

Notice of Publication of Final East Harbour Station Early Works Report

Ontario Line Project

The Project

The Ontario Line will bring 15.6 kilometres of new subway service to Toronto, making it faster and easier for people to get where they need to be each day. The line will stretch across the city, from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line will have 15 new stations, including six interchange stations, connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable service.

East Harbour Station Early Works

East Harbour Station early works are planned where the Ontario Line will run alongside GO train operations. Completing early works before major construction contracts begin will help streamline the delivery of the Ontario Line and GO Expansion projects and ensure they both stay on schedule. East Harbour Station early works will include reconfiguring the existing Lakeshore East GO tracks to accommodate station facilities and future Ontario Line tracks; building station facilities such as platforms and entrances; replacing and expanding the existing Eastern Avenue rail bridge to accommodate four Lakeshore East GO tracks and two Ontario Line tracks; and completing site preparation activities such as grading, demolishing existing structures where required, and relocating or protecting utilities.

Environmental impacts of East Harbour Station early works are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*. In accordance with Section 8 of O. Reg. 341/20, Metrolinx prepared the Draft East Harbour Station Early Works Report that was available for review from September 23, 2021 to October 24, 2021.

The Draft East Harbour Station Early Works Report outlined the purpose of early works, a description of local environmental conditions, potential impacts, proposed mitigation measures and a consultation record.

Public comments received through the comment period for the Draft East Harbour Station Early Works Report were recorded and have been incorporated into the Final East Harbour Station Early Works Report.

The Final Early Works Report and Minister's Review Process

Metrolinx established an issues resolution process to attempt to resolve concerns raised during the review of the Draft East Harbour Station Early Works Report. In accordance with Section 11 of O. Reg. 341/20, Metrolinx updated the Draft East Harbour Station Early Works Report and published the Final East Harbour Station Early Works Report to include a description of the issues resolution process, any concerns raised during the review period, what Metrolinx did to address these concerns, and impacts to the early works implementation timeline as a result of addressing concerns. Effective **November 17, 2021** the Final East Harbour Station Early Works Report will be available on the project webpage (www.metrolinx.com/ontarioline). Within 35 days after receipt of the Notice of Final East Harbour Station Early Works Report, the Minister of the Environment, Conservation and Parks may issue a notice to Metrolinx imposing conditions related to the early works. The Minister may also choose to inform Metrolinx that no notice will be issued. The Minister may issue a notice only if:

- The Minister is of the opinion that the way in which Metrolinx has addressed a concern raised in the issues resolution process would cause unreasonable delay to the implementation of the early works and the conditions in the Minister's notice change the way in which the concern is addressed in the final Early Works Report without causing unreasonable delay to the implementation of the early works; or
- The Minister is of the opinion that the early works may have an adverse impact on the existing Aboriginal or treaty rights of the Indigenous peoples within Canada, and the conditions may prevent, mitigate, or remedy the adverse impact.

Once the Minister gives notice, confirms that no notice will be given, or the 35-day Minister's review period is complete, Metrolinx will proceed with the early works as described in the Final East Harbour Station Early Works Report, subject to any conditions imposed by the Minister.

To obtain an electronic copy of the Final East Harbour Station Early Works Report, please contact the project email listed below.

Franca Di Giovanni (T: 416-202-5100, E: ontarioline@metrolinx.com) may be contacted on behalf of Metrolinx.
