This email did not originate from Canadian Pacific. Please exercise caution with any links or attachments.

Good Afternoon Paul,

As you may have recently discussed with George Papafotis and Jonathan Wilder from Metrolinx, we are providing you draft technical reports for the Scarborough Subway Extension (SSE) Environmental Project Report (EPR) Addendum. Below you will find links to the following reports for your review and comments. Please use the links below to download the associated report and comment sheet.

Draft Natural Environment Report: <a href="https://we.tl/t-oVUcgwaY57">https://we.tl/t-oVUcgwaY57</a>

Draft Cultural Heritage Assessment Report: <a href="https://we.tl/t-iEbmc3mM29">https://we.tl/t-iEbmc3mM29</a>

Draft Traffic Impacts Memo: <a href="https://we.tl/t-tBMxLLBkMJ">https://we.tl/t-tBMxLLBkMJ</a>

Draft Air Quality Assessment Report: <a href="https://we.tl/t-1hvnDuyX4c">https://we.tl/t-1hvnDuyX4c</a>

Please be advised that we plan to send you the Draft Noise and Vibration Assessment Report and the Draft EPR Addendum Report for your review and comment between February 3rd-10th and February 10th respectively. We would greatly appreciate your review and submission of comments for the Draft Natural Environment Report, Draft Cultural Heritage Assessment Report, Draft Traffic Impacts Memo, Draft Air Quality Assessment Report, Draft Noise and Vibration Assessment Report,

and Draft EPR Addendum Report by February 28, 2020.

Sincerely,

#### **Laura Witherow**

Good Morning Paul,

I've attached two figures that should be able to assist you in your review. The page from Alignment Q provides the horizontal and vertical alignment of the section North of Nugget whereas the other figure provides an overview of the potential project footprint for this same area.

Please let me know if you have any questions or concerns. Thanks!

Hello Laura,

I have had a cursory look at each of the 4 reports. I do not see any conceptual design information for temporary or permanent works in the vicinity of CP (north of Nugget Ave). I will need this in order to provide meaningful comments. Can you please provide this.

image004.png image005.png

#### Good Morning Michael,

Thank you for interest in the SSE EPR Addendum, and for providing insight and material for consideration for the EPR.

Please note that costs or an assessment of economic impacts are not typically included in an EPR. Metrolinx released a Preliminary Design Business Case (PDBC) for the Project on February 28, 2020, which provides an analysis and rationale for Project investment. The Economic benefits and Economic case are presented in Sections 4 and 5, respectively. You can find the SSE PDBC online at the following link:

http://www.metrolinx.com/en/regionalplanning/projectevaluation/benefitscases/2019-02-28 SSE Preliminary Design Business Case.pdf

If you have further questions about the Economic Impact and the PDBC, we would be happy to connect you with staff in the Planning and Business Case team at Metrolinx.

Lastly, please note that we are finalizing our EPR addendum and are anticipating to have it published by April 17, 2020.

Thank you,

#### **Laura Witherow**

Subject: RE: Scarborough Subway Extension Draft EPR Addendum - notification

#### Hi Dragana:

Thank you for sharing the draft of the Environmental Project Report Addendum for the Scarborough Subway Extension Ministry of Economic Development, Job Creation and Trade (MEDJCT).

We do not have the expertise within the Ministry to comment on the report's discussion of environmental considerations. Our principal interest is in the potential economic impacts of the proposal on the City of Toronto and adjacent areas within the Greater Toronto Area. Our comments will therefore focus on Section 4.3, Socio-Economic Environment (pages 42-51.

Leading business stakeholders and economic think tanks have drawn attention to the economic costs of congestion in the Greater Toronto Area, including lost productivity due to long commute times and impaired goods movement due to congested roads and expressways (see attached reports from the Ontario Chamber of Commerce and the C.D. Howe Institute).

You may want to consider including an Economic Impact heading within this Section. It would cover onto only short-term construction job creation but also a brief general discussion of the costs of traffic congestion in the Greater Toronto and Hamilton Area, particularly lost productivity due to delays in travelling to and from workplaces and potential loss of markets due to impairment of goods movement. It may also make sense to reference the role that higher-order public transit infrastructure investments can play in mitigating congestion and its attendant economic costs, and highlight particular benefits of the amended Subway Extension plan.

In particular, these might include enhanced convenience and connectivity for riders, providing Scarborough residents with more efficient access to employment zones across the City of Toronto, and, via the GO system, in nearby areas of the 905.

Please feel free to contact me if you have any questions or wish to discuss.

Hi Michael,

Thanks for reaching out. Can you please confirm if in addition to the draft EPR Addendum you would like to receive all draft technical reports, or only select reports?

#### Technical reports include:

- 1. Draft Natural Environment Report
- 2. Draft Cultural Heritage Report
- 3. Draft Air Quality Assessment Report
- 4. Draft Traffic Impact Memo
- 5. Draft Noise and Vibration Report

As you are likely aware, the Addendum report will include much of the information (e.g. findings and recommendations) from the technical reports, so I just want to make sure that we send you the detailed technical reports that are of interest to you.

Thank you,

#### **DRAGANA JAKSIC**

Hi Paul.

Thanks for your quick reply.

We have notified the Toronto Catholic District School Board (Tomasz Oltarzewski) and the Toronto District School Board (Erica Pallotta), however, the e-mail to Erica bounced back and I'm currently looking for a new contact. Would you be able to advise on a current contact for TDSB?

And apologies, I'm not familiar with the other two school boards. If additional school boards are interested and affected by the project we would be happy to engage them, we would just ask for the names of these school boards and contacts, if you have them.

Have a great evening,

### Good morning,

Please be advised that draft technical reports for the Scarborough Subway Extension (SSE) Environmental Project Review (EPR) Addendum are anticipated to be available for review as early as January 27, 2020, followed by the draft EPR addendum on February 10, 2020. Reviewers' comments will be due <u>February 28, 2020</u>.

As a member of the Environmental Assessment Government Review Team, please let us know if you would be interested in receiving the draft technical reports and EPR Addendum report for review by **January 27, 2020** and **February 10, 2020**, respectively, such that you have sufficient time to review these reports.

Please see attached letter for additional project details.

Thank you,

# **DRAGANA JAKSIC**

**Subject:** RE: Scarborough Subway Extension - Draft EPR Addendum and Draft

### Good afternoon Laura et al

Thank you for sending for our review the revised Cultural Heritage Report, the revised Environment Project Report and the table of Metrolinx's responses to our comment of March 2, 2020. We have reviewed the material. For the most part our comments and recommendations have been addressed.

However, there remain a few outstanding concerns which will require Metrolinx's attention and further revisions to the reports:

MHSTCI's comments (March 2, 2020) included:

- advice that the report was to conform with MHSTCI Feb 2019 TPAP Guidance document (Item #1-general comment) and
- advice to delete reference to MX's Cultural Heritage Management Protocol (Item #4 Methodology)

The Final Cultural Heritage Report will conform with the MHSTCI Feb 2019 TPAP Guidance document. All references to Metrolinx's Cultural Management Protocol have been removed from the Final version of the Cultural Heritage Report.

1. for the most part the report title has been changed to conform with MHSTCI Feb 2019 TPAP Guidance, the acronym, "CHAR" continues to appear throughout the both the Cultural Heritage Report and the EPR.

The report title has been updated to Cultural Heritage Report throughout and the CHAR acronym has been removed from the Final version of the Cultural Heritage Report and the EPR.

# **Executive Summary, Sections 1.1 and 3 Methodology**

Reference to MX's Cultural Heritage Management Protocol has been removed as requested. However, it has been replaced with reference to and text from (e.g. 3. Methodology) *Draft Terms of Reference: Cultural Heritage Screening Report for Built Heritage Resources and Cultural Heritage Landscapes* (2014).

Noted, all references to *Metrolinx's Draft Terms of Reference: Cultural Heritage Screening Report for Built Heritage Resources and Cultural Heritage Landscapes (2014)* have been removed from the Final version of the Cultural Heritage Report.

Please be aware that MX's *Cultural Heritage Screening Report for Built Heritage Resources and Cultural Heritage Landscapes* 

- is not to be used for corridor projects. As has been agreed between MX and MHSTCI, MHSTCI's Feb 2019 TPAP Guidance document will be used in its place.
- sets out screening criteria that is not consistent with MHSTCI Criteria for Evaluating Potential for Built Heritage Resources and Cultural Heritage Landscapes, a Checklist for the Non-Specialist (2016).

Noted, all references to Metrolinx's Cultural Heritage Screening Report for Built Heritage Resources and Cultural Heritage Landscapes has been removed from the Final version of the Cultural Heritage Report.

Additionally, it creates contradiction within the Cultural Heritage Report.

1. For example, section 3 states:

The CHAR was prepared in accordance with the Metrolinx Draft Terms of Reference for Consultants: Cultural Heritage Screening Report for Built Heritage Resources and Cultural Heritage Landscapes (2013). This CHAR serves to quickly and efficiently allow Metrolinx to identify properties with recognized or potential cultural heritage value or interest. The following steps were taken: [. . . this goes on to list the screening criteria from MX's guidance]

Whereas Section 1.1 states that MHSTCI <u>Criteria for Evaluating for Potential Built Heritage</u> <u>Resources and Cultural Heritage Landscapes</u> was used.

Noted, all references to *Metrolinx's Draft Terms of Reference: Cultural Heritage Screening Report for Built Heritage Resources and Cultural Heritage Landscapes (2013)* have been removed from the Final version of the Cultural Heritage Report.

# 2. 3.2 Data Collection (2<sup>nd</sup> paragraph) states:

This CHAR addresses above-ground resources over 40 years old and including those that have already been identified by municipal heritage inventories or earlier reports. Use of a 40-year old threshold is a indicator that a property may be of cultural heritage value. While identification of a resource that is 40 years old or older does not confer outright heritage significance, this threshold provides a means to collect information about resources that may retain heritage value. Similarly, if a resource is slightly less than 40 years old, this does not preclude the resource from retaining heritage value.

This inclusion satisfactorily addresses one of our March 2, 2020 comments (see Item 6) and is consistent with MHSTCI's approach and guidance. However, it is not consistent with MX's CHSR guidance.

Accordingly, please revise the Cultural Heritage Report to remove reference to any Metrolinx "guidance" related to cultural heritage. This relates to Executive Summary, Section 1.1 and Section 3 (and any other sections as necessary).

All references to any Metrolinx "guidance" related to cultural heritage has been removed from the Final version of the Cultural Heritage Report.

# **Environmental Project Report:**

Section 4.5.2: some of the updated information from the revised Cultural Heritage Report. Please revise the EPR by adding the following text to section 4.5.2:

adjacent lands have been considered in this CHAR in the form of a 30 m buffer around the proposed construction areas.

The above noted text has been added to the Final version of the EPR.

As always we can be available for clarification or further discussion as necessary.

Sincerely

## Rosi Zirger

Subject: Scarborough Subway Extension - Draft EPR Addendum and Draft

Good evening Laura,

Thank you for sending the Draft EPR Addendum and associated Draft Cultural Heritage Assessment Report for the Scarborough Subway Extension project to MHSTCI. We have had an opportunity to review the documents.

Here are some general observations:

- Both the CHAR and the cultural heritage sections of the EPR addendum should explain more clearly what work was completed in the original 2017 TPAP and how the work being presented at this time relates to it. Mapping would be helpful to show the study areas of cultural heritage technical studies completed during the original TPAP and during the 2020 addendum.
- The draft material does not make clear the methodology applied in development of the CHAR.
   For example, it is not evident how potential cultural heritage resources were screened in or
   out in the context of the field review and what the results were. The methodology and results
   of the field review should be elaborated to make clear that consideration of built heritage
   resources and cultural heritage landscapes was not limited to previously recognized heritage
   properties.
- Consistent with MHSTCI guidance on documentation/reporting under TPAP, the EPR Addendum should be more precise about the archaeological assessment that has been completed within the study area. We recommend that maps of the assessed areas, identifying information for the reports themselves, and summaries of their conclusions, be included.
- Future commitments identified in the EPR should lay out in greater detail what technical work remains to be completed and what the timelines for those actions are.

The above is a snapshot of some of the areas where we recommend that further work be done in order to bring the documentation up to standard and into alignment with MHSTCI advice. In order to expedite that, we are thinking that a short teleconference will be of benefit, if you agree.

If so, please identify some dates/times that work for you. We will provide more detailed comments on the draft documentation in advance of that discussion. We look forward to supporting you in fulfilling the due diligence related to cultural heritage for this priority project.

Please feel free to give me a call if you would like to discuss.

Best regards,

### Good Afternoon Karla and Rosi,

As mentioned in the previous email (dated January 27, 2020), the <u>Draft EPR Addendum Report</u> for the Scarborough Subway Extension is now available for review. In addition, since sending you the initial draft of the CHAR, we've made further edits to the report. I'll also be providing you an updated CHAR for your reference and review.

Am I able to upload the reports to the program you sent before or is a new link required? I'm going to try using the link you had provided previously. Please let me know if you do not receive the upload.

We would greatly appreciate your review and submission of comments for the Draft EPR Addendum Report by **February 28, 2020**. Please let me know if you have any outstanding questions or concerns.

Thank you,

## **Laura Witherow**

HONI-MX Subway Program Deck V3.pdf

Hi Renee – thanks for the discussion this afternoon. Please find the presentation attached. As promised, a few follow-up items:

#### Scarborough Subway Extension

- The item we expect to be of greatest interest to HONI is the proposed bus facility in the hydro corridor, west of McCowan Road (image below)
- Looking forward to HONI comments by March 27

### Eglinton Crosstown West Extension

- Items we expect to be of greatest interest to HONI are tunneling under the hydro corridor west of Martin Grove Road (and potential staging near this location) and tunneling north of the hydro corridor near Renforth Station (image below)
- Remaining technical reports are scheduled to be shared with HONI later today and tomorrow morning
- Looking forward to HONI comments by April 2

Thanks, James

#### James,

Of note immediately, the bus driver facility is proposed on transmission corridor lands which are owned by the provincial government. Hydro One has a statutory right to these corridor lands and Hydro One's transmission and distribution system is granted the primacy of use of these lands.

Hi Renee – the Line 2 Subway Extension draft environmental reports are available here for review: <a href="https://we.tl/t-znEehXFBEY">https://we.tl/t-znEehXFBEY</a>

Looking forward to your team's comments. Given project timelines, would it be possible to receive comments by March 12?

Any key issues your team can bring to our attention ahead of formal comments would be appreciated so

we can begin work towards resolution as soon as possible. Also, please let us know if a meeting would be helpful to discuss report content.

Eglinton Crosstown West Extension reports will follow in a separate email.

Thanks, James

Hi Elsy,

Please process only the \$20K for the immediate deliverables, and I will look into a better retainer for future work.

The EA team has allowed for a week extension for the Line 2 East Subway, and it in HONI's best interest to get your comments in as soon as practicable. I have also cc'ed our EA lead James Francis on this, in case you had specific questions for him.

It sounds like we may be able to process the invoice right away, please send it to Brian Peters attention. Let us know if you have any questions.

Thanks, Kowsiya

### Good afternoon Rick,

Further to my voicemail message regarding the SSE Environmental Project Report ("EPR") Addendum, please find attached correspondence from Metrolinx, the <u>Draft Natural Environment Report</u>, and a comment sheet for HONI's review and comments.

The <u>Draft Noise and Vibration Assessment Report</u> and the <u>Draft EPR Addendum</u> <u>Report</u> will also be available shortly for your review. Once the reports are available, I will send them to your attention for distribution and coordination of review.

Review of the <u>Draft Natural Environment Report</u> by <u>February 28<sup>th</sup></u> would be greatly appreciated.

Please feel free to contact me should you have any questions or would like to request a meeting.

Best regards, Tina

## Good Morning,

For your awareness, the first round of Open Houses for the <u>Scarborough Subway</u> <u>Extension Project</u> will be hosted on March 3<sup>rd</sup> and 5<sup>th</sup>, 2020 and will focus on sharing information and receiving feedback from the general public and local stakeholders. We extend an open invitation to you and your team to attend this meeting, however, this would not preclude any request from you to meet with Metrolinx directly.

Tuesday, March 3rd, 2020 Scarborough Civic Centre Rotunda 150 Borough Drive Scarborough, ON Thursday, March 5th, 2020 Grace Church Scarborough Parish Hall 700 Kennedy Road Scarborough, ON

For your reference, the project postcard which outlines the information shared above has been attached with this email. Please let me know if you have any questions or concerns.

Sincerely,

#### **Laura Witherow**

Subject: RE: Subway Scarborough Extension - Environmental Reports for Review

Attachments: image002.png

Hi Erica,

Thank you for providing your input on the SSE EPR Addendum. Please note the following in response to your suggestions (in red):

#### Mitigation and Monitoring Measures:

- Installation of silt fencing or equivalent to prevent any impacts to the adjacent SAR/SAR Habitat/Water bodies/ESA's or areas identified as Environmental Significant/Natural Heritage in the City of Toronto's Official Plan. Staging areas for construction should be outside of these features. Please note that Table 7-1 includes a commitment to install and maintain erosion sediment controls, including silt fencing, at the perimeter of the construction footprint and staging areas. Table 7-1 also states that "Construction fencing and / or silt fencing, where appropriate, will be installed and maintained to clearly define the construction footprint and prevent accidental damage or intrusion to adjacent vegetation or ELC communities. This will be applied to SAR habitat, waterbodies and sensitive features where necessary.
- Provide gates for fauna to pass through silt fencing at regular intervals so they don't get trapped during construction. Silt fencing will be installed in accordance with the Greater Golden Horseshoe's Erosion and Sediment Control Guideline for Urban Construction (December, 2006). Construction sites, including staging areas, will be enclosed by fencing and/or other forms of ESC; fauna is not anticipated to enter construction sites, including staging area.
- Fisheries in-water works timing windows should be adhered too in the event in water works are required. The in-water works timing window is noted in the NER and EPR; in-water works are not anticipated at this time. If in-water works are determined to be required, the Project team will consult with the TRCA, MECP and DFO to ensure that harm to fish and fish habitat is avoided, minimized, or mitigated, as feasible.
- Spill kits should be kept on site in the event of a spill. A commitment to prepare a Spill Prevention and Response Plan, which will include spill response kits, is included in Table 7-1.
- Mitigation and monitoring related to vegetation removal in designated areas and within the TRCA Regulation Limit should be developed also in consultation with TRCA in addition to the Metrolinx Vegetation Guideline. Noted. Consultation with the TRCA and City Urban Forestry for vegetation removal and compensation is stated as a commitment in Table 7-1

Please do not hesitate to reach out if you have any remaining questions.

Thank you,

Good Morning Frank,

The Stage 1 AA completed for the original EPR (2017) covers our scope change area, so a new Stage 1 assessment wasn't needed. The scope changes do warrant a Stage 2 in some areas however this assessment will be outside of the EA process.

Please let me know if you'd like me to forward on the 2017 EPR for reference.

Best.

From: Prestinaci, Nick (MTO) < Nick. Prestinaci@ontario.ca>

Sent: February 25, 2020 11:46 AM

To: Tina Angelone

Subject: RE: Scarborough Subway Extension ("SSE") - Draft Traffic Impacts Memo << Comments Due February 28, 2020>>

#### Hi Tina:

Here is our review and comments:

#### Planning and Design

- 1. Traffic studies need to be completed for both in-construction and final scenarios
- 2. No construction to physically impact our interchanges and ramps
- 3. Note that the McCowan Rd interchange will be an MTO construction zone for up to 10 years (2 separate contracts) and McCowan Rd will be specifically under construction the next 2 3 years if the contractor holds to their current schedule. Coordination will be required if they plan to construct in this area over the next 10 years.

#### Traffic

| 1 |                 | pg 4   | It is noted that Progress Ave. and McCowan Rd. will be reconstructed to at grade intersection and that a separate traffic assessment report will be done in the future. MTO would like to review this report not as separate but combined with other major construction impacts like installation of new signalized intersection on McCowan Rd This report should be submitted prior to construction staging traffic report. |
|---|-----------------|--------|--|
| 2 | EEB 7           | pg. 8  | Figure showing EEB 7 shows a "Project Footprint" line that goes over the Hwy 401 WB off-ramp at McCowan, what kind of impacts can be expected within the area of this footprint?   |
| 3 |                 | pg. 14 | Under Summary, the report states that Traffic Impact Study should be conducted during construction, the report also calls for traffic analysis during detail design stage. The ministry normally reviews traffic staging report during detail design. Please expand on how Traffic Impact Study be conducted during construction, will this be at a critical stage of construction?  |
| 4 | Traffic decking | pg.15  | The report states that in order to keep bilateral traffic flow during construction, traffic decking will be used at Hwy 401 ramp terminal (not sure if this includes mainline). The ministry normally does not approve of use of decking on ministry's highways or ramps, this should be discussed further.  |
| 5 | Parking         |        | Are there any commuter parking lots planed at any of the stations?   |

#### Corridor Management

An MTO encroachment permit is required for any proposed works within an MTO Right of Way (for example, if the recommendations of the study necessitate rehabilitation or replacement of any sewers that cross the Hwy. 401 corridor). Survey work and any preliminary investigative engineering work (e.g. boreholes, coring) also require MTO Encroachment Permits. For further information on encroachment permits, please refer to the following link:

http://www.mto.gov.on.ca/english/engineering/management/corridor/encroach.shtml

For work which is to take place outside the MTO Right-of-Way, but within the Ministry of Transportation's permit control area, the owner / applicant will require an MTO Building & Land Use Permit. This applies to any development, entrance, change of entrance use, building or structure within 45 metres of the provincial highway property line or within 395 metres of the centre point of an intersection or interchange with a provincial highway. In addition, construction on these lands must not commence prior to the issuance of the necessary MTO permits.

Any proposed structures (above or below ground) or amenities which are essential to the viability of the site (e.g. utilities, frontage roads, fire routes, parking, stormwater management ponds) must be set back a minimum of 14 metres from the

highway property line. In locations where the Ministry currently has plans for future highway widening that will require additional land, the minimum 14 metre setback is to be taken from the future highway property line.

#### Thanks.

Nick Prestinaci, CET| Senior Project Manager, Corridor Management Office| Ministry of Transportation 159 Sir William Hearst Avenue| 7<sup>th</sup> Floor, Building D | Downsview, Ontario M3M 1J8 | ( P: (416) 235-5135 |

Hi Nick - I need to send this over 2 emails - see email below

From: Tina Angelone

Sent: Wednesday, February 19, 2020 2:58 PM

To: 'Prestinaci, Nick (MTO)'

Subject: RE: Scarborough Subway Extension ("SSE") - Draft Traffic Impacts Memo << Comments Due February 28, 2020>>

Hi Nick,

My apologies for not getting back to you sooner on this email, I was off for most of last week.

With respect to question #1 below, the <u>Draft Traffic Impacts Memo</u> and MEM-2020-01-24-SSE Addendum\_Transportation Impacts v3.pdf (sent to you on February 3<sup>rd</sup>) is one and the same (file was poorly named).

The environmental reports were not sent to you on February 3<sup>rd</sup> as they were recently made available; having said that , please find attached the Environmental Reports (*Noise & Vibration Assessment Report* and *Environmental Project Report Addendum Report*) together with the corresponding Review Comments spreadsheets attached to this email.

You should now have 3 reports and 3 corresponding Review Comment spreadsheets; it would be appreciated if you could please have the comments back to us by February 28, 2020; however, if this is not achievable, please let me know.

Also, I would like to talk to you about setting up the next meeting ideally the 2<sup>nd</sup> week of March. The Reference Concept Design ("RCD") is scheduled to be submitted on March 2, 2020 when it will then be sent to you for review. Our designer would like to walk through the RCD with the team to discuss any issues or comments. This will not replace the review that MTO requires, but hopefully it will expedite the review having everyone in the same room.

Give me a call when you get a chance – 416-202-1921.

Regards,

Tina

#### CAUTION -- EXTERNAL E-MAIL - Do not click links or open attachments unless you recognize the sender.

Good afternoon Nick,

Further to telephone correspondence regarding the SSE Environmental Project Report ("EPR") Addendum, please find attached to this email correspondence from Metrolinx, the *Draft Traffic Impacts Memo*, and a comment sheet for the ministry's review and comments. I understand that you will coordinate the distribution and review of this report to the appropriate team members.

The <u>Draft Noise and Vibration Assessment Report</u> and the <u>Draft EPR Addendum Report</u> will also be available in the next week or so for the ministry's review. Once the reports are available, I will send them to your attention for distribution and coordination of review.

Review of the *Draft Traffic Impacts Memo* by February 28<sup>th</sup> would be greatly appreciated.

Please feel free to contact me should you have any questions or would like to request a meeting.

Best regards, Tina

Subject: RE: Scarborough Subway Extension Addendum

James,

The Ministry of the Environment, Conservation and Parks has completed its review of Metrolinx's draft Scarborough Subway Extension Environment Project Report Addendum. The review was carried out to determine whether the draft Addendum meets the requirements and expectations set forth in the Ministry's Guide: Ontario's Transit Project Assessment Process and the requirements set forth in Ontario Regulation 231/08, Transit Projects and Greater Toronto Transportation Authority Undertakings. Please find attached the ministry's comments that are being submitted to Metrolinx for consideration when

finalizing the Addendum for formal submission.

Should you have any questions or require further clarification please let me know.

Thank you,

Gavin

Gavin Battarino | Special Project Officer
Environmental Assessment Services Section
Environmental Assessment and Permissions Branch
Ontario Ministry of the Environment, Conservation and Parks
135 St. Clair Avenue West, 1st Floor
Toronto ON M4V 1P5

If you have any accommodation needs or require communication supports or alternate formats, please let me know.

# CAUTION -- EXTERNAL E-MAIL - Do not click links or open attachments unless you recognize the sender.

Good Afternoon Cindy,

As James previously discussed, we are providing draft technical reports for the Scarborough Subway Extension (SSE) Environmental Project Report (EPR) Addendum. Below you will find links to the following reports for your review and comments:

- 1. Draft Air Quality Qualitative Assessment Report
- 2. Draft Natural Environment Report
- 3. Draft Noise & Vibration Assessment Report
- 4. Draft EPR Addendum Report

Download here: <a href="https://we.tl/t-ScV7m7oiOn">https://we.tl/t-ScV7m7oiOn</a>

We would greatly appreciate your review and submission of comments for all of the reports listed above by **February 28, 2020.** 

From: <u>Laura Witherow</u>

**Subject:** MX - Scarborough Subway Extension - Notification of Open Houses

2020-02-19-SSE-Postcard-Master.pdf

## Good Morning,

For your awareness, the first round of Open Houses for the <u>Scarborough Subway</u> <u>Extension Project</u> will be hosted on March 3<sup>rd</sup> and 5<sup>th</sup>, 2020 and will focus on sharing information and receiving feedback from the general public and local stakeholders. We extend an open invitation to you and your team to attend this meeting, however, this would not preclude any request from you to meet with Metrolinx directly.

Tuesday, March 3rd, 2020 Scarborough Civic Centre Rotunda 150 Borough Drive Scarborough, ON Thursday, March 5th, 2020 Grace Church Scarborough Parish Hall 700 Kennedy Road Scarborough, ON

For your reference, the project postcard which outlines the information shared above has been attached with this email. Please let me know if you have any questions or concerns.

Sincerely,

#### **Laura Witherow**

Good Morning Cindy,

Thank you for acknowledging MECP's receipt of the draft technical reports and draft EPR addendum.

We appreciate your efforts in helping us meet the Project schedule. Could you please advise when we could expect to have all of MECP's comments? Understanding your timelines will help us allocate resources so we can work to meet our subsequent deadlines and maintain the delivery and procurement schedules.

To help expedite your review, we would be happy to set up a meeting – or meetings – with your team to go over the reports and address any preliminary questions or concerns.

Please let me know if you would like us to schedule a meeting or if there are any other ways we could help facilitate MECP's review.

Thank you,

Subject: Scarborough Subway Extension Addendum

Importance: High

Hello Laura,

Thank you for sharing the draft technical reports and draft EPR addendum report for the Scarborough Subway Extension project. My colleague, Gavin Battarino, will be the lead contact at the ministry for this project, so please correspondence with him directly moving forward.

In your email, you have requested that the ministry complete its review by February 28, 2020 (less than 2 ½ weeks away). Although, the ministry understands that this project is a government priority, the ministry cannot commit to complete a technical review and related comments for all the reports by February 28, 2020.

However, ministry staff will try their best, keep you informed of our review progress and share ministry comments as we receive them from our technical reviewers. We will also attempt to flag any significant concerns during our review in advance, if possible.

Thank you,

Cindy Batista | Special Project Officer | Transit Coordinator Environmental Assessment Services | Environmental Assessment Branch Ministry of the Environment, Conservation & Parks
135 St. Clair Avenue West, 1st Floor, Toronto, ON M4V 1P5

Hi Cindy,

Thanks for the chat the other week. By way of this email, I'd like to introduce you to the Scarborough Subway Extension EA team here at Metrolinx: Dragana Jaksic (Project Manager) and Laura Witherow (Project Coordinator).

Dragana and Laura will be in touch shortly with an update on draft reports for MECP review. Please feel free to reach out to Dragana and Laura directly with any comments or questions.

Appreciate MECP's ongoing support in working with us on accelerated timelines to implement these priority projects.

Thanks, James

**Subject:** Scarborough Subway Extension - Environmental Reports

for Review

Hi Stella – thanks for the chat Friday. As discussed, we're

providing the draft Scarborough Subway Extension environmental reports below for City review. To maintain schedule, we'd appreciate comments by Feb 28. Happy to sit down and work through reports/comments with City staff to help facilitate reviews, or pursue other approaches you think might be beneficial.

- Natural Environment: https://we.tl/t-kn0G0xkbjB
- Air Quality: <a href="https://we.tl/t-b7qoF31yq0">https://we.tl/t-b7qoF31yq0</a>
- Cultural Heritage: <u>https://we.tl/t-91agSqJIXw</u>
- Traffic: <a href="https://we.tl/t-gfchumajut">https://we.tl/t-gfchumajut</a>

The draft noise and vibration and overall Environmental Project Report (EPR) Addendum are anticipated to be submitted for City review in the coming weeks – targeting Feb 3 and Feb 10, respectively.

I'll follow up shortly with an email providing a birds-eye view of upcoming environmental report review windows across the subway program.

Thanks, James

Hi Stella – we've captured Heritage Preservation Services' input via the data request tracker. The attached Word files (originally attached to the attached emails) seem to indicate input from HPS in December 2019 and February 2020 in response to MX data requests.

Let us know if there's a concern with how this has been characterized.

We'd also like to include HPS review of the draft CHAR in the consultation portion of the final CHAR. Hope this doesn't pose a concern, but happy to discuss if it does.

**Subject:** RE: SSE EPR Addendum - Follow-up from Friday's Call

Hi Margie,

Thank you for sharing this comment. We've compiled all of the language and commitments discussed in last Friday's meeting (and included below) into the attached comment sheet so that you have it for your records.

Please note that AECOM is working quickly to finalize all of the SSE technical reports. If there are any remaining comments coming in, please ensure that you send them to us before the end of the day.

Thank you,

#### **Laura Witherow**

Subject: RE: SSE EPR Addendum - Follow-up from Friday's Call

Hi Laura,

I know you're pressed for time so I'll be sending comments as I receive them:

What's been captured for item #30 looks good, however, please add "and City of Toronto Staff" to
the end of the recommended text as this is a City trail and they should be at the table during these
discussions.

Thanks, Margie

**Subject:** SSE EPR Addendum - Follow-up from Friday's Call

Hi Margie,

A summary of our call from Friday April 3, 2020, is included below. As discussed during our meeting, updated language and commitments are provided in the post meeting notes below. We trust this is satisfactory based on our conversation, and are proceeding to finalize the addendum for posting mid-April.

The Item number references below correspond to the TRCA comments to the EPR addendum, unless otherwise noted.

<u>Item No. 1 (Highland Creek crossing; project features in flood vulnerable areas; depths of underground features):</u>

- TRCA restated that they cannot support open-cut construction at Highland Creek.
   Metrolinx confirmed that there will be a commitment for trenchless construction
   underneath Highland Creek north of Lawrence. Metrolinx also confirmed that
   additional studies will be conducted to determine the construction methodology
   underneath Highland Creek north of Sheppard; TRCA will be engaged as these
   studies are conducted
  - Post Meeting Note: the following text will be added to the NER and EPR
     Addendum: "It is acknowledged that the TRCA does not support an open-cut
     crossing at the Highland Creek Markham Branch north of Sheppard Ave E.

Consideration will be given to undertaking a trenchless crossing at this location following the completion of the necessary technical studies to confirm its feasibility; ongoing consultation with the TRCA will continue as crossing feasibility is confirmed"

- Recognizing the constraints driving the location of certain project features (eg. Emergency exit 8, tail tracks etc.), the TRCA restated that Project features, especially emergency exit 8, need to be located outside of flood vulnerable areas associated with Highland Creek.
  - Post Meeting Note: the following text will be added to the NER and EPR Addendum: "It is the TRCA' s preference for Project features to avoid flood vulnerable areas to prevent flood risk to staff, nearby properties or the general public. The TRCA will be consulted at later stages regarding flood proofing and siting options to mitigate flood risks. A future hydraulic assessment will be completed during detailed design to support the site assessment".
- Metrolinx noted that depths of underground features will be developed according to geotechnical and engineering studies. TRCA will be engaged as depths are developed.
- TRCA noted that an updated hydrologic model for Highland Creek at and around Sheppard Ave E will be available in the near future.
  - ACTION: TRCA to share the hydrologic model with Metrolinx when available.

### <u>Item No. 7 (Vegetation removal in Meadoway restoration areas; bus loop impacts):</u>

- Metrolinx noted that there is a commitment to provide compensation and monitoring in accordance with the TRCA requirements for impacts in the Meadoway (e.g. NER Table 4-5; EPR Table 5-4); nonetheless, the NER and EPR will be updated for clarity and the TRCA compensation protocol will be explicitly referenced.
- Metrolinx noted that the commitment to reduce the footprint of the bus terminal/facility in the Natural Heritage System by re-examining the bus terminal location and designs is already included in the NER and EPR, but the text will be updated for clarity.

### <u>Item No. 9 (Setbacks from top of slope):</u>

- TRCA noted that setback distances for project features/construction from top of slope need to be determined before detailed design. Metrolinx confirmed that adequate setbacks will be determined in consultation with the TRCA by the incoming Technical Advisor; geotechnical studies will be conducted to identify the top of slope of Highland Creek at the bus terminal property.
  - Post-Meeting Note: the following text will be added to the NER and EPR
     Addendum: "An assessment by a geotechnical engineer to identify adequate setbacks will be completed with continued consultation with TRCA"
- TRCA noted that a 15 m setback from a top of slope calculated as a 3:1 ratio from the toe of slope will be considered acceptable.

#### Item No. 23 (TRCA's SWM criteria):

• Metrolinx/AECOM noted that both the TRCA's Stormwater Management Criteria document and the Living City Policies are referenced in the EPR (Table 7-1).

### Item No. 30 (impacts to existing multi-use trail in Gatineau Hydro Corridor):

- Metrolinx confirmed that at this time only potential temporary impacts to the multiuse trail may be anticipated. No permanent impacts are anticipated. The design team will consult with the TRCA as design progresses to ensure that impacts to the trail are minimized and that any appropriate buffers are integrated into the design.
- TRCA noted that it's important to maintain traffic flow and access to the trail during construction
  - Post-Meeting Note: the following text will be added to the NER and EPR
    Addendum: "At this time, there may be potential impacts to the multi-use
    trail in the Gatineau Hydro Corridor from the proposed project construction
    activities; the design team will work to minimize these temporary impacts and
    mitigate as necessary (e.g. provide temporary trail realignments), in
    consultation with the TRCA and City of Toronto."

### NER Item No. 6 (boundary limits of Sheppard station, including bus terminal):

- Metrolinx clarified that the figure showing the station at Sheppard indicates the
  property proposed for the bus terminal, not the bus terminal boundaries. The bus
  terminal will not extend into the watercourse, as shown by the property lines
  extending into the watercourse.
  - Post-Meeting Note: the following text will be added to the NER: "The figure identifies the property on which the bus terminal will be located; it does not define the bus terminal boundaries. Geotechnical studies will be conducted to identify the top of slope of Highland Creek at the bus terminal property, and adequate setback distances for the bus terminal will be established.

Thank you,

Hi Margie,

To follow-up on my voicemail, I chatted with AECOM and they had two requests regarding comments coming in mid next week. They ask that:

- 1) All comments are placed within the consolidated comment sheet we provided. Please let me know if you need me to send over another excel sheet, and;
- 2) Please ensure there is no duplication or conflict amongst comments provided

That'll help on their end streamlining the edits needed.

Thank you so much, and looking forward to receiving the TRCA's comments ☺

Hi Margie,

Thank you for letting us know, and welcome to the Scarborough Subway Extension project!

In order to meet our schedule, all comments received beyond February 28th will be captured in the consultation record for the project. If available, we'd appreciate even preliminary comments from the TRCA by February 28th so these can be reflected in the addendum.

We'd be happy to set up a call if any of your reviewers have specific questions they'd like further information on.

Regards,

Hi Laura,

Unfortunately Elizabeth is no longer with TRCA so I will be your main contact for this project.

I understand that the more comprehensive report, the Natural Environment Report, was submitted earlier than the EPR Addendum; however, the Addendum provided a better context so it made sense for staff to review at the same time. I can provide you with our comments by mid-next week.

Regards,

#### Good Afternoon.

Metrolinx in partnership with Infrastructure Ontario is proposing to build a 8km subway line in Scarborough known as the Scarborough Subway Extension (SSE). This was originally a City of Toronto and Toronto Transit Commission project and was transitioned to Metrolinx in 2019. More details about the project can be accessed here:

http://www.metrolinx.com/en/greaterregion/projects/scarborough-subway-extension.aspx

I have attached a letter to this email, that has also been sent by registered mail. The letter provides high level details of the project including stage 2 archaeological work that is scheduled to begin in Spring 2020.

Metrolinx would appreciate any interest that your First Nation may have in these projects. We would welcome the opportunity to meet with you to provide more information and discuss any interests or questions that you may have. You may remember that on February 12<sup>th</sup> we also sent you information about the proposed Ontario Line subway project. We would be happy to meet with you to talk about both projects if this is easiest for your community as I am sure you are extremely busy.

I am happy to speak in person or by telephone if you require further information as I hope to make this process as open and respectful as possible.

Please do not hesitate to contact me.

Miigwetch,

Fallon

#### Good Afternoon,

Metrolinx in partnership with Infrastructure Ontario is proposing to build a 8km subway line in Scarborough known as the Scarborough Subway Extension (SSE). This was originally a City of Toronto and Toronto Transit Commission project and was transitioned to Metrolinx in 2019. More details about the project can be accessed here:

http://www.metrolinx.com/en/greaterregion/projects/scarborough-subway-extension.aspx

I have attached a letter to this email, that has also been sent by registered mail. The letter provides high level details of the project including stage 2 archaeological work that is scheduled to begin in Spring 2020.

Metrolinx would appreciate any interest that your First Nation may have in these projects. We would welcome the opportunity to meet with you to provide more information and discuss any interests or questions that you may have. You may remember that on February 12<sup>th</sup> we also sent you information about the proposed Ontario Line subway project. We would be happy to meet with you to talk about both projects if this is easiest for your community as I am sure you are extremely busy.

I am happy to speak in person or by telephone if you require further information as I hope to make this process as open and respectful as possible.

Please do not hesitate to contact me.

Miigwetch,

Fallon

#### Good afternoon,

My name is Sharday James and I am the Community Consultation Worker for the Chippewas of Rama First Nation. I am contacting you about a notice you sent to us dated January 27<sup>th</sup> about Metrolinx taking over construction of the Scarborough Subway. Unfortunately I do not have access to my consultation email. I received this notification via the Chief. The link in the email you sent him did not work for me, I imagine because it was a forward. Could you send the link for download to me directly? Please include me on any future correspondence.

Thank you, Sharday James

#### Michi Saagiig Historical/Background context:

The traditional homelands of the Michi Saagiig (Mississauga Anishinaabeg) encompass a vast area of what is now known as southern Ontario. The Michi Saagiig are known as "the people of the big river mouths" and were also known as the "Salmon People" who occupied and fished the north shore of Lake Ontario where the various tributaries emptied into the lake. Their territories extended north into and beyond the Kawarthas as winter hunting grounds on which they would break off into smaller social groups for the season, hunting and trapping on these lands, then returning to the lakeshore in spring for the summer months.

The Michi Saagiig were a highly mobile people, travelling vast distances to procure subsistence for their people. They were also known as the "Peacekeepers" among Indigenous nations. The Michi Saagiig homelands were located directly between two very powerful Confederacies: The Three Fires Confederacy to the north and the Haudenosaunee Confederacy to the south. The Michi Saagiig were the negotiators, the messengers, the diplomats, and they successfully mediated peace throughout this area of Ontario for countless generations.

Michi Saagiig oral histories speak to their people being in this area of Ontario for thousands of years. These stories recount the "Old Ones" who spoke an ancient Algonquian dialect. The histories explain that the current Ojibwa phonology is the 5<sup>th</sup> transformation of this language, demonstrating a linguistic connection that spans back into deep time. The Michi Saagiig of today are the descendants of the ancient peoples who lived in Ontario during the Archaic and Paleo-Indian periods. They are the original inhabitants of southern Ontario, and they are still here today.

The traditional territories of the Michi Saagiig span from Gananoque in the east, all along the north shore of Lake Ontario, west to the north shore of Lake Erie at Long Point. The territory spreads as far north as the tributaries that flow into these lakes, from Bancroft and north of the Haliburton highlands. This also includes all the tributaries that flow from the height of land north of Toronto like the Oak Ridges Moraine, and all of the rivers that flow into Lake Ontario (the Rideau, the Salmon, the Ganaraska, the Moira, the Trent, the Don, the Rouge, the Etobicoke, the Humber, and the Credit, as well as Wilmot and 16 Mile Creeks) through Burlington Bay and the Niagara region including the Welland and Niagara Rivers, and beyond. The western side of the Michi Saagiig Nation was located around the Grand River which was used as a portage route as the Niagara portage was too dangerous. The Michi Saagiig would portage from present-day Burlington to the Grand River and travel south to the open water on Lake Erie.

Michi Saagiig oral histories also speak to the occurrence of people coming into their territories sometime between 500-1000 A.D. seeking to establish villages and a corn growing economy – these newcomers included peoples that would later be known as the Huron-Wendat, Neutral, Petun/Tobacco Nations. The Michi Saagiig made Treaties with these newcomers and granted them permission to stay with the understanding that they were visitors in these lands. Wampum was made to record these contracts, ceremonies would have bound each nation to their respective responsibilities within the political relationship, and these contracts would have been renewed annually (see Gitiga Migizi and Kapyrka 2015). These visitors were extremely successful as their corn economy grew as well as their populations. However, it was understood by all nations involved that this area of Ontario were the homeland territories of the Michi Saagiig.

The Odawa Nation worked with the Michi Saagiig to meet with the Huron-Wendat, the Petun, and Neutral Nations to continue the amicable political and economic relationship that existed — a symbiotic relationship that was mainly policed and enforced by the Odawa people.

Problems arose for the Michi Saagiig in the 1600s when the European way of life was introduced into southern Ontario. Also, around the same time, the Haudenosaunee were given firearms by the colonial governments in New York and Albany which ultimately made an expansion possible for them into Michi Saagiig territories. There began skirmishes with the various nations living in Ontario at the time. The Haudenosaunee engaged in fighting with the Huron-Wendat and between that and the onslaught of European diseases, the Iroquoian speaking peoples in Ontario were decimated.

The onset of colonial settlement and missionary involvement severely disrupted the original relationships between these Indigenous nations. Disease and warfare had a devastating impact upon the Indigenous peoples of Ontario, especially the large sedentary villages, which mostly included Iroquoian speaking peoples. The Michi Saagiig were largely able to avoid the devastation caused by these processes by retreating to their wintering grounds to the north, essentially waiting for the smoke to clear.

### Michi Saagiig Elder Gitiga Migizi (2017) recounts:

"We weren't affected as much as the larger villages because we learned to paddle away for several years until everything settled down. And we came back and tried to bury the bones of the Huron but it was overwhelming, it was all over, there were bones all over – that is our story.

There is a misnomer here, that this area of Ontario is not our traditional territory and that we came in here after the Huron-Wendat left or were defeated, but that is not true. That is a big misconception of our history that needs to be corrected. We are the traditional people, we are the ones that signed treaties with the Crown. We are recognized as the ones who signed these treaties and we are the ones to be dealt with officially in any matters concerning territory in southern Ontario.

We had peacemakers go to the Haudenosaunee and live amongst them in order to change their ways. We had also diplomatically dealt with some of the strong chiefs to the north and tried to make peace as much as possible. So we are very important in terms of keeping the balance of relationships in harmony.

Some of the old leaders recognized that it became increasingly difficult to keep the peace after the Europeans introduced guns. But we still continued to meet, and we still continued to have some wampum, which doesn't mean we negated our territory or gave up our territory – we did not do that. We still consider ourselves a sovereign nation despite legal challenges against that. We still view ourselves as a nation and the government must negotiate from that basis."

Often times, southern Ontario is described as being "vacant" after the dispersal of the Huron-Wendat peoples in 1649 (who fled east to Quebec and south to the United States). This is misleading as these territories remained the homelands of the Michi Saagiig Nation.

The Michi Saagiig participated in eighteen treaties from 1781 to 1923 to allow the growing number of European settlers to establish in Ontario. Pressures from increased settlement forced the Michi Saagiig to slowly move into small family groups around the present day communities: Curve Lake First Nation, Hiawatha First Nation, Alderville First Nation, Scugog Island First Nation, New Credit First Nation, and Mississauga First Nation.

The Michi Saagiig have been in Ontario for thousands of years, and they remain here to this day.

\*\*This historical context was prepared by Gitiga Migizi, a respected Elder and Knowledge Keeper of the Michi Saagiig Nation.\*\*

#### Good Afternoon.

Metrolinx in partnership with Infrastructure Ontario is proposing to build a 8km subway line in Scarborough known as the Scarborough Subway Extension (SSE). This was originally a City of Toronto and Toronto Transit Commission project and was transitioned to Metrolinx in 2019. More details about the project can be accessed here:

http://www.metrolinx.com/en/greaterregion/projects/scarborough-subway-extension.aspx

I have attached a letter to this email, that has also been sent by registered mail. The letter provides high level details of the project including stage 2 archaeological work that is scheduled to begin in Spring 2020.

Metrolinx would appreciate any interest that your First Nation may have in these projects. We would welcome the opportunity to meet with you to provide more information and discuss any interests or questions that you may have. You may remember that on February 12<sup>th</sup> we also sent you information about the proposed Ontario Line subway project. We would be happy to meet with you to talk about both projects if this is easiest for your community as I am sure you are extremely busy.

I am happy to speak in person or by telephone if you require further information as I hope to make this process as open and respectful as possible.

Please do not hesitate to contact me.

Miigwetch,

Fallon

Hi Sean.

Those project notifications would be separate from the one I sent for Scarborough Subway Extension. That being said, I'm not sure who Aaron is but have cc'd Kate who can connect with you on her project if you have any further questions.

Please let me know if I can answer any SSE specific questions that you may have.

Thank you,

Good morning Laura.

Thank you for the email. For your records, Chris Howard is no longer working for Hiawatha. I have taken over his role.

Over the past week or so I've received a few phone messages from people at Metrolinx, an Aaron and a Kate Brown. I've called back at both phone numbers provided but am unable to reach anyone? Would you happen to know if their calls were in regards to what you've sent today? Would you have contact information for these people?

As for your email, we will review and respond with any questions or concerns prior to the February 28<sup>th</sup> deadline.

We appreciate your continued effort in keeping Hiawatha First Nation in the loop regarding your project.

Thank you;

### Sean Davison

Good morning Laura,

This is to acknowledge reception of the email addressed to Grand Chief Sioui on the Scarborough Subway Extension Draft Cultural Heritage Assessment Report.

After review the Huron-Wendat Nation does not have any specific comments on this particular aspect.

However please keep us updated on the next steps.

Best regards,

Maxime Picard

Thank you for your email. Unfortunately, although this project will almost certainly impact on Kawartha Nishnawbe's First Nations' Treaty rights, they are unable to participate in consultations because they are regarded by Ontario and Canada as a "non-status" First Nation community and therefore receive none of the funding that Indian Act bands or Ontario municipalities receive. The Chief and Council are all unpaid and they have no office or staff to handle these sorts of consultations.

Unless funding is provided to Kawartha Nishnawbe, they will be unable to participate in these consultations. Unless funding is to be provided, there is also no point in sending any more of these messages to Kawartha Nishnawbe.

Sincerely,

Chris

### Good Afternoon

Thank you for reaching out. The Scarborough Subway Extension will add three (3) more stops onto the Line 2 subway. There will be new stations at:

- Lawrence Avenue and McCowan Road
- Scarborough Town Centre and McCowan Road and;
- Sheppard Avenue, which will be the new terminal station for Line 2

This extension will provide seamless travel for Scarborough residents heading into and out of the downtown core. The target completion date is 2029-30.

Regards,

### Laura Witherow

## **Public Comments**

From: <u>Scarborough Subway Extension</u>

To:

Subject: RE: Residents residing at the intersection of the proposed subway stop: McCowan and Sheppard (Scarborough

Subway Extension)

Thank you for reaching out to us. We appreciate your questions and understand your concerns in regards to community and property impact.

Geotechnical drilling is taking place within the road allowance and on select private properties to help advance design work for the project. It is to assess underground conditions and does not necessarily mean the property will be impacted. We understand that residents and businesses will want specific details about impacts to their properties, and we will reach out to impacted property owners at the earliest opportunity. The drilling that is taking place will help inform the design of the project and therefore we will know more about potential environmental and community impacts further on in the design phase.

Metrolinx is exploring number of measures it can take to reduce and manage impacts to residents and communities during construction and operation, which we will use whenever and wherever necessary. You can always visit the Scarborough Subway Extension website for updated information as we move through the project Metrolinx.com/scarboroughsubway

Subject: Residents residing at the intersection of the proposed subway stop: McCowan and Sheppard (Scarborough

Subway Extension)

Hello,

According to the public notice that was sent to residents in the Scarborough neighborhood of Agincourt, I understand an environmental scan is currently underway to explore the construction of the proposed Scarborough Subway Extension.

As a current resident living in the intersection of McCowan and Sheppard, I am deeply curious and concerned about where exactly the subway stop-McCowan Road and Sheppard Avenue- is going to be built.

Is there going to be a plan for residents in this intersection to ensure continued pedestrian access to Sheppard Avenue? Are noise pollution, public health (i.e. trash, loitering), short and long term impact of the subway to the infrastructures of current homes, and safety will be part of the planning to ensure the well-being of current and future residents? Lastly, will residents be forced to leave their homes and community to make room for the expansion?

I understand the environmental scan is in the infancy stages, and it may be a few years before a solid plan and ultimately, breaking ground will take place. However, with such a large expansion plan and given what we have seen with the Eglinton LRT, it is hard not to get worried. As a long-time resident, it is worrisome to not know how the well-being of my own alongside my community members can change from the proposed plan.

It would be wonderful if you can provide answers to the above inquiries. If not, please let me know who I can

contact to discuss the above.

**Subject:** Question

Hi, I live near Danforth/Eglinton and was told by a friend that they believed the new subway extension would have a stop at Danforth/Eg. I can't find any confirmation of this online. Can you please tell me exactly what stops this subway extension is currently planned to service?

On another note, I want to strongly voice my support for the ELRT plan over this subway plan. The ELRT would service many more residents and is already well accepted by the community that has participated in the planning process. The residents I have spoken with that support the subway have mostly done so out of ignorance of the time, cost, planned stops (or lack thereof) and the fact that it will put the ELRT on hold.

Closing The Loop March 2019.docx SSF-Big-Bend-2106.pptx

Hi James

Good to talk with you last night

I am sending a couple of presentations that will help Metrolinx better understand the current Sheppard Subway corridor that will disappear with the Official Plan

that City Council will vote on Wednesday February 26<sup>th</sup>

By removing this EA approved subway corridor the City of Toronto will knowingly be violating Bill 107 (See below)

Thanks

From:

Sent: February 20, 2020 2:04 PM To: James Burchell@metrolinx com

Subject: Scarborough Subway Extension -Designated passenger pick-up / drop-off (PPUDO) area

I am confirming that I have received your responses.

Please review this entire email chain to see that we were also promised meetings ( November 2019 ) to resolve other matters beyond the passenger pick up/drop off issue.

One of our concerns requires immediate attention

It involves an important segment of the Sheppard Subway corridor as defined in the current Official Plan (OP) for Toronto.

The corridor runs from Kennedy / Sheppard southeast to the Scarborough Town Centre.

It was also integral to the "Big Bend" plan proposed by the Glen Andrews Community Association (GACA), fall of 2016.

The current OP has land reserved for a subway station in the Village Green Square, see white space just below circled 2 in graphic.

Many residents in these towers were promised a subway station when they purchased.

Gemterra who owns Cowdray Court (orange towers) is currently financing the EA to put in the road underpass to join these two sites.

In 2019 someone at Metrolinx drew a simple line across Sheppard Ave to McCowan Ave and defined it as the subway loop that will join it to Scarborough Town Centre.

We believe that when Mertrolinx finally gets around to actually designing the Sheppard Subway Extension they may realize that this original studied route was the best option. The ridership and development potential around this subway station and the route as a whole is unrivaled.

Unfortunately there is an immediate threat to this 1992 EA approved route surviving in the short term.

There are many downtown councillors who are staunch opponents to the Sheppard Subway.

They are being aided by certain elements of the City Transportation Department who also want to suppress it permanently.

These transportation planners have conspired to remove this reserved route by stealth.

On February 27<sup>th</sup> City Council is holding a meeting to vote on changes to bring the Official Plan up to date. ( Item PH13:3)

They have removed this cross country subway route with little public notification and hope that nobody will notice. (see link below)

Once this route is out of the Official Plan the planners can rezone, sell off land or do anything they want to sabotage this potential route. They want to make sure that Metrollinx can never consider this as a better potential route again except at great cost to re-acquire the land.

At public presentations we have warned the planners they are breaking this new Bill 107 law. They don't care.

Bill 107, Getting Ontario Moving Act

"If a rapid transit project is the sole responsibility of Metrolinx, the City of Toronto and its agencies cannot take further action on that project."

Metrolinx project manager Richard Tucker who is also Vice President Commercial Management will understand how vital it is to build the Sheppard / Scarborough subway loop close to where the most ridership can be expected.

Metrolinx needs to contact the city and have them amend this OP change. Simply leave this corridor intact until optimal routes have been finalized.

Thanks

Subject: FW: Scarborough Subway Extension -Designated passenger pick-up / drop-off (PPUDO) area

Good afternoon,

It was good to reconnect with you at the Riverdale Ontario Line open house session last evening Once again, apologies for the delay in responding. As I mentioned we have had a reshuffling of teams to better align staff to current projects and those soon underway. Thank you for sharing the chronology of events. Please note that Metrolinx is in very early stages of the SSE project, and will be re-evaluating the work performed by the TTC. We appreciate your invitation to meet, and would be happy to hear your ideas, although it is too premature for us to discuss design at this time.

Presently we are concentrating on initial communications/community relations strategies incorporating social media, pop-up events and open house opportunities. Our aim is to further ignite awareness that a three stop subway extension for Scarborough is Metrolinx's course of action, and that community engagement is not only encouraged but necessary. We look forward to hearing from you on possible dates to meet with sincere thanks

Kind regards,

To: Susan Walsh@metrolinx com Cc: Peter Paz@metrolinx com; Asl olinx com; James Burchell@

Subject: FW: Scarborough Subway Extension -Designated passenger pick-up / drop-off (PPUDO) ar

Hi Susan

, former chief planner for Scarborough. I am including this introductory letter from

Other attendees will include , president of the Glen Andrews Community Association (GACA) and

of the Sheppard Subway Action Coalition (SSAC)

Hopefully Metrolinx will be able to hear our concerns and respond unlike our experience with the TTC and the City of Toronto Transportation Planners.

From June 2016 to February 2017 GACA had several meetings with the TTC and Senior Toronto Transportation Planners.

Our proposal was to have the Scarborough Subway Extension (SSE) station oriented northwest along the Official Plan approved corridor for future connection to the Sheppard Subway. The proposal was developed by Lorne Ross and publicly known as the "Big Bend"

Along the way we had also discovered the Barcelona method of building a much cheaper (25% capital cost ) subway with very minimal cut and cover surface disruption.

By using a Large Single Bore (LSB) tunnel with the station platforms stacked within the tunnel we believed that for the same money the hospital station at Lawrence could also be built and the current SRT bus station at the Scarborough Town center (STC) preserved.

During these meetings the TTC used their senior Hatch tunnel consultants (

) against us.

They consistently dismissed the idea of a Barcelona style subway as being feasible in North America

Our proposal had strong support from Scarborough politicians and resulted with a final meeting in the Mayors office February 24th 2017

At the time we didn't know the fix was in and the Mayors chief of staff Chris Eby asked up to stand down for political reasons.

The following is what we now know and is based on Hatch technical documents and Freedom of Information emails obtained by the Toronto Star

Hatch Mott-Macdonald had been awarded a contract FE85-2 by the TTC in December 2014 and were well into a 12.9 Meter LSB Barcelona style design for a 3-stop subway. The only difference was that the stations would have staggered rather than stacked platforms contained within the tunnel.

For 6 months they shamelessly let GACA propose the stacked option while not disclosing that a Barcelona staggered option had already been approved by the TTC in 2015.

On January 20th 2016 politics intervened and the SSE was downsized from a 3-stop to a 1-stop.subway.

The official reason was that by dropping 2 stops a Billion dollars could be saved and used to build the Eglinton East LRT.

Senior Transportation planners came up with a scheme to build a grandiose cut and cover subway/bus station at the STC priced at \$500 million.

Subtract 2 stations at \$500 million = 1 Billion. The Barcelona inside the tunnel station had been priced at \$200 million.

Obviously the TTC and several senior city managers were involved in a huge political cover up, some reluctantly (FOI emails).

When GACA started promoting the "Big Bend" in June 2016 almost all references to the pre 2016 Barcelona design had been removed from the city websites.

We eventually found evidence of the 12 9 meter LSB but it was quickly removed when we referred to it, luckily we have downloaded and preserved this evidence.

The 1-stop was approved by City Council in July 2017, and the self-serving City Transportation Planners had executed another successful SSE cost cover up.

By June 2018, Jennifer Keesmaat, Andy Byford, and several TTC and senior city managers have departed.

Thinking the coast is clear Hatch asked the TTC for permission to uncover and present the SSE Barcelona design in a technical paper to their peers at the June 2018 North American Tunneling Conference, Washington DC.

The authors of this technical paper were the same Hatch tunnel consultants that were brought into the "Big Bend" meetings to discredit the GACA Barcelona design proposal. We now believe that it was the Toronto city Planning Department that coerced the TTC and Hatch to dismiss our proposal

Hatch asked for this favor in order to ensure their cousins at Mott-Macdonald win the contract to build the first Barcelona style subway in North America for San Jose, CA

The Valley Transportation Authority (VTA) put out a request for bids May 15th 2018, 300 companies applied but Mott-MacDonald won the contract on January 11th 2019

This concept has proven so feasible that they have now expanded the SSE Barcelona design from a 12.9 to a 16 meter diameter LSB in order to put even more surface infrastructure inside the tunnel

GACA and the SSAC are looking for a valid explanation on why the completion of the SSE is now being delayed an extra 3 years.

Hatch has been working on the SSE tunnel since 2014. By January 2016 they were within 6 months of completing the design for a Barcelona style 3 stop subway.

As of August 31st 2019 all the SSE contracts and consultants have been transferred from the TTC to Metrolinx to complete the original 3-stop Barcelona design

We hope that these consultants now feel free to speak the truth about their pre Jan 2016 Barcelona SSE design.

The Metrolinx people we would want to meet with include

Hatch tunnel consultants, TTC contract FE85-2, Station design consultants, TTC contract FE85-5, AECOM Team 1, AECOM Team 2

Thanks

Extension -Designated passenger pick-up / drop-off (PPUDO) area Subject: Scarborough Subway

I am contacting you on behalf of the Glen Andrews Community Association (GACA) and the Sheppard Subway Action Coalition (SSAC).

Both GACA and the SSAC fully support the recent Metrolinx takeover of the Scarborough subway Extension (SSE) project.

Our community groups are very encouraged by your June 15th 2017 email with its position on PPUDO's (attached)

We have officially participated in the SSE project as designated stakeholders since 2015.

It has been a constant frustration dealing with the City of Toronto Transportation Planners and their "war on the car" ideology.

During our stakeholder meetings we were strongly discouraged from any discussion on subjects like parking or passenger pick-up and drop offs (PPUDO).

We thought we had won the PPUDO argument when our councillor at the time ( Glenn DerBaeremaker ) spoke out and demanded their inclusion.

As you indicated in your email the city and us as stakeholders were totally ignored when the SSE EPR was finally published.

There seems to be a very strong disconnect on how commuters in the suburbs interface with higher order transit

The planners seen totally unaware of how critical the kiss n ride at Kennedy station is or the cars waiting at the McCowan SRT terminus station.

Transporting our family members to transit stations and stops especially at late hours is a necessary way of life in the sprawling suburbs.

We have experienced their same one size its all attitude as stakeholders in The Scarborough Master Transportation Plan.

It's all about buses, bike paths and walking for access to the new SSE station.

We will never experience a network of subways and streetcars or a underground "Path" like these planners have in the city core.

Would you be able to assist us or direct us to someone at Metrolinx who would listen to our plea?

Also in reference to your Item (3) Interface of the SSE with Regional Express Rail.

We have also advocated for a plan known as the "Big Bend" that would use the current approved Sheppard Subway Corridor to connect the SSE to the Stouffville RER corridor.

Thanks

Subject: Metrolinx' Comments on Draft SSE EPR

#### Good morning,

Thank you for allowing us the opportunity to review the Environmental Project Report for the Scarborough Subway Extension. Please accept our apologies about the delayed submission. We recognize that some of the comments provided below have also been reflected through Metrolinx' participation in the Scarborough On-The-Move TMP, as well as through regular communication with City of Toronto staff. We look forward to continuing to engage with the City staff through ongoing consultation on those projects.

#### 1.) Designated passenger pick-up / drop-off (PPUDO) area

We note that the Bus Terminal design does not feature a designated passenger pick-up / drop-off area. Metrolinx strongly supports the City's efforts to promote transit-oriented development in the Scarborough Centre area and reduce personal vehicle usage for residents living in vicinity of transit stations.

However, we feel that PPUDOs continue to play a role in the multi-modal first mile/last mile component for many longer distance travellers, serving the needs of those residing outside the vicinity of transit station areas. This includes intercity passengers who access regional transit services either by carpooling, taxi, or a demand-based ride share service (i.e. Uber). PPUDOs may also reduce demand for nearby parking spaces and reduce spillover onto the surrounding road system.

We suggest that the City identify a PPUDO adjacent to the Bus Terminal, or an alternative location elsewhere within the wider Scarborough Centre area, possibly as part of the Scarborough On-The-Move Transportation Master Plan.

#### 2.) Fare integration

We suggest that section 4.3.4 'Bus Terminal' make reference to the ongoing efforts underway to achieve fare integration amongst local and regional transit providers throughout the GTHA. Specifically, we feel this section should reference the impact that fare integration may have on the customer experience, and the need for the design to protect for a future integrated fare scenario. This would preclude the need for costly future retrofits at a later date.

#### 3.) Interface of the SSE with Regional Express Rail

We suggest that the explanation of Regional Express Rail under section 1.7 "Transit Interface Considerations", Table 1-1 (page 5 of the report) could be expanded beyond a description of the corridor as solely a "north-south transit spine through Scarborough".

Our suggested wording:

"Transformation of the existing GO Rail system to deliver frequent two-way, all-day train service, seven days a week, on both the existing Stouffville and Lakeshore East lines that run through Scarborough, connecting passengers to both local and regional destinations."

#### 4.) Elevator redundancy

The EPR does not contain any mention of a redundant vertical access for accessible pathways (often referred to as 'elevator redundancy') in the likely event of an elevator service disruption. Given the importance of vertical access to the design of the Bus Terminal, we feel this is essential to be mentioned even at this point in the design process.

#### 5.) AODA compliance

We suggest that section 4.3.4.2 'Barrier Free Access' should make reference to the importance of ensuring AODA compliance as part of the design of the Scarborough Centre Station and the Bus Terminal.

Please do not hesitate to contact us if you have any questions about our comments above.

Sincerely,

#### Aslam Shaikh, MCIP, RPP

Good Day,

Thank you for your interest in the Scarborough Subway Extension Public Information Sessions. It is unfortunate you may not be able to attend one of our two sessions on March 3 and 5. Please be assured that our presentation information boards will be posted to our website <a href="http://www.metrolinx.com/en/greaterregion/projects/scarborough-subway-extension.aspx">http://www.metrolinx.com/en/greaterregion/projects/scarborough-subway-extension.aspx</a> no later than Tuesday, March 3rd.

We hope we see you at future public information sessions. Kind regards,

#### **JAMES BURCHELL**

Hi Metrolinx,

I noticed there is an Open House at Scarborough Civic Centre on the evening of Tuesday, March 3. I'm not sure if I will be able to attend but would the conceptual designs/information be posted online after the first round of PICs?

Regards,

Importance: High

Good day,

Our apologies for the delay in responding. We had a second session surrounding the Scarborough Subway Extension on Thursday, March 5 and are just getting to the related emails. The link below will take you to the online version of the information boards that were on display in the information session. We would appreciate your questions and/or comments at this time. Metrolinx will be arranging for the next round of information sessions later this spring as updates become available.

https://www.metrolinxengage.com/sites/default/files/dsg-2020-03-02-sse-boards-master-60611173\_sfs-jh.pdf

We appreciate your interest in the Scarborough Subway Extension and look forward to your ongoing engagement.

Kind regards, James

**Subject:** SSE Business Case Design

Hi

I opened the document SSE Business Case Design <a href="https://www.tablazed.com/2018/11/bamboo-trains-of-cambodia.html">https://www.tablazed.com/2018/11/bamboo-trains-of-cambodia.html</a>

- 1) Is there a version meant for plain folk, using common English?
- 2) Please translate

"a Business as Usual (BAU) scenario as the basis for an investment decision. The BAU assumes that "In Delivery" projects from the 2041 Regional Transportation Plan are in service, as modified by Ontario's Transit Plan1. It is noted that the BAU option does not include the existing TTC Line 3 Scarborough (also known as Scarborough Rapid Transit (SRT))."

- 3) What is BAU -Business as Usual?
- 4) What is the BAU for the SSE?
- 5) What is "In Delivery"?

"Problem and Opportunity Statement

The existing Line 2 Subway terminates at Kennedy Station. In the peak hour, over 7,000

transit users access the subway at this station, with many customers reaching the station from the Scarborough Rapid Transit (SRT) or after traveling significant distances by bus. Extending the subway further into Scarborough provides access to more of Scarborough by bringing stations closer to users, providing them with shorter journey times and an improved customer experience."

#### 6) Do you mean shorten the transit times to Kennedy Station?

"The SRT currently serves more than 38,000 riders daily and is operating over capacity during peak periods. It primarily serves riders accessing Kennedy Station to connect with Line 2. Much of the existing SRT ridership boards at Scarborough Centre station, with a majority of riders transferring from TTC bus routes traveling from north and west of the station. The SRT vehicles are at the the end of their serviceable life. Without the SRT, existing transit users would spend additional time on buses accessing Line 2 at Kennedy Station or in some cases choosing to connect by bus to a Line 1 Station. There is also a concern among some that operating a replacement bus network to provide these connections would strain the local road network and overwhelm the bus and passenger facilities at Kennedy Station. Replacing the SRT provides an opportunity to address capacity constraints at TTC bus facilities at Scarborough Centre Station. The existing transfer between the SRT and Line 2 at Kennedy is perceived as cumbersome by transit riders and a transit solution without a transfer would provide a benefit. Scarborough Centre is an emerging mixed-use hub in the City of Toronto. There is an opportunity for a rapid transit investment to contribute to the success of this important transit supportive community."

#### 7) Do you mean there is additional hardship to passengers when the SRT closes down?

"Business as Usual A Business As Usual scenario is used as a base case in this Preliminary Design Business Case to give us a comparator for the options under consideration. The 2041 Regional Transportation Plan, adopted by the Metrolinx Board of Directors in 2018, identifies as Priority Action 1.1 the delivery of 14 transit projects by 2025. These projects are known as "In Delivery," meaning they are currently in advanced stages of design or under construction, and include the GO Expansion Program, Eglinton Crosstown, Finch West LRT, Sheppard East LRT, Scarborough Subway Extension, Highway 7 BRT and Yonge BRT. The 2041 "In Delivery Network" is included in the Business As Usual (BAU) scenario, with a few modifications reflecting recent decisions: • Ontario Line is included as a new line running from Don Mills and Eglinton to Exhibition GO station. • Yonge North Subway is included as extension of Line 1, with five stations • Eglinton Crosstown Western Extension is included as an underground extension of the Eglinton Crosstown; • Sheppard East is included as a six station subway of Line 4 Sheppard, rather than as an LRT Notably, the Business as Usual scenario evaluated in this Business Case does not include the existing Scarborough Rapid Transit (SRT), which currently operates between Kennedy Station and McCowan Station. Based on available information, it is understood that the SRT would require substantial investment to remain operational during the business case's time frame (beyond 2029/2030) and so it would be inappropriate to include it for comparison purposes. It has been assummed that a replacement bus network has been established to provide the type and volume of transit connections required to serve former SRT passengers. In reviewing this document it will be of value to keep this assumption in mind as the Scarborough Subway Extension is not being compared against the SRT, but rather against transit network scenario where Scarborough is largely served by surface route buses. As is typical, the Business As Usual scenario also assumes reasonable improvements to existing surface transit across the region."

8) What is this about? and all the rest I am lost. help.

**Subject:** Scarborough Subway Extension Open House

1) What is important to me about this project?

This project does not convince me that it improves public transit because, for me, the two pressing transit issues are that the Bloor/Danforth subway is crowded and the Yonge subway is over-crowded.

I find a fault in the reasoning to extend an already crowded Bloor/Danforth subway. This will only make worse the crisis at Yonge/Bloor,

I sense emotional reasons for the SSE,

- 1. An urgent need to get something done which may become an unwise spending of money
- 2. The notion that it would be a waste of money not to use work from money already spent is not a convincing reason to continue, if the project doesn't address our needs.

These emotional reasons are not good enough when \$6 billion is at stake. I feel \$6 billion can be better spent in other ways.

2)What would you like to hear more about?

As more of the project is developed, I would like to know more accurate estimates on costs.

3)How would you like to hear from us going forward?

Use email notifications for project updates which are posted at <a href="http://www.metrolinx.com/ScarboroughSubway">http://www.metrolinx.com/ScarboroughSubway</a>

Use a moderated online forum format, where all questions and answers can be classified and viewed by the whole public.

#### 4) Is there anything missed?

There is a suggestion that this project is advancing because of political power. I believe the civil servants work in the interest of citizens, regardless of the political regime in place. The professional evaluations by transit professionals should be public, and protected from retribution by the politicians. Dissenting views could be submitted anonymously to a public information office that vets the authenticity of a report and releases it publically.

I am disappointed in the presentation of the business case analysis <a href="http://www.metrolinx.com/en/regionalplanning/projectevaluation/benefitscases/2019-02-28\_SSE\_Preliminary\_Design\_Business\_Case.pdf">http://www.metrolinx.com/en/regionalplanning/projectevaluation/benefitscases/2019-02-28\_SSE\_Preliminary\_Design\_Business\_Case.pdf</a>

At the very least the Executive Summary should be understable to the public.

As it is not, the authors are in contempt of duty.

I personally do not understand very much of the report and my frustration makes me feel there was a deliberate attempt to obfuscate, furthering the sentiment of contempt of public duty.

Others such as Steve Munro, claim to have understood the document and find great fault in its assumptions and thus are dubious of the report's conclusion.

Standard operating practice for project management progresses from problem definition, enumeration of alternative solutions and business case analysis of each alternative. Apparently only one solution (SSE) was evaluated against a do nothing case (use buses instead of subway).

Obviously any case should functionally out perform a do nothing case but the business case analysis measures a value for money. It is not clear that spending \$6 billion to benefit 158,000 daily riders is good value for money. Moreover, an alternative project such as a 5 minute SmartTrack would make a more apt comparison to the SSE and do nothing. Professionals should be able to conduct evaluations and have the results disseminated through a different body so as to protect civil servants from retribution.

I believe the public interest must confront dubious political agendas.

I am forced to resort to an unreliable source to interpret the Business Case Analysis which appears contemptuous of the intended recipient, the public.

Feedback on the SSE and Stouffville public information sessions

I have past experience with public sessions for public transit projects.

Metrolinx - Crosstown LRT (Scarborough), Stouffville RER EA, Lakeshore East EA,
Toronto/SmartTrack
Toronto/TTC - SSE, DRL

I feel the recent Metrolinx blitz of public sessions are, by far, the best organized! My impression of the goals of these sessions were to inform the public and gain feedback. I was impressed with the, all hands on deck, turn out of staff. I think any possible question about the projects could be answered by the staff assembled.

In the past sessions I've attended, the real motive of staff was to bias the agenda towards favouring the project. I detected no such motive in the current round of public sessions. All answers were based on the best information available. In addition, I was impressed with the depth and experience of the staff on the project.

One of criticisms of previous projects, was the poor communication in publicizing the events. I think these recent events used every reasonable means to publicize the sessions.

The following is my opinion. The two sure fire ways to attract attendance to public sessions

are for a project to disrupt a neighbourhood or use political channels to organize the sessions (politicians assure grass root turnouts). These projects did not disrupt the community [much] and there was no political interference. So the general public is too busy in their day to day life, car-centric or apathetic to attend a public information session.

My suggestion is to concentrate the publicity on the users of public transit. Blitz the subway cars and billboards, message on the bus and streetcar notification panels and GO cars and billboards. Prepare a 4 page folded handout of the highlights of the information about the projects and distribute them at all subway and GO stations. Provide email address for email feedback, a telephone number for voice mail feedback and even a snail main address for someone willing to spend the \$1 for postage. Follow this up with kiosk information booths in selected subway and GO stations for a week, that accept handwritten submissions, you can use microphones tied to computers where people can orally dictate their submissions and have it transcribed on screen. Staff at these kiosks can answer questions. Transit users are the people with transit issues and many will have an axe to grind. I fear even this idea will have limited success.

I think you have done the best job possible to engage the public. Most just don't want to come to the party.

RE: Scarborough Subway Extension

Attachments: <u>image001.png</u>

Good morning

Thank you for sharing your comments. Although we appreciate and value your opinion, all three governments have agreed on a subway extension for Scarborough. Metrolinx has been commissioned by the Province of Ontario to proceed with this option. We do look forward to your input on this model and will be arranging for the next round of public information sessions as our studies progress. In the meantime, we encourage residents to sign up to our email distribution list to remain informed on updates and upcoming community engagement opportunities. Should you be interested in this, please respond to this email and your contact coordinates will be added to our distribution list.

Kind regards,

Subject: Scarborough Subway Extension

To whom it may concern:

I would like to take this opportunity to say that it would be better for Scarborough residents to have an LRT for transit rather than a subway from Kennedy Stn. An LRT would serve more people and be built faster than a subway. I think the subway would be in the interests of developers rather than the people. There are many people who do not live near the Scarborough Town Center and they would have to commute to STC or Kennedy Stn. by bus. An LRT would make it easier and faster for those who do not have easy access to the subway. Thank you for listening to my concerns.

Yours sincerely,

Sent: March-08-20 12:18 PM

To: Scarborough Subway Extension

Subject: Concerns about Scarborough Subway extention

Dear sir/madam,

I am writing concerning Scarborough subway extention.

I am one of the residents in a bolding that is directly on MCcowan road, at MCcowan and ellesmere, at 61 Town Center crt and I am afraid that when the train pass beneath my budding ,it may cause lots of noise due to vibration of the building wall, because I saw this problems in some buildings at Yonge street, above line 1

So can you please tell me, will you follow any technique to insulate buildings in this area from the noise of train or there is no technique to prevent this problem from happening. Thank you

Subject: Clarification on response - Noise and Vibratioin

Attachments: image001.png

Metrolinx is responsible for bringing high order transit to all areas of the city. Scarborough is one of those areas, and the 3 stop subway extension will be an important component in building better, faster and more reliable transit to the region. Equally important is our dedication to continually improving our approach to managing noise and vibration. Our Subway Program noise and vibration management approach will consider the guidance provided in the Ontario Ministry of the Environment and Energy/GO Transit Protocol for Noise and Vibration Assessment (MOEE/GO Transit, 1994) and Ontario Ministry of the Environment and Energy/ Toronto Transit Commission Protocol for Noise and Vibration Assessment (MOEE/TTC, 1993).

Where we anticipate that unmitigated noise and vibration levels will exceed the levels in these protocols, Metrolinx is committed to implementing mitigation measures as necessary. Measures will be considered to reduce noise and vibration impacts at source which could include the use of continuously welded (seamless) rail and high resilient rail fasteners.

Another key element of this project, and perhaps the most important to you, is that the Scarborough Subway Extension is planned to be approximately twice as deep as Lines 1 and 2, thereby reducing noise and vibrational impacts to our neighbouring residents.

Metrolinx looks forward to keeping our residents equipped with information, and updates will be provided regularly. We will also be hosting public information sessions as project planning and design progresses. Please visit our website at <a href="https://www.metrolinxengage.com">www.metrolinxengage.com</a> for continued updates. As well, we encourage our neighbours to be a member of our email distribution list. Should you be interested, please respond to this email and we will be happy to add your contact information.

Thank you for your interest in Metrolinx's Subway Extension project for Scarborough as we look forward to seeing you at our next community engagement event.

Good afternoon,

Thank you for sharing your opinion with us. We acknowledge that some residents prefer LRTs over the Subway Extension. Please know that all three governments have adopted the subway platform and Metrolinx has been commissioned to further develop this model. Our two public consultations, March 3<sup>rd</sup> at Scarborough Civic Centre, and March 5<sup>th</sup> at Scarborough Grace Church were well attended. The general sense from these events is that the majority of Scarborough residents see the benefits of fluid transit to Scarborough Centre and beyond, and not having to transfer at Kennedy. We did receive some very good feedback on the information display boards, and will be back again late spring with further updates.

Your engagement is important to this process. We invite residents to keep informed by visiting our website <a href="www.metrolinxengage.com">www.metrolinxengage.com</a> and follow the links to see updates regarding the subway extension as well as other projects and studies underway to provide Scarborough with better transit options. If you have not already done so, we encourage residents to add their contact information to our email distribution list, by which future community engagement events will be shared. If you are interested, please respond to this email and we would be happy to include you.

Thank you

Why do you even bother having community consultation when the decisions have already been made? Nobody I talked to in Scarborough believes that a Subway is a good option. Metrolinx has recognized this with the publishing of their last case study.

Show some common sense. take the money you're going to be wasting on a subway and put it into an LRT that will serve a higher number of people.

To:

**Subject:** RE: Scarborough Subway

Attachments: <u>image001.png</u>

Good afternoon,

Metrolinx thanks you for your remarks as they will be added to all comments, questions and concerns presented to us via email, website and other social media channels. Metrolinx has been mandated by the Province of Ontario to further study the Scarborough Subway platform, which has been agreed upon at the municipal and federal levels.

At this time, we are encouraging residents to share their contact coordinates so they may be informed on next steps and any updates on community engagement, in person or virtually, given the current climate. Your engagement is important to this process. Please indicate via response to this email that you would like to be included, and Metrolinx will ensure your contact information noted below is incorporated.

Sincere thanks,

Subject: RE: TTC ScarboroughSubwayExtension

Attachments: <u>image001.png</u>

Good morning,

Thank you for your email. As you are aware the Province of Ontario assumed carriage of the Scarborough Subway file in 2019. As a result, Metrolinx is performing its due diligence and an environmental process review (EPR) addendum is underway, in light of the project returning to a 3-stop extension platform. The information boards Tuesday night at the Civic Centre reflect the information we presently have. We will be returning later in the spring with updates. Please visit our website <a href="https://www.metrolinxengage.com/en/engagement-initiatives/scarborough-subway-extension">https://www.metrolinxengage.com/en/engagement-initiatives/scarborough-subway-extension</a> for updates and information regarding additional community engagement opportunities. As well, with your permission, we would like to add your contact information to our distribution to ensure you receive upcoming communications as they happen.

Kind regards, James

Good Day,

About 10 years ago I went to a meeting at Scarb. Civic Centre about the Scarborough subway extension hosted by the TTC. there was very little information three stops etc. March 5th meeting about the Scarborough subway extension hosted by Metrolinx same very little information considering that in March 2017 there was to be design work to be provided by Metrolinx to the Toronto city council about the Scarborough subway extension and I quote 30 per cent of its design work is completed, which staff say could happen sometime in the second quarter of 2018. end quote. Where is that design work from 2018.

I talk to several of your staff who told me that they are in contact with the TTC planning and are building on previous work. Where is that design work that was to be provide to the Toronto city

council in the first quarter of 2018.

Please send my a copy of design work, there was no design work at your March 5th 2020 meeting.

## Statement of Qualifications and Limitations

The attached Report (the "Report") has been prepared by AECOM Canada Ltd. ("AECOM") for the benefit of the Client ("Client") in accordance with the agreement between AECOM and Client, including the scope of work detailed therein (the "Agreement").

The information, data, recommendations and conclusions contained in the Report (collectively, the "Information"):

- is subject to the scope, schedule, and other constraints and limitations in the Agreement and the qualifications contained in the Report (the "Limitations");
- represents AECOM's professional judgement in light of the Limitations and industry standards for the preparation of similar reports;
- may be based on information provided to AECOM which has not been independently verified;
- has not been updated since the date of issuance of the Report and its accuracy is limited to the time period and circumstances in which it was collected, processed, made or issued;
- must be read as a whole and sections thereof should not be read out of such context;
- was prepared for the specific purposes described in the Report and the Agreement; and
- in the case of subsurface, environmental or geotechnical conditions, may be based on limited testing and on the assumption that such conditions are uniform and not variable either geographically or over time.

AECOM shall be entitled to rely upon the accuracy and completeness of information that was provided to it and has no obligation to update such information. AECOM accepts no responsibility for any events or circumstances that may have occurred since the date on which the Report was prepared and, in the case of subsurface, environmental or geotechnical conditions, is not responsible for any variability in such conditions, geographically or over time.

AECOM agrees that the Report represents its professional judgement as described above and that the Information has been prepared for the specific purpose and use described in the Report and the Agreement, but AECOM makes no other representations, or any guarantees or warranties whatsoever, whether express or implied, with respect to the Report, the Information or any part thereof.

Without in any way limiting the generality of the foregoing, any estimates or opinions regarding probable construction costs or construction schedule provided by AECOM represent AECOM's professional judgement in light of its experience and the knowledge and information available to it at the time of preparation. Since AECOM has no control over market or economic conditions, prices for construction labour, equipment or materials or bidding procedures, AECOM, its directors, officers and employees are not able to, nor do they, make any representations, warranties or guarantees whatsoever, whether express or implied, with respect to such estimates or opinions, or their variance from actual construction costs or schedules, and accept no responsibility for any loss or damage arising therefrom or in any way related thereto. Persons relying on such estimates or opinions do so at their own risk.

Except (1) as agreed to in writing by AECOM and Client; (2) as required by-law; or (3) to the extent used by governmental reviewing agencies for the purpose of obtaining permits or approvals, the Report and the Information may be used and relied upon only by Client.

AECOM accepts no responsibility, and denies any liability whatsoever, to parties other than Client who may obtain access to the Report or the Information for any injury, loss or damage suffered by such parties arising from their use of, reliance upon, or decisions or actions based on the Report or any of the Information ("improper use of the Report"), except to the extent those parties have obtained the prior written consent of AECOM to use and rely upon the Report and the Information. Any injury, loss or damages arising from improper use of the Report shall be borne by the party making such use.

This Statement of Qualifications and Limitations is attached to and forms part of the Report and any use of the Report is subject to the terms hereof.

### **Executive Summary**

Metrolinx proposed an amendment to the Scarborough Subway Extension, resulting in the extension of the proposed alignment, two new stations and a revised station location at the Scarborough Centre. An Environmental Project Report (EPR) Addendum has been prepared following the Transit Project Assessment Process (TPAP), as prescribed in Ontario Regulation (O. Reg.) 231/08 under the Environmental Assessment Act. As a critical part of the Addendum process and component of the TPAP, public consultation and engagement has taken place in-person across Scarborough and online. Metrolinx held four pop-up sessions in February 2020 to reach residents located across Scarborough at accessible, high-traffic locations/ events they were already visiting and to encourage attendance at the March information sessions. Metrolinx also held two identical information sessions in March 2020 to introduce the Project, provide background information and details on studies underway and gather feedback from the local community. Consultation materials were also shared online for interested individuals to engage from the comfort of their own home. Results gathered from these sessions and online engagement activities are summarized in this report and will be used to help inform the decision-making process going forward, along with the development of the EPR Addendum.

### **ES1.** Engagement Process

To initiate and encourage participation in the community engagement process, Metrolinx applied a number of promotional tactics, and facilitated community engagement initiatives/ opportunities. Promotional tactics included the development of a dedicated Project webpage (www.metrolinx.com/scarboroughsubway) to provide key information and documents for download and review, Canada Post mailouts of information postcards, print and digital advertisements, emails to stakeholders, blog posts and social media posts and advertisements.

Engagement activities included four pop-up sessions, two information sessions and online engagement through the Metrolinx Engage website. These activities allowed interested individuals to learn more about the Project, engage in one-on-one conversations with the Project Team and provide feedback to influence the decision-making process. More information related to the engagement process is provided in **Section 2** of this report.

### ES2. Key Participant Feedback

Key findings gathered from the public through in-person and online engagement activities identified reoccurring themes including: concerns over the associated costs and timeline of the Project; the alignment and design of the system; and, potential community and environmental impacts during construction and operation. The majority

of individuals who attended information sessions and participated online expressed interest in learning more about the alignment and design of the Scarborough Subway Extension and proposed new ideas for alternative alignment options and future opportunities to connect the regional transit network. They also noted that email is the best way to keep informed of Project updates. Those who attended pop-up sessions expressed interest in future regional transit connectivity options, accelerating Project timelines, and more details on the Project design.

Detailed, themed summaries of participant feedback are provided in **Section 3** of this report.

### ES3. Next Steps

Public participation is a key input into the decision-making process for the Scarborough Subway Extension. Metrolinx will continue to engage the public through the study process, with the next round of engagement currently anticipated in June 2020.

More information related to next steps is provided in **Section 4** of this report.

- Is there anything we missed?

### 1. Introduction

### 1.1 Background

The City of Toronto (the City) and Toronto Transit Commission (TTC) completed an Environmental Project Report (EPR) for the Scarborough Subway Extension (SSE; the Project) in August 2017. The Project was granted Notice to Proceed, with no conditions, by the Minister of the Environment, Conservation and Parks (MECP) in October 2017. The SSE EPR assessed a 6.2-kilometre (km) extension of the existing Bloor-Danforth Subway (Line 2) from Kennedy Station to Scarborough Centre, via Eglinton Avenue, Danforth Road and McCowan Road. Project elements assessed in the EPR included one (1) subway station with a bus terminal at Scarborough Centre, ancillary features such as vent shafts and traction power substations, and emergency exit buildings (EEB). The EPR also described anticipated construction methods and sequencing.

Since the completion of the 2017 EPR, a number of changes have been proposed that are inconsistent with the 2017 EPR design. These changes are being assessed in accordance with the EPR Addendum process prescribed in Ontario Regulation (O. Reg.) 231/08 under the *Environmental Assessment Act*.

The SSE is now proposed as an approximately 8 km line, extending from the east end of the existing Kennedy Station platform to a new terminal station at Sheppard Avenue East, via Eglinton Avenue East, Danforth Road and McCowan Road. Stations will be located along the alignment at Lawrence Avenue East and Scarborough Centre as outlined in Figure 1-1.

The Project has been assessed under the Transit Project Assessment Process (TPAP) addendum process, as prescribed in O. Reg. 231/08 under the *Environmental Assessment Act*. As part of this assessment, Metrolinx

Figure 1-1: Study Area

held two identical information sessions at accessible locations in Scarborough to

introduce the Project, provide background information and details on studies underway and gather feedback from the local community. Results gathered from these sessions are summarized in this report and will be used to help inform the decision-making process going forward, along with the development of the EPR Addendum.

The <u>Preliminary Design Business Case (PDBC)</u> for the three-stop Scarborough Subway Extension was published on February 28, 2020, ahead of the information sessions. This publication is being followed by the release of the EPR Addendum, which includes a summary of public engagement, including this report, and will be available for a 30-day public review and comment period. Following the public review of the EPR Addendum, further public engagement will take place throughout the project procurement process and construction, leading up to the revenue date, as shown **Section 4** of this report.

### 1.2 Purpose of Report

This report summarizes the communication and engagement activities used, as well as the feedback received from stakeholders and members of the public as a result of those activities, during the first phase of engagement for the Project.

This report combines the comments received at information sessions, through online engagement via Metrolinx Engage, and through direct email correspondence. All public input will be considered by the Project Team and form part of the public record.

### 2. Communication and Engagement

### 2.1 Communication and Engagement Process Overview

The first phase of engagement focused on the following topics:

- Why we are here
- Who is Metrolinx?
- What is the Scarborough Subway Extension?
- Regional Transit Network
- Key milestones and timeline
- The Scarborough Subway Extension benefits
  - Improved access and strong connections
  - Travel time savings
- Less crowding on your commute
- Stations
- What studies are happening now?
  - Assessment of design changes
  - Environmental studies underway
  - Natural environment
  - Cultural heritage
  - Noise and vibration
  - Air Quality
  - Traffic
- How can you stay involved and updated?
  - Share your feedback
  - Thank you for coming

In-person and online communication and engagement tactics are detailed in **Sections 2.2 and 2.3.** A summary of tactics is listed below:

- Newspaper advertisements and postcard mailouts to inform members of the public about the Project and upcoming information sessions;
- An English (<a href="http://www.metrolinx.com/en/greaterregion/projects/scarborough-subway-extension.aspx">http://www.metrolinx.com/fr/greaterregion/projects/scarborough-subway-extension.aspx</a>) webpage (<a href="http://www.metrolinx.com/fr/greaterregion/projects/scarborough-subway-extension.aspx">http://www.metrolinx.com/fr/greaterregion/projects/scarborough-subway-extension.aspx</a>) webpage (<a href="https://www.metrolinx.com/fr/greaterregion/projects/scarborough-subway-extension.aspx">https://www.metrolinx.com/fr/greaterregion/projects/scarborough-subway-extension.aspx</a>) webpage (<a href="https://www.metrolinx.com/fr/greaterregion/projects/scarborough-subway-extension-aspx">https://www.metrolinx.com/fr/greaterregion/projects/scarborough-subway-extension-aspx</a>) webpage (<a href="https://www.metrolinx.com/fr/greaterregion/projects/scarborough-su
- A social media strategy, including posts on Facebook and Twitter leading up to and during the information sessions;
- Online engagement through Metrolinx Engage including an 'Ask a Question' feature, key input opportunities on main topics and an online feedback form;
- Take-home materials including high-level information cards that provided a brief overview of the Scarborough Subway Extension and alignment maps; and
- Information sessions held in two accessible locations within Scarborough, giving community members the opportunity to discuss the Project, provide input and ask questions directly to the Project Team.

Communication materials were designed to make it easy for the public to get involved and to be meaningful, transparent, inclusive and accessible. With the aim to create an inclusive public participation process, in-person engagement was mirrored online through the Scarborough Subway Extension webpage.

### 2.1.1 Communication and Engagement Goals

The following engagement activities allowed the Project Team to:

- Introduce themselves and provide background information;
- Introduce the study process and current design and environmental studies underway for the Scarborough Subway Extension (e.g., alignment and station locations);
- Engage with interested members of the public and stakeholders, including one-onone discussions; and
- Gather feedback related to key engagement questions to help inform the decisionmaking process.

### 2.2 Communication and Promotional Tactics

As part of the communication and engagement strategy, a number of activities were carried out to notify and promote the Scarborough Subway Extension and invite attendance at information sessions.

### 2.2.1 Scarborough Subway Extension Webpage

The Scarborough Subway Extension webpage

(<u>www.metrolinx.com/scarboroughsubway</u>) incorporates requirements outlined in the *Accessibility for Ontarians with Disabilities Act* (AODA) and was created in both English and French (<u>www.metrolinx.com/metroscarborough</u>) to serve as an information and engagement hub prior to, and during in-person engagement activities. The webpage provides interested individuals with:

- Project information;
- Copies of community notices;
- Links to background information such as the PDBC;
- Ways to get involved, including signing up for updates and a link to the Metrolinx Engage website; and
- Project team contact information.

The Project webpage will continue to be updated to share more information as planning for the Scarborough Subway Extension progresses. Screenshots of the Project webpage can be found in **Appendix A**.

### 2.2.2 Project Distribution List

A mail/ email contact list was developed at the outset of the study process. Email contacts were collected through the Metrolinx Engage website (<a href="www.metrolinxengage.com">www.metrolinxengage.com</a>), the City of Toronto and TTC's <a href="Scarborough Subway">Scarborough Subway</a>
<a href="Extension Environmental Project Report">Extension Environmental Project Report</a>, published in 2017, previous engagement activities, the information sessions, and through existing email lists from local Councillors. The preliminary list was used to invite the public and stakeholders to take part in information sessions. Additional contact information gathered during this round of engagement – through sign-in sheets at public information sessions and those who subscribed to the Project Distribution List via the Project webpage (<a href="www.metrolinx.com/scarboroughsubway">www.metrolinx.com/scarboroughsubway</a>) – will be used to inform individuals of future Scarborough Subway Extension engagement, news and updates. Individuals have the opportunity to subscribe or unsubscribe to the project distribution list at any time.

### 2.2.3 Postcard Mailouts

A postcard was created to notify members of the public about the Scarborough Subway Extension information sessions. A total of 32,201 postcards were mailed to addresses within at least a 150 metre radius of the proposed Scarborough Extension alignment – from Finch Avenue East in the north, Markham Road in the east, St. Clair Avenue East in the south, and Birchmount Road in the west – on February 24, 2020 in order to reach and inform all potentially impacted individuals. The mailout area was comprised of apartments (52.5%), houses (39.4%) and businesses (8.1%). The postcard is provided in **Appendix B**.

### 2.2.4 Print Advertisements

Media advertising in newspapers notified stakeholders and members of the public about the first round of information sessions. The advertisements are provided in **Appendix C**. **Table 2-1 Print Advertisements** includes the advertisement outlets used to notify the community along with corresponding dates:

**Table 2-1: Print Advertisements** 

| Media Outlet                         | Date                   |
|--------------------------------------|------------------------|
| Traditional Newspaper Advertisements |                        |
| Toronto Star                         | February 20 & 27, 2020 |
| Scarborough Mirror                   | February 27, 2020      |
| Le Metropolitan                      | February 27, 2020      |
| Caribbean Camera                     | February 27, 2020      |
| Toronto L'Express                    | February 28, 2020      |
| Senthamarai                          | February 28, 2020      |
| Gurjarati                            | February 28, 2020      |
| Sing Tao                             | February 29, 2020      |
| Ming Pao                             | February 29, 2020      |

### 2.2.5 Digital Advertisements, News Features and Metrolinx's Blog

In addition to print media, digital copies, news features and blog posts were also utilized. A news feature was published on the Metrolinx Blog (<a href="www.blog.metrolinx.com">www.blog.metrolinx.com</a>) on February 28, 2020, featuring the Scarborough Subway Extension. Blog posts featuring the Scarborough Subway Extension will continue to be published on an ongoing basis as the Project progresses. The advertisements are listed in **Appendix C** and **Table 2-2** below illustrates the publication date and media outlet.

**Table 2-2: Digital Advertisements** 

| Media Outlet           | Date    |  |  |  |
|------------------------|---------|--|--|--|
| Metrolinx Blog         |         |  |  |  |
| Metrolinx News Feature | Ongoing |  |  |  |

### 2.2.6 Online Advertising (Social Media)

A paid social media strategy was used to drive awareness leading up to the information sessions on Metrolinx's Facebook and Twitter pages. Event advertisements were posted on Facebook over one week prior to events and one boosted Twitter post deployed one week in advance of the first information session to drive community members to the project webpage. All social media posts published during the first phase of engagement for Scarborough Subway Extension are provided in **Appendix D**.

### Facebook: @metrolinxofficial

Two event pages (one per information session).

### Twitter: @metrolinx

One Tweet promoting the information sessions on March 3 and 5, 2020.

**Table 2-3** lists the social media outlets used to notify the public about the information sessions along with the corresponding publishing dates.

Table 2-3: Social Media Schedule

| Social Media Outlet  | Date              |  |  |
|----------------------|-------------------|--|--|
| Social Media         |                   |  |  |
| Facebook Event Pages | February 21, 2020 |  |  |
| Twitter Post         | February 25, 2020 |  |  |

### 2.3 Community Engagement

As part of the communication and engagement strategy for Scarborough Subway Extension, a number of activities were carried out to engage and seek feedback on the Scarborough Subway Extension.

### 2.3.1 **Pop-ups**

Four pop-up sessions were held by Metrolinx Community Relations staff in February 2020 to reach residents located across Scarborough, specifically within the impacted wards, within the study area at accessible, high-traffic locations they were already visiting and to encourage attendance at the information sessions, as outlined in **Table 2-4** below:

**Table 2-4: Pop-Up Session Details** 

| Date                               | Time                      | Location   | Approximate Number of Participants |
|------------------------------------|---------------------------|--|------------------------------------|
| Tuesday,<br>February 25,<br>2020   | 9:00 a.m. –<br>12:00 p.m. | Scarborough Health Network –<br>General Hospital Campus<br>3050 Lawrence Avenue East,<br>Scarborough, ON | 25                                 |
| Tuesday,<br>February 25,<br>2020   | 6:00 p.m. –<br>8:00 p.m.  | Don Montgomery Recreation<br>Centre<br>2467 Eglinton Avenue East,<br>Scarborough, ON                     | 15                                 |
| Wednesday,<br>February 26,<br>2020 | 10:00 a.m. –<br>1:00 p.m. | Scarborough Town Centre<br>300 Borough Drive, Scarborough,<br>ON   | 35                                 |
| Wednesday,<br>February 26,<br>2020 | 2:00 p.m. –<br>4:00 p.m.  | Oriental Centre Shopping Mall<br>4438 Sheppard Avenue East,<br>Scarborough, ON                           | 10                                 |

These pop-up sessions included information on various topics including GO Transit schedules, fares and customer perks and details relating to east-end Metrolinx projects. Each of the pop-up sessions included the following materials:

- Kids GO Free information sheet;
- PRESTO information sheet;
- Niagara Weekend Trip Schedule;

- Regional Transit Network Map;
- Scarborough and Durham Region Bus Rapid Transit (BRT) Overview;
- Scarborough Subway Extension Overview;
- Eglinton Crosstown LRT pamphlets; and
- Metrolinx buttons, train schedules, train and LRT cut-outs and rail safety tips.

Pop-up sessions attracted an approximate total of 85 passers-by, as broken down in Table 2-4.

Summaries of each pop-up session are available in Appendix E.

### 2.3.2 Metrolinx Engage

Metrolinx has a dedicated webpage for the Scarborough Subway Extension Project (<a href="https://www.metrolinxengage.com/en/engagement-initiatives/scarborough-subway-extension">https://www.metrolinxengage.com/en/engagement-initiatives/scarborough-subway-extension</a>). This webpage provides high-level information, key facts, official documents, public consultation and engagement materials, and information for the public about how to get involved in the Project and how to get in contact with Metrolinx. The webpage includes links to information session materials (e.g., display boards), the 'Ask a question' form where participants provide their name, topic and question in a fillable form that gets submitted to the Project Team, and a virtual feedback form that mimics the feedback forms provided in-person at the information sessions. Questions on the virtual feedback form include:

- What is most important to you about this Project?
- What would you like to hear more about?
- How would you like to hear from us going forward?
- Is there anything we missed? Please let us know if you have additional thoughts or concerns about the Scarborough Subway Extension.

All submitted comments and questions received through Metrolinx Engage have been incorporated in **Section 3** and are provided in **Appendix H**.

### 2.3.3 Information Sessions

Two information sessions were held in March 2020 to reach residents located within the study area, as outlined in **Table 2-5** below:

**Table 2-5: Information Session Details** 

| Date                      | Time                     | Location  | Number of Signed-in<br>Participants |

Each of the information sessions included the following activities and materials:

- Sign-in sheet/ sign-up for updates (also available online);
- Take home materials such as a tent card and Scarborough Subway Extension maps;
- Display boards (also available online);
- Feedback form (also available online); and
- One-on-one discussions between attendees and Project Team members.

### Sign-in Sheets

Upon entering the information sessions, members of the public were greeted at the welcome table and encouraged to sign-in and provide their name and email address to be added to the project mailing list. They received a feedback form and a pen along with an overview of the meeting format (open house). In total, 188 individuals signed in at the information sessions, including 122 at the Scarborough Civic Centre and 66 at Grace Church. Additional participants attended each information session, but were not counted in the total numbers as they chose not to sign-in. Sign-in sheet templates can be found in **Appendix F**.

### **Take-home Materials**

Materials including a tent card and the Scarborough Subway Extension map were available at each information session for attendees to view and take home. The foldable "tent" information card provided a brief overview of the Project with links to the Project website where people could go to receive more information. The Scarborough Subway Extension map showed the planned alignment with the three proposed station locations. These materials are provided in **Appendix F**.

### **Display Boards**

Display boards available at the information sessions focused on:

- Key milestones;
- The purpose of delivering the Scarborough Subway Extension;
- What the Scarborough Subway Extension will include (e.g., design features, connections to transit, access to transit and jobs, anticipated capital costs);
- What is being planned for the future;
- Benefits of the Scarborough Subway Extension;
- Assessment of the design changes from the 2017 EPR;
- Station locations; and
- Studies currently underway.

The public was given the opportunity to freely explore each of the display boards. Subject Matter Experts were also present to engage in one-on-one and small group discussions and answer questions. The display boards were also posted online to the Metrolinx Engage website following the information sessions and are provided in **Appendix E**.

### **Feedback Forms**

Feedback forms provided information session attendees with an opportunity to provide their thoughts and ideas related to key engagement questions and key elements of the Scarborough Subway Extension project. Feedback forms were provided to each attendee upon arrival for completion prior to exiting the information sessions, or for completion at home within two weeks of the information session, to be returned to the project team via email or regular mail. A total of 71 feedback forms, in addition to seven handwritten notes, letters, or other documents and six responses via Metrolinx Engage were received and are provided in **Appendix G** and **Appendix H**, with personal information redacted. The feedback form template is provided in **Appendix F**.

### **One-on-One Discussions**

Throughout the entirety of each information session, Project Team members, including technical specialists and the consulting team, were available to participate in one-on-one discussions with attendees. Technical specialists stood near display boards relating to their area of expertise to receive feedback, answer questions and provide clarity to

attendees. Through these discussions, attendees were able to learn more about the Project and receive specific details related to their areas of concern or interest.

### 2.3.4 Engagement Questions

Project Team identified four key engagement questions for the first phase of information sessions. The public was invited to provide their feedback to these key engagement questions through the feedback form provided at information sessions and online via Metrolinx Engage.

The feedback form (**Appendix F**) provided at the Information Sessions and mirrored online asked:

- What is most important to you about this project?
- What would you like to hear more about?
- How would you like to hear from us going forward?
- Is there anything we missed? Please let us know if you have additional thoughts or concerns about the Scarborough Subway Extension.

### 3. Summary of Participant Feedback

### 3.1 Overview of Feedback Received

Many comments were received from stakeholders and the public during the first phase of engagement for the Scarborough Subway Extension, demonstrating a strong interest in the key engagement topics/ questions outlined in **Section 2 – Engagement Process Overview: Communication and Promotional Tactics**. The following sections highlight the key findings and level of public interest related to these various topics/ questions as identified through in-person and online engagement activities. All responses summarized in this section of the report were received during the two information sessions and online engagement. Overall themes that emerged from the feedback include:

- Costs and Timeline:
- Alignment and Design;
- Community Impacts; and
- Environmental Impacts.

All feedback collected during the first phase of engagement for the project is provided in **Appendix H**.

### 3.2 Pop-up Sessions

At the pop-up sessions, the following questions and comments related to the Scarborough Subway Extension were received:

- When will the Scarborough Subway Extension be built?
- Are station/ stop locations final?
- Will the Scarborough and Durham Region BRT be built prior to the Scarborough Subway Extension?
- Will Sheppard Line 4 connect to the Scarborough Subway Extension's station at Sheppard Avenue and McCowan Road?
- Will the Scarborough Subway Extension be operated by Metrolinx or TTC?
- Wil the Scarborough Subway Extension end at Sheppard Avenue and McCowan Road or will it continue north to Markham?

Will Metrolinx reconsider closing the loop to Fairview Mall once the station at Sheppard Avenue and McCowan Road is built?

Summaries of each pop-up session are available in **Appendix E**.

### 3.3 What is most important to you about this Project?

When asked "What is most important to you about this Project?", most individuals responded within the four main themes identified in **Section 3 – Summary of Participant Feedback: Introduction**, with most attention being focused on alignment and design, including concerns related to the improvement of transit in Scarborough, suggestions for alternative alignment options, and accessibility. A summary of feedback related to this guestion is outlined in the subsections below.

### 3.3.1 Cost and Timeline

Approximately 25 individuals believed that costs and timeline are the most important aspects of the Project. Of these individuals, most expressed the desire to have the Project built as soon as possible. Details related to costs and timeline are outlined below.

### Completion of the Project/ Expedition of Timeline

About 20 respondents requested the Project be completed sooner rather than later. A few individuals noted frustration with previous transit planning project proposals and the potential for delays in completion. One individual noted the importance of the Scarborough Subway Extension to the community and the positive impact it would have on young families in the community who rely on public transit.

### Costs

About five individuals noted the importance of controlling the overall cost of the Project.

### 3.3.2 Community Impacts

When discussing the most important elements of the Scarborough Subway Extension, approximately 10 individuals noted the potential impacts to the local community/ "impact on me". Top concerns expressed related to potential community impacts are summarized below.

### **Construction Impacts**

Approximately five individuals raised concerns regarding the potential impacts of vibration during construction and questioned the construction process, including specific area and traffic impacts.

### Impacts on Neighbourhood

One individual noted that their community has a clear divide between residential and business areas, and they wanted specific information on where a station would be placed in the McCowan and Sheppard area. Another individual expressed an interest in the inclusion of a community benefits agreement within the Project and the potential for local employment. One individual also suggested the use of art by local artists, in order to improve the aesthetics of the stations/ neighbourhood.

### **Engagement**

About five individuals expressed that public engagement and understanding of the Project were most important to them. One individual stated they would like more interaction with Metrolinx representatives that lived in Scarborough, as they would have a better understanding of community needs.

### 3.3.3 Alignment and Design

Approximately 40 engagement participants stated that the alignment and design of the Scarborough Subway Extension is the most important aspect. Top concerns related to the location and design of stations, improvement of transit and integration, and alternative alignment options, as outlined below.

### **Accessibility**

Five individuals named accessibility as a top concern and stated that the alignment of the Scarborough Subway Extension should provide easy, convenient access to transit across the city.

### **Alternative Alignment**

Approximately 10 individuals provided suggestions for alternative alignment options, including requests that stations and connections be added (e.g., extending the route to Malvern Town Centre Mall). A few individuals suggested revitalizing the Scarborough Rapid Transit (SRT) instead of building the subway extension.

### Improvement of Transit and Integration/ Connectivity

About 15 respondents stated the alignment of the Scarborough Subway Extension should aim to provide more transit options for the public while integrating seamlessly with other transit lines. A few individuals appreciated the importance of improved transit in relation to the reduction of traffic and travel time within Scarborough. A few individuals also stated that the Scarborough Subway Extension needs to be able to accommodate future development and transit connection in order to better serve the community.

### Station Location and Design

Roughly 10 individuals requested more detailed information on the proposed station locations for the Scarborough Subway Extension. Some individuals also inquired about the opportunity to include additional station locations, including ones located near existing GO Stations. Suggested locations include Bellamy Road and Eglinton Avenue, where a GO Transit stop is currently located, at Danforth Avenue and Brimley Road, and extension of the line to a stop at Centennial College or the University of Toronto Scarborough Campus. A few individuals inquired about the design of the stations in relation to parking and ridesharing areas. One individual inquired about the potential inclusion of walkways to connect stations to a local hospital.

### **Project Support**

About five individuals stated support for the Project, including its importance in relation to the benefits it will provide, and the quality of the proposal compared to other transit networks.

### 3.4 What would you like to hear more about?

When asked "What would you like to hear more about?", individuals responded within the four main themes identified in **Section 3 – Summary of Participant Feedback: Introduction**, with most attention being focused on more information related to the costs and timeline for the Scarborough Subway Extension. A summary of feedback related to this question is outlined in the subsections below.

### 3.4.1 Cost and Timeline

Approximately 20 individuals stated they wanted to hear more about the construction schedule/ timeline and expressed an interest in receiving regular status updates related to the development of the Scarborough Subway Extension.

### **Completion of Project/ Expedition of Timeline**

About 10 respondents requested information on when the construction of the Scarborough Subway Extension would begin and wanted to receive a general timeline for the construction. A few individuals requested information on what would happen to the existing line and the transition from the SRT to the three-stop Scarborough Subway Extension.

### **Status Updates**

Approximately 10 individuals noted interest in receiving regular status updates on the progress of the Scarborough Subway Extension. A few individuals stated wanting specific details relating to construction progress, with one individual requesting similar updates to those received for work on the Eglinton Crosstown LRT Project. One individual also stated that they would like to be provided with information/ status updates on other Metrolinx projects as they are likely to impact cross-city commutes.

### Cost

One individual requested information on whether the budget for the Scarborough Subway Extension would include the cost of temporary bus linkages from the Scarborough Town Centre to Kennedy station and the removal of the LRT track and stations.

### 3.4.2 Alignment and Design

Approximately 25 individuals expressed the desire to hear more about the alignment of the Scarborough Subway Extension, with most concerns related to the study process involved and the location and design of stations.

### Station Location and Design

Roughly 10 respondents stated they would like to hear more about the specific location of proposed Scarborough Subway Extension stations. A few individuals noted their desire for more information on station designs, including bus terminals and station concepts and artwork samples. One individual requested information on the lifespan of the stations and the ability to add more station boxes in the future.

### **Study Process**

Five individuals requested more information on comparisons between the Scarborough Subway Extension and other projects, including SRT ridership and base case

scenarios. One individual requested more information on the cost-benefit analysis for the Project.

### **Alternative Alignment Options**

About five individuals requested more information on alternative alignment possibilities, including integration with Line 4 Sheppard and the feasibility of alternatives proposed by organizations/ stakeholder groups (e.g., Lakeshore Planning Council Corporation).

### Improvement of Transit and Integration

Approximately five individuals stated they would like to hear more about how the Scarborough Subway Extension could impact current transit routes, including potential connectivity to GO Transit.

### **Construction Methods**

Around five individuals inquired about the proposed technology and methods which would be used to construct tunnels for the Scarborough Subway Extension (e.g., cut and cover vs. single bore). One individual stated that the stations should incorporate the use of specific styles of traffic signals and doors on the platforms.

### 3.4.3 Community Impacts

Approximately 10 respondents noted their desire to hear more about potential impacts to the local community, including construction impacts, the potential for employment opportunities and the public engagement process.

### **Construction Impacts**

Five individuals stated they wanted more information on the construction process, including hours of active construction and the potential impacts on the surrounding community, including residential and commercial properties. One individual requested more information on potential impacts to plumbing, electrical and water service of buildings during the construction process.

### **Public Engagement**

About five individuals requested that more public meetings take place in the community as the Project progresses, with more information on plans for the gap in service

between the SRT's end of service and the commencement of operation of the Scarborough Subway Extension.

### **Employment Opportunities**

About five individuals raised questions about the potential for job creation within the community during the construction and operation phases of the Scarborough Subway Extension.

### 3.4.4 Environmental Impacts

One individual requested more information related to potential environmental impacts associated with the Scarborough Subway Extension.

### 3.5 How would you like to hear from us going forward?

When asked "How would you like to hear from us going forward?", most individuals (46%) stated that email was the best way to connect. Other responses include:

- Other (e.g., website, digital advertisements in TTC stations and on subways and buses) (30%);
- Mail-outs and print advertisements (13%);
- Public Meetings (7%); and
- Social media (4%).

# 3.6 Is there anything we missed? Additional thoughts or concerns?

When asked "Is there anything we missed?", individuals responded within the four main themes identified in **Section 3 – Summary of Participant Feedback: Introduction**. Most attention is focused on alignment and design, specifically related to alternative alignment options for the Project. A summary of feedback related to this question is outlined in the subsections below.

### 3.6.1 Costs and Timeline

Approximately 20 individuals shared additional thoughts and concerns related to the costs and timeline of the Project with most comments relating to the start of construction of the Scarborough Subway Extension.

### Completion of the Project/ Adhering to Project Timeline

15 individuals stated they wanted the Scarborough Subway Extension to enter the construction phase as soon as possible, so that operations could begin as soon as possible. A few individuals noted concerns as to whether the Project would be delayed or ever be built at all.

### Costs

One individual requested more information on the fare/ fare integration for the Scarborough Subway Extension.

### 3.6.2 Community Impacts

Approximately 15 individuals shared additional thoughts and concerns related to community impacts, with most comments relating to the construction process.

### Construction

About five individuals expressed interest in how the construction process may impact the community, including the use of buses/ shuttles during construction. A few individuals also inquired about the SRT and its lifespan/ out-of-service dates in relation to the construction/ commencement of operation of the Scarborough Subway Extension.

### **Property Impacts**

Approximately five individuals requested information on potential property takings/ expropriation related to the construction of the Scarborough Subway Extension, including nearby condo buildings and the Shell gas station on Lawrence Avenue. One public group stated they will be reaching out to Metrolinx in the future to discuss the potential expropriation of properties of interest. One individual also raised concerns related to the security of their property once operations begin as transit riders will be walking near their home.

### **Public Engagement**

Roughly five respondents requested more information related to the public engagement process. One individual provided a document (**Appendix G**) describing a potential governance model which would provide greater public involvement in the development process of the Scarborough Subway Extension.

### 3.6.3 Alignment and Design

Approximately 40 individuals shared additional thoughts and concerns related to the alignment and design of the Scarborough Subway Extension, particularly related to opportunities to explore alternative alignment options.

### **Alternative Alignment Options**

25 respondents provided suggestions for alternative alignments for the Scarborough Subway Extension, including using the LRT model and extending the Scarborough Subway Extension to include more stations. A few individuals presented proposals outlining alternative alignment options and their associated financial benefits.

### **Station Location and Design**

About 10 individuals requested more information on potential station locations and designs, specifically in relation to parking areas and the potential to incorporate a PATH-style system design.

### **Project Lifespan/ Connectivity**

Roughly five individuals raised questions regarding the potential for future expansion of the Scarborough Subway Extension (e.g., incorporating new stations, integrating with new transit routes).

### 3.6.4 Environmental Impacts

One individual asked if potential environmental impacts from the former gas station on the east side of McCowan Road, north of Sheppard Avenue, would be assessed.

### 4. Next Steps

### 4.1 Next Steps

Public participation is a key input into the decision-making process for the Scarborough Subway Extension. Metrolinx will continue to engage the public through the study process, as outlined in **Figure 4-1** below.

Figure 4-1: What's Next

<sup>\*</sup>Timelines are estimates as of March 2020, subject to change and government approvals

# **Appendix A**

**Project Webpage** 

# Scarborough Subway Extension

# Projects are being built across the region connecting every community

# A Subway for Scarborough

The proposed Scarborough Subway Extension will bring the TTC's Line 2 subway service nearly eight kilometres farther into Scarborough.

It will extend from Kennedy Station to Sheppard Avenue and McCowan Road, providing quick and seamless transit for those heading into and out of the downtown core and those travelling within Scarborough. The extension will replace Line 3 (the Scarborough RT), helping to reduce travel times and improve access to jobs, schools and other key destinations throughout the city.

Metrolinx and Infrastructure Ontario are working together to deliver the Scarborough Subway Extension, which is estimated to be complete by 2029-30.

# Prolongement de la ligne de métro vers Scarborough

Des projets de construction sont en cours dans toute la région afin de relier toutes nos

# Une ligne de métro pour Scarborough

Le prolongement proposé de la ligne de métro 2 de la TTC vers Scarborough permettra fournir un service de métro sur près de huit kilomètres dans Scarborough.

La ligne se poursuivra de la station Kennedy à l'intersection de Sheppard Avenue et de McCown Road, offrant ainsi un service de transport en commun rapide et fluide aux clients se rendant au centre-ville de Scarborough ou en sortant ou se déplaçant dans cette ville. Ce prolongement de ligne remplacera la ligne 3 (service de transport en commun rapide de Scarborough) en vue de mieux réduire le temps de trajet et d'améliorer l'accès à l'emploi, aux écoles ainsi qu'à d'autres destinations importantes dans la ville.

## Metrolinx releases updated business cases for Scarborough Subway Extension and Eglinton Crosstown West Extension

#### FEBRUARY 28, 2020MARCH 2, 2020

New documents outline benefits for thousands of travellers moving around the GTA.

Metrolinx has released updated business cases (http://www.metrolinx.com/en/regionalplanning/projectevaluation/benefitscases/benefits\_case\_analyses.aspx) for the Scarborough Subway Extension and Eglinton Crosstown West Extension.

The business cases show how both projects will provide significant benefits for regular commutes and special journeys by cutting travel times and expanding passenger capacity.

There are other substantial project benefits noted in both reports, such as:

- o congestion relief on roadways by getting more people on transit;
- improved connections to other major transit systems throughout the network;
- creation of transit-oriented communities where people can live, work and play;
- better connections to jobs, which will help spur more business investment.

A business case is a comprehensive collection of evidence and analysis that sets out the rationale for why an investment should be made. Business cases provide evidence to decision-makers, stakeholders, and the public as a crucial part of transparent and evidence-based decision making processes.

Think of them as the business plan pointing the way forward.

They are used throughout any proposed investment's lifecycle, including planning, delivery, management, and performance monitoring. The business case is one of several factors considered when making decisions about advancing a project.

The Eglinton Crosstown West Extension and Scarborough Subway Extension are two of four priority projects moving forward under the Government of Ontario's Subway Program, which will deliver muchneeded rapid transit that will get thousands more people moving every day through the GTA.

Here are some details contained in the updated reports.

#### Improved connections

Scarborough Subway Extension: Will link riders to GO Transit (rail and bus), future Eglinton Crosstown LRT, future Durham Region Transit bus services and local TTC bus connections.

Eglinton Crosstown West Extension: Will link riders to four different transit systems - UP Express and Kitchener Line GO train service at Mount Dennis Station, TTC bus services at all transit stops in Toronto, and MiWay and GO Bus services thanks to a connection to the Mississauga Transitway at Renforth Drive.

#### More people on transit

Scarborough Subway Extension: Will attract approximately 105,000 daily boardings.

Eglinton Crosstown West Extension: Will attract approximately 37,000 daily boardings.

#### More transit options for Scarborough

Replacing TTC's Line 3 (Scarborough RT), the \$5.5-billion Scarborough Subway Extension will bring Line 2 approximately 7.8 kilometres farther into Scarborough, extending it from Kennedy Station to a new terminus at Sheppard Avenue and McCowan Road.

The three-stop extension will provide seamless travel for Scarborough residents heading into and out of the downtown core, with proposed stops at Lawrence Avenue and McCowan Road, Scarborough Centre and McCowan Road and Sheppard Avenue.

#### Taking the Crosstown further across town

The Eglinton Crosstown West Extension is a planned extension of the Eglinton Crosstown LRT, which is currently under construction. The Province has committed to extending the line by 9.2 kilometres from the Mount Dennis LRT station to Renforth Drive in Mississauga. A planned future connection that is being explored with the Greater Toronto Airports Authority (GTAA) would extend the line another 4.7 kilometres to Pearson International Airport. The estimated cost of the project from the Initial Business Case is \$4.7 billion.

Metrolinx is actively collaborating with the GTAA and municipal partners on the proposed alignment from Renforth Drive to the airport, which takes into account the GTAA's plans for a future Regional Transit Centre.

In the meantime, Metrolinx is advancing work for the segment from Mount Dennis to Renforth Drive.

Release of the updated business cases comes just as Metrolinx is hosting public open houses next week for community members to learn more about the Scarborough Subway Extension (http://www.metrolinx.com/en/greaterregion/projects/scarborough-subway-extension.aspx) and associated environmental studies.

Open houses for the Eglinton Crosstown West Extension will be announced soon.

To learn more about the Scarborough Subway Extension, click here (http://www.metrolinx.com/en/greaterregion/projects/scarborough-subway-extension.aspx).

To learn more about Eglinton Crosstown West Extension, click here (http://www.metrolinx.com/en/greaterregion/projects/eglinton-crosstown-west.aspx).

And speaking of keeping up with changes, Metrolinx has launched a digital hub featuring transit progress in your community and beyond. Just click here to see what's new (http://www.metrolinx.com/en/greaterregion/default.aspx).

**Pop-up Session Summaries** 

25 February 2020

#### Meeting/Outreach Location:

Scarborough Health Network - General Hospital Campus 3050 Lawrence Ave E, Scarborough, ON M1P 2V5 9am-12pm

#### Overview

#### **OVERVIEW**

The Toronto East/Durham Community Relations Team hosted an information table in the main lobby of the Scarborough Health Network, General Campus at McCowan Road and Lawrence Ave West, in Scarborough. Collateral handed out included Kids GO Free, PRESTO information, Niagara Weekend Trip Schedule, Transit Network Map, Scarborough/Durham BRT overview, Scarborough Subway Extension overview, Crosstown LRT pamphlets, and buttons, train schedules, train and LRT cut-outs and rail safety tips. This was the first pop up activation at the General Hospital and it was very well received. Many passersby were curious as to why we were there. Equally as many showed their interest and surprise to hear that Metrolinx is moving forward on a three-stop subway, and that – YES, the Scarborough Hospital will be close to one of those stops.

General questions and issues related to PRESTO products and SSE timelines, as well as when and where residents could obtain more information and updates.

#### **Number of Attendees**

20-25

#### **Attendees**

• James Burchell, Community Relations and Issues Specialist

#### **Questions/Comments**

- My Presto card experiences a 2-3 hour time lag after reloading. Why?
- Will Presto Card payment be incorporated on Wheel Trans?
- When will the Scarborough Subway be built?
- Where will the stations be?
- What is the revised timeline for the Eglinton Crosstown completion?
- Where can I purchase the Presto Card? Will you consider banks?

Overall Ranking - 9

New Emails collected - 3

25 February 2020

#### Meeting/Outreach Location:

Don Montgomery Community Recreation Centre 2467 Eglinton Ave E, Scarborough, ON M1K 2R1 6pm-8pm

#### Overview

#### **OVERVIEW**

The Toronto East/Durham Community Relations Team hosted an information table in the main lobby of the Don Montgomery Community Centre on Eglinton east of the Kennedy Station, in Scarborough. Material shared included Kids GO Free, PRESTO information, Niagara Weekend Trip Schedule, Transit Network Map, Scarborough/Durham BRT overview, Scarborough Subway Extension overview, Crosstown LRT pamphlets, and buttons, train schedules, train and LRT cut-outs and rail safety tips. This was the first pop up activation at this Community Centre, where high traffic areas and times are Tuesday evenings outside the twin hockey arenas, and Saturday afternoon on the upper level for the youth athletic programming. I have been encouraged to return on any Saturday to ensure that all patrons have had access to the Scarborough repertoire of material.

Tonight's hockey parents passed by briefly to and from games for a very quick overview of our current and upcoming transit projects, as well as our products and services. The concentration of discussion this evening was on the Crosstown, more specifically when it will be completed.

#### Number of Attendees - 15

#### **Attendees**

James Burchell, Community Relations and Issues Specialist

#### **Questions/Comments**

- When will the Eglinton Crosstown be done?
- Will the Crosstown be extended eastward further into Scarborough as first promoted by Mayor Tory?
- Why do the new Presto Cards need to be replaced or expire, as the first generation cards did not?
- When will the Scarborough Subway be built?
- Will Metrolinx now reconsider closing the loop to Fairview Mall once the Sheppard and McCowan stop is built?

Overall Ranking - 8

New Emails collected 3

26 February 2020

#### Meeting/Outreach Location:

Scarborough Town Centre 300 Borough Drive, Scarborough ON M1P 4P5 10am-1pm

#### **OVERVIEW**

The Toronto East/Durham Community Relations Team hosted an information table in the upper lobby of the Scarborough Town Centre by the exit to the GO Bus Terminal and Scarborough Centre SRT Station. Material shared included Kids GO Free, PRESTO information, Niagara Weekend Trip Schedule, Transit Network Map, Scarborough/Durham BRT overview, Scarborough Subway Extension overview, Crosstown LRT pamphlets, and buttons, train schedules, train and LRT cut-outs and rail safety tips. This was the first pop up activation at Scarborough Town Centre, where I enjoyed constant traffic coming from the transit hub, neighbouring Federal and Municipal buildings, and several shoppers and lunch seekers.

This morning's crowd could not even wait until I displayed all my material before I was barraged by several questions..... "When is it coming, When will it be built, When is the meeting?", and so on. Crosstown and the proposed Scarborough/Durham BRT were topics of interest, but the Student Network Map was a hot draw, that piqued a lot of additional questions and interest. Wrapping up on good nuggets, my stock of the Niagara Weekend trip flyer was depleting quickly, with March Break around the corner, and kidsGOfree, I wonder why.

#### Number of Attendees - 30-35

#### **Attendees**

James Burchell, Community Relations and Issues Specialist

#### **Questions/Comments**

- When will the Scarborough Subway be built?
- Is it operated by Metrolinx or TTC?
- Will it be entirely underground or will there be section at grade like the Ontario Line?
- Is Sheppard and McCowan station the final stop or will it be continuing northward into Markham?
- Where can I buy a case for my PRESTO card?

#### General Theme - Fully support the Subway Extension into Scarborough.

Overall Ranking - 10

New Emails collected 10

26 February 2020

#### Meeting/Outreach Location:

Oriental Centre Shopping Mall 4438 Sheppard Ave E, Scarborough, ON M1S 5V9 2pm-4pm

#### **OVERVIEW**

The Toronto East/Durham Community Relations Team hosted an information table in the main atria of the Oriental Centre Shopping Mall at Brimley and Sheppard, steps away from the newly proposed terminus of the Scarborough Subway Extension. Material shared included Kids GO Free, PRESTO information, Niagara Weekend Trip Schedule, Transit Network Map, Scarborough/Durham BRT overview, Scarborough Subway Extension overview, Crosstown LRT pamphlets, and buttons, train schedules, train and LRT cut-outs and rail safety tips. This was the first pop up activation at this Shopping Centre, where retail amenities cater to Chinese Canadians in the north Scarborough region and neighbouring Markham. Highest traffic times are Saturdays, which we will consider as more information on the line extension becomes available.

This afternoon I had the pleasure of conversing with shop-keepers and patrons who were very excited about the extension, and more so the addition of a stop at Sheppard and McCowan. Most passersby were not aware of the return to the 3-stop configuration and were very intrigued, pressing for timelines and completion dates.

#### Number of Attendees - 10

#### Attendees

James Burchell, Community Relations and Issues Specialist

#### **Questions/Comments**

- When will the New Scarborough Subway Extension be completed?
- Are these stops final?
- Will Metrolinx Link Line 4 (Sheppard line) to the new Sheppard and McCowan station?
- Will the Scarborough/Durham BRT be built before the subway extension is?

Overall Ranking - 9

A subway for Scarborough

#### **Scarborough Subway Extension**

For More Information

Call us at (416)-202-3900 or email us at TorontoEast@metrolinx.com

metrolinx.com/ScarboroughSubway

#### **Delivering a subway for Scarborough**

The proposed three-stop Scarborough Subway Extension will bring the TTC's Line 2 subway service nearly eight kilometres farther into Scarborough.

It will extend from Kennedy Station to Sheppard Avenue and McCown Road, providing quick and seamless transit for those heading into and out of the downtown core and those travelling within Scarborough. The extension will replace Line 3 (the Scarborough RT), helping to reduce travel times and improve access to jobs, schools and other key destinations throughout the city.

#### Improved access and better connections

The extension will connect to a number of other transit systems to make it easier to travel within the city and beyond. Kennedy Station will provide connections to GO train services and the Eglinton Crosstown LRT, and a station at Scarborough Centre will connect to GO and Durham Region Transit bus services. There will also be local TTC bus connections at every stop along the extension.

All of these connections will contribute to building a more integrated and comprehensive network that will provide better transit service in Scarborough and across the GTA.

# Why we are here

In 2017, the City of Toronto and the Toronto Transit Commission (TTC) finalized an Environmental Project Report (EPR) for a one-stop Line 2 subway extension, as per Ontario Regulation 231/08 under the *Environmental Assessment Act*.

In 2019, the Government of Ontario announced a three-stop Line 2 subway extension. Metrolinx is completing an EPR Addendum to assess impacts and propose mitigation measures for design changes since the 2017 EPR.

# The EPR Addendum will contain the following information:

- Description of and rationale for planned changes
- Assessment and evaluation of potential impacts the changes may have on the environment
- Description of proposed mitigation measures to address potential impacts

The EPR Addendum will be available for public review in April 2020.

# Have your say! We're here tonight to:

- Introduce the three-stop Scarborough Subway Extension
- Provide background information and details on studies underway
- Gather feedback from the community

### Who is Metrolinx?

### **Our Services**

- GO serves a population of more than seven million across more than 11,000 square kilometres stretching from Hamilton and Kitchener-Waterloo in the west to Newcastle and Peterborough in the east, and from Orangeville and Beaverton in the north to Niagara Falls in the south.
- GO has been in operation since 1967, and now accommodates more than 81 million customer journeys a year.
- PRESTO is the smart card fare payment system seamlessly connecting 11 transit agencies across the Greater Toronto and Hamilton Area (GTHA) and Ottawa.
- PRESTO replaces the need for tickets, tokens, passes or cash.
- PRESTO currently has over 2 million PRESTO cards in use.

 UP Express connects the country's two busiest transportation hubs, Toronto Pearson International Airport and Union Station in downtown Toronto, offering a 25-minute journey from end to end, with trains departing every 15 minutes.

### Who is Metrolinx?

### **Our Vision**

Metrolinx and its partners are delivering on a bold, forward-looking transportation plan. The goals of the 2041 Regional Transportation Plan (RTP) are to create strong connections, complete travel experiences and sustainable communities. We are building a greater region through the following projects:

### **GO** Expansion

- Lakeshore West Line
- Lakeshore East Line
- Milton Line
- Stouffville Line
- Richmond Hill Line
- Kitchener Line
- Barrie Line

### Rapid Transit

- Hurontario Light Rail Transit (LRT)
- Finch West LRT
- Eglinton Crosstown LRT
- Mississauga Transitway
- Viva Rapidway
- Union Pearson Express

### Regional Hubs

- Union Station
- Union Station Bus Terminal
- Highway 407 Bus Terminal
- Kipling Transit Hub
- Mount Dennis Mobility Hub
- Caledonia Station
- Kennedy Station

### **Subway Program**

- Ontario Line
- Scarborough Subway Extension
- Eglinton Crosstown West Extension
- Yonge North Subway Extension

Whether it's trains, buses, stations, or stops, everything we are building adds up to one purpose - bringing together the entire region, getting you there better, faster and easier than ever before.

# What is the Scarborough Subway Extension?

The Scarborough Subway Extension will provide seamless travel between Scarborough and the downtown core.

| Number of proposed stations |  | 3                             |
|-----------------------------|--|-------------------------------|
| Proposed station locations  | <ul> <li>Lawrence Avenue and McCowan Road</li> <li>Scarborough Centre</li> <li>Sheppard Avenue and McCowan Road</li> </ul> |                               |
|                             | Stouffville GO   | at Kennedy Station            |
| Connections to transit      | <ul> <li>Future Durham Region<br/>Bus Rapid Transit</li> </ul>   | at Scarborough Centre Station |
|                             | <ul> <li>Future Eglinton         Crosstown LRT</li> </ul>  | at Kennedy Station            |
|                             | <ul> <li>Various bus connections</li> </ul>  | at all stations               |
| Approximate length          | 7.8 km   |                               |
| Anticipated boardings       | 105,000 daily boardings  |                               |
| Access to transit           | 38,000 more people within walking distance to transit  |                               |
| Access to jobs              | More than 34,000 jobs within a 10-minute walk from a station   |                               |
| Anticipated capital costs   | Approximately \$5.5 billion  |                               |
| Targeted in-service date    | 2029 - 2030  |                               |

# Regional Transit Network

Metrolinx is building new and better ways to move you around the region.

# Benefits of the Scarborough Subway Extension

Provide Seamless Travel

Provide Better Connections

Reach New Communities

Improve Travel Times

Improve rapid transit for residents travelling within Scarborough. Provide seamless travel for Scarborough residents heading into and out of the downtown core by removing the need to transfer at Kennedy Station.

Provide new connections to existing and planned rapid transit across the Region.

Reach Scarborough transit users on Sheppard. Improve travel time and reliability for riders whose journeys include time on surface bus routes on congested streets.

# Background - Key Milestones

### Timeline

The three-stop extension will better serve Scarborough and the City of Toronto as a whole. Next steps following this information session include:

<sup>\*</sup>Timelines are estimates as of March 2020, subject to change and government approvals.

# Improved Access and Strong Connections

### Making it easier to get to work

The Scarborough Subway Extension will increase access to jobs. Estimates show 34,000 jobs within a 10-minute walk of the new stations.

# Connections with planned rapid transit

In addition to connections with existing rapid transit, the Scarborough Subway Extension will connect with the:

- Current Eglinton Crosstown Light Rail Transit (LRT) at Kennedy Station
- Potential Line 4 Sheppard Subway Extension
- Proposed Durham Region Bus Rapid Transit

## Less Crowding on Your Commute

### The Scarborough Subway Extension is expected to:

Attract more than 105,000 daily boardings each day, easing congestion on existing transit lines throughout the city.

105,000+

boardings each day

Create more seamless journeys through 158,000 daily transfers between buses and the Scarborough Subway Extension. 158,000 daily bus transfers

Decrease the number of vehicle kilometres travelled (VKT) in Toronto leading to a reduction in congestion and greenhouse gas emissions. about -30,000 VKT during the morning rush-hour

Source: GGHm v4.

Comparison with Business As Usual scenario.

## Travel Time Savings

The Scarborough Subway Extension will bring rapid transit closer to where transit users live and work, reducing travel times. By eliminating the need to transfer at Kennedy Station and providing closer rapid transit connections to local bus routes, commute times could be reduced by up to 10 minutes.

<sup>\*</sup>Please note: the business-as-usual (BAU) scenario does not include the existing TTC Line 3 (the Scarborough RT), as it is understood that its technology will soon reach the end of its serviceable life.

# Assessment of Design Changes

The 2020 Environmental Project Report (EPR) Addendum will assess the following design changes:

### Alignment

- Extend subway
   from Scarborough
   Centre north to
   Sheppard Avenue
- Shift subway
   alignment at
   Scarborough
   Centre east to the
   McCowan Road
   right-of-way

## Station & Ancillary Features

- New terminal station at Sheppard Avenue East and McCowan Road
- Revised location of the station at Scarborough Centre
- New station at Lawrence Avenue East and McCowan Road
- Ancillary features at station locations (e.g., vent shafts, traction power substations (TPSS))
- New bus loop north of Lawrence Avenue
- Addition of a pocket track east of Kennedy Station to facilitate shortturn service

# Emergency Exit Buildings (EEBs)

- New EEB locations along the alignment extension (EEBs 7 and 8)
- New EEB 5 location

# Traction Power Substations

Remove TPSS 2
 north of Lawrence
 Avenue as TPSS is
 now provided at
 Lawrence Station

### Construction

- Tunnel boring machine (TBM) launch shaft near Kennedy Station, terminal station at Sheppard Avenue, and extraction shaft located at Lawrence Avenue East and McCowan Road station
- Cut-and-cover construction, east of Kennedy Station to Midland Avenue for tail track realignment and installation of pocket tracks

#### What is a short-turn?

We know being on-schedule is important. Sometimes trains and buses are ahead of or behind schedule. A short-turn allows transit vehicles to turn to travel in the opposite direction to best maintain schedule.

### What is a bus loop?

A bus loop is the beginning and end of a bus service where the bus turns around to provide service in the opposite direction.

#### What is cut-and-cover?

Cut-and-cover is a construction method where excavation is performed then covered with wooden decking while crews continue digging underneath. Once complete, the surface is returned to its original state.

### Stations

The project includes three stations at Lawrence Avenue and McCowan Road, Scarborough Centre (McCowan Road north of Ellesmere Road), and Sheppard Avenue and McCowan Road, and will also seamlessly connect with the existing Kennedy Station. The project also includes large bus terminals at Sheppard Avenue and McCowan Road and at Scarborough Centre, with the latter terminal serving multiple carriers (TTC, GO, and Durham Region Transit).

# Sheppard Avenue and McCowan Road (east of McCowan Road)

- 19-bay TTC bus terminal on northeast quadrant of Sheppard Avenue East and McCowan Road, above tunnel/ station
- Taxi and accessible passenger pick-up and drop-off spaces
- Passenger pick-up and drop-off facility
- Space for connection with future Line 4 extension and future passenger transfer between Line 4 and Line 2

# Scarborough Centre (on McCowan Road, north of Bushby/ Triton)

- 16-bay TTC bus terminal
- 7-bay GO Transit and Durham Region Bus Rapid Transit bus terminal
- Taxi and accessible passenger pick-up and drop-off spaces

# Lawrence Avenue and McCowan Road (On/west of McCowan Road)

- 4-bay bus terminal on southwest quadrant of Lawrence Avenue East and McCowan Road
- Short-turn loop north of Lawrence Avenue or a TTC bus route

# Kennedy Station Pocket Track

 The Kennedy pocket track area extends roughly 550 metres from the east side of the GO Transit Stouffville rail corridor to Commonwealth Avenue and will include special track work and a pocket track to enable subway trains to short turn to suit ridership demand and minimize fleet requirements, as well as lower operating costs

### What is a pocket track?

A pocket track is a rail track layout that allows trains to park or move off the main line so they can reverse direction without disrupting service.

\*Note: Station entrances will be determined in the next stage of design.

## Environmental Studies Underway

We are completing environmental studies for design changes from the 2017 Environmental Project Report (EPR) – including new stations, tunnels and emergency exit buildings (EEBs) – to establish baseline conditions, complete impact assessments and develop mitigation measures. These studies build off previous studies completed for the 2017 EPR.

- Cultural Heritage
- Air Quality

# Noise and Vibration

### Traffic

- Plant inventories
- Aquatic habitat surveys
- Species at risk and significant wildlife habitat screening
- Historical research, review of heritage registers and inventories, and field surveys
- Review data from air quality monitoring stations, determine air contaminant sources and identify sensitive receptors
- Conduct air dispersion modelling to determine contaminant levels at sensitive receptor locations

- Collect noise and vibration measurements
- Identify noise and vibration sensitive receptors
- Determine noise and vibration mitigation strategies
- Review
   construction,
   operation and
   maintenance
   impacts for:
- Automobile traffic and transit services
- Pedestrians and cyclists

### Natural Environment

- 2017-2019 field studies included: vegetation, wildlife habitat, species at risk, species of conservation concern and aquatic habitats
- The study area is a 120-metre buffer around the proposed design changes

#### **Vegetation and Tree Removal**

#### **Potential Impacts**

Removal of vegetation and trees

#### **Examples of Mitigation Measures**

- Removals will be kept to a minimum and limited to within the construction footprint
- Temporarily disturbed areas will be re-vegetated
- If removals are within Toronto and Region Conservation Authority's (TRCA) Meadoway Restoration Areas, consultation with TRCA may be required
- The City of Toronto Tree Protection Policy and Specifications for Construction Near Tree Guidelines (2016) will be followed
- Compensation will be provided for removals, if required, and permitting/approvals will be obtained

#### **Potential Impacts**

Disturbance or displacement of wildlife

#### **Potential Impacts**

Disturbance or displacement of species at risk (e.g. Barn Swallows, bat species)

#### **Potential Impacts**

Impacts to aquatic/ riparian vegetation; erosion and sedimentation

### **Examples of Mitigation Measures**

 If wildlife is encountered, measures will be implemented to avoid impacts or interference with the species and its habitat

### Examples of Mitigation Measures

 Species-specific mitigation measures will be implemented based on surveys undertaken prior to construction, and ongoing consultation with the Ministry of the Environment, Conservation and Parks (MECP)

### Examples of Mitigation Measures

 Spatial buffers around the construction zone will be established to minimize potential impacts

# Cultural Heritage

• Metrolinx is assessing potential impacts to cultural heritage resources in accordance with the *Ontario Heritage Act*.

### Heritage Resources

#### **Potential Impacts**

- An inventory of cultural heritage resources was conducted and one designated cultural heritage property was found at 146 St. Andrews Road, adjacent to the study area. This property, containing a residence, is designated under Part IV of the *Ontario Heritage Act*
- No direct or indirect impacts (including vibration) to this property are anticipated as it is located more than 80 metres from the study area

### **Examples of Mitigation Measures**

Not required

# Air Quality

An air quality assessment is being conducted to determine the potential for air quality impacts from the design changes based on three different scenarios:

- Existing Conditions
- Future No-Build Conditions
- Future Build Conditions

The assessment was based on recommendations from the Ministry of Transportation's Environmental Guide for Assessing and Mitigating the Air Quality Impacts and Greenhouse Gas Emissions of Provincial Transportation Projects, 2019.

### Air Quality Assessment

#### Potential Impacts & Further Studies

- Emissions from bus movement at or near the proposed stations
- A quantitative air quality assessment including a detailed emissions assessment and dispersion modelling is currently underway to determine station-specific impacts on the local air quality. It will also include a regional assessment of increased greenhouse gas burden on the region

#### **Example of Mitigation Measures**

 Prior to construction, a detailed Construction Air Quality Management Plan will be developed and implemented

### Noise and Vibration

Metrolinx is committed to minimizing and managing the effects of noise and vibration on its neighbours.

Metrolinx's Subway Program noise and vibration management approach will follow:

- Ontario Ministry of Environment and Energy/ GO Transit Draft Protocol for Noise and Vibration Assessment Guide (MOEE/GO Transit, 1994)
- Ontario Ministry of Environment and Energy/ Toronto Transit Commission Protocol for Noise and Vibration Assessment (MOEE/TTC, 1993)

### Noise and Vibration

A noise and vibration assessment was completed for the three-stop Scarborough Subway Extension to evaluate construction and operational noise and vibration associated with the project.

#### Construction

### **Operations**

#### Potential Impacts

 Results indicated that noise and vibration impacts during construction will need to be mitigated at some locations

#### **Examples of Mitigation Measures & Further Studies**

- Prior to construction, Noise and Vibration Management Plans will be developed and implemented
- Specific mitigation measures will be selected during the next phase of design, and may include:
  - Noise barriers
  - Conducting work during the day time
  - Selection of low-noise or low-vibration equipment and operating construction equipment on lower vibration settings
  - Conducting pre- and post-construction surveys

#### Potential Impacts

 Results indicated that noise and vibration impacts during operation may need to be mitigated at some locations

#### **Examples of Mitigation Measures & Further Studies**

- Specific mitigation measures will be selected during the next phase of design, and may include:
  - Noise barriers
  - High resilience rail fasteners and floating slab track
  - Design subway stationary facilities (e.g., traction power substations) such that noise and vibration are controlled
  - Optimal maintenance, timely monitoring and inspections of railway tracks and trains, track continuity

Long-term construction noise monitoring station, with solar power and remote telecommunications

### Traffic

A review of qualitative impacts to automobiles, transit service, pedestrians and cyclists resulting from construction and operations of the Scarborough Subway Extension has been conducted.

#### Construction

### Potential Impacts

- Partial road closures and presence of heavy construction vehicles on roadways resulting in reduction of road capacity and potential delays
- Relocation of transit stops

#### Examples of Mitigation Measures & Further Studies

- Implementation of traffic staging plans, including design of temporary intersection lane configurations, temporary traffic signals, and modifications to existing signal timings
- Adding temporary signalized crossings or pedestrian cross-overs, construction of temporary sidewalks or raised decked walkways through construction areas

#### **Operations**

#### **Potential Impacts**

- New bus terminals and increased transit service may impact traffic operations at adjacent intersections and surrounding roadways
- Impacts to pedestrians and cyclists are expected to be minimal

#### **Examples of Mitigation Measures & Further Studies**

- A detailed Traffic Impact Study will be conducted to determine the most appropriate mitigation measures and design traffic control treatments for implementation
- Mitigation measures may include:
  - Implementation of appropriate signage and advanced notifications
  - Implementation of mitigation measures and design treatments resulting from a future detailed Traffic Impact Study

<sup>\*</sup>A Traffic Impact Study for all proposed stations including intersection capacity analysis will be undertaken to quantitatively assess impacts.

# Share your feedback!

- What is most important to you about this project?
- What would you like to hear more about?
- How would you like to hear from us?
- Is there anything we missed? Please let us know if you have additional thoughts or concerns about the Scarborough Subway Extension.

#### Welcome

The Scarborough Subway Extension Open House March 2020

#### A Subway for Scarborough

The three-stop Scarborough Subway Extension will extend TTC's Line 2 nearly eight kilometres farther into Scarborough, giving residents seamless and reliable subway service that will get them into and out of downtown faster. Display boards that describe the Scarborough Subway Extension are located throughout the room. Please review the boards, ask questions, and share your thoughts with the Project Team. Please answer the questions on the inside of this booklet and leave your responses at the registration table. The Project Team will be reviewing all the feedback as we move forward with the Project. Public feedback forms will be incorporated into the Project Consultation Summary Report.

1. What is most important to you about this Project?

Better transportation in the regions with more options for public transit. The SRT is not a good System. I wish the Subway had been extended from Konnedy station tather than introducing a new interchange Station requiring a transfer point to a different kind of vehicle. 2. What would you like to hear more about?

As many people live and work in different parts of the city, we need to hear about plans and projects across the city, and not just in our neighbourhood.

Thank you for your work!

3. How would you like to hear from us going forward?

Could those kinds of meetings and information sessions be advertised on Subway stations and on buses. I happened to hear about this meeting by chance. I had a difficult time finding the information apout the meeting on the website.

4. Is there anything we missed? Please let us know if you have additional thoughts or concerns about the Scarborough Subway Extension.

I would like to see the sheppind Subway extended west to Stappard Wost Station (Allan Road), and extended east So that the sheppard subway joins the BUOR - Dan forth Subway. Then the Bloom - Danforth would would be one Subwy line that form a loop (Similar to the Yonge line forms a loop at Union Station).

|  | commenty health clinics   |
|  | like nurse-praeticeer or MD   |
|  | alinics. This project can really  |
|  | reverebrate in a multitude of ways; lets think outside the  |

1. What is most important to you about this Project? We experienced so much problems with new CONPO 1346 DANFORTH ROAD no water for days electrical hookup that made our lights go on + off. # Brimley ROAD should be route because we have TANKERTRUCKS,

going up + down PANFORTH ROAD

Coursing NOISE

2. What would you like to hear more about? danger to cars how it affect plumbling electrical water service to APARTMENT Building -We already lost our parting lot. to a new condo, now we know it will affect us-noise, the road DANFORTH ROAD will be destroyed MOST people in Scarboro have cars.

3. How would you like to hear from us going forward?

Brochure in MAIL to explain
how this subway affects our
future in apartment buildings (
our home) Subway is needed

North South.

North /South.

4. Is there anything we missed? Please let us know if you have additional thoughts or concerns about the Scarborough Subway Extension.

there are 2 escape routes—
for emergency exits that

affect DANFORTH ROAD

How much sewrity is provided

when people wander hear our

home- CROSSTOWN takes us

to Black Creek (in middle of,
howhere). are people really working
in Scarbara without car.

| 1. What is most important to you about this Project?  The most important part of this project  for me is the improvement of trans. A  connectivity in Scarborough.  The non surface vehicle travel is  directed or avoided the better. | 3. How would you like to hear from us going forward?  Enal pales I public presentations  |

### Last chance for sanity on the Scarborough transit file

→ SmartSpur Posted on June 6, 2015 by (Modified extract)

The last-chance-for-sanity option doesn't involve an actual subway, but a new GO line branching off the Stouffville line, now being upgraded to SmartTrack, which offers fast one-seat service to Union station and easy links to the Bloor-Danforth subway and the Eglinton-Crosstown LRT at Kennedy station far sooner than any subway proposal can. One could also call it a "Surface Subway".

The idea first appeared in an excellent 400-page regional rail report by Transport Action Ontario in July 2013. The TAO idea enhances the worth of SmartTrack, rather than siphoning ridership from it. SmartSpur can be built faster than the one-stop subway and less expensively. Costs of the connection to STC from the SmartTrack line, using the east-west part of the current SRT corridor, were calculated at \$425-million in 2010 dollars (now \$600M), with the full route to Malvern via Centennial College's Progress Campus for around \$1.7-billion (now \$3.0). That's about \$1-billion less than the original estimates for the one-stop Scarborough Subway Extension (SSE), and a cost of \$2.5B less than the current SSE 3-stop estimate of \$5.5-6.0 billion.

On the downside, shuttle buses would be needed to replace the SRT during construction on the east-west phase, and the TAO estimate does not include SRT demolition costs. And, of course, SmartTrack will eat up some very finite capacity on the Lakeshore East GO lines. But while all subway extension ideas would aggravate crowding on the Bloor-Danforth, which is already at capacity westbound from Main Street in the morning rush, SmartSpur would provide some temporary relief both on the line and especially at the dangerously overcrowded Bloor-Yonge transfer point.

Here's a simple comparison of the THREE options available to City Council and the Province.

|                         | LRT       | Subway | GO "Surface Subway"  |
|-------------------------|-----------|--------|----------------------|
| Length                  | 9.9       | 7.6    | 13.1 (24.7 to Union) |
| Stations                | 7         | 1      | 6                    |
| Speed                   | 36        | 40     | 45+                  |
| Peak Capacity (pphpd)   | 12-14,000 | 26,000 | 30,000 (seated)      |
| Priority Neighbourhoods | 3         | 1      | 3                    |
| Cost (2010 \$)          | \$1.8B    | \$2.6B | \$2.0B               |
| Cost per Km             | \$182M    | \$368M | \$153M               |
| Completion Date         | 2023      | 2025   | 2023                 |

An EMU (bi-level surface subway) in The Netherlands

July 29, 2019

To TTC and Metrolinx,

The route for the Scarborough extension can be made to work without a "T" intersection.

A diagonal station at Sheppard with curves in the track approaching the station allows the path to Sheppard for future continuation to Don Mills to be on the same track (not a "T") and allows the station to be at the intersection. This still allows a track to the North if wanted in the future.

The City of Toronto governance model of 1998 is broken. Like an old car that has finished its life service and cannot be repaired, the governance model has now failed and cannot be repaired. Will finding new drivers of this car make it function? No. Similarly, changing Councillors (unless they support the new governance model) will not enable the existing City governance model work for the residents of Toronto. It is the governance model which has failed and needs updating on an urgent basis, in order to protect the current and long-term interests of the residents of the City of Toronto.

- The activities of City Planning Staff must be directed and reviewed by an expert, independent, qualified body, whose mandate is protection of the public interest.
- Politicians are not experts in planning matters, and are subjected to continuous "lobbying" by parties whose primary interest is profits.
- The Local Planning Appeal Tribunal (LPAT)
  constitutes a failed, unfair, outdated component
  of the City planning process, because it favours
  moneyed Parties, who purchase the services of
  lawyers and planners.
- The CPC will be comprised of 8 independent planning experts, plus the City of Toronto Chief Planner, who will be the Chair of the CPC.

- 25 Resident-based Community Boards (CB) would be created, one for each Ward.
- Each CB will consist of not more than 50 resident members as Directors of the CB.
- Council shall ensure adequate representation on the CB from all the different neighbourhoods in the Ward.
- Duties of the CBs will be to: 1. hold public meetings 2. work with City Agencies and City Council 3. work with CBs of other Wards 4. prepare and submit reports 5. elect officers of the CB, appoint a Board Manager, employ staff 6. participate in budgetary planning 7. evaluate land use planning projects 8. create committees

# How to Save Billions of \$\$\$\$ on the Scarborough Subway Extension – and Get it Completed Significantly Faster

# OPTION 1—SUBWAY (Taxpayers' proposal)

- Instead of boring a new tunnel, re-use the existing RT right-of-way and stations.
- The TTC investigated re-using the RT right-of -way and found that it was feasible to do.
- Only about <u>0.6 km</u> of tunnelling would be required for re-using and upgrading the RT.
- Cost for Option 1 will be less than half the cost and time to completion—\$3 billion in dollar savings and 7-8 years of time savings.

## OPTION 2—SUBWAY (Metrolinx proposal)

- Cost—up to \$6 billion
- Estimated completion—2030
- Substantial time and money for <u>8 kilometres</u> of tunnelling compared with estimated <u>0.6 km</u> for Option1.

# and ask for Metrolinx to complete the business case for Option 1, which will take only a few months.

 This will prove Option 1 is the best option, in the best interests of Scarborough residents and Toronto taxpayers.

# Why the Scarborough Subway Extension should be routed along the existing Scarborough RT right-of-way

- Re-routing the SSE along the existing Scarborough RT right-of-way, with most of the route above ground, would save \$3 billion or more, with 7-8 fewer years of construction. The most recent projected cost of the current plan for the SSE 8.2 km route is \$6.0 billion because it is being tunnelled.
- Eearly City of Toronto studies concluded that routing the SSE along the existing RT right-ofway was entirely feasible. The RT right-of-way route was rejected since it would compete with Smart Track. Smart Track has since been absorbed by GO Transit (Smart Track was substantially overtaken by the subsequent expansion and increase in Metrolinx GO train service).
- A new GO Station at Lawrence East will not be needed if the RT right-of-way is used for the SSE, keeping the existing six RT Station stops.
- If the <u>subway</u> had been originally extended in 1984 to Scarborough Town Centre, instead of the RT line, this expensive and inconvenient replacement would not be a problem now.

  Transit solutions that are incompatible with the TTC Subway will not ultimately result in cost savings or better public transit for taxpayers.
- It is incumbent upon the Province (and City of Toronto) to maximize transit service with prudent management of limited taxpayers' dollars.

Demolition of SRT D-S connection to Scarporoyer 4 route - snould be Considered rogress 9 are we taking it down.

# How to Save Billions of \$\$\$\$ on the Scarborough Subway Extension – and Get it Completed Significantly Faster

## OPTION 1—SUBWAY (Taxpayers' proposal)

- Instead of boring a new tunnel, re-use the existing RT right-of-way and stations.
- The TTC investigated re-using the RT right-of -way and found that it was feasible to do.
- Only about <u>0.6 km</u> of tunnelling would be required for re-using and upgrading the RT.
- Cost for Option 1 will be less than half the cost and time to completion—\$3 billion in dollar savings and 7-8 years of time savings.

## OPTION 2—SUBWAY (Metrolinx proposal)

- Cost—up to \$6 billion
- Estimated completion—2030
- Substantial time and money for <u>8 kilometres</u> of tunnelling compared with estimated <u>0.6 km</u> for Option1.

and ask for Metrolinx to complete the business case for Option 1, which will take only a few months.

 This will prove Option 1 is the best option, in the best interests of Scarborough residents and Toronto taxpayers.

## Why the Scarborough Subway Extension should be routed along the existing Scarborough RT right-of-way

- Re-routing the SSE along the existing Scarborough RT right-of-way, with most of the route above ground, would save \$3 billion or more, with 7-8 fewer years of construction. The most recent projected cost of the current plan for the SSE 8.0 km route is \$6.0 billion because it is being tunnelled.
- Early City of Toronto studies concluded that routing the SSE along the existing RT right-of-way was entirely feasible. The RT right-of-way route was rejected since it would compete with Smart Track. Smart Track has since been absorbed by GO Transit (Smart Track was substantially overtaken by the subsequent expansion and increase in Metrolinx GO train service).
- A new GO Station at Lawrence East will not be needed if the RT right-of-way is used for the SSE, keeping the existing six RT Station stops.
- If the <u>subway</u> had been originally extended in 1984 to Scarborough Town Centre, instead of the RT line, this expensive and inconvenient replacement would not be a problem now. Transit solutions that are incompatible with the TTC Subway will not ultimately result in cost savings or better public transit for taxpayers.
- It is incumbent upon the Province (and City of Toronto) to maximize transit service with prudent management of limited taxpayers' dollars.

The City of Toronto governance model of 1998 is broken. Like an old car that has finished its life service and cannot be repaired, the governance model has now failed and cannot be repaired. Will finding new drivers of this car make it function? No. Similarly, changing Councillors (unless they support the new governance model) will not enable the existing City governance model work for the residents of Toronto. It is the governance model which has failed and needs updating on an urgent basis, in order to protect the current and long-term interests of the residents of the City of Toronto.

- The activities of City Planning Staff must be directed and reviewed by an expert, independent, qualified body, whose mandate is protection of the public interest.
- Politicians are not experts in planning matters, and are subjected to continuous "lobbying" by parties whose primary interest is profits.
- The Local Planning Appeal Tribunal (LPAT)
  constitutes a failed, unfair, outdated component
  of the City planning process, because it favours
  moneyed Parties, who purchase the services of
  lawyers and planners.
- ◆ The CPC will be comprised of 8 independent planning experts, plus the City of Toronto Chief Planner, who will be the Chair of the CPC.

- ◆ 25 Resident-based Community Boards (CB) would be created, one for each Ward.
- Each CB will consist of not more than 50 resident members as Directors of the CB.
- Council shall ensure adequate representation on the CB from all the different neighbourhoods in the Ward.
- Duties of the CBs will be to: 1. hold public meetings 2. work with City Agencies and City Council 3. work with CBs of other Wards 4. prepare and submit reports 5. elect officers of the CB, appoint a Board Manager, employ staff 6. participate in budgetary planning 7. evaluate land use planning projects 8. create committees

|                      |                          | Comment Card - Grace Church | Getting transit built. Seen many proposals over the years but nothing gets built!                               |      |
|                      |                          |                             | Completion time, since Scarborough has already waited so long. Cost, a subway is a better option, but 3x        |      |
|                      |                          | Comment Card - Grace Church | as much LRT can be built for some money.  |      |
|                      |                          | Comment Card - Grace Church | Get started ASAP  |      |
|                      |                          | Comment Card - Grace Church | Transparency. Getting something built in a timely, responsible manner.  |      |
|                      |                          | Comment Card - Grace Church | Get it done ASAP!   |      |
|                      |                          | Comment Card - Grace Church | Shovels in the ground. Let's get going.   |      |
|                      |                          |                             |   |      |
| Community Impacts    | Construction Impacts     |                             | The crosstown LRT was created in chaos and traffic problems for years and I don't want the same thing to        |      |
|                      |                          | Comment Card - Civic Centre | happen to Danforth Road.  |      |
|                      |                          |                             | The station locations and possible impacts to the area in terms of construction. Sheppard-McCowan               |      |
|                      |                          |                             | station, possible locations will uproot some established businesses. Impact of new station bus terminal on      |      |
|                      |                          | Comment Card - Civic Centre | existing heavy traffic area.  |      |
|                      |                          | Comment Card - Grace Church | Need to know the vibration and construction which will affect residents or their own.                           |      |
|                      | Impacts on Neighbourhood |                             |   |      |
|                      |                          |                             | I want to know where at McCown and Sheppard you plan to have the subway. I live there. Canadian Tire            |      |
|                      |                          | Comment Card - Civic Centre | and the Ford Dealership is on the North side. Residents are all on the South side.                              |      |
|                      |                          |                             | There is an incorporation of community benefits agreement in the project. That there are training and           |      |
|                      |                          | Comment Card - Civic Centre | employment opportunities for residents in the community.  |      |
|                      |                          |                             |   |      |
|                      |                          |                             | I won't use the subway - we experienced so many problems with new condo 1346 Danforth Road. No                  |      |
|                      |                          |                             | water for days. Electrical hookup that made our lights go on and off. Brimley Road should be route because      |      |
|                      |                          | Comment Card - Civic Centre | we have tanker trucks going up and down Danforth Road causing noise. Danger to cars.                            |      |
|                      | Visual Impacts           |                             | Design/aesthetics. In my opinion, Scarborough Subway stations do not look as nice as downtown Toronto.          |      |
|                      |                          |                             | I would love to see unique architectural design and beautiful art inside, maybe art that is culturally relevant |      |
|                      |                          |                             | to people in the surrounding areas? Think about Scarborough artists (e.g. Dorris McCarthy, Indigenous           |      |
|                      |                          | Comment Card - Civic Centre | artists, etc).  |      |
|                      | Engagement               | Comment Card - Grace Church | The most important about this project was understanding the Scarborough Subway Extension.                       |      |
|                      |                          |                             | It makes no sense and I found it a bit insulting that no one from Metrolinx is actually from Scarborough so     |      |
|                      |                          |                             | they're probably not the best people to send to this event. Such a waste of \$ and a lost opportunity for       |      |
|                      |                          | Comment Card - Grace Church | Scarborough.  |      |
|                      |                          |                             |   |      |
| Alignment and Design | Accessibility            | Comment Card - Civic Centre | A subway that is convenient and accessible.   |      |
|                      |                          |                             | For me it is definitely moving a subway stop closer to our home. As well I believe this new artery to the       |      |
|                      |                          | Comment Card - Civic Centre | Scarborough Town Centre is good for the mall, good for business.  |      |
|                      |                          | Comment Card - Grace Church | Accessibility.  |      |

|-------|----------------------------|-----------------------------|--|----------|
|       |                            |                             | I can't walk as far as the bus stops to east or west of my (seniors') building, 1680 Ellesmere, so I can never   |          |
|       |                            |                             | go out without ordering wheel-trans the previous day. I've lived here since Dec. 2010, and have visited  |          |
|       |                            | Comment Card - Grace Church | Scarborough Town Centre only 4-5 times.  |          |
|       |                            | Comment Card - Grace Church | Accessibility of transit.  |          |
|       | Alternative Alignment      |                             | That you cancel it and instead built the LRT. This project means less transit for Scarborough and that we  |          |
|       |                            |                             | will spend longer on buses. It doesn't even appear as if the Eglinton East LRT is happening as it is not a part  |          |
|       |                            | Comment Card - Civic Centre | of any of the slides.  |          |
|       |                            |                             |  |          |
|       |                            |                             | Integrated transit hub at Scarborough Centre should be adjacent to the Town Centre. Current plans appear   |          |
|       |                            | Comment Card - Civic Centre | to have proposed move of station east to McCowan. Station should be an integral part of Town Centre.   |          |
|       |                            |                             | Scarborough subway needs to extend to Malvern Town Centre mall, making it easier on McNicoll Station.  |          |
|       |                            |                             | Eglinton Crosstown East needs to happen now. Don't ignore people in Scarborough Who are suffering so   |          |
|       |                            |                             | much and even worse would move to the west end that was more subway. Now Scarborough needs to be   |          |
|       |                            | Comment Card - Civic Centre | their own city for good.   |          |
|       |                            |                             | Why the main road to the Scarborough Town Centre and 401 must be under construction for years when   |          |
|       |                            | Comment Card - Civic Centre | the present LRT corridor is already there with parking available.  |          |
|       |                            | Comment Card - Grace Church | Sad that it does not serve the catchment area that the fully funded Scarborough LRT would have.  |          |
|       |                            | Comment Card - Grace Church | I think Metrolinx should convert the Scarborough RT into an LRT and then extend line 3.  |          |
|       |                            | Comment Card - Grace Church | To stop the plans of the LRT streetcar, planned on Eglington Kingston and Morningside.   |          |
|       | Improvement of Transit and |                             |  |          |
|       | Integration/ Connectivity  | Comment Card - Civic Centre | Improve transport service to public. Economic progress for Scarborough residents.  |          |
|       |                            |                             | Better transportation in the region with more options for public transit. The SRT is not a good system. I  |          |
|       |                            |                             | wish the subway had been extended from Kennedy Station rather than introducing a new interchange   |          |
|       |                            | Comment Card - Civic Centre | station requiring a transfer point to a different kind of vehicle.   |          |
|       |                            |                             |  |          |
|       |                            | Comment Card - Civic Centre | Progress and less traffic in Scarborough area.   |          |
|       |                            | Comment Could Civil Country | He allowed the state of the sta |          |
|       |                            | Comment Card - Civic Centre | It will save so much time for people who live in Scarborough.  |          |
|       |                            |                             | The most important part of this project for me is the improvement of transit connectivity in Scarborough.  |          |
|       |                            | Comment Card - Civic Centre | The more surface vehicle travel is diverted of avoided the better.   |          |
|       |                            |                             | We are looking for a seamless connection between Scarborough Centre and North York, Bloor, Sheppard  |          |
|       |                            | Comment Card - Civic Centre | i.e. no changes in transit.  |          |
|       |                            | Comment Card Civic Contra   | One cost rider to downtown improved convice reliability, especially in the winter  |          |
|       |                            | Comment Card - Civic Centre | One seat rider to downtown, improved service reliability, especially in the winter.  |          |
|       |                            | Comment Card Grace Church   | Relieve lots of traffic in downtown Scarborough.   |          |
|       |                            | Comment Card - Grace Church |  |          |
|       |                            | Comment Card - Grace Church | Benefits to transit riders and emission reductions.  |          |
| 1     | 1                          | Comment Card - Grace Church | To bring families living in the 905 to return to Scarborough which will reduce travel times.   | <u> </u> |

| Station Location 9 Dog | Comment Card - Grace Church | The most important part about this project is the future of transits.  |
| Station Location & Des |                             | Existing Kennedy, Lawrence, Scarborough Centre, Sheppard.  |
|                        | Comment Card - Civic Centre | Where is there room to put a subway station at Lawrence and McCowan?   |
|                        | Comment Card - Civic Centre | The locations of the proposed stations and the time of completion of the Scarborough Subway.                   |
|                        |                             | Station design, especially at Lawrence - will these be safe underground walkways across the intersection to    |
|                        | Comment Card - Civic Centre | the hospital?  |
|                        |                             | Ridesharing at all stations and impact on road traffic. Short turns - how to erase this is minimized or        |
|                        | Comment Card - Civic Centre | eliminated. Ride sharing to minimize utility delays to the project and schedule. Delays.                       |
|                        | comment card - civic centre | entrinated. Nide sharing to minimize dunity delays to the project and schedule. Delays.                        |
|                        |                             | Quit lying to the public. LRTs that are not fully grade-separated are not 'rapid transit.' Also, the speed     |
|                        |                             | factor is gained by having stops spaced too far apart for convenience. LRTs are only intended for short-to-    |
|                        | Comment Card - Grace Church | long distance trips (which is why there are not rapid transit for long-distance travel).                       |
|                        |                             | 3 Subway stations is a really good start, but I am worried there are no parking spaces in all of these         |
|                        |                             | stations or at least one station. Most of the residents from east have to drive mostly then using the bus,     |
|                        | Comment Card - Civic Centre | because buses are very unreliable.   |
| Consultation & Study P | rocess                      | The assessment of increased access and ridership is comparing the proposed subway line to the current          |
|                        |                             | bus network which is deceiving. It needs to be compared to the SRT which is what the new line will be          |
|                        | Comment Card - Civic Centre | replacing.   |
|                        | Comment Card - Civic Centre | There is no information about anything and station locations etc.  |
| Project Support        |                             | Shortens the travel time from Scarborough to downtown Toronto. Therefore, I like your proposed plan of         |
|                        | Comment Card - Civic Centre | the extension of subway from Kennedy to STC and Sheppard.  |
|                        |                             | This is very important to me. I've lived in Scarborough since the year 2001. I have visited some cities in     |
|                        |                             | Europe and I can frankly say we are way way behind when it comes to mass public transportation like the        |
|                        | Comment Card - Civic Centre | subway system. This is a good way to catch up.   |

|-----------------|---|--|--------|
|                 |   | There is a whole underserved community out by UTSC/Centennial College: Students, Professors and staff.     |        |
|                 |   | Metrolinx needs to connect this community with the subway. There used to be a gas station at               |        |
|                 | Comment Card - Civic Centre                 | McCowan/Sheppard. There could be buried tanks and or soil contamination.                                   |        |
|                 |   |  |        |
|                 | Proposal From Public - Civic Centre         | Proposal of a new GO line as an alternative to the Scarborough Subway Extension (Refer to Appendix E1)     |        |
|                 | Proposal From Public - Civic Centre         | Proposal of a "T" intersection for the Scarborough Subway Extension (Refer to Appendix E1)                 |        |
|                 | Proposal From Public - Civic Centre         | Proposal of how to save billions on the Scarborough Subway Extension. (Refer to Appendix E1)               |        |
|                 | Proposal From Public - Civic Centre         | Proposal map of potential new alignment. (Refer to Appendix E1)  |        |
|                 |   | Demolition of SRT. D-S connection to Scarborough Centre route. Should be considered pinch point. Progress  |        |
|                 | Handwrittern Comment - Civic Centre         | - are we taking it down?   |        |
|                 | Metrolinx Event Recap - Civic Centre        | Why is the subway not extending to UofT or Centennial College campuses?                                    |        |
|                 | Metrolinx Event Recap - Civic Centre        | Why no station at Bellamy and Eglinton (GO Transit stop)?  |        |
|                 | Comment Card - Grace Church                 | With concerns in question, as the Danforth-Eglinton stop was not approved, they can revisit it at anytime. |        |
|                 |   | I'm a fan of the old "Transit City" plan under then Mayor David Miller. I don't think we need a subway. I  |        |
|                 | Comment Card - Grace Church                 | would prefer multiple LRT lines for the amount of money we're spending.                                    |        |
|                 |   | Please, please reconsider the LRT - Lrt would not rob other needed areas of transit - such as the downtown |        |
|                 |   | relief-subway line - A Yonge subway to Richmond Hill, Kipling extension to Sherway Gardens - Sheppard LRT  |        |
|                 | Comment Card - Grace Church                 | - much more responsible ways for us to spend our monies.   |        |
|                 |   | Please consider a station at Danforth/Brimley and Eglinton. Use this opportunity to improve                |        |
|                 |   | pedestrian/cycling conditions around Kennedy station (Eglinton between Midland and Kennedy) Ideally        |        |
|                 |   | minimize grade changes and stairs (in an ideal world remove the bridge). Create a public square in parking |        |
|                 | Comment Card - Grace Church                 | lot of Don route Rec Centre.   |        |
|                 |   | TTC assessed using RT route-found it to be feasible. Just re-use the existing Scarborough RT right of way. |        |
|                 |   | Save over \$4 billion in costs and have the extension running in about 4 years. The only reason extension  |        |
|                 | Comment Card - Grace Church                 | being tunneled is because of Tory's 'stupid-track' idea.   |        |
|                 | Comment Card - Grace Church                 | Why couldn't the subway go along the existing right-of-way of the present LRT?                             |        |
|                 |   | Request for business case for option 1. I am not a member of their group, only received this info tonight  |        |
|                 |   | (Re: proposal attached to comment card - Refer to Appendix E2). Seems fair, especially once so much        |        |
|                 | Comment Card - Grace Church                 | money has been spent thus far. Why not give some Scarborough residents the opportunities to be heard.      |        |
|                 |   |  |        |
|                 |   | Exploring measures for cost/time savings. Operation with TTC (plans for BRT on Eglinton in 5-yr plan) to   |        |
|                 | Comment Card - Grace Church                 | build Eglinton portion w/ cut and cover (effectively working 2 projects at once) for cost savings.         |        |
|                 | Comment Card - Grace Church                 | We need a stop at Eglinton and McCowan on the corner or rough-in for it.                                   |        |
|                 | Proposal From Public - Grace Church         | TTC map submitted with highlighted alignments. (Refer to Appendix E2)                                      |        |

## SCARBOROUGH SUBWAY EXTENSION

### **ENVIRONMENTAL PROJECT REPORT –** 2020 ADDENDUM

APPENDIX C4. TECHNICAL MEETING SUMMARIES AND PRESENTATIONS

### **★** METROLINX

**Toronto and Region Conservation Authority** 

### **Meeting Minutes**

DATE/TIME: Thursday January 23<sup>rd</sup>, 1:30 PM - 2:30 PM

**LOCATION: TRCA Head Office - Rouge Room** 

PREPARED BY: Laura Witherow, EPA

Objective of Meeting: Scarborough Subway Extension (SSE), TRCA Update

### **IN ATTENDANCE**

### ABSENT/copy

- James Francis, Metrolinx (MX)
- Dragana Jaksic, MX
- Laura Witherow, MX
- Margie Akins, Toronto and Region Conservation Authority (TRCA)
- Renee Afoom-Boateng TRCA
- Elizabeth Ignatius TRCA

- Mark Ciavarro (MX)
- Carrie Sheaffer (MX)
- Carolyn Tunks (AECOM)
- Sheldon Frankel (4Transit)
- Stephanie Rice (4Transit)

### **MINUTES**

| TOPIC / COMMENTS   | ACTION BY |
|--|-----------|
| 1. Safety Moment & Introductions   |           |
| ◆ Safety Moment - in icy weather remember to salt paved surfaces and               | Note      |
| wear proper footwear.  |           |
| Roundtable introductions of MX and TRCA teams                                      | Note      |
| ◆ TRCA noted that E. Ignatius will be the main point of contact for SSE.           | Note      |
| 2. Project Update  |           |
| ♦ Metrolinx provided a high-level update on the SSE project                        | Note      |
| o 3 stops  |           |
| <ul> <li>New stations at Lawrence Ave and Sheppard Ave and revised</li> </ul>      |           |
| station location at Scarborough Centre.  |           |
| <ul><li>New terminal station is at Sheppard</li></ul>                              |           |
| o 2 Tunnel Boring Machines (TBMs)  |           |
| <ul> <li>One launch shaft at Sheppard and McCowan; one launch shaft</li> </ul>     |           |
| at Eglinton and Midland;   |           |
| <ul><li>Extraction shaft for both TBMs is proposed at Lawrence Ave</li></ul>       |           |
| o Project is divided into two contracts:   |           |
| <ul> <li>Tunnel Contract will include tunnel construction and headwall</li> </ul>  |           |
| installations - anticipated in-market June 2020                                    |           |
| <ul> <li>Railway Contract will include the remaining scope, such as the</li> </ul> |           |
| installation of the railway, construction of the stations, emergency               |           |
| exit buildings and bus terminals - anticipated in-market Q3 2021                   |           |
| o Public-private partnership (P3)  |           |

| ◆ A Transit Project Assessment Process (TPAP) was completed by the City of Toronto and the Toronto Transit Commission (TTC) for the SSE in 2017. An Environmental Project Report (EPR) Addendum is underway to address project changes since the 2017 TPAP.   | Note |
|---|------|
| ◆ R. Afoom-Boateng asked if according to the P3 delivery model the EA is completed concurrently with the development of the Reference Concept Design (RCD). Metrolinx confirmed that yes, they are completed concurrently, but the EA findings and conclusions feed into the RCD, as applicable.  | Note |
| ◆ TRCA noted that they had meetings with Metrolinx for 2 other projects earlier in the week and these projects are following similar review timelines.  | Note |
| 3. Natural Environment Report (NER)   |      |
| Station at Lawrence and McCowan:  ◆ Station and bus terminal are proposed near but outside of the TRCA regulated area   | Note |
| <ul> <li>Vegetation removal is planned to follow the Metrolinx Vegetation Guideline. The Vegetation Guideline describes three compensation approaches: Baseline compensation (where no By-law or relevant policies are available), By-law compensation (where relevant by-laws are available), Ecological compensation (where trees are in a designated natural area, e.g. TRCA regulated area).</li> <li>If there is any vegetation removal within the TRCA regulated area, the Project team will consult with TRCA.</li> <li>Erosion and Sediment Control Plans will be developed to mitigate potential indirect impacts from construction to Highland Creek.</li> <li>Candidate wildlife habitat (monarch butterfly and bat maternity colonies) and habitat (Eastern Wood-peewee and Wood Thrush) was identified at the northeast corner of Lawrence Ave E and McCowan Rd. If impacts extend into this area, species-specific preconstruction surveys will be conducted.</li> <li>The tunnel at this location is anticipated to be deep (top of tunnel more than 20 m below ground surface)</li> </ul> | News |
| <ul> <li>Station at Sheppard:</li> <li>◆ Some station features (e.g. bus terminal, passenger pick-up and dropoff with emergency exit) are proposed within or adjacent to the TRCA regulated area.</li> <li>◆ Tail tracks will extend from Sheppard Ave E to the emergency exit at the passenger-pick up and drop-off at 20 Nugget Avenue, and will run beneath private properties, Highland Creek and the Nugget Avenue road right-of-way.</li> <li>◆ Tail track design and construction will be undertaken as part of the</li> </ul>   | Note |

| second contract (i.e. Railway Contract); construction methodology will be developed by the future contractor (ProjectCo).   | i            |
|---|--------------|
| be developed by the future contractor (ProjectCo).  |              |
|   |              |
| TRCA noted that tail track construction methodologies that would  |              |
| require open-cutting Highland Creek would not be supported by   |              |
| the TRCA. TRCA staff advised that the preference is to go under   |              |
| Highland Creek. Metrolinx confirmed that if tail-track construction   |              |
| requires alterations to Highland Creek, the TRCA, as well as other  |              |
| relevant agencies, will be consulted as mitigation measures are   |              |
| developed to maintain water quantity and quality in the creek   |              |
| system.   |              |
| ◆ TRCA noted that the proposed passenger pick-up and drop-off   |              |
| location is in the floodplain and the TRCA will provide feedback on   |              |
| implications to the project throughout their review of the NER.   | Note         |
|   |              |
| Launch Shaft at Eglinton Ave, Station at Scarborough Centre, EEBs 5 and 7   |              |
| ♦ These design changes are outside of the TRCA regulated area in  |              |
| developed residential or commercial settings.   |              |
|   |              |
| Next Steps  |              |
| ◆ TRCA will receive two (2) hard copies and one (1) digital copy of the   | L. Witherow  |
| Draft NER on January 27, 2020. There will be no survey plans or   |              |
| drawings.   |              |
| ◆ TRCA will receive the Draft EPR Addendum on February 10, 2020.  | L. Witherow  |
| • Reviewers' comments are requested by February 28, 2020. This allows   | E. Ignatius  |
| a 25 business day review period for the Draft NER.  | -            |
| ♦ Metrolinx noted that the Project schedule allows for one round of   | E.lgnatius   |
| review and suggested that if the TRCA provides comments by  | •            |
| February 24, 2020 (in 20 business days), a meeting can be scheduled   |              |
|   |              |
|   |              |
| TRCA will advise on the schedule and approach once the NER is   |              |
| received and reviewed.  |              |
| 4. Final Thoughts   |              |
| ◆ Renee will be the Senior Planner for TRCA on both Ontario Line (OL)   | Note         |
| and Eglinton Crosstown West Extension (ECWE) in addition to SSE.  |              |
| ♦ Elizabeth will be the first point of contact from TRCA for SSE. Renee   | Note         |
|   |              |
| will provide project background and oversight.  | E. Ignatius  |
| <ul> <li>will provide project background and oversight.</li> <li>A flood study may currently be underway for Highland Creek -</li> </ul>  | L. ignatius  |
|   | L. Igliadus  |
| review and suggested that if the TRCA provides comments by February 24, 2020 (in 20 business days), a meeting can be scheduled later that week to discuss the comments and anticipated report revisions in response to those comments. E. Ignatius noted that the TRCA will advise on the schedule and approach once the NER is received and reviewed.  4. Final Thoughts  • Renee will be the Senior Planner for TRCA on both Ontario Line (OL) and Eglinton Crosstown West Extension (ECWE) in addition to SSE. | Note<br>Note |

**Hydro One Networks Inc.** 

### Subway Program -**Environmental Assessments**

James Francis, Manager - Environmental Programs and Assessment

**Hydro One Presentation** 

March 11, 2020

### **AGENDA**

- 1. Subway Program Overview
- 2. Scarborough Subway Extension
- 3. Eglinton Crosstown West Extension
- 4. Ontario Line
- 5. Yonge North Subway Extension
- 6. Discussion
  - Hydro One Conflict Areas/EA Requirements
  - Next Steps

### **SUBWAY PROGRAM**

- Metrolinx is working to deliver the following priority subway projects:
  - Ontario Line, to be delivered as early as 2027;
  - Yonge North Subway Extension, to be delivered by 2029-30;
  - Scarborough Subway Extension, to be delivered by 2029-30; and,
  - Eglinton Crosstown West Extension, to be delivered by 2030-31.
- Environmental assessment (EA) clearances build on previously completed EAs

# Scarborough Subway Extension

### **SCARBOROUGH SUBWAY EXTENSION - PROJECT UPDATE**

- 1 stop:
  - Environmental Project Report (EPR) completed 2017
  - 1 station at Scarborough Centre
  - Tunnel launch shaft at Scarborough Centre
  - Design-bid-build

### • 3 stop:

- 3 stations, new terminal at Sheppard
- Alignment within McCowan Road right-of-way at Scarborough Centre
- 2 tunnel launch shafts; one at Sheppard and one at Eglinton and Midland
- Public-private partnership (P3)
- EPR Addendum underway

### SSE - PROJECT UPDATES IN GATINEAU HYDRO CORRIDOR

- Removed standalone
   TPSS 2 on east side of
   McCowan Rd
- 2. Proposing new bus loop with bus driver facility on west side of McCowan Rd. At-grade construction only (i.e. no connection to tunnel).
  - Approx. 15 m horizontal clearance from hydro tower
  - Part of second contract (SRS Co)

### **SSE - NEXT STEPS**

Notice of EPR Addendum: week of April 13, 2020 (anticipated)

## **Eglinton Crosstown West Extension**

### **EGLINTON CROSSTOWN WEST EXTENSION**

An Environmental Project Report (EPR) was completed in 2010 for the Eglinton Crosstown LRT Project between Kennedy Road and Pearson Airport. The segment from Mount Dennis Station to Kennedy Station is currently under construction.

The segment between Mount Dennis Station and Renforth Drive, known as the "Eglinton Crosstown West Extension" (ECWE), will now be mostly underground.

| Length of Route           | 9.2 km |
|---------------------------|--------|
| Number of Stations        | 7      |
| Projected Daily Boardings | 37,000 |

An EPR Addendum is underway for the ECWE to capture updated existing conditions, vertical alignment and station locations.

### **ECWE - ITEMS OF POTENTIAL INTEREST**

The project will intersect two hydro corridors:

- (1) West of Martin Grove Road and Eglinton Avenue West.
- (2) South of Eglinton Avenue West, near Renforth Gateway.

The project will be below grade along these segments.

### **ECWE - NEXT STEPS**

• Notice of EPR Addendum: week of April 13, 2020 (anticipated)

### **Ontario Line**

### **ONTARIO LINE**

#### **PROJECT INFORMATION**

### By the numbers:

- 15.5 km
- 15 station stops
- \$10.9B project cost (Budget 2019)
- 2027 completion

### **Terminus points:**

Exhibition Station - Science Centre

### **Elevation:**

- ■At grade
- **□**Elevated
- **□**Tunnel
- ✓ Mixed

#### Timelines\*

RFQ: Spring 2020

RFP: Summer/Fall 2020

FINANCIAL CLOSE: Spring 2022

 EA coverage building off completed Relief Line South EPR (2018) and Relief Line North planning studies

### **ONTARIO LINE - NEXT STEPS**

- Draft environmental reports for HONI review May 2020
- Second round of public engagement Late spring 2020

# Yonge Subway North Extension

### YONGE NORTH SUBWAY EXTENSION

### **PROJECT INFORMATION**

### By the numbers:

- 7.4 km
- 6 station stops
- \$5.6B project cost (Budget 2019)
- 2029-30 completion

### **Terminus points:**

Finch - Richmond Hill Centre

#### **Elevation:**

- □At grade
- **□**Elevated
- ✓ Tunnel
- **□**Mixed

### • EPR completed in 2009

- EPR Addendum completed in 2014 for underground train storage near Yonge/Bantry
- EPR Addendum will be undertaken to capture updated existing conditions and design changes

#### **Timelines**

**RFQ**: Fall 2021

RFP: Spring 2022

FINANCIAL CLOSE: Fall 2023

### Discussion

### **SUMMARY OF POTENTIAL INTERSECTS/CONFLICT AREAS**

ECWE - below ground

Clearances

SSE - Approximately 15 m horizontal clearance from hydro tower

EA requirement

Ontario Line - TBD

YNSE - TBD

### **DISCUSSION**

- Hydro One Conflict Areas/EA Requirements
  - Report review timelines
- Next Steps
  - Contacts
  - Meetings

### **METROLINX**

### **★** METROLINX

**City of Toronto** 

## Subway Program - EA Look-ahead

James Francis, Manager

### **AGENDA**

- 1. Subway Program EA Overview
- 2. Ontario Line
- 3. Scarborough Subway Extension
- 4. Eglinton Crosstown West Extension
- 5. Yonge North Subway Extension

### **EA OVERVIEW FOR SUBWAY PROGRAM**

### Ontario Line:

- New EA underway
  - Pre-planning, environmental studies and engagement in progress
  - Building on Relief Line South TPAP

### Eglinton Crosstown West Extension

- TPAP approved: 2010
- Addendum underway to assess underground alignment
  - Environmental studies and engagement planning in progress

### Scarborough Subway Extension:

- TPAP approved: 2017
- Addendum underway to assess northern extension, new stations and alignment changes
  - Environmental studies and engagement planning in progress

### Yonge North Subway Extension

- TPAP approved: 2009
- Assessing need for EPR Addendum
  - TPAP review underway
  - Field studies planned for spring 2020

Metrolinx proceeding as the sole EA proponent for all 4 subway projects

• Letter confirming sole proponency for YNSE and SSE EA Addenda will be sent to MECP

### **ONTARIO LINE - EA LOOK-AHEAD**

- Environmental studies underway; reports will be shared for review once available
- Upcoming draft reports for review:
  - OLN Stage 1 Archaeological Assessment (Pape to Science Centre) late February 2020
  - OLW Stage 1 Archaeological Assessment (Osgoode to Ontario Place) mid-March 2020
  - OLS Stage 1 Archaeological Assessment (Pape to Osgoode) late March 2020
  - Cultural Heritage Report May 2020
- Requesting a 20-day review period
- Next round of public engagement planned for late spring 2020
  - Share results of environmental studies to date, additional information on topics of interest from initial round of engagement

### SCARBOROUGH SUBWAY EXTENSION - EA OVERVIEW

- EPR Addendum underway
- Public Consultation planned for March 2020
  - Online engagement
  - Open houses
  - Pop-ups
- Notice of EPR Addendum anticipated April 1, 2020

### SCARBOROUGH SUBWAY EXTENSION - DRAFT ENVIRONMENTAL REPORTS

| Draft Report           | Anticipated Date of Circulation to the City | Review Comments to Metrolinx | Metrolinx Responses to the City |
|------------------------|---|------------------------------|---------------------------------|
| Air Quality            | January 27                                  | February 28                  | March 20                        |
| Cultural Heritage      | January 27                                  | February 28                  | March 20                        |
| Natural Heritage       |   | February 28                  | March 20                        |
| Noise and Vibration    | February 10                                 | February 28                  | March 20                        |
| Traffic/Transportation | January 27                                  | February 28                  | March 20                        |
| EPR Addendum           | February 10                                 | February 28                  | March 20                        |

### SCARBOROUGH SUBWAY EXTENSION - DRAFT ENVIRONMENTAL REPORTS

| Discipline                 | Findings   | Mitigation and Next Steps  |
|----------------------------|--|--|
| Air Quality <sup>(1)</sup> | <ul> <li>Potential increased criteria levels at nearby downwind receptors</li> </ul>   | <ul> <li>Proceed with quantitative assessment</li> <li>Development of an Air Quality Management Plan</li> </ul>  |
| Cultural<br>Heritage       | <ul> <li>No known or potential heritage properties in the study<br/>area</li> </ul>  | No mitigation required   |
| Natural<br>Heritage        | <ul> <li>Minimal vegetation removal (isolated trees, manicured grass)</li> <li>Minimal removal of monarch habitat and candidate wildlife habitat (e.g., species of conservation concern)</li> </ul>        | <ul> <li>Seek opportunities to plant milkweed or forage vegetation, where possible</li> <li>Conduct species-specific surveys, where necessary</li> </ul>                 |
| Noise and<br>Vibration     | <ul> <li>Elevated levels of noise and vibration during construction<br/>at select locations</li> </ul>   | <ul> <li>Development of a Noise and Vibration Control Plan<br/>once construction means and methods confirmed</li> </ul>  |
| Traffic/<br>Transportation | <ul> <li>Construction impacts (e.g. road capacity, walking distances, local transit stops)</li> <li>Operation and maintenance impacts (e.g. traffic operations, pedestrian and cyclist volumes)</li> </ul> | <ul> <li>Conduct a Traffic Impact Study (TIS) for all stations,<br/>including a detailed traffic modelling exercise for<br/>the station at Scarborough Centre</li> </ul> |

#### Notes:

(1) Two phased approach (qualitative assessment followed by quantitative assessment) consistent with 2017 EPR

### EGLINTON CROSSTOWN WEST EXTENSION - EA OVERVIEW

- Addendum underway for western segment of the Eglinton Crosstown between Mt Dennis Station and Renforth/Convair
- Ongoing discussions with GTAA on extension to Pearson Airport
- Public consultation planned for March 2020
- Notice of EPR Addendum anticipated April 13, 2020

### EGLINTON CROSSTOWN WEST EXTENSION - DRAFT ENVIRONMENTAL REPORTS

| Draft Report            | Anticipated Date of Circulation to the City | Review Comments to Metrolinx | Metrolinx Responses to the City |
