attachment 1**.

Potential Impacts and Mitigation Measures

The tables found enclosed in **Attachment 2** provide a summary of natural environment

and archaeology potential impacts and mitigation measures identified as part of the Draft EIAR that may be of interest to Alderville First Nation. If your Nation has any feedback about these potential impacts and/or mitigation strategies, or any other aspects of the Ontario Line, we welcome the opportunity to discuss further.

Engagement

Metrolinx welcomes any comments or feedback on the EIAR during the 30-day public review period, from February 7 to **March 9, 2022**. Metrolinx is committed to an open and respectful relationship with Alderville First Nation. We appreciate the significant volume of documents related to the Ontario Line Project that have been shared with Alderville First Nation. We are happy to assist in the review of these documents by meeting with your Nation.

Metrolinx is willing to address any questions that Alderville First Nation may have about the Ontario Line Project. If you require additional information or materials or if you wish to discuss the Project in more detail or set up a meeting, please contact Jaimi O'Hara, Manager of Indigenous Relations Office at Metrolinx. She can be reached at

IndigenousRelations@metrolinx.com.

With the exception of personal information, all comments will become part of the public record. Kindly note that any information you provide to Metrolinx, or its delegates, will be subject to the Freedom of Information and Protection of Privacy Act, except where information is provided to Metrolinx in confidence, pursuant to section 15.1, which protects the confidentiality of Indigenous knowledges.

Thank you for your time in reviewing this letter. Yours

Truly,

 Attachment 2 - Draft EIAR Natural Environment and Archaeology Potential Effects, Mitigation Measures and Monitoring

Notice of Publication of Draft Environmental Impact Assessment Report and Virtual Open Houses Ontario Line Project

The Project

The Ontario Line will bring 15.6 kilometres of new subway service to Toronto, making it faster and easier for people to get where they need to be each day. The line will stretch across the city, from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line will have 15 new stations, including six interchange stations, connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable service.

Environmental Impact Assessment Report

Environmental impacts of the Ontario Line are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*. In accordance with Section 15 of O. Reg. 341/20, Metrolinx has prepared the Draft Environmental Impact Assessment Report that is now available for review.

The Draft Environmental Impact Assessment Report describes existing environmental conditions in the Project study area, environmental impacts, mitigation and monitoring measures, consultation, and required permits and approvals for the Ontario Line.

The Draft Environmental Impact Assessment Report Review and Consultation Process

Effective **February 7, 2022**, the Draft Environmental Impact Assessment Report will be available for review on the Ontario Line project webpage (www.metrolinx.com/ontarioline). You can view and comment on the report from **February 7 to March 9, 2022** via the online form provided.

You can also participate in virtual open houses, where you can hear from project experts and ask questions about the report in real time, at MetrolinxEngage.com/OntarioLine/live on:

- **February 22, 2022 and February 24, 2022** from 6:30 to 8:00 p.m., with a focus on the portion of the project from Science Centre Station to Gerrard Station
- **March 1, 2022 and March 3, 2022** from 6:30 to 8:00 p.m., with a focus on the portion of the project from Gerrard Station to Exhibition Station

Those who wish to provide comments on the Draft Environmental Impact Assessment Report must do so by **March 9, 2022** and submit them using the webpage form or address them to the following email: ontarioline@metrolinx.com.

Section 17 of O. Reg. 341/20 requires Metrolinx to establish an issues resolution process to attempt to resolve any concerns raised by the public or Indigenous Nations during the review period. At the end of the review period, Metrolinx will update the Draft Environmental Impact Assessment Report by adding a description of the issues resolution process, what Metrolinx did to address any concerns, and if the Ontario Line implementation timeline will be impacted as a result of addressing concerns. Metrolinx will then publish the Final Environmental Impact Assessment Report on the Ontario Line project webpage: www.metrolinx.com/ontarioline and issue a Notice of Publication of the Final Environmental Impact Assessment Report.

To obtain a copy of the Draft Environmental Impact Assessment Report, please contact the Ontario Line project email listed above.

Mark Clancy (T: 416-202-5100, E: ontarioline@metrolinx.com) may be contacted on behalf of Metrolinx.

This may include planting or seeding native flowering plants in temporarily disturbed areas. Opportunities to plant milkweed or forage vegetation outside of and in the rail RoW will be undertaken, where possible, and in accordance with the Metrolinx Vegetation Guideline (2020b). If vegetation clearing proceeds when monarch larvae may be present (April 1 to September 30), milkweed plants should be inspected for monarch larvae prior to their removal. If larvae are present, they may be moved to a location that is suitable and safe, under the direction of a qualified biologist. Monarch caterpillars may be moved to other milkweed plants; for other larval stages (i.e., eggs and chrysalis). Entire milkweed plants will be transplanted. <p>Operations</p> <ul style="list-style-type: none"> As no impacts are anticipated to significant wildlife habitat for monarch during operations, no mitigation measures are recommended. 	<p>Construction</p> <ul style="list-style-type: none"> Regular monitoring will be undertaken during construction to prevent unauthorized impacts to habitats used by Monarchs. This will include regular inspection to confirm that protection fencing around the habitat remains intact, and that there is no encroachment into the habitat. <p>Operations</p> <ul style="list-style-type: none"> As no impacts are anticipated to significant wildlife habitat for monarch during operations, no monitoring activities are recommended.
Wildlife and wildlife habitat – significant wildlife habitat – common nighthawk (Species of Conservation Concern)	<p>Construction</p> <ul style="list-style-type: none"> Removal of candidate nesting habitat for common nighthawk <p>Operations</p> <ul style="list-style-type: none"> Potential impacts are not anticipated during operations 	<p>Construction</p> <ul style="list-style-type: none"> Refer to mitigation measures described for migratory breeding birds and nests. Demolition of buildings should be scheduled outside the breeding bird season of April 1 to August 31. If this is not possible and buildings must be demolished during this period, the following will be completed: <ul style="list-style-type: none"> The roofs will be checked for presence of gravel. If gravel is not present, then the building is unlikely to provide suitable nesting habitat for common nighthawk. If gravel is present, a search for eggs and nesting activity for common nighthawk on the roof will be conducted. If nests or nesting activity of common nighthawk are confirmed, the building cannot be demolished until it is confirmed by a qualified biologist that young have fully fledged and left the nest. <p>Operations</p> <ul style="list-style-type: none"> As no impacts are anticipated to significant wildlife habitat for common nighthawk during operations, no mitigation measures are recommended. 	<p>Construction</p> <ul style="list-style-type: none"> Regular monitoring will be undertaken to confirm that activities do not encroach into nesting areas or disturb active nesting sites. <p>Operations</p> <ul style="list-style-type: none"> As no impacts are anticipated to significant wildlife habitat for common nighthawk during operations, no monitoring activities are recommended.

Environmental Component	Potential Impact	Mitigation Measure(s)	Monitoring Activities
Wildlife and wildlife habitat – migratory breeding birds and nests, including Species of Conservation Concern (birds).	Construction <ul style="list-style-type: none"> Disturbance or destruction of migratory bird nests, including candidate significant wildlife habitat for the following Species of Conservation Concern birds: <u>OLW and OLS Study Areas</u> Common Nighthawk, Eastern Wood-pewee, Peregrine Falcon, Red-headed Woodpecker, and Wood Thrush Note: In the OLS Study Area, impacts to Peregrine Falcon habitat are not anticipated to the Sheraton Centre since the Ontario Line Subway tracks are tunneled underground adjacent to the building and there are no proposed above ground construction activities within approximately 100 metres from the building. <u>OLN Study Area</u> Black-crowned Night Heron, Common Nighthawk, Great Egret, Peregrine Falcon, Red-headed Woodpecker, and Wood Thrush Operations <ul style="list-style-type: none"> Disturbance or destruction of migratory bird nests during operational vegetation maintenance activities, if applicable 	Construction <ul style="list-style-type: none"> All works must comply with the MBCA, including timing windows for the nesting period (April 1 to August 31). If activities are proposed to occur during the general nesting period, a breeding bird and nest survey will be undertaken prior to required activities. Nest searches by an experienced searcher are required and will be completed by a qualified biologist no more than 48 hours prior to vegetation removal. If a nest of a migratory bird is found outside this nesting period, (including a ground nest) it still receives protection. Bird SAR are also protected by the ESA and migratory bird SAR are protected by the federal <i>Species at Risk Act</i>. Mitigation measures for bird SAR are discussed under the Species at Risk heading. Operations <ul style="list-style-type: none"> All works must comply with the MBCA, including timing windows for the nesting period (April 1 to August 31). If operation vegetation maintenance activities are proposed to occur during the general nesting period, a breeding bird and nest survey will be undertaken prior to required activities. Nest searches by an experienced searcher are required and will be completed by a qualified biologist no more than 48 hours prior to vegetation removal. If a nest of a migratory bird is found outside of this nesting period (including a ground nest), it still receives protection 	Construction <ul style="list-style-type: none"> Regular monitoring will be undertaken to confirm that activities do not encroach into nesting areas or disturb active nesting sites. Operations <ul style="list-style-type: none"> Regular monitoring will be undertaken to confirm that activities do not encroach into nesting areas or disturb active nesting sites.
Wildlife and wildlife habitat – significant wildlife habitat – Turtles and Turtle Habitat, including Species of Conservation Concern – in the OLS and OLN Study Areas	Construction <ul style="list-style-type: none"> Potential for impacts to turtles and/or turtle habitat including confirmed habitat for Northern Map Turtle and candidate habitat for Snapping Turtle near the Lower Don River Operations <ul style="list-style-type: none"> Potential for impacts to turtles and/or turtle habitat during operational vegetation maintenance activities, if applicable 	Construction <ul style="list-style-type: none"> Work in turtle habitat will be planned in consideration of turtle overwintering period which occurs from October 1 to April 30 in any given year. It is also possible that turtle surveys would need to be conducted prior to the work. If required, reptile exclusion fencing will be installed according to the Reptile and Amphibian Exclusion Fencing Best Practices (MNR 2013) and fencing should be inspected daily to ensure it is tight and no species are entangled. Post-construction habitat restoration will be implemented as required. Operations <ul style="list-style-type: none"> Work in turtle habitat will be planned in consideration of turtle overwintering period which occurs from October 1 to April 30 in any given year. It is also possible that turtle surveys would need to be conducted prior to the work. 	Construction <ul style="list-style-type: none"> Onsite inspection will be undertaken to confirm the implementation of the mitigation measures and identify corrective actions, if required. Corrective actions may include additional site maintenance and alteration of activities to reduce impacts. Operations <ul style="list-style-type: none"> Onsite inspection will be undertaken to confirm the implementation of the mitigation measures and identify corrective actions, if required. Environmental Component	Potential Impact	Mitigation Measure(s)	Monitoring Activities
Aquatic Habitat			
Aquatic Environment – Wetlands and Waterbodies	<p>Construction</p> <p><u>OLS Study Area</u></p> <ul style="list-style-type: none"> Impacts to riparian vegetation, erosion and sedimentation to waterbodies from construction; risk of contamination to waterbodies as a result of spills. <p><u>OLN Study Area</u></p> <ul style="list-style-type: none"> Removal or impacts to wetland; aquatic and riparian vegetation; degradation of wetlands as result of dewatering and discharge activities; erosion and sedimentation to wetlands/waterbodies from construction; and risk of contamination to wetlands/waterbodies as a result of spills. <p>Operations</p> <ul style="list-style-type: none"> Potential impacts are not anticipated during operations 	<p>Construction</p> <ul style="list-style-type: none"> Construction activities will maintain the buffers established during the design phase to reduce potential negative impacts to wetlands and waterbodies. Shorelines or banks disturbed by construction activities will be immediately stabilized by any activity associated with the project to prevent erosion and/or sedimentation, preferably through re-vegetation with native species suitable for the site. An Erosion and Sediment Control Plan, in accordance with the Greater Golden Horseshoe's Erosion and Sediment Control Guideline for Urban Construction (2006) and the Erosion and Sediment Control Guide for Urban Construction (TRCA 2019), as amended from time to time, will be prepared prior to and implemented during construction to reduce the risk of sedimentation. A Spill Prevention and Response Plan will be developed before work commences so that procedures and policies are in place to reduce impacts to wetlands and watercourses during construction. In wetland areas where vernal pooling occurs, prior to dewatering isolated work areas, wildlife will be captured and relocated to suitable habitat outside of the work area. Vegetation removals will also consider and mitigate potential impacts to wetland communities. Until such a time, that an Ontario Wetland Evaluation System evaluation is completed and evaluated by NDMNRF, unevaluated wetlands will be considered as significant for the purposes of assessing impacts. Wetland communities potentially affected by the Project will be clearly staked out on site. If dewatering is proposed, then it is recommended to be undertaken during the winter when the potential impacts of changes in water levels are less significant in wetland communities. During detailed design, the need for a dewatering zone of influence assessment and dewatering monitoring plan should be evaluated. The dewatering monitoring plan, if required, will monitor for potential negative impacts on nearby wetlands and adjacent vegetation communities to confirm if they would be affected due to dewatering activities. An adaptive management plan will be prepared if negative impacts are observed. Prior to dewatering isolated work areas, fish will be captured and relocated to suitable habitat outside of the work area under a Licence to Collect Fish for Scientific Purposes from the NDMNRF. <p>Operations</p> <ul style="list-style-type: none"> As no impacts are anticipated to wetlands and waterbodies during operations, no mitigation measures are recommended. 	<p>Construction</p> <ul style="list-style-type: none"> Onsite inspection will be undertaken to confirm the implementation of the mitigation measures and identify corrective actions, if required. Corrective actions may include alteration of activities to reduce impacts and enhance mitigation measures. <p>Operations</p> <ul style="list-style-type: none"> As no impacts are anticipated to wetlands and waterbodies during operations, no monitoring activities are recommended.
Aquatic Environment – Fish and Fish Habitat	<p>Construction</p> <p><u>OLS Study Area</u></p> <ul style="list-style-type: none"> No in-water works, no direct impacts to fish and fish habitat Indirect - Dewatering activities and water discharge resulting in changes in water velocity or temperature, soil 	<p>Construction</p> <ul style="list-style-type: none"> All requirements of the <i>Fisheries Act</i> will be met. In the event that in-water and/or near water construction works are required appropriate mitigation measures will be followed, as identified in Applicable Law and through consultation with the relevant authorities including Fisheries 	<p>Construction</p> <ul style="list-style-type: none"> Onsite inspection will be undertaken to confirm the implementation of the mitigation measures and identify corrective actions, if required. Corrective

Dear Chief Mowat,

Please find attached a letter inviting participation in the archaeological monitoring of borehole drilling planned to occur in the Lower Don Bridge area as part of the Ontario Line Project.

The date of this fieldwork is tentatively set for March 7, 2022. If you are interested in participating, please let me know as soon as possible and we will work with you and the project team to coordinate.

If you have any questions or concerns, please feel free to reach out to me at any time.

Thank you for your time and assistance.

Jaimi

Delivered by email

Dear Chief Mowat,

RE: Ontario Line Project - Invitation to Participate in Archaeological Monitoring for Borehole Drilling - Lower Don Bridge Area

Metrolinx continues to progress the Archaeological studies for the Ontario Line project and wanted to invite Alderville First Nation to participate in further Archaeological monitoring for borehole drilling planned for the Lower Don Bridge area.

A Stage 1 Archaeological Assessment (AA) was completed as part of the Ontario Line Environmental Impact Assessment Report (EIAR). This report identified the area for the proposed boreholes as having archaeological potential. Both the Stage 1AA report and the EIAR were shared with Nations, in both August and November 2021.

Metrolinx is completing an Environmental Site Assessment in the Lower Don area (please see **Figure 1**). Given the identified archaeological potential of the area, archaeological monitoring will take place for the planned borehole drilling. This approach will provide for the on-site identification of archaeological resources and, if necessary, stop-work order of drilling by a licensed archaeologist in the event potential archaeological resources are encountered. A licensed archaeologist will be on-site during drilling to visually inspect spoil removed during borehole drilling as well as intermittent borehole samples to visually identify the presence of artifacts. Metrolinx would value any participation that Alderville First Nation may wish to have in this monitoring program.

Please see the fieldwork details below:

Start Date: March 7, 2022 (potentially March 8 as well depending on drilling)

Duration: 1 day

Start Time: 8:30am

Consultant Company: Stantec

Contact information: Jeffrey Muir - (289) 208-5298

Assessment: Archaeological monitoring for borehole drilling

Size of Field Crew: 1 field supervisor

Parking and meeting location: See Figure 2. Meet and park at yellow star - along Bayview Ave and Mill St

Required PPE:

- Class 2 PPE (hi-viz vest)
- CSA Type 2 Hard Hat with foam insert (bump caps)
- CSA approved eye protection
- CSA approved 6" laced safety shoes
- CSA Hearing protection, in ear or over ear
- Appropriate clothing for weather conditions

Invitation to Participate in Fieldwork

Metrolinx would value the involvement of Alderville First Nation in the upcoming archaeological monitoring fieldwork outlined above. Should your Nation wish to participate, please let us know at your earliest convenience. We welcome any requests for a meeting to discuss opportunities to participate or to explore this project in more detail with Alderville First Nation. Upon receipt of Alderville First Nation's interest in participating, Metrolinx will work to coordinate your Nation's involvement. Metrolinx is also willing to share fieldnotes and/or a summary of the borehole and geotechnical data in addition to the open invitation to participate directly in the monitoring.

Engagement

Regardless of whether or not your Nation participates in the fieldwork, Metrolinx will inform you of discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will also ensure that future Archaeological Assessment reports are provided to your Nation in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries.

If you require additional information or materials, or if you wish to discuss this project in more detail, please contact, Jaimi O'Hara, Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Thank you for your time and consideration.

Yours Truly,

Sarah Chowdhury, Environmental Project Manager
Environmental Programs & Assessment
Metrolinx

Attachments: [OL Archaeological Monitoring Invitation for Participation in monitoring for Boreholes_BFN.pdf](#)

Dear Chief Monague,

I am sharing the following with the whole team as this lands somewhere between environmental and archaeology.

Please find attached a letter inviting participation in upcoming archaeological monitoring for borehole drilling that is taking place at various locations to support environmental assessment and geotechnical studies related to the Ontario Line Subway project. The boreholes are being drilled in locations that have known archaeological potential and as such Metrolinx is ensuring that a consultant archaeologist is on-site to monitor. We'd like to extend this invite to your Nation as well. We appreciate that during these uncertain times of COVID-19 this may not be possible or safe for your Nation. We are happy to provide any fieldnotes taken by the consultant archaeologist and/or provide a summary of the data collected if this is at all helpful to you. Please let us know if there is any other way we can support your Nation during this time.

The boreholes are anticipated to be completed over the next several weeks beginning this Friday on **January 22, 2021**. Please let me know if you have interest in participating as soon as possible, and we will work with you and the project team to coordinate.

Miigwetch,

Fallon

Dear Chief Monague,

RE: Ontario Line Project - Corktown Archaeological Monitoring for Borehole Drilling

Metrolinx and its consultants, Wood and Stantec, will be undertaking geotechnical and environmental site assessment investigations in Corktown. As part of this work boreholes will be drilled at 271 Front St East, 44 Parliament St and 25 Berkeley St. These boreholes will be located on/near potential archaeological sites and an archaeologist will be on site to monitor the drilling activities (see attached figures for location). We are writing to invite Beausoleil First Nation to participate in the archaeological monitoring associated with this work. Metrolinx appreciates the impacts of COVID-19 on Indigenous Nations and acknowledges that this may impact Beausoleil First Nation's ability to participate due to safety concerns. If preferable, Metrolinx is happy to share any fieldnotes taken by the consultant archaeologist as well as a summary of the borehole and geotechnical study data for review.

The fieldwork is anticipated to be conducted between January 22nd and February 12th, 2021, as detailed below:

Activity	Anticipated Timeline	Location		
		271 Front St E	44 Parliament St	25 Berkeley St
Drilling – Geotechnical Locations	Jan 22 – Feb 12, 2021		x	
Drilling – Environmental Locations	Feb 2 - 4, 2021	x		
	Feb 5 and 8, 2021		x	
	Feb 9 - 10, 2021			x

Invitation to Participate in Fieldwork

Metrolinx would appreciate any interest Beausoleil First Nation may have in participating in the archaeological monitoring fieldwork. The attached maps illustrate

the location of the boreholes that will be drilled. Upon receipt of Beausoleil First Nation's interest in participating, Metrolinx will work to coordinate your Nation's involvement.

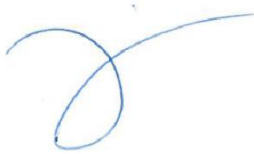

Engagement

Regardless of whether or not your Nation participates in the fieldwork, Metrolinx will inform you of discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will also ensure that future Archaeological Assessment reports are provided to your community in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries.

If your Nation wishes to participate in the fieldwork, or if you'd prefer to receive fieldnotes and/or a summary of the borehole and geotechnical data, please let us know at your earliest convenience. If you require additional information or materials, or if you wish to discuss this project in more detail or set up an in-person meeting, please contact Fallon Melander, Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*. Thank you for your time in reviewing these assessments.

Dear Chief Monauge,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. Attached you will find a letter providing an update on the project. The purpose of this letter is to:

- Provide an update on the scope of the project work
- share the initial draft of the Early Works Report for the proposed Corktown Station
- Invite your Nation to participate in upcoming archaeological fieldwork

In an effort to streamline your review, we draw your attention to the attachment which provides an overview of the expected environmental impacts and proposed mitigations, as we know this may be of specific interest to you.

Metrolinx is also preparing a letter specific to works being planned within the Don Valley as we recognize the significance of this waterway to many Nations. We hope to share that letter soon. We are happy to meet with your Nation to discuss the Ontario Line and address any questions or concerns that your Nation may have.

We ask that any comments on the draft Corktown Station Early Works Report be provided no later than **April 15, 2021**. Please note that the Noise and Vibration Report, which will be part of the Early Works Report is still being prepared and we will share with your Nation by March 19, 2021.

The draft Corktown Station Early Works Report is available at the following link:

Please let us know as soon as possible if your Nation has interest in participating in future archaeological fieldwork.

We appreciate the volume of documents that Metrolinx has shared with your Nation.

If you have any questions or concerns, please do not hesitate to contact me.

Miigwetch,

Fallon

Christian Island, ON L9M 0A9
Delivered by Email

Dear Chief Monague,

RE: Ontario Line Project - Corktown Station Early Works Report

Metrolinx, a regional transportation agency, is helping to transform the way the Greater Golden Horseshoe region moves by building a fast, convenient and integrated transit network. As part of this work, Metrolinx is proceeding with the Ontario Line which will bring nearly 16 kilometres of subway service to Toronto. The purpose of this letter is to share information regarding the Ontario Line project with Beausoleil First Nation.

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Beausoleil First Nation. Metrolinx appreciates and respects Beausoleil First Nation's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to share with Beausoleil First Nation information regarding Corktown Station early works and invite feedback on the initial draft of the Corktown Station Early Works Report.

Project Description

The Project is a new subway line with connections to Line 1 (Yonge-University) subway service at Osgoode and Queen Stations, Line 2 (Bloor-Danforth) subway service at Pape Station, and Line 5 (Eglinton Crosstown) service at the future Science Centre Station. Fifteen stations are proposed, with additional connections to three GO Transit lines (Lakeshore East, Lakeshore West and Stouffville), and the Queen, King, Bathurst, Spadina, Harbourfront and Gerrard/Carlton streetcar routes. The Project will reduce crowding on Line 1 and provide connections to new high-order rapid transit neighbourhoods. More information on the Project can be found on our website: www.metrolinx.com/ontarioline

Ontario Line Environmental Assessment Process and Reports

In 2020, Metrolinx provided Beausoleil First Nation with an outline of the Ontario Line environmental assessment process. The environmental assessment for the Ontario Line Project is being completed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20) made under the *Environmental Assessment Act*. The regulation outlines a Project-specific environmental assessment that includes an Environmental Conditions Report, an Environmental Impact Assessment Report and provides opportunity for Early Works Reports for assessment of works that are ready to proceed in advance of the Environmental Impact Assessment Report. An overview of the reports is outlined below and their anticipated publication timeline is provided in **Attachment 1**.

Environmental Conditions Report

The Environmental Conditions Report characterizes existing environmental conditions within the Ontario Line study area through a combination of desktop review and field studies and was finalized in November 2020. The report also summarizes potential impacts and mitigation measures for consideration during project planning and design. Potential impacts and mitigation measures identified in the Environmental Conditions Report will be confirmed and refined within the Early Works Reports and the Environmental Impact Assessment Report.

Early Works Reports

Metrolinx is assessing several early works components to support the main construction of the Ontario Line project. Early works are components of the Ontario Line Project that are anticipated to be ready to proceed before completion of the Environmental Impact Assessment Report, such as station construction, rail corridor expansion, utility relocation or bridge replacement or expansion, as defined in O. Reg. 341/20.

Initially, the early works required to support the Ontario Line project were assessed in a single report, which was shared in June 2020 and included Exhibition Station, Lower Don Bridges, Lakeshore East Joint Corridor and East Harbour early works.

Since then, the single Early Works Report has been split into several Early Works Reports, each covering either a single early works location or multiple locations if they are in close proximity. Each Early Works Report provides a description of the early works and alternatives considered, documents local environmental conditions, and outlines early works-specific environmental impacts, mitigation measures,

monitoring activities, potentially required permits and approvals and other components.

It is important to note that two new early works projects, Don Yard and Corktown Station, have been added as well. The Early Works Reports, including this new scope of work are summarized below:

- Exhibition Station Early Works
Exhibition Station early works are documented in the Exhibition Station Early Works Report, finalized in February 2021.
- Lakeshore East Joint Corridor Early Works
Lakeshore East Joint Corridor early works will be documented under a separate Early Works Report which will also include East Harbour Station.
- Lower Don Bridges & Don Yard Early Works
Lower Don Bridges early works will be documented in the Lower Don Bridges and Don Yard Early Works Report. Don Yard is a new early works project that will include construction of Ontario Line tunnel and portal structures between Cherry Street and the Lower Don River and accompanying shift of the Richmond Hill and Lakeshore East GO tracks; installation or upgrading of retaining walls and noise barriers, where appropriate; and utility and signal infrastructure relocation or protection. The initial draft of the Lower Don Bridges and Don Yard Early Works Report is anticipated to be shared with Beausoleil First Nation in mid to late April.
- Corktown Station Early Works
Corktown Station is a new early works project. Further information on Corktown Station early works is provided below.

Environmental Impact Assessment Report

The main report produced as part of this process is the Environmental Impact Assessment Report. It will cover the construction and operation of the Ontario Line. The report will include a final description of the Ontario Line Project, environmental impact evaluation results, mitigation measures, monitoring activities, potentially required permits and approvals and other components as outlined in O. Reg. 341/20.

Work along the Don River and within the vicinity of the Don Valley

Metrolinx appreciates the significance of waterways to Beausoleil First Nation. As such, Metrolinx is preparing an information letter specific to work occurring near or along the Don River and within the Valley. Metrolinx will provide details about the scope of work and anticipated natural environmental and archaeological assessments. Metrolinx is committed to exploring opportunities for Beausoleil First Nation to participate in these assessments should Beausoleil First Nation express interest.

Corktown Station Early Works

The Corktown Station site has been identified for launching tunnel excavation equipment for the downtown and Don Yard segments of the proposed Ontario Line alignment, as well as the location for the Corktown Station. The First Parliament site, located within the Corktown Station area, is a known archaeological site which requires additional archaeological study ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures, followed by completion of necessary archaeological studies, is required. Completion of this preparatory work on an expedited basis is essential to allow for the timely delivery of the overall Project.

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These activities will enable completion of environmental due diligence investigations, including archaeological assessments. These activities will occur on properties within the Corktown Station early works project footprint, as shown in **Figure 2**.

Figure 2: Map of Corktown Station Early Works

Environmental impacts of Corktown Station early works are being assessed in accordance with O. Reg. 341/20.

Metrolinx is sharing the initial draft of the Corktown Station Early Works Report, including the Corktown Station Natural Environment Report, via the Dropbox link enclosed in the email for Beausoleil First Nation's review. The Corktown Station Early Works Report documents the assessment of Corktown Station early works. It also outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures, and a consultation record. For a summary of the potential mitigation measures identified, please see the table found as **Attachment 2**.

Note that the initial draft of the report enclosed in the email currently does not include information on noise and vibration as the Corktown Station Noise and Vibration Report is still being prepared. The initial draft of the Corktown Station Noise and Vibration Report is anticipated to be shared with Beausoleil First Nation on **March 19, 2021** for review.

Metrolinx welcomes any comments or feedback on the initial draft of the Corktown Station Early Works Report from Beausoleil First Nation. Please provide these in writing no later than **April 15, 2021**.

Based on our currently anticipated schedule (**Figure 1**), the Notice of Publication of Draft Corktown Station Early Works Report is planned for late-April 2021, at which point the draft report will be available to all interested parties for review, including Beausoleil First Nation, the public and regulatory agencies.

Archaeology

As outlined above, archaeological assessments are anticipated to take place as part of advancing Corktown Station Early Works. Metrolinx would appreciate any interest Beausoleil First Nation may have in participating in planned future archaeological fieldwork for this site. The maps in **Attachment 3** illustrate the areas that will be subject to future archaeological assessments that include fieldwork. Upon receipt of Beausoleil First Nation's interest in participating, Metrolinx will work to coordinate your Nation's involvement.

Metrolinx acknowledges that Beausoleil First Nation should be aware of and engaged regarding any future archaeological work, especially the discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will ensure that future archaeological assessments are provided to Beausoleil First Nation in draft form, prior to submission to MHSTCI.

Engagement

Metrolinx is committed to an open, respectful, and transparent relationship with Beausoleil First Nation. We appreciate the significant volume of documents related to this Project that have been shared with Beausoleil First Nation. We are happy to assist in the review of these documents by meeting with Beausoleil First Nation or working to address any questions that Beausoleil First Nation may have about this Project. If you require additional information or materials or if you wish to discuss these Projects in more detail or set up a meeting, please contact Fallon Melander, Manager of Metrolinx's Indigenous Relations Office at IndigenousRelations@metrolinx.com.

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*. Thank you for your time in reviewing these assessments.

Thank you for your time in reviewing this letter.

Subject: Ontario Line Project - Invitation to Meet & provide input on First Parliament Site
Date: Monday, April 12, 2021 3:47:47 PM
Attachments: [First Parliament_BFN.pdf](#)

Dear Chief Monague,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. We recently communicated with your Nation about the proposed Corktown Station which is along the planned alignment of the Ontario Line. This location includes parcels of land which were once the site of Upper Canada's First Parliament buildings. Metrolinx and its partners are exploring opportunities to commemorate the history of this site, and have been engaging with various parties including the City of Toronto and the Mississaugas of the Credit First Nation, on whose treaty territory this project is occurring.

Given the significant chance of recovering Indigenous and European artifacts during the Corktown Station Early Works, a detailed archaeological workplan is being developed. Metrolinx recognizes the importance and value of Indigenous monitors for any archaeology related to the Ontario Line Project. In our previous communication, an invitation was included for your Nation to participate in any archaeological fieldwork and monitoring during the Corktown Station Early Works, including demolition of modern buildings currently on the First Parliament site.

This work is anticipated to commence in Fall 2021, and if you have not yet expressed interest in participating, please feel free to do so at your earliest convenience. As a reminder any comments on the draft Corktown Station Early Works Report should be provided no later than **April 15, 2021**.

Metrolinx recognizes that the history of this location extends beyond European use, and as such, wants to take the opportunity to understand any significance it may have to Indigenous Nations. Metrolinx would like to meet with your Nation to discuss the First Parliament site, its commemoration, as well as review the broader Ontario Line project if you wish. We recognize that traditional knowledge of this area may be sacred and/or not appropriate to be shared, but would appreciate any information that may be appropriate for Metrolinx to consider.

This letter is not intended to replace engagement but to provide a high level summary for your information. We would very much appreciate meeting with your Nation to discuss in more detail. Please let me know if you have any questions or concerns. We appreciate the volume of documents that Metrolinx has shared with your Nation. If you have any questions or concerns, please do not hesitate to contact me.

Miigwetch,

Fallon

Dear Chief Monague,

RE: Ontario Line Project - First Parliament Site and Lime Kiln Site

Metrolinx, a regional transportation agency, is helping to transform the way the Greater Golden Horseshoe moves by building a fast, convenient and integrated transit network. As part of this work, Metrolinx is continuing the pre-construction planning of the Ontario Line which will bring nearly 16 kilometres of subway service to Toronto.

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Beausoleil First Nation. Metrolinx appreciates and respects Beausoleil First Nation's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to share with Beausoleil First Nation information regarding Corktown Station early works and additional information regarding upcoming field visits and investigations at the Corktown Station early works site, which includes two registered archaeological sites, the First Parliament site and the Lime Kiln site.

Project Description

The proposed Ontario Line is a new 16-kilometer subway line, which will occupy an exclusive right-of-way system encompassing a combination of below-grade, above-grade, and at-grade alignment. The route (Figure 1) will run from Ontario Place/Exhibition through downtown Toronto to the Ontario Science Centre in the City of Toronto, with six (6) potential interchange stations and 17 new connections to GO Transit, existing subways and streetcars. More information on the Project can be found on our website: www.metrolinx.com/ontarioline

Corktown Station Early Works

As communicated in the letter sent to Beausoleil First Nation on March 11, 2021, the Corktown Station site has been identified for launching tunnel excavation equipment for the downtown and Don Yard segments of the proposed Ontario Line alignment, as well as the location of the Corktown Station. The First Parliament and Lime Kiln Sites, located within the Corktown Station area, are known archaeological sites which require additional archaeological study ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures, followed by completion of necessary archaeological studies, is required. Completion of this preparatory work on an expedited basis is essential to allow for the timely delivery of the overall Project and is anticipated to begin in the Fall 2021, subject to the completion of the Corktown Station early works process in accordance with Ontario Regulation 341/20: Ontario Line Project.

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These activities will enable completion of environmental due diligence investigations, including archaeological assessments. These activities will occur on properties within the Corktown Station early works project footprint, as shown in **Figure 1**.

Figure 1: Map of Corktown Station Early Works

Environmental impacts of Corktown Station early works are being assessed in accordance with O. Reg. 341/20. Metrolinx shared the draft Corktown Station Early Works Report and associated discipline reports with Beausoleil First Nation on March 11, 2021 and had requested any comments to be provided by April 9, 2021.

Archaeological Work at the First Parliament Site and Lime Kiln Site

Metrolinx appreciates the significance of archaeology to Beausoleil First Nation. The properties at 265 Front Street East, 271 Front Street East, and 25 Berkeley Street, in the St. Lawrence neighbourhood of the City of Toronto, are collectively host to the First Parliament Site. It is located on the southwest corner of Parliament Street and King Street, between Parliament Street and Berkeley Street. The First Parliament Site is a registered archaeological site (AjGu-41) which may include resources associated with the First and Second Parliament Buildings, the Home District Gaol, and Consumers' Gas company buildings. The surface of the property is currently occupied by automotive businesses, including a car dealership, car wash, and surface parking lot. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and remnants of early Toronto industry may be found at this site.

North of the First Parliament Site is another registered archaeological site (AjGu-64), the Lime Kiln Site, which includes remains from the Toronto Lime Works Company. A variety of structural features, in various states of preservation, have been documented on this site. The location of the Lime Kiln Site and the First Parliament Site are shown in **Figure 2**.

Figure 2: Location of First Parliament Site and Lime Kiln Site Areas

The First Parliament Site and Lime Kiln Site require additional archaeological studies ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures is necessary. Completion of this preparatory work is essential to allow for the timely delivery of the Ontario Line.

Archaeological fieldwork to remove or protect archaeological resources is anticipated to commence in early Fall 2021, and a workplan for these archaeological investigations is under development. As mentioned in the letter sent on March 11, 2021, Beausoleil First Nation is invited to participate in all archaeological fieldwork, and to review and provide comments on forthcoming reports.

Feedback on Commemoration of First Parliament Site

Metrolinx appreciates that the history of the First Parliament site is not one simply of Canadian origin, but rather holds longer history and tradition. Metrolinx also appreciates that the site of the First Parliament of Upper Canada is linked to a history of colonization and harmful practices towards Indigenous Peoples. Given the significance of this site, Metrolinx is engaging with Indigenous Nations, City of Toronto and the broader community to identify opportunities for commemoration. Metrolinx is committed to ensuring that any feedback from Beausoleil First Nation regarding the significance of this site is considered as part of this commemoration. Metrolinx appreciates that traditional or cultural knowledge about this site may be sacred and/or not be appropriate to be shared but welcomes any comments or ideas from Beausoleil First Nation that may be appropriate to commemorate Indigenous Peoples.

Engagement

Metrolinx is committed to an open, respectful, and transparent relationship with Beausoleil First Nation. We would like to meet with Beausoleil First Nation to better understand any significance the First Parliament site may have to your Nation. We are also happy to assist in reviewing the Corktown Station Early Works Report or reviewing the proposed archaeological workplan for this site. If Beausoleil First Nation requires additional information or materials, or you wish to discuss this project in more detail or set up a meeting, please contact Fallon Melander, Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*. Thank you for your time in reviewing these assessments.

Thank you for your time in reviewing this letter.

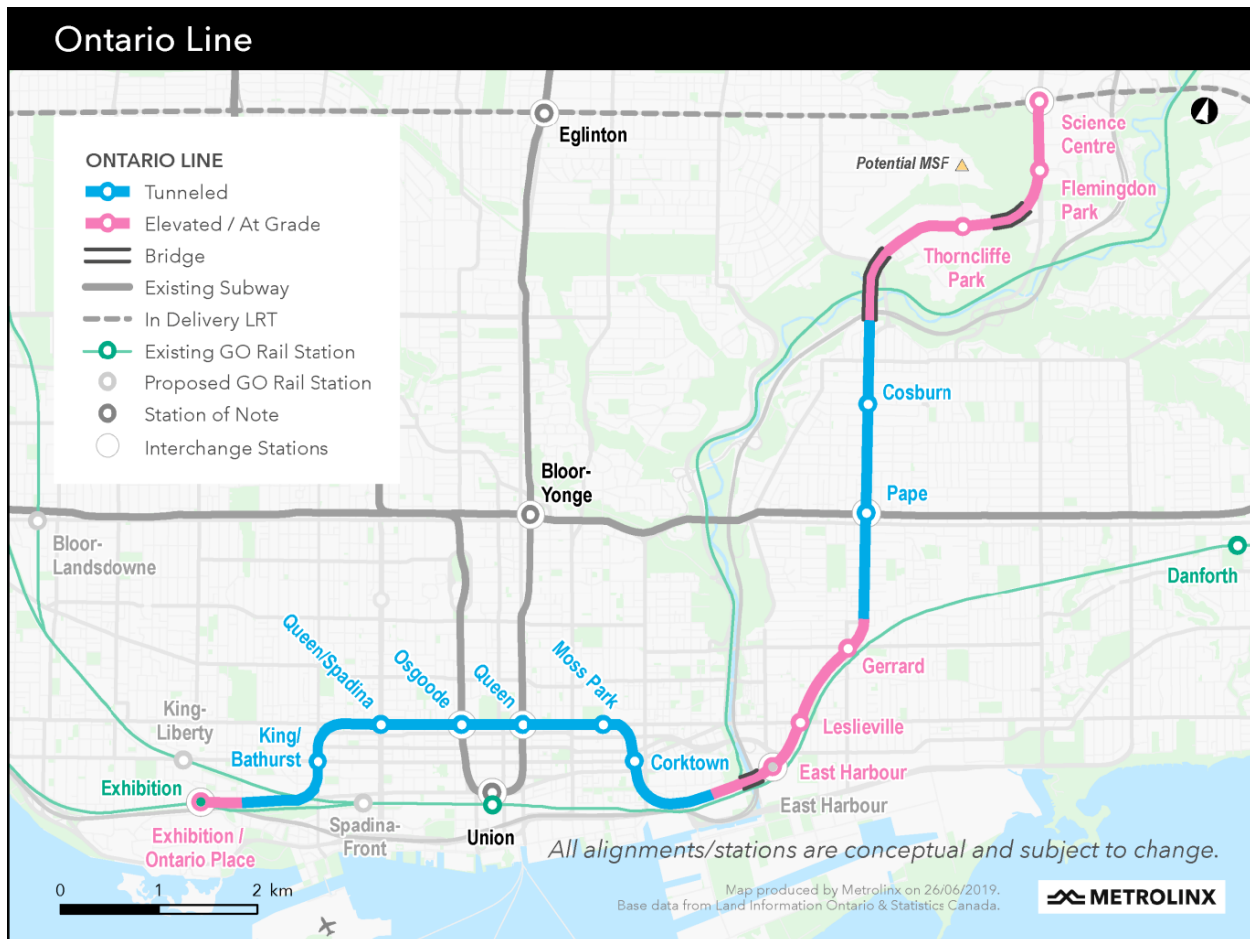

Yours Truly,

Dear Chief Monague,

Metrolinx continues to progress its environmental studies for the Ontario Line Project. We wanted to keep you aware that part of the project scope falls within the Don Valley and River System, and we recognize the importance of Valley and the waters within. Attached you will find a letter providing an update on the project and information regarding the planned work and environmental assessments that are anticipated to take place within the Don Valley. We also wanted to invite your Nation to participate in the planned Stage 2 Archaeological Assessments that are anticipated to occur as part of the upcoming field season.

This letter is not intended to replace engagement but to provide a high level summary for your information. We would very much appreciate meeting with your Nation to discuss in more detail. Please let me know if you have any questions or concerns.

Miigwetch,

Fallon

Delivered by Email

Dear Chief Monague,

RE: Ontario Line Project - Don River Crossings & Stage 2 Archaeological Assessment Update

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Beausoleil First Nation. Metrolinx appreciates and respects Beausoleil First Nation's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to provide more information to Beausoleil First Nation about the Ontario Line crossings of the Don River and its tributaries. Metrolinx appreciates the significance of the waters and wishes to better understand how the potential impacts of construction around the Don River may be of interest to Beausoleil First Nation.

Background

The Project is a new subway line with connections to Line 1 (Yonge-University) subway service at Osgoode and Queen Stations, Line 2 (Bloor-Danforth) subway service at Pape Station, and Line 5 (Eglinton Crosstown) service at the future Science Centre Station. Fifteen stations are proposed, with additional connections to three GO Transit lines (Lakeshore East, Lakeshore West and Stouffville), and the Queen, King, Bathurst, Spadina, Harbourfront and Gerrard/Carlton streetcar routes. The Project will reduce crowding on Line 1 and provide connections to new high-order rapid transit neighbourhoods. More information on the Project can be found on our website: <http://www.metrolinx.com/ontarioline>.

Work in the Don River System

As part of the Ontario Line Project, the following four crossings within the Don River system are proposed:

- Location 1: Lower Don River Crossing (Lower Don Bridge);

10 Bay Street
Toronto, ON M5J 2N8

metrolinx.com

- Location 2: Millwood Road Crossing;
- Location 3: Walmsley Brook Crossing; and
- Location 4: West Don River Crossing north of Overlea Boulevard.

Locations 1-4 are shown in **Figure 1** and described in further detail below.

Figure 1: Ontario Line Project - Proposed Don River System Crossings

The environmental assessment for the Ontario Line Project is being completed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20) made under the *Environmental Assessment Act*. Construction of the Lower Don Crossing (Location 1) will be assessed in the Lower Don Bridges and Don Yard Early Works Report, that is anticipated to be shared with Beausoleil First Nation in summer 2021. Construction of the other three crossings (Locations 2-4) will be assessed in the Environmental Impact Assessment Report, that is planned to be shared with Beausoleil First Nation in early 2022.

Location 1: Lower Don River Crossing (Lower Don Bridge)

A new bridge is planned to be built on the north side of the existing Lakeshore East rail bridge at the Lower Don River, with space for Ontario Line tracks going in both

directions. We are also planning pedestrian and cycling connections across the Lower Don River.

Location 2: Millwood Road Crossing

The underground section of the Ontario Line running under Pape Avenue will emerge from the southern embankment of the Don Valley on an elevated guideway crossing the Don River, west of the Leaside Bridge (Millwood Road). The elevated guideway will connect to Thorncliffe Park in the north.

Location 3: Walmsley Brook Crossing

An elevated guideway will cross the Walmsley Brook tributary of the West Don River north of Pat Moore Drive. The guideway will then continue east across Beth Neilson Drive.

Location 4: West Don River Crossing (north of Overlea Boulevard)

The elevated guideway will cross the West Don River, north of Overlea Boulevard. This section of the route will connect to Don Mills Road and the future Flemingdon Park Station.

Field Surveys and Studies

As project planning is still in progress, environmental field surveys and studies as well as the timing of this work are being determined. Environmental field surveys and studies that may occur within or near the Don River include Stage 2 archaeological assessment and natural environment surveys (e.g., Species at Risk and tree surveys). Studies, surveys and their timing will be confirmed as project planning progresses. Further details are anticipated to be available in mid-Summer 2021.

Update on Archaeology

Metrolinx is currently planning to undertake Stage 2 Archaeological Assessments (AA) near the Don River starting in Fall 2021. The Stage 2 AA investigations will assess areas of identified archaeological potential within the Ontario Line study area which may be affected by the construction of the Project. Stage 2 AA fieldwork consists of test pit surveys at 5 m intervals within areas of previously identified archaeological potential.

Metrolinx would appreciate any interest Beausoleil First Nation may have in participating in the Stage 2 AA fieldwork. Some of the Stage 2 AA may occur on lands within the Toronto and Region Conservation Authority's (TRCA) property boundaries and regulated area. Metrolinx will coordinate with TRCA to ensure that Indigenous

Nations are provided the opportunity to participate in Stage 2 AA investigations. Upon receipt of Beausoleil First Nation's interest in participating, Metrolinx will work to coordinate your Nation's involvement.

As Metrolinx continues to undertake environmental due diligence for this project, additional archaeological assessment reports are anticipated to be completed. Metrolinx will ensure that Beausoleil First Nation will be made aware of and engaged regarding any future archaeological assessments, and especially the discovery and preservation of Indigenous artifacts. Metrolinx will also ensure that future archaeological assessments are provided to Beausoleil First Nation in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries

Invitation for Input

We are committed to an open, respectful, and transparent engagement with Beausoleil First Nation. We recognize the potential significance of this project to Beausoleil First Nation and wanted to keep you apprised of this project. We welcome meeting in the near future to discuss this project and its possible impacts and ways to appropriately engage with Beausoleil First Nation.

We are happy to address any questions that Beausoleil First Nation may have about the work proposed in the Don River system or the Ontario Line Project as a whole. If you require additional information or materials, or if you wish to discuss this Project in more detail or set up an in-person meeting, please contact Fallon Melander, Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Metrolinx thanks you for the time in reviewing this letter. Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*.

Yours Truly,

Subject: RE: Ontario Line Project – Archaeological Monitoring for Borehole Drilling - 265 Front St East - BFN

Dear Chief Monague,

Please find attached a letter inviting participation in upcoming archaeological monitoring for borehole drilling that is taking place next week at 256 Front Street in Toronto to support environmental assessment and geotechnical studies related to the Ontario Line Subway project. The boreholes are being drilled in locations that have known archaeological potential and as such Metrolinx is ensuring that a consultant archaeologist is on-site to monitor. If you are not able to attend, we are happy to provide any fieldnotes taken by the consultant archaeologist and/or provide a summary of the data collected if this is at all helpful to you.

The boreholes are anticipated to be completed between July 12 and July 16, 2021. Please let me know as soon as possible if you have interest in participating, and we will work with you and the project team to coordinate. And just a final note for your information, both Fallon Melander and Jaimi O'Hara, who are usually Metrolinx's main point of contact with your Nation, are away from the office this week. Hence you are

receiving this communication from me.

Miigwetch,

Make today great,

Christine Parris (she, her, hers)

Dear Chief Monague,

RE: Ontario Line Project - Archaeological Monitoring for Borehole Drilling - 265 Front St East

Metrolinx and its consultants, Stantec and Wood, will be undertaking geotechnical and environmental site assessment investigations at 265 Front St East. As part of this work boreholes will be drilled at the property. These boreholes will be located on/near potential archaeological sites and an archaeologist will be on site to monitor the drilling activities. We are writing to invite Beausoleil First Nation to participate in the archaeological monitoring associated with this work. If preferable, Metrolinx is happy to share any fieldnotes taken by the consultant archaeologist as well as a summary of the borehole and geotechnical study data for review.

The fieldwork is anticipated to be conducted between July 12th and July 16th, 2021. Fieldwork dates may change based on field progress and weather.

Invitation to Participate in Fieldwork

Metrolinx would appreciate any interest Beausoleil First Nation may have in participating in the archaeological monitoring fieldwork. The attached maps illustrate the location of the boreholes that will be drilled. Upon receipt of Beausoleil First Nation's interest in participating, Metrolinx will work to coordinate your Nation's involvement.

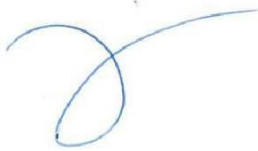

Engagement

Regardless of whether or not your Nation participates in the fieldwork, Metrolinx will inform you of discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will also ensure that future Archaeological Assessment reports are provided to your community in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries.

If your Nation wishes to participate in the fieldwork, or if you'd prefer to receive fieldnotes and/or a summary of the borehole and geotechnical data, please let us know at your earliest convenience. If you require additional information or materials, or if you wish to discuss this project in more detail or set up an in-person meeting, please contact, Indigenous Relations at Metrolinx. We can be contacted at IndigenousRelations@metrolinx.com.

Thank you for your time and consideration.

Dear Chief Monague,

Our deepest apologies, disregard the previous email, there was a last minute change to the letter-**please refer to the updated letter (attached)**.

Metrolinx is working with its consultant HDR to provide opportunities for participation in upcoming Archaeological Assessment and Natural Environment fieldwork associated with the Ontario Line. Please find attached a letter inviting your Nation to participate.

The fieldwork is anticipated to late August - early September 2021. Please let me know if you have interest in participating as soon as possible, and we will work with you, the project team and HDR to coordinate.

If you have any questions or concerns, please feel free to contact the Indigenous Relations Office at anytime.

Delivered by Email

Dear Chief Monague,

RE: Ontario Line Project - Update on Archaeological Assessments and Natural Environment Surveys

Metrolinx and its consultant, Stantec and HDR, will be undertaking Archaeological Assessment and Natural Environment fieldwork associated with the Ontario Line Project. We appreciate Beausoleil First Nation's interest in participating in these studies. The following letter provides details about the anticipated surveys to support the planning and coordination of involvement by your Nation.

Invitation to Participate in Fieldwork

Metrolinx would appreciate any interest Beausoleil First Nation may have in participating in the archaeological fieldwork. Upon receipt of Beausoleil First Nation interest in participating, Metrolinx will work to coordinate your Nation's involvement.

Update on Archaeology

Metrolinx is planning to undertake various Archaeological Assessments for the Ontario Line Project. This archaeological investigation will assess areas of identified archaeological potential, which may be potentially affected by the construction of the Project. The archaeological works are planned to begin in **September 2021**. Fieldwork dates may change based on field progress and weather.

Metrolinx would appreciate any interest Beausoleil First Nation may have in participating in the archaeological fieldwork. Upon receipt of Beausoleil First Nation interest in participating, Metrolinx will work to coordinate your Nation's involvement.

As Metrolinx continues to undertake environmental studies for this project, additional archaeological assessment reports are anticipated to be completed. Metrolinx acknowledges that Beausoleil First Nation will be made aware of and engaged regarding any future archaeological assessments, and especially the discovery and preservation of Indigenous artifacts and sacred burial grounds.

Regardless of whether or not your Nation participates in the fieldwork, Metrolinx will inform you of discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will also ensure that future Archaeological Assessment reports are provided to Beausoleil First Nation in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries.

Natural Environment Field Surveys

Metrolinx is conducting natural environmental studies to review and document existing conditions within the Study Area and to carry out impact assessment reporting. Most of the natural environment fieldwork for Ontario Line is planned to occur in 2022.

However, the surveys detailed in the table below are planned for this year and include butternut survey, tree inventory and aquatic habitat assessment. Please note that these are approximate dates and may be subject to change pending appropriate weather conditions and field survey requirements. Metrolinx will endeavour to keep Beausoleil First Nation apprised as the work unfolds.

Survey	Date(s)
Butternut Health Assessments (Areas detailed in Figures 1 and 2)	• August, September/2021
Tree Inventory (Areas detailed in Figures 1 and 2)	• September/2021
Aquatic Habitat assessment (Don and West Don ravine areas)	• September/2021

Engagement

If your Nation requires additional information or materials, or if you wish to discuss this project in more detail or set up an in-person meeting, please contact Jaimi O'Hara, Acting Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*.

Yours Truly,

Dear Chief Sandy,

RE: Ontario Line Project - Lower Don Bridge Marine Archaeological Overview Assessment for Review

Metrolinx wishes to build a strong and respectful relationship with Beausoleil First Nation. Metrolinx appreciates and respects Beausoleil First Nation's desire to be appropriately informed and aware of projects. Metrolinx wishes to share with you the development of the Marine Archaeological Overview Assessment (MAOA) report for the proposed construction of the Lower Don Valley Bridge over the Don River. This proposed bridge is a component of the Ontario Line Project as part of the Lower Don Bridge and Don Yard Early Works. We invite Beausoleil First Nation's feedback on the marine Archeological Overview Assessment prepared for the Ontario Line Project.

Project Description

The Ontario Line will bring 15.6 kilometres of subway service to Toronto. The Ontario Line will stretch from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line will have 15 new stations, including six interchange stations, connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable service.

Lower Don Bridge and Don Yard Early Works

The Lower Don Bridge and Don Yard early works are planned for where the Ontario Line will run alongside GO train operations. These early works will set the groundwork for other major construction on the Ontario Line project and include:

- building a new bridge north of the existing rail bridge over the Lower Don River that will carry the Ontario Line tracks;
- shifting GO tracks in the Don Yard and nearby rail corridor to accommodate Ontario Line infrastructure;
- modifying the existing rail bridge to accommodate GO track shifts and Ontario Line infrastructure; and
- relocating and protecting utilities and signal infrastructure in the area.

The location of the Lower Don Bridge and Don Yard early works project footprint and study area can be viewed in **Figure 1** below.

Figure 1: Map of Lower Don Bridge and Don Yard Early Works

Marine Archaeological Overview Assessment

On behalf of Metrolinx, Stantec has undertaken a Marine Archaeological Overview Assessment for the proposed Lower Don Bridge. The purpose of the Marine Archaeological Overview Assessment is to determine the marine archaeological potential of the study area for the bridge shown in **Figure 2** below.

The proposed bridge will cross over the Don River on the north side of the existing GO Transit Lakeshore East rail bridge. As a result, a large portion of the study area overlaps with the Don River. While the bridge will have no permanent in-water components, Metrolinx anticipates that in-water construction activities may impact potential submerged cultural resources. The marine archaeological potential of the study area is being considered as part of the Marine Archeological Overview Assessment.

The assessment determined that despite the study area for the Lower Don Valley Arch Bridge Superstructure having indicators of marine archaeological potential, there has been extensive river-bed disturbance to date. The riverbed has been previously disturbed by engineered

channeling, modern dredging, and modern construction. The assessment determined that the study area retains low to no potential for the identification and documentation of in situ Indigenous and Euro-Canadian marine archaeological resources. As a result no further marine archaeological work is required for the study area.

A copy of the marine Archeological Overview Assessment has been included in the Dropbox link for your review. Please provide any comments you may have by **November 19, 2021**.

Invitation for Input

We are committed to an open, respectful, and transparent engagement with Beausoleil First Nation. Metrolinx values any input that Beausoleil First Nation is willing to provide on the Marine Archaeological Overview Assessment report.

We are happy to meet with your Beausoleil First Nation to go over the project and development of the Marine Archaeological Overview Assessment report and answer any questions Beausoleil First Nation may have on the report or the project as a whole.

If you require additional information or materials, or if you wish to discuss this project in more detail or set up a meeting, please contact Jaimi O'Hara, Acting Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Please submit your feedback in writing by **November 19, 2021**.

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*, except where information is provided to Metrolinx in confidence, pursuant to section 15.1.

Delivered by Email

Dear Chief Sandy,

**RE: Ontario Line Project - Stage 2 Archaeological Assessment - Moss Park and Ordnance Park
Invitation to Participate in Archaeological Fieldwork**

Metrolinx and its consultant, Stantec continue to progress the archaeological studies for the Ontario Line project and wanted to invite Beausoleil First Nation to participate in Stage 2 Archaeological Assessments planned to occur at Moss Park and Ordinance Park in the upcoming weeks. The locations of Moss Park and Ordinance Park study areas can be viewed in **Figure 1 and 2** below.

Moss Park and Ordnance Park have been previously assessed in a desktop study, the *Ontario Line Stage 1 Archaeological Assessment Report – South* which was shared with Beausoleil First Nation in March 2020 and was subject to an Addendum shared with Beausoleil First Nation in February 2021. The Stage 1 report recommended that a Stage 2 archaeological assessment is required for Moss Park and Ordnance Park parcels.

The Stage 2 archaeological field work will be conducted by test pit survey, in accordance with the Ministry of Heritage, Sport, Tourism and Culture Industries' (MHSTCI) 2011 *Standards and Guidelines for Consultant Archaeologists*. The Stage 2 test pit survey method consists of hand excavating test pits by shovel at a five-metre interval on the park lands. The test pits are at least 30 centimetres in diameter and dug through the topsoil (which has a variable depth generally between 15 and 25 centimetres, but may be deeper or shallower) and at least five centimetres into subsoil. Once complete, test pits will be backfilled. Areas disturbed by utility infrastructure or recent construction will not be surveyed but will be photo documented. Based upon the Stage 2 field work, subsequent archaeological investigations may be recommended depending on what is found during the Stage 2 test pit survey.

Please see the fieldwork details below:

MOSS PARK:

Start Date: Tentatively October 25, 2021. If the start date changes, we will reach out to you.

Duration: Approximately two to three days

Start Time: 8am

Consultant Company: Stantec

Contact information: Jeffrey Muir - (289) 208-5298; Heather Kerr - (416) 602-3271; Patrick Hoskins - (613) 716-4687

Assessment: Stage 2 Archaeological Assessment

Meeting Location Address: 150 Sherbourne St

Size of Field Crew: 2 (1 Field director, 1 field tech)

Parking location: Above-ground parking lot at the southwest corner of Jarvis Street and Queen Street East; approximate three minute walk

ORDNANCE PARK

Start Date: Work on Ordnance Park will begin after the Moss Park work is completed

Duration: Approximately two weeks

Start Time: 8am

Consultant Company: Stantec

Contact information: Jeffrey Muir - (289) 208-5298; Heather Kerr - (416) 602-3271; Patrick Hoskins - (613) 716-4687

Assessment: Stage 2 Archaeological Assessment

Size of Field Crew: 4 (1 Field director, 3 field techs)

Required PPE:

Item	Specifications
Clothing and Attire	Loose clothing, long hair, dangling accessories, jewelry, or other similar items that are likely to be a hazard will not be worn unless they are tied, covered, or otherwise secured so they prevent the hazard.
Foot Protection	Canadian Standards Association (CSA) approved work boots (Steel-toed boots, minimum 6" from top of sole, grade 1 with sole protection [CSA Standard Z195-09]).
Hand Protection	Cut, puncture, and abrasion-resistant gloves shall be worn when conducting archaeological hand digging and screening activities.
Eye and Face Protection	CSA approved safety glasses with rigid side shields. Regular prescription glasses are not permitted unless they are designed as CSA safety glasses complete with rigid shields. An ASTM level 1 (or higher) face covering is mandatory.
Head Protection	CSA approved Type II, Class E (side impact) hard hat. Hard hats shall be worn with the brim pointed forward.
Hearing Protection	Not needed.
High Visibility Safety Apparel	Mandatory class 2, level 2 High Visibility Safety Apparel (HVSA). Full length sleeves and pants with reflective stripes on both arms and legs are required.
*Although not considered PPE, face coverings for COVID-19 shall be worn when applicable	

Invitation to Participate in Fieldwork

Metrolinx would appreciate any interest Beausoleil First Nation may have in participating in the archaeological monitoring fieldwork. Upon receipt of Beausoleil First Nation's interest in participating, Metrolinx will work to coordinate Beausoleil First Nation's involvement.

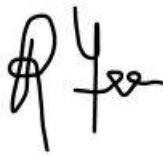

Engagement

Regardless of whether or not Beausoleil First Nation participates in the fieldwork, Metrolinx will inform you of discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will also ensure that future Archaeological Assessment reports are provided to your community in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries.

If Beausoleil First Nation wishes to participate in the fieldwork, or if you'd prefer to receive fieldnotes and/or a summary of the borehole and geotechnical data, please let us know at your earliest convenience. If you require additional information or materials, or if you wish to discuss this project in more detail or set up an in-person meeting, please contact, Indigenous Relations at Metrolinx. We can be contacted at IndigenousRelations@metrolinx.com.

Thank you for your time and consideration.

Dear Chief Sandy,

Please find enclosed, a letter providing an overview of the Metrolinx application for a permit under the Endangered Species Act to support the Ontario Line Project. We have also attached two appendices for your review.

We value building a relationship with your Nation which we recognize requires transparency and meaningful engagement. Please let me know if you have any further questions or would like to meet to discuss this permit, the Ontario Line Project or any other Metrolinx projects.

Thank you,

Jaimi O'Hara

Chief Joanne Sandy
Beausoleil First Nation
11 O'Gemaa Miikaan
Christian Island, ON L9M 0A9

Delivered by Email

Dear Chief Sandy,

**RE: Ontario Line Project - Species at Risk 17(2)(d) Permit Amendment Under the
*Endangered Species Act***

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with Beausoleil First Nation. Metrolinx appreciates and respects Beausoleil First Nation's desire to be appropriately informed and aware of projects. To that end, Metrolinx is sharing with Beausoleil First Nation information regarding the Species at Risk (SAR) 17 (2) (d) Permit under *the Endangered Species Act* (ESA, 2007) obtained in support of the Ontario Line Project, and the proposed amendment to this permit.

Project Description

Metrolinx, a regional transportation agency, is helping transform the way the Greater Golden Horseshoe region moves by building a fast, convenient, and integrated transit network. As part of this work, Metrolinx is proceeding with the Ontario Line Project which will bring 15.6 kilometres of subway service to Toronto.

Ontario Line Permit #CR-D-002-19

Metrolinx, as part of the Ontario Line Project, previously received approval for a 17(2)(d) permit (Permit #CR-D-002-19) under the *Endangered Species Act* (ESA, 2007) issued by the Ministry of the Environment, Conservation, and Parks (MECP) on August 10, 2020. The permit provides approval for those project activities that may have adverse impacts on identified Species at Risk (SAR) and/or their habitat. The permit allows for those activities to take place and provides direction to Metrolinx regarding mitigation measures and compensation requirements that would be necessary to support those impacted species to support no net loss.

To inform this permit, Metrolinx completed SAR screening through the Ontario Line Environmental Conditions Report and Natural Environment Report using various

information sources. While the results of this screening were shared within the initial draft of the Environmental Conditions Report circulated to Beausoleil First Nation on June 15 2020, Draft Environmental Conditions Report circulated on September 17 2020 and Final Environmental Conditions Report circulated on November 30 2020, we regret that we did not engage with Beausoleil First Nation directly on the screening process or the findings.

Potentially Impacted Species and Summary of Permit Conditions and Requirements

Based on the SAR screening completed to date, some activities required to support the Ontario Line Project may result in the following species at risk being impacted:

- Bank Swallow - Threatened
- Barn Swallow - Threatened
- Blanding's Turtle - Threatened
- Butternut - Endangered
- Chimney Swift - Threatened
- Little Brown Myotis - Endangered
- Northern Myotis - Endangered
- Small-footed Myotis - Endangered
- Tri-colored Bat - Endangered

Activities that may result in impacts to species listed above are associated with project construction and include activities such as removal or alteration of SAR habitat features (e.g., structures that may support SAR bird nesting, and trees).

Prior to commencing any activities that may impact SAR and/or SAR habitat, Metrolinx will complete species-specific screening for areas where project activities are planned to take place, and, if necessary (if screening determines that SAR/SAR habitat is likely to be present), surveys to detect SAR and SAR habitat presence and conduct an impact assessment if presence is confirmed, to characterize species-specific impacts (e.g., amount of habitat removed).

Metrolinx will meet the ESA permit conditions such as implementing species-specific mitigation measures, monitoring their effectiveness, and taking corrective action as required. Species-specific mitigation measures include scheduling activities to take place outside of species-specific timing windows (e.g., outside of active season or breeding window), implementing exclusion measures to prevent individuals of certain species from being impacted by project activities, and others.

If project activities result in SAR habitat removal, Metrolinx will implement species-specific compensation measures such as creating habitat (e.g., nesting habitat features replacing habitat features removed). Compensation habitat will be regularly monitored, and appropriate corrective actions will be taken as required to ensure habitat functions as intended.

Proposed Permit Amendment

Metrolinx is proposing an amendment to the previously approved SAR 17(2)(d) Permit (Permit #CR-D-002-19) under the *Endangered Species Act* (ESA, 2007), approved on August 10, 2020. The purpose of this permit amendment is to seek approval for additional study area not included in the current Permit #CR-D-002-19, as shown in **Appendix 1**. There are no changes to the permit conditions, including species-specific mitigation measures and compensation requirements, and no additional species are being added at this time. The SAR screening developed in support of the current permit has been updated to provide occurrence probability of SAR that may be present in the areas Metrolinx is seeking to include in the permit as part of the proposed amendment, and is included as **Appendix 2**.

Permit Amendment Process - Next Steps

The Proposal for the 17(2)(d) Permit Amendment is anticipated to be available on the Environmental Registry of Ontario (ERO) for a 30-day public review period this Fall 2021, and Metrolinx will notify Beausoleil First Nation when the ERO posting is available. While not specifically required under the Environmental Bill of Rights, the Ministry of the Environment, Conservation and Parks (MECP) voluntarily posts all ESA permit proposals for public review to ensure transparency and inclusion.

Metrolinx is seeking Beausoleil First Nation's comments, questions, or requests for additional information upon review of the material presented in this letter at any time in advance of the public ERO posting. Questions or comments can also be submitted directly to MECP through the ERO posting during the 30-day public review period.

Following the 30-day public review period, the proposed permit amendment will be submitted to the Minister for review and consideration. The amendment may only be issued if the Minister is of the opinion that the legal requirements set out in clause 17(2)(d) of the *Endangered Species Act* (ESA, 2007) have been satisfied. Should the amendment be issued, Metrolinx will be obligated to adhere to the requirements and standards as stipulated under the permit.

Beausoleil First Nation will be kept apprised should any new SAR be identified within the project area as project planning progresses. In such cases we will endeavor to engage Beausoleil First Nation prior to seeking any necessary permit amendments.

Metrolinx is committed to building a long-term relationship with Beausoleil First Nation, and we recognize that this requires transparency. We appreciate that we have much work to do in this regard and we hope to move forward in a positive way. The original SAR permit was obtained as part of the normal course of Metrolinx business, which had yet to be identified by the Indigenous Relations Office as necessitating engagement and information sharing with Indigenous Nations.

The Indigenous Relations Office has begun guiding the organization and identifying opportunities to flag such actions in advance, so that we can more meaningfully engage with Indigenous Nations as we move forward. We appreciate your patience as Metrolinx continues to learn more about Indigenous Nations and with the help of the Indigenous Relations Office, becomes aware of additional opportunities for engagement with Indigenous Nations.

We appreciate that previous engagement activities may not have met the needs of Beausoleil First Nation, and the volume of materials may have resulted in Beausoleil First Nation not having been made adequately aware of the possible identified impacts to several Species at Risk under this permit. Metrolinx remains committed to meaningful engagement; we are committed to identifying and prioritizing the sharing of the most relevant and appropriate information with Beausoleil First Nation.

If Beausoleil First Nation requires additional information or materials, or you wish to discuss this project in more detail, please reach out to Jaimi O'Hara in the Indigenous Relations Office at Metrolinx and she would be pleased to facilitate a meeting. She can be contacted at IndigenousRelations@metrolinx.com.

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*, except where information is provided to Metrolinx in confidence, pursuant to section 15.1.

Thank you for your time in reviewing this letter.

Yours Truly,

Hello Chief Sandy,

We noticed that the Noise and Vibration Operations Report, was not outlined in the previous letter which provided an overview of the Draft Environmental Impact and Assessment Report for the Ontario Line Project. We apologize for this omission and note that the report has now been added to the Dropbox shared below. We apologize that this report was overlooked earlier, and is not referenced directly in the letter. If you have any questions, please don't hesitate to reach out.

Best,

Marilyn Stoye *(she/her)*

Dear Chief Sandy,

Please find attached a letter inviting participation in Stage 2 Archaeological Assessments planned to occur in the upcoming weeks as part of the Ontario Line Project.

The date of this fieldwork is tentatively set for December 2, 2021. If you are interested in participating, please let me know as soon as possible and no later than next **Friday, November 26, 2021**, and we will work with you and the project team to coordinate.

If you have any questions or concerns, please feel free to reach out to me at any time.

Thank you for your time and assistance.

Christian Island, ON L9M 0A9
Delivered by Email

Dear Chief Sandy,

**RE: Ontario Line Project - Stage 2 Archaeological Assessment - Thorncliffe Segment
Invitation to Participate in Archaeological Fieldwork**

Metrolinx and its consultant, Stantec continue to progress the archaeological studies for the Ontario Line project and wanted to invite Beausoleil First Nation to participate in Stage 2 Archaeological Assessments planned to occur in the Thorncliffe Segment in the upcoming weeks. The locations of the Thorncliffe Segment study areas can be viewed in **Figure 1** below.

Stage 2 archaeological test pit survey at five metre intervals is planned in areas of archaeological potential on the illustrated PINs (please see Figure 1). This includes the archaeological crew of four (one field supervisor and three field technicians) digging by hand each test pit, each of which is at least 30 centimetres in diameter. The pit is dug to subsoil (approximately 20 to 30 centimetres in depth depending on soil conditions, plus another five centimetres into the subsoil) at five metre intervals across the areas of archaeological potential. The topsoil would be screened through six-inch mesh to recover artifacts. We also have three additional days of Stage 1 field work within the Don Valley area, where a field supervisor would photograph the landscape in detail to document areas of steep slope, permanently wet areas, and areas of archaeological potential.

Please see the fieldwork details below:

THORNCLIFFE SEGMENT:

Start Date: Tentatively December 2, 2021. If the start date changes, we will reach out to you.

Duration: Approximately two weeks

Start Time: 8am

Consultant Company: Stantec

Contact information: Jeffrey Muir - (289) 208-5298; Heather Kerr - (416) 602-3271; Patrick Hoskins - (613) 716-4687

Assessment: Stage 2 Archaeological Assessment

Size of Field Crew: 4 (1 field supervisor and 3 field technicians)

Invitation to Participate in Fieldwork

Metrolinx would appreciate any interest Beausoleil First Nation may have in participating in the archaeological monitoring fieldwork. Upon receipt of Beausoleil First Nation's interest in participating, Metrolinx will work to coordinate your Nation's involvement.

Engagement

Regardless of whether or not your Nation participates in the fieldwork, Metrolinx will inform you of discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will also ensure that future Archaeological Assessment reports are provided to your Nation in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries.

If your Nation wishes to participate in the fieldwork, or if you'd prefer to receive fieldnotes and/or a summary of the borehole and geotechnical data, please let us know at your earliest convenience. If you require additional information or materials, or if you wish to discuss this project in more detail or set up an in-person meeting, please contact, Jaimi O'Hara, Acting Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Should you wish to provide input to the above questions, please submit your feedback in writing. Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*, except where information is provided to Metrolinx in confidence, pursuant to section 15.1.

Thank you for your time and consideration.

Delivered by Email

Dear Chief Sandy,

RE: Ontario Line Project - Stage 2 Archaeological Assessment - Corktown Station and Don Valley Area: Invitation to Participate in Archaeological Fieldwork

Metrolinx and its consultant, Stantec continue to progress the archaeological studies for the Ontario Line project and wanted to invite Beausoleil First Nation to participate in further archaeological monitoring for Corktown Station and Don Valley area.

CORKTOWN STATION

Archaeological monitoring for building demolitions is planned to occur at Corktown Station in the upcoming weeks. The locations of the Corktown Station study areas can be viewed in **Figure 1** below. Please note that this work is separate from the Stage 2 & Stage 4 archaeological investigations, which has ceased for the 2021 field season and will resume in Spring 2022. Metrolinx will ensure that Beausoleil First Nation is informed of when the Stage 2 & Stage 4 archaeological investigations resume.

The archaeological monitoring will occur for building demolition activities on the First Parliament site that may be capping archaeological deposits at Corktown Station (please see Figure 1). This includes an archaeological crew of two (one field supervisor and one field technician) monitoring the demolition of modern buildings in the areas of archaeological potential. Metrolinx would value any participation that Beausoleil First Nation may wish to have in this monitoring program.

Please see the fieldwork details below:

CORKTOWN STATION:

Start Date: Tentatively January 17-18, 2022. If the start date changes, we will reach out to you.

Duration: Approximately two to four months (demo work occurring intermittently during time period; schedule to be confirmed closer to start date)

Start Time: 8am

Consultant Company: Stantec

Contact information: Jeffrey Muir - (289) 208-5298; Heather Kerr - (416) 602-3271; Patrick Hoskins - (613) 716-4687

Assessment: Archaeological monitoring during building demolition

Size of Field Crew: 2 (1 field supervisor and 1 field technician)

DON VALLEY AREA

As part of the Ontario Line, Hydro One Network Infrastructure (HONI) needs to relocate several hydro towers to accommodate subway maintenance facilities. Metrolinx is carrying out a borehole drilling program in the Don Valley to provide HONI with geotechnical data for proposed hydro tower relocations.

Archaeological monitoring will occur for borehole drilling in areas with archaeological potential (please see Figure 2). This approach will provide for the on-site identification and, if necessary, stop-work order of drilling by a licensed archaeologist in the event potential archaeological resources are encountered. A licensed archaeologist will be on-site during drilling to visually inspect spoil removed during borehole drilling as well as intermittent borehole samples to visually identify the presence of artifacts. Metrolinx would value any participation that Beausoleil First Nation may wish to have in this monitoring program.

Please see the fieldwork details below:

DON VALLEY AREA:

Start Date: Mid-February. Exact dates will be confirmed in January 2022

Duration: 1-2 weeks

Start Time: 8am

Consultant Company: Stantec

Contact information: Jeffrey Muir - (289) 208-5298; Heather Kerr - (416) 602-3271; Patrick Hoskins - (613) 716-4687

Assessment: Archaeological monitoring for borehole drilling

Size of Field Crew: 2 (1 field supervisor and 1 field technician)

Invitation to Participate in Fieldwork

Metrolinx would value the involvement of Beausoleil First Nation in the upcoming archaeological monitoring fieldwork outlined above. Should your Nation wish to participate, please let us know at your earliest convenience. We welcome any requests for a meeting to discuss opportunities to participate or to explore this project in more detail with Beausoleil First Nation. Upon receipt of Beausoleil First Nation's interest in participating, Metrolinx will work to coordinate your Nation's involvement. If Metrolinx is

also willing to share fieldnotes and/or a summary of the borehole and geotechnical data in addition to the open invitation to participate directly in the monitoring.

Engagement

Regardless of whether or not your Nation participates in the fieldwork, Metrolinx will inform you of discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will also ensure that future Archaeological Assessment reports are provided to your community in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries.

If you require additional information or materials, or if you wish to discuss this project in more detail or set up an in-person meeting, please contact, Jaimi O'Hara, Manger of Indigenous Relations at Metrolinx. We can be contacted at IndigenousRelations@metrolinx.com.

Thank you for your time and consideration.

Dear Chief Sandy,

Our sincere apologies that Beausoleil First Nation did not receive this email yesterday as we intended.

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. We wish to share with you that the Draft Environmental Impact and Assessment Report (EIAR) has now been published. Attached you will find a letter outlining the Draft Environmental Impact Assessment Report (EIAR) prepared for the Ontario Line Project, as well as the Notice of Publication for the report.

The full report can be found using the following dropbox link:

[REDACTED]

The Notice of Publication commences a 30-day public review period which will continue from February 7, 2022 until March 9, 2022. As such, we ask that your Nation provide any comments in writing no later than March 9, 2022. We appreciate the size of these documents and would be happy to arrange a meeting to review the report and project with you.

In an effort to streamline your review, we draw your attention to the attachments which provide an overview of the expected environmental impacts and proposed mitigations for Natural Environment and Archaeological Resources, as we know this may be of specific interest to you.

Thank you for your time and assistance. If you have any questions or concerns, please do not hesitate to contact me.

Dear Chief Sandy,

RE: Ontario Line Project - Notice of Publication of Draft Environmental Impact Assessment Report (EIAR)

Metrolinx remains committed to meaningful consultation and engagement, especially where our projects have impacts to the Treaty and traditional lands of Beausoleil First Nation. In November of 2021, Metrolinx shared with Beausoleil First Nation the preliminary Draft Environmental Impact Assessment Report (EIAR) for comment and review. The purpose of this letter is to share with your Nation the that the Notice of Publication for the Draft EIAR has now been posted, and to continue to invite any comment or feedback you may wish to share on this report.

Project Description

Metrolinx is proceeding with the Ontario Line which will bring 15.6 kilometres of subway service to Toronto. The Ontario Line will stretch across the city, from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line will have 15 new stations, including six interchange stations, connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable service.

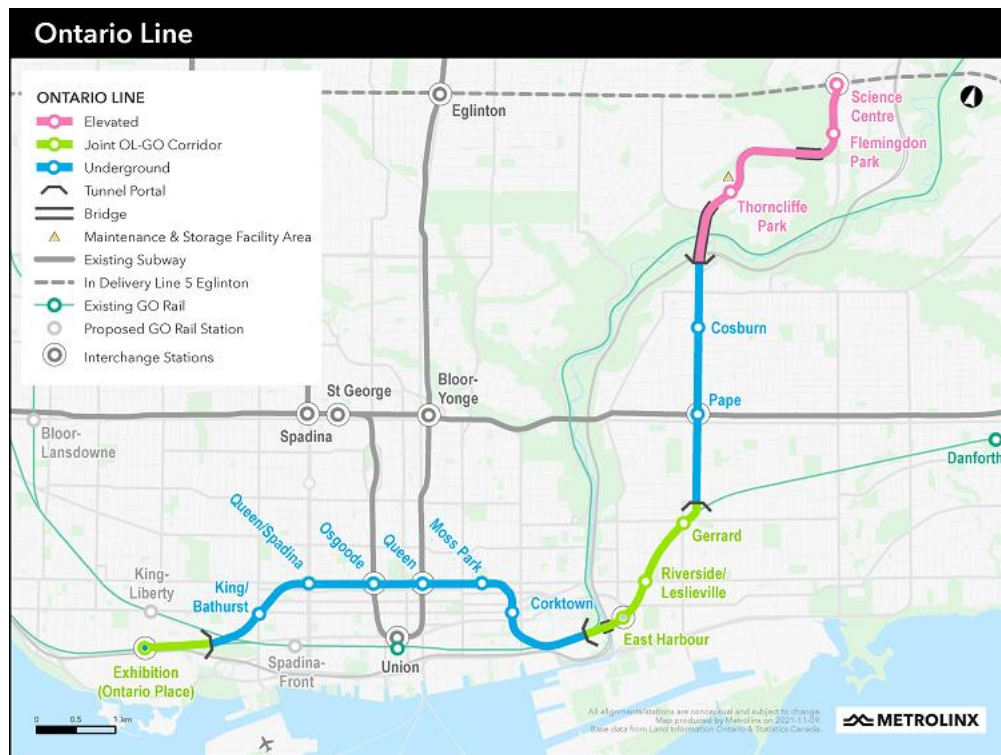

Figure 1 - Ontario Line

Ontario Line Environmental Assessment & Project Timeline

Environmental impacts of the Ontario Line Project are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*.

Table 1 below provides a summary of the Ontario Line Reports that have been shared, or will be shared with Beausoleil First Nation:

Table 1: Ontario Line Reporting Timeline

Report	Date Shared/to be Shared with Nations

Draft Environmental Impact Assessment Report (EIAR)

The Draft EIAR summarizes the local environmental conditions in the discipline-specific study areas developed for the Project. The local environmental conditions were characterized through a combination of desktop review and field studies by practitioners using industry standard techniques and provincial standards, protocols, and guidelines, where appropriate. The resulting Draft Stage 1 AA and Natural Environment Report was shared with Beausoleil First Nation for review in August 2021.

The Draft EIAR also provides an assessment and evaluation of the impacts that the Project might have on the environment. Based on the potential impacts, a description of mitigation measures and monitoring activities is outlined. A list of municipal, provincial, federal, or other permits and approvals that may be required for the Project is also provided.

Discipline-specific assessment and evaluation of impacts were undertaken for the following disciplines:

- Natural Environment
- Soil and Groundwater
- Cultural Heritage
- Archaeological Resources
- Socio-Economic and Land Use
- Air Quality
- Noise and Vibration
- Traffic and Transportation

Effective February 7, 2022, the Draft Environmental Impact Assessment Report will be available for a 30-day public review period. The report is posted on the Ontario Line project webpage, which can be accessed using the following link:

<https://www.metrolinxengage.com/en/content/full-report-draft-environmental-impact-assessment-report>

The Notice of Publication of Draft EIAR can be found in **Attachment 1**.

Potential Impacts and Mitigation Measures

The tables found enclosed in **Attachment 2** provide a summary of natural environment

and archaeology potential impacts and mitigation measures identified as part of the Draft EIAR that may be of interest to Beausoleil First Nation. If your Nation has any feedback about these potential impacts and/or mitigation strategies, or any other aspects of the Ontario Line, we welcome the opportunity to discuss further.

Engagement

Metrolinx welcomes any comments or feedback on the EIAR during the 30-day public review period, from February 7 to **March 9, 2022**. Metrolinx is committed to an open and respectful relationship with Beausoleil First Nation. We appreciate the significant volume of documents related to the Ontario Line Project that have been shared with Beausoleil First Nation. We are happy to assist in the review of these documents by meeting with your Nation.

Metrolinx is willing to address any questions that Beausoleil First Nation may have about the Ontario Line Project. If you require additional information or materials or if you wish to discuss the Project in more detail or set up a meeting, please contact Jaimi O'Hara, Manager of Indigenous Relations Office at Metrolinx. She can be reached at

IndigenousRelations@metrolinx.com.

With the exception of personal information, all comments will become part of the public record. Kindly note that any information you provide to Metrolinx, or its delegates, will be subject to the Freedom of Information and Protection of Privacy Act, except where information is provided to Metrolinx in confidence, pursuant to section 15.1, which protects the confidentiality of Indigenous knowledges.

Thank you for your time in reviewing this letter. Yours

Truly,

A handwritten signature in black ink, appearing to read 'J. Pakkala'.

 Attachment 2 - Draft EIAR Natural Environment and Archaeology Potential Effects, Mitigation Measures and Monitoring

Notice of Publication of Draft Environmental Impact Assessment Report and Virtual Open Houses Ontario Line Project

The Project

The Ontario Line will bring 15.6 kilometres of new subway service to Toronto, making it faster and easier for people to get where they need to be each day. The line will stretch across the city, from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line will have 15 new stations, including six interchange stations, connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable service.

Environmental Impact Assessment Report

Environmental impacts of the Ontario Line are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*. In accordance with Section 15 of O. Reg. 341/20, Metrolinx has prepared the Draft Environmental Impact Assessment Report that is now available for review.

The Draft Environmental Impact Assessment Report describes existing environmental conditions in the Project study area, environmental impacts, mitigation and monitoring measures, consultation, and required permits and approvals for the Ontario Line.

The Draft Environmental Impact Assessment Report Review and Consultation Process

Effective **February 7, 2022**, the Draft Environmental Impact Assessment Report will be available for review on the Ontario Line project webpage (www.metrolinx.com/ontarioline). You can view and comment on the report from **February 7 to March 9, 2022** via the online form provided.

You can also participate in virtual open houses, where you can hear from project experts and ask questions about the report in real time, at MetrolinxEngage.com/OntarioLine/live on:

- **February 22, 2022 and February 24, 2022** from 6:30 to 8:00 p.m., with a focus on the portion of the project from Science Centre Station to Gerrard Station
- **March 1, 2022 and March 3, 2022** from 6:30 to 8:00 p.m., with a focus on the portion of the project from Gerrard Station to Exhibition Station

Those who wish to provide comments on the Draft Environmental Impact Assessment Report must do so by **March 9, 2022** and submit them using the webpage form or address them to the following email: ontarioline@metrolinx.com.

Section 17 of O. Reg. 341/20 requires Metrolinx to establish an issues resolution process to attempt to resolve any concerns raised by the public or Indigenous Nations during the review period. At the end of the review period, Metrolinx will update the Draft Environmental Impact Assessment Report by adding a description of the issues resolution process, what Metrolinx did to address any concerns, and if the Ontario Line implementation timeline will be impacted as a result of addressing concerns. Metrolinx will then publish the Final Environmental Impact Assessment Report on the Ontario Line project webpage: www.metrolinx.com/ontarioline and issue a Notice of Publication of the Final Environmental Impact Assessment Report.

To obtain a copy of the Draft Environmental Impact Assessment Report, please contact the Ontario Line project email listed above.

Mark Clancy (T: 416-202-5100, E: ontarioline@metrolinx.com) may be contacted on behalf of Metrolinx.

Species-specific monitoring activities will be implemented, in consultation with the MECP. <p>Operations</p> <ul style="list-style-type: none"> As no impacts are anticipated to butternut during operations, no monitoring activities are recommended.

Environmental Component	Potential Impact	Mitigation Measure(s)	Monitoring Activities
Aquatic Habitat			
Aquatic Environment – Wetlands and Waterbodies	<p>Construction</p> <p><u>OLS Study Area</u></p> <ul style="list-style-type: none"> Impacts to riparian vegetation, erosion and sedimentation to waterbodies from construction; risk of contamination to waterbodies as a result of spills. <p><u>OLN Study Area</u></p> <ul style="list-style-type: none"> Removal or impacts to wetland; aquatic and riparian vegetation; degradation of wetlands as result of dewatering and discharge activities; erosion and sedimentation to wetlands/waterbodies from construction; and risk of contamination to wetlands/waterbodies as a result of spills. <p>Operations</p> <ul style="list-style-type: none"> Potential impacts are not anticipated during operations 	<p>Construction</p> <ul style="list-style-type: none"> Construction activities will maintain the buffers established during the design phase to reduce potential negative impacts to wetlands and waterbodies. Shorelines or banks disturbed by construction activities will be immediately stabilized by any activity associated with the project to prevent erosion and/or sedimentation, preferably through re-vegetation with native species suitable for the site. An Erosion and Sediment Control Plan, in accordance with the Greater Golden Horseshoe's Erosion and Sediment Control Guideline for Urban Construction (2006) and the Erosion and Sediment Control Guide for Urban Construction (TRCA 2019), as amended from time to time, will be prepared prior to and implemented during construction to reduce the risk of sedimentation. A Spill Prevention and Response Plan will be developed before work commences so that procedures and policies are in place to reduce impacts to wetlands and watercourses during construction. In wetland areas where vernal pooling occurs, prior to dewatering isolated work areas, wildlife will be captured and relocated to suitable habitat outside of the work area. Vegetation removals will also consider and mitigate potential impacts to wetland communities. Until such a time, that an Ontario Wetland Evaluation System evaluation is completed and evaluated by NDMNRF, unevaluated wetlands will be considered as significant for the purposes of assessing impacts. Wetland communities potentially affected by the Project will be clearly staked out on site. If dewatering is proposed, then it is recommended to be undertaken during the winter when the potential impacts of changes in water levels are less significant in wetland communities. During detailed design, the need for a dewatering zone of influence assessment and dewatering monitoring plan should be evaluated. The dewatering monitoring plan, if required, will monitor for potential negative impacts on nearby wetlands and adjacent vegetation communities to confirm if they would be affected due to dewatering activities. An adaptive management plan will be prepared if negative impacts are observed. Prior to dewatering isolated work areas, fish will be captured and relocated to suitable habitat outside of the work area under a Licence to Collect Fish for Scientific Purposes from the NDMNRF. <p>Operations</p> <ul style="list-style-type: none"> As no impacts are anticipated to wetlands and waterbodies during operations, no mitigation measures are recommended. 	<p>Construction</p> <ul style="list-style-type: none"> Onsite inspection will be undertaken to confirm the implementation of the mitigation measures and identify corrective actions, if required. Corrective actions may include alteration of activities to reduce impacts and enhance mitigation measures. <p>Operations</p> <ul style="list-style-type: none"> As no impacts are anticipated to wetlands and waterbodies during operations, no monitoring activities are recommended.
Aquatic Environment – Fish and Fish Habitat	<p>Construction</p> <p><u>OLS Study Area</u></p> <ul style="list-style-type: none"> No in-water works, no direct impacts to fish and fish habitat Indirect - Dewatering activities and water discharge resulting in changes in water velocity or temperature, soil 	<p>Construction</p> <ul style="list-style-type: none"> All requirements of the <i>Fisheries Act</i> will be met. In the event that in-water and/or near water construction works are required appropriate mitigation measures will be followed, as identified in Applicable Law and through consultation with the relevant authorities including Fisheries 	<p>Construction</p> <ul style="list-style-type: none"> Onsite inspection will be undertaken to confirm the implementation of the mitigation measures and identify corrective actions, if required. Corrective

Environmental Component	Potential Impact	Mitigation Measure(s)	Monitoring Activities
	<p>and erosion, release of contaminated and sediment-laden water, fish habitat structure and cover, food supply, nutrient concentration, access to habitat leading to the displacement or stranding of fish.</p> <p><u>OLN Study Area</u></p> <ul style="list-style-type: none"> Potential for direct, in-water impacts to fish and fish habitat related to temporary crossing structures for both Don and West Don River bridges Dewatering activities and water discharge resulting in changes in water velocity or temperature; changes in soil and erosion; release of contaminated and sediment-laden water; changes in fish habitat structure and cover; changes in food supply, changes in nutrient concentration; changes in access to habitat leading to the displacement or stranding of fish. <p>Operations</p> <ul style="list-style-type: none"> Potential impacts are not anticipated during operations 	<p>and Oceans Canada. In-water works will be planned to consider timing windows to protect fish, including their eggs, juveniles, spawning adults and/or the organisms upon which they feed.</p> <ul style="list-style-type: none"> Follow Ontario Provincial Standard Specifications PROV 182 General Specification for Environmental Protection for Construction in and Around Waterbodies and on Waterbody Banks (APR 2021). Design water management system and dewatering operations to prevent erosion and/or release of sediment-laden or contaminated water to the waterbody or adjacent wetlands. Follow Ontario Provincial Standard Specifications PROV 517 Construction Specification for Dewatering (NOV 2016). Prior to dewatering isolated work areas, fish will be captured and relocated to suitable habitat outside of the work area under a Licence to Collect Fish for Scientific Purposes from the NDMNRF. <p>Operations</p> <ul style="list-style-type: none"> As no impacts are anticipated to fish and fish habitat during operations, no mitigation measures are recommended. 	<p>actions may include additional site maintenance and alteration of activities to reduce impacts.</p> <ul style="list-style-type: none"> Monitoring for dewatering will be undertaken to confirm sediment-laden discharge, visible scour/erosion, and/or changes in temperature in any receiving watercourse. <p>Operations</p> <ul style="list-style-type: none"> As no impacts are anticipated to fish and fish habitat during operations, no monitoring activities are recommended.
Stormwater Management and Drainage			
Floodplain	<p>Construction</p> <ul style="list-style-type: none"> Potential to impact flooding conditions in the Don River Floodplain Potential for flooding impacts onsite during construction <p>Operations</p> <ul style="list-style-type: none"> Potential impacts are not anticipated during operations 	<p>Construction</p> <ul style="list-style-type: none"> Floodplain impact assessment will be conducted during detailed design following TRCA guidelines once details on the pier configuration and other detailed bridge design information are available. Design optimizations on abutment, pier, and valley way placement shall be considered to reduce hydraulic impacts. All temporary works including, but not limited to, the temporary bridges, should follow the Greater Golden Horseshoe's Erosion and Sediment Control Guideline for Urban Construction (2006) and the Erosion and Sediment Control Guide for Urban Construction (TRCA 2019), to reduce the chance of flooding during the construction. TRCA staff will be consulted during detailed design to avoid potential infrastructure conflicts and impacts to flood protection measures/initiatives in the Lower Don Bridge and Don Yard Hydrology and Surface Water Study Area with consideration of, but not limited to, the following: <ul style="list-style-type: none"> West Don Lands Flood Protection Landform (TRCA 2005); Broadview and Eastern Flood Protection Municipal Class Environmental Assessment (TRCA 2021); Flood protection measures and tie-in with the existing railway valley way at Don Roadway and Eastern Avenue underpass as identified in the Don Mouth Naturalization and Port Lands Flood Protection Project Environmental Assessment (TRCA 2014b); New Broadview underpass with expanded flood protection tie-ins and drainage with the railway valley way as identified in the Port Lands and South of Eastern Transportation and Servicing Master Plan Class Environmental Assessment (Waterfront Toronto and City of Toronto, 2016); and, Opening of bridge crossing on east side of Don River through railway valley way to accommodate Hybrid 3 as identified in the Gardiner 	<p>Construction</p> <ul style="list-style-type: none"> Develop and undertake a monitoring program of the West Don Flood Protection Landform, as required, in consultation with TRCA. Include a monitoring strategy in the Flood Contingency Plan to monitor surface water levels during construction activities. <p>Operations</p> <ul style="list-style-type: none"> As no impacts are anticipated during operations, no monitoring activities are recommended.

Environmental Component	Potential Impact	Mitigation Measure(s)	Monitoring Activities
		<p>Expressway and Lake Shore Boulevard East Reconfiguration Environmental Assessment (Waterfront Toronto and City of Toronto, 2017).</p> <ul style="list-style-type: none"> In addition, all necessary studies such as fluvial geomorphic process studies, meander belt and erosion studies, and geotechnical and slope stability assessments will be completed. Prior to construction, develop a Flood Contingency Plan with specific mitigation measures for any proposed works or temporary laydown and staging areas, as required. The Flood Contingency Plan may include risk mapping, and a monitoring strategy. Include construction site on TRCA flood warning system to prepare site in advance of possible flood events. <p>Operations</p> <ul style="list-style-type: none"> As no impacts are anticipated during operations, no mitigation measures are recommended. 	
Surface Water / Stormwater and Drainage	<p>Construction</p> <ul style="list-style-type: none"> Change in stormwater quality and quantity, including: <ul style="list-style-type: none"> Erosion of exposed soil and increased sediment loading which may impact receiving waterbodies and/or municipal stormwater drainage system; and, Increased surface water/stormwater runoff <p>Operations</p> <ul style="list-style-type: none"> Potential impacts are not anticipated during operations 	<p>Construction</p> <ul style="list-style-type: none"> Prior to construction, a Stormwater Management Plan that will outline stormwater discharges management associated with construction activities, and an Erosion and Sediment Control plan will be developed. The overall stormwater quality and quantity control strategy will be developed in accordance with all relevant municipal, provincial, and federal requirements, as amended, and outlined in a Stormwater Management Report. Stormwater management design will consider guidance provided by the MECP, formerly the Ministry of the Environment and Climate Change Stormwater Management Planning and Design Manual (2003) and MTO Drainage Management Manual (2008), TRCA Stormwater Management Criteria (2012), and the Low Impact Development Stormwater Management Planning and Design Guide (TRCA/Credit Valley Conservation 2010), as required. The following stormwater management best management practices will be considered and implemented, as required: <ul style="list-style-type: none"> Reduce clearing and amount of exposed soil; Install key sediment control before grading/land alterations begin; Sequence construction activities so that the soil is not exposed for long periods of times; Protect storm drain inlets to filter out debris; and, Stabilize all exposed soil areas as soon as land alterations have been completed. The TRCAs Living City Policies will be followed during detailed design, including those policies related to outfall placement. Continue to consult with the TRCA to align the Lower Don Bridge and Don Yard early works to the Lower Don Special Policy Area requirements, including the approach to flood proofing and flood modelling. The TRCAs Stormwater Management Criteria will be followed, including those policies related to impervious areas. <p>Operations</p>	<p>Construction</p> <ul style="list-style-type: none"> Monitoring activities will be implemented as outlined in the Stormwater Management Plan and/or Erosion and Sediment Control Plan and may include regular inspections and reporting on the performance of implemented erosion and sediment control measures, best management practices, and other monitoring activities, as required. <p>Operations</p> <ul style="list-style-type: none"> As no impacts are anticipated during operations, no monitoring activities are recommended.

Subject: Invitation for Participation: Ontario Line - Borehole Drilling
Date: Wednesday, February 23, 2022 3:55:42 PM
Attachments: [image003.png](#)
[IN Arch Monitoring fieldwork BFN.pdf](#)

Dear Chief Sandy,

Please find attached a letter inviting participation in the archaeological monitoring of borehole drilling planned to occur in the Lower Don Bridge area as part of the Ontario Line Project.

The date of this fieldwork is tentatively set for March 7, 2022. If you are interested in participating, please let me know as soon as possible and we will work with you and the project team to coordinate.

If you have any questions or concerns, please feel free to reach out to me at any time.

Thank you for your time and assistance.

Delivered by Email

Dear Chief Sandy,

RE: Ontario Line Project - Invitation to Participate in Archaeological Monitoring for Borehole Drilling - Lower Don Bridge Area

Metrolinx continues to progress the Archaeological studies for the Ontario Line project and wanted to invite Beausoleil First Nation to participate in further Archaeological monitoring for borehole drilling planned for the Lower Don Bridge area.

A Stage 1 Archaeological Assessment (AA) was completed as part of the Ontario Line Environmental Impact Assessment Report (EIAR). This report identified the area for the proposed boreholes as having archaeological potential. Both the Stage 1AA report and the EIAR were shared with Nations, in both August and November 2021.

Metrolinx is completing an Environmental Site Assessment in the Lower Don area (please see **Figure 1**). Given the identified archaeological potential of the area, archaeological monitoring will take place for the planned borehole drilling. This approach will provide for the on-site identification of archaeological resources and, if necessary, stop-work order of drilling by a licensed archaeologist in the event potential archaeological resources are encountered. A licensed archaeologist will be on-site during drilling to visually inspect spoil removed during borehole drilling as well as intermittent borehole samples to visually identify the presence of artifacts. Metrolinx would value any participation that Beausoleil First Nation may wish to have in this monitoring program.

Please see the fieldwork details below:

Start Date: March 7, 2022 (potentially March 8 as well depending on drilling)

Duration: 1 day

Start Time: 8:30am

Consultant Company: Stantec

Contact information: Jeffrey Muir - (289) 208-5298

Assessment: Archaeological monitoring for borehole drilling

Size of Field Crew: 1 field supervisor

Parking and meeting location: See Figure 2. Meet and park at yellow star - along Bayview Ave and Mill St

Required PPE:

- Class 2 PPE (hi-viz vest)
- CSA Type 2 Hard Hat with foam insert (bump caps)
- CSA approved eye protection
- CSA approved 6" laced safety shoes
- CSA Hearing protection, in ear or over ear
- Appropriate clothing for weather conditions

Invitation to Participate in Fieldwork

Metrolinx would value the involvement of Beausoleil First Nation in the upcoming archaeological monitoring fieldwork outlined above. Should your Nation wish to participate, please let us know at your earliest convenience. We welcome any requests for a meeting to discuss opportunities to participate or to explore this project in more detail with Beausoleil First Nation. Upon receipt of Beausoleil First Nation's interest in participating, Metrolinx will work to coordinate your Nation's involvement. Metrolinx is also willing to share fieldnotes and/or a summary of the borehole and geotechnical data in addition to the open invitation to participate directly in the monitoring.

Engagement

Regardless of whether or not your Nation participates in the fieldwork, Metrolinx will inform you of discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will also ensure that future Archaeological Assessment reports are provided to your Nation in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries.

If you require additional information or materials, or if you wish to discuss this project in more detail, please contact, Jaimi O'Hara, Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Thank you for your time and consideration.

Yours Truly,

Subject: Ontario Line - Archaeological monitoring for Borehole Drilling
Attachments: OL Archaeological Monitoring Invitation for Participation in monitoring for Boreholes_CGI.pdf

Dear Chief Big Canoe,

Please find attached a letter inviting participation in upcoming archaeological monitoring for borehole drilling that is taking place at various locations to support environmental assessment and geotechnical studies related to the Ontario Line Subway project. The boreholes are being drilled in locations that have known archaeological potential and as such Metrolinx is ensuring that a consultant archaeologist is on-site to monitor. We'd like to extend this invite to your Nation as well. We appreciate that during these uncertain times of COVID-19 this may not be possible or safe for your Nation. We are happy to provide any fieldnotes taken by the consultant archaeologist and/or provide a summary of the data collected if this is at all helpful to you. Please let us know if there is any other way we can support your Nation during this time.

The boreholes are anticipated to be completed over the next several weeks beginning this Friday on **January 22, 2021**. Please let me know if you have interest in participating as soon as possible, and we will work with you and the project team to coordinate.

[Attachment 3.pdf](#)
[OL_CS_EWR Initial Draft Letter CGI.pdf](#)

Dear Chief Big Canoe,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. Attached you will find a letter providing an update on the project. The purpose of this letter is to:

- Provide an update on the scope of the project work
- share the initial draft of the Early Works Report for the proposed Corktown Station
- Invite your Nation to participate in upcoming archaeological fieldwork

In an effort to streamline your review, we draw your attention to the attachment which provides an overview of the expected environmental impacts and proposed mitigations, as we know this may be of specific interest to you.

Metrolinx is also preparing a letter specific to works being planned within the Don Valley as we recognize the significance of this waterway to many Nations. We hope to share that letter soon. We are happy to meet with your Nation to discuss the Ontario Line and address any questions or concerns that your Nation may have.

We ask that any comments on the draft Corktown Station Early Works Report be provided no later than **April 15, 2021**. Please note that the Noise and Vibration Report, which will be part of the Early Works Report is still being prepared and we will share with your Nation by March 19, 2021.

The draft Corktown Station Early Works Report is available at the following link:

Please let us know as soon as possible if your Nation has interest in participating in future archaeological fieldwork.

We appreciate the volume of documents that Metrolinx has shared with your Nation.

If you have any questions or concerns, please do not hesitate to contact me.

Miigwetch,

Fallon

Subject: Ontario Line Project - Invitation to Meet & provide input on First Parliament Site
Date: Monday, April 12, 2021 3:48:36 PM
Attachments: [First Parliament CGI.pdf](#)

Dear Chief Big Canoe,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. We recently communicated with your Nation about the proposed Corktown Station which is along the planned alignment of the Ontario Line. This location includes parcels of land which were once the site of Upper Canada's First Parliament buildings. Metrolinx and its partners are exploring opportunities to commemorate the history of this site, and have been engaging with various parties including the City of Toronto and the Mississaugas of the Credit First Nation, on whose treaty territory this project is occurring.

Given the significant chance of recovering Indigenous and European artifacts during the Corktown Station Early Works, a detailed archaeological workplan is being developed. Metrolinx recognizes the importance and value of Indigenous monitors for any archaeology related to the Ontario Line Project. In our previous communication, an invitation was included for your Nation to participate in any archaeological fieldwork and monitoring during the Corktown Station Early Works, including demolition of modern buildings currently on the First Parliament site.

This work is anticipated to commence in Fall 2021, and if you have not yet expressed interest in participating, please feel free to do so at your earliest convenience. As a reminder any comments on the draft Corktown Station Early Works Report should be provided no later than **April 15, 2021**.

Metrolinx recognizes that the history of this location extends beyond European use, and as such, wants to take the opportunity to understand any significance it may have to Indigenous Nations. Metrolinx would like to meet with your Nation to discuss the First Parliament site, its commemoration, as well as review the broader Ontario Line project if you wish. We recognize that traditional knowledge of this area may be sacred and/or not appropriate to be shared, but would appreciate any information that may be appropriate for Metrolinx to consider.

This letter is not intended to replace engagement but to provide a high level summary for your information. We would very much appreciate meeting with your Nation to discuss in more detail. Please let me know if you have any questions or concerns. We appreciate the volume of documents that Metrolinx has shared with your Nation. If you have any questions or concerns, please do not hesitate to contact me.

Miigwetch,

Fallon

Chief Donna Big Canoe
Chippewas of Georgina Island
RR #2, Box 13
Sutton West, ON L0E 1R0
Delivered by Email

Dear Chief Big Canoe,

RE: Ontario Line Project - First Parliament Site and Lime Kiln Site

Metrolinx, a regional transportation agency, is helping to transform the way the Greater Golden Horseshoe moves by building a fast, convenient and integrated transit network. As part of this work, Metrolinx is continuing the pre-construction planning of the Ontario Line which will bring nearly 16 kilometres of subway service to Toronto.

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Chippewas of Georgina Island. Metrolinx appreciates and respects Chippewas of Georgina Island's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to share with Chippewas of Georgina Island information regarding Corktown Station early works and additional information regarding upcoming field visits and investigations at the Corktown Station early works site, which includes two registered archaeological sites, the First Parliament site and the Lime Kiln site.

Project Description

The proposed Ontario Line is a new 16-kilometer subway line, which will occupy an exclusive right-of-way system encompassing a combination of below-grade, above-grade, and at-grade alignment. The route (Figure 1) will run from Ontario Place/Exhibition through downtown Toronto to the Ontario Science Centre in the City of Toronto, with six (6) potential interchange stations and 17 new connections to GO Transit, existing subways and streetcars. More information on the Project can be found on our website: www.metrolinx.com/ontarioline

Corktown Station Early Works

As communicated in the letter sent to Chippewas of Georgina Island on March 11, 2021, the Corktown Station site has been identified for launching tunnel excavation equipment for the downtown and Don Yard segments of the proposed Ontario Line alignment, as well as the location of the Corktown Station. The First Parliament and Lime Kiln Sites, located within the Corktown Station area, are known archaeological sites which require additional archaeological study ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures, followed by completion of necessary archaeological studies, is required. Completion of this preparatory work on an expedited basis is essential to allow for the timely delivery of the overall Project and is anticipated to begin in the Fall 2021, subject to the completion of the Corktown Station early works process in accordance with Ontario Regulation 341/20: Ontario Line Project.

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These activities will enable completion of environmental due diligence investigations, including archaeological assessments. These activities will occur on properties within the Corktown Station early works project footprint, as shown in **Figure 1**.

Figure 1: Map of Corktown Station Early Works

Environmental impacts of Corktown Station early works are being assessed in accordance with O. Reg. 341/20. Metrolinx shared the draft Corktown Station Early Works Report and associated discipline reports with Chippewas of Georgina Island on March 11, 2021 and had requested any comments to be provided by April 9, 2021.

Archaeological Work at the First Parliament Site and Lime Kiln Site

Metrolinx appreciates the significance of archaeology to Chippewas of Georgina Island. The properties at 265 Front Street East, 271 Front Street East, and 25 Berkeley Street, in the St. Lawrence neighbourhood of the City of Toronto, are collectively host to the First Parliament Site. It is located on the southwest corner of Parliament Street and King Street, between Parliament Street and Berkeley Street. The First Parliament Site is a registered archaeological site (AjGu-41) which may include resources associated with the First and Second Parliament Buildings, the Home District Gaol, and Consumers' Gas company buildings. The surface of the property is currently occupied by automotive businesses, including a car dealership, car wash, and surface parking lot. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and remnants of early Toronto industry may be found at this site.

North of the First Parliament Site is another registered archaeological site (AjGu-64), the Lime Kiln Site, which includes remains from the Toronto Lime Works Company. A variety of structural features, in various states of preservation, have been documented on this site. The location of the Lime Kiln Site and the First Parliament Site are shown in **Figure 2**.

Figure 2: Location of First Parliament Site and Lime Kiln Site Areas

The First Parliament Site and Lime Kiln Site require additional archaeological studies ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures is necessary. Completion of this preparatory work is essential to allow for the timely delivery of the Ontario Line.

Archaeological fieldwork to remove or protect archaeological resources is anticipated to commence in early Fall 2021, and a workplan for these archaeological investigations is under development. As mentioned in the letter sent on March 11, 2021, Chippewas of Georgina Island is invited to participate in all archaeological fieldwork, and to review and provide comments on forthcoming reports.

Feedback on Commemoration of First Parliament Site

Metrolinx appreciates that the history of the First Parliament site is not one simply of Canadian origin, but rather holds longer history and tradition. Metrolinx also appreciates that the site of the First Parliament of Upper Canada is linked to a history of colonization and harmful practices towards Indigenous Peoples. Given the significance of this site, Metrolinx is engaging with Indigenous Nations, City of Toronto and the broader community to identify opportunities for commemoration. Metrolinx is committed to ensuring that any feedback from Chippewas of Georgina Island regarding the significance of this site is considered as part of this commemoration. Metrolinx appreciates that traditional or cultural knowledge about this site may be sacred and/or not be appropriate to be shared but welcomes any comments or ideas from Chippewas of Georgina Island that may be appropriate to commemorate Indigenous Peoples.

Engagement

Metrolinx is committed to an open, respectful, and transparent relationship with Chippewas of Georgina Island. We would like to meet with Chippewas of Georgina Island to better understand any significance the First Parliament site may have to your Nation. We are also happy to assist in reviewing the Corktown Station Early Works Report or reviewing the proposed archaeological workplan for this site. If Chippewas of Georgina Island requires additional information or materials, or you wish to discuss this project in more detail or set up a meeting, please contact Fallon Melander, Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*. Thank you for your time in reviewing these assessments.

Thank you for your time in reviewing this letter.

Subject: Ontario Line - Project Update - Don Valley and River - Invitation for Participation in Stage 2 Archaeological Fieldwork
Date: Friday, April 30, 2021 1:15:58 PM
Attachments: [OL-Don River Letter 2021 CGI.pdf](#)

Dear Chief Big Canoe,

Metrolinx continues to progress its environmental studies for the Ontario Line Project. We wanted to keep you aware that part of the project scope falls within the Don Valley and River System, and we recognize the importance of Valley and the waters within. Attached you will find a letter providing an update on the project and information regarding the planned work and environmental assessments that are anticipated to take place within the Don Valley. We also wanted to invite your Nation to participate in the planned Stage 2 Archaeological Assessments that are anticipated to occur as part of the upcoming field season.

This letter is not intended to replace engagement but to provide a high level summary for your information. We would very much appreciate meeting with your Nation to discuss in more detail. Please let me know if you have any questions or concerns.

Miigwetch,

Fallon

Delivered by Email

Dear Chief Big Canoe,

RE: Ontario Line Project - Don River Crossings & Stage 2 Archaeological Assessment Update

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Chippewas of Georgina Island. Metrolinx appreciates and respects Chippewas of Georgina Island's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to provide more information to Chippewas of Georgina Island about the Ontario Line crossings of the Don River and its tributaries. Metrolinx appreciates the significance of the waters and wishes to better understand how the potential impacts of construction around the Don River may be of interest to Chippewas of Georgina Island.

Background

The Project is a new subway line with connections to Line 1 (Yonge-University) subway service at Osgoode and Queen Stations, Line 2 (Bloor-Danforth) subway service at Pape Station, and Line 5 (Eglinton Crosstown) service at the future Science Centre Station. Fifteen stations are proposed, with additional connections to three GO Transit lines (Lakeshore East, Lakeshore West and Stouffville), and the Queen, King, Bathurst, Spadina, Harbourfront and Gerrard/Carlton streetcar routes. The Project will reduce crowding on Line 1 and provide connections to new high-order rapid transit neighbourhoods. More information on the Project can be found on our website: <http://www.metrolinx.com/ontarioline>.

Work in the Don River System

As part of the Ontario Line Project, the following four crossings within the Don River system are proposed:

- Location 1: Lower Don River Crossing (Lower Don Bridge);

10 Bay Street
Toronto, ON M5J 2N8

metrolinx.com

- Location 2: Millwood Road Crossing;
- Location 3: Walmsley Brook Crossing; and
- Location 4: West Don River Crossing north of Overlea Boulevard.

Locations 1-4 are shown in **Figure 1** and described in further detail below.

Figure 1: Ontario Line Project - Proposed Don River System Crossings

The environmental assessment for the Ontario Line Project is being completed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20) made under the *Environmental Assessment Act*. Construction of the Lower Don Crossing (Location 1) will be assessed in the Lower Don Bridges and Don Yard Early Works Report, that is anticipated to be shared with Chippewas of Georgina Island in summer 2021. Construction of the other three crossings (Locations 2-4) will be assessed in the Environmental Impact Assessment Report, that is planned to be shared with Chippewas of Georgina Island in early 2022.

Location 1: Lower Don River Crossing (Lower Don Bridge)

A new bridge is planned to be built on the north side of the existing Lakeshore East rail bridge at the Lower Don River, with space for Ontario Line tracks going in both

directions. We are also planning pedestrian and cycling connections across the Lower Don River.

Location 2: Millwood Road Crossing

The underground section of the Ontario Line running under Pape Avenue will emerge from the southern embankment of the Don Valley on an elevated guideway crossing the Don River, west of the Leaside Bridge (Millwood Road). The elevated guideway will connect to Thorncliffe Park in the north.

Location 3: Walmsley Brook Crossing

An elevated guideway will cross the Walmsley Brook tributary of the West Don River north of Pat Moore Drive. The guideway will then continue east across Beth Nealson Drive.

Location 4: West Don River Crossing (north of Overlea Boulevard)

The elevated guideway will cross the West Don River, north of Overlea Boulevard. This section of the route will connect to Don Mills Road and the future Flemingdon Park Station.

Field Surveys and Studies

As project planning is still in progress, environmental field surveys and studies as well as the timing of this work are being determined. Environmental field surveys and studies that may occur within or near the Don River include Stage 2 archaeological assessment and natural environment surveys (e.g., Species at Risk and tree surveys). Studies, surveys and their timing will be confirmed as project planning progresses. Further details are anticipated to be available in mid-Summer 2021.

Update on Archaeology

Metrolinx is currently planning to undertake Stage 2 Archaeological Assessments (AA) near the Don River starting in Fall 2021. The Stage 2 AA investigations will assess areas of identified archaeological potential within the Ontario Line study area which may be affected by the construction of the Project. Stage 2 AA fieldwork consists of test pit surveys at 5 m intervals within areas of previously identified archaeological potential.

Metrolinx would appreciate any interest Chippewas of Georgina Island may have in participating in the Stage 2 AA fieldwork. Some of the Stage 2 AA may occur on lands within the Toronto and Region Conservation Authority's (TRCA) property boundaries and regulated area. Metrolinx will coordinate with TRCA to ensure that Indigenous

Nations are provided the opportunity to participate in Stage 2 AA investigations. Upon receipt of Chippewas of Georgina Island's interest in participating, Metrolinx will work to coordinate your Nation's involvement.

As Metrolinx continues to undertake environmental due diligence for this project, additional archaeological assessment reports are anticipated to be completed. Metrolinx will ensure that Chippewas of Georgina Island will be made aware of and engaged regarding any future archaeological assessments, and especially the discovery and preservation of Indigenous artifacts. Metrolinx will also ensure that future archaeological assessments are provided to Chippewas of Georgina Island in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries

Invitation for Input

We are committed to an open, respectful, and transparent engagement with Chippewas of Georgina Island. We recognize the potential significance of this project to Chippewas of Georgina Island and wanted to keep you apprised of this project. We welcome meeting in the near future to discuss this project and its possible impacts and ways to appropriately engage with Chippewas of Georgina Island.

We are happy to address any questions that Chippewas of Georgina Island may have about the work proposed in the Don River system or the Ontario Line Project as a whole. If you require additional information or materials, or if you wish to discuss this Project in more detail or set up an in-person meeting, please contact Fallon Melander, Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Metrolinx thanks you for the time in reviewing this letter. Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*.

Yours Truly,

Subject: RE: Ontario Line Project – Archaeological Monitoring for Borehole Drilling - 265 Front St East - CGI
Date: Wednesday, July 7, 2021 9:36:01 AM
Attachments: [160560009_rem_ph2esa_fig01_siteplan_210920247_20210226.pdf](#)
[OL Archaeological Monitoring Invitation 265 front St CGI.pdf](#)

Dear Chief Big Canoe,

Please find attached a letter inviting participation in upcoming archaeological monitoring for borehole drilling that is taking place next week at 256 Front Street in Toronto to support environmental assessment and geotechnical studies related to the Ontario Line Subway project. The boreholes are being drilled in locations that have known archaeological potential and as such Metrolinx is ensuring that a consultant archaeologist is on-site to monitor. If you are not able to attend, we are happy to provide any fieldnotes taken by the consultant archaeologist and/or provide a summary of the data collected if this is at all helpful to you.

The boreholes are anticipated to be completed between July 12 and July 16, 2021. Please let me know as soon as possible if you have interest in participating, and we will work with you and the project team to coordinate. And just a final note for your information, both Fallon Melander and Jaimi O'Hara, who are usually Metrolinx's main point of contact with your Nation, are away from the office this week. Hence you are receiving this communication from me.

Miigwetch,

Make today great,

Christine Parris (she, her, hers)

Dear Chief Big Canoe,

RE: Ontario Line Project - Archaeological Monitoring for Borehole Drilling - 265 Front St East

Metrolinx and its consultants, Stantec and Wood, will be undertaking geotechnical and environmental site assessment investigations at 265 Front St East. As part of this work boreholes will be drilled at the property. These boreholes will be located on/near potential archaeological sites and an archaeologist will be on site to monitor the drilling activities. We are writing to invite Six Nations of the Grand River to participate in the archaeological monitoring associated with this work. If preferable, Metrolinx is happy to share any fieldnotes taken by the consultant archaeologist as well as a summary of the borehole and geotechnical study data for review.

The fieldwork is anticipated to be conducted between July 12th and July 16th, 2021. Fieldwork dates may change based on field progress and weather.

Invitation to Participate in Fieldwork

Metrolinx would appreciate any interest Six Nations of the Grand River may have in participating in the archaeological monitoring fieldwork. The attached maps illustrate the location of the boreholes that will be drilled. Upon receipt of Huron-Wendat Nation interest in participating, Metrolinx will work to coordinate your Nation's involvement.

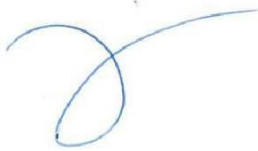

Engagement

Regardless of whether or not your Nation participates in the fieldwork, Metrolinx will inform you of discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will also ensure that future Archaeological Assessment reports are provided to your community in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries.

If your Nation wishes to participate in the fieldwork, or if you'd prefer to receive fieldnotes and/or a summary of the borehole and geotechnical data, please let us know at your earliest convenience. If you require additional information or materials, or if you wish to discuss this project in more detail or set up an in-person meeting, please contact, Indigenous Relations at Metrolinx. We can be contacted at IndigenousRelations@metrolinx.com.

Thank you for your time and consideration.

Yours Truly,

Dear Chief Big Canoe,

Metrolinx is working with its consultant HDR to provide opportunities for participation in upcoming Archaeological Assessment and Natural Environment fieldwork associated with the Ontario Line. Please find attached a letter inviting your Nation to participate.

The fieldwork is anticipated to late August - early September 2021. Please let me know if you have interest in participating as soon as possible, and we will work with you, the project team and HDR to coordinate.

If you have any questions or concerns, please feel free to contact the Indigenous Relations Office at anytime.

Thank you,

Delivered by Email

Dear Chief Big Canoe,

RE: Ontario Line Project - Update on Archaeological Assessments and Natural Environment Surveys

Metrolinx and its consultant, Stantec and HDR, will be undertaking Archaeological Assessment and Natural Environment fieldwork associated with the Ontario Line Project. We appreciate Chippewas of Georgina Island's interest in participating in these studies. The following letter provides details about the anticipated surveys to support the planning and coordination of involvement by your Nation.

Invitation to Participate in Fieldwork

Metrolinx would appreciate any interest Chippewas of Georgina Island may have in participating in the archaeological fieldwork. Upon receipt of Chippewas of Georgina Island interest in participating, Metrolinx will work to coordinate your Nation's involvement.

Update on Archaeology

Metrolinx is planning to undertake various Archaeological Assessments for the Ontario Line Project. This archaeological investigation will assess areas of identified archaeological potential, which may be potentially affected by the construction of the Project. The archaeological works are planned to begin in **September 2021**. Fieldwork dates may change based on field progress and weather.

Metrolinx would appreciate any interest Chippewas of Georgina Island may have in participating in the archaeological fieldwork. Upon receipt of Chippewas of Georgina Island- interest in participating, Metrolinx will work to coordinate your Nation's involvement.

As Metrolinx continues to undertake environmental studies for this project, additional archaeological assessment reports are anticipated to be completed. Metrolinx acknowledges that Chippewas of Georgina Island will be made aware of and

engaged regarding any future archaeological assessments, and especially the discovery and preservation of Indigenous artifacts and sacred burial grounds.

Regardless of whether or not your Nation participates in the fieldwork, Metrolinx will inform you of discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will also ensure that future Archaeological Assessment reports are provided to Chippewas of Georgina Island in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries.

Natural Environment Field Surveys

Metrolinx is conducting natural environmental studies to review and document existing conditions within the Study Area and to carry out impact assessment reporting. Most of the natural environment fieldwork for Ontario Line is planned to occur in 2022.

However, the surveys detailed in the table below are planned for this year and include butternut survey, tree inventory and aquatic habitat assessment. Please note that these are approximate dates and may be subject to change pending appropriate weather conditions and field survey requirements. Metrolinx will endeavour to keep Chippewas of Georgina Island apprised as the work unfolds.

Survey	Date(s)
Butternut Health Assessments (Areas detailed in Figures 1 and 2)	• August, September/2021
Tree Inventory (Areas detailed in Figures 1 and 2)	• September/2021
Aquatic Habitat assessment (Don and West Don ravine areas)	• September/2021

Engagement

If your Nation requires additional information or materials, or if you wish to discuss this project in more detail or set up an in-person meeting, please contact Jaimi

O'Hara, Acting Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*.

Dear Chief Big Canoe,

RE: Ontario Line Project - Lower Don Bridge Marine Archaeological Overview Assessment for Review

Metrolinx wishes to build a strong and respectful relationship with Chippewas of Georgina Island. Metrolinx appreciates and respects Chippewas of Georgina Island's desire to be appropriately informed and aware of projects. Metrolinx wishes to share with you the development of the Marine Archaeological Overview Assessment (MAOA) report for the proposed construction of the Lower Don Valley Bridge over the Don River. This proposed bridge is a component of the Ontario Line Project as part of the Lower Don Bridge and Don Yard Early Works. We invite Chippewas of Georgina Island's feedback on the marine Archeological Overview Assessment prepared for the Ontario Line Project.

Project Description

The Ontario Line will bring 15.6 kilometres of subway service to Toronto. The Ontario Line will stretch from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line will have 15 new stations, including six interchange stations, connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable service.

Lower Don Bridge and Don Yard Early Works

The Lower Don Bridge and Don Yard early works are planned for where the Ontario Line will run alongside GO train operations. These early works will set the groundwork for other major construction on the Ontario Line project and include:

- building a new bridge north of the existing rail bridge over the Lower Don River that will carry the Ontario Line tracks;
- shifting GO tracks in the Don Yard and nearby rail corridor to accommodate Ontario Line infrastructure;
- modifying the existing rail bridge to accommodate GO track shifts and Ontario Line infrastructure; and
- relocating and protecting utilities and signal infrastructure in the area.

The location of the Lower Don Bridge and Don Yard early works project footprint and study area can be viewed in **Figure 1** below.

Figure 1: Map of Lower Don Bridge and Don Yard Early Works

Marine Archaeological Overview Assessment

On behalf of Metrolinx, Stantec has undertaken a Marine Archaeological Overview Assessment for the proposed Lower Don Bridge. The purpose of the Marine Archaeological Overview Assessment is to determine the marine archaeological potential of the study area for the bridge shown in **Figure 2** below.

The proposed bridge will cross over the Don River on the north side of the existing GO Transit Lakeshore East rail bridge. As a result, a large portion of the study area overlaps with the Don River. While the bridge will have no permanent in-water components, Metrolinx anticipates that in-water construction activities may impact potential submerged cultural resources. The marine archaeological potential of the study area is being considered as part of the Marine Archeological Overview Assessment.

The assessment determined that despite the study area for the Lower Don Valley Arch Bridge Superstructure having indicators of marine archaeological potential, there has been extensive river-bed disturbance to date. The riverbed has been previously disturbed by engineered

channeling, modern dredging, and modern construction. The assessment determined that the study area retains low to no potential for the identification and documentation of in situ Indigenous and Euro-Canadian marine archaeological resources. As a result no further marine archaeological work is required for the study area.

A copy of the marine Archeological Overview Assessment has been included in the Dropbox link for your review. Please provide any comments you may have by **November 19, 2021**.

Invitation for Input

We are committed to an open, respectful, and transparent engagement with Chippewas of Georgina Island. Metrolinx values any input that Chippewas of Georgina Island is willing to provide on the Marine Archaeological Overview Assessment report.

We are happy to meet with your Chippewas of Georgina Island to go over the project and development of the Marine Archaeological Overview Assessment report and answer any questions Chippewas of Georgina Island may have on the report or the project as a whole.

If you require additional information or materials, or if you wish to discuss this project in more detail or set up a meeting, please contact Jaimi O'Hara, Acting Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Please submit your feedback in writing by **November 19, 2021**.

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*, except where information is provided to Metrolinx in confidence, pursuant to section 15.1.

Delivered by Email

Dear Chief Big Canoe,

**RE: Ontario Line Project - Stage 2 Archaeological Assessment - Moss Park and Ordnance Park
Invitation to Participate in Archaeological Fieldwork**

Metrolinx and its consultant, Stantec continue to progress the archaeological studies for the Ontario Line project and wanted to invite Chippewas of Georgina Island to participate in Stage 2 Archaeological Assessments planned to occur at Moss Park and Ordnance Park in the upcoming weeks. The locations of Moss Park and Ordnance Park study areas can be viewed in **Figure 1 and 2** below.

Moss Park and Ordnance Park have been previously assessed in a desktop study, the *Ontario Line Stage 1 Archaeological Assessment Report - South* which was shared with Chippewas of Georgina Island in March 2020 and was subject to an Addendum shared with Chippewas of Georgina Island in February 2021. The Stage 1 report recommended that a Stage 2 archaeological assessment is required for Moss Park and Ordnance Park parcels.

The Stage 2 archaeological field work will be conducted by test pit survey, in accordance with the Ministry of Heritage, Sport, Tourism and Culture Industries' (MHSTCI) 2011 *Standards and Guidelines for Consultant Archaeologists*. The Stage 2 test pit survey method consists of hand excavating test pits by shovel at a five-metre interval on the park lands. The test pits are at least 30 centimetres in diameter and dug through the topsoil (which has a variable depth generally between 15 and 25 centimetres, but may be deeper or shallower) and at least five centimetres into subsoil. Once complete, test pits will be backfilled. Areas disturbed by utility infrastructure or recent construction will not be surveyed but will be photo documented. Based upon the Stage 2 field work, subsequent archaeological investigations may be recommended depending on what is found during the Stage 2 test pit survey.

Please see the fieldwork details below:

MOSS PARK:

Start Date: Tentatively October 25, 2021. If the start date changes, we will reach out to you.

Duration: Approximately two to three days

Start Time: 8am

Consultant Company: Stantec

Contact information: Jeffrey Muir - (289) 208-5298; Heather Kerr - (416) 602-3271; Patrick Hoskins - (613) 716-4687

Assessment: Stage 2 Archaeological Assessment

10 Bay Street
Toronto, ON M5J 2N8

Meeting Location Address: 150 Sherbourne St

Size of Field Crew: 2 (1 Field director, 1 field tech)

Parking location: Above-ground parking lot at the southwest corner of Jarvis Street and Queen Street East; approximate three minute walk

ORDNANCE PARK

Start Date: Work on Ordnance Park will begin after the Moss Park work is completed

Duration: Approximately two weeks

Start Time: 8am

Consultant Company: Stantec

Contact information: Jeffrey Muir - (289) 208-5298; Heather Kerr - (416) 602-3271; Patrick Hoskins - (613) 716-4687

Assessment: Stage 2 Archaeological Assessment

Size of Field Crew: 4 (1 Field director, 3 field techs)

Required PPE:

Item	Specifications
Clothing and Attire	Loose clothing, long hair, dangling accessories, jewelry, or other similar items that are likely to be a hazard will not be worn unless they are tied, covered, or otherwise secured so they prevent the hazard.
Foot Protection	Canadian Standards Association (CSA) approved work boots (Steel-toed boots, minimum 6" from top of sole, grade 1 with sole protection [CSA Standard Z195-09]).
Hand Protection	Cut, puncture, and abrasion-resistant gloves shall be worn when conducting archaeological hand digging and screening activities.
Eye and Face Protection	CSA approved safety glasses with rigid side shields. Regular prescription glasses are not permitted unless they are designed as CSA safety glasses complete with rigid shields. An ASTM level 1 (or higher) face covering is mandatory.
Head Protection	CSA approved Type II, Class E (side impact) hard hat. Hard hats shall be worn with the brim pointed forward.
Hearing Protection	Not needed.
High Visibility Safety Apparel	Mandatory class 2, level 2 High Visibility Safety Apparel (HVSA). Full length sleeves and pants with reflective stripes on both arms and legs are required.
*Although not considered PPE, face coverings for COVID-19 shall be worn when applicable	

Invitation to Participate in Fieldwork

Metrolinx would appreciate any interest Chippewas of Georgina Island may have in participating in the archaeological monitoring fieldwork. Upon receipt of Chippewas of Georgina Island's interest in participating, Metrolinx will work to coordinate Chippewas of Georgina Island's involvement.

Engagement

Regardless of whether or not Chippewas of Georgina Island participates in the fieldwork, Metrolinx will inform you of discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will also ensure that future Archaeological Assessment reports are provided to your community in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries.

If Chippewas of Georgina Island wishes to participate in the fieldwork, or if you'd prefer to receive fieldnotes and/or a summary of the borehole and geotechnical data, please let us know at your earliest convenience. If you require additional information or materials, or if you wish to discuss this project in more detail or set up an in-person meeting, please contact, Indigenous Relations at Metrolinx. We can be contacted at IndigenousRelations@metrolinx.com.

Thank you for your time and consideration.

Yours Truly,

Chief Donna Big Canoe
Chippewas of Georgina Island
RR #2, Box 13
Sutton West, ON L0E 1R0
Delivered by Email

Dear Chief Big Canoe,

**RE: Ontario Line Project - Species at Risk 17(2)(d) Permit Amendment Under the
*Endangered Species Act***

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with Chippewas of Georgina Island. Metrolinx appreciates and respects Chippewas of Georgina Island's desire to be appropriately informed and aware of projects. To that end, Metrolinx is sharing with Chippewas of Georgina Island information regarding the Species at Risk (SAR) 17 (2) (d) Permit under *the Endangered Species Act* (ESA, 2007) obtained in support of the Ontario Line Project, and the proposed amendment to this permit.

Project Description

Metrolinx, a regional transportation agency, is helping transform the way the Greater Golden Horseshoe region moves by building a fast, convenient, and integrated transit network. As part of this work, Metrolinx is proceeding with the Ontario Line Project which will bring 15.6 kilometres of subway service to Toronto.

Ontario Line Permit #CR-D-002-19

Metrolinx, as part of the Ontario Line Project, previously received approval for a 17(2)(d) permit (Permit #CR-D-002-19) under the *Endangered Species Act* (ESA, 2007) issued by the Ministry of the Environment, Conservation, and Parks (MECP) on August 10, 2020. The permit provides approval for those project activities that may have adverse impacts on identified Species at Risk (SAR) and/or their habitat. The permit allows for those activities to take place and provides direction to Metrolinx regarding mitigation measures and compensation requirements that would be necessary to support those impacted species to support no net loss.

To inform this permit, Metrolinx completed SAR screening through the Ontario Line Environmental Conditions Report and Natural Environment Report using various information sources. While the results of this screening were shared within the initial draft of the Environmental Conditions Report circulated to Chippewas of Georgina Island on June 15 2020, Draft Environmental Conditions Report circulated on September 17 2020 and Final Environmental Conditions Report circulated on November 30 2020, we regret that we did not engage with Chippewas of Georgina Island directly on the screening process or the findings.

Potentially Impacted Species and Summary of Permit Conditions and Requirements

Based on the SAR screening completed to date, some activities required to support the Ontario Line Project may result in the following species at risk being impacted:

- Bank Swallow - Threatened
- Barn Swallow - Threatened
- Blanding's Turtle - Threatened
- Butternut - Endangered
- Chimney Swift - Threatened
- Little Brown Myotis - Endangered
- Northern Myotis - Endangered
- Small-footed Myotis - Endangered
- Tri-colored Bat - Endangered

Activities that may result in impacts to species listed above are associated with project construction and include activities such as removal or alteration of SAR habitat features (e.g., structures that may support SAR bird nesting, and trees).

Prior to commencing any activities that may impact SAR and/or SAR habitat, Metrolinx will complete species-specific screening for areas where project activities are planned to take place, and, if necessary (if screening determines that SAR/SAR habitat is likely to be present), surveys to detect SAR and SAR habitat presence and conduct an impact assessment if presence is confirmed, to characterize species-specific impacts (e.g., amount of habitat removed).

Metrolinx will meet the ESA permit conditions such as implementing species-specific mitigation measures, monitoring their effectiveness, and taking corrective action as required. Species-specific mitigation measures include scheduling activities to take place outside of species-specific timing windows (e.g., outside of active season or breeding window), implementing exclusion measures to prevent individuals of certain species from being impacted by project activities, and others.

If project activities result in SAR habitat removal, Metrolinx will implement species-specific compensation measures such as creating habitat (e.g., nesting habitat features replacing habitat features removed). Compensation habitat will be regularly monitored, and appropriate corrective actions will be taken as required to ensure habitat functions as intended.

Proposed Permit Amendment

Metrolinx is proposing an amendment to the previously approved SAR 17(2)(d) Permit (Permit #CR-D-002-19) under the *Endangered Species Act* (ESA, 2007), approved on August 10, 2020. The purpose of this permit amendment is to seek approval for additional study area not included in the current Permit #CR-D-002-19, as shown in **Appendix 1**. There are no changes to the permit conditions, including species-specific mitigation measures and compensation requirements, and no additional species are being added at this time. The SAR screening developed in support of the current permit has been updated to provide occurrence probability of SAR that may be present in the areas Metrolinx is seeking to include in the permit as part of the proposed amendment, and is included as **Appendix 2**.

Permit Amendment Process - Next Steps

The Proposal for the 17(2)(d) Permit Amendment is anticipated to be available on the Environmental Registry of Ontario (ERO) for a 30-day public review period this Fall 2021, and Metrolinx will notify Chippewas of Georgina Island when the ERO posting is available. While not specifically required under the Environmental Bill of Rights, the Ministry of the Environment, Conservation and Parks (MECP) voluntarily posts all ESA permit proposals for public review to ensure transparency and inclusion.

Metrolinx is seeking Chippewas of Georgina Island's comments, questions, or requests for additional information upon review of the material presented in this letter at any time in advance of the public ERO posting. Questions or comments can also be submitted directly to MECP through the ERO posting during the 30-day public review period.

Following the 30-day public review period, the proposed permit amendment will be submitted to the Minister for review and consideration. The amendment may only be issued if the Minister is of the opinion that the legal requirements set out in clause 17(2)(d) of the *Endangered Species Act* (ESA, 2007) have been satisfied. Should the amendment be issued, Metrolinx will be obligated to adhere to the requirements and standards as stipulated under the permit.

Chippewas of Georgina Island will be kept apprised should any new SAR be identified within the project area as project planning progresses. In such cases we will endeavor to engage Chippewas of Georgina Island prior to seeking any necessary permit amendments.

Metrolinx is committed to building a long-term relationship with Chippewas of Georgina Island, and we recognize that this requires transparency. We appreciate that we have much work to do in this regard and we hope to move forward in a positive way. The original SAR permit was obtained as part of the normal course of Metrolinx business, which had yet to be identified by the Indigenous Relations Office as necessitating engagement and information sharing with Indigenous Nations.

The Indigenous Relations Office has begun guiding the organization and identifying opportunities to flag such actions in advance, so that we can more meaningfully engage with Indigenous Nations as we move forward. We appreciate your patience as Metrolinx continues to learn more about Indigenous Nations and with the help of the Indigenous Relations Office, becomes aware of additional opportunities for engagement with Indigenous Nations.

We appreciate that previous engagement activities may not have met the needs of Chippewas of Georgina Island, and the volume of materials may have resulted in Chippewas of Georgina Island not having been made adequately aware of the possible identified impacts to several Species at Risk under this permit. Metrolinx remains committed to meaningful engagement; we are committed to identifying and prioritizing the sharing of the most relevant and appropriate information with Chippewas of Georgina Island.

If Chippewas of Georgina Island requires additional information or materials, or you wish to discuss this project in more detail, please reach out to Jaimi O'Hara in the Indigenous Relations Office at Metrolinx and she would be pleased to facilitate a meeting. She can be contacted at IndigenousRelations@metrolinx.com.

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*, except where information is provided to Metrolinx in confidence, pursuant to section 15.1.

Thank you for your time in reviewing this letter.

Yours Truly,

cc: Natasha Charles, Project Coordinator, Chippewas of Georgina Island

Sutton West, ON L0E 1R0
Delivered by Email

Dear Chief Big Canoe,

**RE: Ontario Line Project - Stage 2 Archaeological Assessment - Thorncliffe Segment
Invitation to Participate in Archaeological Fieldwork**

Metrolinx and its consultant, Stantec continue to progress the archaeological studies for the Ontario Line project and wanted to invite Chippewas of Georgina Island to participate in Stage 2 Archaeological Assessments planned to occur in the Thorncliffe Segment in the upcoming weeks. The locations of the Thorncliffe Segment study areas can be viewed in **Figure 1** below.

Stage 2 archaeological test pit survey at five metre intervals is planned in areas of archaeological potential on the illustrated PINs (please see Figure 1). This includes the archaeological crew of four (one field supervisor and three field technicians) digging by hand each test pit, each of which is at least 30 centimetres in diameter. The pit is dug to subsoil (approximately 20 to 30 centimetres in depth depending on soil conditions, plus another five centimetres into the subsoil) at five metre intervals across the areas of archaeological potential. The topsoil would be screened through six-inch mesh to recover artifacts. We also have three additional days of Stage 1 field work within the Don Valley area, where a field supervisor would photograph the landscape in detail to document areas of steep slope, permanently wet areas, and areas of archaeological potential.

Please see the fieldwork details below:

THORNCLIFFE SEGMENT:

Start Date: Tentatively December 2, 2021. If the start date changes, we will reach out to you.

Duration: Approximately two weeks

Start Time: 8am

Consultant Company: Stantec

Contact information: Jeffrey Muir - (289) 208-5298; Heather Kerr - (416) 602-3271; Patrick Hoskins - (613) 716-4687

Assessment: Stage 2 Archaeological Assessment

Size of Field Crew: 4 (1 field supervisor and 3 field technicians)

Invitation to Participate in Fieldwork

Metrolinx would appreciate any interest Chippewas of Georgina Island may have in participating in the archaeological monitoring fieldwork. Upon receipt of Chippewas of Georgina Island's interest in participating, Metrolinx will work to coordinate your Nation's involvement.

Engagement

Regardless of whether or not your Nation participates in the fieldwork, Metrolinx will inform you of discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will also ensure that future Archaeological Assessment reports are provided to your Nation in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries.

If your Nation wishes to participate in the fieldwork, or if you'd prefer to receive fieldnotes and/or a summary of the borehole and geotechnical data, please let us know at your earliest convenience. If you require additional information or materials, or if you wish to discuss this project in more detail or set up an in-person meeting, please contact, Jaimi O'Hara, Acting Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Should you wish to provide input to the above questions, please submit your feedback in writing. Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*, except where information is provided to Metrolinx in confidence, pursuant to section 15.1.

Thank you for your time and consideration.

Delivered by Email

Dear Chief Big Canoe,

RE: Ontario Line Project - Stage 2 Archaeological Assessment - Corktown Station and Don Valley Area: Invitation to Participate in Archaeological Fieldwork

Metrolinx and its consultant, Stantec continue to progress the archaeological studies for the Ontario Line project and wanted to invite Chippewas of Georgina Island to participate in further archaeological monitoring for Corktown Station and Don Valley area.

CORKTOWN STATION

Archaeological monitoring for building demolitions is planned to occur at Corktown Station in the upcoming weeks. The locations of the Corktown Station study areas can be viewed in **Figure 1** below. Please note that this work is separate from the Stage 2 & Stage 4 archaeological investigations, which has ceased for the 2021 field season and will resume in Spring 2022. Metrolinx will ensure that Chippewas of Georgina Island is informed of when the Stage 2 & Stage 4 archaeological investigations resume.

The archaeological monitoring will occur for building demolition activities on the First Parliament site that may be capping archaeological deposits at Corktown Station (please see Figure 1). This includes an archaeological crew of two (one field supervisor and one field technician) monitoring the demolition of modern buildings in the areas of archaeological potential. Metrolinx would value any participation that Chippewas of Georgina Island may wish to have in this monitoring program.

Please see the fieldwork details below:

CORKTOWN STATION:

Start Date: Tentatively January 17-18, 2022. If the start date changes, we will reach out to you.

Duration: Approximately two to four months (demo work occurring intermittently during time period; schedule to be confirmed closer to start date)

Start Time: 8am

Consultant Company: Stantec

Contact information: Jeffrey Muir - (289) 208-5298; Heather Kerr - (416) 602-3271; Patrick Hoskins - (613) 716-4687

Assessment: Archaeological monitoring during building demolition

Size of Field Crew: 2 (1 field supervisor and 1 field technician)

DON VALLEY AREA

As part of the Ontario Line, Hydro One Network Infrastructure (HONI) needs to relocate several hydro towers to accommodate subway maintenance facilities. Metrolinx is carrying out a borehole drilling program in the Don Valley to provide HONI with geotechnical data for proposed hydro tower relocations.

Archaeological monitoring will occur for borehole drilling in areas with archaeological potential (please see Figure 2). This approach will provide for the on-site identification and, if necessary, stop-work order of drilling by a licensed archaeologist in the event potential archaeological resources are encountered. A licensed archaeologist will be on-site during drilling to visually inspect spoil removed during borehole drilling as well as intermittent borehole samples to visually identify the presence of artifacts. Metrolinx would value any participation that Chippewas of Georgina Island may wish to have in this monitoring program.

Please see the fieldwork details below:

DON VALLEY AREA:

Start Date: Mid-February. Exact dates will be confirmed in January 2022

Duration: 1-2 weeks

Start Time: 8am

Consultant Company: Stantec

Contact information: Jeffrey Muir - (289) 208-5298; Heather Kerr - (416) 602-3271; Patrick Hoskins - (613) 716-4687

Assessment: Archaeological monitoring for borehole drilling

Size of Field Crew: 2 (1 field supervisor and 1 field technician)

Invitation to Participate in Fieldwork

Metrolinx would value the involvement of Chippewas of Georgina Island in the upcoming archaeological monitoring fieldwork outlined above. Should your Nation wish to participate, please let us know at your earliest convenience. We welcome any requests for a meeting to discuss opportunities to participate or to explore this project in more detail with Chippewas of Georgina Island. Upon receipt of Chippewas of Georgina Island's interest in participating, Metrolinx will work to coordinate your Nation's involvement. If Metrolinx is also willing to share fieldnotes and/or a summary of the

borehole and geotechnical data in addition to the open invitation to participate directly in the monitoring.

Engagement

Regardless of whether or not your Nation participates in the fieldwork, Metrolinx will inform you of discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will also ensure that future Archaeological Assessment reports are provided to your community in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries.

If you require additional information or materials, or if you wish to discuss this project in more detail or set up an in-person meeting, please contact, Jaimi O'Hara, Manger of Indigenous Relations at Metrolinx. We can be contacted at IndigenousRelations@metrolinx.com.

Thank you for your time and consideration.

Dear Chief Big Canoe,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. We wish to share with you that the Draft Environmental Impact and Assessment Report (EIAR) has now been published. Attached you will find a letter outlining the Draft Environmental Impact Assessment Report (EIAR) prepared for the Ontario Line Project, as well as the Notice of Publication for the report.

The full report can be found using the following dropbox link:

The Notice of Publication commences a 30-day public review period which will continue from February 7, 2022 until March 9, 2022. As such, we ask that your Nation provide any comments in writing no later than March 9, 2022. We appreciate the size of these documents and would be happy to arrange a meeting to review the report and project with you.

In an effort to streamline your review, we draw your attention to the attachments which provide an overview of the expected environmental impacts and proposed mitigations for Natural Environment and Archaeological Resources, as we know this may be of specific interest to you.

Thank you for your time and assistance. If you have any questions or concerns, please do not hesitate to contact me.

Sutton West, ON L0E 1R0
Delivered by Email

Dear Chief Big Canoe,

RE: Ontario Line Project - Notice of Publication of Draft Environmental Impact Assessment Report (EIAR)

Metrolinx remains committed to meaningful consultation and engagement, especially where our projects have impacts to the Treaty and traditional lands of Chippewas of Georgina Island. In November of 2021, Metrolinx shared with Chippewas of Georgina Island the preliminary Draft Environmental Impact Assessment Report (EIAR) for comment and review. The purpose of this letter is to share with your Nation the that the Notice of Publication for the Draft EIAR has now been posted, and to continue to invite any comment or feedback you may wish to share on this report.

Project Description

Metrolinx is proceeding with the Ontario Line which will bring 15.6 kilometres of subway service to Toronto. The Ontario Line will stretch across the city, from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line will have 15 new stations, including six interchange stations, connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable service.

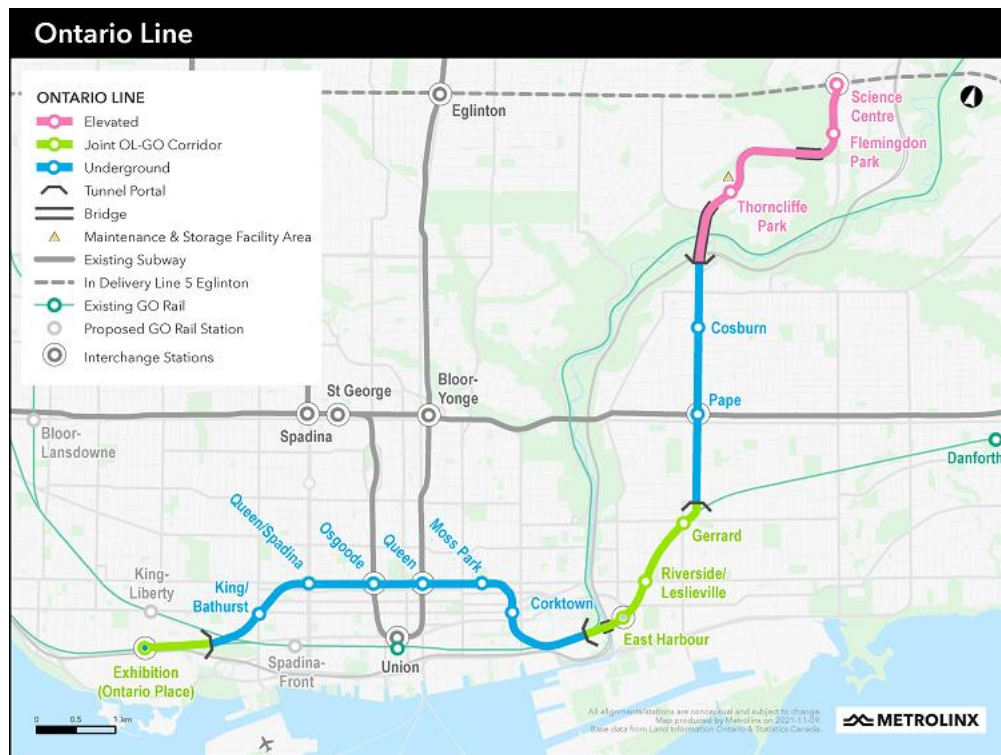

Figure 1 - Ontario Line

Ontario Line Environmental Assessment & Project Timeline

Environmental impacts of the Ontario Line Project are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*.

Table 1 below provides a summary of the Ontario Line Reports that have been shared, or will be shared with Chippewas of Georgina Island:

Table 1: Ontario Line Reporting Timeline

Report	Date Shared/to be Shared with Nations
Draft Early Works Report (included Exhibition Station, Lower Don Bridge, Lakeshore East Joint Corridor and East Harbour Station)	June 5, 2020
Draft Environmental Conditions Report	September 17, 2020
Final Environmental Conditions Report and Draft Exhibition Station Early Works Report	November 30, 2020
Final Exhibition Station Early Works Report	February 1, 2021
Initial draft of Corktown Station Early Works Report	March 22, 2021
Draft Corktown Station Early Works Report	May 12, 2021
Final Corktown Station Early Works Report	July 15, 2021
Draft Lower Don Bridge and Don Yard Early Works Report	June 22, 2021
Final Lower Don Bridge and Don Yard Early Works Report	August 25, 2021
Initial draft of Lakeshore East Joint Corridor Noise and Vibration Operations Report	July 28, 2021
Draft Lakeshore East Joint Corridor Early Works Report	September 23, 2021
Final Lakeshore East Joint Corridor Early Works Report	November 17, 2021
Draft East Harbour Station Early Works Report	September 23, 2021
Final East Harbour Station Early Works Report	November 17, 2021
Initial draft of Environmental Impact Assessment Report Stage 1 Archaeological Assessment Report and Natural Environment Report	August 18, 2021
Initial draft of Environmental Impact Assessment Report	November 18, 2021
Draft Environmental Impact Assessment Report	February 7, 2022 (shared with this letter)
Final Environmental Impact Assessment Report	April 19, 2022*

*Date is subject to change.

Draft Environmental Impact Assessment Report (EIAR)

The Draft EIAR summarizes the local environmental conditions in the discipline-specific study areas developed for the Project. The local environmental conditions were characterized through a combination of desktop review and field studies by practitioners using industry standard techniques and provincial standards, protocols, and guidelines, where appropriate. The resulting Draft Stage 1 AA and Natural Environment Report was shared with Chippewas of Georgina Island for review in August 2021.

The Draft EIAR also provides an assessment and evaluation of the impacts that the Project might have on the environment. Based on the potential impacts, a description of mitigation measures and monitoring activities is outlined. A list of municipal, provincial, federal, or other permits and approvals that may be required for the Project is also provided.

Discipline-specific assessment and evaluation of impacts were undertaken for the following disciplines:

- Natural Environment
- Soil and Groundwater
- Cultural Heritage
- Archaeological Resources
- Socio-Economic and Land Use
- Air Quality
- Noise and Vibration
- Traffic and Transportation

Effective February 7, 2022, the Draft Environmental Impact Assessment Report will be available for a 30-day public review period. The report is posted on the Ontario Line project webpage, which can be accessed using the following link:

<https://www.metrolinxengage.com/en/content/full-report-draft-environmental-impact-assessment-report>

The Notice of Publication of Draft EIAR can be found in **Attachment 1**.

Potential Impacts and Mitigation Measures

The tables found enclosed in **Attachment 2** provide a summary of natural environment

and archaeology potential impacts and mitigation measures identified as part of the Draft EIAR that may be of interest to Chippewas of Georgina Island. If your Nation has any feedback about these potential impacts and/or mitigation strategies, or any other aspects of the Ontario Line, we welcome the opportunity to discuss further.

Engagement

Metrolinx welcomes any comments or feedback on the EIAR during the 30-day public review period, from February 7 to **March 9, 2022**. Metrolinx is committed to an open and respectful relationship with Chippewas of Georgina Island. We appreciate the significant volume of documents related to the Ontario Line Project that have been shared with Chippewas of Georgina Island. We are happy to assist in the review of these documents by meeting with your Nation.

Metrolinx is willing to address any questions that Chippewas of Georgina Island may have about the Ontario Line Project. If you require additional information or materials or if you wish to discuss the Project in more detail or set up a meeting, please contact Jaimi O'Hara, Manager of Indigenous Relations Office at Metrolinx. She can be reached at

IndigenousRelations@metrolinx.com.

With the exception of personal information, all comments will become part of the public record. Kindly note that any information you provide to Metrolinx, or its delegates, will be subject to the Freedom of Information and Protection of Privacy Act, except where information is provided to Metrolinx in confidence, pursuant to section 15.1, which protects the confidentiality of Indigenous knowledges.

Thank you for your time in reviewing this letter. Yours

Truly,

 Attachment 2 - Draft EIAR Natural Environment and Archaeology Potential Effects, Mitigation Measures and Monitoring

Section 17 of O. Reg. 341/20 requires Metrolinx to establish an issues resolution process to attempt to resolve any concerns raised by the public or Indigenous Nations during the review period. At the end of the review period, Metrolinx will update the Draft Environmental Impact Assessment Report by adding a description of the issues resolution process, what Metrolinx did to address any concerns, and if the Ontario Line implementation timeline will be impacted as a result of addressing concerns. Metrolinx will then publish the Final Environmental Impact Assessment Report on the Ontario Line project webpage: www.metrolinx.com/ontarioline and issue a Notice of Publication of the Final Environmental Impact Assessment Report.

To obtain a copy of the Draft Environmental Impact Assessment Report, please contact the Ontario Line project email listed above.

Notice of Publication of Draft Environmental Impact Assessment Report and Virtual Open Houses Ontario Line Project

The Project

The Ontario Line will bring 15.6 kilometres of new subway service to Toronto, making it faster and easier for people to get where they need to be each day. The line will stretch across the city, from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line will have 15 new stations, including six interchange stations, connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable service.

Environmental Impact Assessment Report

Environmental impacts of the Ontario Line are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*. In accordance with Section 15 of O. Reg. 341/20, Metrolinx has prepared the Draft Environmental Impact Assessment Report that is now available for review.

The Draft Environmental Impact Assessment Report describes existing environmental conditions in the Project study area, environmental impacts, mitigation and monitoring measures, consultation, and required permits and approvals for the Ontario Line.

The Draft Environmental Impact Assessment Report Review and Consultation Process

Effective **February 7, 2022**, the Draft Environmental Impact Assessment Report will be available for review on the Ontario Line project webpage (www.metrolinx.com/ontarioline). You can view and comment on the report from **February 7 to March 9, 2022** via the online form provided.

You can also participate in virtual open houses, where you can hear from project experts and ask questions about the report in real time, at MetrolinxEngage.com/OntarioLine/live on:

- **February 22, 2022 and February 24, 2022** from 6:30 to 8:00 p.m., with a focus on the portion of the project from Science Centre Station to Gerrard Station
- **March 1, 2022 and March 3, 2022** from 6:30 to 8:00 p.m., with a focus on the portion of the project from Gerrard Station to Exhibition Station

Those who wish to provide comments on the Draft Environmental Impact Assessment Report must do so by **March 9, 2022** and submit them using the webpage form or address them to the following email: ontarioline@metrolinx.com.

Section 17 of O. Reg. 341/20 requires Metrolinx to establish an issues resolution process to attempt to resolve any concerns raised by the public or Indigenous Nations during the review period. At the end of the review period, Metrolinx will update the Draft Environmental Impact Assessment Report by adding a description of the issues resolution process, what Metrolinx did to address any concerns, and if the Ontario Line implementation timeline will be impacted as a result of addressing concerns. Metrolinx will then publish the Final Environmental Impact Assessment Report on the Ontario Line project webpage: www.metrolinx.com/ontarioline and issue a Notice of Publication of the Final Environmental Impact Assessment Report.

To obtain a copy of the Draft Environmental Impact Assessment Report, please contact the Ontario Line project email listed above.

Mark Clancy (T: 416-202-5100, E: ontarioline@metrolinx.com) may be contacted on behalf of Metrolinx.

**Metrolinx
130 Adelaide Street West
Toronto, Ontario

Dear Chief Big Canoe,

Please find attached a letter inviting participation in the archaeological monitoring of borehole drilling planned to occur in the Lower Don Bridge area as part of the Ontario Line Project.

The date of this fieldwork is tentatively set for March 7, 2022. If you are interested in participating, please let me know as soon as possible and we will work with you and the project team to coordinate.

If you have any questions or concerns, please feel free to reach out to me at any time.

Thank you for your time and assistance.

Delivered by Email

Dear Chief Big Canoe,

RE: Ontario Line Project - Invitation to Participate in Archaeological Monitoring for Borehole Drilling - Lower Don Bridge Area

Metroinx continues to progress the Archaeological studies for the Ontario Line project and wanted to invite Chippewas of Georgina Island to participate in further Archaeological monitoring for borehole drilling planned for the Lower Don Bridge area.

A Stage 1 Archaeological Assessment (AA) was completed as part of the Ontario Line Environmental Impact Assessment Report (EIAR). This report identified the area for the proposed boreholes as having archaeological potential. Both the Stage 1AA report and the EIAR were shared with Nations, in both August and November 2021.

Metroinx is completing an Environmental Site Assessment in the Lower Don area (please see **Figure 1**). Given the identified archaeological potential of the area, archaeological monitoring will take place for the planned borehole drilling. This approach will provide for the on-site identification of archaeological resources and, if necessary, stop-work order of drilling by a licensed archaeologist in the event potential archaeological resources are encountered. A licensed archaeologist will be on-site during drilling to visually inspect spoil removed during borehole drilling as well as intermittent borehole samples to visually identify the presence of artifacts. Metroinx would value any participation that Chippewas of Georgina Island may wish to have in this monitoring program.

Please see the fieldwork details below:

Start Date: March 7, 2022 (potentially March 8 as well depending on drilling)

Duration: 1 day

Start Time: 8:30am

Consultant Company: Stantec

Contact information: Jeffrey Muir - (289) 208-5298

Assessment: Archaeological monitoring for borehole drilling

Size of Field Crew: 1 field supervisor

Parking and meeting location: See Figure 2. Meet and park at yellow star - along Bayview Ave and Mill St

Required PPE:

- Class 2 PPE (hi-viz vest)
- CSA Type 2 Hard Hat with foam insert (bump caps)
- CSA approved eye protection
- CSA approved 6" laced safety shoes
- CSA Hearing protection, in ear or over ear
- Appropriate clothing for weather conditions

Invitation to Participate in Fieldwork

Metrolinx would value the involvement of Chippewas of Georgina Island in the upcoming archaeological monitoring fieldwork outlined above. Should your Nation wish to participate, please let us know at your earliest convenience. We welcome any requests for a meeting to discuss opportunities to participate or to explore this project in more detail with Chippewas of Georgina Island. Upon receipt of Chippewas of Georgina Island's interest in participating, Metrolinx will work to coordinate your Nation's involvement. Metrolinx is also willing to share fieldnotes and/or a summary of the borehole and geotechnical data in addition to the open invitation to participate directly in the monitoring.

Engagement

Regardless of whether or not your Nation participates in the fieldwork, Metrolinx will inform you of discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will also ensure that future Archaeological Assessment reports are provided to your Nation in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries.

If you require additional information or materials, or if you wish to discuss this project in more detail, please contact, Jaimi O'Hara, Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Thank you for your time and consideration.

Dear Sharday,

Please find attached a letter inviting participation in upcoming archaeological monitoring for borehole drilling that is taking place at various locations to support environmental assessment and geotechnical studies related to the Ontario Line Subway project. The boreholes are being drilled in locations that have known archaeological potential and as such Metrolinx is ensuring that a consultant archaeologist is on-site to monitor. We'd like to extend this invite to your Nation as well. We appreciate that during these uncertain times of COVID-19 this may not be possible or safe for your Nation. We are happy to provide any fieldnotes taken by the consultant archaeologist and/or provide a summary of the data collected if this is at all helpful to you. Please let us know if there is any other way we can support your Nation during this time.

The boreholes are anticipated to be completed over the next several weeks beginning this Friday on **January 22, 2021**. Please let me know if you have interest in participating as soon as possible, and we will work with you and the project team to coordinate.

Dear Ms. James,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. Attached you will find a letter providing an update on the project. The purpose of this letter is to:

- Provide an update on the scope of the project work
- share the initial draft of the Early Works Report for the proposed Corktown Station
- Invite your Nation to participate in upcoming archaeological fieldwork

In an effort to streamline your review, we draw your attention to the attachment which provides an overview of the expected environmental impacts and proposed mitigations, as we know this may be of specific interest to you.

Metrolinx is also preparing a letter specific to works being planned within the Don Valley as we recognize the significance of this waterway to many Nations. We hope to share that letter soon. We are happy to meet with your Nation to discuss the Ontario Line and address any questions or concerns that your Nation may have.

We ask that any comments on the draft Corktown Station Early Works Report be provided no later than **April 15, 2021**. Please note that the Noise and Vibration Report, which will be part of the Early Works Report is still being prepared and we will share with your Nation by March 19, 2021.

The draft Corktown Station Early Works Report is available at the following link:

Please let us know as soon as possible if your Nation has interest in participating in future archaeological fieldwork.

We appreciate the volume of documents that Metrolinx has shared with your Nation.

If you have any questions or concerns, please do not hesitate to contact me.

Miigwetch,

Fallon

Subject: Ontario Line Project - Invitation to Meet & provide input on First Parliament Site
Date: Monday, April 12, 2021 3:52:17 PM
Attachments: [First Parliament_CRFN.pdf](#)

Dear Sharday,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. We recently communicated with your Nation about the proposed Corktown Station which is along the planned alignment of the Ontario Line. This location includes parcels of land which were once the site of Upper Canada's First Parliament buildings. Metrolinx and its partners are exploring opportunities to commemorate the history of this site, and have been engaging with various parties including the City of Toronto and the Mississaugas of the Credit First Nation, on whose treaty territory this project is occurring.

Given the significant chance of recovering Indigenous and European artifacts during the Corktown Station Early Works, a detailed archaeological workplan is being developed. Metrolinx recognizes the importance and value of Indigenous monitors for any archaeology related to the Ontario Line Project. In our previous communication, an invitation was included for your Nation to participate in any archaeological fieldwork and monitoring during the Corktown Station Early Works, including demolition of modern buildings currently on the First Parliament site.

This work is anticipated to commence in Fall 2021, and if you have not yet expressed interest in participating, please feel free to do so at your earliest convenience. As a reminder any comments on the draft Corktown Station Early Works Report should be provided no later than **April 15, 2021**.

Metrolinx recognizes that the history of this location extends beyond European use, and as such, wants to take the opportunity to understand any significance it may have to Indigenous Nations. Metrolinx would like to meet with your Nation to discuss the First Parliament site, its commemoration, as well as review the broader Ontario Line project if you wish. We recognize that traditional knowledge of this area may be sacred and/or not appropriate to be shared, but would appreciate any information that may be appropriate for Metrolinx to consider.

This letter is not intended to replace engagement but to provide a high level summary for your information. We would very much appreciate meeting with your Nation to discuss in more detail. Please let me know if you have any questions or concerns. We appreciate the volume of documents that Metrolinx has shared with your Nation. If you have any questions or concerns, please do not hesitate to contact me.

Miigwetch,

Fallon

Chief Ted Williams
c/o Ms. Sharday James
Chippewas of Rama First Nation
5884 Rama Road, Suite 200
Rama, ON L3V 6H6
Delivered by Email

Dear Ms. James,

RE: Ontario Line Project - First Parliament Site and Lime Kiln Site

Metrolinx, a regional transportation agency, is helping to transform the way the Greater Golden Horseshoe moves by building a fast, convenient and integrated transit network. As part of this work, Metrolinx is continuing the pre-construction planning of the Ontario Line which will bring nearly 16 kilometres of subway service to Toronto.

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Chippewas of Rama First Nation. Metrolinx appreciates and respects Chippewas of Rama First Nation's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to share with Chippewas of Rama First Nation information regarding Corktown Station early works and additional information regarding upcoming field visits and investigations at the Corktown Station early works site, which includes two registered archaeological sites, the First Parliament site and the Lime Kiln site.

Project Description

The proposed Ontario Line is a new 16-kilometer subway line, which will occupy an exclusive right-of-way system encompassing a combination of below-grade, above-grade, and at-grade alignment. The route (Figure 1) will run from Ontario Place/Exhibition through downtown Toronto to the Ontario Science Centre in the City of Toronto, with six (6) potential interchange stations and 17 new connections to GO Transit, existing subways and streetcars. More information on the Project can be found on our website: www.metrolinx.com/ontarioline

Corktown Station Early Works

As communicated in the letter sent to Chippewas of Rama First Nation on March 11, 2021, the Corktown Station site has been identified for launching tunnel excavation equipment for the downtown and Don Yard segments of the proposed Ontario Line alignment, as well as the location of the Corktown Station. The First Parliament and Lime Kiln Sites, located within the Corktown Station area, are known archaeological sites which require additional archaeological study ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures, followed by completion of necessary archaeological studies, is required. Completion of this preparatory work on an expedited basis is essential to allow for the timely delivery of the overall Project and is anticipated to begin in the Fall 2021, subject to the completion of the Corktown Station early works process in accordance with Ontario Regulation 341/20: Ontario Line Project.

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These activities will enable completion of environmental due diligence investigations, including archaeological assessments. These activities will occur on properties within the Corktown Station early works project footprint, as shown in **Figure 1**.

Figure 1: Map of Corktown Station Early Works

Environmental impacts of Corktown Station early works are being assessed in accordance with O. Reg. 341/20. Metrolinx shared the draft Corktown Station Early Works Report and associated discipline reports with Chippewas of Rama First Nation on March 11, 2021 and had requested any comments to be provided by April 9, 2021.

Archaeological Work at the First Parliament Site and Lime Kiln Site

Metrolinx appreciates the significance of archaeology to Chippewas of Rama First Nation. The properties at 265 Front Street East, 271 Front Street East, and 25 Berkeley Street, in the St. Lawrence neighbourhood of the City of Toronto, are collectively host to the First Parliament Site. It is located on the southwest corner of Parliament Street and King Street, between Parliament Street and Berkeley Street. The First Parliament Site is a registered archaeological site (AjGu-41) which may include resources associated with the First and Second Parliament Buildings, the Home District Gaol, and Consumers' Gas company buildings. The surface of the property is currently occupied by automotive businesses, including a car dealership, car wash, and surface parking lot. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and remnants of early Toronto industry may be found at this site.

North of the First Parliament Site is another registered archaeological site (AjGu-64), the Lime Kiln Site, which includes remains from the Toronto Lime Works Company. A variety of structural features, in various states of preservation, have been documented on this site. The location of the Lime Kiln Site and the First Parliament Site are shown in **Figure 2**.

Figure 2: Location of First Parliament Site and Lime Kiln Site Areas

The First Parliament Site and Lime Kiln Site require additional archaeological studies ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures is necessary. Completion of this preparatory work is essential to allow for the timely delivery of the Ontario Line.

Archaeological fieldwork to remove or protect archaeological resources is anticipated to commence in early Fall 2021, and a workplan for these archaeological investigations is under development. As mentioned in the letter sent on March 11, 2021, Chippewas of Rama First Nation is invited to participate in all archaeological fieldwork, and to review and provide comments on forthcoming reports.

Feedback on Commemoration of First Parliament Site

Metrolinx appreciates that the history of the First Parliament site is not one simply of Canadian origin, but rather holds longer history and tradition. Metrolinx also appreciates that the site of the First Parliament of Upper Canada is linked to a history of colonization and harmful practices towards Indigenous Peoples. Given the significance of this site, Metrolinx is engaging with Indigenous Nations, City of Toronto and the broader community to identify opportunities for commemoration. Metrolinx is committed to ensuring that any feedback from Chippewas of Rama First Nation regarding the significance of this site is considered as part of this commemoration. Metrolinx appreciates that traditional or cultural knowledge about this site may be sacred and/or not be appropriate to be shared but welcomes any comments or ideas from Chippewas of Rama First Nation that may be appropriate to commemorate Indigenous Peoples.

Engagement

Metrolinx is committed to an open, respectful, and transparent relationship with Chippewas of Rama First Nation. We would like to meet with Chippewas of Rama First Nation to better understand any significance the First Parliament site may have to your Nation. We are also happy to assist in reviewing the Corktown Station Early Works Report or reviewing the proposed archaeological workplan for this site. If Chippewas of Rama First Nation requires additional information or materials, or you wish to discuss this project in more detail or set up a meeting, please contact Fallon Melander, Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*. Thank you for your time in reviewing these assessments.

Thank you for your time in reviewing this letter.

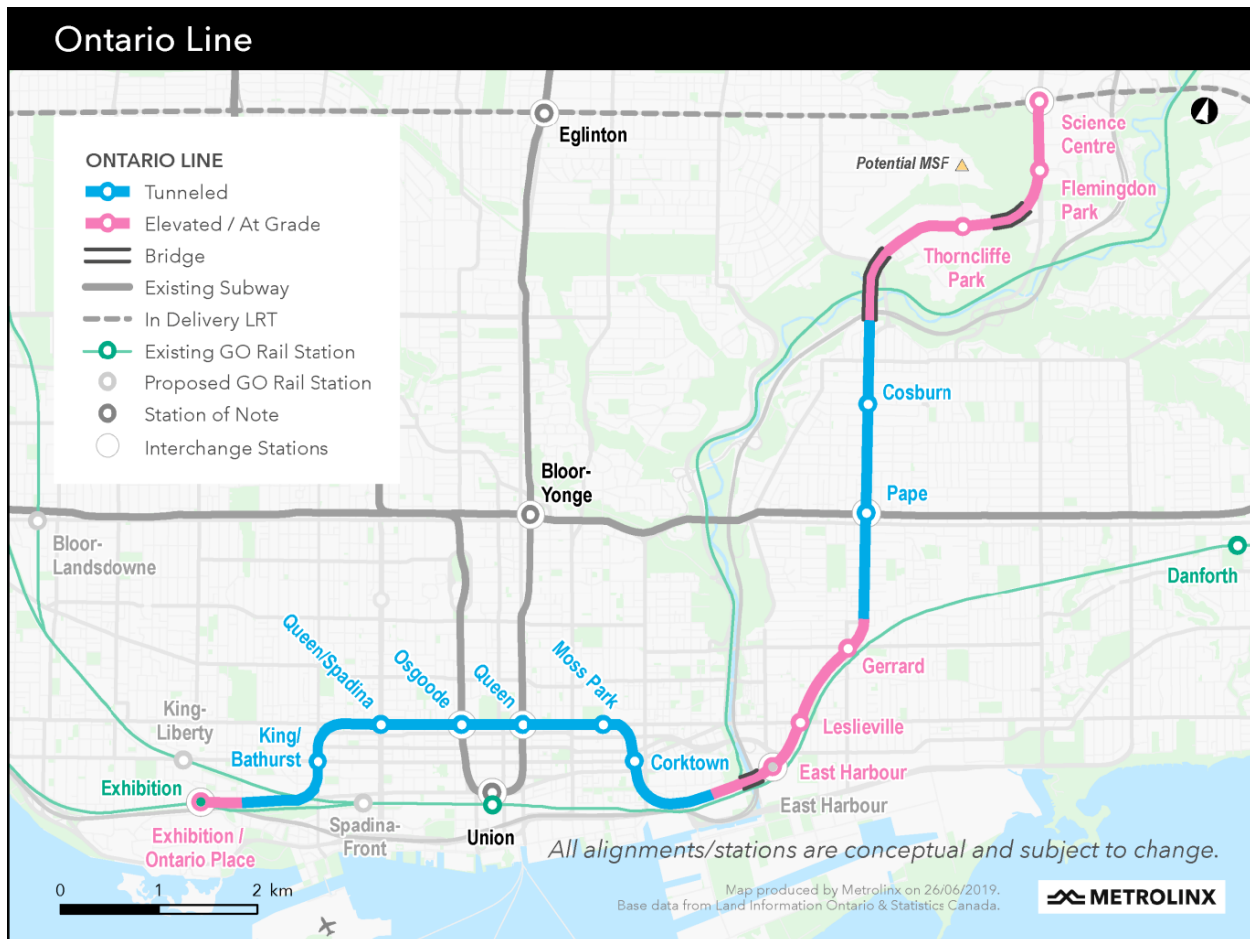

Yours Truly,

A handwritten signature in black ink, appearing to read 'Maria Zintchenko', with a large, sweeping flourish at the end.

Subject: Ontario Line - Project Update - Don Valley and River - Invitation for Participation in Stage 2 Archaeological Fieldwork
Date: Tuesday, May 25, 2021 2:29:07 PM
Attachments: [OL-Don River Letter 2021 CRFN.pdf](#)

Dear Sharday,

Metrolinx continues to progress its environmental studies for the Ontario Line Project. We wanted to keep you aware that part of the project scope falls within the Don Valley and River System, and we recognize the importance of Valley and the waters within. Attached you will find a letter providing an update on the project and information regarding the planned work and environmental assessments that are anticipated to take place within the Don Valley. We also wanted to invite your Nation to participate in the planned Stage 2 Archaeological Assessments that are anticipated to occur as part of the upcoming field season.

My apologies that this letter is being sent after it was shared with other Williams Treaties Nations – this is due to an internal error. This letter is not intended to replace engagement but to provide a high level summary for your information. We would very much appreciate meeting with your Nation to discuss in more detail. Please let me know if you have any questions or concerns.

Miigwetch,

Fallon

Delivered by Email

Dear Ms. James,

RE: Ontario Line Project - Don River Crossings & Stage 2 Archaeological Assessment Update

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Chippewas of Rama First Nation. Metrolinx appreciates and respects Chippewas of Rama First Nation's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to provide more information to Chippewas of Rama First Nation about the Ontario Line crossings of the Don River and its tributaries. Metrolinx appreciates the significance of the waters and wishes to better understand how the potential impacts of construction around the Don River may be of interest to Chippewas of Rama First Nation.

Background

The Project is a new subway line with connections to Line 1 (Yonge-University) subway service at Osgoode and Queen Stations, Line 2 (Bloor-Danforth) subway service at Pape Station, and Line 5 (Eglinton Crosstown) service at the future Science Centre Station. Fifteen stations are proposed, with additional connections to three GO Transit lines (Lakeshore East, Lakeshore West and Stouffville), and the Queen, King, Bathurst, Spadina, Harbourfront and Gerrard/Carlton streetcar routes. The Project will reduce crowding on Line 1 and provide connections to new high-order rapid transit neighbourhoods. More information on the Project can be found on our website: <http://www.metrolinx.com/ontarioline>.

Work in the Don River System

As part of the Ontario Line Project, the following four crossings within the Don River system are proposed:

- Location 1: Lower Don River Crossing (Lower Don Bridge);
- Location 2: Millwood Road Crossing;
- Location 3: Walmsley Brook Crossing; and
- Location 4: West Don River Crossing north of Overlea Boulevard.

Locations 1-4 are shown in **Figure 1** and described in further detail below.

Figure 1: Ontario Line Project - Proposed Don River System Crossings

The environmental assessment for the Ontario Line Project is being completed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20) made under the *Environmental Assessment Act*. Construction of the Lower Don Crossing (Location 1) will be assessed in the Lower Don Bridges and Don Yard Early Works Report, that is anticipated to be shared with Chippewas of Rama First Nation in summer 2021. Construction of the other three crossings (Locations 2-4) will be assessed in the Environmental Impact Assessment Report, that is planned to be shared with Chippewas of Rama First Nation in early 2022.

Location 1: Lower Don River Crossing (Lower Don Bridge)

A new bridge is planned to be built on the north side of the existing Lakeshore East rail bridge at the Lower Don River, with space for Ontario Line tracks going in both directions. We are also planning pedestrian and cycling connections across the Lower Don River.

Location 2: Millwood Road Crossing

The underground section of the Ontario Line running under Pape Avenue will emerge from the southern embankment of the Don Valley on an elevated guideway crossing the Don River, west of the Leaside Bridge (Millwood Road). The elevated guideway will connect to Thorncliffe Park in the north.

Location 3: Walmsley Brook Crossing

An elevated guideway will cross the Walmsley Brook tributary of the West Don River north of Pat Moore Drive. The guideway will then continue east across Beth Nealson Drive.

Location 4: West Don River Crossing (north of Overlea Boulevard)

The elevated guideway will cross the West Don River, north of Overlea Boulevard. This section of the route will connect to Don Mills Road and the future Flemingdon Park Station.

Field Surveys and Studies

As project planning is still in progress, environmental field surveys and studies as well as the timing of this work are being determined. Environmental field surveys and studies that may occur within or near the Don River include Stage 2 archaeological assessment and natural environment surveys (e.g., Species at Risk and tree surveys). Studies, surveys and their timing will be confirmed as project planning progresses. Further details are anticipated to be available in mid-Summer 2021.

Update on Archaeology

Metrolinx is currently planning to undertake Stage 2 Archaeological Assessments (AA) near the Don River starting in Fall 2021. The Stage 2 AA investigations will assess areas of identified archaeological potential within the Ontario Line study area which may be affected by the construction of the Project. Stage 2 AA fieldwork consists of test pit surveys at 5 m intervals within areas of previously identified archaeological potential.

Metrolinx would appreciate any interest Chippewas of Rama First Nation may have in participating in the Stage 2 AA fieldwork. Some of the Stage 2 AA may occur on lands

within the Toronto and Region Conservation Authority's (TRCA) property boundaries and regulated area. Metrolinx will coordinate with TRCA to ensure that Indigenous Nations are provided the opportunity to participate in Stage 2 AA investigations. Upon receipt of Chippewas of Rama First Nation's interest in participating, Metrolinx will work to coordinate your Nation's involvement.

As Metrolinx continues to undertake environmental due diligence for this project, additional archaeological assessment reports are anticipated to be completed. Metrolinx will ensure that Chippewas of Rama First Nation will be made aware of and engaged regarding any future archaeological assessments, and especially the discovery and preservation of Indigenous artifacts. Metrolinx will also ensure that future archaeological assessments are provided to Chippewas of Rama First Nation in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries

Invitation for Input

We are committed to an open, respectful, and transparent engagement with Chippewas of Rama First Nation. We recognize the potential significance of this project to Chippewas of Rama First Nation and wanted to keep you apprised of this project. We welcome meeting in the near future to discuss this project and its possible impacts and ways to appropriately engage with Chippewas of Rama First Nation.

We are happy to address any questions that Chippewas of Rama First Nation may have about the work proposed in the Don River system or the Ontario Line Project as a whole. If you require additional information or materials, or if you wish to discuss this Project in more detail or set up an in-person meeting, please contact Fallon Melander, Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Metrolinx thanks you for the time in reviewing this letter. Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*.

Yours Truly,

A handwritten signature in blue ink, appearing to read 'James Francis'.

Subject: RE: Ontario Line Project – Archaeological Monitoring for Borehole Drilling - 265 Front St East - CRFN

Dear Ms. James,

Please find attached a letter inviting participation in upcoming archaeological monitoring for borehole drilling that is taking place next week at 256 Front Street in Toronto to support environmental assessment and geotechnical studies related to the Ontario Line Subway project. The boreholes are being drilled in locations that have known archaeological potential and as such Metrolinx is ensuring that a consultant archaeologist is on-site to monitor. If you are not able to attend, we are happy to provide any fieldnotes taken by the consultant archaeologist and/or provide a summary of the data collected if this is at all helpful to you.

The boreholes are anticipated to be completed between July 12 and July 16, 2021. Please let me know as soon as possible if you have interest in participating, and we will work with you and the project team to coordinate. And just a final note for your information, both Fallon Melander and Jaimi O'Hara, who are usually Metrolinx's main point of contact with your Nation, are away from the office this week. Hence you are receiving this communication from me.

Miigwetch,

Make today great,

Christine Parris (she, her, hers)

Community Relations Specialist, Indigenous Relations Office

Dear Ms. James,

RE: Ontario Line Project - Archaeological Monitoring for Borehole Drilling - 265 Front St East

Metrolinx and its consultants, Stantec and Wood, will be undertaking geotechnical and environmental site assessment investigations at 265 Front St East. As part of this work boreholes will be drilled at the property. These boreholes will be located on/near potential archaeological sites and an archaeologist will be on site to monitor the drilling activities. We are writing to invite Chippewas of Rama First Nation to participate in the archaeological monitoring associated with this work. If preferable, Metrolinx is happy to share any fieldnotes taken by the consultant archaeologist as well as a summary of the borehole and geotechnical study data for review.

The fieldwork is anticipated to be conducted between July 12th and July 16th, 2021. Fieldwork dates may change based on field progress and weather.

Invitation to Participate in Fieldwork

Metrolinx would appreciate any interest Chippewas of Rama First Nation may have in participating in the archaeological monitoring fieldwork. The attached maps illustrate the location of the boreholes that will be drilled. Upon receipt of Huron-Wendat Nation interest in participating, Metrolinx will work to coordinate your Nation's involvement.

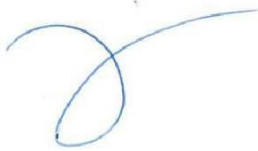

Engagement

Regardless of whether or not your Nation participates in the fieldwork, Metrolinx will inform you of discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will also ensure that future Archaeological Assessment reports are provided to your community in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries.

If your Nation wishes to participate in the fieldwork, or if you'd prefer to receive fieldnotes and/or a summary of the borehole and geotechnical data, please let us know at your earliest convenience. If you require additional information or materials, or if you wish to discuss this project in more detail or set up an in-person meeting, please contact, Indigenous Relations at Metrolinx. We can be contacted at IndigenousRelations@metrolinx.com.

Thank you for your time and consideration.

Yours Truly,

Dear Sharday,

Metrolinx is working with its consultant HDR to provide opportunities for participation in upcoming Archaeological Assessment and Natural Environment fieldwork associated with the Ontario Line. Please find attached a letter inviting your Nation to participate.

The fieldwork is anticipated to late August - early September 2021. Please let me know if you have interest in participating as soon as possible, and we will work with you, the project team and HDR to coordinate.

If you have any questions or concerns, please feel free to contact the Indigenous Relations Office at anytime.

Thank you,

Dear Ms. James,

RE: Ontario Line Project - Update on Archaeological Assessments and Natural Environment Surveys

Metrolinx and its consultant, Stantec and HDR, will be undertaking Archaeological Assessment and Natural Environment fieldwork associated with the Ontario Line Project. We appreciate Chippewas of Rama First Nation's interest in participating in these studies. The following letter provides details about the anticipated surveys to support the planning and coordination of involvement by your Nation.

Invitation to Participate in Fieldwork

Metrolinx would appreciate any interest Chippewas of Rama First Nation may have in participating in the archaeological fieldwork. Upon receipt of Chippewas of Rama First Nation interest in participating, Metrolinx will work to coordinate your Nation's involvement.

Update on Archaeology

Metrolinx is planning to undertake various Archaeological Assessments for the Ontario Line Project. This archaeological investigation will assess areas of identified archaeological potential, which may be potentially affected by the construction of the Project. The archaeological works are planned to begin in **September 2021**. Fieldwork dates may change based on field progress and weather.

Metrolinx would appreciate any interest Chippewas of Rama First Nation may have in participating in the archaeological fieldwork. Upon receipt of Chippewas of Rama First Nation interest in participating, Metrolinx will work to coordinate your Nation's involvement.

As Metrolinx continues to undertake environmental studies for this project, additional archaeological assessment reports are anticipated to be completed. Metrolinx

acknowledges that Chippewas of Rama First Nation will be made aware of and engaged regarding any future archaeological assessments, and especially the discovery and preservation of Indigenous artifacts and sacred burial grounds. Regardless of whether or not your Nation participates in the fieldwork, Metrolinx will inform you of discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will also ensure that future Archaeological Assessment reports are provided to Chippewas of Rama First Nation in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries.

Natural Environment Field Surveys

Metrolinx is conducting natural environmental studies to review and document existing conditions within the Study Area and to carry out impact assessment reporting. Most of the natural environment fieldwork for Ontario Line is planned to occur in 2022.

However, the surveys detailed in the table below are planned for this year and include butternut survey, tree inventory and aquatic habitat assessment. Please note that these are approximate dates and may be subject to change pending appropriate weather conditions and field survey requirements. Metrolinx will endeavour to keep Chippewas of Rama First Nation apprised as the work unfolds.

Survey	Date(s)
Butternut Health Assessments (Areas detailed in Figures 1 and 2)	• August, September/2021
Tree Inventory (Areas detailed in Figures 1 and 2)	• September/2021
Aquatic Habitat assessment (Don and West Don ravine areas)	• September/2021

Engagement

If your Nation requires additional information or materials, or if you wish to discuss this project in more detail or set up an in-person meeting, please contact Jaimi O'Hara, Acting Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*.

Dear Ms. James,

RE: Ontario Line Project - Lower Don Bridge Marine Archaeological Overview Assessment for Review

Metrolinx wishes to build a strong and respectful relationship with Chippewas of Rama First Nation. Metrolinx appreciates and respects Chippewas of Rama First Nation's desire to be appropriately informed and aware of projects. Metrolinx wishes to share with you the development of the Marine Archaeological Overview Assessment (MAOA) report for the proposed construction of the Lower Don Valley Bridge over the Don River. This proposed bridge is a component of the Ontario Line Project as part of the Lower Don Bridge and Don Yard Early Works. We invite Chippewas of Rama First Nation's feedback on the marine Archeological Overview Assessment prepared for the Ontario Line Project.

Project Description

The Ontario Line will bring 15.6 kilometres of subway service to Toronto. The Ontario Line will stretch from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line will have 15 new stations, including six interchange stations, connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable service.

Lower Don Bridge and Don Yard Early Works

The Lower Don Bridge and Don Yard early works are planned for where the Ontario Line will run alongside GO train operations. These early works will set the groundwork for other major construction on the Ontario Line project and include:

- building a new bridge north of the existing rail bridge over the Lower Don River that will carry the Ontario Line tracks;
- shifting GO tracks in the Don Yard and nearby rail corridor to accommodate Ontario Line infrastructure;
- modifying the existing rail bridge to accommodate GO track shifts and Ontario Line infrastructure; and
- relocating and protecting utilities and signal infrastructure in the area.

10 Bay Street
Toronto, ON M5J 2N8

The location of the Lower Don Bridge and Don Yard early works project footprint and study area can be viewed in **Figure 1** below.

Figure 1: Map of Lower Don Bridge and Don Yard Early Works

Marine Archaeological Overview Assessment

On behalf of Metrolinx, Stantec has undertaken a Marine Archaeological Overview Assessment for the proposed Lower Don Bridge. The purpose of the Marine Archaeological Overview Assessment is to determine the marine archaeological potential of the study area for the bridge shown in **Figure 2** below.

The proposed bridge will cross over the Don River on the north side of the existing GO Transit Lakeshore East rail bridge. As a result, a large portion of the study area overlaps with the Don River. While the bridge will have no permanent in-water components, Metrolinx anticipates that in-water construction activities may impact potential submerged cultural resources. The marine archaeological potential of the study area is being considered as part of the Marine Archeological Overview Assessment.

The assessment determined that despite the study area for the Lower Don Valley Arch Bridge Superstructure having indicators of marine archaeological potential, there has been extensive river-bed disturbance to date. The riverbed has been previously disturbed by engineered

channeling, modern dredging, and modern construction. The assessment determined that the study area retains low to no potential for the identification and documentation of in situ Indigenous and Euro-Canadian marine archaeological resources. As a result no further marine archaeological work is required for the study area.

A copy of the marine Archeological Overview Assessment has been included in the Dropbox link for your review. Please provide any comments you may have by **November 19, 2021**.

Invitation for Input

We are committed to an open, respectful, and transparent engagement with Chippewas of Rama First Nation. Metrolinx values any input that Chippewas of Rama First Nation is willing to provide on the Marine Archaeological Overview Assessment report.

We are happy to meet with your Chippewas of Rama First Nation to go over the project and development of the Marine Archaeological Overview Assessment report and answer any questions Chippewas of Rama First Nation may have on the report or the project as a whole.

If you require additional information or materials, or if you wish to discuss this project in more detail or set up a meeting, please contact Jaimi O'Hara, Acting Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Please submit your feedback in writing by **November 19, 2021**.

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*, except where information is provided to Metrolinx in confidence, pursuant to section 15.1.

Dear Ms. James,

**RE: Ontario Line Project - Stage 2 Archaeological Assessment - Moss Park and Ordnance Park
Invitation to Participate in Archaeological Fieldwork**

Metrolinx and its consultant, Stantec continue to progress the archaeological studies for the Ontario Line project and wanted to invite Chippewas of Rama First Nation to participate in Stage 2 Archaeological Assessments planned to occur at Moss Park and Ordnance Park in the upcoming weeks. The locations of Moss Park and Ordnance Park study areas can be viewed in **Figure 1 and 2** below.

Moss Park and Ordnance Park have been previously assessed in a desktop study, the *Ontario Line Stage 1 Archaeological Assessment Report - South* which was shared with Chippewas of Rama First Nation in March 2020 and was subject to an Addendum shared with Chippewas of Rama First Nation in February 2021. The Stage 1 report recommended that a Stage 2 archaeological assessment is required for Moss Park and Ordnance Park parcels.

The Stage 2 archaeological field work will be conducted by test pit survey, in accordance with the Ministry of Heritage, Sport, Tourism and Culture Industries' (MHSTCI) 2011 *Standards and Guidelines for Consultant Archaeologists*. The Stage 2 test pit survey method consists of hand excavating test pits by shovel at a five-metre interval on the park lands. The test pits are at least 30 centimetres in diameter and dug through the topsoil (which has a variable depth generally between 15 and 25 centimetres, but may be deeper or shallower) and at least five centimetres into subsoil. Once complete, test pits will be backfilled. Areas disturbed by utility infrastructure or recent construction will not be surveyed but will be photo documented. Based upon the Stage 2 field work, subsequent archaeological investigations may be recommended depending on what is found during the Stage 2 test pit survey.

Please see the fieldwork details below:

MOSS PARK:

Start Date: Tentatively October 25, 2021. If the start date changes, we will reach out to you.

Duration: Approximately two to three days

Start Time: 8am

Consultant Company: Stantec

Contact information: Jeffrey Muir - (289) 208-5298; Heather Kerr - (416) 602-3271; Patrick Hoskins - (613) 716-4687

Assessment: Stage 2 Archaeological Assessment

Meeting Location Address: 150 Sherbourne St

Size of Field Crew: 2 (1 Field director, 1 field tech)

Parking location: Above-ground parking lot at the southwest corner of Jarvis Street and Queen Street East; approximate three minute walk

ORDNANCE PARK

Start Date: Work on Ordnance Park will begin after the Moss Park work is completed

Duration: Approximately two weeks

Start Time: 8am

Consultant Company: Stantec

Contact information: Jeffrey Muir - (289) 208-5298; Heather Kerr - (416) 602-3271; Patrick Hoskins - (613) 716-4687

Assessment: Stage 2 Archaeological Assessment

Size of Field Crew: 4 (1 Field director, 3 field techs)

Required PPE:

Item	Specifications
Clothing and Attire	Loose clothing, long hair, dangling accessories, jewelry, or other similar items that are likely to be a hazard will not be worn unless they are tied, covered, or otherwise secured so they prevent the hazard.
Foot Protection	Canadian Standards Association (CSA) approved work boots (Steel-toed boots, minimum 6" from top of sole, grade 1 with sole protection [CSA Standard Z195-09]).
Hand Protection	Cut, puncture, and abrasion-resistant gloves shall be worn when conducting archaeological hand digging and screening activities.
Eye and Face Protection	CSA approved safety glasses with rigid side shields. Regular prescription glasses are not permitted unless they are designed as CSA safety glasses complete with rigid shields. An ASTM level 1 (or higher) face covering is mandatory.
Head Protection	CSA approved Type II, Class E (side impact) hard hat. Hard hats shall be worn with the brim pointed forward.
Hearing Protection	Not needed.
High Visibility Safety Apparel	Mandatory class 2, level 2 High Visibility Safety Apparel (HVSA). Full length sleeves and pants with reflective stripes on both arms and legs are required.
*Although not considered PPE, face coverings for COVID-19 shall be worn when applicable	

Invitation to Participate in Fieldwork

Metrolinx would appreciate any interest Chippewas of Rama First Nation may have in participating in the archaeological monitoring fieldwork. Upon receipt of Chippewas of Rama First Nation's interest in participating, Metrolinx will work to coordinate Chippewas of Rama First Nation's involvement.

Engagement

Regardless of whether or not Chippewas of Rama First Nation participates in the fieldwork, Metrolinx will inform you of discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will also ensure that future Archaeological Assessment reports are provided to your community in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries.

If Chippewas of Rama First Nation wishes to participate in the fieldwork, or if you'd prefer to receive fieldnotes and/or a summary of the borehole and geotechnical data, please let us know at your earliest convenience. If you require additional information or materials, or if you wish to discuss this project in more detail or set up an in-person meeting, please contact, Indigenous Relations at Metrolinx. We can be contacted at IndigenousRelations@metrolinx.com.

Thank you for your time and consideration.

Yours Truly,

Aaniin Everyone,

Thank you for contacting the Chippewas of Rama First Nation. If you are contacting us to initiate the consultation process please visit <https://www.ramafirstnation.ca/rama-research-ethics-and-community-consultation/>. At this link you will find the Chippewas of Rama First Nation's Consultation Protocol and a link to the "Notice of Request to Consult" form which will initiate your consultation process with us. This form must be completed for all new projects. Please ensure you are familiar with the protocol and are aware of any fees that may be applicable to you.

The Chippewas of Rama First Nation has implemented this protocol as a means to address capacity concerns related to the overwhelming number of consultation requests received by the First Nation. Further, it is intended to allow the First Nation to engage more fully through *meaningful* and *informed* consultation, which is the constitutional right of First Nations in Canada. We expect that these efforts will assist both you, as the proponent, and the First Nation in addressing consultation concerns in a timely and efficient manner.

Should you have any concerns with the content of the form, please contact Sharday James, Community Consultation Worker for Rama First Nation at shardayj@ramafirstnation.ca. Otherwise, we look forward to receiving your request to consult and associated documentation and working with you following our review of your request.

Sincerely,

Samantha Craig-Curnow
Associate General Counsel, Legal

Subject: Ontario Line - Species at Risk 17(2)(d) Permit Under Endangered Species Act

Dear Sharday,

Please find enclosed, a letter providing an overview of the Metrolinx application for a permit under the Endangered Species Act to support the Ontario Line Project. We have also attached two appendices for your review.

We value building a relationship with your Nation which we recognize requires transparency and meaningful engagement. Please let me know if you have any further questions or would like to meet to discuss this permit, the Ontario Line Project or any other Metrolinx projects.

Thank you,

Jaimi O'Hara

Chief Ted Williams
c/o Ms. Sharday James
Chippewas of Rama First Nation
5884 Rama Road, Suite 200
Rama, ON L3V 6H6
Delivered by Email

Dear Ms. James,

**RE: Ontario Line Project - Species at Risk 17(2)(d) Permit Amendment Under the
*Endangered Species Act***

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with Chippewas of Rama First Nation. Metrolinx appreciates and respects Chippewas of Rama First Nation's desire to be appropriately informed and aware of projects. To that end, Metrolinx is sharing with Chippewas of Rama First Nation information regarding the Species at Risk (SAR) 17 (2) (d) Permit under *the Endangered Species Act* (ESA, 2007) obtained in support of the Ontario Line Project, and the proposed amendment to this permit.

Project Description

Metrolinx, a regional transportation agency, is helping transform the way the Greater Golden Horseshoe region moves by building a fast, convenient, and integrated transit network. As part of this work, Metrolinx is proceeding with the Ontario Line Project which will bring 15.6 kilometres of subway service to Toronto.

Ontario Line Permit #CR-D-002-19

Metrolinx, as part of the Ontario Line Project, previously received approval for a 17(2)(d) permit (Permit #CR-D-002-19) under the *Endangered Species Act* (ESA, 2007) issued by the Ministry of the Environment, Conservation, and Parks (MECP) on August 10, 2020. The permit provides approval for those project activities that may have adverse impacts on identified Species at Risk (SAR) and/or their habitat. The permit allows for those activities to take place and provides direction to Metrolinx regarding mitigation measures and compensation requirements that would be necessary to support those impacted species to support no net loss.

To inform this permit, Metrolinx completed SAR screening through the Ontario Line Environmental Conditions Report and Natural Environment Report using various information sources. While the results of this screening were shared within the initial draft of the Environmental Conditions Report circulated to Chippewas of Rama First Nation on June 15 2020, Draft Environmental Conditions Report circulated on September 17 2020 and Final Environmental Conditions Report circulated on November 30 2020, we regret that we did not engage with Chippewas of Rama First Nation directly on the screening process or the findings.

Potentially Impacted Species and Summary of Permit Conditions and Requirements

Based on the SAR screening completed to date, some activities required to support the Ontario Line Project may result in the following species at risk being impacted:

- Bank Swallow - Threatened
- Barn Swallow - Threatened
- Blanding's Turtle - Threatened
- Butternut - Endangered
- Chimney Swift - Threatened
- Little Brown Myotis - Endangered
- Northern Myotis - Endangered
- Small-footed Myotis - Endangered
- Tri-colored Bat - Endangered

Activities that may result in impacts to species listed above are associated with project construction and include activities such as removal or alteration of SAR habitat features (e.g., structures that may support SAR bird nesting, and trees).

Prior to commencing any activities that may impact SAR and/or SAR habitat, Metrolinx will complete species-specific screening for areas where project activities are planned to take place, and, if necessary (if screening determines that SAR/SAR habitat is likely to be present), surveys to detect SAR and SAR habitat presence and conduct an impact assessment if presence is confirmed, to characterize species-specific impacts (e.g., amount of habitat removed).

Metrolinx will meet the ESA permit conditions such as implementing species-specific mitigation measures, monitoring their effectiveness, and taking corrective action as required. Species-specific mitigation measures include scheduling activities to take place outside of species-specific timing windows (e.g., outside of active season or breeding window), implementing exclusion measures to prevent individuals of certain species from being impacted by project activities, and others.

If project activities result in SAR habitat removal, Metrolinx will implement species-specific compensation measures such as creating habitat (e.g., nesting habitat features replacing habitat features removed). Compensation habitat will be regularly monitored, and appropriate corrective actions will be taken as required to ensure habitat functions as intended.

Proposed Permit Amendment

Metrolinx is proposing an amendment to the previously approved SAR 17(2)(d) Permit (Permit #CR-D-002-19) under the *Endangered Species Act* (ESA, 2007), approved on August 10, 2020. The purpose of this permit amendment is to seek approval for additional study area not included in the current Permit #CR-D-002-19, as shown in **Appendix 1**. There are no changes to the permit conditions, including species-specific mitigation measures and compensation requirements, and no additional species are being added at this time. The SAR screening developed in support of the current permit has been updated to provide occurrence probability of SAR that may be present in the areas Metrolinx is seeking to include in the permit as part of the proposed amendment, and is included as **Appendix 2**.

Permit Amendment Process - Next Steps

The Proposal for the 17(2)(d) Permit Amendment is anticipated to be available on the Environmental Registry of Ontario (ERO) for a 30-day public review period this Fall 2021, and Metrolinx will notify Chippewas of Rama First Nation when the ERO posting is available. While not specifically required under the Environmental Bill of Rights, the Ministry of the Environment, Conservation and Parks (MECP) voluntarily posts all ESA permit proposals for public review to ensure transparency and inclusion.

Metrolinx is seeking Chippewas of Rama First Nation's comments, questions, or requests for additional information upon review of the material presented in this letter at any time in advance of the public ERO posting. Questions or comments can also be submitted directly to MECP through the ERO posting during the 30-day public review period.

Following the 30-day public review period, the proposed permit amendment will be submitted to the Minister for review and consideration. The amendment may only be issued if the Minister is of the opinion that the legal requirements set out in clause 17(2)(d) of the *Endangered Species Act* (ESA, 2007) have been satisfied. Should the amendment be issued, Metrolinx will be obligated to adhere to the requirements and standards as stipulated under the permit.

Chippewas of Rama First Nation will be kept apprised should any new SAR be identified within the project area as project planning progresses. In such cases we will endeavor to engage Chippewas of Rama First Nation prior to seeking any necessary permit amendments.

Metrolinx is committed to building a long-term relationship with Chippewas of Rama First Nation, and we recognize that this requires transparency. We appreciate that we have much work to do in this regard and we hope to move forward in a positive way. The original SAR permit was obtained as part of the normal course of Metrolinx business, which had yet to be identified by the Indigenous Relations Office as necessitating engagement and information sharing with Indigenous Nations.

The Indigenous Relations Office has begun guiding the organization and identifying opportunities to flag such actions in advance, so that we can more meaningfully engage with Indigenous Nations as we move forward. We appreciate your patience as Metrolinx continues to learn more about Indigenous Nations and with the help of the Indigenous Relations Office, becomes aware of additional opportunities for engagement with Indigenous Nations.

We appreciate that previous engagement activities may not have met the needs of Chippewas of Rama First Nation, and the volume of materials may have resulted in Chippewas of Rama First Nation not having been made adequately aware of the possible identified impacts to several Species at Risk under this permit. Metrolinx remains committed to meaningful engagement; we are committed to identifying and prioritizing the sharing of the most relevant and appropriate information with Chippewas of Rama First Nation.

If Chippewas of Rama First Nation requires additional information or materials, or you wish to discuss this project in more detail, please reach out to Jaimi O'Hara in the Indigenous Relations Office at Metrolinx and she would be pleased to facilitate a meeting. She can be contacted at IndigenousRelations@metrolinx.com.

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*, except where information is provided to Metrolinx in confidence, pursuant to section 15.1.

Thank you for your time in reviewing this letter.

Yours Truly,

Maria Zintchenko

Hello Sharday,

We noticed that the Noise and Vibration Operations Report, was not outlined in the previous letter which provided an overview of the Draft Environmental Impact and Assessment Report for the Ontario Line Project. We apologize for this omission and note that the report has now been added to the Dropbox shared below. We apologize that this report was overlooked earlier, and is not referenced directly in the letter. If you have any questions, please don't hesitate to reach out.

Best,

Marilyn Stoye *(she/her)*

Subject: Ontario Line - Draft Environmental Impact and Assessment Report for Review

Dear Sharday,

Please find attached, a letter outlining the Draft Environmental Impact and Assessment Report (EIAR) for the Ontario Line. The report is available for review at the following link:

Any comments you may have regarding this report received by **December 6, 2021**, will be incorporated in the Draft EIAR planned to be released in January 2022. Feedback received after December 6, will be reflected in the Final EIAR, planned for release in March 2022.

If you have any questions or concerns, please feel free to reach out to me at any time.

Thank you for your time and assistance.

Dear Sharday,

As a follow up to the letter sent on November 3, 2021 regarding the Ontario Line Project Species at Risk 17(2)(d) Permit Amendment Under the *Endangered Species Act*, the Proposal for the 17(2)(d) Permit Amendment was posted on the Environmental Registry of Ontario (ERO) on December 3rd, 2021 for a 30-day public review period, ending January 2nd, 2022.

The ERO posting can be found in the following link:
<https://ero.ontario.ca/notice/019-4601> Comments can be submitted directly to the Ministry of the Environment, Conservation and Parks.

If you have any questions or concerns, please feel free to reach out to me at any time. Additionally, we are happy to arrange a meeting to discuss the Permit, if that would be of interest.

Thank you for your time and assistance.

Subject: Ontario Line - Archaeological monitoring for Borehole Drilling
Attachments: OL Archaeological Monitoring Invitation for Participation in monitoring for Boreholes_CRFN.pdf

Dear Sharday,

Please find attached a letter inviting participation in upcoming archaeological monitoring for borehole drilling that is taking place at various locations to support environmental assessment and geotechnical studies related to the Ontario Line Subway project. The boreholes are being drilled in locations that have known archaeological potential and as such Metrolinx is ensuring that a consultant archaeologist is on-site to monitor. We'd like to extend this invite to your Nation as well. We appreciate that during these uncertain times of COVID-19 this may not be possible or safe for your Nation. We are happy to provide any fieldnotes taken by the consultant archaeologist and/or provide a summary of the data collected if this is at all helpful to you. Please let us know if there is any other way we can support your Nation during this time.

The boreholes are anticipated to be completed over the next several weeks beginning this Friday on **January 22, 2021**. Please let me know if you have interest in participating as soon as possible, and we will work with you and the project team to coordinate.

Dear Ms. James,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. Attached you will find a letter providing an update on the project. The purpose of this letter is to:

- Provide an update on the scope of the project work
- share the initial draft of the Early Works Report for the proposed Corktown Station
- Invite your Nation to participate in upcoming archaeological fieldwork

In an effort to streamline your review, we draw your attention to the attachment which provides an overview of the expected environmental impacts and proposed mitigations, as we know this may be of specific interest to you.

Metrolinx is also preparing a letter specific to works being planned within the Don Valley as we recognize the significance of this waterway to many Nations. We hope to share that letter soon. We are happy to meet with your Nation to discuss the Ontario Line and address any questions or concerns that your Nation may have.

We ask that any comments on the draft Corktown Station Early Works Report be provided no later than **April 15, 2021**. Please note that the Noise and Vibration Report, which will be part of the Early Works Report is still being prepared and we will share with your Nation by March 19, 2021.

The draft Corktown Station Early Works Report is available at the following link:

Please let us know as soon as possible if your Nation has interest in participating in future archaeological fieldwork.

We appreciate the volume of documents that Metrolinx has shared with your Nation.

If you have any questions or concerns, please do not hesitate to contact me.

Miigwetch,

Fallon

Subject: Ontario Line Project - Invitation to Meet & provide input on First Parliament Site
Date: Monday, April 12, 2021 3:52:17 PM
Attachments: [First Parliament_CRFN.pdf](#)

Dear Sharday,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. We recently communicated with your Nation about the proposed Corktown Station which is along the planned alignment of the Ontario Line. This location includes parcels of land which were once the site of Upper Canada's First Parliament buildings. Metrolinx and its partners are exploring opportunities to commemorate the history of this site, and have been engaging with various parties including the City of Toronto and the Mississaugas of the Credit First Nation, on whose treaty territory this project is occurring.

Given the significant chance of recovering Indigenous and European artifacts during the Corktown Station Early Works, a detailed archaeological workplan is being developed. Metrolinx recognizes the importance and value of Indigenous monitors for any archaeology related to the Ontario Line Project. In our previous communication, an invitation was included for your Nation to participate in any archaeological fieldwork and monitoring during the Corktown Station Early Works, including demolition of modern buildings currently on the First Parliament site.

This work is anticipated to commence in Fall 2021, and if you have not yet expressed interest in participating, please feel free to do so at your earliest convenience. As a reminder any comments on the draft Corktown Station Early Works Report should be provided no later than **April 15, 2021**.

Metrolinx recognizes that the history of this location extends beyond European use, and as such, wants to take the opportunity to understand any significance it may have to Indigenous Nations. Metrolinx would like to meet with your Nation to discuss the First Parliament site, its commemoration, as well as review the broader Ontario Line project if you wish. We recognize that traditional knowledge of this area may be sacred and/or not appropriate to be shared, but would appreciate any information that may be appropriate for Metrolinx to consider.

This letter is not intended to replace engagement but to provide a high level summary for your information. We would very much appreciate meeting with your Nation to discuss in more detail. Please let me know if you have any questions or concerns. We appreciate the volume of documents that Metrolinx has shared with your Nation. If you have any questions or concerns, please do not hesitate to contact me.

Miigwetch,

Fallon

April 12, 2021

Chief Ted Williams
c/o Ms. Sharday James
Chippewas of Rama First Nation
5884 Rama Road, Suite 200
Rama, ON L3V 6H6
Delivered by Email

Dear Ms. James,

RE: Ontario Line Project - First Parliament Site and Lime Kiln Site

Metrolinx, a regional transportation agency, is helping to transform the way the Greater Golden Horseshoe moves by building a fast, convenient and integrated transit network. As part of this work, Metrolinx is continuing the pre-construction planning of the Ontario Line which will bring nearly 16 kilometres of subway service to Toronto.

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Chippewas of Rama First Nation. Metrolinx appreciates and respects Chippewas of Rama First Nation's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to share with Chippewas of Rama First Nation information regarding Corktown Station early works and additional information regarding upcoming field visits and investigations at the Corktown Station early works site, which includes two registered archaeological sites, the First Parliament site and the Lime Kiln site.

Project Description

The proposed Ontario Line is a new 16-kilometer subway line, which will occupy an exclusive right-of-way system encompassing a combination of below-grade, above-grade, and at-grade alignment. The route (Figure 1) will run from Ontario Place/Exhibition through downtown Toronto to the Ontario Science Centre in the City of Toronto, with six (6) potential interchange stations and 17 new connections to GO Transit, existing subways and streetcars. More information on the Project can be found on our website: www.metrolinx.com/ontarioline

Corktown Station Early Works

As communicated in the letter sent to Chippewas of Rama First Nation on March 11, 2021, the Corktown Station site has been identified for launching tunnel excavation equipment for the downtown and Don Yard segments of the proposed Ontario Line alignment, as well as the location of the Corktown Station. The First Parliament and Lime Kiln Sites, located within the Corktown Station area, are known archaeological sites which require additional archaeological study ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures, followed by completion of necessary archaeological studies, is required. Completion of this preparatory work on an expedited basis is essential to allow for the timely delivery of the overall Project and is anticipated to begin in the Fall 2021, subject to the completion of the Corktown Station early works process in accordance with Ontario Regulation 341/20: Ontario Line Project.

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These activities will enable completion of environmental due diligence investigations, including archaeological assessments. These activities will occur on properties within the Corktown Station early works project footprint, as shown in **Figure 1**.

Figure 1: Map of Corktown Station Early Works

Environmental impacts of Corktown Station early works are being assessed in accordance with O. Reg. 341/20. Metrolinx shared the draft Corktown Station Early Works Report and associated discipline reports with Chippewas of Rama First Nation on March 11, 2021 and had requested any comments to be provided by April 9, 2021.

Archaeological Work at the First Parliament Site and Lime Kiln Site

Metrolinx appreciates the significance of archaeology to Chippewas of Rama First Nation. The properties at 265 Front Street East, 271 Front Street East, and 25 Berkeley Street, in the St. Lawrence neighbourhood of the City of Toronto, are collectively host to the First Parliament Site. It is located on the southwest corner of Parliament Street and King Street, between Parliament Street and Berkeley Street. The First Parliament Site is a registered archaeological site (AjGu-41) which may include resources associated with the First and Second Parliament Buildings, the Home District Gaol, and Consumers' Gas company buildings. The surface of the property is currently occupied by automotive businesses, including a car dealership, car wash, and surface parking lot. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and remnants of early Toronto industry may be found at this site.

North of the First Parliament Site is another registered archaeological site (AjGu-64), the Lime Kiln Site, which includes remains from the Toronto Lime Works Company. A variety of structural features, in various states of preservation, have been documented on this site. The location of the Lime Kiln Site and the First Parliament Site are shown in **Figure 2**.

Figure 2: Location of First Parliament Site and Lime Kiln Site Areas

The First Parliament Site and Lime Kiln Site require additional archaeological studies ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures is necessary. Completion of this preparatory work is essential to allow for the timely delivery of the Ontario Line.

Archaeological fieldwork to remove or protect archaeological resources is anticipated to commence in early Fall 2021, and a workplan for these archaeological investigations is under development. As mentioned in the letter sent on March 11, 2021, Chippewas of Rama First Nation is invited to participate in all archaeological fieldwork, and to review and provide comments on forthcoming reports.

Feedback on Commemoration of First Parliament Site

Metrolinx appreciates that the history of the First Parliament site is not one simply of Canadian origin, but rather holds longer history and tradition. Metrolinx also appreciates that the site of the First Parliament of Upper Canada is linked to a history of colonization and harmful practices towards Indigenous Peoples. Given the significance of this site, Metrolinx is engaging with Indigenous Nations, City of Toronto and the broader community to identify opportunities for commemoration. Metrolinx is committed to ensuring that any feedback from Chippewas of Rama First Nation regarding the significance of this site is considered as part of this commemoration. Metrolinx appreciates that traditional or cultural knowledge about this site may be sacred and/or not be appropriate to be shared but welcomes any comments or ideas from Chippewas of Rama First Nation that may be appropriate to commemorate Indigenous Peoples.

Engagement

Metrolinx is committed to an open, respectful, and transparent relationship with Chippewas of Rama First Nation. We would like to meet with Chippewas of Rama First Nation to better understand any significance the First Parliament site may have to your Nation. We are also happy to assist in reviewing the Corktown Station Early Works Report or reviewing the proposed archaeological workplan for this site. If Chippewas of Rama First Nation requires additional information or materials, or you wish to discuss this project in more detail or set up a meeting, please contact Fallon Melander, Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*. Thank you for your time in reviewing these assessments.

Thank you for your time in reviewing this letter.

Yours Truly,

Subject: Ontario Line - Project Update - Don Valley and River - Invitation for Participation in Stage 2 Archaeological Fieldwork
Date: Tuesday, May 25, 2021 2:29:07 PM
Attachments: [OL-Don River Letter 2021 CRFN.pdf](#)

Dear Sharday,

Metrolinx continues to progress its environmental studies for the Ontario Line Project. We wanted to keep you aware that part of the project scope falls within the Don Valley and River System, and we recognize the importance of Valley and the waters within. Attached you will find a letter providing an update on the project and information regarding the planned work and environmental assessments that are anticipated to take place within the Don Valley. We also wanted to invite your Nation to participate in the planned Stage 2 Archaeological Assessments that are anticipated to occur as part of the upcoming field season.

My apologies that this letter is being sent after it was shared with other Williams Treaties Nations – this is due to an internal error. This letter is not intended to replace engagement but to provide a high level summary for your information. We would very much appreciate meeting with your Nation to discuss in more detail. Please let me know if you have any questions or concerns.

Miigwetch,

Fallon

Delivered by Email

Dear Ms. James,

RE: Ontario Line Project - Don River Crossings & Stage 2 Archaeological Assessment Update

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Chippewas of Rama First Nation. Metrolinx appreciates and respects Chippewas of Rama First Nation's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to provide more information to Chippewas of Rama First Nation about the Ontario Line crossings of the Don River and its tributaries. Metrolinx appreciates the significance of the waters and wishes to better understand how the potential impacts of construction around the Don River may be of interest to Chippewas of Rama First Nation.

Background

The Project is a new subway line with connections to Line 1 (Yonge-University) subway service at Osgoode and Queen Stations, Line 2 (Bloor-Danforth) subway service at Pape Station, and Line 5 (Eglinton Crosstown) service at the future Science Centre Station. Fifteen stations are proposed, with additional connections to three GO Transit lines (Lakeshore East, Lakeshore West and Stouffville), and the Queen, King, Bathurst, Spadina, Harbourfront and Gerrard/Carlton streetcar routes. The Project will reduce crowding on Line 1 and provide connections to new high-order rapid transit neighbourhoods. More information on the Project can be found on our website: <http://www.metrolinx.com/ontarioline>.

Work in the Don River System

As part of the Ontario Line Project, the following four crossings within the Don River system are proposed:

- Location 1: Lower Don River Crossing (Lower Don Bridge);
- Location 2: Millwood Road Crossing;
- Location 3: Walmsley Brook Crossing; and
- Location 4: West Don River Crossing north of Overlea Boulevard.

Locations 1-4 are shown in **Figure 1** and described in further detail below.

Figure 1: Ontario Line Project - Proposed Don River System Crossings

The environmental assessment for the Ontario Line Project is being completed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20) made under the *Environmental Assessment Act*. Construction of the Lower Don Crossing (Location 1) will be assessed in the Lower Don Bridges and Don Yard Early Works Report, that is anticipated to be shared with Chippewas of Rama First Nation in summer 2021. Construction of the other three crossings (Locations 2-4) will be assessed in the Environmental Impact Assessment Report, that is planned to be shared with Chippewas of Rama First Nation in early 2022.

Location 1: Lower Don River Crossing (Lower Don Bridge)

A new bridge is planned to be built on the north side of the existing Lakeshore East rail bridge at the Lower Don River, with space for Ontario Line tracks going in both directions. We are also planning pedestrian and cycling connections across the Lower Don River.

Location 2: Millwood Road Crossing

The underground section of the Ontario Line running under Pape Avenue will emerge from the southern embankment of the Don Valley on an elevated guideway crossing the Don River, west of the Leaside Bridge (Millwood Road). The elevated guideway will connect to Thorncliffe Park in the north.

Location 3: Walmsley Brook Crossing

An elevated guideway will cross the Walmsley Brook tributary of the West Don River north of Pat Moore Drive. The guideway will then continue east across Beth Neilson Drive.

Location 4: West Don River Crossing (north of Overlea Boulevard)

The elevated guideway will cross the West Don River, north of Overlea Boulevard. This section of the route will connect to Don Mills Road and the future Flemingdon Park Station.

Field Surveys and Studies

As project planning is still in progress, environmental field surveys and studies as well as the timing of this work are being determined. Environmental field surveys and studies that may occur within or near the Don River include Stage 2 archaeological assessment and natural environment surveys (e.g., Species at Risk and tree surveys). Studies, surveys and their timing will be confirmed as project planning progresses. Further details are anticipated to be available in mid-Summer 2021.

Update on Archaeology

Metrolinx is currently planning to undertake Stage 2 Archaeological Assessments (AA) near the Don River starting in Fall 2021. The Stage 2 AA investigations will assess areas of identified archaeological potential within the Ontario Line study area which may be affected by the construction of the Project. Stage 2 AA fieldwork consists of test pit surveys at 5 m intervals within areas of previously identified archaeological potential.

Metrolinx would appreciate any interest Chippewas of Rama First Nation may have in participating in the Stage 2 AA fieldwork. Some of the Stage 2 AA may occur on lands

within the Toronto and Region Conservation Authority's (TRCA) property boundaries and regulated area. Metrolinx will coordinate with TRCA to ensure that Indigenous Nations are provided the opportunity to participate in Stage 2 AA investigations. Upon receipt of Chippewas of Rama First Nation's interest in participating, Metrolinx will work to coordinate your Nation's involvement.

As Metrolinx continues to undertake environmental due diligence for this project, additional archaeological assessment reports are anticipated to be completed. Metrolinx will ensure that Chippewas of Rama First Nation will be made aware of and engaged regarding any future archaeological assessments, and especially the discovery and preservation of Indigenous artifacts. Metrolinx will also ensure that future archaeological assessments are provided to Chippewas of Rama First Nation in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries

Invitation for Input

We are committed to an open, respectful, and transparent engagement with Chippewas of Rama First Nation. We recognize the potential significance of this project to Chippewas of Rama First Nation and wanted to keep you apprised of this project. We welcome meeting in the near future to discuss this project and its possible impacts and ways to appropriately engage with Chippewas of Rama First Nation.

We are happy to address any questions that Chippewas of Rama First Nation may have about the work proposed in the Don River system or the Ontario Line Project as a whole. If you require additional information or materials, or if you wish to discuss this Project in more detail or set up an in-person meeting, please contact Fallon Melander, Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Metrolinx thanks you for the time in reviewing this letter. Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*.

Yours Truly,

A handwritten signature in blue ink, appearing to read 'James Francis'.

Subject: RE: Ontario Line Project – Archaeological Monitoring for Borehole Drilling - 265 Front St East - CRFN

Dear Ms. James,

Please find attached a letter inviting participation in upcoming archaeological monitoring for borehole drilling that is taking place next week at 256 Front Street in Toronto to support environmental assessment and geotechnical studies related to the Ontario Line Subway project. The boreholes are being drilled in locations that have known archaeological potential and as such Metrolinx is ensuring that a consultant archaeologist is on-site to monitor. If you are not able to attend, we are happy to provide any fieldnotes taken by the consultant archaeologist and/or provide a summary of the data collected if this is at all helpful to you.

The boreholes are anticipated to be completed between July 12 and July 16, 2021. Please let me know as soon as possible if you have interest in participating, and we will work with you and the project team to coordinate. And just a final note for your information, both Fallon Melander and Jaimi O'Hara, who are usually Metrolinx's main point of contact with your Nation, are away from the office this week. Hence you are receiving this communication from me.

Miigwetch,

Make today great,

Christine Parris (she, her, hers)

Dear Ms. James,

RE: Ontario Line Project - Archaeological Monitoring for Borehole Drilling - 265 Front St East

Metrolinx and its consultants, Stantec and Wood, will be undertaking geotechnical and environmental site assessment investigations at 265 Front St East. As part of this work boreholes will be drilled at the property. These boreholes will be located on/near potential archaeological sites and an archaeologist will be on site to monitor the drilling activities. We are writing to invite Chippewas of Rama First Nation to participate in the archaeological monitoring associated with this work. If preferable, Metrolinx is happy to share any fieldnotes taken by the consultant archaeologist as well as a summary of the borehole and geotechnical study data for review.

The fieldwork is anticipated to be conducted between July 12th and July 16th, 2021. Fieldwork dates may change based on field progress and weather.

Invitation to Participate in Fieldwork

Metrolinx would appreciate any interest Chippewas of Rama First Nation may have in participating in the archaeological monitoring fieldwork. The attached maps illustrate the location of the boreholes that will be drilled. Upon receipt of Huron-Wendat Nation interest in participating, Metrolinx will work to coordinate your Nation's involvement.

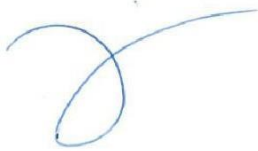

Engagement

Regardless of whether or not your Nation participates in the fieldwork, Metrolinx will inform you of discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will also ensure that future Archaeological Assessment reports are provided to your community in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries.

If your Nation wishes to participate in the fieldwork, or if you'd prefer to receive fieldnotes and/or a summary of the borehole and geotechnical data, please let us know at your earliest convenience. If you require additional information or materials, or if you wish to discuss this project in more detail or set up an in-person meeting, please contact, Indigenous Relations at Metrolinx. We can be contacted at IndigenousRelations@metrolinx.com.

Thank you for your time and consideration.

Dear Sharday,

Metrolinx is working with its consultant HDR to provide opportunities for participation in upcoming Archaeological Assessment and Natural Environment fieldwork associated with the Ontario Line. Please find attached a letter inviting your Nation to participate.

The fieldwork is anticipated to late August - early September 2021. Please let me know if you have interest in participating as soon as possible, and we will work with you, the project team and HDR to coordinate.

If you have any questions or concerns, please feel free to contact the Indigenous Relations Office at anytime.

Thank you,

Dear Ms. James,

RE: Ontario Line Project - Update on Archaeological Assessments and Natural Environment Surveys

Metrolinx and its consultant, Stantec and HDR, will be undertaking Archaeological Assessment and Natural Environment fieldwork associated with the Ontario Line Project. We appreciate Chippewas of Rama First Nation's interest in participating in these studies. The following letter provides details about the anticipated surveys to support the planning and coordination of involvement by your Nation.

Invitation to Participate in Fieldwork

Metrolinx would appreciate any interest Chippewas of Rama First Nation may have in participating in the archaeological fieldwork. Upon receipt of Chippewas of Rama First Nation interest in participating, Metrolinx will work to coordinate your Nation's involvement.

Update on Archaeology

Metrolinx is planning to undertake various Archaeological Assessments for the Ontario Line Project. This archaeological investigation will assess areas of identified archaeological potential, which may be potentially affected by the construction of the Project. The archaeological works are planned to begin in **September 2021**. Fieldwork dates may change based on field progress and weather.

Metrolinx would appreciate any interest Chippewas of Rama First Nation may have in participating in the archaeological fieldwork. Upon receipt of Chippewas of Rama First Nation interest in participating, Metrolinx will work to coordinate your Nation's involvement.

As Metrolinx continues to undertake environmental studies for this project, additional archaeological assessment reports are anticipated to be completed. Metrolinx

acknowledges that Chippewas of Rama First Nation will be made aware of and engaged regarding any future archaeological assessments, and especially the discovery and preservation of Indigenous artifacts and sacred burial grounds. Regardless of whether or not your Nation participates in the fieldwork, Metrolinx will inform you of discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will also ensure that future Archaeological Assessment reports are provided to Chippewas of Rama First Nation in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries.

Natural Environment Field Surveys

Metrolinx is conducting natural environmental studies to review and document existing conditions within the Study Area and to carry out impact assessment reporting. Most of the natural environment fieldwork for Ontario Line is planned to occur in 2022.

However, the surveys detailed in the table below are planned for this year and include butternut survey, tree inventory and aquatic habitat assessment. Please note that these are approximate dates and may be subject to change pending appropriate weather conditions and field survey requirements. Metrolinx will endeavour to keep Chippewas of Rama First Nation apprised as the work unfolds.

Survey	Date(s)
Butternut Health Assessments (Areas detailed in Figures 1 and 2)	• August, September/2021
Tree Inventory (Areas detailed in Figures 1 and 2)	• September/2021
Aquatic Habitat assessment (Don and West Don ravine areas)	• September/2021

Engagement

If your Nation requires additional information or materials, or if you wish to discuss this project in more detail or set up an in-person meeting, please contact Jaimi O'Hara, Acting Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*.

Dear Ms. James,

RE: Ontario Line Project - Lower Don Bridge Marine Archaeological Overview Assessment for Review

Metrolinx wishes to build a strong and respectful relationship with Chippewas of Rama First Nation. Metrolinx appreciates and respects Chippewas of Rama First Nation's desire to be appropriately informed and aware of projects. Metrolinx wishes to share with you the development of the Marine Archaeological Overview Assessment (MAOA) report for the proposed construction of the Lower Don Valley Bridge over the Don River. This proposed bridge is a component of the Ontario Line Project as part of the Lower Don Bridge and Don Yard Early Works. We invite Chippewas of Rama First Nation's feedback on the marine Archeological Overview Assessment prepared for the Ontario Line Project.

Project Description

The Ontario Line will bring 15.6 kilometres of subway service to Toronto. The Ontario Line will stretch from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line will have 15 new stations, including six interchange stations, connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable service.

Lower Don Bridge and Don Yard Early Works

The Lower Don Bridge and Don Yard early works are planned for where the Ontario Line will run alongside GO train operations. These early works will set the groundwork for other major construction on the Ontario Line project and include:

- building a new bridge north of the existing rail bridge over the Lower Don River that will carry the Ontario Line tracks;
- shifting GO tracks in the Don Yard and nearby rail corridor to accommodate Ontario Line infrastructure;
- modifying the existing rail bridge to accommodate GO track shifts and Ontario Line infrastructure; and
- relocating and protecting utilities and signal infrastructure in the area.

10 Bay Street
Toronto, ON M5J 2N8

The location of the Lower Don Bridge and Don Yard early works project footprint and study area can be viewed in **Figure 1** below.

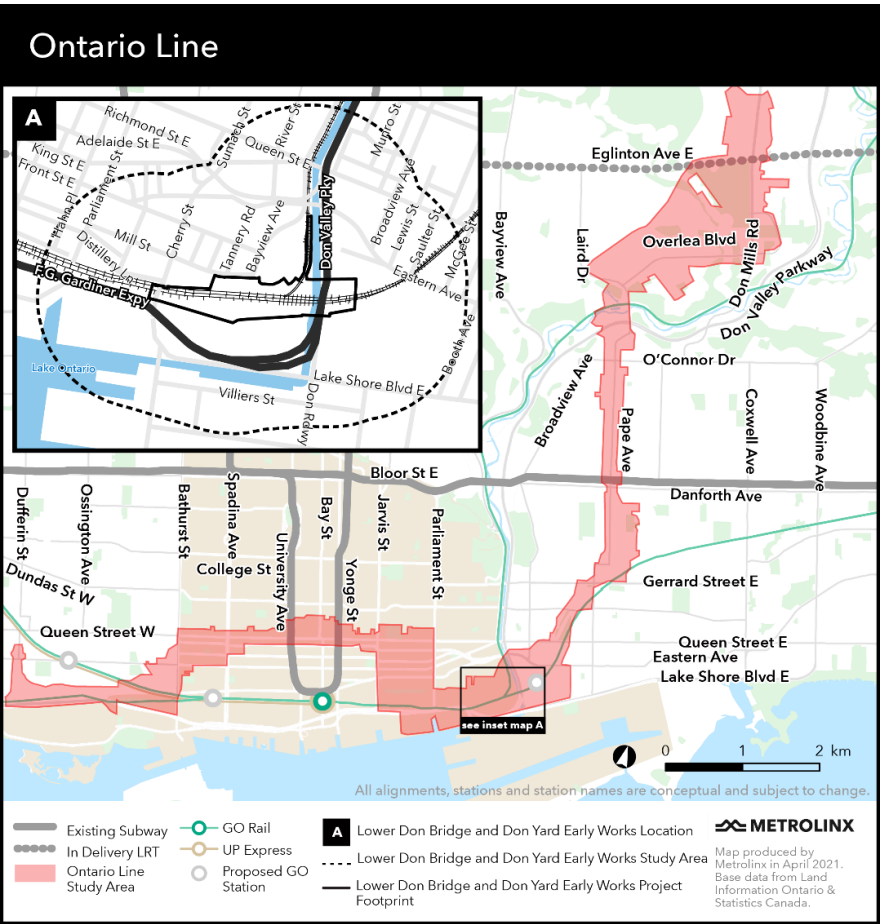

Figure 1: Map of Lower Don Bridge and Don Yard Early Works

Marine Archaeological Overview Assessment

On behalf of Metrolinx, Stantec has undertaken a Marine Archaeological Overview Assessment for the proposed Lower Don Bridge. The purpose of the Marine Archaeological Overview Assessment is to determine the marine archaeological potential of the study area for the bridge shown in **Figure 2** below.

The proposed bridge will cross over the Don River on the north side of the existing GO Transit Lakeshore East rail bridge. As a result, a large portion of the study area overlaps with the Don River. While the bridge will have no permanent in-water components, Metrolinx anticipates that in-water construction activities may impact potential submerged cultural resources. The marine archaeological potential of the study area is being considered as part of the Marine Archeological Overview Assessment.

The assessment determined that despite the study area for the Lower Don Valley Arch Bridge Superstructure having indicators of marine archaeological potential, there has been extensive river-bed disturbance to date. The riverbed has been previously disturbed by engineered

channeling, modern dredging, and modern construction. The assessment determined that the study area retains low to no potential for the identification and documentation of in situ Indigenous and Euro-Canadian marine archaeological resources. As a result no further marine archaeological work is required for the study area.

A copy of the marine Archeological Overview Assessment has been included in the Dropbox link for your review. Please provide any comments you may have by **November 19, 2021**.

Invitation for Input

We are committed to an open, respectful, and transparent engagement with Chippewas of Rama First Nation. Metrolinx values any input that Chippewas of Rama First Nation is willing to provide on the Marine Archaeological Overview Assessment report.

We are happy to meet with your Chippewas of Rama First Nation to go over the project and development of the Marine Archaeological Overview Assessment report and answer any questions Chippewas of Rama First Nation may have on the report or the project as a whole.

If you require additional information or materials, or if you wish to discuss this project in more detail or set up a meeting, please contact Jaimi O'Hara, Acting Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Please submit your feedback in writing by **November 19, 2021**.

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*, except where information is provided to Metrolinx in confidence, pursuant to section 15.1.

Dear Ms. James,

**RE: Ontario Line Project - Stage 2 Archaeological Assessment - Moss Park and Ordnance Park
Invitation to Participate in Archaeological Fieldwork**

Metrolinx and its consultant, Stantec continue to progress the archaeological studies for the Ontario Line project and wanted to invite Chippewas of Rama First Nation to participate in Stage 2 Archaeological Assessments planned to occur at Moss Park and Ordnance Park in the upcoming weeks. The locations of Moss Park and Ordnance Park study areas can be viewed in **Figure 1 and 2** below.

Moss Park and Ordnance Park have been previously assessed in a desktop study, the *Ontario Line Stage 1 Archaeological Assessment Report - South* which was shared with Chippewas of Rama First Nation in March 2020 and was subject to an Addendum shared with Chippewas of Rama First Nation in February 2021. The Stage 1 report recommended that a Stage 2 archaeological assessment is required for Moss Park and Ordnance Park parcels.

The Stage 2 archaeological field work will be conducted by test pit survey, in accordance with the Ministry of Heritage, Sport, Tourism and Culture Industries' (MHSTCI) 2011 *Standards and Guidelines for Consultant Archaeologists*. The Stage 2 test pit survey method consists of hand excavating test pits by shovel at a five-metre interval on the park lands. The test pits are at least 30 centimetres in diameter and dug through the topsoil (which has a variable depth generally between 15 and 25 centimetres, but may be deeper or shallower) and at least five centimetres into subsoil. Once complete, test pits will be backfilled. Areas disturbed by utility infrastructure or recent construction will not be surveyed but will be photo documented. Based upon the Stage 2 field work, subsequent archaeological investigations may be recommended depending on what is found during the Stage 2 test pit survey.

Please see the fieldwork details below:

MOSS PARK:

Start Date: Tentatively October 25, 2021. If the start date changes, we will reach out to you.

Duration: Approximately two to three days

Start Time: 8am

Consultant Company: Stantec

Contact information: Jeffrey Muir - (289) 208-5298; Heather Kerr - (416) 602-3271; Patrick Hoskins - (613) 716-4687

Assessment: Stage 2 Archaeological Assessment

Meeting Location Address: 150 Sherbourne St

Size of Field Crew: 2 (1 Field director, 1 field tech)

Parking location: Above-ground parking lot at the southwest corner of Jarvis Street and Queen Street East; approximate three minute walk

ORDNANCE PARK

Start Date: Work on Ordinance Park will begin after the Moss Park work is completed

Duration: Approximately two weeks

Start Time: 8am

Consultant Company: Stantec

Contact information: Jeffrey Muir - (289) 208-5298; Heather Kerr - (416) 602-3271; Patrick Hoskins - (613) 716-4687

Assessment: Stage 2 Archaeological Assessment

Size of Field Crew: 4 (1 Field director, 3 field techs)

Required PPE:

Item	Specifications
Clothing and Attire	Loose clothing, long hair, dangling accessories, jewelry, or other similar items that are likely to be a hazard will not be worn unless they are tied, covered, or otherwise secured so they prevent the hazard.
Foot Protection	Canadian Standards Association (CSA) approved work boots (Steel-toed boots, minimum 6" from top of sole, grade 1 with sole protection [CSA Standard Z195-09]).
Hand Protection	Cut, puncture, and abrasion-resistant gloves shall be worn when conducting archaeological hand digging and screening activities.
Eye and Face Protection	CSA approved safety glasses with rigid side shields. Regular prescription glasses are not permitted unless they are designed as CSA safety glasses complete with rigid shields. An ASTM level 1 (or higher) face covering is mandatory.
Head Protection	CSA approved Type II, Class E (side impact) hard hat. Hard hats shall be worn with the brim pointed forward.
Hearing Protection	Not needed.
High Visibility Safety Apparel	Mandatory class 2, level 2 High Visibility Safety Apparel (HVSA). Full length sleeves and pants with reflective stripes on both arms and legs are required.
*Although not considered PPE, face coverings for COVID-19 shall be worn when applicable	

Invitation to Participate in Fieldwork

Metrolinx would appreciate any interest Chippewas of Rama First Nation may have in participating in the archaeological monitoring fieldwork. Upon receipt of Chippewas of Rama First Nation's interest in participating, Metrolinx will work to coordinate Chippewas of Rama First Nation's involvement.

Engagement

Regardless of whether or not Chippewas of Rama First Nation participates in the fieldwork, Metrolinx will inform you of discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will also ensure that future Archaeological Assessment reports are provided to your community in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries.

If Chippewas of Rama First Nation wishes to participate in the fieldwork, or if you'd prefer to receive fieldnotes and/or a summary of the borehole and geotechnical data, please let us know at your earliest convenience. If you require additional information or materials, or if you wish to discuss this project in more detail or set up an in-person meeting, please contact, Indigenous Relations at Metrolinx. We can be contacted at IndigenousRelations@metrolinx.com.

Thank you for your time and consideration.

Yours Truly,

Aaniin Everyone,

Thank you for contacting the Chippewas of Rama First Nation. If you are contacting us to initiate the consultation process please visit <https://www.ramafirstnation.ca/rama-research-ethics-and-community-consultation/>. At this link you will find the Chippewas of Rama First Nation's Consultation Protocol and a link to the "Notice of Request to Consult" form which will initiate your consultation process with us. This form must be completed for all new projects. Please ensure you are familiar with the protocol and are aware of any fees that may be applicable to you.

The Chippewas of Rama First Nation has implemented this protocol as a means to address capacity concerns related to the overwhelming number of consultation requests received by the First Nation. Further, it is intended to allow the First Nation to engage more fully through *meaningful* and *informed* consultation, which is the constitutional right of First Nations in Canada. We expect that these efforts will assist both you, as the proponent, and the First Nation in addressing consultation concerns in a timely and efficient manner.

Should you have any concerns with the content of the form, please contact Sharday James, Community Consultation Worker for Rama First Nation at shardayj@ramafirstnation.ca. Otherwise, we look forward to receiving your request to consult and associated documentation and working with you following our review of your request.

Sincerely,

Samantha Craig-Curnow

Chief Ted Williams
c/o Ms. Sharday James
Chippewas of Rama First Nation
5884 Rama Road, Suite 200
Rama, ON L3V 6H6
Delivered by Email

Dear Ms. James,

**RE: Ontario Line Project - Species at Risk 17(2)(d) Permit Amendment Under the
*Endangered Species Act***

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with Chippewas of Rama First Nation. Metrolinx appreciates and respects Chippewas of Rama First Nation's desire to be appropriately informed and aware of projects. To that end, Metrolinx is sharing with Chippewas of Rama First Nation information regarding the Species at Risk (SAR) 17 (2) (d) Permit under *the Endangered Species Act* (ESA, 2007) obtained in support of the Ontario Line Project, and the proposed amendment to this permit.

Project Description

Metrolinx, a regional transportation agency, is helping transform the way the Greater Golden Horseshoe region moves by building a fast, convenient, and integrated transit network. As part of this work, Metrolinx is proceeding with the Ontario Line Project which will bring 15.6 kilometres of subway service to Toronto.

Ontario Line Permit #CR-D-002-19

Metrolinx, as part of the Ontario Line Project, previously received approval for a 17(2)(d) permit (Permit #CR-D-002-19) under the *Endangered Species Act* (ESA, 2007) issued by the Ministry of the Environment, Conservation, and Parks (MECP) on August 10, 2020. The permit provides approval for those project activities that may have adverse impacts on identified Species at Risk (SAR) and/or their habitat. The permit allows for those activities to take place and provides direction to Metrolinx regarding mitigation measures and compensation requirements that would be necessary to support those impacted species to support no net loss.

To inform this permit, Metrolinx completed SAR screening through the Ontario Line Environmental Conditions Report and Natural Environment Report using various information sources. While the results of this screening were shared within the initial draft of the Environmental Conditions Report circulated to Chippewas of Rama First Nation on June 15 2020, Draft Environmental Conditions Report circulated on September 17 2020 and Final Environmental Conditions Report circulated on November 30 2020, we regret that we did not engage with Chippewas of Rama First Nation directly on the screening process or the findings.

Potentially Impacted Species and Summary of Permit Conditions and Requirements

Based on the SAR screening completed to date, some activities required to support the Ontario Line Project may result in the following species at risk being impacted:

- Bank Swallow - Threatened
- Barn Swallow - Threatened
- Blanding's Turtle - Threatened
- Butternut - Endangered
- Chimney Swift - Threatened
- Little Brown Myotis - Endangered
- Northern Myotis - Endangered
- Small-footed Myotis - Endangered
- Tri-colored Bat - Endangered

Activities that may result in impacts to species listed above are associated with project construction and include activities such as removal or alteration of SAR habitat features (e.g., structures that may support SAR bird nesting, and trees).

Prior to commencing any activities that may impact SAR and/or SAR habitat, Metrolinx will complete species-specific screening for areas where project activities are planned to take place, and, if necessary (if screening determines that SAR/SAR habitat is likely to be present), surveys to detect SAR and SAR habitat presence and conduct an impact assessment if presence is confirmed, to characterize species-specific impacts (e.g., amount of habitat removed).

Metrolinx will meet the ESA permit conditions such as implementing species-specific mitigation measures, monitoring their effectiveness, and taking corrective action as required. Species-specific mitigation measures include scheduling activities to take place outside of species-specific timing windows (e.g., outside of active season or breeding window), implementing exclusion measures to prevent individuals of certain species from being impacted by project activities, and others.

If project activities result in SAR habitat removal, Metrolinx will implement species-specific compensation measures such as creating habitat (e.g., nesting habitat features replacing habitat features removed). Compensation habitat will be regularly monitored, and appropriate corrective actions will be taken as required to ensure habitat functions as intended.

Proposed Permit Amendment

Metrolinx is proposing an amendment to the previously approved SAR 17(2)(d) Permit (Permit #CR-D-002-19) under the *Endangered Species Act* (ESA, 2007), approved on August 10, 2020. The purpose of this permit amendment is to seek approval for additional study area not included in the current Permit #CR-D-002-19, as shown in **Appendix 1**. There are no changes to the permit conditions, including species-specific mitigation measures and compensation requirements, and no additional species are being added at this time. The SAR screening developed in support of the current permit has been updated to provide occurrence probability of SAR that may be present in the areas Metrolinx is seeking to include in the permit as part of the proposed amendment, and is included as **Appendix 2**.

Permit Amendment Process - Next Steps

The Proposal for the 17(2)(d) Permit Amendment is anticipated to be available on the Environmental Registry of Ontario (ERO) for a 30-day public review period this Fall 2021, and Metrolinx will notify Chippewas of Rama First Nation when the ERO posting is available. While not specifically required under the Environmental Bill of Rights, the Ministry of the Environment, Conservation and Parks (MECP) voluntarily posts all ESA permit proposals for public review to ensure transparency and inclusion.

Metrolinx is seeking Chippewas of Rama First Nation's comments, questions, or requests for additional information upon review of the material presented in this letter at any time in advance of the public ERO posting. Questions or comments can also be submitted directly to MECP through the ERO posting during the 30-day public review period.

Following the 30-day public review period, the proposed permit amendment will be submitted to the Minister for review and consideration. The amendment may only be issued if the Minister is of the opinion that the legal requirements set out in clause 17(2)(d) of the *Endangered Species Act* (ESA, 2007) have been satisfied. Should the amendment be issued, Metrolinx will be obligated to adhere to the requirements and standards as stipulated under the permit.

Chippewas of Rama First Nation will be kept apprised should any new SAR be identified within the project area as project planning progresses. In such cases we will endeavor to engage Chippewas of Rama First Nation prior to seeking any necessary permit amendments.

Metrolinx is committed to building a long-term relationship with Chippewas of Rama First Nation, and we recognize that this requires transparency. We appreciate that we have much work to do in this regard and we hope to move forward in a positive way. The original SAR permit was obtained as part of the normal course of Metrolinx business, which had yet to be identified by the Indigenous Relations Office as necessitating engagement and information sharing with Indigenous Nations.

The Indigenous Relations Office has begun guiding the organization and identifying opportunities to flag such actions in advance, so that we can more meaningfully engage with Indigenous Nations as we move forward. We appreciate your patience as Metrolinx continues to learn more about Indigenous Nations and with the help of the Indigenous Relations Office, becomes aware of additional opportunities for engagement with Indigenous Nations.

We appreciate that previous engagement activities may not have met the needs of Chippewas of Rama First Nation, and the volume of materials may have resulted in Chippewas of Rama First Nation not having been made adequately aware of the possible identified impacts to several Species at Risk under this permit. Metrolinx remains committed to meaningful engagement; we are committed to identifying and prioritizing the sharing of the most relevant and appropriate information with Chippewas of Rama First Nation.

If Chippewas of Rama First Nation requires additional information or materials, or you wish to discuss this project in more detail, please reach out to Jaimi O'Hara in the Indigenous Relations Office at Metrolinx and she would be pleased to facilitate a meeting. She can be contacted at IndigenousRelations@metrolinx.com.

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*, except where information is provided to Metrolinx in confidence, pursuant to section 15.1.

Thank you for your time in reviewing this letter.

Yours Truly,

Maria Zintchenko

Dear Ms. James,

**RE: Ontario Line Project - Stage 2 Archaeological Assessment - Thorncliffe Segment
Invitation to Participate in Archaeological Fieldwork**

Metrolinx and its consultant, Stantec continue to progress the archaeological studies for the Ontario Line project and wanted to invite Chippewas of Rama First Nation to participate in Stage 2 Archaeological Assessments planned to occur in the Thorncliffe Segment in the upcoming weeks. The locations of the Thorncliffe Segment study areas can be viewed in **Figure 1** below.

Stage 2 archaeological test pit survey at five metre intervals is planned in areas of archaeological potential on the illustrated PINs (please see Figure 1). This includes the archaeological crew of four (one field supervisor and three field technicians) digging by hand each test pit, each of which is at least 30 centimetres in diameter. The pit is dug to subsoil (approximately 20 to 30 centimetres in depth depending on soil conditions, plus another five centimetres into the subsoil) at five metre intervals across the areas of archaeological potential. The topsoil would be screened through six-inch mesh to recover artifacts. We also have three additional days of Stage 1 field work within the Don Valley area, where a field supervisor would photograph the landscape in detail to document areas of steep slope, permanently wet areas, and areas of archaeological potential.

Please see the fieldwork details below:

THORNCLIFFE SEGMENT:

Start Date: Tentatively December 2, 2021. If the start date changes, we will reach out to you.

Duration: Approximately two weeks

Start Time: 8am

Consultant Company: Stantec

Contact information: Jeffrey Muir - (289) 208-5298; Heather Kerr - (416) 602-3271; Patrick Hoskins - (613) 716-4687

Assessment: Stage 2 Archaeological Assessment

Size of Field Crew: 4 (1 field supervisor and 3 field technicians)

Invitation to Participate in Fieldwork

Metrolinx would appreciate any interest Chippewas of Rama First Nation may have in participating in the archaeological monitoring fieldwork. Upon receipt of Chippewas of Rama First Nation's interest in participating, Metrolinx will work to coordinate your Nation's involvement.

Engagement

Regardless of whether or not your Nation participates in the fieldwork, Metrolinx will inform you of discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will also ensure that future Archaeological Assessment reports are provided to your Nation in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries.

If your Nation wishes to participate in the fieldwork, or if you'd prefer to receive fieldnotes and/or a summary of the borehole and geotechnical data, please let us know at your earliest convenience. If you require additional information or materials, or if you wish to discuss this project in more detail or set up an in-person meeting, please contact, Jaimi O'Hara, Acting Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Should you wish to provide input to the above questions, please submit your feedback in writing. Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*, except where information is provided to Metrolinx in confidence, pursuant to section 15.1.

Thank you for your time and consideration.

Delivered by Email

Dear Ms. James,

RE: Ontario Line Project - Stage 2 Archaeological Assessment - Corktown Station and Don Valley Area: Invitation to Participate in Archaeological Fieldwork

Metrolinx and its consultant, Stantec continue to progress the archaeological studies for the Ontario Line project and wanted to invite Chippewas of Rama First Nation to participate in further archaeological monitoring for Corktown Station and Don Valley area.

CORKTOWN STATION

Archaeological monitoring for building demolitions is planned to occur at Corktown Station in the upcoming weeks. The locations of the Corktown Station study areas can be viewed in **Figure 1** below. Please note that this work is separate from the Stage 2 & Stage 4 archaeological investigations, which has ceased for the 2021 field season and will resume in Spring 2022. Metrolinx will ensure that Chippewas of Rama First Nation is informed of when the Stage 2 & Stage 4 archaeological investigations resume.

The archaeological monitoring will occur for building demolition activities on the First Parliament site that may be capping archaeological deposits at Corktown Station (please see Figure 1). This includes an archaeological crew of two (one field supervisor and one field technician) monitoring the demolition of modern buildings in the areas of archaeological potential. Metrolinx would value any participation that Chippewas of Rama First Nation may wish to have in this monitoring program.

Please see the fieldwork details below:

CORKTOWN STATION:

Start Date: Tentatively January 17-18, 2022. If the start date changes, we will reach out to you.

Duration: Approximately two to four months (demo work occurring intermittently during time period; schedule to be confirmed closer to start date)

Start Time: 8am

Consultant Company: Stantec

Contact information: Jeffrey Muir - (289) 208-5298; Heather Kerr - (416) 602-3271; Patrick Hoskins - (613) 716-4687

Assessment: Archaeological monitoring during building demolition

Size of Field Crew: 2 (1 field supervisor and 1 field technician)

DON VALLEY AREA

As part of the Ontario Line, Hydro One Network Infrastructure (HONI) needs to relocate several hydro towers to accommodate subway maintenance facilities. Metrolinx is carrying out a borehole drilling program in the Don Valley to provide HONI with geotechnical data for proposed hydro tower relocations.

Archaeological monitoring will occur for borehole drilling in areas with archaeological potential (please see Figure 2). This approach will provide for the on-site identification and, if necessary, stop-work order of drilling by a licensed archaeologist in the event potential archaeological resources are encountered. A licensed archaeologist will be on-site during drilling to visually inspect spoil removed during borehole drilling as well as intermittent borehole samples to visually identify the presence of artifacts. Metrolinx would value any participation that Chippewas of Rama First Nation may wish to have in this monitoring program.

Please see the fieldwork details below:

DON VALLEY AREA:

Start Date: Mid-February. Exact dates will be confirmed in January 2022

Duration: 1-2 weeks

Start Time: 8am

Consultant Company: Stantec

Contact information: Jeffrey Muir - (289) 208-5298; Heather Kerr - (416) 602-3271; Patrick Hoskins - (613) 716-4687

Assessment: Archaeological monitoring for borehole drilling

Size of Field Crew: 2 (1 field supervisor and 1 field technician)

Invitation to Participate in Fieldwork

Metrolinx would value the involvement of Chippewas of Rama First Nation in the upcoming archaeological monitoring fieldwork outlined above. Should your Nation wish to participate, please let us know at your earliest convenience. We welcome any requests for a meeting to discuss opportunities to participate or to explore this project in more detail with Chippewas of Rama First Nation. Upon receipt of Chippewas of Rama First Nation's interest in participating, Metrolinx will work to coordinate your Nation's involvement. If Metrolinx is also willing to share fieldnotes and/or a summary of the

borehole and geotechnical data in addition to the open invitation to participate directly in the monitoring.

Engagement

Regardless of whether or not your Nation participates in the fieldwork, Metrolinx will inform you of discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will also ensure that future Archaeological Assessment reports are provided to your community in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries.

If you require additional information or materials, or if you wish to discuss this project in more detail or set up an in-person meeting, please contact, Jaimi O'Hara, Manager of Indigenous Relations at Metrolinx. We can be contacted at IndigenousRelations@metrolinx.com.

Thank you for your time and consideration.

Yours Truly,

[Attachment 1 - Notice of Publication of Draft EIAR.pdf](#)
[Appendix 2 - EIAR Arc and Natural Env Impacts and Mitigation.pdf](#)

Dear Sharday,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. We wish to share with you that the Draft Environmental Impact and Assessment Report (EIAR) has now been published. Attached you will find a letter outlining the Draft Environmental Impact Assessment Report (EIAR) prepared for the Ontario Line Project, as well as the Notice of Publication for the report.

The full report can be found using the following dropbox link:

[REDACTED]

The Notice of Publication commences a 30-day public review period which will continue from February 7, 2022 until March 9, 2022. As such, we ask that your Nation provide any comments in writing no later than March 9, 2022. We appreciate the size of these documents and would be happy to arrange a meeting to review the report and project with you.

In an effort to streamline your review, we draw your attention to the attachments which provide an overview of the expected environmental impacts and proposed mitigations for Natural Environment and Archaeological Resources, as we know this may be of specific interest to you.

Thank you for your time and assistance. If you have any questions or concerns, please do not hesitate to contact me.

Rama, ON L3V 6H6
Delivered by Email

Dear Ms. James,

RE: Ontario Line Project - Notice of Publication of Draft Environmental Impact Assessment Report (EIAR)

Metrolinx remains committed to meaningful consultation and engagement, especially where our projects have impacts to the Treaty and traditional lands of Chippewas of Rama First Nation. In November of 2021, Metrolinx shared with Chippewas of Rama First Nation the preliminary Draft Environmental Impact Assessment Report (EIAR) for comment and review. The purpose of this letter is to share with your Nation that the Notice of Publication for the Draft EIAR has now been posted, and to continue to invite any comment or feedback you may wish to share on this report.

Project Description

Metrolinx is proceeding with the Ontario Line which will bring 15.6 kilometres of subway service to Toronto. The Ontario Line will stretch across the city, from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line will have 15 new stations, including six interchange stations, connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable service.

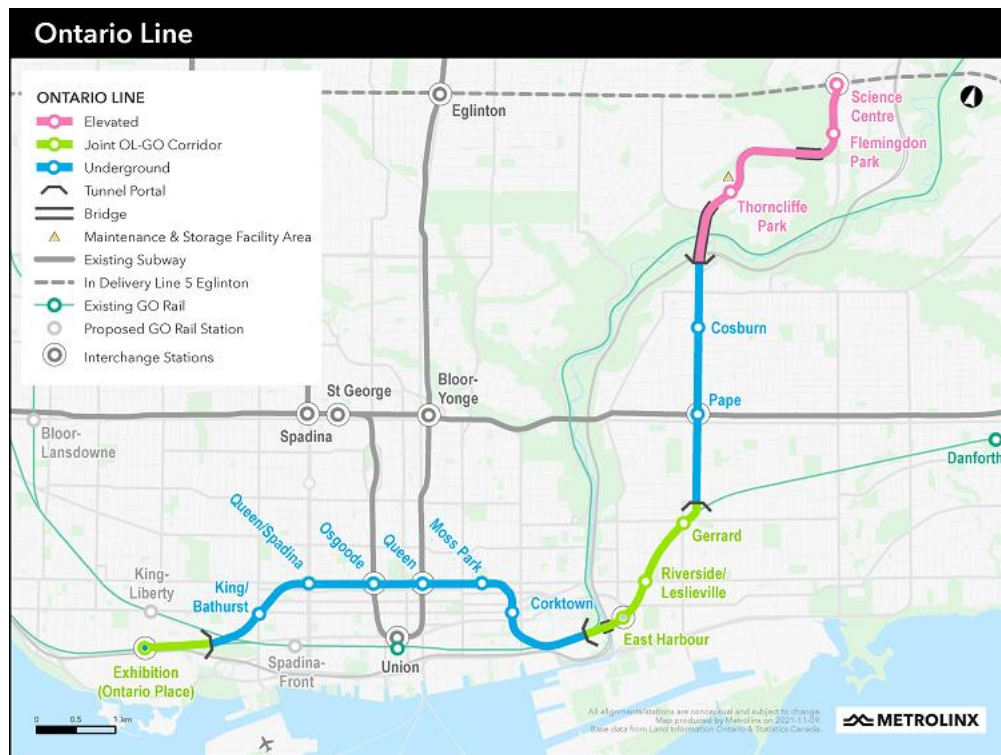

Figure 1 - Ontario Line

Ontario Line Environmental Assessment & Project Timeline

Environmental impacts of the Ontario Line Project are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*.

Table 1 below provides a summary of the Ontario Line Reports that have been shared, or will be shared with Chippewas of Rama First Nation:

Table 1: Ontario Line Reporting Timeline

Report	Date Shared/to be Shared with Nations
Draft Early Works Report (included Exhibition Station, Lower Don Bridge, Lakeshore East Joint Corridor and East Harbour Station)	June 5, 2020
Draft Environmental Conditions Report	September 17, 2020
Final Environmental Conditions Report and Draft Exhibition Station Early Works Report	November 30, 2020
Final Exhibition Station Early Works Report	February 1, 2021
Initial draft of Corktown Station Early Works Report	March 22, 2021
Draft Corktown Station Early Works Report	May 12, 2021
Final Corktown Station Early Works Report	July 15, 2021

Draft Environmental Impact Assessment Report (EIAR)

The Draft EIAR summarizes the local environmental conditions in the discipline-specific study areas developed for the Project. The local environmental conditions were characterized through a combination of desktop review and field studies by practitioners using industry standard techniques and provincial standards, protocols, and guidelines, where appropriate. The resulting Draft Stage 1 AA and Natural Environment Report was shared with Chippewas of Rama First Nation for review in August 2021.

The Draft EIAR also provides an assessment and evaluation of the impacts that the Project might have on the environment. Based on the potential impacts, a description of mitigation measures and monitoring activities is outlined. A list of municipal, provincial, federal, or other permits and approvals that may be required for the Project is also provided.

Discipline-specific assessment and evaluation of impacts were undertaken for the following disciplines:

- Natural Environment
- Soil and Groundwater
- Cultural Heritage
- Archaeological Resources
- Socio-Economic and Land Use
- Air Quality
- Noise and Vibration
- Traffic and Transportation

Effective February 7, 2022, the Draft Environmental Impact Assessment Report will be available for a 30-day public review period. The report is posted on the Ontario Line project webpage, which can be accessed using the following link:

<https://www.metrolinxengage.com/en/content/full-report-draft-environmental-impact-assessment-report>

The Notice of Publication of Draft EIAR can be found in **Attachment 1**.

Potential Impacts and Mitigation Measures

The tables found enclosed in **Attachment 2** provide a summary of natural environment

and archaeology potential impacts and mitigation measures identified as part of the Draft EIAR that may be of interest to Chippewas of Rama First Nation. If your Nation has any feedback about these potential impacts and/or mitigation strategies, or any other aspects of the Ontario Line, we welcome the opportunity to discuss further.

Engagement

Metrolinx welcomes any comments or feedback on the EIAR during the 30-day public review period, from February 7 to **March 9, 2022**. Metrolinx is committed to an open and respectful relationship with Chippewas of Rama First Nation. We appreciate the significant volume of documents related to the Ontario Line Project that have been shared with Chippewas of Rama First Nation. We are happy to assist in the review of these documents by meeting with your Nation.

Metrolinx is willing to address any questions that Chippewas of Rama First Nation may have about the Ontario Line Project. If you require additional information or materials or if you wish to discuss the Project in more detail or set up a meeting, please contact Jaimi O'Hara, Manager of Indigenous Relations Office at Metrolinx. She can be reached at

IndigenousRelations@metrolinx.com.

With the exception of personal information, all comments will become part of the public record. Kindly note that any information you provide to Metrolinx, or its delegates, will be subject to the Freedom of Information and Protection of Privacy Act, except where information is provided to Metrolinx in confidence, pursuant to section 15.1, which protects the confidentiality of Indigenous knowledges.

Thank you for your time in reviewing this letter. Yours

Truly,

A handwritten signature in black ink, appearing to read 'J. Pakkala'.

Attachments: Attachment 1 - Notice of Publication of Draft Environmental Impact Assessment Report
 Attachment 2 - Draft EIAR Natural Environment and Archaeology Potential Effects, Mitigation Measures and Monitoring

Notice of Publication of Draft Environmental Impact Assessment Report and Virtual Open Houses Ontario Line Project

The Project

The Ontario Line will bring 15.6 kilometres of new subway service to Toronto, making it faster and easier for people to get where they need to be each day. The line will stretch across the city, from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line will have 15 new stations, including six interchange stations, connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable service.

Environmental Impact Assessment Report

Environmental impacts of the Ontario Line are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*. In accordance with Section 15 of O. Reg. 341/20, Metrolinx has prepared the Draft Environmental Impact Assessment Report that is now available for review.

The Draft Environmental Impact Assessment Report describes existing environmental conditions in the Project study area, environmental impacts, mitigation and monitoring measures, consultation, and required permits and approvals for the Ontario Line.

The Draft Environmental Impact Assessment Report Review and Consultation Process

Effective **February 7, 2022**, the Draft Environmental Impact Assessment Report will be available for review on the Ontario Line project webpage (www.metrolinx.com/ontarioline). You can view and comment on the report from **February 7 to March 9, 2022** via the online form provided.

You can also participate in virtual open houses, where you can hear from project experts and ask questions about the report in real time, at MetrolinxEngage.com/OntarioLine/live on:

- **February 22, 2022 and February 24, 2022** from 6:30 to 8:00 p.m., with a focus on the portion of the project from Science Centre Station to Gerrard Station
- **March 1, 2022 and March 3, 2022** from 6:30 to 8:00 p.m., with a focus on the portion of the project from Gerrard Station to Exhibition Station

Those who wish to provide comments on the Draft Environmental Impact Assessment Report must do so by **March 9, 2022** and submit them using the webpage form or address them to the following email: ontarioline@metrolinx.com.

Section 17 of O. Reg. 341/20 requires Metrolinx to establish an issues resolution process to attempt to resolve any concerns raised by the public or Indigenous Nations during the review period. At the end of the review period, Metrolinx will update the Draft Environmental Impact Assessment Report by adding a description of the issues resolution process, what Metrolinx did to address any concerns, and if the Ontario Line implementation timeline will be impacted as a result of addressing concerns. Metrolinx will then publish the Final Environmental Impact Assessment Report on the Ontario Line project webpage: www.metrolinx.com/ontarioline and issue a Notice of Publication of the Final Environmental Impact Assessment Report.

To obtain a copy of the Draft Environmental Impact Assessment Report, please contact the Ontario Line project email listed above.

Mark Clancy (T: 416-202-5100, E: ontarioline@metrolinx.com) may be contacted on behalf of Metrolinx.

**Metrolinx
130 Adelaide Street West
Toronto, Ontario

All personal information included in a submission – such as name, address, telephone number and property location – is collected, maintained and disclosed by Metrolinx for the purpose of transparency and consultation. The information is collected under the authority of O. Reg. 341/20 under the Environmental Assessment Act or is collected and maintained for the purpose of creating a record that is available to the general public as described in s. 37 of the Freedom of Information and Protection of Privacy Act. Personal information you submit will become part of a public record that is available to the general public unless you request that your personal information remain confidential. For more information, please contact ontarioline@metrolinx.com or 416-874-5900.

This Notice was first published on **February 7, 2022**.

Environmental Component	Potential Impact	Mitigation Measure(s)	Monitoring Activities
Aquatic Habitat			
Aquatic Environment – Wetlands and Waterbodies	<p>Construction</p> <p><u>OLS Study Area</u></p> <ul style="list-style-type: none"> Impacts to riparian vegetation, erosion and sedimentation to waterbodies from construction; risk of contamination to waterbodies as a result of spills. <p><u>OLN Study Area</u></p> <ul style="list-style-type: none"> Removal or impacts to wetland; aquatic and riparian vegetation; degradation of wetlands as result of dewatering and discharge activities; erosion and sedimentation to wetlands/waterbodies from construction; and risk of contamination to wetlands/waterbodies as a result of spills. <p>Operations</p> <ul style="list-style-type: none"> Potential impacts are not anticipated during operations 	<p>Construction</p> <ul style="list-style-type: none"> Construction activities will maintain the buffers established during the design phase to reduce potential negative impacts to wetlands and waterbodies. Shorelines or banks disturbed by construction activities will be immediately stabilized by any activity associated with the project to prevent erosion and/or sedimentation, preferably through re-vegetation with native species suitable for the site. An Erosion and Sediment Control Plan, in accordance with the Greater Golden Horseshoe's Erosion and Sediment Control Guideline for Urban Construction (2006) and the Erosion and Sediment Control Guide for Urban Construction (TRCA 2019), as amended from time to time, will be prepared prior to and implemented during construction to reduce the risk of sedimentation. A Spill Prevention and Response Plan will be developed before work commences so that procedures and policies are in place to reduce impacts to wetlands and watercourses during construction. In wetland areas where vernal pooling occurs, prior to dewatering isolated work areas, wildlife will be captured and relocated to suitable habitat outside of the work area. Vegetation removals will also consider and mitigate potential impacts to wetland communities. Until such a time, that an Ontario Wetland Evaluation System evaluation is completed and evaluated by NDMNRF, unevaluated wetlands will be considered as significant for the purposes of assessing impacts. Wetland communities potentially affected by the Project will be clearly staked out on site. If dewatering is proposed, then it is recommended to be undertaken during the winter when the potential impacts of changes in water levels are less significant in wetland communities. During detailed design, the need for a dewatering zone of influence assessment and dewatering monitoring plan should be evaluated. The dewatering monitoring plan, if required, will monitor for potential negative impacts on nearby wetlands and adjacent vegetation communities to confirm if they would be affected due to dewatering activities. An adaptive management plan will be prepared if negative impacts are observed. Prior to dewatering isolated work areas, fish will be captured and relocated to suitable habitat outside of the work area under a Licence to Collect Fish for Scientific Purposes from the NDMNRF. <p>Operations</p> <ul style="list-style-type: none"> As no impacts are anticipated to wetlands and waterbodies during operations, no mitigation measures are recommended. 	<p>Construction</p> <ul style="list-style-type: none"> Onsite inspection will be undertaken to confirm the implementation of the mitigation measures and identify corrective actions, if required. Corrective actions may include alteration of activities to reduce impacts and enhance mitigation measures. <p>Operations</p> <ul style="list-style-type: none"> As no impacts are anticipated to wetlands and waterbodies during operations, no monitoring activities are recommended.
Aquatic Environment – Fish and Fish Habitat	<p>Construction</p> <p><u>OLS Study Area</u></p> <ul style="list-style-type: none"> No in-water works, no direct impacts to fish and fish habitat Indirect - Dewatering activities and water discharge resulting in changes in water velocity or temperature, soil 	<p>Construction</p> <ul style="list-style-type: none"> All requirements of the <i>Fisheries Act</i> will be met. In the event that in-water and/or near water construction works are required appropriate mitigation measures will be followed, as identified in Applicable Law and through consultation with the relevant authorities including Fisheries 	<p>Construction</p> <ul style="list-style-type: none"> Onsite inspection will be undertaken to confirm the implementation of the mitigation measures and identify corrective actions, if required. Corrective

Dear Sharday,

Please find attached a letter inviting participation in the archaeological monitoring of borehole drilling planned to occur in the Lower Don Bridge area as part of the Ontario Line Project.

The date of this fieldwork is tentatively set for March 7, 2022. If you are interested in participating, please let me know as soon as possible and we will work with you and the project team to coordinate.

If you have any questions or concerns, please feel free to reach out to me at any time.

Thank you for your time and assistance.

Jaimi

Rama, ON L3V 6H6
Delivered by Email

Dear Ms. James,

RE: Ontario Line Project - Invitation to Participate in Archaeological Monitoring for Borehole Drilling - Lower Don Bridge Area

Metrolinx continues to progress the Archaeological studies for the Ontario Line project and wanted to invite Chippewas of Rama First Nation to participate in further Archaeological monitoring for borehole drilling planned for the Lower Don Bridge area.

A Stage 1 Archaeological Assessment (AA) was completed as part of the Ontario Line Environmental Impact Assessment Report (EIAR). This report identified the area for the proposed boreholes as having archaeological potential. Both the Stage 1AA report and the EIAR were shared with Nations, in both August and November 2021.

Metrolinx is completing an Environmental Site Assessment in the Lower Don area (please see **Figure 1**). Given the identified archaeological potential of the area, archaeological monitoring will take place for the planned borehole drilling. This approach will provide for the on-site identification of archaeological resources and, if necessary, stop-work order of drilling by a licensed archaeologist in the event potential archaeological resources are encountered. A licensed archaeologist will be on-site during drilling to visually inspect spoil removed during borehole drilling as well as intermittent borehole samples to visually identify the presence of artifacts. Metrolinx would value any participation that Chippewas of Rama First Nation may wish to have in this monitoring program.

Please see the fieldwork details below:

Start Date: March 7, 2022 (potentially March 8 as well depending on drilling)

Duration: 1 day

Start Time: 8:30am

Consultant Company: Stantec

Contact information: Jeffrey Muir - (289) 208-5298

Assessment: Archaeological monitoring for borehole drilling

Size of Field Crew: 1 field supervisor

Parking and meeting location: See Figure 2. Meet and park at yellow star - along Bayview Ave and Mill St

Required PPE:

- Class 2 PPE (hi-viz vest)
- CSA Type 2 Hard Hat with foam insert (bump caps)
- CSA approved eye protection
- CSA approved 6" laced safety shoes
- CSA Hearing protection, in ear or over ear
- Appropriate clothing for weather conditions

Invitation to Participate in Fieldwork

Metrolinx would value the involvement of Chippewas of Rama First Nation in the upcoming archaeological monitoring fieldwork outlined above. Should your Nation wish to participate, please let us know at your earliest convenience. We welcome any requests for a meeting to discuss opportunities to participate or to explore this project in more detail with Chippewas of Rama First Nation. Upon receipt of Chippewas of Rama First Nation's interest in participating, Metrolinx will work to coordinate your Nation's involvement. Metrolinx is also willing to share fieldnotes and/or a summary of the borehole and geotechnical data in addition to the open invitation to participate directly in the monitoring.

Engagement

Regardless of whether or not your Nation participates in the fieldwork, Metrolinx will inform you of discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will also ensure that future Archaeological Assessment reports are provided to your Nation in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries.

If you require additional information or materials, or if you wish to discuss this project in more detail, please contact, Jaimi O'Hara, Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Thank you for your time and consideration.

Good afternoon Flavia, Peter and Paul,

Thank you for replying so quickly. I have arranged for liaison Curtis McCue to attend. If we can confirm protocols, timing and locations for the work this Friday it would be greatly appreciated. Curtis cannot be reached via email at this time, but I can send his number to Paul and Peter in a separate email for their contact purposes.

Thank you,

Hi Jordon,

I am Flavia, the project coordinator for the Ontario Line and will be assisting with the borehole drilling monitoring. I will send you the COVID-19 protocols shortly and also wanted to let you know that the archaeological monitoring work will be carried out by Stantec (Paul Ritchie) and Wood (Peter Popkin), that are cc'd in this email and contact info is presented below. The work is planned to occur from Jan 22 to Feb 10.

Peter Popkin

Hi Jordon,

We are pleased to hear that your team will be able to make it. I am connecting you with Flavia who is the project coordinator on the environmental side supporting this work. She will be able to get you in contact with the consultant archaeologist and keep you apprised of the field dates/times. She will also be able to advise about any new COVID protocols.

Let us know if you have any questions or concerns,

Thank you!

Jaimi

Good morning Fallon,

I hope your holidays were well. I have received permission from the COO to allow a liaison to attend and monitor in person. I am just working on arranging one now and should be able to notify you this afternoon with who will be attending.

If you could just provide any relevant new covid protocols that will be taking place during these work days so I can properly assure my liaisons of their safety and measures they may need to adhere to it would be greatly appreciated.

Thank you,

Subject: Ontario Line - Archaeological monitoring for Borehole Drilling

Dear Julie,

Please find attached a letter inviting participation in upcoming archaeological monitoring for borehole drilling that is taking place at various locations to support environmental assessment and geotechnical studies related to the Ontario Line Subway project. The boreholes are being drilled in locations that have known archaeological potential and as such Metrolinx is ensuring that a consultant archaeologist is on-site to monitor. We'd like to extend this invite to your Nation as well. We appreciate that during these uncertain times of COVID-19 this may not be possible or safe for your Nation. We are happy to provide any fieldnotes taken by the consultant archaeologist and/or provide a summary of the data collected if this is at all helpful to you. Please let us know if there is any other way we can support your Nation during this time.

The boreholes are anticipated to be completed over the next several weeks beginning this Friday on **January 22, 2021**. Please let me know if you have interest in participating as soon as possible, and we will work with you and the project team to coordinate.

Miigwetch,

Fallon

Subject: Liaison Contact information

Hello Peter and Paul,

I have arranged for Curtis McCue to attend the bore hole monitoring. He is best reached via his cell phone. Number is (705)931-9947.

Thank you,

Jordon MacArthur

Hey Fallon,

Apologies for missing the call. I did receive the voicemail. I am still hoping my liaison will be available for tomorrow, however some personal issues arose this week and he has yet to confirm his availability. At this moment I have not heard from Paul or my liaison. If I have no word from the liaison I had hoped to send by 4:30, Curve Lake will not be sending someone tomorrow, however are ok with the work proceeding.

During the current work from home orders, I can be reached on my work cell the number is (705) 957- 9549 if you need me at all.

Thank you as always for the continued work on ensuring we can attend fieldwork and I do sincerely apologize in case our liaison is unavailable as you and your team has put so much effort into getting the permissions to have him on site.

I will keep you posted.

Thank you,

Jordon MacArthur

Subject: Update on Ontario Line Borehole drilling - Corktown archaeological monitoring

Hi Jordon,

I wanted to confirm that the borehole drilling for tomorrow will be taking place at 271 Front Street East for the Ontario Line Project (as outlined in the letter sent to you on January 19th, 2021). Work did proceed today, however we were unable to have any monitors on site due to contractual issues with liability and waivers. This has now been resolved and we apologize for any inconvenience. We will ensure that this is not an issue again moving forward.

Paul Ritchie from Stantec will be reaching out to you shortly with the details and logistics for tomorrow's drilling and to confirm if you will be sending a monitor. Please do not hesitate to contact me if you need anything further.

Miigwetch,

Fallon Melander

Subject: Ontario Line – Addendum to Ontario Line South Stage 1 Archaeological Assessment
Date: Monday, February 8, 2021 2:49:18 PM
Attachments: [OLS-Stage 1 AA Addendum CLFN.pdf](#)

Dear Julie,

Please find attached, a letter outlining the need for an Addendum to the Ontario Line South Stage 1 Archaeological Assessment. This report was originally shared with your Nation in March 2020. We acknowledge that while the project lies outside your treaty territory you would like to be kept informed.

The report addendum and other attachments are available for review at our shared dropbox.

Please share any comments you may have by **February 24, 2021**.

If you have any questions or concerns, please feel free to reach out to me at any time. Thank you for your time and assistance.

Miigwetch!

Fallon

Delivered by email

Dear Dr. Kapyrka,

RE: Ontario Line Project - Ontario Line South Stage 1 Archaeological Assessment Addendum Report

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Curve Lake First Nation. Metrolinx appreciates and respects Curve Lake First Nation's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to inform Curve Lake First Nation of the addendum to the OLS Stage 1 Archaeological Assessment Report.

Background

As part of the Ontario Line Project, AECOM completed Stage 1 Archaeological Assessments (AA) for the three Ontario Line study areas - Ontario Line West, Ontario Line South and Ontario Line North - in 2020. The Stage 1 AA Reports, including the Ontario Line South (OLS) Stage 1 AA Report (PIF P438-0197-2019), were shared with Curve Lake First Nation in March 2020 for review and feedback. The reports were accepted into the Ministry of Heritage, Sport, Tourism, and Culture Industries (MHSTCI) Register on July 24, 2020. In September 2020, these reports were shared as part of the Draft Environmental Conditions Report and were subject to a 30-day public review period. The reports were subsequently shared as part of the Final Environmental Conditions Report published in November 2020.

Update on Archaeology: Ontario Line South Stage 1 Archaeological Assessment Addendum Report

The OLS Stage 1 AA Report prepared by AECOM reviewed the OLS study area to identify areas of archaeological potential. Following acceptance into the MHSTCI

Register, the project team discovered that archaeological potential in an area immediately west of the Don River and north of the existing Lakeshore East rail corridor bridge was mapped inconsistently with previously approved archaeological studies completed and accepted into the MHSTCI Register (see **Attachment 1**).

This area was previously assessed as part of the Lakeshore East Rail Corridor Expansion Stage 1 AA (AECOM 2016, PIF P088-0090-2016) which recommended further archaeological work for this location. This recommendation was then overturned in the Union Station Rail Corridor Enhancements Stage 1 AA (AECOM 2018, PIF P123-0332-2016), using previous research from the Stage 1 West Donlands Transit Environmental Assessment report (ASI 2008, PIF P057-449-2007) which stated that no further archaeological work was recommended due to the highly-disturbed nature of the area, where the land is comprised of artificial lake fill, or has been deeply disturbed by construction of the railway and previous commercial/industrial development. The Stage 1 West Donlands Transit Environmental Assessment report is enclosed for your reference (see **Attachment 2**).

As part of the OLS Stage 1 AA, the Lakeshore East Rail Corridor Expansion Stage 1 AA recommendation rather than the Union Station Rail Corridor Enhancements Stage 1 AA was followed. The most recent Project Information Form (PIF) and OLS Stage 1 AA Addendum Report rectifies the recommendation for this area to follow the recommendation of the Union Station Rail Corridor Enhancements Stage 1 AA, which stated that no further archaeological work was recommended. According to this report, the area is considered highly disturbed from previous activities occurring in the 20th century (i.e. dredging). Please note that there was no new work completed for the existing OLS Stage 1 AA Addendum Report and the PIF was requested only to rectify the mapping inconsistency.

The OLS Stage 1 AA Addendum Report has been prepared by AECOM as an update to the original report with clarifications in the report text and figures. The OLS Stage 1 AA Addendum Report states that no further work is recommended for the area in question (see **Attachment 3**).

As Metrolinx continues to undertake environmental due diligence for this project, additional archaeological assessment reports will be completed. Metrolinx acknowledges that Curve Lake First Nation should be aware of and engaged regarding any future archaeology, and especially the discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will ensure that future Archaeological Assessments are provided to Curve Lake First Nation in draft form, prior to submission to MHSTCI.

Invitation for Input

We are committed to an open, respectful, and transparent engagement with Curve Lake First Nation. We recognize the potential significance of this study area to Curve Lake First Nation, and as such wanted to keep you apprised of this development. We are happy to address any questions that Curve Lake First Nation may have about this Addendum to the OLS Stage 1 AA. If you require additional information or materials, or if you wish to discuss this project in more detail or set up an in-person meeting, please contact Fallon Melander, Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Metrolinx anticipates submitting the OLS Stage 1 AA Addendum to MHSTCI in late February 2021. If you have any comments or concerns, we ask that you please raise them no later February 24, 2021. Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*.

Yours Truly,

Maria Zintchenko

Dear Julie,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program.

Attached you will find a letter providing an update on the project. The purpose of this letter is to:

- Provide an update on the scope of the project work
- share the initial draft of the Early Works Report for the proposed Corktown Station
- Invite your Nation to participate in upcoming archaeological fieldwork

In an effort to streamline your review, we draw your attention to the attachment which provides an overview of the expected environmental impacts and proposed mitigations, as we know this may be of specific interest to you.

Metrolinx is also preparing a letter specific to works being planned within the Don Valley as we recognize the significance of this waterway to many Nations. We hope to share that letter soon. We are happy to meet with your Nation to discuss the Ontario Line and address any questions or concerns that your Nation may have.

We ask that any comments on the draft Corktown Station Early Works Report be provided no later than **April 15, 2021**. Please note that the Noise and Vibration Report, which will be part of the Early Works Report is still being prepared and we will share with your Nation by March 19, 2021.

We have uploaded the draft Early Works Report and a copy of this letter to the dropbox, which you will find under the Subways → Ontario Line → Corktown Station Early Works folder.

Please let us know as soon as possible if your Nation has interest in participating in future archaeological fieldwork.

We appreciate the volume of documents that Metrolinx has shared with your Nation.

If you have any questions or concerns, please do not hesitate to contact me.

Miigwetch,

Fallon

Subject: Ontario Line Project - Invitation to Meet & provide input on First Parliament Site
Date: Monday, April 12, 2021 3:51:21 PM
Attachments: [First Parliament_CLFN.pdf](#)

Dear Julie and Team,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. We recently communicated with your Nation about the proposed Corktown Station which is along the planned alignment of the Ontario Line. This location includes parcels of land which were once the site of Upper Canada's First Parliament buildings. Metrolinx and its partners are exploring opportunities to commemorate the history of this site, and have been engaging with various parties including the City of Toronto and the Mississaugas of the Credit First Nation, on whose treaty territory this project is occurring.

Given the significant chance of recovering Indigenous and European artifacts during the Corktown Station Early Works, a detailed archaeological workplan is being developed. Metrolinx recognizes the importance and value of Indigenous monitors for any archaeology related to the Ontario Line Project. In our previous communication, an invitation was included for your Nation to participate in any archaeological fieldwork and monitoring during the Corktown Station Early Works, including demolition of modern buildings currently on the First Parliament site.

This work is anticipated to commence in Fall 2021, and if you have not yet expressed interest in participating, please feel free to do so at your earliest convenience. As a reminder any comments on the draft Corktown Station Early Works Report should be provided no later than **April 15, 2021**.

Metrolinx recognizes that the history of this location extends beyond European use, and as such, wants to take the opportunity to understand any significance it may have to Indigenous Nations. Metrolinx would like to meet with your Nation to discuss the First Parliament site, its commemoration, as well as review the broader Ontario Line project if you wish. We recognize that traditional knowledge of this area may be sacred and/or not appropriate to be shared, but would appreciate any information that may be appropriate for Metrolinx to consider.

This letter is not intended to replace engagement but to provide a high level summary for your information. We suggest that this be the agenda item for the next monthly meeting, but are open to alternatives if that is your Nation's preference. I will also upload this to the dropbox for ease.

Please let me know if you have any questions or concerns. We appreciate the volume of documents that Metrolinx has shared with your Nation. If you have any questions or concerns, please do not hesitate to contact me.

Miigwetch,

Fallon

Curve Lake ON K0L1R1
Delivered by email

Dear Dr. Kapyrka,

RE: Ontario Line Project - First Parliament Site and Lime Kiln Site

Metrolinx, a regional transportation agency, is helping to transform the way the Greater Golden Horseshoe moves by building a fast, convenient and integrated transit network. As part of this work, Metrolinx is continuing the pre-construction planning of the Ontario Line which will bring nearly 16 kilometres of subway service to Toronto.

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Curve Lake First Nation. Metrolinx appreciates and respects Curve Lake First Nation's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to share with Curve Lake First Nation information regarding Corktown Station early works and additional information regarding upcoming field visits and investigations at the Corktown Station early works site, which includes two registered archaeological sites, the First Parliament site and the Lime Kiln site.

Project Description

The proposed Ontario Line is a new 16-kilometer subway line, which will occupy an exclusive right-of-way system encompassing a combination of below-grade, above-grade, and at-grade alignment. The route (Figure 1) will run from Ontario Place/Exhibition through downtown Toronto to the Ontario Science Centre in the City of Toronto, with six (6) potential interchange stations and 17 new connections to GO Transit, existing subways and streetcars. More information on the Project can be found on our website: www.metrolinx.com/ontarioline

Corktown Station Early Works

As communicated in the letter sent to Curve Lake First Nation on March 11, 2021, the Corktown Station site has been identified for launching tunnel excavation equipment for the downtown and Don Yard segments of the proposed Ontario Line alignment, as well as the location of the Corktown Station. The First Parliament and Lime Kiln Sites, located within the Corktown Station area, are known archaeological sites which require additional archaeological study ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures, followed by completion of necessary archaeological studies, is required. Completion of this preparatory work on an expedited basis is essential to allow for the timely delivery of the overall Project and is anticipated to begin in the Fall 2021, subject to the completion of the Corktown Station early works process in accordance with Ontario Regulation 341/20: Ontario Line Project.

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These activities will enable completion of environmental due diligence investigations, including archaeological assessments. These activities will occur on properties within the Corktown Station early works project footprint, as shown in **Figure 1**.

Figure 1: Map of Corktown Station Early Works

Environmental impacts of Corktown Station early works are being assessed in accordance with O. Reg. 341/20. Metrolinx shared the draft Corktown Station Early Works Report and associated discipline reports with Curve Lake First Nation on March 11, 2021 and had requested any comments to be provided by April 9, 2021.

Archaeological Work at the First Parliament Site and Lime Kiln Site

Metrolinx appreciates the significance of archaeology to Curve Lake First Nation. The properties at 265 Front Street East, 271 Front Street East, and 25 Berkeley Street, in the St. Lawrence neighbourhood of the City of Toronto, are collectively host to the First Parliament Site. It is located on the southwest corner of Parliament Street and King Street, between Parliament Street and Berkeley Street. The First Parliament Site is a registered archaeological site (AjGu-41) which may include resources associated with the First and Second Parliament Buildings, the Home District Gaol, and Consumers' Gas company buildings. The surface of the property is currently occupied by automotive businesses, including a car dealership, car wash, and surface parking lot. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and remnants of early Toronto industry may be found at this site.

North of the First Parliament Site is another registered archaeological site (AjGu-64), the Lime Kiln Site, which includes remains from the Toronto Lime Works Company. A variety of structural features, in various states of preservation, have been documented on this site. The location of the Lime Kiln Site and the First Parliament Site are shown in **Figure 2**.

Figure 2: Location of First Parliament Site and Lime Kiln Site Areas

The First Parliament Site and Lime Kiln Site require additional archaeological studies ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures is necessary. Completion of this preparatory work is essential to allow for the timely delivery of the Ontario Line.

Archaeological fieldwork to remove or protect archaeological resources is anticipated to commence in early Fall 2021, and a workplan for these archaeological investigations is under development. As mentioned in the letter sent on March 11, 2021, Curve Lake First Nation is invited to participate in all archaeological fieldwork, and to review and provide comments on forthcoming reports.

Feedback on Commemoration of First Parliament Site

Metrolinx appreciates that the history of the First Parliament site is not one simply of Canadian origin, but rather holds longer history and tradition. Metrolinx also appreciates that the site of the First Parliament of Upper Canada is linked to a history of colonization and harmful practices towards Indigenous Peoples. Given the significance of this site, Metrolinx is engaging with Indigenous Nations, City of Toronto and the broader community to identify opportunities for commemoration. Metrolinx is committed to ensuring that any feedback from Curve Lake First Nation regarding the significance of this site is considered as part of this commemoration. Metrolinx appreciates that traditional or cultural knowledge about this site may be sacred and/or not be appropriate to be shared but welcomes any comments or ideas from Curve Lake First Nation that may be appropriate to commemorate Indigenous Peoples.

Engagement

Metrolinx is committed to an open, respectful, and transparent relationship with Curve Lake First Nation. We would like to meet with Curve Lake First Nation to better understand any significance the First Parliament site may have to your Nation. We are also happy to assist in reviewing the Corktown Station Early Works Report or reviewing the proposed archaeological workplan for this site. If Curve Lake First Nation requires additional information or materials, or you wish to discuss this project in more detail or set up a meeting, please contact Fallon Melander, Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*. Thank you for your time in reviewing these assessments.

Thank you for your time in reviewing this letter.

Dear Julie & Team,

Metrolinx continues to progress its environmental studies for the Ontario Line Project. We wanted to keep you aware that part of the project scope falls within the Don Valley and River System, and we recognize the importance of Valley and the waters within. Attached you will find a letter providing an update on the project and information regarding the planned work and environmental assessments that are anticipated to take place within the Don Valley. I will upload this letter to the shared dropbox for your convenience. We also wanted to invite your Nation to participate in the planned Stage 2 Archaeological Assessments that are anticipated to occur as part of the upcoming field season.

This letter is not intended to replace engagement but to provide a high level summary for your information. We would very much appreciate meeting with your Nation to discuss in more detail. Please let me know if you have any questions or concerns.

Delivered by email

Dear Dr. Kapyrka,

RE: Ontario Line Project - Don River Crossings & Stage 2 Archaeological Assessment Update

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Curve Lake First Nation. Metrolinx appreciates and respects Curve Lake First Nation's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to provide more information to Curve Lake First Nation about the Ontario Line crossings of the Don River and its tributaries. Metrolinx appreciates the significance of the waters and wishes to better understand how the potential impacts of construction around the Don River may be of interest to Curve Lake First Nation.

Background

The Project is a new subway line with connections to Line 1 (Yonge-University) subway service at Osgoode and Queen Stations, Line 2 (Bloor-Danforth) subway service at Pape Station, and Line 5 (Eglinton Crosstown) service at the future Science Centre Station. Fifteen stations are proposed, with additional connections to three GO Transit lines (Lakeshore East, Lakeshore West and Stouffville), and the Queen, King, Bathurst, Spadina, Harbourfront and Gerrard/Carlton streetcar routes. The Project will reduce crowding on Line 1 and provide connections to new high-order rapid transit neighbourhoods. More information on the Project can be found on our website: <http://www.metrolinx.com/ontarioline>.

Work in the Don River System

As part of the Ontario Line Project, the following four crossings within the Don River system are proposed:

- Location 1: Lower Don River Crossing (Lower Don Bridge);
- Location 2: Millwood Road Crossing;
- Location 3: Walmsley Brook Crossing; and
- Location 4: West Don River Crossing north of Overlea Boulevard.

Locations 1-4 are shown in **Figure 1** and described in further detail below.

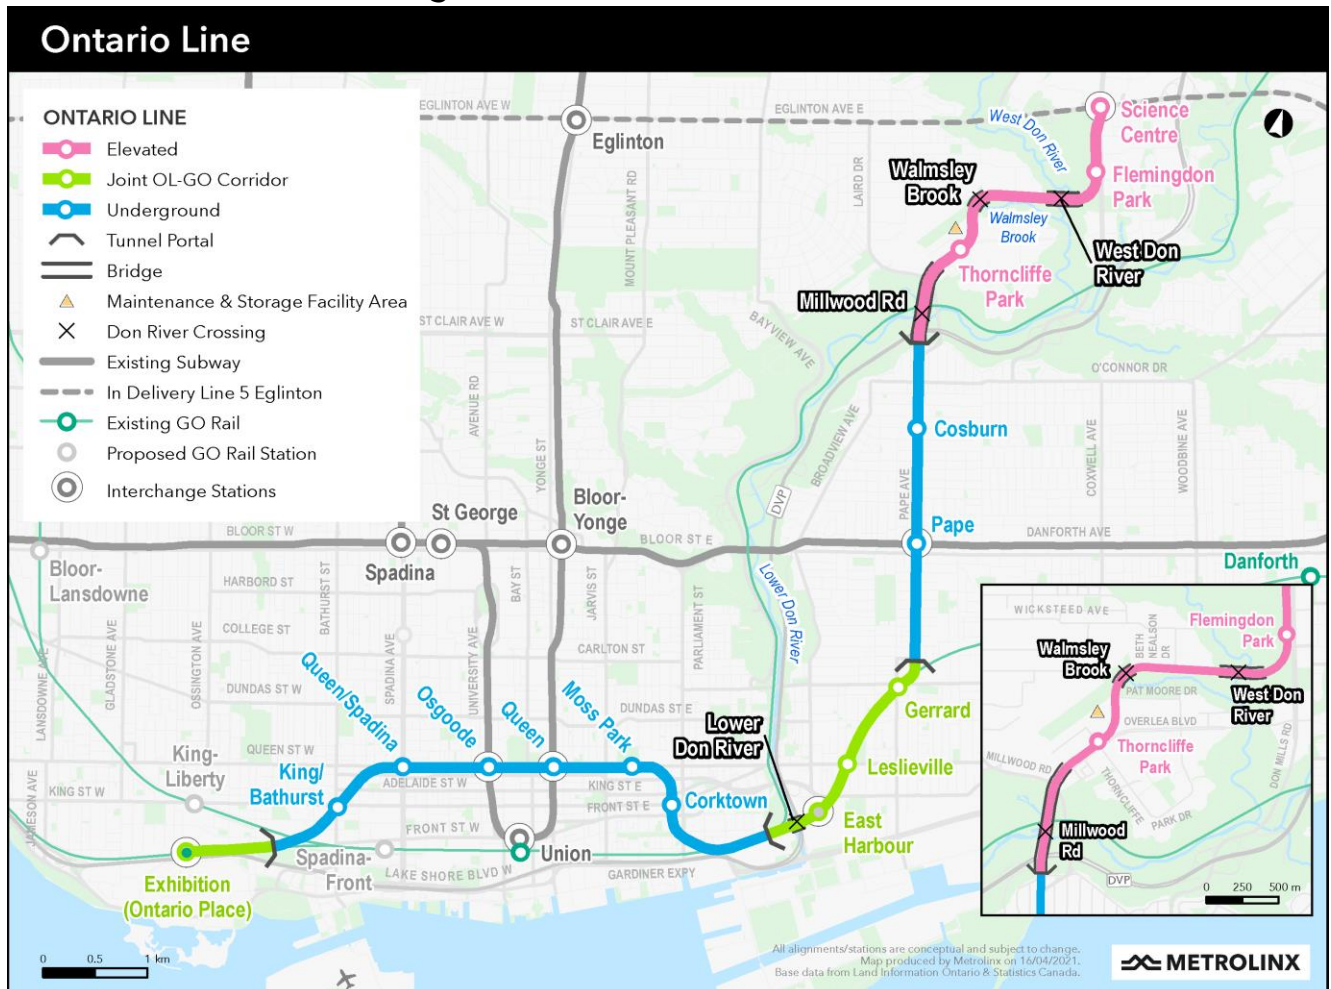

Figure 1: Ontario Line Project - Proposed Don River System Crossings

The environmental assessment for the Ontario Line Project is being completed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20) made under the *Environmental Assessment Act*. Construction of the Lower Don Crossing (Location 1) will be assessed in the Lower Don Bridges and Don Yard Early Works Report, that is anticipated to be shared with Curve Lake First Nation in summer 2021. Construction of the other three crossings (Locations 2-4) will be assessed in the Environmental Impact Assessment Report, that is planned to be shared with Curve Lake First Nation in early 2022.

Location 1: Lower Don River Crossing (Lower Don Bridge)

A new bridge is planned to be built on the north side of the existing Lakeshore East rail bridge at the Lower Don River, with space for Ontario Line tracks going in both directions. We are also planning pedestrian and cycling connections across the Lower Don River.

Location 2: Millwood Road Crossing

The underground section of the Ontario Line running under Pape Avenue will emerge from the southern embankment of the Don Valley on an elevated guideway crossing the Don River, west of the Leaside Bridge (Millwood Road). The elevated guideway will connect to Thorncliffe Park in the north.

Location 3: Walmsley Brook Crossing

An elevated guideway will cross the Walmsley Brook tributary of the West Don River north of Pat Moore Drive. The guideway will then continue east across Beth Neilson Drive.

Location 4: West Don River Crossing (north of Overlea Boulevard)

The elevated guideway will cross the West Don River, north of Overlea Boulevard. This section of the route will connect to Don Mills Road and the future Flemingdon Park Station.

Field Surveys and Studies

As project planning is still in progress, environmental field surveys and studies as well as the timing of this work are being determined. Environmental field surveys and studies that may occur within or near the Don River include Stage 2 archaeological assessment and natural environment surveys (e.g., Species at Risk and tree surveys). Studies, surveys and their timing will be confirmed as project planning progresses. Further details are anticipated to be available in mid-Summer 2021.

Update on Archaeology

Metrolinx is currently planning to undertake Stage 2 Archaeological Assessments (AA) near the Don River starting in Fall 2021. The Stage 2 AA investigations will assess areas of identified archaeological potential within the Ontario Line study area which may be affected by the construction of the Project. Stage 2 AA fieldwork consists of test pit surveys at 5 m intervals within areas of previously identified archaeological potential.

Metrolinx would appreciate any interest Curve Lake First Nation may have in participating in the Stage 2 AA fieldwork. Some of the Stage 2 AA may occur on lands

within the Toronto and Region Conservation Authority's (TRCA) property boundaries and regulated area. Metrolinx will coordinate with TRCA to ensure that Indigenous Nations are provided the opportunity to participate in Stage 2 AA investigations. Upon receipt of Curve Lake First Nation's interest in participating, Metrolinx will work to coordinate your Nation's involvement.

As Metrolinx continues to undertake environmental due diligence for this project, additional archaeological assessment reports are anticipated to be completed. Metrolinx will ensure that Curve Lake First Nation will be made aware of and engaged regarding any future archaeological assessments, and especially the discovery and preservation of Indigenous artifacts. Metrolinx will also ensure that future archaeological assessments are provided to Curve Lake First Nation in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries

Invitation for Input

We are committed to an open, respectful, and transparent engagement with Curve Lake First Nation. We recognize the potential significance of this project to Curve Lake First Nation and wanted to keep you apprised of this project. We welcome meeting in the near future to discuss this project and its possible impacts and ways to appropriately engage with Curve Lake First Nation.

We are happy to address any questions that Curve Lake First Nation may have about the work proposed in the Don River system or the Ontario Line Project as a whole. If you require additional information or materials, or if you wish to discuss this Project in more detail or set up an in-person meeting, please contact Fallon Melander, Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Metrolinx thanks you for the time in reviewing this letter. Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*.

Yours Truly,

Dear Dr. Kapyrka,

Please find attached a letter inviting participation in upcoming archaeological monitoring for borehole drilling that is taking place next week at 256 Front Street in Toronto to support environmental assessment and geotechnical studies related to the Ontario Line Subway project. The boreholes are being drilled in locations that have known archaeological potential and as such Metrolinx is ensuring that a consultant archaeologist is on-site to monitor. If you are not able to attend, we are happy to provide any fieldnotes taken by the consultant archaeologist and/or provide a summary of the data collected if this is at all helpful to you.

The boreholes are anticipated to be completed between July 12 and July 16, 2021. Please let me know as soon as possible if you have interest in participating, and we will work with you and the project team to coordinate. And just a final note for your information, both Fallon Melander and Jaimi O'Hara, who are usually Metrolinx's main point of contact with your Nation, are away from the office this week. Hence you are receiving this communication from me.

Miigwetch,

Make today great,

Christine Parris (she, her, hers)

Dear Dr. Kapyrka,

RE: Ontario Line Project - Archaeological Monitoring for Borehole Drilling - 265 Front St East

Metrolinx and its consultants, Stantec and Wood, will be undertaking geotechnical and environmental site assessment investigations at 265 Front St East. As part of this work boreholes will be drilled at the property. These boreholes will be located on/near potential archaeological sites and an archaeologist will be on site to monitor the drilling activities. We are writing to invite Curve Lake First Nation to participate in the archaeological monitoring associated with this work. If preferable, Metrolinx is happy to share any fieldnotes taken by the consultant archaeologist as well as a summary of the borehole and geotechnical study data for review.

The fieldwork is anticipated to be conducted between July 12th and July 16th, 2021. Fieldwork dates may change based on obtaining contracts and agreements.

Invitation to Participate in Fieldwork

Metrolinx would appreciate any interest Curve Lake First Nation may have in participating in the archaeological monitoring fieldwork. The attached maps illustrate the location of the boreholes that will be drilled. Upon receipt of Curve Lake First Nation interest in participating, Metrolinx will work to coordinate your Nation's involvement.

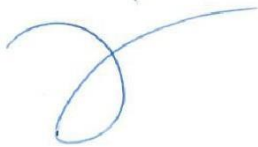

Engagement

Regardless of whether or not your Nation participates in the fieldwork, Metrolinx will inform you of discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will also ensure that future Archaeological Assessment reports are provided to your community in draft form, prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries.

If your Nation wishes to participate in the fieldwork, or if you'd prefer to receive fieldnotes and/or a summary of the borehole and geotechnical data, please let us know at your earliest convenience. If you require additional information or materials, or if you wish to discuss this project in more detail or set up an in-person meeting, please contact, Indigenous Relations at Metrolinx. We can be contacted at IndigenousRelations@metrolinx.com.

Thank you for your time and consideration.

Yours Truly,

- Legend
- Proposed Geotechnical Monitoring Well
 - Proposed Monitoring Well Location (Intrusive Ground Disturbance)
 - Access Route
 - Geotechnical Borehole By Wood - Estimated Duration: 10 - 15 Days
 - Monitoring Wells Installed By Stantec - Estimated Duration: 1 Day
 - Property Boundary
 - Property Line

Work Details

1 - Work zone will occupy approximately 4 parking spots (11 m x 5 m) for the duration of the drilling activities

2 - MW1 and MW2 by Stantec can be completed in 1 day.

3 - Borehole OL-05014 by Wood will take 10 to 15 days to be completed.

4 - Work zone around OL-05014 will be fenced during drilling activities.

Proposed Schedule:

10 to 15 days of drilling activities from start of program

- Notes**
1. Coordinate System: NAD27 MTM zone 10
 2. Base features produced under license with the Ontario Ministry of Natural Resources and Forestry © Queen's Printer for Ontario, 2020.
 3. Contains Information licensed under the Open Government Licence Ontario.

Good evening Christine,

Unfortunately at this point there are no free liaisons, and I cannot guarantee when one will become available as they are all on long term projects. If it would be possible to be kept apprised of any finds should sites be encountered, it would be greatly appreciated.

Should a liaison become available before the completion of this fieldwork, I will notify you immediately to send them out.

Thank you,

Jordon MacArthur

Good day Julie and team-

I hope this message finds you well. Just sending a quick note to follow up on the attached invitation for participation.

Please let me know if you have interest in participating as soon as possible, and we will work with you, the project team and HDR to coordinate.

Subject: UPDATED RE: Invitation for Participation – Ontario Line Project - Archaeological Assessments and Natural Environment Surveys

Dear Julie and Team,

Our deepest apologies, disregard the previous email, there was a last minute change to the letter-**please refer to the updated letter (attached).**

Metrolinx is working with its consultant HDR to provide opportunities for participation in upcoming Archaeological Assessment and Natural Environment fieldwork associated with the Ontario Line. Please find attached a letter inviting your Nation to participate.

The fieldwork is anticipated to late August - early September 2021. Please let me know if you have interest in participating as soon as possible, and we will work with you, the project team and HDR to coordinate.

If you have any questions or concerns, please feel free to contact the Indigenous Relations Office at anytime.

Dear Dr. Kapyrka,

RE: Ontario Line Project - Stage 1 Archaeological Assessment and Natural Environment Technical Report for Review.

Metrolinx wishes to build a strong and meaningful relationship with Curve Lake First Nation. Metrolinx appreciates and respects Curve Lake First Nation's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to share with you the development of the Stage 1 Archaeological Assessment (Stage 1 AA) and Natural Environment Technical Report (NETR) for the Ontario Line project.

The Ontario Line project is a 15.6-kilometer subway line that includes:

- 15 proposed stations
- connections to 3 GO Transit lines and
- connections to the existing TTC Subways:
 - Line 1 (Yonge-University) subway service at Osgoode and Queen Stations
 - Line 2 (Bloor-Danforth) subway service at Pape Station
 - Line 5 (Eglinton Crosstown) light rail transit service at the future Science Centre Station

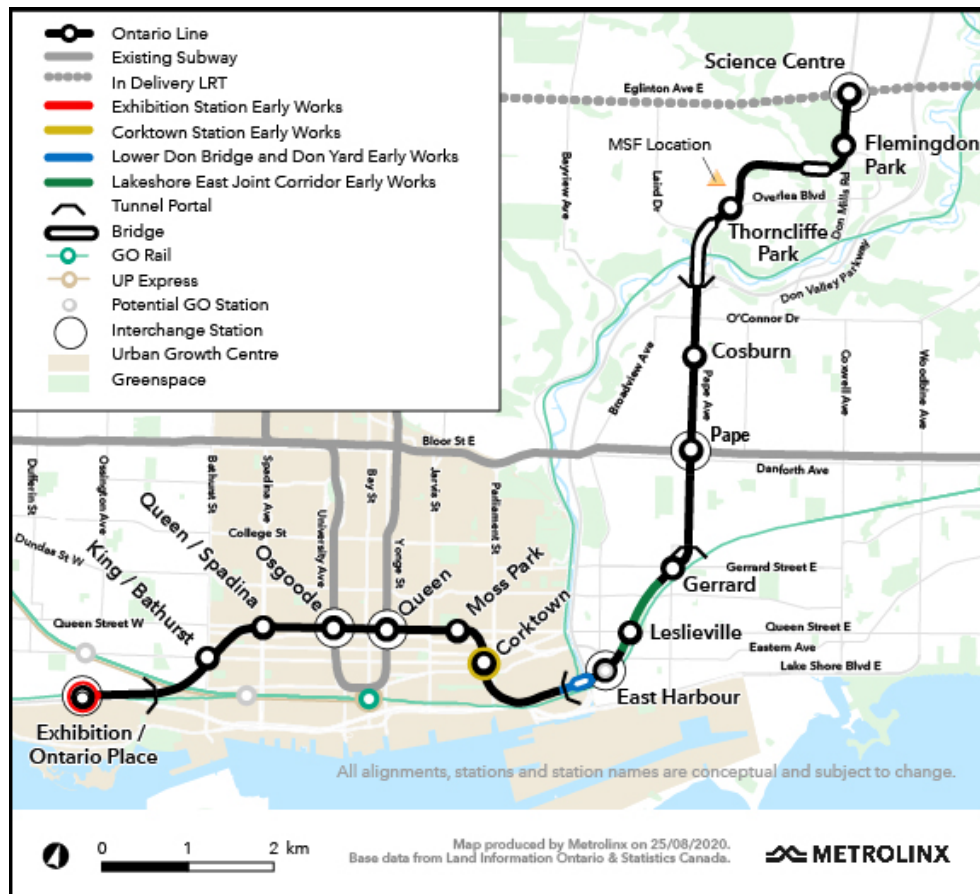

Figure 1 - Ontario Line Project

Update on Archaeology

Metrolinx completed the *Ontario Line Stage 1 Archaeological Assessments (North, South and West)* last year and shared the report with Curve Lake First Nation for review and feedback in March 2020. The Ontario Line Stage 1 Archaeological Assessments (North, South and West) was completed as part of the *Ontario Line Final Environmental Conditions Report (ECR)*.

As the Ontario Line Project advances, Metrolinx is developing the Environmental Impact Assessment Report (EIAR) in accordance with Ontario Regulation 341/20. As part of the EIAR, Metrolinx completed a Stage 1AA and the report is attached for Curve Lake First Nation review. The purpose of this Stage 1 AA is to assess the updates in the current project footprint that were not included in the previous archeological studies completed in 2020. The report concludes that parts of the study area have been identified as

possessing archaeological potential and for these parts a Stage 2 archaeological assessment is recommended.

As Metrolinx continues to undertake environmental due diligence for this project, additional archaeological assessment reports will be completed. Metrolinx acknowledges that Curve Lake First Nation should be aware of and engaged regarding any future archaeology, and especially the discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will ensure that future Archaeological Assessments are provided to Curve Lake First Nation in draft form, prior to submission to MHSTCI.

Natural Environment Technical Report (NETR)

The Natural Environment Technical Report that is being developed by Metrolinx as part of the Environmental Impact Assessment Report (EIAR) is attached for your review. The purpose of the NETR is to assess the potential impacts on the natural heritage features and systems found within or on adjacent lands associated with the construction and the operation of the Ontario Line Project. The existing conditions in the Ontario Line study area are based on the available background natural environment information and supporting field studies. Project construction and operation is assessed with respect to their potential to impact the features document to be in the area. Mitigation and monitoring measure for the impacts is provided for both construction activities as well as the long-term operation of the infrastructure and its periodic maintenance. As Metrolinx continues to undertake environmental due diligence for this project, additional natural environment assessments will be completed. We will keep Curve Lake First Nation updated as the natural environment studies progresses.

Invitation for Input

We are committed to an open, respectful, and transparent engagement with Curve Lake First Nation. Metrolinx values any input that Curve Lake First Nation is willing to provide on the current Stage 1 AA and NETR and we are happy to address any questions that you may have regarding these reports.

If you require additional information or materials, or if you wish to discuss this project in more detail or set up a meeting, please contact Jaimi O'Hara, Acting Manager, Indigenous Relations at Metrolinx. She can be contacted at IndigenousRelations@metrolinx.com.

Should you wish to provide input to the above questions, please submit your feedback in writing by **September 30, 2021**. Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*.

Yours Truly,

Dear Julie and Team,

Please find attached, a letter outlining the draft Marine Archeological Overview Assessment for the Ontario Line – Lower Don Bridge Project.

We appreciate that you have informed us this project lies outside of your territory, but still have an interest in being informed. To that end, the report has been uploaded to our shared dropbox and is available for at the following link:

Please let us know if you would like a meeting to review the project with our environmental teams. Please share any comments you may have by **November 19, 2021**.

If you have any questions or concerns, please feel free to reach out to me at any time.

Thank you for your time and assistance.

Dear Dr. Kapyrka,

RE: Ontario Line Project - Lower Don Bridge Marine Archaeological Overview Assessment for Review

Metrolinx wishes to build a strong and respectful relationship with Curve Lake First Nation. Metrolinx appreciates and respects Curve Lake First Nation's desire to be appropriately informed and aware of projects. Metrolinx wishes to share with you the development of the Marine Archaeological Overview Assessment (MAOA) report for the proposed construction of the Lower Don Valley Bridge over the Don River. This proposed bridge is a component of the Ontario Line Project as part of the Lower Don Bridge and Don Yard Early Works. We invite Curve Lake First Nation's feedback on the marine Archeological Overview Assessment prepared for the Ontario Line Project.

Project Description
