31.1 Vendor Performance Management (VPM) Program means Metrolinx policy for monitoring, evaluating and recording vendor performance, as same may be amended or replaced from time to time. The Vendor Performance Management Program establishes a standard methodology for the incorporation of a vendor's past performance as a criterion in assessing that vendor's bids or tenders for future work with Metrolinx.

31.2 Pursuant to Metrolinx's VPM Program, Metrolinx may consider a Bidder's past performance under contracts with Metrolinx in evaluating Submissions received in response to this Tender Document. The Vendor Performance Rating ("VPR") is the average of a vendor's performance evaluation scores (as assessed by or on behalf of Metrolinx) for a thirty-six (36) month period preceding the Closing. If a Bidder has not completed any work for Metrolinx in the three (3) years preceding the Closing, for the purpose of evaluating the Submission, the Bidder will be

assigned a VPR which is the straight average of all the VPR's of all vendors who have performed services for Metrolinx during the prior fiscal year.

- 31.3 If the VPR is being applied as a component of the "Tender Submission Evaluation" for this Tender Process, the legal name of the Bidder stated in "Tender Document Form: Form of Tender" will be used. It is the responsibility of the Bidder to ensure that its proper legal name has been stated in "Tender Document Form: Form of Tender". Metrolinx will not accept any requests from the Bidder to change the legal name provided after the Closing.
- 31.4 In case of a Joint Venture where multiple parties will sign the Contract, the VPR of each participant will be added and the average will be applied.
- 31.5 For the purposes of this Tender Process, the application of the VPR is set out in "Contract Performance Appraisal" of "Attachments".

This level of service applies to hard-surfaced driveway and parking areas with heavy pedestrian and vehicle traffic volumes at the Place of Work and the need to ensure 24 hour accessibility.
- 2.2 The Vendor shall be at the Place of Work within 2 hours of snow accumulation and all snow or ice shall be cleared to bare pavement level and pre-wetted salt be applied within four (4) hours of Snowfall or the accumulation of 2.5 cm (1 inch) of snow or ice (seven (7) days per week). This requirement is not solely dependent on Metrolinx services. At any time during this Contract not only may services be increased or decreased, but the facility may also be used outside of service operating hours/days at Metrolinx's discretion.
- 2.3 The Vendor shall clear snow and salt/de-ice all areas listed under "Scope of Work: Location and Hours of Work", and be completed at least 30 minutes prior to the start of daily bus and train service, to allow clear and safe access without prior notification from Metrolinx.

1.0 General Requirements

1.1 Overview

- (a) The Vendor must supply sufficient equipment, labour and material necessary to completely clear ice and snow and to salt the parking lots, roadways, walkways, entrances/exits at doorways, and bus roadways and platforms in accordance with the requirements of the “Scope of Work” and the “General Conditions of the Contract” from the commencement of the Work at the Place of Work by the Vendor and prior to the commencement of bus and rail service. (Refer to attached colour coded site drawing, which is provided as a tool for the Vendor to understand Metrolinx property limits and areas included in this Contract.)
- (b) The Vendor shall maintain all affected areas noted under “Scope of Work: Locations and Hours of Work” in bare pavement condition. This includes all services and salting required to remove ice patches that might occur as a consequence of melting snow and freezing, snow accumulations which might develop from blowing snow, freezing rain, etc.

1.2 Gravel Parking Areas

- (a) The requirements of Section 1.1 do not apply to gravel parking areas.
 - (i) The Vendor will plow snow, following each Snowfall in excess of 5 cm (2 inches) as per the requirements of Section 4 (Schedule).
 - (ii) When a Snowfall of less than 5 cm (2 inches) occurs:
 - (A) if the surface is firm, the Vendor shall plow the snow;
 - (B) if the surface is soft and Plowing snow will damage the surface, the Vendor will apply a sand/salt mixture to control snow and ice conditions.
- (b) The Vendor will apply a sand/salt mixture to the gravel pavement parking lot after each time it is plowed and as required to control snow and ice conditions. The sand/salt mixture used shall be 85% sand and 15% salt and shall be applied as per Section 3.0 herein.

1.3 The Vendor must be prepared, should the need arise, to clear all locations at the Place of Work while operational, to permit the safe exiting/entering of vehicles

and pedestrians who require access to GO service from these locations. In doing so, the Vendor must exercise extreme caution while operating snow removal vehicles and equipment.

- 1.4 The Vendor must perform the Work in a manner which ensures that operations at the Place of Work can be maintained with minimal disruption.

 - 1.6 The Vendor is responsible to thoroughly review site conditions, prior to the start of each Year of the Contract and to prepare a report, including digital photographs, of any property damage, which might be contentious and somehow attributable to the Work performed by the Vendor, including but not limited to, damage to curbs, catch basins and other maintenance covers, trees, grass/lawn areas, signs/posts, light poles, fences and furnishings (bike racks, benches, fare equipment shelters, display boards, etc.). If any “snow removal related” damage is noticed, the Vendor must make Metrolinx aware of this prior to the commencement of the season, otherwise the Vendor might be held liable for the repairs.
 - 1.7 The Vendor shall service multiple locations simultaneously and with separate equipment, material and employees.
 - 1.8 All work must be completed in compliance with Laws as stated under General Conditions, Section 3.1, Covenants of the Vendor. This includes Noise By-laws. - 1.17 All damages caused by the Vendor are to be reviewed jointly with Metrolinx staff at or near the end of each Year. This review process is intended to list and resolve any and all issues in an amicable, professional and prompt manner. When it is determined based on the report submitted at the beginning of the Year that damage has been caused to Metrolinx property or assets, due to the nature of, or directly related to the snow and ice control services provided by the Vendor, the Vendor must complete all repairs by the timelines indicated in "Scope of Work: Service Level Requirements".

- 2.2 There is a limited area for piling snow at the Place of Work for each location. Recent experience has shown that snow had to be removed from these locations by the Vendor, and at the Vendor's cost, when the location received more than 2"-4" of snow within a 24 hour period. This estimate does not consider pre-existing piled snow which may necessitate all new snow being removed.
- 2.3 If damage is caused to "green areas" (inclusive of grass, garden beds, trees etc.), due to the application of salt or equipment operating on these stated areas, the Vendor is expected to repair same damaged areas; but no later than May 31 of each Year.
- 2.4 Under no circumstances are snow pile areas to occupy parking spaces, walkways, bus roadways and any other pavement areas intended for Metrolinx or public use.
- 2.5 The Vendor shall be required for the Removal and delivery to the identified snow storage facility when the snow mounds exceed acceptable levels, as reasonably determined by Metrolinx. Such conditions include, but are not limited to: snow mounds which cover parking spots required for use by patrons, impede safe vehicle/pedestrian traffic and access, block sightlines or traffic control signage, pose an environmental or safety concern.

3.0 Preventative Materials and Measures

- 3.1 Salt boxes will be provided by Metrolinx and made available for pick-up by the Vendor by November 1st of each year.
 - 3.2 The Vendor will be directed by Metrolinx staff to place these salt boxes at strategic locations, near station buildings or at main pedestrian access points.
 - 3.3 The Vendor is responsible to keep ample rock salt inside these boxes, throughout the snow and ice maintenance season.
 - 3.4 These boxes are intended to be used by designated Metrolinx employees when the Vendor is not at the Place of Work and icy patches develop or when snow covered walkways are noticed, but only under exceptional circumstances.
 - 3.5 Metrolinx staff involvement in icing areas, does not relieve the Vendor of any liability issue related to snow and ice control services and does not relieve the Vendor from its contractual obligations.

3.6 Applications of De-icers

- (a) Metrolinx requires the application of either pre-wet rock salt or Direct Liquid Application (application of salt brine directly to the pavement) to all parking lot areas between snow removal services or after the completion of snow removal services. The Vendor must be able to respond for the application of either product. Though DLA is required by Metrolinx, the Vendor must use an infrared thermometer calibrated for asphalt to ensure asphalt temperature is negative seven (-7) degrees centigrade or greater. The amount of DLA used must be reported on the "Vendors Winter Maintenance Work Report".
- (b) When snow removal is required at the Place of Work during A.M. or P.M. commuter hours, priority shall be given to Clearing snow as follows:
 - (i) When more than 2.5 cm (1 inch) is expected to fall within the hour preceding the commuter service period, snow and ice clearing and the application of pre-wetted salt shall continue using extreme caution to ensure public safety. The Vendor must not obstruct or delay commuter and vehicular traffic at these locations, resulting from snow clearing and ice control services.
- (c) Metrolinx reserves the right to establish and modify the service and work site operating schedules. Modifications may include the addition/deletion of operating hours or days; and/or the length per day of operating hours. The Vendor shall adjust his schedule accordingly upon receipt of notification by Metrolinx, ten (10) days in advance, with no additional cost to Metrolinx.
- (d) When possible, depending on the timing of the precipitations and lowering temperature, all snow removal and ice control services must be completed at least 30 minutes prior to the start of daily bus and train service. When this is not possible, due to late precipitation falling near station peak periods, the Vendor must focus its attention first on servicing walkways, barrier free parking spaces, barrier free curbs (drop curbs), emergency access routes, main roadway arteries and Kiss & Rides. Then return to the park and rides, after the peak operating period, to complete the snow and ice control service.

3.7 De-Icers

- (i) All salt brine will be supplied and delivered by the Vendor and guaranteed to be available when needed. The Vendor shall also be responsible for the application of the salt brine at the Place of Work.
 - (ii) The brine is to be stored at the Vendor's site.
 - (iii) DLA should be applied prior to the accumulation of frost, snow or ice, followed by Plowing and/or spreading operations where weather and/or pavement conditions warrant. Once applied it may be effective for a period of up to three days if not removed by weather. When required it must be applied to 100% of the surface area.
 - (iv) DLA material is to be applied at the rate of 2.28 to 3.5 litres per 100 square meters when snow or freezing rain is anticipated and at a rate of 1.71 to 2.28 litres per 100 square meters when frost is anticipated.
 - (v) DLA for frost shall not be completed if any of the following criteria are expected.
 - (A) Pavement temperatures are expected to remain above 2 degrees centigrade continuously for the next 72 hours.
 - (B) Pavement temperature is lower than -7 degrees centigrade during the application.
 - (C) Pavement temperature is expected to fall below -15 degrees centigrade at any time within the next 24 hours.
 - (D) Non-freezing rain is forecast in the next 24 hours .
 - (E) Snow or ice has already accumulated on the pavement surface.
 - (vi) The DLA in anticipation of snow and/or freezing rain shall be completed as close to the beginning of the precipitation as possible to a maximum of eight (8) hours.
 - (vii) The DLA in anticipation of snow and/or freezing rain shall not be applied if:
 - (A) The pavement temperature is lower than -7 degrees centigrade or is expected to be below -7degrees centigrade between the time of application and the start of precipitation.

- (B) Snow and/or ice has already accumulated on the pavement surface .
 - (b) Pre-Wet Salting
 - (i) Salt shall be spread as required to maintain bare pavement conditions, being mindful of the adverse environmental effects of over-salting.
 - (ii) Any excess accumulation or accidentally dumped salt must be immediately removed by the Vendor and swept up at the Vendor's expense. Metrolinx will determine excess accumulation or application of salt and will request the Vendor to clean up excess salt.
 - (iii) The actual amount (e.g. # of tons) of salt and DLA applied at the Place of Work must be recorded on the Vendor Winter Maintenance Work Report for each service provided. Metrolinx may allow the use of sand in exceptional circumstances, if allowed by Metrolinx. The quantity of sand (e.g. # of tons) must be recorded in the same fashion as salt.

4.0 Changes in the Scope of Work

4.1 The Scope of Work as shown on the Snow Removal Plan under Attachments may be revised during the Contract. Revisions may be necessary to increase or decrease the Scope of Work to include expanding or reducing the work site as well as including a new area (for example, a new parking area) proximate to the work site.

- (a) Using the following formula, the contract will be amended as follows:
 - (i) The applicable Year "Subtotal" found under Contract Prices of Articles of Agreement, (excluding taxes), for the affected Location will be divided by the original total number of square meters of the affected Location under this Contract, to determine a per square meter unit price for this service. This price will then be multiplied by the revised total number of square meters to determine the amended Total Contract Price. This will apply to each remaining period of the Contract, as and if required, to determine the amended Total Contract Price.

- 4.2 Should the change in Scope of Work, due to construction (expanding or reducing the Scope of Work), impede the Vendor's ability to pile snow at this location, Metrolinx will not incur additional costs for this as the Contract clearly specifies that the Client (Metrolinx) may at any time request for snow to be removed from our site.
- 4.3 Should the change in Scope of Work, due to construction (expanding Scope of Work) result in the construction of a gravel parking lot, the Vendor is to use the formula specified above.
- 4.4 Metrolinx may increase, change location, or decrease the number or type of furnishings, signs and posts in the Work area. These include, but are not limited to, directional, prohibitive (accessible parking, no parking, no entry, scooter parking) and reserved parking signage. For *example*, Metrolinx maintains a reserved parking program, which allows customers to pay for their own reserved parking spot. Each one of these spots may contain a signpost. During the course of this Contract it may be necessary to increase the number of preferred parking signposts at this location. Metrolinx will not incur additional cost for this initiative.

5.0 Monitoring and Record Keeping

- 5.1 Good record keeping is essential for minimizing contractor liability and for optimizing winter maintenance practices. By monitoring the effectiveness of different materials and application rates in relation to pavement and weather conditions, areas for improvement can be identified. Tracking salt use also allows the Contractor's progress in the implementation of BMPs to be more accurately assessed.
 - 5.2 The Contractor shall keep and maintain detailed records to track the times service was delivered and upon request, provide this detailed information to the Contract Administrator. It is advised/required that Contractors deploy GPS technology in conjunction with electronic spreader controllers to provide this tracking.
 - 5.3 Monitoring and record keeping must include the following in the Winter Maintenance Report:
