| 9 | PFR - PDCP LAU | Socio-Economic and Land Use Characteristics | Parkland Strategy            | PFR requests that this report references the Parkland Strategy. This area is currently deficient in parkland and the report should highlight the importance of protecting existing parkland and protecting lands identified as future parkland. | Details on the City of Toronto's Parkland Strategy have been added to Section 2.2.3 of the Early Works Report.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | 1 | Comment has been addressed 2.2.3.7 (p19)    | C |

| 10           | PFR - PDCP LAU | Archaeological Resources   | General                                        | Are there any anticipated utility conflicts or relocation required as a result of tunneling work in Parliament Square Park? If so, PFR recommends archaeological assessments be undertaken as they would for First Parliament.                                                                                                                                  | Early works are not anticipated to impact Parliament Square Park. Future tunnelling impacts will be covered in the forthcoming Ontario Line Environmental Impact Assessment Report.                                                                                                             | 3 | Comment will be closed. EIAR will address tunneling impacts at Parliament Square Park.                                                                                                                                                                                                   | C |
| 11           | PFR - PDCP LAU | Archaeological Resources   | General                                        | Any objectives outlined in the First Parliament Working Group specifically related to archaeology must be reflected in this section.                                                                                                                                                                                                                            | This report documents early works activities, and covers archaeological requirements for the Corktown Station early works site. Metrolinx will continue to engage the City and has committed to have the City review workplans and scope for upcoming archaeological programs at this location. | 1 | Where has this been outlined as a commitment in the EWR?                                                                                                                                                                                                                                 | O |
| 12           | PFR - PDCP LAU | Traffic and Transportation | Transportation Services bikeway                | Current TPA lands are planned for TS bikeway. PFR supports Transportation Services' ask for a bikeway through the existing parking lot just north of Parliament Square Park within the Corktown Station EWP footprint to provide a separate space for people walking and cycling. The footprint should reflect the bikeway area provided by CREM.               | Information on the Esplanade-Mill bikeway will be added to Section 5.6.2.2 of the Early Works Report, Planned Services and Facilities. Metrolinx will continue to consult with the City of Toronto on the Esplanade and Mill Street bikeway.                                                    | 1 | 5.6.2.2. is incorrect as the cycle track is proposed within the Corktown Station EWP footprint, directly North of Parliament Square Park. It is our understanding that a request has been made to exclude these lands from the Corktown Station EWP footprint. Mx to revise and confirm. | O |
| 13           | PFR - PDCP LAU | Traffic and Transportation | Transportation Network - Active Transportation | Revise to read: Coordinate with the City of Toronto to minimize the interference with pedestrians and cyclists. This may include fencing, hoarding (min 2m high, solid and secured), shared-lane markings, signals, wayfinding signs, and lighting as required to provide pedestrians and cyclists with safe, accessible, and continuous routes.                | Noted, suggested revision will be reflected in the revised report.                                                                                                                                                                                                                              | 1 | Comment has been addressed Table 4-1: Transportation Network - Active Transportation (p43)                                                                                                                                                                                               | C |

CoT to review summary in updated report, once available.                                                                                                                                                                                           | The Noise and Vibration summary will be added to the Early Works Report.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 1                                   | Confirmed N&V report has been included. | C                  |
| 2                              | Transit Expansion Office in consultation with LeighFisher | Air Quality Monitoring                | Table ES-1 and Table 4-1               | The approach to air quality monitoring must be detailed within the Air Quality Management Plan. This should be explicitly stated within the Mitigation Measures column of Table ES-1 and Table 4-1.                                                                                                                                              | The mitigation table (ES-1 & 4-1) will be revised to clarify that an Air Quality Management Plan will be a requirement of construction activities, and will include details on the approach to Air Quality monitoring.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 1                                   | Confirmed revisions.                    | C                  |
| 3                              | Transit Expansion Office in consultation with LeighFisher | Background Concentrations             | Section 2.1 and Section 3.1            | Please confirm the background concentrations of the contaminants stated in Section 3.1 considers the effects of traffic. It is noted the report includes a separate volume of traffic summary, however, the purpose of this information is unclear if the effects of traffic within the study area are already accounted for.                    | <p>The background concentrations presented within the report do consider general effects of traffic. The locations of the monitoring stations (National Air Pollution Surveillance data) were specifically selected to be representative of downtown Toronto traffic conditions (e.g. College Street close to Spadina Road). The specific traffic volumes referenced within the reporting are included to demonstrate relative impacts from major sources of traffic within the Study Area, however these traffic volumes were not explicitly modelled using dispersion modelling software.</p> <p>It was assumed that the representative measurements within the general downtown Toronto core would be sufficient to indicate background air quality of the early works.</p> | 1                                   | Confirmed clarification.                | C                  |
| 4                              | Transit Expansion Office in consultation with LeighFisher | Disruption of Contaminated Soils      | Table ES-1 and Table 4-1               | A detailed approach to addressing and mitigating impacts associated with disrupting contaminated soils during construction must be detailed within the Air Quality Management Plan. This should be explicitly stated within the Mitigation Measures column of Table ES-1 and Table 4-1.                                                          | Measures will be added to the Air Quality Management Plan referenced in the Mitigation Tables (ES-1 & 4-1) to address air quality related impacts from potentially disturbed contaminated soils. In addition, the Air Quality Management Plan will indicate measures be followed according to any Soils Management Plan or similar document during construction activities related to contaminated soils.                                                                                                                                                                                                                                                                                                                                                                      | 1                                   | Confirmed additions.                    | C                  |
| 5                              | Transit Expansion Office in consultation with LeighFisher | Noise and Vibration Management Plan   | Table ES-2 and Table 6-1               | The report should recommend the development of a Noise and Vibration Management plan, which outlines details of the implementation of the various mitigation measures and monitoring activities stated. Furthermore, it should be required that the Noise and Vibration Management plan establish and apply project-specific vibration criteria. | A commitment has been added to Table ES-2 to note that Metrolinx will develop a plan that addresses noise and vibration management as project planning progresses.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | 1                                   | Confirmed commitment.                   | C                  |

---

Good morning Julia,

The draft EWR submitted on March 11 was the initial draft circulated to the City for review. The draft report made public along with the Notice of EWR is a version of the report with all agency comments incorporated. The City's comments that were provided on April 14 have been incorporated into the version of the EWR made public along with the notice.

As for the responses to comments provided April 14, we had circulated those back to the City on May 10, with a revised version updated with the action column filled out as requested, passed along to the City last week.

Let me know if any additional questions.

Thanks,

**MERLIN YUEN**

Merlin,

Could you please confirm whether this Draft EWR is the same version that was reviewed by the City (submitted March 11), and when the City can expect Mx responses to our comments that were provided on April 14?

Regards,

**Julia Murnaghan**

**Subject:** Ontario Line - Notice of Draft Corktown Station EWR

Good afternoon,

The Notice of Draft Corktown Station Early Works Report (EWR) for the Ontario Line Project has been published on May 12, 2021. The Draft EWR is available on the project website at [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline). The public review period begins May 12, 2021 and will continue until June 11, 2021. Attached for your reference is the Notice of Publication of Draft Corktown Station EWR, as well as a covering letter. Please do not hesitate to contact us if you have any questions.

Thanks,

**Crystal Ho**

Metrolinx

**Subject: Ontario Line - Notice of Publication of Draft Corktown Station Early Works Report**

Dear Julia Murnaghan,

The Ontario Line will bring 15.6 kilometres of new subway service to Toronto to make it faster and easier for people to get where they need to be each day. The line will stretch from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line is proposed to include 15 stations, including six interchange stations, and connections to three GO train lines, two existing subway lines, the Eglinton Crosstown LRT, and streetcar lines. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable commutes.

**Draft Corktown Station Early Works Report**

Ontario Line early works are components of the Ontario Line Project that are proposed to proceed before the completion of the Ontario Line environmental impact assessment report process. Early works are defined in O. Reg. 341/20 as follows:

“any components of the Ontario Line Project that Metrolinx proposes to proceed with before the completion of the Ontario Line assessment process, such as station construction, rail corridor expansion, utility relocation or bridge replacement or expansion.”

Metrolinx finalized the Exhibition Station Early Works Report in February 2021 and is now proceeding with an Early Works Report for the early works at Corktown Station. Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These early works are being advanced to prepare the site for future construction staging and laydown to support tunneling and below ground construction activities, and work associated with the future Corktown Station.

The First Parliament site, located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail) and remnants of early Toronto industry may be found here. Metrolinx is eager to unlock the potential of the site and work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

Environmental impacts of Corktown Station early works are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the

20 Bay St, Suite 600      416.874.5900  
Toronto, ON M5J 2W3      metrolinx.com

Environmental Assessment Act. Metrolinx has now incorporated comments and feedback from the initial round of engagement with Indigenous Nations and agencies on the initial draft of the Corktown Station EWR into the Draft EWR. In accordance with Section 8 of O. Reg. 341/20, Metrolinx has prepared the Draft Corktown Station Early Works Report (EWR) that is now available for public review.

The Draft EWR documents the assessment of Corktown Station early works. The report outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures and a consultation record.

Effective **May 12, 2021**, the Draft Corktown Station EWR will be available for review on the Project webpage ([www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)). Those who wish to provide comments on the Draft EWR must do so by **June 11, 2021**.

Please find attached the **Notice of Publication of Draft Corktown Station EWR** which provides further information, including a description of the process for submitting comments.

If you have any questions or concerns, please do not hesitate to contact the Project Team at [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com).

Sincerely,

A handwritten signature in black ink, appearing to read 'Maria Zintchenko', with a stylized flourish at the end.

## Notice of Publication of Draft Corktown Station Early Works Report Ontario Line Project

### The Project

The Ontario Line will bring 15.6 kilometres of new subway service to Toronto to make it faster and easier for people to get where they need to be each day. The line will stretch across the city, from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line is proposed to include 15 potential stations, including six interchange stations, and connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 of its stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable commutes.

### Corktown Station Early Works

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These early works are being advanced to prepare the site for future construction staging and laydown to support tunneling and below ground construction activities, and work associated with the future Corktown Station.

The First Parliament site, located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail), and remnants of early Toronto industry may be found here.

Metrolinx is eager to unlock the potential of the site and work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

Environmental impacts of Corktown Station early works are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*. In accordance with Section 8 of O. Reg. 341/20, Metrolinx has prepared the Draft Corktown Station Early Works Report (EWR) that is now available for public review.

The Draft EWR documents the assessment of Corktown Station early works. The report outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures and a consultation record.

### **The Draft Early Works Report Review and Consultation Process**

Effective **May 12, 2021**, the Draft Corktown Station EWR will be available for review on the project webpage ([www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)).

As we temporarily shift to virtual open houses, please join us online from **May 12 to June 11, 2021** to find out more about and provide your feedback on the Draft Corktown Station EWR via the webpage form.

Those who wish to provide comments on the Draft Corktown Station EWR must do so by **June 11, 2021** and submit them using the webpage form or address them to the following email: [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com).

Section 10 of O. Reg. 341/20 requires Metrolinx to establish an issues resolution process to attempt to resolve any concerns raised by the public or Indigenous Nations during the review period. At the end of the review period, Metrolinx will update the Draft Corktown Station EWR by adding a description of the issues resolution process, what Metrolinx did to address any concerns, and if the early works implementation timeline will be impacted as a result of addressing concerns. Metrolinx will then publish the Final Corktown Station EWR on the project webpage: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline) and issue a Notice of Publication of Final Corktown Station EWR.

To obtain a copy of the Draft Corktown Station EWR, please contact the project email listed above.

**Josh Vandezande (T: 416-202-5100, E: [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com)) may be contacted on behalf of Metrolinx.**

Hi Julia,

Apologies for the late response. We have added in a column with MX action to the spreadsheet attached. Let me know if you need anything further.

Thanks,

**Crystal Ho**

| 1                              | Transit Expansion Office in consultation with LeighFisher | General - Noise and Vibration summary | General                                | It is noted the summary of the Noise and Vibration report is missing within this main report. CoT to review summary in updated report, once available.                                                                                                                                                                                           | The Noise and Vibration summary will be added to the Early Works Report.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 1        |
| 2                              | Transit Expansion Office in consultation with LeighFisher | Air Quality Monitoring                | Table ES-1 and Table 4-1               | The approach to air quality monitoring must be detailed within the Air Quality Management Plan. This should be explicitly stated within the Mitigation Measures column of Table ES-1 and Table 4-1.                                                                                                                                              | The mitigation table (ES-1 & 4-1) will be revised to clarify that an Air Quality Management Plan will be a requirement of construction activities, and will include details on the approach to Air Quality monitoring.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 1        |
| 3                              | Transit Expansion Office in consultation with LeighFisher | Background Concentrations             | Section 2.1 and Section 3.1            | Please confirm the background concentrations of the contaminants stated in Section 3.1 considers the effects of traffic. It is noted the report includes a separate volume of traffic summary, however, the purpose of this information is unclear if the effects of traffic within the study area are already accounted for.                    | <p>The background concentrations presented within the report do consider general effects of traffic. The locations of the monitoring stations (National Air Pollution Surveillance data) were specifically selected to be representative of downtown Toronto traffic conditions (e.g. College Street close to Spadina Road). The specific traffic volumes referenced within the reporting are included to demonstrate relative impacts from major sources of traffic within the Study Area, however these traffic volumes were not explicitly modelled using dispersion modelling software.</p> <p>It was assumed that the representative measurements within the general downtown Toronto core would be sufficient to indicate background air quality of the early works.</p> | 1        |
| 4                              | Transit Expansion Office in consultation with LeighFisher | Disruption of Contaminated Soils      | Table ES-1 and Table 4-1               | A detailed approach to addressing and mitigating impacts associated with disrupting contaminated soils during construction must be detailed within the Air Quality Management Plan. This should be explicitly stated within the Mitigation Measures column of Table ES-1 and Table 4-1.                                                          | Measures will be added to the Air Quality Management Plan referenced in the Mitigation Tables (ES-1 & 4-1) to address air quality related impacts from potentially disturbed contaminated soils. In addition, the Air Quality Management Plan will indicate measures be followed according to any Soils Management Plan or similar document during construction activities related to contaminated soils.                                                                                                                                                                                                                                                                                                                                                                      | 1        |
| 5                              | Transit Expansion Office in consultation with LeighFisher | Noise and Vibration Management Plan   | Table ES-2 and Table 6-1               | The report should recommend the development of a Noise and Vibration Management plan, which outlines details of the implementation of the various mitigation measures and monitoring activities stated. Furthermore, it should be required that the Noise and Vibration Management plan establish and apply project-specific vibration criteria. | A commitment has been added to Table ES-2 to note that Metrolinx will develop a plan that addresses noise and vibration management as project planning progresses.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | 1        |

| 1                           | Heritage Planning - Archaeology | Archaeological Resources          | Early Works Report (EWR) - p. ix: Archaeological Resources                         | This revised property boundary includes three archaeological sites: The Parliament Site (AjGu-41), the Toronto Lime Kiln Works Site (AjGu-61), and the Lime Kiln Works Site (AjGu-64). Each of these sites are identified as Archaeologically Sensitive Areas on the City of Toronto's Archaeological Management Plan and require mitigation or in-situ preservation prior to any soil disturbance. Additionally, the property at 250 Front Street East has further archaeological conditions which require Stage 2 archaeological assessment after demolition of the building. Revise to include this information. | Both AjGu-61 and AjGu-64 refer to the same property 64-70 Parliament Street, the site has two borden numbers. The EWR will be updated to include reference to both numbers. Additional archaeological investigations at the First Parliament site are being planned, and all required archaeological assessments will be undertaken as part of the early works in accordance with the Ontario Heritage Act, the 2011 Standards and Guidelines for Consultant Archaeologists (Ontario Government, 2011) and in accordance with the recommendations of previously completed archaeological assessment reports and in advance of any ground disturbance. | 1                                                                                                                         |  |

| 3                           | Heritage Planning - Archaeology | Vibrational impacts - Archaeology | EWR/HDDR - Table ES-2;<br>EWR - Table 6-7, Section 5.8; Section 6.8                | This report does not address any vibrational impacts to known or potential archaeological resources as part of Early Works. In particular, the First Parliament Site (AjGu-41) is known to contain extremely fragile archaeological resources, such as the burnt floorboards and soil from the First Parliament buildings. These may be adversely impacted as part of this work. Include discussion of this issue with the statement that archaeological resources may be impacted by vibration within 11.1 metres of the Early Works area, unless fully mitigated.                                                 | Required archaeological investigations and completion of early works activities such as building foundation removal or activities that have the potential for vibration effects will be coordinated and completed such that buried archaeological resources are appropriately considered.                                                                                                                                                                                                                                                                                                                                                             | 1                                                                                                                         |  |
| 4                           | Heritage Planning - Archaeology | Archaeological Impacts            | EWR/HDDR - Table ES-2; Archaeological Resources;<br>EWR - Section 5.8; Section 6.8 | This description of Archaeological Resources shall also include a description of the Toronto Lime Kilns Works Site (AjGu-61/AjGu-64) as well as outstanding archaeological conditions for the property at 250-260 Front Street East, 39 Berkeley Street and 383 King Street East.                                                                                                                                                                                                                                                                                                                                   | See response to comment #1 above regarding the Borden numbers. The Early Works Report will be revised to include both Borden numbers for the Lime Kiln Works Site. Regarding the inclusion of addresses, the Early Works Report was intentionally high level to avoid pinpointing specific locations of archaeological sites, as per standard practice to minimize potential for looting.                                                                                                                                                                                                                                                             | 1, 3                                                                                                                      |  |

|   |                                 |                        |                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |   |

| 5 | Heritage Planning - Archaeology | Archaeological Impacts | EWR/HDDR - Table ES-2; Archaeological Resources;<br><br>EWR - Section 5.8; Section 6.8 | <p>Include language that any future archaeological assessments must be conducted in accordance to the City of Toronto's Official Plan and the Terms of Reference for Archaeological Assessments.</p> <p>Also include language that any archaeological assessments, including the formulation of Stage 3 and Stage 4 mitigation programs and Construction Monitoring programs shall be subject to review and approval by the City of Toronto Heritage Planning.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <p>The Stage 1 archaeological assessment report is written to meet the requirements set out in the Standards and Guidelines for Consultant Archaeologists (Ontario Government, 2011).</p> <p>Metrolinx has committed to working with the City to review workplans for any additional archaeological assessments for the First Parliament site and will continue to work with the City to address comments that may arise from review of these workplans.</p>                                                                                                       | 1 |
| 6 | Heritage Planning - Archaeology | Archaeological Impacts | EWR/HDDR Table ES-2 (EWR p. xxi-xxii)                                                  | <p>Under the description of "Direct Impacts to Built Heritage Resources and Cultural Heritage Landscapes" the table notes that there is the "Potential to remove or demolish deeply buried archaeological remains as a result of removal/Demolition of a building or structure on the property and/or any ground disturbance is anticipated at OLS-034 (First Parliament Site - 265 and 271 Front Street East and 25 Berkeley Street)."</p> <p>1. Revise to include the properties north of Front Street (250-260 Front Street East, 383 King Street East, 68-70 Parliament Street).</p> <p>2. Include in Mitigation Measures that the work shall be subject to review and approval from City of Toronto Heritage Planning as well as ongoing consultation with the City of Toronto and other stakeholders and Indigenous Communities.</p> <p>3. Revise to include that archaeological assessment must also be conducted within any appropriate structures prior to demolition. The properties at 265-271 Front Street East are built on grade and previous archaeological assessments have recommended further work <u>inside</u> these structures.</p> | <p>1. See #4 above.</p> <p>2. MHSTCI Minister's Consent has been obtained, which includes commitments for consultation with the City of Toronto and Indigenous communities for the preparation of the Interpretation and Commemoration Plan.</p> <p>3. Metrolinx has committed to working with the City to develop workplans for the next stages of archaeological work on this site and as such, specific comments as to where the archaeological assessments will be occurring (i.e. at 265-271 Front Street East) will be carried forth to these workplans.</p> | 1 |
| 7 | Heritage Planning - Archaeology | Municipal Permits      | EWR p. xxvii<br>HDDR - Section ES.5                                                    | Under the Municipal Permits section, include that these works may be subject to Heritage Easement agreements, as required.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | As documented in the Ontario Line CHR, there are no heritage easements within the Project Footprint.                                                                                                                                                                                                                                                                                                                                                                                                                                                               | 3 |
| 8 | Heritage Planning - Archaeology | Municipal Permits      | EWR p. xxvii<br>HDDR - Section ES.5                                                    | Under the Municipal Permits section, revise to include the properties at 54 Parliament Street, 68-70 Parliament Street and 250-260 Front Street East, 39 Berkeley Street and 383 King Street East.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | A commitment will be added to Section 7.4 of the Early Works Report for consultation between Metrolinx and the City of Toronto Heritage Planning regarding the Lime Kiln Works Site.                                                                                                                                                                                                                                                                                                                                                                               | 1 |

|    |                                 |                          |                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |   |

| 9  | Heritage Planning - Archaeology | Archaeological reports   | EWR - Section 4.8.1, p. 40 | <p>This report references the Stage 1 Archaeological Assessment of the Ontario Line South, dated July 24, 2020. The City have only received an earlier version of this report (May 29, 2020). We request that this report be provided to Heritage Planning as well as the concurrence letter from the MHSTCI stating that this report is compliant with the Standards and Guidelines for Consultant Archaeologists and has been entered into the Public Register.</p>                                                          | <p>Metrolinx had circulated the Ontario Line South Stage 1 Archaeology Report on June 4, 2020 to the City based on the May 29, 2020 draft submitted to the Ministry (which is why the City only has the May 29, 2020 draft on file). This version was the same version submitted to the MHSTCI. We had received an approval letter (attached with this comment response) from the Ministry that this report was entered into the register on July 24, 2020, hence the July 24, 2020 reference in our Corktown Station Early Works Report.</p> <p>The July 2020 Stage 1 AA report can be found on our Mx Engage website for the City's reference.</p>                                                                                                                                                                                                                                                                                                                            | 1 |
| 10 | Heritage Planning - Archaeology | Archaeological reports   | EWR - Section. 5.8, p. 123 | <p>The City of Toronto notes that the Stage 1 Archaeological Assessment Report (AECOM 2020) is missing reference to the Stage 1 Archaeological Assessment of 250-260 Front Street East and 383 King Street East. (Archeoworks 2017 - P029-0961-2017). Include this report in this section and acknowledge outstanding archaeological concerns.</p>                                                                                                                                                                             | <p>The Ontario Line Stage 1 Archaeological Assessment was conducted using reports available in the MHSTCI database. however, it should be noted that the MHSTCI does not maintain a database of all properties that have had past archaeological investigations and searches of the MHSTCI public register do not always result in a complete listing of all archaeological work conducted in a given area. A request to the City of Toronto to provide any reports within the study area was made in the early stages of the project, and no additional reports were sent at the time of the Stage 1 report preparation.</p> <p>As planning progresses, further research will be done on a property specific basis. The Stage 1 Archaeological Assessment of 250-260 Front Street East and 383 King Street East. (Archeoworks 2017 - P029-0961-2017) will be reviewed as part of the archaeological assessment in the Ontario Line Environmental Impact Assessment Report.</p> | 3 |
| 11 | Heritage Planning - Archaeology | Archaeological Resources | EWR - Table 6-7, p. 165    | <p>In Table 2-1 of the Ontario Line Corktown Station Early Works – Heritage Detailed Design Report, several other activities are identified as part of the Early Works which could impact the archaeological resources at OLS-034 beyond building demolition. This includes site preparation, staging, re-grading, tree removal, removal of contaminated soil, utilities decommissioning, and erection of fences. These issues need to be addressed as it relates to the impacts to archaeological resources on this site.</p> | <p>The activities listed in Table 2-1 of the Heritage Detail Design Report and the Early Works report are the same. The archaeology sections of the Early Works Report address all equipment/activities listed in Table 3-1 of the Early Works Report, not just demolition</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | 1 |

|    |                                 |                          |                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |   |

| 12 | Heritage Planning - Archaeology | Archaeological Resources | EWR - Table 6-7, p. 165 | Under Potential Impact, it is noted that Options 2A and 2B from the Ontario Line Cultural Heritage Report (AECOM 2020) were reviewed and eliminated. Heritage Planning requests further information about why options 2A and 2B were eliminated during project design. These options gave preference to avoidance and protection of heritage attributes, which is also the preference of Heritage Planning.                                     | Based on the design and use of the First Parliament Site for the Ontario Line project, Options 2A (Encroachment) and 2B (Introduction of New Elements) were eliminated as neither are feasible based on the scope of work planned for the First Parliament Site. Demolition and removal of all structures on the properties as well as asphalt and soil removal where required, was determined to be the only option. Alternative sites were considered but ultimately ruled out for the launch of the tunnel boring machines, as described in Section 1.3.3 of the Early Works Report. | 1 |
| 13 | Heritage Planning - Archaeology | Archaeological Resources | EWR - Table 6-7, p. 165 | Under Mitigation Measures, revise to include consultation with Heritage Planning and other stakeholders as to the appropriate approach to archaeological assessment in advance of Early Works                                                                                                                                                                                                                                                   | Consultation with the City of Toronto's Heritage Planning is included in Table 6-7 under the Heritage section of the Early Works report for the First Parliament Site and is also a commitment of the Minister's Consent. A commitment will be added to Table 6-8 to include consultation with the City of Toronto Heritage Planning regarding archaeological assessments specific to the First Parliament Site and the Lime Kiln Works Site.                                                                                                                                           | 1 |
| 14 | Heritage Planning - Archaeology | Archaeological Resources | Section 6.8; Table 6-8  | Revise this section and table to include preservation in-situ of significant archaeological resources as a potential mitigation measure. This is the preference of Heritage Planning and the Ministry of Heritage, Sport, Tourism and Culture Industries, as outlined in the City of Toronto's Official Plan and the Standards and Guidelines for Consultant Archaeologists.                                                                    | As agreed upon in discussions between the City and Metrolinx, Metrolinx will endeavour to preserve in-situ arch resources associated with First Parliament and Home District Gaol where feasible. Metrolinx has also worked with the Ministry of Heritage, Sport, Tourism, and Cultural Industries to obtain Minister's Consent which provides conditions which Metrolinx is committed to following. Metrolinx will continue to consult and engage with the City to ensure the City's comments are addressed with regards to ongoing archaeological work at the First Parliament site.  | 1 |
| 15 | Heritage Planning - Archaeology | Archaeological Resources | Section 6.8; Table 6-8  | This section shall also include a description of the Toronto Lime Kilns Works Site (AJGu-61/AJGu-64) and ongoing archaeological conditions on the properties north of Front Street East (see earlier comment).                                                                                                                                                                                                                                  | Please see response #1 above. All archaeological mitigation will take place prior to ground disturbing activities in accordance with the Ontario Heritage Act.                                                                                                                                                                                                                                                                                                                                                                                                                          | 1 |
| 16 | Heritage Planning - Archaeology | Archaeological Resources | EWR - Table 6-8, p. 173 | Include references to the City of Toronto's Official Plan and the Terms of Reference for Archaeological Assessments as relevant policy in addition to the Standards and Guidelines.<br><br>Include a statement that any archaeological assessments, including the formulation of Stage 3 and Stage 4 mitigation programs and Construction Monitoring programs shall be subject to review and approval by the City of Toronto Heritage Planning. | Please refer to response #5.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 1 |

|    |                   |                                    |                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |   |
|----|-------------------|------------------------------------|-----------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---|
| 17 | Heritage Planning | HDDR Report                        | HDDR Report, general                                      | Provide additional detail on cultural heritage resources impacted as per the standard scope and methodology of CHER/HIA reports completed during EA processes. If we understand correctly, the Heritage Detailed Design Report (HDDR) document is intended to replace the individual Cultural Heritage Evaluation Reports (CHER) and Heritage Impact Assessments (HIAs) that would typically be completed for each cultural heritage resource that may be impacted: as such the level of detail provided in the document is insufficient to determine the cultural heritage value of these identified resources, and to understand the potential impacts. | Refer to the Ontario Line Cultural Heritage Report (CHR) completed under O. Reg. 341/20. Methodology for CHR was developed through consultation with MHSTCI. The CHR provides sufficient information about and provides a description of a property's Cultural Heritage Value or Interest (See Section 2 for methodology). Given the sufficient level of information in the CHR, it was not necessary to recommend individual CHERs. Furthermore, in consultation with MHSTCI, the preliminary impact assessment provides sufficient discussion of potential impacts to inform project planning and to avoid, to the greatest extent possible, the undertaking of HIAs. Therefore, the purpose of the Heritage Detail Design Report, as described in Section 1.1.1, is to identify any changes in impacts from the CHR, refine the impacts proposed in the CHR, and identify any new project-specific impacts that were not described in the CHR. | 3 |
| 18 | Heritage Planning | HDDR Report and Early Works Report | HDDR Report, Table ES-2 and Early Works Report, Table 6-7 | The HDDR and Early Works Reports both identify the property at "2 Berkeley Street, 248, 250, 252, 25, 258, 260, 262, 264 The Esplanade" as a built heritage resource that is Designated under Part IV and V of the Ontario Heritage Act and covered by a Heritage Easement Agreement (HEA) within the study area. This resource is missing from the Impact and Description Tables in both the HDDR Report (Table ES-2) and Early Works Report (Table 6-7) and must be included to evaluate potential impacts and mitigation measures.                                                                                                                     | This resource, referred to as OLS-36, will be added to the impact table in both the Heritage Detail Design Report and the Early Works Report.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | 1 |
| 19 | Heritage Planning | HDDR Report and Early Works Report | HDDR Report, Table 3-1 and Early Works Report, Table 5-13 | The bullet-point information provided in the tables with Description of Known or Potential Cultural Heritage Value or Interest and Heritage Attributes provided in both the HDDR (Table 3-1) and Early Works Report (Table 5-13) do not provide an adequate evaluation of the properties under Ontario Regulations 9/06 or 10/6 as required of a CHER (for which, along with an HIA, the HDDR is said to serve in their place), nor does it cite sources for any of the research in these descriptions.                                                                                                                                                   | Please see response in Item #17                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | 3 |
| 20 | Heritage Planning | HDDR Report and Early Works Report | HDDR Report, Table 3-1 and Early Works Report, Table 5-14 | Three built heritage resources were determined to potentially meet Ontario Regulation 10/06 criteria: however, their evaluation using the 10/06 criteria is not documented for any of the resources within these Reports.                                                                                                                                                                                                                                                                                                                                                                                                                                 | See response in Item #17. In addition, Section 2 of the Ontario Line Cultural Heritage Report states that the CHR provides sufficient information to demonstrate and identify the built heritage resources and cultural heritage landscapes that meet or have potential to meet O. Reg. 10/06. Methodology for the CHR was developed in consultation with MHSTCI.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | 3 |
| 21 | City Planning     | Early Works Report                 | EWR, Section 5.6.2.2                                      | Clarify how it was determined that "there are no planned community services or facilities" in the Corktown Station area. We note that the First Parliament site, for example, includes plans for a new district library and heritage interpretation centre (contact: SoMei Quan, CreateTO). We further note that improvements to parks and recreation facilities include the reconstruction of David Crombie Park along The Esplanade (contact: Nancy Chater, Parks Forestry & Recreation). The data sources used to populate this section of the EWR appear to be insufficient to capture planned community services and facilities.                     | Section 5.6.2.2 will be updated to include these planned community services. Applicable Environmental Assessments and Planning studies are included in Section 2.2.3, which include the First Parliament Project and the David Crombie Park Revitalization. Metrolinx will continue to work with the City of Toronto as we advance plans for Corktown Station and the First Parliament Site.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | 1 |

|    |               |                    |                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                     |   |
|----|---------------|--------------------|------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---|
| 22 | City Planning | Early Works Report | EWR, Table 5-19  | Update service headways for transit routes to reflect the planned service provision. The 504 King streetcar, for example, operates at 2-3 minute headways during peak hours. The source for this data should be the TTC service summaries before Covid-19, which can be requested from the TTC.                                                                                                                                                                                                                                                                                                                                                                          | The headways were revised to reflect the service headways from between May and June 2019.                                                                                                                                                                                                                           | 1 |
| 23 | City Planning | Early Works Report | EWR, Figure 5-20 | Include planned cycling facilities that will be in place when construction on the Ontario Line is anticipated to begin. For example, a cycle track is planned for the Esplanade and Mill Street, which will be constructed in 2021 and 2022. Transportation Services (Adam Popper) and Engineering & Construction Services (Owen McGaughey) should be consulted to provide additional information on the implementation of this facility.                                                                                                                                                                                                                                | This section is meant to address the existing transportation network. The planned facilities will be added to Section 5.6.2.2 of the Early Works Report, Planned Services and Facilities. Metrolinx will continue to consult with the City of Toronto on the Esplanade and Mill Street bikeway.                     | 1 |
| 24 | City Planning | Early Works Report | EWR, Table 6-6   | Regarding land uses and adjacent lands, confirm whether there are potential impacts to adjacent land development projects, or impacts to the early works from development on adjacent lands. We note, for example, that a data centre with zoning approval may be constructed at 43 Parliament Street, which may involve work zone lane closures. Other development applications that may be under construction during the Corktown early works is documented in Section 5.6.4. Coordination is required with Transportation Services to understand the full extent of planned and approved lane closures.                                                               | Noted. A commitment is made in the Traffic and Transportation section of the Early Works Report to coordinate with the City of Toronto regarding other ongoing construction projects when scheduling the early works activities to maintain the mobility of all road users.                                         | 1 |
| 25 | City Planning | Early Works Report | EWR, Table 6-6   | Regarding visual effects from construction activities, provide additional detail about screened enclosures (such as hoarding) that Metrolinx is committed to using at construction sites. Improvements to screening should be included compared to the fencing that was provided on the ECLRT, which did little to mitigate the visual impacts of construction. With regard to private development projects (e.g. condominium or office tower construction), the City has achieved higher standards for the quality of hoarding provided at these sites. Lessons learned from projects like ECLRT should be applied to the Ontario Line to improve temporary conditions. | As Corktown Station early works planning is still in progress, details about screened enclosures such as hoarding and fencing are not yet available. These details will be included in early works activities project specifications and the lessons learned from the ECLRT project will be applied as appropriate. | 1 |
| 26 | City Planning | Early Works Report | EWR, Table 6-9   | For active transportation impacts, a Vision Zero perspective should be applied to protect vulnerable road users from injuries and fatalities during construction. Table 5-5 identified several pedestrian and cycling facilities that already provide low levels of service in the existing condition (without considering pedestrian and cyclist volumes, which the Ottawa MMLOS does not account for). Poor levels of service may be exacerbated with construction occurring immediately adjacent to the facility. Identify mitigation measures - e.g. provision of minimum sidewalk widths, minimum pedestrian levels of service.                                     | Table 6-9 will be revised to indicate that the necessary mitigation measures will be considered (e.g., maintaining a minimum sidewalk width) in order to maintain pre-construction pedestrian levels of service.                                                                                                    | 1 |
| 27 | City Planning | Early Works Report | EWR, Section 8.8 | Commitments to future consultation should include the City on matters (among other things) related to impacts on development and transportation within the area of the project's influence, and the detailed design of restoration of impacted areas to the current City standard. We note that government review agencies and technical stakeholders are included in the list of stakeholders consulted in Section 8.1.                                                                                                                                                                                                                                                 | The City of Toronto is listed under Engagement with Technical Stakeholders in Section 8.4. Commitments to engage the City on specific technical aspects of the Early Works are included in the discipline specific sections of the report.                                                                          | 1 |

|    |               |                                                         |                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |   |
|----|---------------|---------------------------------------------------------|-------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---|
| 28 | City Planning | Early Works Report, Traffic and Transportation Appendix | Traffic and Transportation EWR, Section 2.1.2.2 | <p>We note that the City of Ottawa's Multi-Modal Level of Service tool used in this analysis does not include pedestrian volumes in determining a pedestrian level of service, relying instead on qualitative characteristics of a pedestrian facility and its adjacency to other facilities. This may provide a misleading indicator of the quality of a pedestrian facility where pedestrian volumes are high, which is the case at times around the Corktown Station area especially during special events at the Distillery District.</p> | <p>To identify the impact of the early works on pedestrians, the assessment of the multi-modal level of service under existing conditions will serve as a baseline for comparison with the multi-modal levels of service under the early works (note that the multi-modal level of service assessment under early works will be assessed once the detailed construction staging schemes become available). When comparing both scenarios, the pedestrian volumes will be assumed to be the same but pedestrian facilities could be different due to adjustments (i.e., realignments, closures, etc.) to pedestrian facilities that might be required under early works. Accordingly, and given the comparative nature of the analysis, we believe the omission of the pedestrian volumes is not critical to this assessment. The EWR and Traffic Report include a commitment to monitor the effectiveness of the Transit and Traffic Management Plan(s) throughout the construction period and to make adjustments on actual field observations if required.</p> <p>Metrolinx is aware that there may be special events held in proximity to the Corktown Station Early Works, including the Distillery District, and does not want to compromise the pedestrian level of service during those events. Metrolinx will add a commitment to the Early Works Report and the Traffic Report to consult with the City of Toronto to minimize potential impacts during those events should closures or long-term impacts be required.</p> | 3 |

Watermain Replacement at Berkeley St, From: The Esplanade (WV1827) To: Scadding Ave in 2023</p> | Noted, Metrolinx will ensure Toronto Water's capital works are considered ahead of construction.                                                                                                                                                                    | 1 |
| 11 | TW WIM-TR | Utilities | Page 153            | If groundwater would be discharged to municipal sewer system, the water quality test results and downstream sewer capacity analysis and hydraulic grade line analysis will be included in the permit application and submitted to TW-EMP.                                                                                                                                                                                                                                                                                            | Noted, a measure to conduct regular groundwater quality testing of discharge water if dewatering is required has been added to Table 6-2 of the Early Works Report.                                                                                                 | 1 |
| 12 | TW WIM-TR | Utilities | Page 155, Table 6-3 | For Stormwater management, water balance, water quality and quantity targets according to the City's WWFM Guidelines shall be met during site design.                                                                                                                                                                                                                                                                                                                                                                                | Comment noted. As Corktown Station early works will be mainly limited to disconnection of the feeding utilities and demolition of existing structures, impacts to the stormwater management, water balance, water quality and quantity targets are not anticipated. | 1 |
| 13 | TW WIM-TR | Utilities | Page 180            | Design Criteria for Sewer and Watermain and WWFMG are two major documents to be used for TW asset design and construction.                                                                                                                                                                                                                                                                                                                                                                                                           | Comment noted. No deep excavation or utilities work are anticipated for this project and as a result, it is not anticipated that the Design Criteria for Sewer and Watermain and the WWFMG will apply to this project.                                              | 1 |

"</p> <p>Please note that as per TS-20 data request, most recent available data was provided.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | These revisions will be included in updated versions of the report.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | 1        |
| 2                           | Transit Infrastructure Projects/Transportation Services | A5_2021-03-10_OL_EW3_CS_Traffic_60611173_DRAFT | Pages 9 & 28.                                                                                            | <p>"The Ontario Line Final Environmental Conditions Report (AECOM, 2020) notes that turning movement counts and signal timing plans were not available at some intersections within the Ontario Line Study Area, and were not collected through new traffic surveys considering the uncharacteristic traffic conditions as a result of the COVID-19 pandemic. As a result of the noted data limitations, a quantitative traffic assessment of some intersections within the Corktown Station Study Area could not be undertaken."</p> <p>- All signalized intersections should be assessed and analysis should be included in this report.<br/>           - TMC data can be retrieved from Traffic Impact Assessment Reports of Active Development Applications.<br/>           - Traffic Impact Study of 333 King Street East and 250 Front Street East includes TMCs of the following signalized intersections.<br/>           - King/Parliament.<br/>           - King St &amp; Sherbourne St<br/>           - Front/Sherbourne<br/>           - Front &amp; Princess.<br/>           - Front &amp; Berkeley.<br/>           These are the intersections within Corktown station study area.</p> <p>- Active Development Applications are mentioned in section 4.0 of "The Ontario Line Final Environmental Conditions Report (AECOM, 2020)".</p> | <p>Intersections with historical Turning Moving Count (TMC) data were assessed using a conservative annual growth rate of 1%. The intersections that were not assessed are those where no traffic data was provided.</p> <p>A quantitative traffic impact assessment will be completed, as required, as project planning progresses to consider vehicular traffic impacts as a result of the Corktown Station Early Works, and develop and implement a Transit and Traffic Management Plan(s), which could include temporary changes to intersection lane configurations, traffic signal timing optimization, modifications to existing signal timing plans, etc. The Transit and Traffic Management Plan(s) will also address specific emergency services requirements in consultation with the City of Toronto.</p> | 1        |
| 3                           | Transit Infrastructure Projects/Transportation Services | A5_2021-03-10_OL_EW3_CS_Traffic_60611173_DRAFT | 2.1.2.1 Automobile Level of Service, Page 28                                                             | <p>Please specify why the Intersection capacity analysis wasn't done using the most recent version of the Highway Capacity Manual (HCM 6th) as per instructions in the City of Toronto "Guidelines for the Preparation of Transportation Impact Studies" for utilizing the most recent version of HCM.</p> <p>The results from a more recent HCM version is considered to be more reliable.</p> <p>Only those intersections where the configurations are not supported by HCM 6th/2010, the HCM 2000 based results should be used following the instructions from City of Toronto's "Guidelines for Using Synchro 9 (Including SimTraffic 9)". The Guideline mentions using HCM 2000 for the intersections where there are specific limitations to HCM2010 (HCM 6th has the same limitation).</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | The majority of the intersections have a configuration that is not supported by HCM 2010. In addition, HCM 2010 does not support speed limits less than or equal to 40 km/h which is the case along the majority of the roads within the Corktown Station Study Area. Hence, for consistency purposes, HCM 2000 was selected as the version of choice.                                                                                                                                                                                                                                                                                                                                                                                                                                                                | 3        |

|   |                                                         |                                                |                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |   |

| 5 | Transit Infrastructure Projects/Transportation Services | A5_2021-03-10_OL_EW3_CS_Traffic_60611173_DRAFT | Table 2-1: Key Determining Factors for Pedestrian Level of Service, Page 30       | <p><i>"Right- and left-turn conflicts .....and exclusive pedestrian phases"</i></p> <p>- Edit to: "Right- and left-turn conflicts .....and exclusive pedestrian phases (leading pedestrian interval)"</p> <p>- TS recommends to model all LPI intersections within Corktown site.</p> <p>- Please also ensure that LPI element should be considered for those intersections in finding Pedestrian LOS.</p> <p>For example leading pedestrian interval is installed at the Intersection of King St &amp; Sherbourne St (TCS254)</p>            | <p>Noted, the edit will be made in the revised report.</p> <p>Among the intersections where traffic data was provided, only the intersection of Parliament Street and Mill Street has LPI and it was modeled accordingly. The LPI element is considered when assessing PLOS at the intersection of Parliament Street and Mill Street. Traffic data at the intersection of King Street and Sherbourne Street was missing.</p> <p>A quantitative traffic impact assessment will be completed, as required, as project planning progresses to consider vehicular traffic impacts as a result of the Corktown Station Early Works, and develop and implement a Transit and Traffic Management Plan(s), which could include temporary changes to intersection lane configurations, traffic signal timing optimization, modifications to existing signal timing plans, etc. The Transit and Traffic Management Plan(s) will also address specific emergency services requirements in consultation with the City of Toronto.</p> | 1 |
| 6 | Transit Infrastructure Projects/Transportation Services | A5_2021-03-10_OL_EW3_CS_Traffic_60611173_DRAFT | Table 2-3: Key Determining Factors for Transit Level of Service, Page 33          | <p><i>"Ratio of average transit speed to posted speed"</i></p> <p>- Specify what is the source of getting average transit speed.</p>                                                                                                                                                                                                                                                                                                                                                                                                          | The average transit speed was assumed equal to or greater than 80% of the respective road's posted speed. This quantitative measure was linked to the qualitative measure of having limited parking/driveway friction, as per Exhibit 15 of the City of Ottawa's Multi-Modal Level of Service Guidelines.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | 1 |
| 7 | Transit Infrastructure Projects/Transportation Services | A5_2021-03-10_OL_EW3_CS_Traffic_60611173_DRAFT | 3.1.1.1 Road Network, Page 35                                                     | <p>- Eastern Avenue is a minor east-west arterial road.</p> <p>- As Part of Vision Zero Speed Management Strategy, Front St btwn Parliament and Cherry is 30km/h. (January 8, 2020)</p> <p>Please confirm what speed limit was considered in Level of service assessment?</p> <p>- Posted speed is 40 km/h on the section of Parliament btwn Queen and Gerrard.</p> <p>Please specify the speed limit of the section of Parliament St as shown in Figure 3-1.</p> <p>Please confirm what speed limit was considered for the LOS analysis?</p> | <p>Noted, the classification of Eastern Avenue will be updated in the revised report.</p> <p>Noted, the posted speed of Front Street will be updated in the revised report. As shown in Appendix F, the range between 30 and 50 km/h was selected as the operating speed in the level of service assessment for Front Street.</p> <p>As shown in Appendix F, the range between 30 and 50 km/h was selected as the operating speed in the level of service assessment for Parliament Street.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | 1 |
| 8 | Transit Infrastructure Projects/Transportation Services | A5_2021-03-10_OL_EW3_CS_Traffic_60611173_DRAFT | Figure 3-1: Existing Road Network Within the Corktown Station Study Area, Page 37 | <p>Please clarify why the following signalized intersection are not labelled in this figure.</p> <ul style="list-style-type: none"> <li>- King/Parliament-TCS 245.</li> <li>- King/Sherbourne-TCS254.</li> <li>- Front/Sherbourne TCS253.</li> <li>- Front/Berkeley-TCS1968.</li> <li>- Front/Princess-TCS 1967.</li> </ul> <p>Timing cards of these intersections have already been provided.</p>                                                                                                                                            | All intersections will be labelled in the revised figure. Timing cards have been provided but turning movement counts at the noted intersections were missing and hence they were not assessed.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | 1 |

The sheet titles will be revised to make the distinction clear.                                                                                                                                                                                           | 1    |
| 17 | Transit Infrastructure Projects/Transportation Services | A5_2021-03-10_OL_EW3_CS_Traffic_60611173_DRAFT | Appendix F, Front & Parliament, Page 129             | Leading pedestrian interval (LPI) is not installed at Front/Parliament (TCS244), please revise the point calculation and LOS                                                                                                                                                                                                              | Noted, Appendix F will be revised accordingly. It should be noted that PLOS will remain the same.                                                                                                                                                                                                                                                                                                                     | 1    |
| 18 | Transit Infrastructure Projects/Transportation Services | A5_2021-03-10_OL_EW3_CS_Traffic_60611173_DRAFT | Appendix F, Mill & Parliament, Page 129              | Leading pedestrian interval (LPI) is installed at Mill/Parliament (TCS1894). Please ensure that LPI element is considered for the intersection in finding Pedestrian LOS.                                                                                                                                                                 | Noted, Appendix F and PLOS results will be revised accordingly.                                                                                                                                                                                                                                                                                                                                                       | 1    |
| 19 | Transit Infrastructure Projects/Transportation Services | A5_2021-03-10_OL_EW3_CS_Traffic_60611173_DRAFT | Appendix F, Pages 128 & 129                          | Please include a row for refuge island element in Multi-Modal Level of Service - Intersections Forms, as points are assigned to that element of intersection (see Exhibit 5- PETS point tables from City of Ottawa's MMLOS Guidelines). However, the points for refuge island was considered in calculating PLOS score for intersections. | As per the addendum to the City of Ottawa's MMLOS Guidelines, points assigned for "Island Refuge" were deleted and combined with the Table 5.3b "Right Turn Channel". Exhibit 5 will be added to Appendix C.                                                                                                                                                                                                          | 1, 3 |
| 20 | Transit Infrastructure Projects/Transportation Services | A5_2021-03-10_OL_EW3_CS_Traffic_60611173_DRAFT | Appendix F, Page 128, King/Berkeley                  | As per Google image, eastbound and westbound left turning cyclists need to cross one lane. Please confirm and revise the appendix page.                                                                                                                                                                                                   | A distinction was made between "changing lanes" and "crossing lanes". Cyclists travelling on the curb lanes of King Street would have to change lanes to get to the median lane and complete a left-turn movement at the intersection of King Street and Berkeley Street. At intersection with an auxiliary left-turn lane, cyclists were considered to "cross" the median through lane to get to the left-turn lane. | 3    |
| 21 | Transit Infrastructure Projects/Transportation Services | A5_2021-03-10_OL_EW3_CS_Traffic_60611173_DRAFT | Appendix F, Cherry & Front, Page 129                 | The south leg of Cherry has pocket bike lane. As per MMLOS Ottawa Guidelines (exhibit 12), pocket bike lanes are defined as bike lanes that develop near intersections between vehicular right turn lanes on the right side and vehicular through or left lane on the left side. Please confirm and advise the BLOS of south leg?         | Noted, "pocket bike lane" will be used instead of "curb bike lane". BLOS would remain unchanged.                                                                                                                                                                                                                                                                                                                      | 1    |
| 22 | Transit Infrastructure Projects/Transportation Services | A5_2021-03-10_OL_EW3_CS_Traffic_60611173_DRAFT | Appendix F, The Esplanade/Lower Sherbourne, Page 129 | As per Google image, northbound and southbound left turning cyclists need to cross two lanes. Please confirm and revise the appendix page.                                                                                                                                                                                                | Cyclists were assumed to use the crossrides across the east and west legs and then cross using the crosswalks to complete the left turn movement. That's the reason no lanes would be crossed at the approach to the intersection.                                                                                                                                                                                    | 3    |
| 23 | Transit Infrastructure Projects/Transportation Services | A5_2021-03-10_OL_EW3_CS_Traffic_60611173_DRAFT | Appendix F, Lower Sherbourne/Lake Shore, Page 129    | As per Exhibit 12 of MMLOS Ottawa Guidelines, for the speed limit $\geq 60$ km/h with no lane crossed, BLOS of east/west legs are "D" in mixed traffic. Please confirm and revise the appendix page.                                                                                                                                      | Noted. No change was required to overall BLOS as the intersection of Lake Shore Boulevard and Lower Sherbourne Street as overall BLOS is D. Appendix F will be revised to update the BLOS.                                                                                                                                                                                                                            | 1    |
| 24 | Transit Infrastructure Projects/Transportation Services | A5_2021-03-10_OL_EW3_CS_Traffic_60611173_DRAFT | Appendix F, Multi-Modal Level of Service             | As per TS comments provided for BLOS, please revise the Tables 3-4, 3-5 and Figure 3-5 on pages 48, 49 & 50 respectively.                                                                                                                                                                                                                 | Noted. No changes are required to Table 3-4, 3-5 and Figure 3-5 will be updated accordingly.                                                                                                                                                                                                                                                                                                                          | 1    |

|    |                                                         |                                                |                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |   |

| 25 | Transit Infrastructure Projects/Transportation Services | A5_2021-03-10_OL_EW3_CS_Traffic_60611173_DRAFT | Appendix F                                                           | All signalized intersections within the site should be assessed for PLOS, BLOS & TLOS. Analysis should be included in this appendix.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | <p>All signalized intersections where traffic data was received from the City were assessed for PLOS, BLOS, and TLOS.</p> <p>A quantitative traffic impact assessment will be completed, as required, as project planning progresses to consider vehicular traffic impacts as a result of the Corktown Station Early Works, and develop and implement a Transit and Traffic Management Plan(s), which could include temporary changes to intersection lane configurations, traffic signal timing optimization, modifications to existing signal timing plans, etc. The Transit and Traffic Management Plan(s) will also address specific emergency services requirements in consultation with the City of Toronto.</p>                                                                          | 1 |
| 26 | Transit Infrastructure Projects/Transportation Services | A5_2021-03-10_OL_EW3_CS_Traffic_60611173_DRAFT | Appendix F, Pages 132-141                                            | Specify what is crowding Pedestrian LOS, how it was calculated and what is the source of this criteria. Crowding PLOS is shown in this Appendix for segment analysis. Please also clarify how the number of pedestrians were obtained for this analysis. This description should be included in section 2.1.2.2 - Pedestrian Level of Service and criteria should be included in Appendix C                                                                                                                                                                                                                                                                                                                                                                      | Crowding PLOS was disregarded in the assessment of pedestrian level of service due to the absence of accurate pedestrian volumes along the midblock segments.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | 3 |
| 27 | Transit Infrastructure Projects/Transportation Services | A5_2021-03-10_OL_EW3_CS_Traffic_60611173_DRAFT | Segment Form, BLOS, Cherry St, btwn LakeShore and Adelaide, Page 141 | Please indicate what (bike lane+parking lane) width was considered for finding BLOS. Clarify how the bike lane+parking lane width >= 1.8m is justifying BLOS "A" for this segment, however bike lane is adjacent to parking lane (see Appendix C Exhibit 11)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | The type of facility considered in the assessment was "curbside bike lane" as it is a better representation of the bike lanes along Cherry Street than "bike lanes adjacent to curbside parking lane". The width used is basically the estimated width of the bike lane.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | 1 |
| 28 | Transit Infrastructure Projects/Transportation Services | A5_2021-03-10_OL_EW3_CS_Traffic_60611173_DRAFT | General                                                              | Why MX did not consider assessing Truck level of service along truck routes, arterial roads and key delivery access routes within Corktown Site, as per City of Ottawa's Multi- Modal Level of Service Guidelines ?                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | The assessment of trucks level of service was not included as it is not a typical requirement in such studies where the focus is on impacts to general traffic, active transportation users, and transit. Given that truck percentages were input into the Synchro models, then the findings of the traffic operations assessment can be considered a good representation of the actual operations experienced by the existing vehicle mix (including trucks) within the Corktown Station Study Area.                                                                                                                                                                                                                                                                                           | 3 |
| 29 | Transit Infrastructure Projects/Transportation Services | A5_2021-03-10_OL_EW3_CS_Traffic_60611173_DRAFT | Executive Summary- Page 9 of 141                                     | <p>"The Ontario Line Final Environmental Conditions Report (AECOM, 2020) notes that turning movement counts and signal timing plans were not available at some intersections within the Ontario Line Study Area, and were not collected through new traffic surveys considering the uncharacteristic traffic conditions as a result of the COVID-19 pandemic. As a result of the noted data limitations, a quantitative traffic assessment of some intersections within the Corktown Station Study Area could not be undertaken."</p> <p>If the most current data are not available, the traffic study can be undertaken using older traffic data( turning movement counts and signal timing plans) and do the related adjustments as per COVID19 condition.</p> | <p>Intersections with historical TMC data were assessed using a conservative annual growth rate of 1%. The intersections that were not assessed are those where no traffic data was available.</p> <p>A quantitative traffic impact assessment will be completed, as required, as project planning progresses to consider vehicular traffic impacts as a result of the Corktown Station Early Works, and develop and implement a Transit and Traffic Management Plan(s), which could include temporary changes to intersection lane configurations, traffic signal timing optimization, modifications to existing signal timing plans, etc. The Transit and Traffic Management Plan(s) will also address specific emergency services requirements in consultation with the City of Toronto.</p> | 1 |

|    |                                                         |                                                |                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                          |   |

| 30 | Transit Infrastructure Projects/Transportation Services | A5_2021-03-10_OL_EW3_CS_Traffic_60611173_DRAFT | Table 1-2: Anticipated Construction Activities for the Ontario Line Corktown Station Early Works- Page 26 of 141 | <p>"All road closures will follow standard traffic control management guidelines"</p> <p>Please confirm the duration of the road closures (if any) in the construction period. Which roads will be closed in this regard? Will be any full closure in the adjacent road network?</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | This level of detail is not yet known; full closures are not anticipated based on the nature of the Early Works scope.                                                                                                                                                                                                                                   | 1 |
| 31 | Transit Infrastructure Projects/Transportation Services | A5_2021-03-10_OL_EW3_CS_Traffic_60611173_DRAFT | 2.1.2 Multi-Modal Level of Service Assessment-Page 30 of 141                                                     | <p>"For any given approach to the intersection, the pedestrian green time / effective walk time was calculated as per the formula included in the Addendum to the City of Ottawa's Multi-Modal Level of Service Guidelines (2015) by conservatively assuming that no pedestrian is initiating their crossing during the Flashing Don't Walk time; "</p> <p>To confirm if the assumptions are in alignment with the City of Toronto "Traffic Signals Operations Policies and Strategies". The pdf version can be found at the following address:</p> <p>"<a href="https://www.toronto.ca/wp-content/uploads/2017/11/91d6-0_2015-11-13_Traffic-Signal-Operations-Policies-and-Strategies_Final-a.pdf">https://www.toronto.ca/wp-content/uploads/2017/11/91d6-0_2015-11-13_Traffic-Signal-Operations-Policies-and-Strategies_Final-a.pdf</a>"</p> | Although the City of Toronto "Traffic Signal Operations Policies and Strategies" does not provide an explicit definition of the pedestrian effective walk time, but the assumptions considered in the assessment are in line with the document in terms of the definition of the pedestrian phase intervals (e.g., walk time and flash don't walk time). | 1 |
| 32 | Transit Infrastructure Projects/Transportation Services | A5_2021-03-10_OL_EW3_CS_Traffic_60611173_DRAFT | 2.1.2 Multi-Modal Level of Service Assessment-Page 32 of 141                                                     | <p>"This indicates that the impact of transit signal priority measures is not factored into the assessment of Transit Level of Service at the intersection level."</p> <p>Considering the multimodal character of transportation in the Corktown area, it doesn't seem that using Synchro and Ottawa Multi-Modal Guideline would be the preferred option to cover all different aspects of the traffic impacts of the construction in this area. The preferred method here is using microsimulation software to include all impacts correctly and modeling the network as per the real condition.</p>                                                                                                                                                                                                                                          | The adopted methodology is a typical best practice for Environmental Assessment Studies. As design progresses and in the event that partial/full road closures would be required during Early Works, then the assessment will be expanded to include results from a microsimulation tool.                                                                | 3 |
| 33 | Transit Infrastructure Projects/Transportation Services | A5_2021-03-10_OL_EW3_CS_Traffic_60611173_DRAFT | Figure 3-5: Cyclist Level of Service Within the Corktown Station Study Area- Page 50 of 141                      | <p>The use of a 8-10 meters of the parking lot just north of Parliament Square Park is required to facilitate a bi-directional bikeway connection between Esplanade and Mill (between Berkeley and Parliament). More information regarding this comment has been provided in the previous packages related to Cork town station.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | The planned facilities will be added to Section 5.6.2.2 of the Early Works Report, Planned Services and Facilities. Metrolinx will continue consultation and coordination with the City in regards to the bikeway connection implementation.                                                                                                             | 1 |

The schedule has been revised and currently Segment 6 is from Cherry to Don Roadway from 2026 to 2029. Waterfront Toronto is completing the work from Don roadway to Logan in 2021 and 2022. Please ensure that the Gardiner Expressway Strategic Rehabilitation Plan segments and the respective construction timeline information is up to date prior to the issuance of the Report.</p> <p>2.2.3.2 Gardiner Expressway Strategic Rehabilitation Plan</p> <p>The City of Toronto developed the Gardiner Expressway Strategic Rehabilitation Plan to establish the immediate and long-term rehabilitation needs of the Gardiner Expressway, improve transportation corridors within the area, and provide more efficient public transit connections (City of Toronto, n.d.c). The rehabilitation is being completed in seven sections, two of which are within the Corktown Station Study Area:</p> <ul style="list-style-type: none"><li>■ Segment 1 between Jarvis Street and Cherry Street with a projected timeline of planned construction <b>between 2018 and 2021</b> (City of Toronto, n.d.c); and</li><li>■ Segment 6 between Lower Jarvis Street and east of the Don Valley Parkway at Logan Avenue with a projected timeline of planned construction <b>between 2024 and 2027</b> (City of Toronto, n.d.c).</li></ul> <p>The City of Toronto's website notes that the planned construction timelines are subject to change (City of Toronto, n.d.c).</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | <p>Thank you for providing the revised schedule information. The Early Works Report has been updated with the dates provided (2026-2029). Please note that the City of Toronto Gardiner Expressway Rehabilitation Strategy website currently states that the area east of Cherry Street, referred to as the Gardiner East EA, is scheduled from 2026 to 2030.</p>                                                                                               | 1           |                      |                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                          |                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                          |   |

| 1                           | Urban Forestry | Natural Environment early works report @ Corktown | general                                | As clearing and grubbing will be an anticipated construction activity for site preparation, when can UF expect an arborist report and tree inventory to be submitted for review? Please confirm if this scope of work will be included in a site specific report or systemwide report.                               | An Arborist report will be completed and submitted to the City of Toronto ahead of any tree removals. This will be a site-specific report.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | 1                                                                                                                         |  |
| 2                           | Urban Forestry | Natural Environment early works report            | 7.3                                    | Bylaws 813, article II & III should be specifically included in this section as a municipal permit since tree removal/injury may be required. Tree permits for bylaw protected trees must be obtained from UF beforehand.                                                                                            | MetroInx will continue to engage with the City of Toronto as project planning and design progress, including with regard to tree injury/removal permits as required.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 3                                                                                                                         |  |
| 3                           | Urban Forestry | Draft early works report                          | ES. 6 - Permits and approvals          | Bylaws 813, article II & III should be specifically included in this section as a municipal permit since tree removal/injury may be required. Tree permits for bylaw protected trees must be obtained from UF beforehand.                                                                                            | See response to Comment #2 above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 3                                                                                                                         |  |
| 4                           | PFR - PDCP LAU | Corktown Station Early Works Project Footprint    | General                                | PFR supports Transportation Services' ask for the Esplanade-Mill bikeway through the existing parking lot just north of Parliament Square Park within the Corktown Station EWP footprint to provide a separate space for people walking and cycling. The footprint should reflect the bikeway area provided by CREM. | Information on the Esplanade-Mill bikeway will be added to Section 5.6.2.2 of the Early Works Report, Planned Services and Facilities. MetroInx will continue to consult with the City of Toronto on the Esplanade and Mill Street bikeway.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | 1                                                                                                                         |  |

| 8  | PFR - PDCP LAU | Socio-Economic and Land Use Characteristics | First Parliament Master Plan    | PFR requests that this report references CreateTO's First Parliament master plan. A portion of these lands identify future public open space. Impact assessment should take this sensitive use into consideration.                                                                                                                                | Details on the First Parliament Project have been added to Section 2.2.3 of the Early Works Report.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | 1 |
| 9  | PFR - PDCP LAU | Socio-Economic and Land Use Characteristics | Parkland Strategy               | PFR requests that this report references the Parkland Strategy. This area is currently deficient in parkland and the report should highlight the importance of protecting existing parkland and protecting lands identified as future parkland.                                                                                                   | Details on the City of Toronto's Parkland Strategy have been added to Section 2.2.3 of the Early Works Report.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | 1 |
| 10 | PFR - PDCP LAU | Archaeological Resources                    | General                         | Are there any anticipated utility conflicts or relocation required as a result of tunneling work in Parliament Square Park? If so, PFR recommends archaeological assessments be undertaken as they would for First Parliament.                                                                                                                    | Early works are not anticipated to impact Parliament Square Park. Future tunnelling impacts will be covered in the forthcoming Ontario Line Environmental Impact Assessment Report.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | 3 |
| 11 | PFR - PDCP LAU | Archaeological Resources                    | General                         | Any objectives outlined in the First Parliament Working Group specifically related to archaeology must be reflected in this section.                                                                                                                                                                                                              | This report documents early works activities, and covers archaeological requirements for the Corktown Station early works. Next steps for archaeological work for the Corktown Station early works site. Metrolinx will continue to engage the City and has committed to have the City review workplans and scope for upcoming archaeological programs at this location.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | 1 |
| 12 | PFR - PDCP LAU | Traffic and Transportation                  | Transportation Services bikeway | Current TPA lands are planned for TS bikeway. PFR supports Transportation Services' ask for a bikeway through the existing parking lot just north of Parliament Square Park within the Corktown Station EWP footprint to provide a separate space for people walking and cycling. The footprint should reflect the bikeway area provided by CREM. | Information on the Esplanade-Mill bikeway will be added to Section 5.6.2.2 of the Early Works Report, Planned Services and Facilities. Metrolinx will continue to consult with the City of Toronto on the Esplanade and Mill Street bikeway.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | 1 |

|    |                |                            |                                                |                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                  |   |

---

Yes not a problem Julia – we can circle back and revise the MX action column.

Thanks,

**MERLIN YUEN**

Merlin,

Could you please provide confirmation of the proposed Mx action (see 1 / 2 / 3 list below) for each item?

---

**\* Actions:**

1 = Will comply

2 = Discuss, clarification required

3 = Not applicable because .....

---

This will greatly assist the City in verifying which of these items can be considered as closed, and which will require further discussion. Thank you!

Regards,

Julia Murnaghan

**Subject:** RE: Corktown Station Early Works Report

Good morning Julia – hope you had a great weekend.

Please see attached Metrolinx comment responses to the City's consolidated comments on the Corktown Station Early Works Report, dated April 14, 2021. Also to note, we've included the acceptance letter from the Ministry on the Ontario line South, as I believe one of the comment from City Planning inquired on whether the OLS Stage 1 was accepted into the Ministry's register.

Let us know if any additional questions, and we can address as necessary.

Thanks,

**MERLIN YUEN**

| 1                           | Heritage Planning - Archaeology | Archaeological Resources          | Early Works Report (EWR) - p. ix: Archaeological Resources                         | This revised property boundary includes three archaeological sites: The Parliament Site (AjGu-41), the Toronto Lime Kiln Works Site (AjGu-61), and the Lime Kiln Works Site (AjGu-64). Each of these sites are identified as Archaeologically Sensitive Areas on the City of Toronto's Archaeological Management Plan and require mitigation or in-situ preservation prior to any soil disturbance. Additionally, the property at 250 Front Street East has further archaeological conditions which require Stage 2 archaeological assessment after demolition of the building. Revise to include this information. | Both AjGu-61 and AjGu-64 refer to the same property 64-70 Parliament Street, the site has two borden numbers. The EWR will be updated to include reference to both numbers. Additional archaeological investigations at the First Parliament site are being planned, and all required archaeological assessments will be undertaken as part of the early works in accordance with the Ontario Heritage Act, the 2011 Standards and Guidelines for Consultant Archaeologists (Ontario Government, 2011) and in accordance with the recommendations of previously completed archaeological assessment reports and in advance of any ground disturbance. |

| 3                           | Heritage Planning - Archaeology | Vibrational impacts - Archaeology | EWR/HDDR - Table ES-2;<br>EWR - Table 6-7, Section 5.8; Section 6.8                | This report does not address any vibrational impacts to known or potential archaeological resources as part of Early Works. In particular, the First Parliament Site (AjGu-41) is known to contain extremely fragile archaeological resources, such as the burnt floorboards and soil from the First Parliament buildings. These may be adversely impacted as part of this work. Include discussion of this issue with the statement that archaeological resources may be impacted by vibration within 11.1 metres of the Early Works area, unless fully mitigated.                                                 | Required archaeological investigations and completion of early works activities such as building foundation removal or activities that have the potential for vibration effects will be coordinated and completed such that buried archaeological resources are appropriately considered.                                                                                                                                                                                                                                                                                                                                                             |
| 4                           | Heritage Planning - Archaeology | Archaeological Impacts            | EWR/HDDR - Table ES-2; Archaeological Resources;<br>EWR - Section 5.8; Section 6.8 | This description of Archaeological Resources shall also include a description of the Toronto Lime Kilns Works Site (AjGu-61/AjGu-64) as well as outstanding archaeological conditions for the property at 250-260 Front Street East, 39 Berkeley Street and 383 King Street East.                                                                                                                                                                                                                                                                                                                                   | See response to comment #1 above regarding the Borden numbers. The Early Works Report will be revised to include both Borden numbers for the Lime Kiln Works Site. Regarding the inclusion of addresses, the Early Works Report was intentionally high level to avoid pinpointing specific locations of archaeological sites, as per standard practice to minimize potential for looting.                                                                                                                                                                                                                                                             |

| 9 | Heritage Planning - Archaeology | Archaeological reports | <p>EWR - Section 4.8.1, p. 40</p>                                                             | <p>This report references the Stage 1 Archaeological Assessment of the Ontario Line South, dated July 24, 2020. The City have only received an earlier version of this report (May 29, 2020). We request that this report be provided to Heritage Planning as well as the concurrence letter from the MHSTCI stating that this report is compliant with the Standards and Guidelines for Consultant Archaeologists and has been entered into the Public Register.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | <p>Metrolinx had circulated the Ontario Line South Stage 1 Archaeology Report on June 4, 2020 to the City based on the May 29, 2020 draft submitted to the Ministry (which is why the City only has the May 29, 2020 draft on file). This version was the same version submitted to the MHSTCI. We had received an approval letter (attached with this comment response) from the Ministry that this report was entered into the register on July 24, 2020, hence the July 24, 2020 reference in our Corktown Station Early Works Report.</p> <p>The July 2020 Stage 1 AA report can be found on our Mx Engage website for the City's reference.</p> |

|    |                                 |                          |                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

| 10 | Heritage Planning - Archaeology | Archaeological reports   | EW R - Section. 5.8, p. 123 | <p>The City of Toronto notes that the Stage 1 Archaeological Assessment Report (AECOM 2020) is missing reference to the Stage 1 Archaeological Assessment of 250-260 Front Street East and 383 King Street East. (Archeoworks 2017 - P029-0961-2017). Include this report in this section and acknowledge outstanding archaeological concerns.</p>                                                                                                                                                                             | <p>The Ontario Line Stage 1 Archaeological Assessment was conducted using reports available in the MHSTCI database. however, it should be noted that the MHSTCI does not maintain a database of all properties that have had past archaeological investigations and searches of the MHSTCI public register do not always result in a complete listing of all archaeological work conducted in a given area. A request to the City of Toronto to provide any reports within the study area was made in the early stages of the project, and no additional reports were sent at the time of the Stage 1 report preparation.</p> <p>As planning progresses, further research will be done on a property specific basis. The Stage 1 Archaeological Assessment of 250-260 Front Street East and 383 King Street East. (Archeoworks 2017 - P029-0961-2017) will be reviewed as part of the archaeological assessment in the Ontario Line Environmental Impact Assessment Report.</p> |
| 11 | Heritage Planning - Archaeology | Archaeological Resources | EW R - Table 6-7, p. 165    | <p>In Table 2-1 of the Ontario Line Corktown Station Early Works – Heritage Detailed Design Report, several other activities are identified as part of the Early Works which could impact the archaeological resources at OLS-034 beyond building demolition. This includes site preparation, staging, re-grading, tree removal, removal of contaminated soil, utilities decommissioning, and erection of fences. These issues need to be addressed as it relates to the impacts to archaeological resources on this site.</p> | <p>The activities listed in Table 2-1 of the Heritage Detail Design Report and the Early Works report are the same. The archaeology sections of the Early Works Report address all equipment/activities listed in Table 3-1 of the Early Works Report, not just demolition</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 12 | Heritage Planning - Archaeology | Archaeological Resources | EW R - Table 6-7, p. 165    | <p>Under Potential Impact, it is noted that Options 2A and 2B from the Ontario Line Cultural Heritage Report (AECOM 2020) were reviewed and eliminated. Heritage Planning requests further information about why options 2A and 2B were eliminated during project design. These options gave preference to avoidance and protection of heritage attributes, which is also the preference of Heritage Planning.</p>                                                                                                             | <p>Based on the design and use of the First Parliament Site for the Ontario Line project, Options 2A (Encroachment) and 2B (Introduction of New Elements) were eliminated as neither are feasible based on the scope of work planned for the First Parliament Site. Demolition and removal of all structures on the properties as well as asphalt and soil removal where required, was determined to be the only option. Alternative sites were considered but ultimately ruled out for the launch of the tunnel boring machines, as described in Section 1.3.3 of the Early Works Report.</p>                                                                                                                                                                                                                                                                                                                                                                                  |
| 13 | Heritage Planning - Archaeology | Archaeological Resources | EW R - Table 6-7, p. 165    | <p>Under Mitigation Measures, revise to include consultation with Heritage Planning and other stakeholders as to the appropriate approach to archaeological assessment in advance of Early Works</p>                                                                                                                                                                                                                                                                                                                           | <p>Consultation with the City of Toronto's Heritage Planning is included in Table 6-7 under the Heritage section of the Early Works report for the First Parliament Site and is also a commitment of the Minister's Consent. A commitment will be added to Table 6-8 to include consultation with the City of Toronto Heritage Planning regarding archaeological assessments specific to the First Parliament Site and the Lime Kiln Works Site.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

|    |                                 |                                    |                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

| 14 | Heritage Planning - Archaeology | Archaeological Resources           | Section 6.8; Table 6-8                                    | Revise this section and table to include preservation in-situ of significant archaeological resources as a potential mitigation measure. This is the preference of Heritage Planning and the Ministry of Heritage, Sport, Tourism and Culture Industries, as outlined in the City of Toronto's Official Plan and the Standards and Guidelines for Consultant Archaeologists.                                                                                                                                                                                                                                                                              | As agreed upon in discussions between the City and Metrolinx, Metrolinx will endeavour to preserve in-situ arch resources associated with First Parliament and Home District Gaol where feasible. Metrolinx has also worked with the Ministry of Heritage, Sport, Tourism, and Cultural Industries to obtain Minister's Consent which provides conditions which Metrolinx is committed to following. Metrolinx will continue to consult and engage with the City to ensure the City's comments are addressed with regards to ongoing archaeological work at the First Parliament site.                                                                                                                                                                                                                                                                                                                                                            |
| 15 | Heritage Planning - Archaeology | Archaeological Resources           | Section 6.8; Table 6-8                                    | This section shall also include a description of the Toronto Lime Kilns Works Site (AjGu-61/AjGu-64) and ongoing archaeological conditions on the properties north of Front Street East (see earlier comment).                                                                                                                                                                                                                                                                                                                                                                                                                                            | Please see response #1 above. All archaeological mitigation will take place prior to ground disturbing activities in accordance with the Ontario Heritage Act.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| 16 | Heritage Planning - Archaeology | Archaeological Resources           | EWR - Table 6-8, p. 173                                   | <p>Include references to the City of Toronto's Official Plan and the Terms of Reference for Archaeological Assessments as relevant policy in addition to the Standards and Guidelines.</p> <p>Include a statement that any archaeological assessments, including the formulation of Stage 3 and Stage 4 mitigation programs and Construction Monitoring programs shall be subject to review and approval by the City of Toronto Heritage Planning.</p>                                                                                                                                                                                                    | Please refer to response #5.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 17 | Heritage Planning               | HDDR Report                        | HDDR Report, general                                      | Provide additional detail on cultural heritage resources impacted as per the standard scope and methodology of CHER/HIA reports completed during EA processes. If we understand correctly, the Heritage Detailed Design Report (HDDR) document is intended to replace the individual Cultural Heritage Evaluation Reports (CHER) and Heritage Impact Assessments (HIAs) that would typically be completed for each cultural heritage resource that may be impacted: as such the level of detail provided in the document is insufficient to determine the cultural heritage value of these identified resources, and to understand the potential impacts. | Refer to the Ontario Line Cultural Heritage Report (CHR) completed under O. Reg. 341/20. Methodology for CHR was developed through consultation with MHSTCI. The CHR provides sufficient information about and provides a description of a property's Cultural Heritage Value or Interest (See Section 2 for methodology). Given the sufficient level of information in the CHR, it was not necessary to recommend individual CHERs. Furthermore, in consultation with MHSTCI, the preliminary impact assessment provides sufficient discussion of potential impacts to inform project planning and to avoid, to the greatest extent possible, the undertaking of HIAs. Therefore, the purpose of the Heritage Detail Design Report, as described in Section 1.1.1, is to identify any changes in impacts from the CHR, refine the impacts proposed in the CHR, and identify any new project-specific impacts that were not described in the CHR. |
| 18 | Heritage Planning               | HDDR Report and Early Works Report | HDDR Report, Table ES-2 and Early Works Report, Table 6-7 | The HDDR and Early Works Reports both identify the property at "2 Berkeley Street, 248, 250, 252, 25, 258, 260, 262, 264 The Esplanade" as a built heritage resource that is Designated under Part IV and V of the Ontario Heritage Act and covered by a Heritage Easement Agreement (HEA) within the study area. This resource is missing from the Impact and Description Tables in both the HDDR Report (Table ES-2) and Early Works Report (Table 6-7) and must be included to evaluate potential impacts and mitigation measures.                                                                                                                     | This resource, referred to as OLS-36, will be added to the impact table in both the Heritage Detail Design Report and the Early Works Report.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

|    |                   |                                    |                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                              |
|----|-------------------|------------------------------------|-----------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 19 | Heritage Planning | HDDR Report and Early Works Report | HDDR Report, Table 3-1 and Early Works Report, Table 5-13 | The bullet-point information provided in the tables with Description of Known or Potential Cultural Heritage Value or Interest and Heritage Attributes provided in both the HDDR (Table 3-1) and Early Works Report (Table 5-13) do not provide an adequate evaluation of the properties under Ontario Regulations 9/06 or 10/06 as required of a CHER (for which, along with an HIA, the HDDR is said to serve in their place), nor does it cite sources for any of the research in these descriptions.                                                                                                                                | Please see response in Item #17                                                                                                                                                                                                                                                                                                                                                              |
| 20 | Heritage Planning | HDDR Report and Early Works Report | HDDR Report, Table 3-1 and Early Works Report, Table 5-14 | Three built heritage resources were determined to potentially meet Ontario Regulation 10/06 criteria: however, their evaluation using the 10/06 criteria is not documented for any of the resources within these Reports.                                                                                                                                                                                                                                                                                                                                                                                                               | See response in Item #17. In addition, Section 2 of the Ontario Line Cultural Heritage Report states that the CHR provides sufficient information to demonstrate and identify the built heritage resources and cultural heritage landscapes that meet or have potential to meet O. Reg. 10/06. Methodology for the CHR was developed in consultation with MHSTCI.                            |
| 21 | City Planning     | Early Works Report                 | EWR, Section 5.6.2.2                                      | Clarify how it was determined that "there are no planned community services or facilities" in the Corktown Station area. We note that the First Parliament site, for example, includes plans for a new district library and heritage interpretation centre (contact: SoMei Quan, CreateTO). We further note that improvements to parks and recreation facilities include the reconstruction of David Crombie Park along The Esplanade (contact: Nancy Chater, Parks Forestry & Recreation). The data sources used to population this section of the EWR appear to be insufficient to capture planned community services and facilities. | Section 5.6.2.2 will be updated to include these planned community services. Applicable Environmental Assessments and Planning studies are included in Section 2.2.3, which include the First Parliament Project and the David Crombie Park Revitalization. Metrolinx will continue to work with the City of Toronto as we advance plans for Corktown Station and the First Parliament Site. |
| 22 | City Planning     | Early Works Report                 | EWR, Table 5-19                                           | Update service headways for transit routes to reflect the planned service provision. The 504 King streetcar, for example, operates at 2-3 minute headways during peak hours. The source for this data should be the TTC service summaries before Covid-19, which can be requested from the TTC.                                                                                                                                                                                                                                                                                                                                         | The headways were revised to reflect the service headways from between May and June 2019.                                                                                                                                                                                                                                                                                                    |
| 23 | City Planning     | Early Works Report                 | EWR, Figure 5-20                                          | Include planned cycling facilities that will be in place when construction on the Ontario Line is anticipated to begin. For example, a cycle track is planned for the Esplanade and Mill Street, which will be constructed in 2021 and 2022. Transportation Services (Adam Popper) and Engineering & Construction Services (Owen McGaughey) should be consulted to provide additional information on the implementation of this facility.                                                                                                                                                                                               | This section is meant to address the existing transportation network. The planned facilities will be added to Section 5.6.2.2 of the Early Works Report, Planned Services and Facilities. Metrolinx will continue to consult with the City of Toronto on the Esplanade and Mill Street bikeway.                                                                                              |
| 24 | City Planning     | Early Works Report                 | EWR, Table 6-6                                            | Regarding land uses and adjacent lands, confirm whether there are potential impacts to adjacent land development projects, or impacts to the early works from development on adjacent lands. We note, for example, that a data centre with zoning approval may be constructed at 43 Parliament Street, which may involve work zone lane closures. Other development applications that may be under construction during the Corktown early works is documented in Section 5.6.4. Coordination is required with Transportation Services to understand the full extent of planned and approved lane closures.                              | Noted. A commitment is made in the Traffic and Transportation section of the Early Works Report to coordinate with the City of Toronto regarding other ongoing construction projects when scheduling the early works activities to maintain the mobility of all road users.                                                                                                                  |

|    |               |                    |                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                     |
|----|---------------|--------------------|------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 25 | City Planning | Early Works Report | EWR, Table 6-6   | Regarding visual effects from construction activities, provide additional detail about screened enclosures (such as hoarding) that Metrolinx is committed to using at construction sites. Improvements to screening should be included compared to the fencing that was provided on the ECLRT, which did little to mitigate the visual impacts of construction. With regard to private development projects (e.g. condominium or office tower construction), the City has achieved higher standards for the quality of hoarding provided at these sites. Lessons learned from projects like ECLRT should be applied to the Ontario Line to improve temporary conditions. | As Corktown Station early works planning is still in progress, details about screened enclosures such as hoarding and fencing are not yet available. These details will be included in early works activities project specifications and the lessons learned from the ECLRT project will be applied as appropriate. |
| 26 | City Planning | Early Works Report | EWR, Table 6-9   | For active transportation impacts, a Vision Zero perspective should be applied to protect vulnerable road users from injuries and fatalities during construction. Table 5-5 identified several pedestrian and cycling facilities that already provide low levels of service in the existing condition (without considering pedestrian and cyclist volumes, which the Ottawa MMLOS does not account for). Poor levels of service may be exacerbated with construction occurring immediately adjacent to the facility. Identify mitigation measures - e.g. provision of minimum sidewalk widths, minimum pedestrian levels of service.                                     | Table 6-9 will be revised to indicate that the necessary mitigation measures will be considered (e.g., maintaining a minimum sidewalk width) in order to maintain pre-construction pedestrian levels of service.                                                                                                    |
| 27 | City Planning | Early Works Report | EWR, Section 8.8 | Commitments to future consultation should include the City on matters (among other things) related to impacts on development and transportation within the area of the project's influence, and the detailed design of restoration of impacted areas to the current City standard. We note that government review agencies and technical stakeholders are included in the list of stakeholders consulted in Section 8.1.                                                                                                                                                                                                                                                 | The City of Toronto is listed under Engagement with Technical Stakeholders in Section 8.4. Commitments to engage the City on specific technical aspects of the Early Works are included in the discipline specific sections of the report.                                                                          |

|    |               |                                                         |                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|----|---------------|---------------------------------------------------------|-------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 28 | City Planning | Early Works Report, Traffic and Transportation Appendix | Traffic and Transportation EWR, Section 2.1.2.2 | <p>We note that the City of Ottawa's Multi-Modal Level of Service tool used in this analysis does not include pedestrian volumes in determining a pedestrian level of service, relying instead on qualitative characteristics of a pedestrian facility and its adjacency to other facilities. This may provide a misleading indicator of the quality of a pedestrian facility where pedestrian volumes are high, which is the case at times around the Corktown Station area especially during special events at the Distillery District.</p> | <p>To identify the impact of the early works on pedestrians, the assessment of the multi-modal level of service under existing conditions will serve as a baseline for comparison with the multi-modal levels of service under the early works (note that the multi-modal level of service assessment under early works will be assessed once the detailed construction staging schemes become available). When comparing both scenarios, the pedestrian volumes will be assumed to be the same but pedestrian facilities could be different due to adjustments (i.e., realignments, closures, etc.) to pedestrian facilities that might be required under early works. Accordingly, and given the comparative nature of the analysis, we believe the omission of the pedestrian volumes is not critical to this assessment. The EWR and Traffic Report include a commitment to monitor the effectiveness of the Transit and Traffic Management Plan(s) throughout the construction period and to make adjustments on actual field observations if required.</p> <p>Metrolinx is aware that there may be special events held in proximity to the Corktown Station Early Works, including the Distillery District, and does not want to compromise the pedestrian level of service during those events. Metrolinx will add a commitment to the Early Works Report and the Traffic Report to consult with the City of Toronto to minimize potential impacts during those events should closures or long-term impacts be required.</p> |

Watermain Replacement at Berkeley St, From: The Esplanade (WV1827) To: Scadding Ave in 2023 | Noted, Metrolinx will ensure Toronto Water's capital works are considered ahead of construction.                                                                                                                                                                                                                                                                     |
| 11 | TW WIM-TR | Utilities | Page 153            | If groundwater would be discharged to municipal sewer system, the water quality test results and downstream sewer capacity analysis and hydraulic grade line analysis will be included in the permit application and submitted to TW-EMP.                                                                                                                                                                                                                                                                     | Noted, a measure to conduct regular groundwater quality testing of discharge water if dewatering is required has been added to Table 6-2 of the Early Works Report.                                                                                                                                                                                                  |
| 12 | TW WIM-TR | Utilities | Page 155, Table 6-3 | For Stormwater management, water balance, water quality and quantity targets according to the City's WWFM Guidelines shall be met during site design.                                                                                                                                                                                                                                                                                                                                                         | Comment noted. As Corktown Station early works will be mainly limited to disconnection of the feeding utilities and demolition of existing structures, impacts to the stormwater management, water balance, water quality and quantity targets are not anticipated.                                                                                                  |
| 13 | TW WIM-TR | Utilities | Page 180            | Design Criteria for Sewer and Watermain and WWFMG are two major documents to be used for TW asset design and construction.                                                                                                                                                                                                                                                                                                                                                                                    | Comment noted. No deep excavation or utilities work are anticipated for this project and as a result, it is not anticipated that the Design Criteria for Sewer and Watermain and the WWFMG will apply to this project.                                                                                                                                               |

"</p> <p>Please note that as per TS-20 data request, most recent available data was provided.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | These revisions will be included in updated versions of the report.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 2                           | Transit Infrastructure Projects/Transportation Services | A5_2021-03-10_OL_EW3_CS_Traffic_60611173_DRAFT | Pages 9 & 28.                                | <p><i>"The Ontario Line Final Environmental Conditions Report (AECOM, 2020) notes that turning movement counts and signal timing plans were not available at some intersections within the Ontario Line Study Area, and were not collected through new traffic surveys considering the uncharacteristic traffic conditions as a result of the COVID-19 pandemic. As a result of the noted data limitations, a quantitative traffic assessment of some intersections within the Corktown Station Study Area could not be undertaken."</i></p> <p>- All signalized intersections should be assessed and analysis should be included in this report.</p> <p>- TMC data can be retrieved from Traffic Impact Assessment Reports of Active Development Applications.</p> <p>- Traffic Impact Study of 333 King Street East and 250 Front Street East includes TMCs of the following signalized intersections.</p> <p>- King/Parliament.</p> <p>- King St &amp; Sherbourne St</p> <p>- Front/Sherbourne</p> <p>- Front &amp; Princess.</p> <p>- Front &amp; Berkeley.</p> <p>These are the intersections within Corktown station study area.</p> <p>- Active Development Applications are mentioned in section 4.0 of "The Ontario Line Final Environmental Conditions Report (AECOM, 2020)".</p> | <p>Intersections with historical Turning Moving Count (TMC) data were assessed using a conservative annual growth rate of 1%. The intersections that were not assessed are those where no traffic data was provided.</p> <p>A quantitative traffic impact assessment will be completed, as required, as project planning progresses to consider vehicular traffic impacts as a result of the Corktown Station Early Works, and develop and implement a Transit and Traffic Management Plan(s), which could include temporary changes to intersection lane configurations, traffic signal timing optimization, modifications to existing signal timing plans, etc. The Transit and Traffic Management Plan(s) will also address specific emergency services requirements in consultation with the City of Toronto.</p> |
| 3                           | Transit Infrastructure Projects/Transportation Services | A5_2021-03-10_OL_EW3_CS_Traffic_60611173_DRAFT | 2.1.2.1 Automobile Level of Service, Page 28 | <p>Please specify why the Intersection capacity analysis wasn't done using the most recent version of the Highway Capacity Manual (HCM 6th) as per instructions in the City of Toronto "Guidelines for the Preparation of Transportation Impact Studies" for utilizing the most recent version of HCM.</p> <p>The results from a more recent HCM version is considered to be more reliable.</p> <p>Only those intersections where the configurations are not supported by HCM 6th/2010, the HCM 2000 based results should be used following the instructions from City of Toronto's "Guidelines for Using Synchro 9 (Including SimTraffic 9)". The Guideline mentions using HCM 2000 for the intersections where there are specific limitations to HCM2010 (HCM 6th has the same limitation).</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | The majority of the intersections have a configuration that is not supported by HCM 2010. In addition, HCM 2010 does not support speed limits less than or equal to 40 km/h which is the case along the majority of the roads within the Corktown Station Study Area. Hence, for consistency purposes, HCM 2000 was selected as the version of choice.                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

|   |                                                         |                                                |                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

| 5 | Transit Infrastructure Projects/Transportation Services | A5_2021-03-10_OL_EW3_CS_Traffic_60611173_DRAFT | Table 2-1: Key Determining Factors for Pedestrian Level of Service, Page 30       | <p><i>"Right- and left-turn conflicts .....and exclusive pedestrian phases"</i></p> <p>- Edit to: "Right- and left-turn conflicts .....and exclusive pedestrian phases (leading pedestrian interval)"</p> <p>- TS recommends to model all LPI intersections within Corktown site.</p> <p>- Please also ensure that LPI element should be considered for those intersections in finding Pedestrian LOS.</p> <p>For example leading pedestrian interval is installed at the Intersection of King St &amp; Sherbourne St (TCS254)</p> | <p>Noted, the edit will be made in the revised report.</p> <p>Among the intersections where traffic data was provided, only the intersection of Parliament Street and Mill Street has LPI and it was modeled accordingly. The LPI element is considered when assessing PLOS at the intersection of Parliament Street and Mill Street. Traffic data at the intersection of King Street and Sherbourne Street was missing.</p> <p>A quantitative traffic impact assessment will be completed, as required, as project planning progresses to consider vehicular traffic impacts as a result of the Corktown Station Early Works, and develop and implement a Transit and Traffic Management Plan(s), which could include temporary changes to intersection lane configurations, traffic signal timing optimization, modifications to existing signal timing plans, etc. The Transit and Traffic Management Plan(s) will also address specific emergency services requirements in consultation with the City of Toronto.</p> |
| 6 | Transit Infrastructure Projects/Transportation Services | A5_2021-03-10_OL_EW3_CS_Traffic_60611173_DRAFT | Table 2-3: Key Determining Factors for Transit Level of Service, Page 33          | <p><i>"Ratio of average transit speed to posted speed"</i></p> <p>- Specify what is the source of getting average transit speed.</p>                                                                                                                                                                                                                                                                                                                                                                                               | The average transit speed was assumed equal to or greater than 80% of the respective road's posted speed. This quantitative measure was linked to the qualitative measure of having limited parking/driveway friction, as per Exhibit 15 of the City of Ottawa's Multi-Modal Level of Service Guidelines.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 7 | Transit Infrastructure Projects/Transportation Services | A5_2021-03-10_OL_EW3_CS_Traffic_60611173_DRAFT | 3.1.1.1 Road Network, Page 35                                                     | <p>- Eastern Avenue is a minor east-west arterial road.</p> <p>- As Part of Vision Zero Speed Management Strategy, Front St btwn Parliament and Cherry is 30km/h. (January 8, 2020)</p> <p>Please confirm what speed limit was considered in Level of service assessment?</p> <p>- Posted speed is 40 km/h on the section of Parliament btwn Queen and Gerrard. Please specify the speed limit of the section of Parliament St as shown in Figure 3-1, Please confirm what speed limit was considered for the LOS analysis?</p>    | <p>Noted, the classification of Eastern Avenue will be updated in the revised report.</p> <p>Noted, the posted speed of Front Street will be updated in the revised report. As shown in Appendix F, the range between 30 and 50 km/h was selected as the operating speed in the level of service assessment for Front Street.</p> <p>As shown in Appendix F, the range between 30 and 50 km/h was selected as the operating speed in the level of service assessment for Parliament Street.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 8 | Transit Infrastructure Projects/Transportation Services | A5_2021-03-10_OL_EW3_CS_Traffic_60611173_DRAFT | Figure 3-1: Existing Road Network Within the Corktown Station Study Area, Page 37 | <p>Please clarify why the following signalized intersection are not labelled in this figure.</p> <ul style="list-style-type: none"> <li>- King/Parliament-TCS 245.</li> <li>- King/Sherbourne-TCS254.</li> <li>- Front/Sherbourne TCS253.</li> <li>- Front/Berkeley-TCS1968.</li> <li>- Front/Princess-TCS 1967.</li> </ul> <p>Timing cards of these intersections have already been provided.</p>                                                                                                                                 | All intersections will be labelled in the revised figure. Timing cards have been provided but turning movement counts at the noted intersections were missing and hence they were not assessed.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

Please ensure that LPI element is considered for the intersection in finding Pedestrian LOS.                                                                                                                                                                 | Noted, Appendix F and PLOS results will be revised accordingly.                                                                                                                                                                                                                                                                                                                                                       |
| 19 | Transit Infrastructure Projects/Transportation Services | A5_2021-03-10_OL_EW3_CS_Traffic_60611173_DRAFT | Appendix F, Pages 128 & 129                          | Please include a row for refuge island element in Multi-Modal Level of Service - Intersections Forms, as points are assigned to that element of intersection (see Exhibit 5-PETSI point tables from City of Ottawa's MMLOS Guidelines). However, the points for refuge island was considered in calculating PLOS score for intersections. | As per the addendum to the City of Ottawa's MMLOS Guidelines, points assigned for "Island Refuge" were deleted and combined with the Table 5.3b "Right Turn Channel". Exhibit 5 will be added to Appendix C.                                                                                                                                                                                                          |
| 20 | Transit Infrastructure Projects/Transportation Services | A5_2021-03-10_OL_EW3_CS_Traffic_60611173_DRAFT | Appendix F, Page 128, King/Berkeley                  | As per Google image, eastbound and westbound left turning cyclists need to cross one lane. Please confirm and revise the appendix page.                                                                                                                                                                                                   | A distinction was made between "changing lanes" and "crossing lanes". Cyclists travelling on the curb lanes of King Street would have to change lanes to get to the median lane and complete a left-turn movement at the intersection of King Street and Berkeley Street. At intersection with an auxiliary left-turn lane, cyclists were considered to "cross" the median through lane to get to the left-turn lane. |
| 21 | Transit Infrastructure Projects/Transportation Services | A5_2021-03-10_OL_EW3_CS_Traffic_60611173_DRAFT | Appendix F, Cherry & Front, Page 129                 | The south leg of Cherry has pocket bike lane. As per MMLOS Ottawa Guidelines (exhibit 12), pocket bike lanes are defined as bike lanes that develop near intersections between vehicular right turn lanes on the right side and vehicular through or left lane on the left side. Please confirm and advise the BLOS of south leg?         | Noted, "pocket bike lane" will be used instead of "curb bike lane". BLOS would remain unchanged.                                                                                                                                                                                                                                                                                                                      |
| 22 | Transit Infrastructure Projects/Transportation Services | A5_2021-03-10_OL_EW3_CS_Traffic_60611173_DRAFT | Appendix F, The Esplanade/Lower Sherbourne, Page 129 | As per Google image, northbound and southbound left turning cyclists need to cross two lanes. Please confirm and revise the appendix page.                                                                                                                                                                                                | Cyclists were assumed to use the crossrides across the east and west legs and then cross using the crosswalks to complete the left turn movement. That's the reason no lanes would be crossed at the approach to the intersection.                                                                                                                                                                                    |
| 23 | Transit Infrastructure Projects/Transportation Services | A5_2021-03-10_OL_EW3_CS_Traffic_60611173_DRAFT | Appendix F, Lower Sherbourne/Lake Shore, Page 129    | As per Exhibit 12 of MMLOS Ottawa Guidelines, for the speed limit $\geq 60\text{km/h}$ with no lane crossed, BLOS of east/west legs are "D" in mixed traffic. Please confirm and revise the appendix page.                                                                                                                                | Noted. No change was required to overall BLOS as the intersection of Lake Shore Boulevard and Lower Sherbourne Street as overall BLOS is D. Appendix F will be revised to update the BLOS.                                                                                                                                                                                                                            |
| 24 | Transit Infrastructure Projects/Transportation Services | A5_2021-03-10_OL_EW3_CS_Traffic_60611173_DRAFT | Appendix F, Multi-Modal Level of Service             | As per TS comments provided for BLOS, please revise the Tables 3-4, 3-5 and Figure 3-5 on pages 48, 49 & 50 respectively.                                                                                                                                                                                                                 | Noted. No changes are required to Table 3-4, 3-5 and Figure 3-5 will be updated accordingly.                                                                                                                                                                                                                                                                                                                          |

|    |                                                         |                                                |                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

Analysis should be included in this appendix.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | <p>All signalized intersections where traffic data was received from the City were assessed for PLOS, BLOS, and TLOS.</p> <p>A quantitative traffic impact assessment will be completed, as required, as project planning progresses to consider vehicular traffic impacts as a result of the Corktown Station Early Works, and develop and implement a Transit and Traffic Management Plan(s), which could include temporary changes to intersection lane configurations, traffic signal timing optimization, modifications to existing signal timing plans, etc. The Transit and Traffic Management Plan(s) will also address specific emergency services requirements in consultation with the City of Toronto.</p>                                                                          |
| 26 | Transit Infrastructure Projects/Transportation Services | A5_2021-03-10_OL_EW3_CS_Traffic_60611173_DRAFT | Appendix F, Pages 132-141                                            | Specify what is crowding Pedestrian LOS, how it was calculated and what is the source of this criteria. Crowding PLOs is shown in this Appendix for segment analysis. Please also clarify how the number of pedestrians were obtained for this analysis. This description should be included in section 2.1.2.2 - Pedestrian Level of Service and criteria should be included in Appendix C                                                                                                                                                                                                                                                                                                                                                                      | Crowding PLOS was disregarded in the assessment of pedestrian level of service due to the absence of accurate pedestrian volumes along the midblock segments.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 27 | Transit Infrastructure Projects/Transportation Services | A5_2021-03-10_OL_EW3_CS_Traffic_60611173_DRAFT | Segment Form, BLOS, Cherry St, btwn LakeShore and Adelaide, Page 141 | Please indicate what (bike lane+parking lane) width was considered for finding BLOS. Clarify how the bike lane+parking lane width $\geq 1.8\text{m}$ is justifying BLOS "A" for this segment, however bike lane is adjacent to parking lane (see Appendix C Exhibit 11)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | The type of facility considered in the assessment was "curbside bike lane" as it is a better representation of the bike lanes along Cherry Street than "bike lanes adjacent to curbside parking lane". The width used is basically the estimated width of the bike lane.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 28 | Transit Infrastructure Projects/Transportation Services | A5_2021-03-10_OL_EW3_CS_Traffic_60611173_DRAFT | General                                                              | Why MX did not consider assessing Truck level of service along truck routes, arterial roads and key delivery access routes within Corktown Site, as per City of Ottawa's Multi-Modal Level of Service Guidelines ?                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | The assessment of trucks level of service was not included as it is not a typical requirement in such studies where the focus is on impacts to general traffic, active transportation users, and transit. Given that truck percentages were input into the Synchro models, then the findings of the traffic operations assessment can be considered a good representation of the actual operations experienced by the existing vehicle mix (including trucks) within the Corktown Station Study Area.                                                                                                                                                                                                                                                                                           |
| 29 | Transit Infrastructure Projects/Transportation Services | A5_2021-03-10_OL_EW3_CS_Traffic_60611173_DRAFT | Executive Summary- Page 9 of 141                                     | <p>"The Ontario Line Final Environmental Conditions Report (AECOM, 2020) notes that turning movement counts and signal timing plans were not available at some intersections within the Ontario Line Study Area, and were not collected through new traffic surveys considering the uncharacteristic traffic conditions as a result of the COVID-19 pandemic. As a result of the noted data limitations, a quantitative traffic assessment of some intersections within the Corktown Station Study Area could not be undertaken."</p> <p>If the most current data are not available, the traffic study can be undertaken using older traffic data( turning movement counts and signal timing plans) and do the related adjustments as per COVID19 condition.</p> | <p>Intersections with historical TMC data were assessed using a conservative annual growth rate of 1%. The intersections that were not assessed are those where no traffic data was available.</p> <p>A quantitative traffic impact assessment will be completed, as required, as project planning progresses to consider vehicular traffic impacts as a result of the Corktown Station Early Works, and develop and implement a Transit and Traffic Management Plan(s), which could include temporary changes to intersection lane configurations, traffic signal timing optimization, modifications to existing signal timing plans, etc. The Transit and Traffic Management Plan(s) will also address specific emergency services requirements in consultation with the City of Toronto.</p> |

|    |                                                         |                                                |                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                          |

| 30 | Transit Infrastructure Projects/Transportation Services | A5_2021-03-10_OL_EW3_CS_Traffic_60611173_DRAFT | Table 1-2: Anticipated Construction Activities for the Ontario Line Corktown Station Early Works- Page 26 of 141 | <p>"All road closures will follow standard traffic control management guidelines"</p> <p>Please confirm the duration of the road closures (if any) in the construction period. Which roads will be closed in this regard? Will be any full closure in the adjacent road network?</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | This level of detail is not yet known; full closures are not anticipated based on the nature of the Early Works scope.                                                                                                                                                                                                                                   |
| 31 | Transit Infrastructure Projects/Transportation Services | A5_2021-03-10_OL_EW3_CS_Traffic_60611173_DRAFT | 2.1.2 Multi-Modal Level of Service Assessment- Page 30 of 141                                                    | <p>"For any given approach to the intersection, the pedestrian green time / effective walk time was calculated as per the formula included in the Addendum to the City of Ottawa's Multi-Modal Level of Service Guidelines (2015) by conservatively assuming that no pedestrian is initiating their crossing during the Flashing Don't Walk time; "</p> <p>To confirm if the assumptions are in alignment with the City of Toronto "Traffic Signals Operations Policies and Strategies". The pdf version can be found at the following address:</p> <p>"<a href="https://www.toronto.ca/wp-content/uploads/2017/11/91d6-0_2015-11-13_Traffic-Signal-Operations-Policies-and-Strategies_Final-a.pdf">https://www.toronto.ca/wp-content/uploads/2017/11/91d6-0_2015-11-13_Traffic-Signal-Operations-Policies-and-Strategies_Final-a.pdf</a>"</p> | Although the City of Toronto "Traffic Signal Operations Policies and Strategies" does not provide an explicit definition of the pedestrian effective walk time, but the assumptions considered in the assessment are in line with the document in terms of the definition of the pedestrian phase intervals (e.g., walk time and flash don't walk time). |
| 32 | Transit Infrastructure Projects/Transportation Services | A5_2021-03-10_OL_EW3_CS_Traffic_60611173_DRAFT | 2.1.2 Multi-Modal Level of Service Assessment- Page 32 of 141                                                    | <p>"This indicates that the impact of transit signal priority measures is not factored into the assessment of Transit Level of Service at the intersection level."</p> <p>Considering the multimodal character of transportation in the Corktown area, it doesn't seem that using Synchro and Ottawa Multi-Modal Guideline would be the preferred option to cover all different aspects of the traffic impacts of the construction in this area. The preferred method here is using microsimulation software to include all impacts correctly and modeling the network as per the real condition.</p>                                                                                                                                                                                                                                          | The adopted methodology is a typical best practice for Environmental Assessment Studies. As design progresses and in the event that partial/full road closures would be required during Early Works, then the assessment will be expanded to include results from a microsimulation tool.                                                                |
| 33 | Transit Infrastructure Projects/Transportation Services | A5_2021-03-10_OL_EW3_CS_Traffic_60611173_DRAFT | Figure 3-5: Cyclist Level of Service Within the Corktown Station Study Area-Page 50 of 141                       | The use of a 8-10 meters of the parking lot just north of Parliament Square Park is required to facilitate a bi-directional bikeway connection between Esplanade and Mill (between Berkeley and Parliament). More information regarding this comment has been provided in the previous packages related to Cork town station.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | The planned facilities will be added to Section 5.6.2.2 of the Early Works Report, Planned Services and Facilities. Metrolinx will continue consultation and coordination with the City in regards to the bikeway connection implementation.                                                                                                             |

| 1                                   | ECS-BSE       | Gardiner Rehabilitation Timeline | Section 2.2.3.2, Page 17.              | <p>The information under Section 2.2.3.2 appears to be outdated. The schedule has been revised and currently Segment 6 is from Cherry to Don Roadway from 2026 to 2029. Waterfront Toronto is completing the work from Don roadway to Logan in 2021 and 2022. Please ensure that the Gardiner Expressway Strategic Rehabilitation Plan segments and the respective construction timeline information is up to date prior to the issuance of the Report.</p> <p>2.2.3.2 Gardiner Expressway Strategic Rehabilitation Plan</p> <p>The City of Toronto developed the Gardiner Expressway Strategic Rehabilitation Plan to establish the immediate and long-term rehabilitation needs of the Gardiner Expressway, improve transportation corridors within the area, and provide more efficient public transit connections (City of Toronto, n.d.c). The rehabilitation is being completed in seven sections, two of which are within the Corktown Station Study Area:</p> <ul style="list-style-type: none"> <li>Segment 1 between Jarvis Street and Cherry Street with a projected timeline of planned construction <b>between 2018 and 2021</b> (City of Toronto, n.d.c); and</li> <li>Segment 6 between Lower Jarvis Street and east of the Don Valley Parkway at Logan Avenue with a projected timeline of planned construction <b>between 2024 and 2027</b> (City of Toronto, n.d.c).</li> </ul> <p>The City of Toronto's website notes that the planned construction timelines are subject to change (City of Toronto, n.d.c).</p> | <p>Thank you for providing the revised schedule information. The Early Works Report has been updated with the dates provided (2026-2029). Please note that the City of Toronto Gardiner Expressway Rehabilitation Strategy website currently states that the area east of Cherry Street, referred to as the Gardiner East EA, is scheduled from 2026 to 2030.</p>                                                                                               |
| 2                                   | ECS-BSE       | Gardiner Rehabilitation Timeline | Section 3.2, Page 20.                  | <p>The dash red line (footprint as defined under Section 3.2 above) and shown in Figure 3-2 includes a segment of the Gardiner Expressway. Please elaborate what impacts are anticipated on the Gardiner Expressway and how they are affecting the structure and its operations as a result of the Corktown Early Works?</p> <p><b>3.2 Early Works Project Footprint and Study Area</b></p> <p>The Corktown Station Early Works Project Footprint, shown in <b>Figure 3-1</b>, is defined as the area of direct disturbance associated with the early works activities. The site is bound by King Street East to the north, Parliament Street to the East, Berkeley Street to the West and Parliament Square Park to the south.</p> <p>The Corktown Station Study Area, shown in <b>Figure 3-2</b>, includes the Corktown Station Early Works Project Footprint <b>and a 500 metre buffer</b> which was identified for assessment of potential impacts of the Corktown Station early works. As shown in <b>Table 4-1</b>, select discipline-specific study areas were identified for assessment of the discipline-specific potential impacts of the Corktown Station early works.</p>                                                                                                                                                                                                                                                                                                                                                | <p>Although the Gardiner Expressway is within the 500m buffer of the study area, as stated in Section 5.9 of the Early Works Report, the Gardiner Expressway between Cherry Street and Sherborne Street was not considered part of the road network as it is not anticipated to be directly impacted by the Corktown Station Early Works within the Corktown Station Early Works Project Footprint or be part of the route for heavy construction vehicles.</p> |

the Corktown Early Works site have any direct/indirect and short/long-term impacts on the planned Gardiner construction staging?</p> <p><u>Traffic and Transportation</u></p> <p>Existing elements of the transportation and transit networks within the Corktown Station Traffic and Transportation Study Area include:</p> <ul style="list-style-type: none"><li>■ Seven arterial roads (i.e., Lake Shore Boulevard East, King Street East, Eastern Avenue, Adelaide Street, Front Street, Parliament Street, and Sherbourne Street), two collector roads (i.e., Cherry Street and The Esplanade), and three local roads (i.e., Berkeley Street, Trinity Street, and Mill Street);</li><li>■ It should be noted that the section of Gardiner Expressway between Cherry Street and Sherbourne Street was not considered part of the road network as it is not anticipated to be directly impacted by the early works within the Corktown Station Early Works Project Footprint or be part of the route for heavy construction vehicles.</li></ul> | 1                           | Urban Forestry | Natural Environment early works report @ Corktown | general                                | As clearing and grubbing will be an anticipated construction activity for site preparation, when can UF expect an arborist report and tree inventory to be submitted for review? Please confirm if this scope of work will be included in a site specific report or systemwide report.                               | An Arborist report will be completed and submitted to the City of Toronto ahead of any tree removals. This will be a site-specific report.                                                                                                   |
| 2                           | Urban Forestry | Natural Environment early works report            | 7.3                                    | Bylaws 813, article II & III should be specifically included in this section as a municipal permit since tree removal/injury may be required. Tree permits for bylaw protected trees must be obtained from UF beforehand.                                                                                            | Metrolinx will continue to engage with the City of Toronto as project planning and design progress, including with regard to tree injury/removal permits as required.                                                                        |
| 3                           | Urban Forestry | Draft early works report                          | ES. 6 - Permits and approvals          | Bylaws 813, article II & III should be specifically included in this section as a municipal permit since tree removal/injury may be required. Tree permits for bylaw protected trees must be obtained from UF beforehand.                                                                                            | See response to Comment #2 above.                                                                                                                                                                                                            |
| 4                           | PFR - PDCP LAU | Corktown Station Early Works Project Footprint    | General                                | PFR supports Transportation Services' ask for the Esplanade-Mill bikeway through the existing parking lot just north of Parliament Square Park within the Corktown Station EWP footprint to provide a separate space for people walking and cycling. The footprint should reflect the bikeway area provided by CREM. | Information on the Esplanade-Mill bikeway will be added to Section 5.6.2.2 of the Early Works Report, Planned Services and Facilities. Metrolinx will continue to consult with the City of Toronto on the Esplanade and Mill Street bikeway. |

| 9  | PFR - PDCP LAU | Socio-Economic and Land Use Characteristics | Parkland Strategy                              | PFR requests that this report references the Parkland Strategy. This area is currently deficient in parkland and the report should highlight the importance of protecting existing parkland and protecting lands identified as future parkland.                                                                                                   | Details on the City of Toronto's Parkland Strategy have been added to Section 2.2.3 of the Early Works Report.                                                                                                                                                                                                                                                           |
| 10 | PFR - PDCP LAU | Archaeological Resources                    | General                                        | Are there any anticipated utility conflicts or relocation required as a result of tunneling work in Parliament Square Park? If so, PFR recommends archaeological assessments be undertaken as they would for First Parliament.                                                                                                                    | Early works are not anticipated to impact Parliament Square Park. Future tunnelling impacts will be covered in the forthcoming Ontario Line Environmental Impact Assessment Report.                                                                                                                                                                                      |
| 11 | PFR - PDCP LAU | Archaeological Resources                    | General                                        | Any objectives outlined in the First Parliament Working Group specifically related to archaeology must be reflected in this section.                                                                                                                                                                                                              | This report documents early works activities, and covers archaeological requirements for the Corktown Station early works. Next steps for archaeological work for the Corktown Station early works site. Metrolinx will continue to engage the City and has committed to have the City review workplans and scope for upcoming archaeological programs at this location. |
| 12 | PFR - PDCP LAU | Traffic and Transportation                  | Transportation Services bikeway                | Current TPA lands are planned for TS bikeway. PFR supports Transportation Services' ask for a bikeway through the existing parking lot just north of Parliament Square Park within the Corktown Station EWP footprint to provide a separate space for people walking and cycling. The footprint should reflect the bikeway area provided by CREM. | Information on the Esplanade-Mill bikeway will be added to Section 5.6.2.2 of the Early Works Report, Planned Services and Facilities. Metrolinx will continue to consult with the City of Toronto on the Esplanade and Mill Street bikeway.                                                                                                                             |
| 13 | PFR - PDCP LAU | Traffic and Transportation                  | Transportation Network - Active Transportation | Revise to read: Coordinate with the City of Toronto to minimize the interference with pedestrians and cyclists. This may include fencing, hoarding (min 2m high, solid and secured), shared-lane markings, signals, wayfinding signs, and lighting as required to provide pedestrians and cyclists with safe, accessible, and continuous routes.  | Noted, suggested revision will be reflected in the revised report.                                                                                                                                                                                                                                                                                                       |
| 14 | PFR - PDCP LAU | Utilities                                   | General                                        | Are there any anticipated utility conflicts or relocation required as a result of tunneling work in Parliament Square Park? If so, PFR recommends archaeological assessments be undertaken as they would for First Parliament.                                                                                                                    | Please refer to response to Comment #10 above.                                                                                                                                                                                                                                                                                                                           |
| 15 | PFR - PDCP LAU | Permits and Approvals                       | Municipality                                   | Mx to acknowledge that any requests related to land transactions must go through CREM for proper circulation.                                                                                                                                                                                                                                     | Metrolinx has engaged with the CREM team with regards to land transactions and will continue to engage with this team as the project progresses.                                                                                                                                                                                                                         |

| 1                                         | Transit Expansion Office in consultation with LeighFisher | General - Noise and Vibration summary | General                                | It is noted the summary of the Noise and Vibration report is missing within this main report. CoT to review summary in updated report, once available.                                                                                                                                                                        | The Noise and Vibration summary will be added to the Early Works Report.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 2                                         | Transit Expansion Office in consultation with LeighFisher | Air Quality Monitoring                | Table ES-1 and Table 4-1               | The approach to air quality monitoring must be detailed within the Air Quality Management Plan. This should be explicitly stated within the Mitigation Measures column of Table ES-1 and Table 4-1.                                                                                                                           | The mitigation table (ES-1 & 4-1) will be revised to clarify that an Air Quality Management Plan will be a requirement of construction activities, and will include details on the approach to Air Quality monitoring.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 3                                         | Transit Expansion Office in consultation with LeighFisher | Background Concentrations             | Section 2.1 and Section 3.1            | Please confirm the background concentrations of the contaminants stated in Section 3.1 considers the effects of traffic. It is noted the report includes a separate volume of traffic summary, however, the purpose of this information is unclear if the effects of traffic within the study area are already accounted for. | <p>The background concentrations presented within the report do consider general effects of traffic. The locations of the monitoring stations (National Air Pollution Surveillance data) were specifically selected to be representative of downtown Toronto traffic conditions (e.g. College Street close to Spadina Road). The specific traffic volumes referenced within the reporting are included to demonstrate relative impacts from major sources of traffic within the Study Area, however these traffic volumes were not explicitly modelled using dispersion modelling software.</p> <p>It was assumed that the representative measurements within the general downtown Toronto core would be sufficient to indicate background air quality of the early works.</p> |
| 4                                         | Transit Expansion Office in consultation with LeighFisher | Disruption of Contaminated Soils      | Table ES-1 and Table 4-1               | A detailed approach to addressing and mitigating impacts associated with disrupting contaminated soils during construction must be detailed within the Air Quality Management Plan. This should be explicitly stated within the Mitigation Measures column of Table ES-1 and Table 4-1.                                       | Measures will be added to the Air Quality Management Plan referenced in the Mitigation Tables (ES-1 & 4-1) to address air quality related impacts from potentially disturbed contaminated soils. In addition, the Air Quality Management Plan will indicate measures be followed according to any Soils Management Plan or similar document during construction activities related to contaminated soils.                                                                                                                                                                                                                                                                                                                                                                      |

|   |                                                                    |                                              |                             |                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                    |

**RE: Review and Entry into the Ontario Public Register of Archaeological Reports:  
Archaeological Assessment Report Entitled, "Stage 1 Archaeological Assessment  
Ontario Line Project - South Multiple Lots, and Concessions, Geographic Township  
of York, now the City of Toronto, York County, Ontario", Dated Jul 22, 2020, Filed  
with MTCS Toronto Office on Jul 23, 2020, MTCS Project Information Form Number  
P438-0197-2019, MTCS File Number 0011988**

Dear Ms. Markham:

This office has reviewed the above-mentioned report, which has been submitted to this ministry as a condition of licensing in accordance with Part VI of the *Ontario Heritage Act*, R.S.O. 1990, c 0.18.<sup>1</sup> This review has been carried out in order to determine whether the licensed professional consultant archaeologist has met the terms and conditions of their licence, that the licensee assessed the property and documented archaeological resources using a process that accords with the 2011 *Standards and Guidelines for Consultant Archaeologists* set by the ministry, and that the archaeological fieldwork and report recommendations are consistent with the conservation, protection and preservation of the cultural heritage of Ontario.

The report documents the assessment of the study area as depicted in Figures 2, 3, and Figures 20-1 through 20-6 of the above titled report and recommends the following:

1) Stage 2 archaeological assessments must be conducted for all areas identified in this report as retaining moderate to high archaeological potential shaded in orange on Figure 20. Areas that are marked in hatching on Figure 20 have been subject to previous archaeological assessment that have cleared the land of archaeological concerns, therefore no further archaeological work is recommended for those areas. Finally, areas with blue shading indicate areas of low archaeological potential and will require a comprehensive property inspection as part of the Stage 2 field survey in order to determine the extent of previous disturbance. Further archaeological assessments must be conducted by a licensed archaeologist and must follow the requirements set out in the *Standards and Guidelines for Consultant Archaeologists* (Ontario Government 2011). The requirements for standard surface archaeological survey include:

- Test pit survey at 5 m intervals in all areas that will be impacted by the project and where ploughing is not possible (e.g., woodlots, overgrown areas, manicured lawns);

- Poorly drained areas, areas of steep slope and areas of previous disturbance (e.g., pipelines, railways, road ROW, buildings) identified are to be mapped and photo-documented, but are not recommended for Stage 2 survey as they possess low to no archaeological potential;

2) Due to the potential for deeply buried intact archaeological resources on floodplains and beneath land alterations Stage 2 archaeological assessment will be required for areas following Section 2.1.7 of the Standards and Guidelines for Consultant Archaeologists, and will include:

- Test pitting where viable to carry out surface survey methods to identify any archaeological sites or determine the extent of disturbance;

- Should test pitting by hand not reach subsoil (i.e. the area is found to have potential, but it may be deeply buried), mechanically excavate trenches at maximum intervals of 10 m to verify the presence of and to assess deeply buried archaeological resources and/or the extent of disturbance; and

- Mechanical excavations using a backhoe with a straight-edged ditching bucket are to occur within the core of the planned development area and over any areas of archaeological potential.

3) As per Section 2.1.7 Standard 4 of the Standards and Guidelines for Consultant Archaeologists, if other techniques have not made a conclusive determination regarding the presence of deeply buried archaeological resources expected as a result of the Stage 1 evaluation, on-site monitoring by a licensed archaeologist of excavation and the removal of fill will be required:

- On-site archaeological monitoring where and when construction excavation in areas where archaeological sites are predicted to exist, or where it is extending to a depth that warrants concern;

- Preparation of an archaeological contingency plan with the proponent and construction personnel outlining appropriate procedures and time requirements should deeply buried archaeological resources/sites be exposed;

- If an archaeological site or material possessing cultural heritage value or interest is uncovered or affected, construction and monitoring activities must cease in that location and further archaeological work is required.

4) It should be noted that special consideration and recommendations must be made for land within 10 m of the Jones Avenue Cemetery, the Old Presbyterian Burying Ground (Duchess Street Burial Ground) and the Ridout Family burying ground. While there currently is a fence around the Jones Avenue Cemetery, we were unable to confirm at this time whether or not the fence represents the original fenced limits and, therefore, if all of the burials associated with this cemetery are included within its boundaries (Figure 21). Further research will be required to confirm if this is the case.

The limits of the Old Presbyterian Burying Ground (Duchess Street Burial Ground) are largely unknown (TLA 2018). A previous archaeological assessment conducted on the property for basement renovations in 2016 resulted in the recovery of human remains (Figure 22). Given the early-19th century establishment of the cemetery and the lack of burial registries, and lack of documentation regarding the exact number of remains within the property, the limits of the cemetery remain unknown. Therefore, a high probability exists that unmarked graves and associated shafts may be present around or within existing buildings that had been constructed after 1884. It has not been confirmed if remains are located within the adjacent buildings on the same parcel, therefore further work will be required to determine the extent of disturbance.

The limits of the Ridout Family Burying Ground are relatively unknown, with the exception of Boulton's 1858 map (Plate 2). No other records or maps could be located for reference. While the city block has been extensively developed, given the lack of records for the location of the burials there is a high potential to encounter burials within areas not proven to be intensively disturbed (Figure 23).

5) There are no planned impacts for the above cemetery and burial ground properties, however, should construction impacts be planned within the 10 m buffer of the Jones Avenue Cemetery, and the research proves the boundaries to be unclear, and the Old Presbyterian Burying Ground (Duchess Street Burial Ground) and the Ridout Family burying ground, after the completion of any necessary Stage 2 archaeological assessment, a Stage 3 Cemetery Investigation be carried out to determine if burials associated with the cemetery and burial grounds extend beyond the currently defined boundaries into areas proposed to be impacted by the project. Recommendations for the Stage 3 Cemetery Investigation are as follows:

- Upon completion of detail design, and prior to any construction, all portions of the OLS study area that fall within the 10 m buffer adjacent to the currently defined boundaries of the Jones Avenue Cemetery (if the boundaries are proven to be unclear and unverifiable in the field) (Figure 21), the Old Presbyterian Burying Ground (Duchess Street Burial Ground) (Figure 22) and the Ridout Family Burying Ground (Figure 23) must be subject to Stage 3 cemetery investigation involving mechanical topsoil removal as per Section 4.2.3 of the Standards and Guidelines for Consultant Archaeologists (Ontario Government 2011) for areas with existing topsoil and the mechanical, or the mechanical removal of hard surfaces or fill as per Section 3.3.3 of the Standards and Guidelines for Consultant Archaeologists (Ontario Government 2011) to expose undisturbed topsoil or subsoil for paved areas or those with disturbed overburden to expose subsoil in order to determine if human burials extend into the project area. The investigation should take place moving towards the estimated limits of the cemetery/burial ground;

- The area subject to mechanical topsoil removal for the Old Presbyterian Burying Ground (Duchess Street Burial Ground) is to include all land from the edge of the existing building footprints at 32, 35, and 41 Britain Street as well as a 10 m buffer within the Britain Street, Richmond Street East, and Stonecutters Lane ROW's (Figure 22);

- Given the location of the cemetery and burial grounds are within an urban setting, it is likely that urban road infrastructure will be encountered within the 10 m buffer area of the inferred cemetery boundaries. Should modern infrastructure be encountered, the fieldwork strategy may be re-evaluated to include construction monitoring to confirm that the disturbed area lacks archaeological potential and burials to determine if it is necessary to continue to complete the entire 10 m buffer by Section 4.2.3 or, if appropriate, Section 3.3.3 of the Standards and Guidelines for Consultant Archaeologists (Ontario Government 2011).

- As the limits of the burial grounds are unclear, an Investigation Authorization from the Bereavement Authority of Ontario will be required prior to any Stage 2 fieldwork and Stage 3 cemetery investigations. If further research demonstrates that the Jones Avenue Cemetery's boundaries are unclear, an Investigation Authorization will also be required;

- The results and effectiveness of this assessment strategy to mitigate the risk of impacts to potential burials or shafts must be reported to the MHSTCI as part of a Stage 3 cemetery investigation;

- Should archaeological resources, including deeply buried archaeological resources not associated with the cemetery be discovered, additional archaeological assessment may be required); and,

- If human remains are encountered during construction, work must cease immediately, the police or Regional Coroner should be contacted, and the Registrar of Cemeteries with the Bereavement Authority of Ontario.

6) Special consideration should also be made for the National Historic Sites located within the study area. Given the level of cultural heritage value and interest of these resources, these areas must be avoided by all construction related activities.

7) Three registered archaeological sites exist within the OLS study area limits that require further work, including the Parliament site (AjGu-41) (Williamson 2000), Lime Kiln Works site (AjGu-64) (Archeoworks Inc 2009), Britain St. site (AjGu-94) (TLA 2018). The registered archaeological sites within the study area

which still retain cultural heritage value or interest should be subject to further archaeological assessment by a licensed consultant archaeologist, in accordance with the previous consultants' recommendations outlined in Section 1.3.3 of this report and the Standards and Guidelines for Consultant Archaeologists (Ontario Government 2011) prior to any ground disturbing activities.

8) Areas identified in the Waterfront Toronto Archaeological Conservation and Management Strategy (ASI 2008b) as having deeply buried archaeological potential include the Don Breakwater (LDP-1), the Toronto Dry Dock (LDP-3), the City Corporation Wharf (EB-4), the Gooderham and Worts Distillery Complex National Historic Site (WD-19), and the Gooderham & Worts Distillery Wharves (WD-20) (Figure 18). These features are believed to be located at a depth of approximately 76 m ASL (ASI 2017) and will require Stage 2 monitoring if construction disturbance should reach this depth. Stage 2 monitoring of these areas would need be conducted as per Section 2.1.7, Standard 4; Survey in Deeply Buried Conditions (Ontario Government 2011).

9) It is possible that Stage 2 archaeological assessments could be reduced in segments where proposed impacts during construction include deep tunnelling activities. Consultation with the MHSTCI will be required for the communication of additional information and detail design documentation should this approach be contemplated.

10) Despite best efforts and due diligence, no archaeological assessment can necessarily account for all potential archaeological resources. Should deeply buried archaeological resources be identified during ground disturbance activities associated with future development of the project, ground disturbance activities should be immediately halted, and a licensed archaeologist should be notified.

11) It should be noted that the OLS study area in this report is extremely large and includes land that will not be subject to ground disturbing activities during construction of the OLS infrastructure. As such, once detail design is complete and the scope of surface/above grade versus below grade construction activities has been determined, only those areas that will be affected by this project will require further Stage 2 archaeological assessment.

12) Should additional land outside of the current OLS alignment study area boundaries be included as part of the Project, the standard requirements for archaeological assessments to be conducted prior to land disturbance remain in place.

Based on the information contained in the report, the ministry is satisfied that the fieldwork and reporting for the archaeological assessment are consistent with the ministry's 2011 *Standards and Guidelines for Consultant Archaeologists* and the terms and conditions for archaeological licences. This report has been entered into the Ontario Public Register of Archaeological Reports. Please note that the ministry makes no representation or warranty as to the completeness, accuracy or quality of reports in the register.

Should you require any further information regarding this matter, please feel free to contact me.

Sincerely,

Wai Hadlari  
Archaeology Review Officer

Crystal,

Attached please find compiled City comments on the following reports:

- Corktown Station Early Works Report
- Corktown Station Natural Environment Report
- Corktown Station Air Quality Report
- Corktown Station Heritage Detailed Design Report
- Corktown Station Traffic and Transportation Report
- Corktown Station Early Works Noise and Vibration Report

Could you please let us know when we can expect to receive responses (1/2/3 plus details) to our comments, and a timeline for the finalized report?

We look forward to seeing how this feedback will be incorporated into the ongoing discussions regarding the Corktown Station and First Parliament Site.

If you have any questions or concerns, please feel free to contact me.

Regards,

Julia Murnaghan  
Senior Project Manager, Transit Expansion Office

| 1                           | Heritage Planning - Archaeology | Archaeological Resources          | Early Works Report (EWR) - p. ix: Archaeological Resources                         | This revised property boundary includes three archaeological sites: The Parliament Site (AjGu-41), the Toronto Lime Kiln Works Site (AjGu-61), and the Lime Kiln Works Site (AjGu-64). Each of these sites are identified as Archaeologically Sensitive Areas on the City of Toronto's Archaeological Management Plan and require mitigation or in-situ preservation prior to any soil disturbance. Additionally, the property at 250 Front Street East has further archaeological conditions which require Stage 2 archaeological assessment after demolition of the building. Revise to include this information. |                                                                                                                           |

| 6  | Heritage Planning - Archaeology | Archaeological Impacts   | EWR/HDDR Table ES-2 (EWR p. xxi-xxii) | <p>Under the description of "Direct Impacts to Built Heritage Resources and Cultural Heritage Landscapes" the table notes that there is the "Potential to remove or demolish deeply buried archaeological remains as a result of removal/Demolition of a building or structure on the property and/or any ground disturbance is anticipated at OLS-034 (First Parliament Site - 265 and 271 Front Street East and 25 Berkeley Street)."</p> <p>1. Revise to include the properties north of Front Street (250-260 Front Street East, 383 King Street East, 68-70 Parliament Street).</p> <p>2. Include in Mitigation Measures that the work shall be subject to review and approval from City of Toronto Heritage Planning as well as ongoing consultation with the City of Toronto and other stakeholders and Indigenous Communities.</p> <p>3. Revise to include that archaeological assessment must also be conducted within any appropriate structures prior to demolition. The properties at 265-271 Front Street East are built on grade and previous archaeological assessments have recommended further work <u>inside</u> these structures.</p> |  |
| 7  | Heritage Planning - Archaeology | Municipal Permits        | EWR p. xxvii<br>HDDR - Section ES.5   | Under the Municipal Permits section, include that these works may be subject to Heritage Easement agreements, as required.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |  |
| 8  | Heritage Planning - Archaeology | Municipal Permits        | EWR p. xxvii<br>HDDR - Section ES.5   | Under the Municipal Permits section, revise to include the properties at 54 Parliament Street, 68-70 Parliament Street and 250-260 Front Street East, 39 Berkeley Street and 383 King Street East.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |  |
| 9  | Heritage Planning - Archaeology | Archaeological reports   | EWR - Section 4.8.1, p. 40            | This report references the Stage 1 Archaeological Assessment of the Ontario Line South, dated July 24, 2020. The City have only received an earlier version of this report (May 29, 2020). We request that this report be provided to Heritage Planning as well as the concurrence letter from the MHSTCI stating that this report is compliant with the Standards and Guidelines for Consultant Archaeologists and has been entered into the Public Register.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |  |
| 10 | Heritage Planning - Archaeology | Archaeological reports   | EWR - Section. 5.8, p. 123            | The City of Toronto notes that the Stage 1 Archaeological Assessment Report (AECOM 2020) is missing reference to the Stage 1 Archaeological Assessment of 250-260 Front Street East and 383 King Street East. (Archeoworks 2017 - P029-0961-2017). Include this report in this section and acknowledge outstanding archaeological concerns.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |  |
| 11 | Heritage Planning - Archaeology | Archaeological Resources | EWR - Table 6-7, p. 165               | In Table 2-1 of the Ontario Line Corktown Station Early Works – Heritage Detailed Design Report, several other activities are identified as part of the Early Works which could impact the archaeological resources at OLS-034 beyond building demolition. This includes site preparation, staging, re-grading, tree removal, removal of contaminated soil, utilities decommissioning, and erection of fences. These issues need to be addressed as it relates to the impacts to archaeological resources on this site.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |  |
| 12 | Heritage Planning - Archaeology | Archaeological Resources | EWR - Table 6-7, p. 165               | Under Potential Impact, it is noted that Options 2A and 2B from the Ontario Line Cultural Heritage Report (AECOM 2020) were reviewed and eliminated. Heritage Planning requests further information about why options 2A and 2B were eliminated during project design. These options gave preference to avoidance and protection of heritage attributes, which is also the preference of Heritage Planning.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |  |
| 13 | Heritage Planning - Archaeology | Archaeological Resources | EWR - Table 6-7, p. 165               | Under Mitigation Measures, revise to include consultation with Heritage Planning and other stakeholders as to the appropriate approach to archaeological assessment in advance of Early Works                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |  |
| 14 | Heritage Planning - Archaeology | Archaeological Resources | Section 6.8; Table 6-8                | Revise this section and table to include preservation in-situ of significant archaeological resources as a potential mitigation measure. This is the preference of Heritage Planning and the Ministry of Heritage, Sport, Tourism and Culture Industries, as outlined in the City of Toronto's Official Plan and the Standards and Guidelines for Consultant Archaeologists.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |  |
| 15 | Heritage Planning - Archaeology | Archaeological Resources | Section 6.8; Table 6-8                | This section shall also include a description of the Toronto Lime Kilns Works Site (AjGu-61/AjGu-64) and ongoing archaeological conditions on the properties north of Front Street East (see earlier comment).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |  |

|    |                                 |                                    |                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |  |
|----|---------------------------------|------------------------------------|-----------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| 16 | Heritage Planning - Archaeology | Archaeological Resources           | EWR - Table 6-8, p. 173                                   | <p>Include references to the City of Toronto's Official Plan and the Terms of Reference for Archaeological Assessments as relevant policy in addition to the Standards and Guidelines.</p> <p>Include a statement that any archaeological assessments, including the formulation of Stage 3 and Stage 4 mitigation programs and Construction Monitoring programs shall be subject to review and approval by the City of Toronto Heritage Planning.</p>                                                                                                                                                                                                           |  |
| 17 | Heritage Planning               | HDDR Report                        | HDDR Report, general                                      | <p>Provide additional detail on cultural heritage resources impacted as per the standard scope and methodology of CHER/HIA reports completed during EA processes. If we understand correctly, the Heritage Detailed Design Report (HDDR) document is intended to replace the individual Cultural Heritage Evaluation Reports (CHER) and Heritage Impact Assessments (HIAs) that would typically be completed for each cultural heritage resource that may be impacted: as such the level of detail provided in the document is insufficient to determine the cultural heritage value of these identified resources, and to understand the potential impacts.</p> |  |
| 18 | Heritage Planning               | HDDR Report and Early Works Report | HDDR Report, Table ES-2 and Early Works Report, Table 6-7 | <p>The HDDR and Early Works Reports both identify the property at "2 Berkeley Street, 248, 250, 252, 25, 258, 260, 262, 264 The Esplanade" as a built heritage resource that is Designated under Part IV and V of the Ontario Heritage Act and covered by a Heritage Easement Agreement (HEA) within the study area. This resource is missing from the Impact and Description Tables in both the HDDR Report (Table ES-2) and Early Works Report (Table 6-7) and must be included to evaluate potential impacts and mitigation measures.</p>                                                                                                                     |  |
| 19 | Heritage Planning               | HDDR Report and Early Works Report | HDDR Report, Table 3-1 and Early Works Report, Table 5-13 | <p>The bullet-point information provided in the tables with Description of Known or Potential Cultural Heritage Value or Interest and Heritage Attributes provided in both the HDDR (Table 3-1) and Early Works Report (Table 5-13) do not provide an adequate evaluation of the properties under Ontario Regulations 9/06 or 10/6 as required of a CHER (for which, along with an HIA, the HDDR is said to serve in their place), nor does it cite sources for any of the research in these descriptions.</p>                                                                                                                                                   |  |
| 20 | Heritage Planning               | HDDR Report and Early Works Report | HDDR Report, Table 3-1 and Early Works Report, Table 5-14 | <p>Three built heritage resources were determined to potentially meet Ontario Regulation 10/06 criteria: however, their evaluation using the 10/06 criteria is not documented for any of the resources within these Reports.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |
| 21 | City Planning                   | Early Works Report                 | EWR, Section 5.6.2.2                                      | <p>Clarify how it was determined that "there are no planned community services or facilities" in the Corktown Station area. We note that the First Parliament site, for example, includes plans for a new district library and heritage interpretation centre (contact: SoMei Quan, CreateTO). We further note that improvements to parks and recreation facilities include the reconstruction of David Crombie Park along The Esplanade (contact: Nancy Chater, Parks Forestry &amp; Recreation). The data sources used to populate this section of the EWR appear to be insufficient to capture planned community services and facilities.</p>                 |  |
| 22 | City Planning                   | Early Works Report                 | EWR, Table 5-19                                           | <p>Update service headways for transit routes to reflect the planned service provision. The 504 King streetcar, for example, operates at 2-3 minute headways during peak hours. The source for this data should be the TTC service summaries before Covid-19, which can be requested from the TTC.</p>                                                                                                                                                                                                                                                                                                                                                           |  |
| 23 | City Planning                   | Early Works Report                 | EWR, Figure 5-20                                          | <p>Include planned cycling facilities that will be in place when construction on the Ontario Line is anticipated to begin. For example, a cycle track is planned for the Esplanade and Mill Street, which will be constructed in 2021 and 2022. Transportation Services (Adam Popper) and Engineering &amp; Construction Services (Owen McGaughey) should be consulted to provide additional information on the implementation of this facility.</p>                                                                                                                                                                                                             |  |

|    |               |                                                         |                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |  |

| 24 | City Planning | Early Works Report                                      | EWR, Table 6-6                                  | Regarding land uses and adjacent lands, confirm whether there are potential impacts to adjacent land development projects, or impacts to the early works from development on adjacent lands. We note, for example, that a data centre with zoning approval may be constructed at 43 Parliament Street, which may involve work zone lane closures. Other development applications that may be under construction during the Corktown early works is documented in Section 5.6.4. Coordination is required with Transportation Services to understand the full extent of planned and approved lane closures.                                                               |  |
| 25 | City Planning | Early Works Report                                      | EWR, Table 6-6                                  | Regarding visual effects from construction activities, provide additional detail about screened enclosures (such as hoarding) that Metrolinx is committed to using at construction sites. Improvements to screening should be included compared to the fencing that was provided on the ECLRT, which did little to mitigate the visual impacts of construction. With regard to private development projects (e.g. condominium or office tower construction), the City has achieved higher standards for the quality of hoarding provided at these sites. Lessons learned from projects like ECLRT should be applied to the Ontario Line to improve temporary conditions. |  |
| 26 | City Planning | Early Works Report                                      | EWR, Table 6-9                                  | For active transportation impacts, a Vision Zero perspective should be applied to protect vulnerable road users from injuries and fatalities during construction. Table 5-5 identified several pedestrian and cycling facilities that already provide low levels of service in the existing condition (without considering pedestrian and cyclist volumes, which the Ottawa MMLOS does not account for). Poor levels of service may be exacerbated with construction occurring immediately adjacent to the facility. Identify mitigation measures - e.g. provision of minimum sidewalk widths, minimum pedestrian levels of service.                                     |  |
| 27 | City Planning | Early Works Report                                      | EWR, Section 8.8                                | Commitments to future consultation should include the City on matters (among other things) related to impacts on development and transportation within the area of the project's influence, and the detailed design of restoration of impacted areas to the current City standard. We note that government review agencies and technical stakeholders are included in the list of stakeholders consulted in Section 8.1.                                                                                                                                                                                                                                                 |  |
| 28 | City Planning | Early Works Report, Traffic and Transportation Appendix | Traffic and Transportation EWR, Section 2.1.2.2 | We note that the City of Ottawa's Multi-Modal Level of Service tool used in this analysis does not include pedestrian volumes in determining a pedestrian level of service, relying instead on qualitative characteristics of a pedestrian facility and its adjacency to other facilities. This may provide a misleading indicator of the quality of a pedestrian facility where pedestrian volumes are high, which is the case at times around the Corktown Station area especially during special events at the Distillery District.                                                                                                                                   |  |

| Review Comments Spreadsheet            |               |                                |                                                               | * Actions:                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | ** Status:                                                                                           |

| 1                                   | ECS-BSE       | Gardiner Rehabilitation Timeline | Section 2.2.3.2, Page 17.              | <p>The information under Section 2.2.3.2 appears to be outdated. The schedule has been revised and currently Segment 6 is from Cherry to Don Roadway from 2026 to 2029. Waterfront Toronto is completing the work from Don roadway to Logan in 2021 and 2022. Please ensure that the Gardiner Expressway Strategic Rehabilitation Plan segments and the respective construction timeline information is up to date prior to the issuance of the Report.</p> <p>2.2.3.2 Gardiner Expressway Strategic Rehabilitation Plan</p> <p>The City of Toronto developed the Gardiner Expressway Strategic Rehabilitation Plan to establish the immediate and long-term rehabilitation needs of the Gardiner Expressway, improve transportation corridors within the area, and provide more efficient public transit connections (City of Toronto, n.d.c). The rehabilitation is being completed in seven sections, two of which are within the Corktown Station Study Area.</p> <ul style="list-style-type: none"> <li>Segment 1 between Jarvis Street and Cherry Street with a projected timeline of planned construction <b>between 2018 and 2021</b> (City of Toronto, n.d.c); and</li> <li>Segment 6 between Lower Jarvis Street and east of the Don Valley Parkway at Logan Avenue with a projected timeline of planned construction <b>between 2024 and 2027</b> (City of Toronto, n.d.c).</li> </ul> <p>The City of Toronto's website notes that the planned construction timelines are subject to change (City of Toronto, n.d.c).</p> |                                                                                                      |
| 2                                   | ECS-BSE       | Gardiner Rehabilitation Timeline | Section 3.2, Page 20.                  | <p>The dash red line (footprint as defined under Section 3.2 above) and shown in Figure 3-2 includes a segment of the Gardiner Expressway. Please elaborate what impacts are anticipated on the Gardiner Expressway and how they are affecting the structure and its operations as a result of the Corktown Early Works?</p> <p><b>3.2 Early Works Project Footprint and Study Area</b></p> <p>The Corktown Station Early Works Project Footprint, shown in Figure 3-1, is defined as the area of direct disturbance associated with the early works activities. The site is bound by King Street East to the north, Parliament Street to the East, Berkeley Street to the West and Parliament Square Park to the south.</p> <p>The Corktown Station Study Area, shown in Figure 3-2, includes the Corktown Station Early Works Project Footprint <b>and a 500 metre buffer</b> which was identified for assessment of potential impacts of the Corktown Station early works. As shown in Table 4-1, select discipline-specific study areas were identified for assessment of the discipline-specific potential impacts of the Corktown Station early works.</p>                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                      |

Hi Julia,

I just wanted to follow up on the City’s comments on the initial draft of the Corktown Station Early Works Report. Let me know if the City has any comments on the report and when we can expect to receive them.

Thanks,

**Crystal Ho**

Good afternoon,

Please see the Corktown Station Early Works Noise and Vibration Report along with the comment tracking sheet uploaded here for your review: [REDACTED]

We would appreciate if you could provide your comments using the comment tracking sheet by April 9, 2021.

Please do not hesitate to contact us if you have any questions.

Thank-you,

**Crystal Ho**

Subject: Corktown Station Early Works Report

Good afternoon Julia,

As part of the Ontario Line Project, the Corktown Station site has been identified for launching tunnel excavation equipment for the downtown and Don Yard alignment segments for the Ontario Line, as well as the location of the Corktown Station. Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These activities will enable completion of environmental due diligence investigations, including archaeological assessments. Further information on Corktown Station early works and an update on the Ontario Line environmental process is provided in the letter attached and in the Corktown Station Early Works Report linked below.

Please find the initial drafts of the Corktown Station Early Works Report and corresponding comment tracking sheet uploaded to the following link for your review: [REDACTED]

The link includes the following reports:  
Corktown Station Early Works Report;  
Corktown Station Natural Environment Report;  
Corktown Station Air Quality Report;  
Corktown Station Heritage Detailed Design Report; and  
Corktown Station Traffic and Transportation Report.

As noted in the letter, we would appreciate if you could provide your comments using the comment tracking sheet by April 9, 2021.

If you have any questions or concerns, please do not hesitate to contact us.

**Crystal Ho**

Subject: Corktown Station Early Works Report

Good afternoon Richard,

As part of the Ontario Line Project, the Corktown Station site has been identified for launching tunnel excavation equipment for the downtown and Don Yard alignment segments for the Ontario Line, as well as the location of the Corktown Station. Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These activities will enable completion of environmental due diligence investigations, including archaeological assessments. Further information on Corktown Station early works and an update on the Ontario Line environmental process is provided in the letter attached and in the Corktown Station Early Works Report linked below.

Please find the initial drafts of the Corktown Station Early Works Report and corresponding comment tracking sheet uploaded to the following link for your review: [REDACTED]

The link includes the following reports:  
Corktown Station Early Works Report;  
Corktown Station Natural Environment Report;  
Corktown Station Air Quality Report;  
Corktown Station Heritage Detailed Design Report; and  
Corktown Station Traffic and Transportation Report.

As noted in the letter, we would appreciate if you could provide your comments using the comment tracking sheet by April 9, 2021.

If you have any questions or concerns, please do not hesitate to contact us.

---

Good afternoon,

The Notice of Draft Corktown Station Early Works Report (EWR) for the Ontario Line Project has been published on May 12, 2021. The Draft EWR is available on the project website at [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline). The public review period begins May 12, 2021 and will continue until June 11, 2021. Attached for your reference is the Notice of Publication of Draft Corktown Station EWR, as well as a covering letter. Please do not hesitate to contact us if you have any questions.

Thanks,

**Crystal Ho**

**Subject: Ontario Line - Notice of Publication of Draft Corktown Station Early Works Report**

Dear Tomasz Oltarzewski,

The Ontario Line will bring 15.6 kilometres of new subway service to Toronto to make it faster and easier for people to get where they need to be each day. The line will stretch from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line is proposed to include 15 stations, including six interchange stations, and connections to three GO train lines, two existing subway lines, the Eglinton Crosstown LRT, and streetcar lines. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable commutes.

**Draft Corktown Station Early Works Report**

Ontario Line early works are components of the Ontario Line Project that are proposed to proceed before the completion of the Ontario Line environmental impact assessment report process. Early works are defined in O. Reg. 341/20 as follows:

“any components of the Ontario Line Project that Metrolinx proposes to proceed with before the completion of the Ontario Line assessment process, such as station construction, rail corridor expansion, utility relocation or bridge replacement or expansion.”

Metrolinx finalized the Exhibition Station Early Works Report in February 2021 and is now proceeding with an Early Works Report for the early works at Corktown Station. Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These early works are being advanced to prepare the site for future construction staging and laydown to support tunneling and below ground construction activities, and work associated with the future Corktown Station.

The First Parliament site, located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail) and remnants of early Toronto industry may be found here. Metrolinx is eager to unlock the potential of the site and work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

Environmental impacts of Corktown Station early works are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the

20 Bay St, Suite 600      416.874.5900  
Toronto, ON M5J 2W3      metrolinx.com

Environmental Assessment Act. Metrolinx has now incorporated comments and feedback from the initial round of engagement with Indigenous Nations and agencies on the initial draft of the Corktown Station EWR into the Draft EWR. In accordance with Section 8 of O. Reg. 341/20, Metrolinx has prepared the Draft Corktown Station Early Works Report (EWR) that is now available for public review.

The Draft EWR documents the assessment of Corktown Station early works. The report outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures and a consultation record.

Effective **May 12, 2021**, the Draft Corktown Station EWR will be available for review on the Project webpage ([www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)). Those who wish to provide comments on the Draft EWR must do so by **June 11, 2021**.

Please find attached the **Notice of Publication of Draft Corktown Station EWR** which provides further information, including a description of the process for submitting comments.

If you have any questions or concerns, please do not hesitate to contact the Project Team at [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com).

Sincerely,

A handwritten signature in black ink, appearing to read 'Maria Zintchenko', with a stylized flourish at the end.

## Notice of Publication of Draft Corktown Station Early Works Report

### Ontario Line Project

#### The Project

The Ontario Line will bring 15.6 kilometres of new subway service to Toronto to make it faster and easier for people to get where they need to be each day. The line will stretch across the city, from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line is proposed to include 15 potential stations, including six interchange stations, and connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 of its stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable commutes.

#### Corktown Station Early Works

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These early works are being advanced to prepare the site for future construction staging and laydown to support tunneling and below ground construction activities, and work associated with the future Corktown Station.

The First Parliament site, located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail), and remnants of early Toronto industry may be found here.

Metrolinx is eager to unlock the potential of the site and work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

Environmental impacts of Corktown Station early works are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*. In accordance with Section 8 of O. Reg. 341/20, Metrolinx has prepared the Draft Corktown Station Early Works Report (EWR) that is now available for public review.

The Draft EWR documents the assessment of Corktown Station early works. The report outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures and a consultation record.

### **The Draft Early Works Report Review and Consultation Process**

Effective **May 12, 2021**, the Draft Corktown Station EWR will be available for review on the project webpage ([www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)).

As we temporarily shift to virtual open houses, please join us online from **May 12 to June 11, 2021** to find out more about and provide your feedback on the Draft Corktown Station EWR via the webpage form.

Those who wish to provide comments on the Draft Corktown Station EWR must do so by **June 11, 2021** and submit them using the webpage form or address them to the following email: [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com).

Section 10 of O. Reg. 341/20 requires Metrolinx to establish an issues resolution process to attempt to resolve any concerns raised by the public or Indigenous Nations during the review period. At the end of the review period, Metrolinx will update the Draft Corktown Station EWR by adding a description of the issues resolution process, what Metrolinx did to address any concerns, and if the early works implementation timeline will be impacted as a result of addressing concerns. Metrolinx will then publish the Final Corktown Station EWR on the project webpage: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline) and issue a Notice of Publication of Final Corktown Station EWR.

To obtain a copy of the Draft Corktown Station EWR, please contact the project email listed above.

**Josh Vandezande (T: 416-202-5100, E: [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com)) may be contacted on behalf of Metrolinx.**

| 1                           | Anita Cook<br>Executive Manager, Real Estate & Leasing | Socio-Economic      | EWR                                    | Socio-Economic<br>• Student safety is a critical component in any large infrastructure project where active long-term construction is in proximity to a school, notably the demolition of existing buildings and open pit locations for tunnelling machines/open cut construction for the future Corktown Station<br>• The two TDSB schools identified by Metrolinx to be impacted by this project have a combined capacity of over 600 students, with the majority of the students walking or using public transit on a daily basis to and from the schools plus numerous school bus drop-off and pick-ups daily<br>• Potential relocation of existing bus stops that service these schools, either permanently or during the construction period, will impact TDSB students and employees | Safety of all right-of-way users, including pedestrians, cyclists and drivers is of the utmost importance to Metrolinx. Measures such as including safety precautions for nearby schools (e.g., having school crossing guards at nearby intersections), implementing flagging where construction vehicles are present, and using fencing and hoarding are included under the Traffic and Transportation section of the Early Works Report. Mitigation measures for potential traffic and transportation impacts associated with the construction of the future Corktown Station and tunneling will be included in the forthcoming Environmental Impact Assessment Report.<br><br>At this time impacts to the surface transit network (i.e. bus and streetcar) including relocation of existing bus stops that service these schools and sidewalks within the Corktown Station Study Area are not anticipated. A traffic management and control plan will be developed prior to Corktown Station early works commencement.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 2                           | Anita Cook<br>Executive Manager, Real Estate & Leasing | Traffic             | EWR                                    | Traffic:<br>• Increased traffic congestion surrounding Market Lane PS and Inglenook Community School will impact ability to commute and increase travel time delays for the students and TDSB employees<br>• Significant safety risks, notably the students walking to school, will exist due to increased traffic congestion                                                                                                                                                                                                                                                                                                                                                                                                                                                               | Traffic congestion and travel time delays will be considered as part of the traffic impact assessment for the Corktown Station early works, if required, as project planning and design progress. A traffic management and control plan will be developed to mitigate any traffic-related impacts as a result of the early works and TDSB will be engaged.<br><br>Safety of all right-of-way users, including pedestrians, cyclists and drivers is of the utmost importance to Metrolinx. Measures such as including safety precautions for nearby schools (e.g., having school crossing guards at nearby intersections), implementing flagging where construction vehicles are present, and using fencing and hoarding are included under the Traffic and Transportation section of the Early Works Report.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 3                           | Anita Cook<br>Executive Manager, Real Estate & Leasing | Air Quality         | EWR                                    | Air Quality<br>• Market Lane PS located at 246 The Esplanade is identified in the report as a Critical Receptor (CR) within the Corktown Station Air Quality Study Area, approximately 100 to 300 metres southwest from the Project Footprint<br>• Use of heavy machinery and large-scale construction methods such as digging, concrete pours, dump trucks will significantly impact pollution levels. Students may need to stay inside and not open windows during long periods of this construction phase<br>• Inability to play during outdoor periods due to high level of pollution around David Crombie Park<br>• Increased traffic congestion will impact pollution levels for the student community and TDSB employees                                                             | Extensive prolonged usage of heavy machinery is not anticipated for the Corktown Station early works. These early works mainly involve the demolition of the existing buildings on the project site which is not a long-term activity. Potential impacts to air quality associated with the Corktown Station early works will be temporary and will be addressed through a plan to manage air quality, to be developed as project planning progresses and prior to construction commencement. Air quality limits will be established to reflect provincial air quality criteria and federal air quality standards, and continuous monitoring will be undertaken to ensure these limits are not exceeded. Further details including mitigation measures and monitoring activities are provided in the Air Quality Early Works Report.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| 4                           | Anita Cook<br>Executive Manager, Real Estate & Leasing | Noise and Vibration | EWR                                    | Noise and Vibration<br>• Health concerns due to noise/vibration issues<br>• Inability to play during outdoor periods due to high level of noise                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | A noise screening was conducted to determine if receptor-specific noise predictions were required. The noise screening was completed by determining the distances where the day or night time criteria are predicted to be met, assuming all construction equipment in Table 3-1 of the Corktown Station Early Works Report was active, using a conservative approach to determine the screening distance, which assumed flat ground and no shielding or other noise attenuation effects. The screening distances were then used to create screening areas on maps to determine if any possible sensitive receivers were located within the screening areas.<br><br>Inglenook Community School is located outside of the noise and vibration screening area for Corktown Station early works construction. Market Lane PS is located within the night time noise screening area only. Potential noise and vibration impacts at the TDSB schools in the general vicinity (Market Lane PS is the closest to the early works site) are anticipated to be lower than at the representative receptors located in closer proximity to the early works site. Further details of the assessment, including the noise and vibration screening, as well as the mitigation measures and monitoring activities are outlined in the Early Works Noise and Vibration Report (Appendix A3). Note that project-specific construction noise limits will be established and applied and continuous monitoring will be undertaken to ensure these limits are not exceeded. |
| 5                           | Anita Cook<br>Executive Manager, Real Estate & Leasing | Cultural Heritage   | EWR                                    | Cultural Heritage<br>This report outlines that Market Lane Jr/Sr PS at 246 The Esplanade is part of the following study (Schedule B):<br>• OLS-029 – One National Historic Site designated under Part IV of the Ontario Heritage Act, which is a potential Provincial Heritage Property of Provincial significance, and is within a Heritage Conservation District                                                                                                                                                                                                                                                                                                                                                                                                                          | To clarify, Market Lane Jr/Sr Public School is not within OLS-029. Based on the property parcel data, the school is within OLS-037, which designates the Consumer's Gas Co. Station at 26 Berkeley Street. The school is not a heritage attribute of the property and was built after the designation by-law was passed in 1976.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

|   |                                                        |                     |     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

| 6 | Anita Cook<br>Executive Manager, Real Estate & Leasing | Summary of Comments | EWR | <p>TLC is thankful to MX for identifying the forgoing concerns that relate to the Corktown Station EWR that could potentially impact student learning at Market Lane PS and Inglenook Community School. TLC is interested in learning more about specific mitigation matters to be undertaken by MX that may include, but are not limited to, air quality concern mitigation, paid duty officers/site managers to ensure the safety for students during peak hours; additional hoarding (not construction fencing) and other walking safety installations (temporary sidewalks); noise and vibration continual monitoring with test reports, window protections or installation of air conditioning units, requests for specific site work to be completed, if possible, evenings, weekends, non-school days (for example, concrete pours), pre and post construction surveys and on-going monitoring, communication plans, request input to the transportation and construction management plan.</p> <p>The impacted schools have a capacity of over 600 students and any decision regarding TDSB schools must involve discussions with TLC and TDSB to ensure that schools can continue to effectively deliver safety and education programs to students.</p> <p>Due to the proximity of Market Lane PS (within 150m) directly across from the construction site, the aforementioned items of concern, especially student safety, become particularly critical. We request a separate meeting prior to the planning of site activity and commencement of the works between the TLC/TDSB and MX to discuss true mitigation strategies surrounding, noise/vibration, traffic, air quality, and safety mitigation. Please incorporate this request as a formal comment in your Early Works Summary report.</p> <p>Should you have any questions or if MX requires access to the school properties, please contact the writer to make the appropriate arrangements. In addition, please continue to keep TLC posted on project updates and future public webinars. We look forward to a joint meeting well in advance of the site becoming an active construction zone to ensure proper communication and mitigation strategies for student safety at Market Lane Public School.</p> | <p>Thank you for your comments on the Corktown Station Early Works Report. Metrolinx is aware that Market Lane Public School and Inglenook Community School are located within the Corktown Station Study Area. Proposed mitigation measures and monitoring activities related to air quality, traffic and transportation, noise and vibration, and socio-economic impacts are included in the Corktown Station Early Works Report.</p> <p>It is not anticipated that the demolition activites as part of the Corktown Station early works will impact school operations (e.g. school bus drop-off and pick-up) considering the distance that the two schools are located from the Corktown Station project footprint. No large-scale construction is anticipated at this site as the scope of work includes the demolition of surface structures only. Most of the demolition activities will be executed within the property with minor and temporary lane closures immediately adjacent to the structure to be demolished. Demolition works at the Corktown Station early works site will be short-term and are anticipated to last for approximately 2-4 months. Regular (existing) access will be maintained during working hours where feasible and where regular access cannot be maintained, alternative access and signage will be provided.</p> <p>Metrolinx is committed to continuing stakeholder engagement beyond the regulatory requirement set out in Section 10 of Ontario Regulation 341/20 and will continue engaging with Toronto Lands Corporation and Toronto District School Board on Corktown Station early works. We are continuing with project planning to confirm strategies to address potential impacts and will be providing an update when we meet with Toronto Lands Corporation and Toronto District School Board. Mitigation measures to consult directly with Toronto District School Board and Toronto Lands Corporation are already included under the traffic and transportation section of the report. Metrolinx will reach out separately to set up a meeting with Toronto District School Board and Toronto Lands Corporation prior to the commencement of the early works.</p> |

Dear Ms. Ho,

This email is in response to the draft Corktown Station Early Works Report dated May 12, 2021 and represents comments from TDSB/TLC. As always, we remain a partner with Metrolinx on large infrastructure projects such as the Ontario Line project. Please continue to keep me informed on any future developments.

Kind Regards,

**Luciano Rossetti, AACI, P.App**

Dear Ms. Ho:

**Re: Metrolinx Project: Ontario Line - Notice of Draft Corktown Station EWR  
Potential Impacts and Associated Comments to Toronto District School Board Properties**

Metrolinx (MX) has advised Toronto Lands Corporation (TLC) of the Corktown Station Early Works Report (EWR) as part of the proposed Ontario Line project. TLC, as agent and manager of real estate for Toronto District School Board (TDSB), reviews and provides general commentary on the potential impacts of infrastructure projects within 500 metres of a school property in the City of Toronto.

As MX completes the numerous infrastructure projects throughout the City it is always preferred that no TDSB sites are impacted. When these impacts are unavoidable, TLC will work collaboratively with MX and other public agencies to resolve these issues as they occur.

The draft Corktown Station EWR for the Ontario Line, dated May 12, 2021, provided by MX, identifies two TDSB school properties within 500 metres of the proposed Corktown Station Subway Station that will be impacted at various levels.

**Impacted TDSB Schools Within 150 meters:**

- Market Lane Jr and Sr Public School – 246 The Esplanade Student Capacity: 480

**Impacted TDSB Schools Within 500 meters:**

- Inglenook Community School – 19 Sackville Street Student Capacity: 132

Early works for the proposed Corktown Station include demolition of existing buildings (Schedule A), removal of other structures and asphalt where required, decommissioning of utilities, and soil removal/remediation where required. These early works are to prepare the site for future construction staging and laydown to support tunneling and below ground construction activities, and work associated with the future Corktown Station.

TLC has reviewed the draft Corktown Station EWR for the Ontario Line Project and would like to provide the following comments:

**Socio-Economic:**

- Student safety is a critical component in any large infrastructure project where active long-term construction is in proximity to a school, notably the demolition of existing buildings and open pit locations for tunnelling machines/open cut construction for the future Corktown Station
- The two TDSB schools identified by Metrolinx to be impacted by this project have a combined capacity of over 600 students, with the majority of the students walking or using public transit on a daily basis to and from the schools plus numerous school bus drop-off and pick-ups daily
- Potential relocation of existing bus stops that service these schools, either permanently or during the construction period, will impact TDSB students and employees

**Traffic:**

- Increased traffic congestion surrounding Market Lane PS and Inglenook Community School will impact ability to commute and increase travel time delays for the students and TDSB employees
- Significant safety risks, notably the students walking to school, will exist due to increased traffic congestion

**Air Quality:**

- Market Lane PS located at 246 The Esplanade is identified in the report as a Critical Receptor (CR) within the Corktown Station Air Quality Study Area, approximately 100 to 300 metres southwest from the Project Footprint
- Use of heavy machinery and large-scale construction methods such as digging, concrete pours, dump trucks will significantly impact pollution levels. Students may need to stay inside and not open windows during long periods of this construction phase
- Inability to play during outdoor periods due to high level of pollution around David Crombie Park
- Increased traffic congestion will impact pollution levels for the student community and TDSB employees

**Noise and Vibration:**

- Health concerns due to noise/vibration issues
- Inability to play during outdoor periods due to high level of noise

**Stage 1 Archeological:**

- No Comments

**Natural Environmental:**

- No Comments

**Cultural Heritage:**

This report outlines that Market Lane Jr/Sr PS at 246 The Esplanade is part of the following study (Schedule B):

- OLS-029 – One National Historic Site designated under Part IV of the Ontario Heritage Act, which is a potential Provincial Heritage Property of Provincial significance, and is within a Heritage Conservation District

## Summary of Comments:

TLC is thankful to MX for identifying the forgoing concerns that relate to the Corktown Station EWR that could potentially impact student learning at Market Lane PS and Inglenook Community School. TLC is interested in learning more about specific mitigation matters to be undertaken by MX that may include, but are not limited to, air quality concern mitigation, paid duty officers/site managers to ensure the safety for students during peak hours; additional hoarding (not construction fencing) and other walking safety installations (temporary sidewalks); noise and vibration continual monitoring with test reports, window protections or installation of air conditioning units, requests for specific site work to be completed, if possible, evenings, weekends, non-school days (for example, concrete pours), pre and post construction surveys and on-going monitoring, communication plans, request input to the transportation and construction management plan.

The impacted schools have a capacity of over 600 students and any decision regarding TDSB schools must involve discussions with TLC and TDSB to ensure that schools can continue to effectively deliver safety and education programs to students.

Due to the proximity of Market Lane PS (within 150m) directly across from the construction site, the aforementioned items of concern, especially student safety, become particularly critical. We request a separate meeting prior to the planning of site activity and commencement of the works between the TLC/TDSB and MX to discuss true mitigation strategies surrounding, noise/vibration, traffic, air quality, and safety mitigation. Please incorporate this request as a formal comment in your Early Works Summary report.

Should you have any questions or if MX requires access to the school properties, please contact the writer to make the appropriate arrangements. In addition, please continue to keep TLC posted on project updates and future public webinars. We look forward to a joint meeting well in advance of the site becoming an active construction zone to ensure proper communication and mitigation strategies for student safety at Market Lane Public School.

Sincerely,

Anita Cook

Good afternoon,

The Notice of Draft Corktown Station Early Works Report (EWR) for the Ontario Line Project has been published on May 12, 2021. The Draft EWR is available on the project website at [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline). The public review period begins May 12, 2021 and will continue until June 11, 2021. Attached for your reference is the Notice of Publication of Draft Corktown Station EWR, as well as a covering letter. Please do not hesitate to contact us if you have any questions.

Thanks,

**Crystal Ho**

Junior Project Coordinator, Environmental Programs and Assessment  
130 Adelaide St West | Toronto | Ontario | M5H 3P5  
T: 416-202-7109 C: 437-225-6548  
Metrolinx

**Subject: Ontario Line - Notice of Publication of Draft Corktown Station Early Works Report**

Dear Anita Cook,

The Ontario Line will bring 15.6 kilometres of new subway service to Toronto to make it faster and easier for people to get where they need to be each day. The line will stretch from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line is proposed to include 15 stations, including six interchange stations, and connections to three GO train lines, two existing subway lines, the Eglinton Crosstown LRT, and streetcar lines. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable commutes.

**Draft Corktown Station Early Works Report**

Ontario Line early works are components of the Ontario Line Project that are proposed to proceed before the completion of the Ontario Line environmental impact assessment report process. Early works are defined in O. Reg. 341/20 as follows:

“any components of the Ontario Line Project that Metrolinx proposes to proceed with before the completion of the Ontario Line assessment process, such as station construction, rail corridor expansion, utility relocation or bridge replacement or expansion.”

Metrolinx finalized the Exhibition Station Early Works Report in February 2021 and is now proceeding with an Early Works Report for the early works at Corktown Station. Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These early works are being advanced to prepare the site for future construction staging and laydown to support tunneling and below ground construction activities, and work associated with the future Corktown Station.

The First Parliament site, located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail) and remnants of early Toronto industry may be found here. Metrolinx is eager to unlock the potential of the site and work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

Environmental impacts of Corktown Station early works are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the

20 Bay St, Suite 600      416.874.5900  
Toronto, ON M5J 2W3      metrolinx.com

Environmental Assessment Act. Metrolinx has now incorporated comments and feedback from the initial round of engagement with Indigenous Nations and agencies on the initial draft of the Corktown Station EWR into the Draft EWR. In accordance with Section 8 of O. Reg. 341/20, Metrolinx has prepared the Draft Corktown Station Early Works Report (EWR) that is now available for public review.

The Draft EWR documents the assessment of Corktown Station early works. The report outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures and a consultation record.

Effective **May 12, 2021**, the Draft Corktown Station EWR will be available for review on the Project webpage ([www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)). Those who wish to provide comments on the Draft EWR must do so by **June 11, 2021**.

Please find attached the **Notice of Publication of Draft Corktown Station EWR** which provides further information, including a description of the process for submitting comments.

If you have any questions or concerns, please do not hesitate to contact the Project Team at [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com).

Sincerely,

## Notice of Publication of Draft Corktown Station Early Works Report

### Ontario Line Project

#### The Project

The Ontario Line will bring 15.6 kilometres of new subway service to Toronto to make it faster and easier for people to get where they need to be each day. The line will stretch across the city, from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line is proposed to include 15 potential stations, including six interchange stations, and connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 of its stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable commutes.

#### Corktown Station Early Works

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These early works are being advanced to prepare the site for future construction staging and laydown to support tunneling and below ground construction activities, and work associated with the future Corktown Station.

The First Parliament site, located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail), and remnants of early Toronto industry may be found here.

Metrolinx is eager to unlock the potential of the site and work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

Environmental impacts of Corktown Station early works are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*. In accordance with Section 8 of O. Reg. 341/20, Metrolinx has prepared the Draft Corktown Station Early Works Report (EWR) that is now available for public review.

The Draft EWR documents the assessment of Corktown Station early works. The report outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures and a consultation record.

### **The Draft Early Works Report Review and Consultation Process**

Effective **May 12, 2021**, the Draft Corktown Station EWR will be available for review on the project webpage ([www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)).

As we temporarily shift to virtual open houses, please join us online from **May 12 to June 11, 2021** to find out more about and provide your feedback on the Draft Corktown Station EWR via the webpage form.

Those who wish to provide comments on the Draft Corktown Station EWR must do so by **June 11, 2021** and submit them using the webpage form or address them to the following email: [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com).

Section 10 of O. Reg. 341/20 requires Metrolinx to establish an issues resolution process to attempt to resolve any concerns raised by the public or Indigenous Nations during the review period. At the end of the review period, Metrolinx will update the Draft Corktown Station EWR by adding a description of the issues resolution process, what Metrolinx did to address any concerns, and if the early works implementation timeline will be impacted as a result of addressing concerns. Metrolinx will then publish the Final Corktown Station EWR on the project webpage: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline) and issue a Notice of Publication of Final Corktown Station EWR.

To obtain a copy of the Draft Corktown Station EWR, please contact the project email listed above.

**Josh Vandezande (T: 416-202-5100, E: [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com)) may be contacted on behalf of Metrolinx.**

Subject: Corktown Station Early Works Report

Good afternoon,

As part of the Ontario Line Project, the Corktown Station site has been identified for launching tunnel excavation equipment for the downtown and Don Yard alignment segments for the Ontario Line, as well as the location of the Corktown Station. Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These activities will enable completion of environmental due diligence investigations, including archaeological assessments. Further information on Corktown Station early works and an update on the Ontario Line environmental process is provided in the letter attached and in the Corktown Station Early Works Report linked below.

Please find the initial drafts of the Corktown Station Early Works Report and corresponding comment tracking sheet uploaded to the following link for your review: [REDACTED]

The link includes the following reports:

- Corktown Station Early Works Report;
- Corktown Station Natural Environment Report;
- Corktown Station Air Quality Report;
- Corktown Station Heritage Detailed Design Report; and
- Corktown Station Traffic and Transportation Report.

As noted in the letter, we would appreciate if you could provide your comments using the comment tracking sheet by April 9, 2021.

If you have any questions or concerns, please do not hesitate to contact us.

Good afternoon,

Thank you for this update. Please be advised that as per our email on May 13, 2021, TRCA staff are satisfied with the responses provided by Metrolinx on May 6, 2021 addressing TRCA comments provided to Metrolinx on April 7, 2021, regarding the Draft Corktown Station Early Works Report. TRCA staff have no further comments regarding the Corktown Station Early Works Report at this time.

Kind regards,  
Alannah

**Subject: Ontario Line - Notice of Publication of Draft Corktown Station Early Works Report**

Dear Alannah Slattery,

The Ontario Line will bring 15.6 kilometres of new subway service to Toronto to make it faster and easier for people to get where they need to be each day. The line will stretch from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line is proposed to include 15 stations, including six interchange stations, and connections to three GO train lines, two existing subway lines, the Eglinton Crosstown LRT, and streetcar lines. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable commutes.

**Draft Corktown Station Early Works Report**

Ontario Line early works are components of the Ontario Line Project that are proposed to proceed before the completion of the Ontario Line environmental impact assessment report process. Early works are defined in O. Reg. 341/20 as follows:

“any components of the Ontario Line Project that Metrolinx proposes to proceed with before the completion of the Ontario Line assessment process, such as station construction, rail corridor expansion, utility relocation or bridge replacement or expansion.”

Metrolinx finalized the Exhibition Station Early Works Report in February 2021 and is now proceeding with an Early Works Report for the early works at Corktown Station. Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These early works are being advanced to prepare the site for future construction staging and laydown to support tunneling and below ground construction activities, and work associated with the future Corktown Station.

The First Parliament site, located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail) and remnants of early Toronto industry may be found here. Metrolinx is eager to unlock the potential of the site and work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

Environmental impacts of Corktown Station early works are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the

20 Bay St, Suite 600      416.874.5900  
Toronto, ON M5J 2W3      metrolinx.com

Environmental Assessment Act. Metrolinx has now incorporated comments and feedback from the initial round of engagement with Indigenous Nations and agencies on the initial draft of the Corktown Station EWR into the Draft EWR. In accordance with Section 8 of O. Reg. 341/20, Metrolinx has prepared the Draft Corktown Station Early Works Report (EWR) that is now available for public review.

The Draft EWR documents the assessment of Corktown Station early works. The report outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures and a consultation record.

Effective **May 12, 2021**, the Draft Corktown Station EWR will be available for review on the Project webpage ([www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)). Those who wish to provide comments on the Draft EWR must do so by **June 11, 2021**.

Please find attached the **Notice of Publication of Draft Corktown Station EWR** which provides further information, including a description of the process for submitting comments.

If you have any questions or concerns, please do not hesitate to contact the Project Team at [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com).

Sincerely,

A handwritten signature in black ink, appearing to read 'Maria Zintchenko', with a stylized flourish at the end.

## Notice of Publication of Draft Corktown Station Early Works Report

### Ontario Line Project

#### The Project

The Ontario Line will bring 15.6 kilometres of new subway service to Toronto to make it faster and easier for people to get where they need to be each day. The line will stretch across the city, from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line is proposed to include 15 potential stations, including six interchange stations, and connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 of its stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable commutes.

#### Corktown Station Early Works

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These early works are being advanced to prepare the site for future construction staging and laydown to support tunneling and below ground construction activities, and work associated with the future Corktown Station.

The First Parliament site, located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail), and remnants of early Toronto industry may be found here.

Metrolinx is eager to unlock the potential of the site and work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

Environmental impacts of Corktown Station early works are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*. In accordance with Section 8 of O. Reg. 341/20, Metrolinx has prepared the Draft Corktown Station Early Works Report (EWR) that is now available for public review.

The Draft EWR documents the assessment of Corktown Station early works. The report outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures and a consultation record.

### **The Draft Early Works Report Review and Consultation Process**

Effective **May 12, 2021**, the Draft Corktown Station EWR will be available for review on the project webpage ([www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)).

As we temporarily shift to virtual open houses, please join us online from **May 12 to June 11, 2021** to find out more about and provide your feedback on the Draft Corktown Station EWR via the webpage form.

Those who wish to provide comments on the Draft Corktown Station EWR must do so by **June 11, 2021** and submit them using the webpage form or address them to the following email: [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com).

Section 10 of O. Reg. 341/20 requires Metrolinx to establish an issues resolution process to attempt to resolve any concerns raised by the public or Indigenous Nations during the review period. At the end of the review period, Metrolinx will update the Draft Corktown Station EWR by adding a description of the issues resolution process, what Metrolinx did to address any concerns, and if the early works implementation timeline will be impacted as a result of addressing concerns. Metrolinx will then publish the Final Corktown Station EWR on the project webpage: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline) and issue a Notice of Publication of Final Corktown Station EWR.

To obtain a copy of the Draft Corktown Station EWR, please contact the project email listed above.

**Subject:** RE: Ontario Line - Draft Corktown Station Early Works

Good afternoon Alannah,

Thanks for providing your comments on the initial draft of the Corktown Station Early Works Report. For ease of review, we have transferred the comments to an excel document. Please see attached for our responses to your comments. Let me know if there are any outstanding comments following this circulation, otherwise we'd appreciate if your team could document this set as closed off. Thank-you,

Crystal Ho

| 1                           | Alannah Slattery |             | Project Review                                              | The Corktown Station project footprint is not regulated by TRCA, however, other portions of the Ontario Line alignment are located within TRCA regulated areas and it is understood by TRCA staff that these areas will be provided for TRCA review separately. This includes the early works reports for the Lower Don Bridges, East Harbour Station, Lakeshore East Joint Corridor, and the Don Yard.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | Thank you for your comment. That is correct and the Early Works reports for Lower Don Bridges, East Harbour Station, Lakeshore East Joint Corridor and the Don Yard will be provided to TRCA for review.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 2                           | Alannah Slattery |             | Launch Site Alternatives                                    | TRCA staff acknowledge that three site alternatives were evaluated for tunnel excavation launching. These sites include the Corktown Station site, Distillery Lane site and Don Yard, as shown in Figure 1-2. TRCA staff advise that the Don Yard site is in proximity to the West Don Flood Protection Landform, which provides flood protection to approximately 210 hectares of land west of the lower Don River. As the West Don Flood Protection Landform (FPL) cannot be compromised in any way, TRCA looks to avoid the siting of infrastructure on top of, or within, the FPL.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | <p>Thank you for your comment. That is correct, the Corktown Station site has been selected for the Tunnel Boring Machine launch site.</p> <p>The importance of the FPL is understood and the FPL will not be impacted as part of Corktown Station Early Works.</p>                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 3                           | Alannah Slattery |             | Coordination with City of Toronto and work at the Don River | TRCA staff acknowledge that the study area for this project is within the boundary of the Don Mouth Naturalization and Port Lands Flood Protection Project, which was approved by the Minister of the Environment, Conservation and Parks in March 2014. Please ensure that the review of this project is very closely coordinated with the City of Toronto and Waterfront Toronto.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | Thank you for your comment, this project is being reviewed closely with the City of Toronto. The Corktown Station Early Works are not expected to impact the Don Mouth Naturalization and Port Lands Flood Protection Project.                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 4                           | Alannah Slattery |             | Sustainable Infrastructure                                  | <p>Although the Corktown Station project footprint is not within TRCA regulated areas, TRCA has a commenting role through the Transit Project Assessment Process (TPAP). As such, TRCA staff recommends that the design for the proposed project components include mechanisms for water conservation, energy conservation and waste management, such as:</p> <ul style="list-style-type: none"> <li>- Eco-Efficiency: Ensure the facility equipment and operations can minimize energy and water use and</li> <li>- GHG emissions;</li> <li>- Solid Waste Management: Ensure that construction of the facility minimizes the generation of solid waste and;</li> <li>- Stormwater: Ensure that the project minimizes runoff using LID's where appropriate and enhances the urban tree canopy.</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | Comment noted, these elements noted by TRCA will be considered as project planning and design progresses.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 5                           | Alannah Slattery |             | Stormwater Management                                       | <p>As the project area is not regulated by TRCA, the Stormwater Management Review is deferred to the City of Toronto. Within the Early Works Report, Metrolinx has indicated that the stormwater management design will consider guidance provided by the "Low Impact Development Stormwater Management Planning &amp; Design Guide (2010)" (Toronto and Region Conservation Authority/Credit Valley Conservation, 2010), as required.</p> <p>TRCA staff encourage the use of this guide, which acts as a reference/guideline for design of project components, to mitigate stormwater quality and quantity impact. This document has been designed to provide engineers, ecologists and planners with up-to-date information and direction on how to plan and design storm water management facilities that will eventually have relatively low impacts on the environment. The purpose of the guideline is to help ensure the continued health of the streams, rivers, lakes, fisheries and terrestrial habitats in our respective watersheds. Staff recommend that Metrolinx consider incorporating some of these LID design measures into the design of the facility wherever possible. Please refer to the TRCA Sustainable Technologies Evaluation Program website for the report (<a href="http://www.sustainabletechnologies.ca">www.sustainabletechnologies.ca</a>).</p> | <p>Thank you for your comment and for providing details on the guidance documents available. Metrolinx is engaging the City of Toronto on the Corktown Station early works.</p> <p>As Corktown Station early works scope is limited to removal of existing buildings and structures and does not include the construction of the Ontario Line Corktown Station or other new construction, the Low Impact Development Stormwater Management Planning &amp; Design Guide (2010) does not apply and has been removed from Table 6-3. However, the Guide will be considered as part of other Early Works Reports and/or the Environmental Impact Assessment Report development, as applicable.</p> |

Dear Ms. Ho,

**Re: Draft Corktown Station Early Works Report and Natural Environment Early Works Report– Review  
Transit Project Assessment Process (TPAP)  
Metrolinx Ontario Line – between Ontario Science Centre and Ontario Place  
Don River Watershed; City of Toronto**

Toronto and Region Conservation Authority (TRCA) staff received the draft Corktown Station Early Works Report for the above-noted project on March 10, 2021.

#### **PROJECT OVERVIEW**

TRCA staff understands that the Ontario Line Subway Project involves building on the previous TTC Relief Line South concept, by expanding north of Pape Station to the Ontario Science Centre, and west of Osgoode Station to Exhibition/Ontario Place. The proposed project is a new approximately 16 km subway line along a dedicated right-of-way with a combination of elevated, tunneled and at-grade segments.

The Ontario Line Subway Early Works are components of the Ontario Line Subway Project that are proposed to proceed prior to the completion of the Ontario Line environmental assessment process. Early works are defined in *Ontario Regulation 341/20: Ontario Line Project*, under the Environmental Assessment Act, as “any components of the Ontario Line Project that Metrolinx proposes to proceed with before the completion of the Ontario Line assessment process, such as station construction, rail corridor expansion, utility relocation or bridge replacement or expansion”.

TRCA has previously reviewed the Draft Early Works Report (July 2020), and the Draft Exhibition Station Early Works Report (November 2020), as submitted by Metrolinx. TRCA staff understand that further Ontario Line early works reports will be provided by Metrolinx for the Lower Don Bridges, East Harbour Station, Lakeshore East Joint Corridor, and the Don Yard.

On March 10, 2021, Metrolinx provided the Draft Corktown Station Early Works Report and Natural Environment Early Works Report for the Ontario Line Subway Project. It is TRCA’s understanding that the Corktown Station site has been identified as the launch site for tunnel excavation equipment to complete tunnels and underground station spaces for the downtown and Don Yard segments and construction of the Corktown Station. The Corktown Station early works will include launching tunnel excavation equipment,

construction of the Corktown Station, demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. It is our understanding that the Corktown Station works will be completed in a phased approach, proceeding with demolition of existing buildings and structures at the Corktown Station project site as early works.

## **PROJECT REVIEW**

The purpose of the draft Corktown Station Early Works Report is to summarize the local environmental conditions within the Corktown Station project area. It also provides an assessment and evaluation of the impacts that the early works might have on the environment. Based on the potential impacts, a description of mitigation measures and monitoring activities are outlined.

The Corktown Station project footprint is not regulated by TRCA, however, other portions of the Ontario Line alignment are located within TRCA regulated areas and it is understood by TRCA staff that these areas will be provided for TRCA review separately. This includes the early works reports for the Lower Don Bridges, East Harbour Station, Lakeshore East Joint Corridor, and the Don Yard.

## **Launch Site Alternatives**

TRCA staff acknowledge that three site alternatives were evaluated for tunnel excavation launching. These sites include the Corktown Station site, Distillery Lane site and Don Yard, as shown in Figure 1-2. TRCA staff advise that the Don Yard site is in proximity to the West Don Flood Protection Landform, which provides flood protection to approximately 210 hectares of land west of the lower Don River. As the West Don Flood Protection Landform (FPL) cannot be compromised in any way, TRCA looks to avoid the siting of infrastructure on top of, or within, the FPL.

## **Coordination with City of Toronto and work at the Don River**

TRCA staff acknowledge that the study area for this project is within the boundary of the Don Mouth Naturalization and Port Lands Flood Protection Project, which was approved by the Minister of the Environment, Conservation and Parks in March 2014. Please ensure that the review of this project is very closely coordinated with the City of Toronto and Waterfront Toronto.

## **Sustainable Infrastructure**

Although the Corktown Station project footprint is not within TRCA regulated areas, TRCA has a commenting role through the Transit Project Assessment Process (TPAP). As such, TRCA staff recommends that the design for the proposed project components include mechanisms for water conservation, energy conservation and waste management, such as:

- **Eco-Efficiency:** Ensure the facility equipment and operations can minimize energy and water use and GHG emissions;
- **Solid Waste Management:** Ensure that construction of the facility minimizes the generation of solid waste and;
- **Stormwater:** Ensure that the project minimizes runoff using LID's where appropriate and enhances the urban tree canopy.

## **Stormwater Management**

As the project area is not regulated by TRCA, the Stormwater Management Review is deferred to the City of Toronto. Within the Early Works Report, Metrolinx has indicated that the stormwater management design will consider guidance provided by the "Low Impact Development Stormwater Management Planning & Design Guide (2010)" (Toronto and Region Conservation Authority/Credit Valley Conservation, 2010), as required.

TRCA staff encourage the use of this guide, which acts as a reference/guideline for design of project components, to mitigate stormwater quality and quantity impact. This document has been designed to provide engineers, ecologists and planners with up-to-date information and direction on how to plan and design storm water management facilities that will eventually have relatively low impacts on the environment. The purpose of the guideline is to help ensure the continued health of the streams, rivers, lakes, fisheries and terrestrial habitats in our respective watersheds. Staff recommend that Metrolinx consider incorporating some of these LID design measures into the design of the facility wherever possible. Please refer to the TRCA Sustainable Technologies Evaluation Program website for the report ([www.sustainabletechnologies.ca](http://www.sustainabletechnologies.ca)).

## CONCLUSION

TRCA staff have no geotechnical, ecological or hydrogeological comments for the proposed works at this stage, as the project footprint is not regulated by TRCA or within TRCA areas of interest. TRCA staff recommend that the early works for Corktown Station be coordinated with early works for the Lower Don Crossing, to ensure there are no impacts to the West Don Flood Protection Landform, which is located east of the study area.

TRCA as an organization is very supportive of transit development and encourages agencies and municipalities to develop sustainable transportation options in their planning and development of sustainable communities. The TRCA Living City Policies (LCP Section 6.4, 6.7 and 6.8) promotes and advocates the incorporation of sustainable transportation policies, green infrastructure and ecological design into community development and infrastructure building. TRCA staff appreciate the opportunity to review and provide feedback on the Corktown Station Early Works Report.

## NEXT STEPS

TRCA staff look forward to reviewing future Ontario Line early works reports for the Lower Don Bridges, East Harbour Station, Lakeshore East Joint Corridor, and the Don Yard, as they become available.

Should you have any questions or require any additional information please contact me at [alannah.slattery@trca.ca](mailto:alannah.slattery@trca.ca).

**Subject:** Corktown Station Early Works Report

Good afternoon,

As part of the Ontario Line Project, the Corktown Station site has been identified for launching tunnel excavation equipment for the downtown and Don Yard alignment segments for the Ontario Line, as well as the location of the Corktown Station. Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These activities will enable completion of environmental due diligence investigations, including archaeological assessments. Further information on Corktown Station early works and an update on the Ontario Line environmental process is provided in the letter attached and in the Corktown Station Early Works Report linked below.

Please find the initial drafts of the Corktown Station Early Works Report and corresponding comment tracking sheet uploaded to the following link for your review:

Good afternoon,

The Notice of Draft Corktown Station Early Works Report (EWR) for the Ontario Line Project has been published on May 12, 2021. The Draft EWR is available on the project website at [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline). The public review period begins May 12, 2021 and will continue until June 11, 2021. Attached for your reference is the Notice of Publication of Draft Corktown Station EWR, as well as a covering letter. Please do not hesitate to contact us if you have any questions.

Thanks,

**Crystal Ho**

## **Subject: Ontario Line - Notice of Publication of Draft Corktown Station Early Works Report**

Dear Beth Williston,

The Ontario Line will bring 15.6 kilometres of new subway service to Toronto to make it faster and easier for people to get where they need to be each day. The line will stretch from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line is proposed to include 15 stations, including six interchange stations, and connections to three GO train lines, two existing subway lines, the Eglinton Crosstown LRT, and streetcar lines. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable commutes.

### **Draft Corktown Station Early Works Report**

Ontario Line early works are components of the Ontario Line Project that are proposed to proceed before the completion of the Ontario Line environmental impact assessment report process. Early works are defined in O. Reg. 341/20 as follows:

“any components of the Ontario Line Project that Metrolinx proposes to proceed with before the completion of the Ontario Line assessment process, such as station construction, rail corridor expansion, utility relocation or bridge replacement or expansion.”

Metrolinx finalized the Exhibition Station Early Works Report in February 2021 and is now proceeding with an Early Works Report for the early works at Corktown Station. Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These early works are being advanced to prepare the site for future construction staging and laydown to support tunneling and below ground construction activities, and work associated with the future Corktown Station.

The First Parliament site, located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail) and remnants of early Toronto industry may be found here. Metrolinx is eager to unlock the potential of the site and work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

Environmental impacts of Corktown Station early works are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the

20 Bay St, Suite 600      416.874.5900  
Toronto, ON M5J 2W3      metrolinx.com

Environmental Assessment Act. Metrolinx has now incorporated comments and feedback from the initial round of engagement with Indigenous Nations and agencies on the initial draft of the Corktown Station EWR into the Draft EWR. In accordance with Section 8 of O. Reg. 341/20, Metrolinx has prepared the Draft Corktown Station Early Works Report (EWR) that is now available for public review.

The Draft EWR documents the assessment of Corktown Station early works. The report outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures and a consultation record.

Effective **May 12, 2021**, the Draft Corktown Station EWR will be available for review on the Project webpage ([www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)). Those who wish to provide comments on the Draft EWR must do so by **June 11, 2021**.

Please find attached the **Notice of Publication of Draft Corktown Station EWR** which provides further information, including a description of the process for submitting comments.

If you have any questions or concerns, please do not hesitate to contact the Project Team at [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com).

Sincerely,

A handwritten signature in black ink, appearing to read 'Maria Zintchenko', with a stylized flourish at the end.

## Notice of Publication of Draft Corktown Station Early Works Report Ontario Line Project

### The Project

The Ontario Line will bring 15.6 kilometres of new subway service to Toronto to make it faster and easier for people to get where they need to be each day. The line will stretch across the city, from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line is proposed to include 15 potential stations, including six interchange stations, and connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 of its stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable commutes.

### Corktown Station Early Works

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These early works are being advanced to prepare the site for future construction staging and laydown to support tunneling and below ground construction activities, and work associated with the future Corktown Station.

The First Parliament site, located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail), and remnants of early Toronto industry may be found here.

Metrolinx is eager to unlock the potential of the site and work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

Environmental impacts of Corktown Station early works are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*. In accordance with Section 8 of O. Reg. 341/20, Metrolinx has prepared the Draft Corktown Station Early Works Report (EWR) that is now available for public review.

The Draft EWR documents the assessment of Corktown Station early works. The report outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures and a consultation record.

### **The Draft Early Works Report Review and Consultation Process**

Effective **May 12, 2021**, the Draft Corktown Station EWR will be available for review on the project webpage ([www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)).

As we temporarily shift to virtual open houses, please join us online from **May 12 to June 11, 2021** to find out more about and provide your feedback on the Draft Corktown Station EWR via the webpage form.

Those who wish to provide comments on the Draft Corktown Station EWR must do so by **June 11, 2021** and submit them using the webpage form or address them to the following email: [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com).

Section 10 of O. Reg. 341/20 requires Metrolinx to establish an issues resolution process to attempt to resolve any concerns raised by the public or Indigenous Nations during the review period. At the end of the review period, Metrolinx will update the Draft Corktown Station EWR by adding a description of the issues resolution process, what Metrolinx did to address any concerns, and if the early works implementation timeline will be impacted as a result of addressing concerns. Metrolinx will then publish the Final Corktown Station EWR on the project webpage: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline) and issue a Notice of Publication of Final Corktown Station EWR.

To obtain a copy of the Draft Corktown Station EWR, please contact the project email listed above.

**Josh Vandezande (T: 416-202-5100, E: [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com)) may be contacted on behalf of Metrolinx.**

**Subject:** Corktown Station Early Works Report

Good afternoon,

As part of the Ontario Line Project, the Corktown Station site has been identified for launching tunnel excavation equipment for the downtown and Don Yard alignment segments for the Ontario Line, as well as the location of the Corktown Station. Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These activities will enable completion of environmental due diligence investigations, including archaeological assessments. Further information on Corktown Station early works and an update on the Ontario Line environmental process is provided in the letter attached and in the Corktown Station Early Works Report linked below.

Please find the initial drafts of the Corktown Station Early Works Report and corresponding

comment tracking sheet uploaded to the following link for your review:

## **Subject: Ontario Line - Notice of Publication of Draft Corktown Station Early Works Report**

Dear Michael Vallins,

The Ontario Line will bring 15.6 kilometres of new subway service to Toronto to make it faster and easier for people to get where they need to be each day. The line will stretch from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line is proposed to include 15 stations, including six interchange stations, and connections to three GO train lines, two existing subway lines, the Eglinton Crosstown LRT, and streetcar lines. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable commutes.

### **Draft Corktown Station Early Works Report**

Ontario Line early works are components of the Ontario Line Project that are proposed to proceed before the completion of the Ontario Line environmental impact assessment report process. Early works are defined in O. Reg. 341/20 as follows:

“any components of the Ontario Line Project that Metrolinx proposes to proceed with before the completion of the Ontario Line assessment process, such as station construction, rail corridor expansion, utility relocation or bridge replacement or expansion.”

Metrolinx finalized the Exhibition Station Early Works Report in February 2021 and is now proceeding with an Early Works Report for the early works at Corktown Station. Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These early works are being advanced to prepare the site for future construction staging and laydown to support tunneling and below ground construction activities, and work associated with the future Corktown Station.

The First Parliament site, located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail) and remnants of early Toronto industry may be found here. Metrolinx is eager to unlock the potential of the site and work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

Environmental impacts of Corktown Station early works are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the

20 Bay St, Suite 600      416.874.5900  
Toronto, ON M5J 2W3      metrolinx.com

Environmental Assessment Act. Metrolinx has now incorporated comments and feedback from the initial round of engagement with Indigenous Nations and agencies on the initial draft of the Corktown Station EWR into the Draft EWR. In accordance with Section 8 of O. Reg. 341/20, Metrolinx has prepared the Draft Corktown Station Early Works Report (EWR) that is now available for public review.

The Draft EWR documents the assessment of Corktown Station early works. The report outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures and a consultation record.

Effective **May 12, 2021**, the Draft Corktown Station EWR will be available for review on the Project webpage ([www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)). Those who wish to provide comments on the Draft EWR must do so by **June 11, 2021**.

## Notice of Publication of Draft Corktown Station Early Works Report Ontario Line Project

### The Project

The Ontario Line will bring 15.6 kilometres of new subway service to Toronto to make it faster and easier for people to get where they need to be each day. The line will stretch across the city, from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line is proposed to include 15 potential stations, including six interchange stations, and connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 of its stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable commutes.

### Corktown Station Early Works

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These early works are being advanced to prepare the site for future construction staging and laydown to support tunneling and below ground construction activities, and work associated with the future Corktown Station.

The First Parliament site, located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail), and remnants of early Toronto industry may be found here.

Metrolinx is eager to unlock the potential of the site and work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

Environmental impacts of Corktown Station early works are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*. In accordance with Section 8 of O. Reg. 341/20, Metrolinx has prepared the Draft Corktown Station Early Works Report (EWR) that is now available for public review.

The Draft EWR documents the assessment of Corktown Station early works. The report outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures and a consultation record.

### **The Draft Early Works Report Review and Consultation Process**

Effective **May 12, 2021**, the Draft Corktown Station EWR will be available for review on the project webpage ([www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)).

As we temporarily shift to virtual open houses, please join us online from **May 12 to June 11, 2021** to find out more about and provide your feedback on the Draft Corktown Station EWR via the webpage form.

Those who wish to provide comments on the Draft Corktown Station EWR must do so by **June 11, 2021** and submit them using the webpage form or address them to the following email: [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com).

Section 10 of O. Reg. 341/20 requires Metrolinx to establish an issues resolution process to attempt to resolve any concerns raised by the public or Indigenous Nations during the review period. At the end of the review period, Metrolinx will update the Draft Corktown Station EWR by adding a description of the issues resolution process, what Metrolinx did to address any concerns, and if the early works implementation timeline will be impacted as a result of addressing concerns. Metrolinx will then publish the Final Corktown Station EWR on the project webpage: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline) and issue a Notice of Publication of Final Corktown Station EWR.

To obtain a copy of the Draft Corktown Station EWR, please contact the project email listed above.

**Josh Vandezande (T: 416-202-5100, E: [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com)) may be contacted on behalf of Metrolinx.**

Subject: Corktown Station Early Works Report

Good afternoon,

As part of the Ontario Line Project, the Corktown Station site has been identified for launching tunnel excavation equipment for the downtown and Don Yard alignment segments for the Ontario Line, as well as the location of the Corktown Station. Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These activities will enable completion of environmental due diligence investigations, including archaeological assessments. Further information on Corktown Station early works and an update on the Ontario Line environmental process is provided in the letter attached and in the Corktown Station Early Works Report linked below.

Please find the initial drafts of the Corktown Station Early Works Report and corresponding comment tracking sheet uploaded to the following link for your review: [REDACTED]

The link includes the following reports:

- Corktown Station Early Works Report;
- Corktown Station Natural Environment Report;
- Corktown Station Air Quality Report;
- Corktown Station Heritage Detailed Design Report; and
- Corktown Station Traffic and Transportation Report.

As noted in the letter, we would appreciate if you could provide your comments using the comment tracking sheet by April 9, 2021.

If you have any questions or concerns, please do not hesitate to contact us.

## **Subject: Ontario Line - Notice of Publication of Draft Corktown Station Early Works Report**

Dear Sir/Madam,

The Ontario Line will bring 15.6 kilometres of new subway service to Toronto to make it faster and easier for people to get where they need to be each day. The line will stretch from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line is proposed to include 15 stations, including six interchange stations, and connections to three GO train lines, two existing subway lines, the Eglinton Crosstown LRT, and streetcar lines. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable commutes.

### **Draft Corktown Station Early Works Report**

Ontario Line early works are components of the Ontario Line Project that are proposed to proceed before the completion of the Ontario Line environmental impact assessment report process. Early works are defined in O. Reg. 341/20 as follows:

“any components of the Ontario Line Project that Metrolinx proposes to proceed with before the completion of the Ontario Line assessment process, such as station construction, rail corridor expansion, utility relocation or bridge replacement or expansion.”

Metrolinx finalized the Exhibition Station Early Works Report in February 2021 and is now proceeding with an Early Works Report for the early works at Corktown Station. Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These early works are being advanced to prepare the site for future construction staging and laydown to support tunneling and below ground construction activities, and work associated with the future Corktown Station.

The First Parliament site, located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail) and remnants of early Toronto industry may be found here. Metrolinx is eager to unlock the potential of the site and work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

Environmental impacts of Corktown Station early works are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the

20 Bay St, Suite 600      416.874.5900  
Toronto, ON M5J 2W3      metrolinx.com

Environmental Assessment Act. Metrolinx has now incorporated comments and feedback from the initial round of engagement with Indigenous Nations and agencies on the initial draft of the Corktown Station EWR into the Draft EWR. In accordance with Section 8 of O. Reg. 341/20, Metrolinx has prepared the Draft Corktown Station Early Works Report (EWR) that is now available for public review.

The Draft EWR documents the assessment of Corktown Station early works. The report outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures and a consultation record.

Effective **May 12, 2021**, the Draft Corktown Station EWR will be available for review on the Project webpage ([www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)). Those who wish to provide comments on the Draft EWR must do so by **June 11, 2021**.

Please find attached the **Notice of Publication of Draft Corktown Station EWR** which provides further information, including a description of the process for submitting comments.

If you have any questions or concerns, please do not hesitate to contact the Project Team at [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com).

Sincerely,

A handwritten signature in black ink, appearing to read 'Maria Zintchenko', with a stylized flourish at the end.

## Notice of Publication of Draft Corktown Station Early Works Report

### Ontario Line Project

#### The Project

The Ontario Line will bring 15.6 kilometres of new subway service to Toronto to make it faster and easier for people to get where they need to be each day. The line will stretch across the city, from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line is proposed to include 15 potential stations, including six interchange stations, and connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 of its stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable commutes.

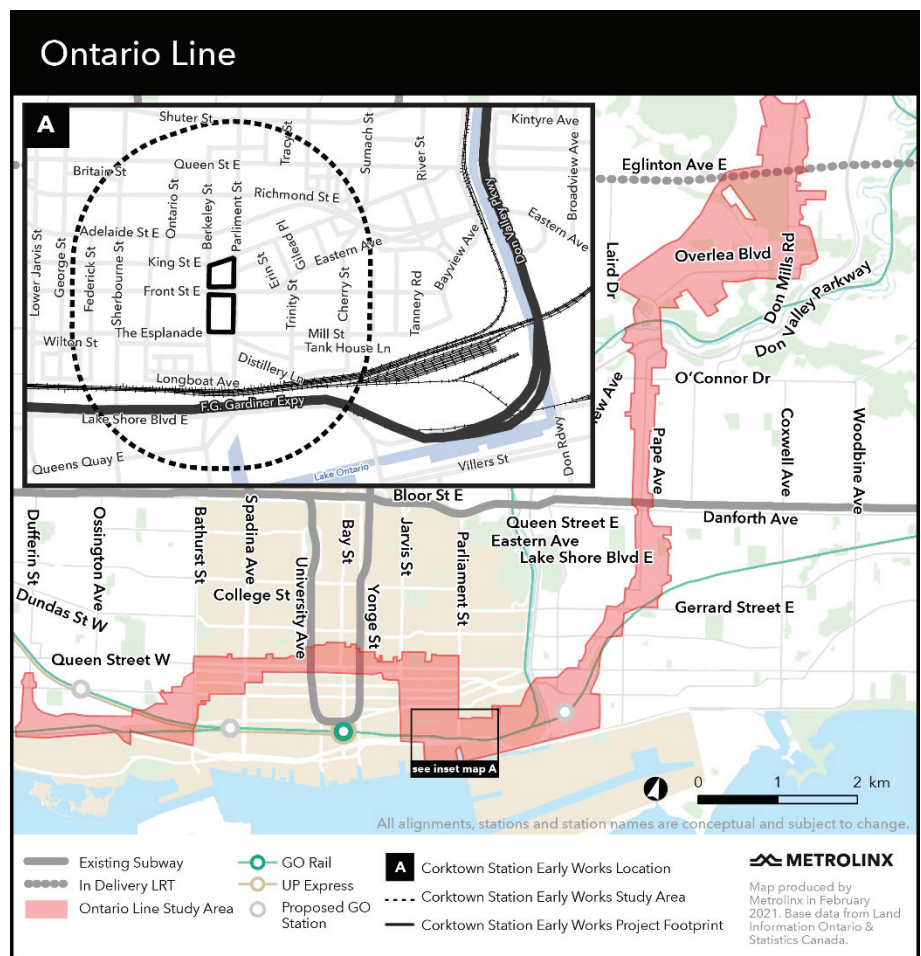

#### Corktown Station Early Works

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These early works are being advanced to prepare the site for future construction staging and laydown to support tunneling and below ground construction activities, and work associated with the future Corktown Station.

The First Parliament site, located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail), and remnants of early Toronto industry may be found here.

Metrolinx is eager to unlock the potential of the site and work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

Environmental impacts of Corktown Station early works are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*. In accordance with Section 8 of O. Reg. 341/20, Metrolinx has prepared the Draft Corktown Station Early Works Report (EWR) that is now available for public review.

The Draft EWR documents the assessment of Corktown Station early works. The report outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures and a consultation record.

### **The Draft Early Works Report Review and Consultation Process**

Effective **May 12, 2021**, the Draft Corktown Station EWR will be available for review on the project webpage ([www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)).

As we temporarily shift to virtual open houses, please join us online from **May 12 to June 11, 2021** to find out more about and provide your feedback on the Draft Corktown Station EWR via the webpage form.

Those who wish to provide comments on the Draft Corktown Station EWR must do so by **June 11, 2021** and submit them using the webpage form or address them to the following email: [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com).

Section 10 of O. Reg. 341/20 requires Metrolinx to establish an issues resolution process to attempt to resolve any concerns raised by the public or Indigenous Nations during the review period. At the end of the review period, Metrolinx will update the Draft Corktown Station EWR by adding a description of the issues resolution process, what Metrolinx did to address any concerns, and if the early works implementation timeline will be impacted as a result of addressing concerns. Metrolinx will then publish the Final Corktown Station EWR on the project webpage: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline) and issue a Notice of Publication of Final Corktown Station EWR.

To obtain a copy of the Draft Corktown Station EWR, please contact the project email listed above.

**Josh Vandezande (T: 416-202-5100, E: [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com)) may be contacted on behalf of Metrolinx.**

**Metrolinx 130 Adelaide Street West, Toronto, Ontario M5H 3P5**

*All personal information included in a submission – such as name, address, telephone number and property location – is collected, maintained and disclosed by Metrolinx for the purpose of transparency and consultation. The information is collected under the authority of O. Reg. 341/20 under the Environmental Assessment Act or is collected and maintained for the purpose of creating a record that is available to the general public as described in s. 37 of the Freedom of Information and Protection of Privacy Act. Personal information you submit will become part of a public record that is available to the general public unless you request that your personal information remain confidential. Re: Ontario Line Corktown Station Early Works Report

Attention:

Maria Zintchenko, Environmental Project Manager  
Environmental Programs & Assessment  
Metrolinx

Thank you for sending us notification regarding the Ontario Line Corktown Station Early Works Report. In our preliminary assessment, we confirm there are no existing Hydro One Transmission assets in the project footprint. Please note we have a project in proximity to the Don yard to accommodate these MX projects, Go Rail Network Electrifications and USRC Enhancement. Be sure to coordinate internally.

Hydro One would still like to be consulted during all stages of your project. Please ensure that all future communications about this and future project(s) are sent to us electronically to [secondarylanduse@hydroone.com](mailto:secondarylanduse@hydroone.com).

Sent on behalf of,

## Notice of Publication of Draft Corktown Station Early Works Report Ontario Line Project

### The Project

The Ontario Line will bring 15.6 kilometres of new subway service to Toronto to make it faster and easier for people to get where they need to be each day. The line will stretch across the city, from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line is proposed to include 15 potential stations, including six interchange stations, and connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 of its stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable commutes.

### Corktown Station Early Works

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These early works are being advanced to prepare the site for future construction staging and laydown to support tunneling and below ground construction activities, and work associated with the future Corktown Station.

The First Parliament site, located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail), and remnants of early Toronto industry may be found here.

Metrolinx is eager to unlock the potential of the site and work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

Environmental impacts of Corktown Station early works are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*. In accordance with Section 8 of O. Reg. 341/20, Metrolinx has prepared the Draft Corktown Station Early Works Report (EWR) that is now available for public review.

The Draft EWR documents the assessment of Corktown Station early works. The report outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures and a consultation record.

### **The Draft Early Works Report Review and Consultation Process**

Effective **May 12, 2021**, the Draft Corktown Station EWR will be available for review on the project webpage ([www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)).

As we temporarily shift to virtual open houses, please join us online from **May 12 to June 11, 2021** to find out more about and provide your feedback on the Draft Corktown Station EWR via the webpage form.

Those who wish to provide comments on the Draft Corktown Station EWR must do so by **June 11, 2021** and submit them using the webpage form or address them to the following email: [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com).

Section 10 of O. Reg. 341/20 requires Metrolinx to establish an issues resolution process to attempt to resolve any concerns raised by the public or Indigenous Nations during the review period. At the end of the review period, Metrolinx will update the Draft Corktown Station EWR by adding a description of the issues resolution process, what Metrolinx did to address any concerns, and if the early works implementation timeline will be impacted as a result of addressing concerns. Metrolinx will then publish the Final Corktown Station EWR on the project webpage: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline) and issue a Notice of Publication of Final Corktown Station EWR.

To obtain a copy of the Draft Corktown Station EWR, please contact the project email listed above.

Re: Ontario Line Corktown Station Early Works Report

Attention:

Maria Zintchenko, Environmental Project Manager  
Environmental Programs & Assessment  
Metrolinx

Thank you for sending us notification regarding the Ontario Line Corktown Station Early Works Report. In our preliminary assessment, we confirm there are no existing Hydro One Transmission assets in the project footprint. Please be advised that this is only a preliminary assessment based on current information.

Hydro One would still like to be consulted during all stages of your project. Please ensure that all future communications about this and future project(s) are sent to us electronically to [secondarylanduse@hydroone.com](mailto:secondarylanduse@hydroone.com).

Sent on behalf of,

***Secondary Land Use  
Asset Optimization  
Strategy & Integrated Planning  
Hydro One Networks Inc.***

Good afternoon,

As part of the Ontario Line Project, the Corktown Station site has been identified for launching tunnel excavation equipment for the downtown and Don Yard alignment segments for the Ontario Line, as well as the location of the Corktown Station. Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These activities will enable completion of environmental due diligence investigations, including archaeological assessments. Further information on Corktown Station early works and an update on the Ontario Line environmental process is provided in the letter attached and in the Corktown Station Early Works Report linked below.

Please find the initial drafts of the Corktown Station Early Works Report and corresponding comment tracking sheet uploaded to the following link for your review:

[REDACTED]

The link includes the following reports:

- Corktown Station Early Works Report;
- Corktown Station Natural Environment Report;
- Corktown Station Air Quality Report;
- Corktown Station Heritage Detailed Design Report; and
- Corktown Station Traffic and Transportation Report.

As noted in the letter, we would appreciate if you could provide your comments using the comment tracking sheet by **April 9, 2021**.

If you have any questions or concerns, please do not hesitate to contact us.

**Crystal Ho**

## **Subject: Ontario Line - Notice of Publication of Draft Corktown Station Early Works Report**

Dear Sir/Madam,

The Ontario Line will bring 15.6 kilometres of new subway service to Toronto to make it faster and easier for people to get where they need to be each day. The line will stretch from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line is proposed to include 15 stations, including six interchange stations, and connections to three GO train lines, two existing subway lines, the Eglinton Crosstown LRT, and streetcar lines. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable commutes.

### **Draft Corktown Station Early Works Report**

Ontario Line early works are components of the Ontario Line Project that are proposed to proceed before the completion of the Ontario Line environmental impact assessment report process. Early works are defined in O. Reg. 341/20 as follows:

“any components of the Ontario Line Project that Metrolinx proposes to proceed with before the completion of the Ontario Line assessment process, such as station construction, rail corridor expansion, utility relocation or bridge replacement or expansion.”

Metrolinx finalized the Exhibition Station Early Works Report in February 2021 and is now proceeding with an Early Works Report for the early works at Corktown Station. Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These early works are being advanced to prepare the site for future construction staging and laydown to support tunneling and below ground construction activities, and work associated with the future Corktown Station.

The First Parliament site, located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail) and remnants of early Toronto industry may be found here. Metrolinx is eager to unlock the potential of the site and work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

Environmental impacts of Corktown Station early works are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the

20 Bay St, Suite 600      416.874.5900  
Toronto, ON M5J 2W3      metrolinx.com

Environmental Assessment Act. Metrolinx has now incorporated comments and feedback from the initial round of engagement with Indigenous Nations and agencies on the initial draft of the Corktown Station EWR into the Draft EWR. In accordance with Section 8 of O. Reg. 341/20, Metrolinx has prepared the Draft Corktown Station Early Works Report (EWR) that is now available for public review.

The Draft EWR documents the assessment of Corktown Station early works. The report outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures and a consultation record.

Effective **May 12, 2021**, the Draft Corktown Station EWR will be available for review on the Project webpage ([www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)). Those who wish to provide comments on the Draft EWR must do so by **June 11, 2021**.

Please find attached the **Notice of Publication of Draft Corktown Station EWR** which provides further information, including a description of the process for submitting comments.

If you have any questions or concerns, please do not hesitate to contact the Project Team at [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com).

Sincerely,

A handwritten signature in black ink, appearing to read 'Maria Zintchenko', with a stylized flourish at the end.

## Notice of Publication of Draft Corktown Station Early Works Report Ontario Line Project

### The Project

The Ontario Line will bring 15.6 kilometres of new subway service to Toronto to make it faster and easier for people to get where they need to be each day. The line will stretch across the city, from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line is proposed to include 15 potential stations, including six interchange stations, and connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 of its stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable commutes.

### Corktown Station Early Works

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These early works are being advanced to prepare the site for future construction staging and laydown to support tunneling and below ground construction activities, and work associated with the future Corktown Station.

The First Parliament site, located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail), and remnants of early Toronto industry may be found here.

Metrolinx is eager to unlock the potential of the site and work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

Environmental impacts of Corktown Station early works are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*. In accordance with Section 8 of O. Reg. 341/20, Metrolinx has prepared the Draft Corktown Station Early Works Report (EWR) that is now available for public review.

The Draft EWR documents the assessment of Corktown Station early works. The report outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures and a consultation record.

### **The Draft Early Works Report Review and Consultation Process**

Effective **May 12, 2021**, the Draft Corktown Station EWR will be available for review on the project webpage ([www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)).

As we temporarily shift to virtual open houses, please join us online from **May 12 to June 11, 2021** to find out more about and provide your feedback on the Draft Corktown Station EWR via the webpage form.

Those who wish to provide comments on the Draft Corktown Station EWR must do so by **June 11, 2021** and submit them using the webpage form or address them to the following email: [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com).

Section 10 of O. Reg. 341/20 requires Metrolinx to establish an issues resolution process to attempt to resolve any concerns raised by the public or Indigenous Nations during the review period. At the end of the review period, Metrolinx will update the Draft Corktown Station EWR by adding a description of the issues resolution process, what Metrolinx did to address any concerns, and if the early works implementation timeline will be impacted as a result of addressing concerns. Metrolinx will then publish the Final Corktown Station EWR on the project webpage: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline) and issue a Notice of Publication of Final Corktown Station EWR.

To obtain a copy of the Draft Corktown Station EWR, please contact the project email listed above.

**Josh Vandezande (T: 416-202-5100, E: [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com)) may be contacted on behalf of Metrolinx.**

## Notice of Publication of Draft Corktown Station Early Works Report

### Ontario Line Project

#### The Project

The Ontario Line will bring 15.6 kilometres of new subway service to Toronto to make it faster and easier for people to get where they need to be each day. The line will stretch across the city, from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line is proposed to include 15 potential stations, including six interchange stations, and connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 of its stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable commutes.

#### Corktown Station Early Works

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These early works are being advanced to prepare the site for future construction staging and laydown to support tunneling and below ground construction activities, and work associated with the future Corktown Station.

The First Parliament site, located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail), and remnants of early Toronto industry may be found here.

Metrolinx is eager to unlock the potential of the site and work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

Environmental impacts of Corktown Station early works are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*. In accordance with Section 8 of O. Reg. 341/20, Metrolinx has prepared the Draft Corktown Station Early Works Report (EWR) that is now available for public review.

The Draft EWR documents the assessment of Corktown Station early works. The report outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures and a consultation record.

### **The Draft Early Works Report Review and Consultation Process**

Effective **May 12, 2021**, the Draft Corktown Station EWR will be available for review on the project webpage ([www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)).

As we temporarily shift to virtual open houses, please join us online from **May 12 to June 11, 2021** to find out more about and provide your feedback on the Draft Corktown Station EWR via the webpage form.

Those who wish to provide comments on the Draft Corktown Station EWR must do so by **June 11, 2021** and submit them using the webpage form or address them to the following email: [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com).

Section 10 of O. Reg. 341/20 requires Metrolinx to establish an issues resolution process to attempt to resolve any concerns raised by the public or Indigenous Nations during the review period. At the end of the review period, Metrolinx will update the Draft Corktown Station EWR by adding a description of the issues resolution process, what Metrolinx did to address any concerns, and if the early works implementation timeline will be impacted as a result of addressing concerns. Metrolinx will then publish the Final Corktown Station EWR on the project webpage: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline) and issue a Notice of Publication of Final Corktown Station EWR.

Good morning,

The Notice of Draft Corktown Station Early Works Report (EWR) for the Ontario Line Project has been published on May 12, 2021. The Draft EWR is available on the project

website at [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline). The public review period begins May 12, 2021 and will continue until June 11, 2021. Attached for your reference is the Notice of Publication of Draft Corktown Station EWR, as well as a covering letter. Please do not hesitate to contact us if you have any questions.

Thanks,

**Crystal Ho**

## **Subject: Ontario Line - Notice of Publication of Draft Corktown Station Early Works Report**

Dear Elise Brunet,

The Ontario Line will bring 15.6 kilometres of new subway service to Toronto to make it faster and easier for people to get where they need to be each day. The line will stretch from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line is proposed to include 15 stations, including six interchange stations, and connections to three GO train lines, two existing subway lines, the Eglinton Crosstown LRT, and streetcar lines. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable commutes.

### **Draft Corktown Station Early Works Report**

Ontario Line early works are components of the Ontario Line Project that are proposed to proceed before the completion of the Ontario Line environmental impact assessment report process. Early works are defined in O. Reg. 341/20 as follows:

“any components of the Ontario Line Project that Metrolinx proposes to proceed with before the completion of the Ontario Line assessment process, such as station construction, rail corridor expansion, utility relocation or bridge replacement or expansion.”

Metrolinx finalized the Exhibition Station Early Works Report in February 2021 and is now proceeding with an Early Works Report for the early works at Corktown Station. Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These early works are being advanced to prepare the site for future construction staging and laydown to support tunneling and below ground construction activities, and work associated with the future Corktown Station.

The First Parliament site, located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail) and remnants of early Toronto industry may be found here. Metrolinx is eager to unlock the potential of the site and work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

Environmental impacts of Corktown Station early works are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the

20 Bay St, Suite 600      416.874.5900  
Toronto, ON M5J 2W3      metrolinx.com

Environmental Assessment Act. Metrolinx has now incorporated comments and feedback from the initial round of engagement with Indigenous Nations and agencies on the initial draft of the Corktown Station EWR into the Draft EWR. In accordance with Section 8 of O. Reg. 341/20, Metrolinx has prepared the Draft Corktown Station Early Works Report (EWR) that is now available for public review.

The Draft EWR documents the assessment of Corktown Station early works. The report outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures and a consultation record.

Effective **May 12, 2021**, the Draft Corktown Station EWR will be available for review on the Project webpage ([www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)). Those who wish to provide comments on the Draft EWR must do so by **June 11, 2021**.

Please find attached the **Notice of Publication of Draft Corktown Station EWR** which provides further information, including a description of the process for submitting comments.

If you have any questions or concerns, please do not hesitate to contact the Project Team at [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com).

Sincerely,

A handwritten signature in black ink, appearing to read 'Maria Zintchenko', with a stylized flourish at the end.

## Notice of Publication of Draft Corktown Station Early Works Report

### Ontario Line Project

#### The Project

The Ontario Line will bring 15.6 kilometres of new subway service to Toronto to make it faster and easier for people to get where they need to be each day. The line will stretch across the city, from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line is proposed to include 15 potential stations, including six interchange stations, and connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 of its stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable commutes.

#### Corktown Station Early Works

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These early works are being advanced to prepare the site for future construction staging and laydown to support tunneling and below ground construction activities, and work associated with the future Corktown Station.

The First Parliament site, located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail), and remnants of early Toronto industry may be found here.

Metrolinx is eager to unlock the potential of the site and work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

Environmental impacts of Corktown Station early works are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*. In accordance with Section 8 of O. Reg. 341/20, Metrolinx has prepared the Draft Corktown Station Early Works Report (EWR) that is now available for public review.

The Draft EWR documents the assessment of Corktown Station early works. The report outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures and a consultation record.

### **The Draft Early Works Report Review and Consultation Process**

Effective **May 12, 2021**, the Draft Corktown Station EWR will be available for review on the project webpage ([www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)).

As we temporarily shift to virtual open houses, please join us online from **May 12 to June 11, 2021** to find out more about and provide your feedback on the Draft Corktown Station EWR via the webpage form.

Those who wish to provide comments on the Draft Corktown Station EWR must do so by **June 11, 2021** and submit them using the webpage form or address them to the following email: [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com).

Section 10 of O. Reg. 341/20 requires Metrolinx to establish an issues resolution process to attempt to resolve any concerns raised by the public or Indigenous Nations during the review period. At the end of the review period, Metrolinx will update the Draft Corktown Station EWR by adding a description of the issues resolution process, what Metrolinx did to address any concerns, and if the early works implementation timeline will be impacted as a result of addressing concerns. Metrolinx will then publish the Final Corktown Station EWR on the project webpage: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline) and issue a Notice of Publication of Final Corktown Station EWR.

To obtain a copy of the Draft Corktown Station EWR, please contact the project email listed above.

**Josh Vandezande (T: 416-202-5100, E: [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com)) may be contacted on behalf of Metrolinx.**

**Subject:** Corktown Station Early Works Report

Good afternoon,

As part of the Ontario Line Project, the Corktown Station site has been identified for launching tunnel excavation equipment for the downtown and Don Yard alignment segments for the Ontario Line, as well as the location of the Corktown Station. Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These activities will enable completion of environmental due diligence investigations, including archaeological assessments. Further information on Corktown Station early works and an update on the Ontario Line environmental process is provided in the letter attached and in the Corktown Station Early Works Report linked below.

Please find the initial drafts of the Corktown Station Early Works Report and corresponding comment tracking sheet uploaded to the following link for your review:

The link includes the following reports:

- Corktown Station Early Works Report;
- Corktown Station Natural Environment Report;
- Corktown Station Air Quality Report;
- Corktown Station Heritage Detailed Design Report; and
- Corktown Station Traffic and Transportation Report.

As noted in the letter, we would appreciate if you could provide your comments using the comment tracking sheet by **April 9, 2021**.

If you have any questions or concerns, please do not hesitate to contact us.

## Notice of Publication of Draft Corktown Station Early Works Report

### Ontario Line Project

#### The Project

The Ontario Line will bring 15.6 kilometres of new subway service to Toronto to make it faster and easier for people to get where they need to be each day. The line will stretch across the city, from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line is proposed to include 15 potential stations, including six interchange stations, and connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 of its stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable commutes.

#### Corktown Station Early Works

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These early works are being advanced to prepare the site for future construction staging and laydown to support tunneling and below ground construction activities, and work associated with the future Corktown Station.

The First Parliament site, located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail), and remnants of early Toronto industry may be found here.

Metrolinx is eager to unlock the potential of the site and work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

Environmental impacts of Corktown Station early works are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*. In accordance with Section 8 of O. Reg. 341/20, Metrolinx has prepared the Draft Corktown Station Early Works Report (EWR) that is now available for public review.

The Draft EWR documents the assessment of Corktown Station early works. The report outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures and a consultation record.

### **The Draft Early Works Report Review and Consultation Process**

Effective **May 12, 2021**, the Draft Corktown Station EWR will be available for review on the project webpage ([www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)).

As we temporarily shift to virtual open houses, please join us online from **May 12 to June 11, 2021** to find out more about and provide your feedback on the Draft Corktown Station EWR via the webpage form.

Those who wish to provide comments on the Draft Corktown Station EWR must do so by **June 11, 2021** and submit them using the webpage form or address them to the following email: [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com).

Section 10 of O. Reg. 341/20 requires Metrolinx to establish an issues resolution process to attempt to resolve any concerns raised by the public or Indigenous Nations during the review period. At the end of the review period, Metrolinx will update the Draft Corktown Station EWR by adding a description of the issues resolution process, what Metrolinx did to address any concerns, and if the early works implementation timeline will be impacted as a result of addressing concerns. Metrolinx will then publish the Final Corktown Station EWR on the project webpage: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline) and issue a Notice of Publication of Final Corktown Station EWR.

To obtain a copy of the Draft Corktown Station EWR, please contact the project email listed above.

**Subject:** Corktown Station Early Works Report

Good afternoon,

As part of the Ontario Line Project, the Corktown Station site has been identified for launching tunnel excavation equipment for the downtown and Don Yard alignment segments for the Ontario Line, as well as the location of the Corktown Station. Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These activities will enable completion of environmental due diligence investigations, including archaeological assessments. Further information on Corktown Station early works and an update on the Ontario Line environmental process is provided in the letter attached and in the Corktown Station Early Works Report linked below.

Please find the initial drafts of the Corktown Station Early Works Report and corresponding comment tracking sheet uploaded to the following link for your review:

The link includes the following reports:

- Corktown Station Early Works Report;
- Corktown Station Natural Environment Report;
- Corktown Station Air Quality Report;
- Corktown Station Heritage Detailed Design Report; and
- Corktown Station Traffic and Transportation Report.

As noted in the letter, we would appreciate if you could provide your comments using the comment tracking sheet by **April 9, 2021**.

If you have any questions or concerns, please do not hesitate to contact us.

Good afternoon,

Please note that the public review period for the Draft Corktown Station Early Works Report (EWR) for the Ontario Line Project ends on Friday, June 11, 2021. We ask that any comments on the Draft Corktown Station EWR be provided no later than this date. Please do not hesitate to contact us if you have any questions.

Thanks,

Good morning,

The Notice of Draft Corktown Station Early Works Report (EWR) for the Ontario Line Project has been published on May 12, 2021. The Draft EWR is available on the project website at [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline). The public review period begins May 12, 2021 and will continue until June 11, 2021. Attached for your reference is the Notice of Publication of Draft Corktown Station EWR, as well as a covering letter. Please do not hesitate to contact us if you have any questions.

Thanks,

**Crystal Ho**

**Subject: Ontario Line - Notice of Publication of Draft Corktown Station Early Works Report**

Dear Wayne Kelly,

The Ontario Line will bring 15.6 kilometres of new subway service to Toronto to make it faster and easier for people to get where they need to be each day. The line will stretch from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line is proposed to include 15 stations, including six interchange stations, and connections to three GO train lines, two existing subway lines, the Eglinton Crosstown LRT, and streetcar lines. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable commutes.

**Draft Corktown Station Early Works Report**

Ontario Line early works are components of the Ontario Line Project that are proposed to proceed before the completion of the Ontario Line environmental impact assessment report process. Early works are defined in O. Reg. 341/20 as follows:

“any components of the Ontario Line Project that Metrolinx proposes to proceed with before the completion of the Ontario Line assessment process, such as station construction, rail corridor expansion, utility relocation or bridge replacement or expansion.”

Metrolinx finalized the Exhibition Station Early Works Report in February 2021 and is now proceeding with an Early Works Report for the early works at Corktown Station. Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These early works are being advanced to prepare the site for future construction staging and laydown to support tunneling and below ground construction activities, and work associated with the future Corktown Station.

The First Parliament site, located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail) and remnants of early Toronto industry may be found here. Metrolinx is eager to unlock the potential of the site and work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

Environmental impacts of Corktown Station early works are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the

20 Bay St, Suite 600      416.874.5900  
Toronto, ON M5J 2W3      metrolinx.com

Environmental Assessment Act. Metrolinx has now incorporated comments and feedback from the initial round of engagement with Indigenous Nations and agencies on the initial draft of the Corktown Station EWR into the Draft EWR. In accordance with Section 8 of O. Reg. 341/20, Metrolinx has prepared the Draft Corktown Station Early Works Report (EWR) that is now available for public review.

The Draft EWR documents the assessment of Corktown Station early works. The report outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures and a consultation record.

Effective **May 12, 2021**, the Draft Corktown Station EWR will be available for review on the Project webpage ([www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)). Those who wish to provide comments on the Draft EWR must do so by **June 11, 2021**.

Please find attached the **Notice of Publication of Draft Corktown Station EWR** which provides further information, including a description of the process for submitting comments.

If you have any questions or concerns, please do not hesitate to contact the Project Team at [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com).

Sincerely,

A handwritten signature in black ink, appearing to read 'Maria Zintchenko', with a stylized flourish at the end.

## Notice of Publication of Draft Corktown Station Early Works Report

### Ontario Line Project

#### The Project

The Ontario Line will bring 15.6 kilometres of new subway service to Toronto to make it faster and easier for people to get where they need to be each day. The line will stretch across the city, from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line is proposed to include 15 potential stations, including six interchange stations, and connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 of its stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable commutes.

#### Corktown Station Early Works

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These early works are being advanced to prepare the site for future construction staging and laydown to support tunneling and below ground construction activities, and work associated with the future Corktown Station.

The First Parliament site, located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail), and remnants of early Toronto industry may be found here.

Metrolinx is eager to unlock the potential of the site and work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

Environmental impacts of Corktown Station early works are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*. In accordance with Section 8 of O. Reg. 341/20, Metrolinx has prepared the Draft Corktown Station Early Works Report (EWR) that is now available for public review.

The Draft EWR documents the assessment of Corktown Station early works. The report outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures and a consultation record.

### **The Draft Early Works Report Review and Consultation Process**

Effective **May 12, 2021**, the Draft Corktown Station EWR will be available for review on the project webpage ([www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)).

As we temporarily shift to virtual open houses, please join us online from **May 12 to June 11, 2021** to find out more about and provide your feedback on the Draft Corktown Station EWR via the webpage form.

Those who wish to provide comments on the Draft Corktown Station EWR must do so by **June 11, 2021** and submit them using the webpage form or address them to the following email: [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com).

Section 10 of O. Reg. 341/20 requires Metrolinx to establish an issues resolution process to attempt to resolve any concerns raised by the public or Indigenous Nations during the review period. At the end of the review period, Metrolinx will update the Draft Corktown Station EWR by adding a description of the issues resolution process, what Metrolinx did to address any concerns, and if the early works implementation timeline will be impacted as a result of addressing concerns. Metrolinx will then publish the Final Corktown Station EWR on the project webpage: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline) and issue a Notice of Publication of Final Corktown Station EWR.

To obtain a copy of the Draft Corktown Station EWR, please contact the project email listed above.

**Josh Vandezande (T: 416-202-5100, E: [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com)) may be contacted on behalf of Metrolinx.**

**Subject:** Ontario Line Update: Early Works Report -Corktown Station

Good afternoon,

We are writing to inform you that today [Metrolinx has released the draft Corktown Station Early Works Report](#) for public consultation. This is the next step in the environmental assessment process for the Ontario Line.

The [Draft Corktown Station Early Works Report](#) provides details on the purpose of early works, a description of local environmental conditions, potential impacts, proposed mitigation measures and a record of consultation. Corktown Station early works will include demolition of existing buildings, removal of other structures and asphalt, decommissioning of utilities, soil removal and/or remediation where required, within the Corktown Station early works project footprint. These early works are being advanced to prepare the site for archeological investigations in advance of future construction staging and laydown to support tunneling and work associated with the future Corktown Station.

As you likely know, the First Parliament site located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail), and remnants of early Toronto industry may be found here. Metrolinx is eager to unlock the potential of the site and work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

The release of the draft Early Works report initiates a consultation period in which the public are invited to share their feedback on its findings and recommendations. **Feedback is requested by June 11, 2021.** The public will be notified of the consultation opportunity through a direct mailer to addresses within 500m of the station, ads in the Toronto Star and community papers, as well as through web updates, Ontario Line e-newsletters and our social media channels.

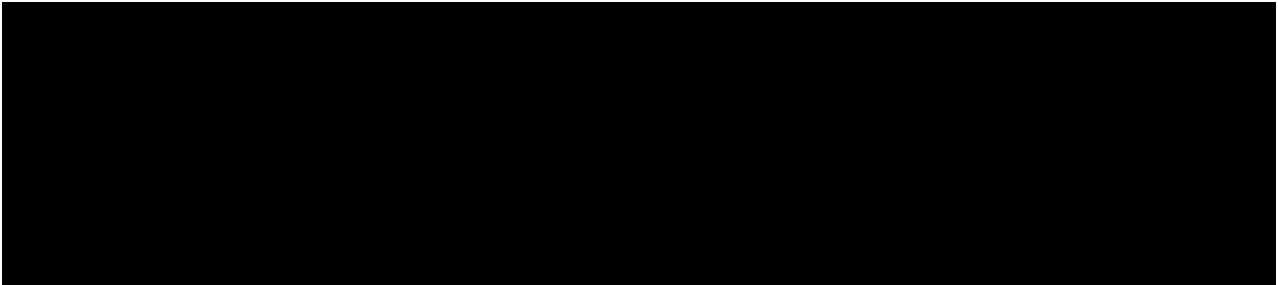

Please do not hesitate to let us know if you have any questions regarding the report or would like to set up time for us to brief you on it.

Stay safe!

The Ontario Line Community Relations team

These early works are being advanced to prepare the site for archeological investigations in advance of future construction staging and laydown to support tunneling and work associated with the future Corktown Station.

As you likely know, the First Parliament site located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail), and remnants of early Toronto industry may be found here. Metrolinx is eager to unlock the potential of the site and work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

The release of the draft Early Works report initiates a consultation period in which the public are invited to share their feedback on its findings and recommendations. **Feedback is requested by June 11, 2021.** The public will be notified of the consultation opportunity through a direct mailer to addresses within 500m of the station, ads in the Toronto Star and community papers, as well as through web updates, Ontario Line e-newsletters and our social media channels.

Please do not hesitate to let us know if you have any questions regarding the report or would like to set up time for us to brief you on it.

Stay safe!

Good afternoon,

We are writing to inform you that today [Metrolinx has released the draft Corktown Station Early Works Report](#) for public consultation. This is the next step in the environmental assessment process for the Ontario Line.

The [Draft Corktown Station Early Works Report](#) provides details on the purpose of early works, a description of local environmental conditions, potential impacts, proposed mitigation measures and a record of consultation. Corktown Station early works will include demolition of existing buildings, removal of other structures and asphalt, decommissioning of utilities, soil removal and/or remediation where required, within the Corktown Station early works project footprint. These early works are being advanced to prepare the site for archeological investigations in advance of future construction staging and laydown to support tunneling and work associated with the future Corktown Station.

As you likely know, the First Parliament site located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. **Subject:** Ontario Line Update: Early Works Report - Corktown Station

Dear Councillor Cressy,

Hope this email finds you and your team safe and well.

As the next step in the environmental assessment process for the Ontario Line, I am writing to inform you that on Wednesday, May 12<sup>th</sup>, Metrolinx will be releasing the draft Corktown Station Early Works Report for public consultation.

The Draft Corktown Station Early Works Report provides details on the purpose of early works, a description of local environmental conditions, potential impacts, proposed mitigation measures and a record of consultation. Corktown Station early works will include demolition of existing buildings, removal of other structures and asphalt, decommissioning of utilities, soil removal and/or remediation where required, within the Corktown Station early works project footprint. These early works are being advanced to prepare the site for archeological investigations in advance of future construction staging and laydown to support tunneling and work associated with the future Corktown Station. All works will be overseen by a licensed archaeologist.

As you likely know, the First Parliament site located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail), and remnants of early Toronto industry may be found here. Metrolinx is eager to unlock the potential of the site and work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

The release of the draft Early Works report initiates a consultation period in which the public are invited to share their feedback on its findings and recommendations. **Feedback is requested by June 11, 2021.** The public will be notified of the consultation opportunity through a direct mailer to addresses within 500m of the station, ads in the Toronto Star and community papers, as well as through web updates, Ontario Line e-newsletters and our social media channels.

For your information, we have worked with the leadership of the West Don Lands Committee leadership to arrange a meeting with community groups and BIA's in the area, to provide an overview of this report and the environmental due diligence and archaeological plans for the site. It

will be held on May 12<sup>th</sup> at 4pm and you or your staff are welcome to join us. Here is the Teams meeting link:

**To:** Edward LaRusic <Edward.LaRusic@toronto.ca>  
**Subject:** Following Up

Hi Eddie,

Hope your week is going well.

I just wanted to follow up on a few items from the First Parliament Working Group Meeting on Monday:

1. Here is the link to the form we would appreciate if the members of the working group could fill out to provide feedback on the proposed approach to developing the Heritage Interpretation and Commemoration Plan (ICP): 

Would you like to send it out to the working group or would you prefer if I emailed everyone on the email chain confirming the meeting? As a reminder, the deadline to complete the form is June 11th 2021.

2. 

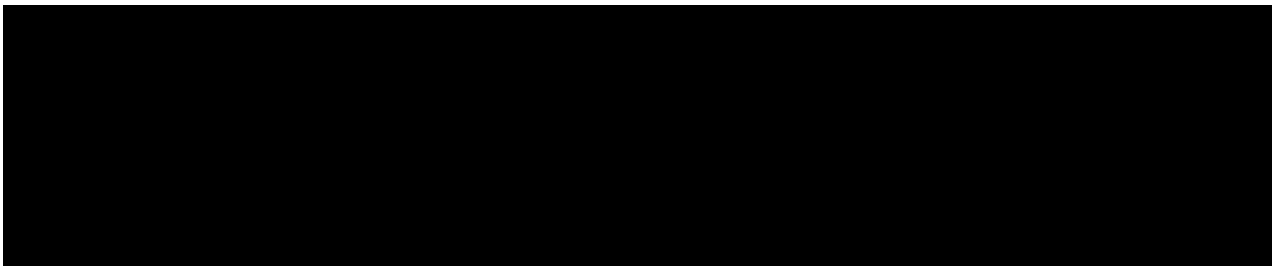

3. I noted that in the 'Metrolinx Key Dates' section of the TOR, there has been an addition that reads "First Parliament Early Works Report: July 2021". I would suggest that this be reworded as "Final Corktown Station Early Works Report released - July 2021" as these are

the same report. If it was added to refer to something else, let me know what it is and I am happy to clarify.

Best,

Bismah

Hi Bismah, SoMei,

Per your request I've allocated 25 minutes to each of the three pieces (Metroinx Draft Corktown Station Early Works Report, CreateTO First Parliament HIS/Master Plan and Metrolinx Heritage Interpretation and Commemoration Plan) to today's meeting. Hopefully you've gotten the updated invite with the agenda attached.

I've provided 25 mins for each section; the intent is to provide 20 minutes for each presentation and allow some time for some quick Q&A in between. I am hoping we can speed through the early part of the agenda to give a bit more wiggle room for Q&A.

Stay safe and see you this afternoon,

- Eddie

**Sent:** Thursday, May 27, 2021 4:25 PM  
**To:** Edward LaRusic  
**Subject:** May 31st Working Group Meeting

Hi Eddie,

For Monday's meeting, I have confirmed that our Environmental Programs and Assessments (EPA) team is happy to do a quick overview of the Draft Corktown Station Early Works Report, as well as share our initial thinking about the approach to developing the heritage Interpretation and Commemoration Plan (ICP). You may already be aware through Anthony but SoMei Quan suggested to us this morning that it may be helpful if she did a presentation on the Heritage Interpretation Strategy on Monday between our presentations on the Early Works Report and Interpretation and Commemoration plan. We anticipate that our combined presentations would take about one hour (20 minutes per segment). We are hoping for some feedback from the group on the Interpretation and Commemoration Plan approach either at this meeting or at the next meeting once people have a chance to think about it. Looking forward to your thoughts on whether this works for the upcoming meeting or whether it would be better to segment it out across future meetings.

One question on this: if the Interpretation and Commemoration Plan is on the agenda for Monday, is it okay if our EPA team is accompanied by a cultural heritage specialist and an archaeologist who are supporting with the work on the site and the development of the Interpretation and Commemoration Plan?

As requested, please see below for some milestones for Corktown station and the First Parliament site:

- June 11 2021 – Close of public review period for Draft Corktown Early Works Report
- Starting Spring/Summer 2021 – Development of First Parliament Interpretation & Commemoration Plan

- August 31– Timeline for possession of properties on First Parliament site
- Starting Fall 2021 – Beginning of archeological investigation and environmental remediation work. Regular updates to community about results of archaeological assessments
- Starting Fall 2021 – Beginning of Corktown Early Works (includes demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required)
- Mid 2022 – South Civils Financial Close
- Mid 2023 – Major Construction to begin for South Civils. Timelines and details for Corktown TBC pending announcement of ProjectCo

Best,

Bismah

**Subject:** RE: First Parliament Working Group Meeting #1 (EBL)

Hi Eddie,

Thanks for these. I'm working with the team to get you the timeline/milestones, as well as what makes sense for us to present at the May 31<sup>st</sup> meeting.

I'd like to propose it would be helpful for us to have a quick check-in call early next week. Joining me would be Franca, the director for our team. Would Tuesday at 11am or Wednesday at 10am work? If neither work, happy to find another time.

Hope you have a lovely evening,

Bismah

Oh apologies,

It got lost in the shuffle of last week, but one item I thought Metrolinx may want to bring a short presentation to for feedback is the Early Works Report that I understand is currently up for comment. The working group may be a good forum to get some feedback on it.

If that sounds good to you let me know and I'll make sure it's put on the agenda for May 31.

Stay safe,

- Eddie

Hi Eddie,

Hope your week is going well!

Thanks for sharing the meeting materials. As requested below, I will be the primary point of contact from Metrolinx for the purposes of the Working Group going forward. I'd ask that you please share updates with me through this email and I will loop in others from Metrolinx for the meetings based on the agenda items. You can also reach me here for anything else your team or the Councillor would like to discuss.

Looking forward to continuing to work with you,

Bismah

Hi all,

Thank you for attending our inaugural working group meeting today. Attached, please find the brief presentation provided today in both pdf and powerpoint form, as well as a pdf of all the stakeholders I recorded attending the meeting.

There was a comment on whether there was a disconnect between the slides and the draft

Terms of Reference; I believe I confused things by trying to title slides underneath their agenda number and used decimals when there were multiple slides for one agenda item (i.e. 5.1, 5.2...). I've removed this and any decimal number should only reference the ToR section to hopefully provide clarity.

I added a few notes during the meetings to the slides but have removed them here. They have been recorded in my notes otherwise.

As a small amount of additional homework, please check to see if your name, title, etc. is correct. If you know if you'll be the primary or alternative member for the working group, please let me know.

For City Staff/Metrolinx/IO, while we do expect some rotation if you could please let our office know if there are two specific staff that can act as the primary/alternate "go to" person in your organizations please let us know. For Metrolinx and IO in particular I may not have all the contact information for everyone so if someone wishes to be kept in the loop please make sure you send it.

Apologies for any errors in the contact/attendance list; I could not type on my laptop while controlling the presentation and so was making notes (poorly) on an ipad. All mistakes are mine and I'm happy to correct them.

Thanks and stay safe,

- Eddie

**Cc:** Ontario Line <ontarioline@metrolinx.com>  
**Subject:** RE: Ontario Line Working Group + Stakeholder outreach

Hi Eddie,

I hear you – everything seems to take twice as long these days. Thanks for your patience. Attached is a draft of how we see these groups shaping up. Would appreciate the opportunity to chat about the structure, mandate and membership with you. Daryl reminded me that we discussed having co-chairs so wanted to get your thoughts on the following:

Two co-chairs will be chosen for the Toronto Centre committee: one from Metrolinx and one from among the community representatives. Co-chairs will work together to develop meeting agendas and take turns leading the meeting, on a rotating basis. Co-chairs are responsible for: setting a positive tone, guiding discussion, ensuring the code of conduct is followed, mediating differing perspectives and approving meeting notes.

The committee for your ward will include the following Ontario Line stations: Queen, Moss Park and Corktown as well as the new bridges over the Don River behind Corktown Common. While some meetings will get into station specific details, many of the early meetings will be more general and can include representatives for all areas. We can also look at how we segment the agendas so that people can join/drop off based on their area of interest.

Wanted to flag one other thing for you. I learned there was an upcoming [city consultation event](#) related to the future of the First Parliament site. I've reached out to my contacts in the Transit Expansion Office to question whether the team leading this event was aware of Metrolinx' plans for the site and how this would be addressed at the meeting. I haven't heard anything back yet but it's particularly relevant given that we expect to start some geotechnical investigation at the site later this week. We will be sharing the attached notice with your office formally later today but wanted to send it to you now in case you had questions.

I'm available today if you want to chat.

Thanks  
Josh

Hi Edward,

Good to hear from you. We spent the balance of October getting through the public engagement on the Environmental Conditions Report. The final version, which now includes a record of feedback received was just [REDACTED] yesterday. We recently met with the St. Lawrence Market BIA and the St. Lawrence Neighbourhood Association

which gave us the opportunity to give a brief overview of the project, hear residents and businesses' questions about the project and get to know the community a bit better. Similar to our conversations with the Councillor and your office, people want to better understand plans, timing and impacts of construction. While some of these questions are things we can answer already, many will be addressed through forthcoming environmental reports in mid-2021. We conducted a survey of businesses along the alignment to understand their preliminary concerns about the Ontario Line and establish connections so we can keep them updated as the project moves ahead.

Our outreach efforts will continue in December, mostly online due to the public health restrictions. Daryl, copied here, has also been developing some outreach ideas for the Moss Park area and we'd like to get your input on those before we implement.

Thanks for checking in about the working group. We are hoping to get a draft terms of reference out to you this week and then setup a time to discuss. Let us know if you have any questions in the meantime.

Hope you're staying warm and safe,

Josh

Hi Josh,

This is Edward from Councillor Wong-Tam's office. Can you provide me an update on consultation efforts with stakeholders since we last met? You had mentioned that initial outreach was going to occur in October so any update there would be appreciated.

Councillor Wong-Tam is also interested in forming a working group for the three Ontario Line stations in Ward 13 (Corktown, Moss Park and Queen). I understand that there was a Terms of Reference for a similar working group with regards to the Crosstown LRT. Can you share that with us so we can review?

Thanks,

- Eddie

# Drilling work in the parking lots south of Front Street between Parliament Street and Berkeley Street

Beginning January 21, 2021

## What is the Ontario Line Transit Project?

The Ontario Line will connect communities with 15.5 kilometres of transit service, making it faster and easier for hundreds of thousands of people to get where they need to be each day. It will also help alleviate congestion on transit and roads by providing 17 new connections to GO trains and TTC service. To stay updated, please visit our [website](#) and sign up for our e-newsletter.

## What is happening?

To advance design concepts and other structural plans for the Ontario Line, Metrolinx will be using small drill rigs to conduct geotechnical and environmental investigations. Using this information, Metrolinx can determine the optimal construction approach for this project.

## Working in an Area of Archaeological Potential

These parking lots feature below-ground known and potential archaeological resources associated with the First and Second Parliament Buildings of Upper Canada (1797-1824), the Home District Gaol (1837-1887), and Consumers' Gas company buildings (1880-1950s). The surface of the property is currently occupied by automotive businesses, including a car dealership, car wash, and surface parking lot. A licensed archaeologist will be on-site to monitor drilling activities.

## WHAT TO EXPECT

- Throughout the duration of the work, some parking spots will be unavailable in the marked work areas. Access to the parking area and property will be maintained.
- Work equipment may be left on-site until work is completed.
- Please take care when walking near construction areas. Watch for additional signs directing pedestrians, as detours may be required.
- A licensed archaeologist will be on-site to monitor drilling activities and ensure that all potential or known resources are protected.
- Residents and businesses near the work site can expect to hear noise caused by a drill rig, trucks and other construction equipment related to this work.

## TIMING

- Work is scheduled to start January 21, 2021 and last up to four months.
- Work will occur between 7 a.m. and 6 p.m., Monday to Friday. Specific work times may depend on permits from the City of Toronto.
- Work could be rescheduled and delayed due to weather conditions or any unforeseen circumstances.

### Contact Us:

Write to us at: [OntarioLine@metrolinx.com](mailto:OntarioLine@metrolinx.com)

Call us at: 416-202-5100

Visit the website: [www.metrolinx.com/en/greaterregion/projects/ontario-line.aspx](http://www.metrolinx.com/en/greaterregion/projects/ontario-line.aspx)

Metrolinx is beginning the process of establishing community committees to help facilitate effective communication along the Ontario Line route. Once formalized, the committees will provide a forum where Metrolinx (and its third-party construction teams, once selected) can share information about the Ontario Line project, where community representatives can bring local concerns and question, and where all parties can proactively and regularly communicate about project plans, designs, construction activities, schedules, updates and community impacts.

### **Mandate**

- Sharing project information, including design concepts, construction timelines and impacts.
- Identifying local priorities and concerns from the community and working together to identify solutions that are within the projects' purview.
- Providing community input and feedback at key milestones in the lifecycle of the project.
- Working cooperatively to inform and review efforts by the project team and Metrolinx to mitigate the short and long-term impacts of works and activities.
- Promoting safety at and around construction sites.

### **Membership**

The committees will be comprised of members who represent Metrolinx, the community and the project team, including: Metrolinx staff, technical contractors, project constructor, community members, Elected Officials and their representatives. Staff from the City of Toronto's Transit Expansion Office or various city departments are invited to participate, as needed.

Metrolinx will work with the community to determine membership for the committee. Generally speaking, members should be engaged in or represent the community within 1 km of the Ontario Line alignment and be willing to make a long-term commitment of 18-24 months.

### **Meetings, Scope of Discussions & Code of Conduct**

The committee will meet approximately every two months until construction starts when the frequency will likely increase to monthly. Meetings will usually last for 90 minutes. A formal terms of reference will be developed and reviewed as required to ensure that the committee mandate and membership remain current and appropriate.

A code of conduct will help ensure that discussions are respectful, productive:

- Participate fully and openly in discussions, while also creating an environment where all members are encouraged to contribute and share their views.
- Participate in a respectful manner, including refraining from use of foul language and derogatory comments.
- Keep requested agenda and discussion items within the mandate of the committee.
- Maintain confidentiality of sensitive issues, when requested by participants.
- Represent their community's diverse perspectives and interests.
- Refrain from speaking to the media or engaging on social media regarding their role or any information they obtained as a results of being a member.
- Commit to equity, diversity, overcoming systemic racism and supporting the participation of the whole community regardless of race, gender, class, sexuality, age or ability.

## **Responsibilities of Metrolinx and Community Participants**

### Metrolinx, Contractors and the Ontario Line Project Team

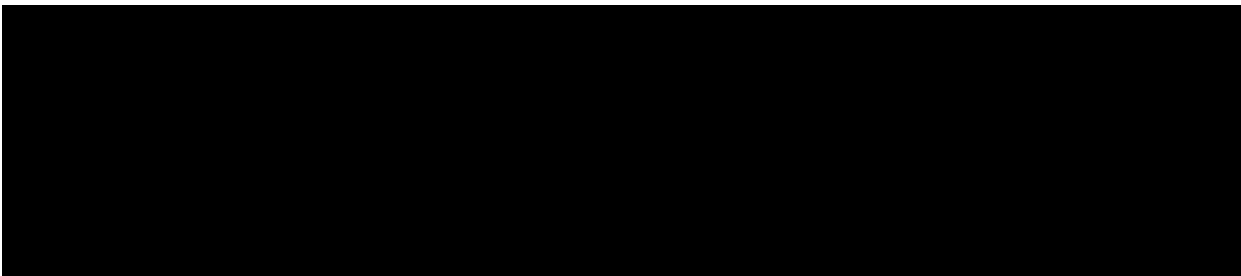

- Set a positive collaborative tone.
- Provide accurate, understandable and timely information.
- Develop agendas and materials based on available project information.
- Make Project Sponsors and other staff available to support discussions.
- Be open to feedback and give careful consideration to ideas presented. If ideas cannot be implemented, have an open and honest dialogue about why the decision was made.
- Take accurate meeting notes and provide them to members in a timely fashion. Make meeting summaries broadly available to the public.
- Adhere to all aspects of the Terms of Reference and the Code of Conduct.

### Community Participants

- Participate actively in regular meetings and provide input and feedback to improve the project.
- Provide space for each member to participate in a fair and equitable manner.
- Liaise and act as a representative of pre-identified organization/community/business or stakeholder group by providing feedback to the project team and formally communicating relevant information back to their respective groups.
- Be open and receptive to ideas.
- Adhere to all aspects of the Terms of Reference and Code of Conduct.

**Subject:** Ontario Line Update: Early Works Report -Corktown Station

Good afternoon,

We are writing to inform you that today [Metrolinx has released the draft Corktown Station Early Works Report](#) for public consultation. This is the next step in the environmental assessment process for the Ontario Line.

The [Draft Corktown Station Early Works Report](#) provides details on the purpose of early works, a description of local environmental conditions, potential impacts, proposed mitigation measures and a record of consultation. Corktown Station early works will include demolition of existing buildings, removal of other structures and asphalt, decommissioning of utilities, soil removal and/or remediation where required, within the Corktown Station early works project footprint. These early works are being advanced to prepare the site for archeological investigations in advance of future construction staging and laydown to support tunneling and work associated with the future Corktown Station.

As you likely know, the First Parliament site located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail), and remnants of early Toronto industry may be found here. Metrolinx is eager to unlock the potential of the site and work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

The release of the draft Early Works report initiates a consultation period in which the public are invited to share their feedback on its findings and recommendations. **Feedback is requested by June 11, 2021.** The public will be notified of the consultation opportunity through a direct mailer to addresses within 500m of the station, ads in the Toronto Star and community papers, as well as through web updates, Ontario Line e-newsletters and our social media channels.

Please do not hesitate to let us know if you have any questions regarding the report or would like to set up time for us to brief you on it.

Stay safe!

Dear MPP Morrison,

Hope this email finds you and your team safe and well.

As the next step in the environmental assessment process for the Ontario Line, I am writing to inform you that on Wednesday, May 12<sup>th</sup>, Metrolinx will be releasing the draft Corktown Station Early Works Report for public consultation.

The Draft Corktown Station Early Works Report provides details on the purpose of early works, a description of local environmental conditions, potential impacts, proposed mitigation measures and a record of consultation. Corktown Station early works will include demolition of existing buildings, removal of other structures and asphalt, decommissioning of utilities, soil removal and/or remediation where required, within the Corktown Station early works project footprint. These early works are being advanced to prepare the site for archeological investigations in advance of future construction staging and laydown to support tunneling and work associated with the future Corktown Station. All works will be overseen by a licensed archaeologist.

As you likely know, the First Parliament site located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail), and remnants of early Toronto industry may be found here. Metrolinx is eager to unlock the potential of the site and work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

The release of the draft Early Works report initiates a consultation period in which the public are invited to share their feedback on its findings and recommendations. **Feedback is requested by June 11, 2021.** The public will be notified of the consultation opportunity through a direct mailer to addresses within 500m of the station, ads in the Toronto Star and community papers, as well as through web updates, Ontario Line e-newsletters and our social media channels.

For your information, we have worked with the leadership of the West Don Lands Committee leadership to arrange a meeting with community groups and BIA's in the area, to provide an

overview of this report and the environmental due diligence and archaeological plans for the site. It will be held on May 12<sup>th</sup> at 4pm and you or your staff are welcome to join us. Here is the Teams meeting link:

---

Dear Chief Mowat,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. Attached you will find a letter providing an update on the project. The purpose of this letter is to share the Draft Corktown Station Early Works Report (EWR) prepared for the Ontario Line Project and provide a continued invitation for feedback.

In an effort to streamline your review, we draw your attention to the attachment which provides an overview of the expected environmental impacts and proposed mitigations, as we know this may be of specific interest to you.

We ask that you provide any comments no later than June 11, 2021.

The reports are available at the following link:

We appreciate the volume of documents that Metrolinx has shared with your Nation. If you have any questions or concerns, please do not hesitate to contact the Indigenous Relations Office.

Miigwetch,

Fallon

Dear Chief Mowat,

**RE: Ontario Line Project - Notice of Publication of Draft Corktown Station Early Works Report**

Metrolinx, a regional transportation agency, is helping to transform the way the Greater Golden Horseshoe region moves by building a fast, convenient and integrated transit network. As part of this work, Metrolinx is proceeding with the Ontario Line which will bring 15.6 kilometres of subway service to Toronto. The purpose of this letter is to share information regarding the Ontario Line project with Alderville First Nation.

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Alderville First Nation. Metrolinx appreciates and respects Alderville First Nation's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to share with Alderville First Nation the Draft Corktown Station Early Works Report (EWR).

**Project Description**

The Ontario Line will stretch from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line is proposed to include 15 stations, including six interchange stations, and connections to three GO train lines, two existing subway lines, the Eglinton Crosstown LRT, and streetcar lines. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable commutes. More information on the Project can be found on our website:  
[www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)

The initial draft of the Corktown Station EWR and a letter outlining Corktown Station early works were shared with Alderville First Nation on March 11, 2021. As outlined in

the letter, environmental impacts of the Ontario Line Project are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*.

## Draft Corktown Station Early Works Report

In accordance with Section 8 of O. Reg. 341/20, Metrolinx has prepared a Draft Corktown Station EWR that documents the assessment of Corktown Station early works.

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These early works are being advanced to prepare the site for future construction staging and laydown to support tunneling and below ground construction activities, and work associated with the future Corktown Station. The location of the Corktown Station early works project footprint and study area can be viewed below in **Figure 1**.

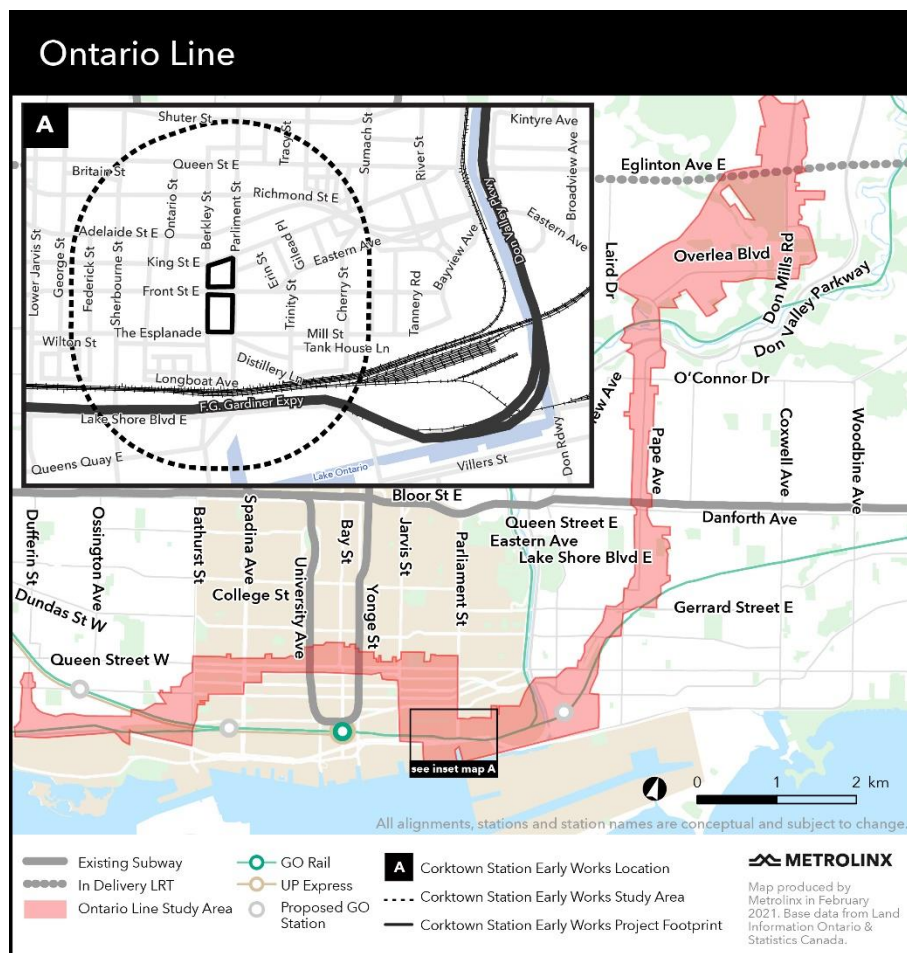

Figure 1: *Map of Corktown Station Early Works*

The First Parliament site, located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail) and remnants of early Toronto industry may be found here. Metrolinx is eager to work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

The EWR documents the assessment of Corktown Station early works and outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures, and a consultation record.

The Draft EWR is available for your review and can be found via the Dropbox link shared in the body of the email that is associated with this letter. We welcome any additional comments you may have on the Draft EWR. The Draft EWR is available for review and comment starting **May 12, 2021** and ending on **June 11, 2021**. The Notice of Publication of Draft Corktown Station EWR is provided in **Attachment 1**. The Draft EWR will be updated following the review period, and the Final EWR will be published on the Project webpage ([www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)) and shared with Alderville First Nation.

#### Potential Impacts and Mitigation Measures

The tables found enclosed in **Attachment 2 and 3** provide a summary of natural environment and archaeology potential impacts and mitigation measures identified as part of the Draft EWR that may be of interest to *Alderville First Nation*. If *Alderville First Nation* has any feedback about these potential impacts and/or mitigation strategies, or any other aspects of the Ontario Line, we welcome the opportunity to discuss further.

#### Revisions to the Initial Draft of the Corktown Station Early Works Report

In accordance with O. Reg. 341/20, Metrolinx has now incorporated comments and feedback from the initial round of engagement with Indigenous Nations and agencies on the initial draft of the Corktown Station EWR into the Draft EWR.

To streamline capacity for Alderville First Nation to provide comments or feedback, a summary of revisions to the EWR since the circulation of the initial draft of the EWR is as follows:

- Minor editorial changes to address grammatical and syntax errors and updates to reflect comments received from agencies;
- Clarification that the project operations, construction of Corktown Station and other project components will be assessed in the Ontario Line Environmental Impact Assessment Report;
- Inclusion of information on the Parkland Strategy (City of Toronto, 2019), First Parliament Master Plan (City of Toronto, 2020) and additional information on planned community services and facilities in the Corktown Station Early Works Study Area;
- Edits to the text to reflect that the Ministry of Heritage, Sport, Tourism and Culture Industries' (MHSTCI) Minister's Consent has been granted for the demolition and removal of the non-heritage buildings at 265 Front Street East and removal of the heritage attributes at 265 Front Street East, 271 Front Street East and 25 Berkeley Street located on the First Parliament Site, and affirming Metrolinx's commitment to fulfilling the conditions outlined in the Minister's Consent, including completion of archaeological requirements;
- Additional mitigation measures for environmental disciplines such as archaeology, air quality and traffic and transportation, that include:
  - Coordination and completion of required archaeological investigations, early works activities and/or activities that have the potential for vibration effects such that buried archaeological resources are appropriately considered;
  - Use of non-chloride dust suppressants; and
  - Consultation with the City of Toronto to minimize potential impacts during special events (e.g., the Toronto Christmas Market at the Distillery District) should closures or long-term impacts be required.
- Revision of traffic and transportation figures to include additional information such as intersection names and inclusion of an additional noise and vibration figure to show representative receptor locations.

## Engagement

Metrolinx is committed to an open, respectful, and transparent relationship with Alderville First Nation. We appreciate the significant volume of documents related to this Project that have been shared with Alderville First Nation. We are happy to assist in the review of these documents by meeting with Alderville First Nation or working to address any questions that Alderville First Nation may have about this Project. If

you require additional information or materials or if you wish to discuss these Projects in more detail or set up a meeting, please contact Fallon Melander, Manager of Metrolinx's Indigenous Relations Office at [IndigenousRelations@metrolinx.com](mailto:IndigenousRelations@metrolinx.com).

Metrolinx welcomes any comments or feedback on the Draft EWR from Alderville First Nation. Please provide these in writing no later than **June 11, 2021**. Comments and information regarding this draft report will be collected to assist in meeting the requirements of the *Environmental Assessment Act* and may be included in study documentation. With the exception of personal information, all comments will become part of the public record. Kindly note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*.

Thank you for your time in reviewing this letter.

Yours Truly,

## Notice of Publication of Draft Corktown Station Early Works Report

### Ontario Line Project

#### The Project

The Ontario Line will bring 15.6 kilometres of new subway service to Toronto to make it faster and easier for people to get where they need to be each day. The line will stretch across the city, from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line is proposed to include 15 potential stations, including six interchange stations, and connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 of its stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable commutes.

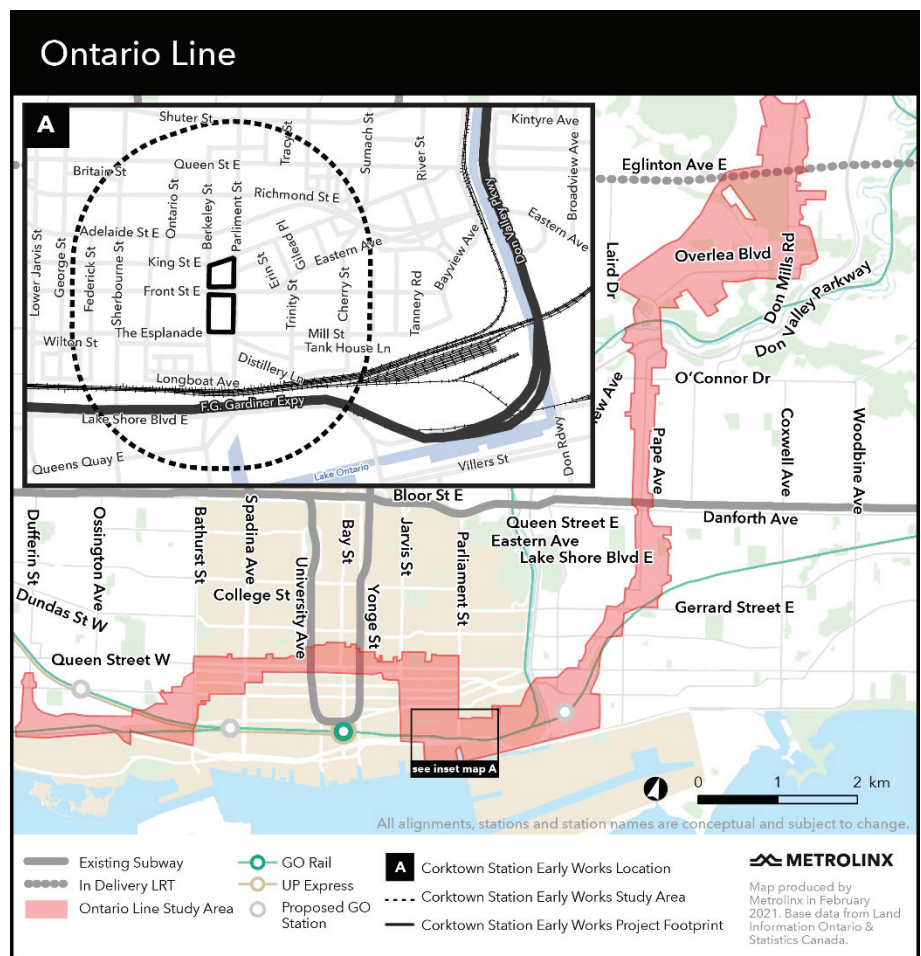

#### Corktown Station Early Works

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These early works are being advanced to prepare the site for future construction staging and laydown to support tunneling and below ground construction activities, and work associated with the future Corktown Station.

The First Parliament site, located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail), and remnants of early Toronto industry may be found here.

Metrolinx is eager to unlock the potential of the site and work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

Environmental impacts of Corktown Station early works are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*. In accordance with Section 8 of O. Reg. 341/20, Metrolinx has prepared the Draft Corktown Station Early Works Report (EWR) that is now available for public review.

The Draft EWR documents the assessment of Corktown Station early works. The report outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures and a consultation record.

### **The Draft Early Works Report Review and Consultation Process**

Effective **May 12, 2021**, the Draft Corktown Station EWR will be available for review on the project webpage ([www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)).

As we temporarily shift to virtual open houses, please join us online from **May 12 to June 11, 2021** to find out more about and provide your feedback on the Draft Corktown Station EWR via the webpage form.

Those who wish to provide comments on the Draft Corktown Station EWR must do so by **June 11, 2021** and submit them using the webpage form or address them to the following email: [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com).

Section 10 of O. Reg. 341/20 requires Metrolinx to establish an issues resolution process to attempt to resolve any concerns raised by the public or Indigenous Nations during the review period. At the end of the review period, Metrolinx will update the Draft Corktown Station EWR by adding a description of the issues resolution process, what Metrolinx did to address any concerns, and if the early works implementation timeline will be impacted as a result of addressing concerns. Metrolinx will then publish the Final Corktown Station EWR on the project webpage: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline) and issue a Notice of Publication of Final Corktown Station EWR.

To obtain a copy of the Draft Corktown Station EWR, please contact the project email listed above.

**Josh Vandezande (T: 416-202-5100, E: [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com)) may be contacted on behalf of Metrolinx.**

---

Dear Chief Mowat,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. We recently communicated with your Nation about the proposed Corktown Station which is along the planned alignment of the Ontario Line. This location includes parcels of land which were once the site of Upper Canada's First Parliament buildings. Metrolinx and its partners are exploring opportunities to commemorate the history of this site, and have been engaging with various parties including the City of Toronto and the Mississaugas of the Credit First Nation, on whose treaty territory this project is occurring.

Given the significant chance of recovering Indigenous and European artifacts during the Corktown Station Early Works, a detailed archaeological workplan is being developed. Metrolinx recognizes the importance and value of Indigenous monitors for any archaeology related to the Ontario Line Project. In our previous communication, an invitation was included for your Nation to participate in any archaeological fieldwork and monitoring during the Corktown Station Early Works, including demolition of modern buildings currently on the First Parliament site.

This work is anticipated to commence in Fall 2021, and if you have not yet expressed interest in participating, please feel free to do so at your earliest convenience. As a reminder any comments on the draft Corktown Station Early Works Report should be provided no later than **April 15, 2021**.

Metrolinx recognizes that the history of this location extends beyond European use, and as such, wants to take the opportunity to understand any significance it may have to Indigenous Nations. Metrolinx would like to meet with your Nation to discuss the First Parliament site, its commemoration, as well as review the broader Ontario Line project if you wish. We recognize that traditional knowledge of this area may be sacred and/or not appropriate to be shared, but would appreciate any information that may be appropriate for Metrolinx to consider.

This letter is not intended to replace engagement but to provide a high level summary for your information. We would very much appreciate meeting with your Nation to discuss in more detail. Please let me know if you have any questions or concerns. We appreciate the volume of documents that Metrolinx has shared with your Nation. If you have any questions or concerns, please do not hesitate to contact me.

Miigwetch,

Fallon

**Delivered by email**

Dear Chief Mowat,

**RE: Ontario Line Project - First Parliament Site and Lime Kiln Site**

Metrolinx, a regional transportation agency, is helping to transform the way the Greater Golden Horseshoe moves by building a fast, convenient and integrated transit network. As part of this work, Metrolinx is continuing the pre-construction planning of the Ontario Line which will bring nearly 16 kilometres of subway service to Toronto.

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Alderville First Nation. Metrolinx appreciates and respects Alderville First Nation's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to share with Alderville First Nation information regarding Corktown Station early works and additional information regarding upcoming field visits and investigations at the Corktown Station early works site, which includes two registered archaeological sites, the First Parliament site and the Lime Kiln site.

**Project Description**

The proposed Ontario Line is a new 16-kilometer subway line, which will occupy an exclusive right-of-way system encompassing a combination of below-grade, above-grade, and at-grade alignment. The route (Figure 1) will run from Ontario Place/Exhibition through downtown Toronto to the Ontario Science Centre in the City of Toronto, with six (6) potential interchange stations and 17 new connections to GO Transit, existing subways and streetcars. More information on the Project can be found on our website: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)

**Corktown Station Early Works**

As communicated in the letter sent to Alderville First Nation on March 11, 2021, the Corktown Station site has been identified for launching tunnel excavation equipment for the downtown and Don Yard segments of the proposed Ontario Line alignment, as well as the location of the Corktown Station. The First Parliament and Lime Kiln Sites, located within the Corktown Station area, are known archaeological sites which require additional archaeological study ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures, followed by completion of necessary archaeological studies, is required. Completion of this preparatory work on an expedited basis is essential to allow for the timely delivery of the overall Project and is anticipated to begin in the Fall 2021, subject to the completion of the Corktown Station early works process in accordance with Ontario Regulation 341/20: Ontario Line Project.

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These activities will enable completion of environmental due diligence investigations, including archaeological assessments. These activities will occur on properties within the Corktown Station early works project footprint, as shown in **Figure 1**.

Figure 1: Map of Corktown Station Early Works

Environmental impacts of Corktown Station early works are being assessed in accordance with O. Reg. 341/20. Metrolinx shared the draft Corktown Station Early Works Report and associated discipline reports with Alderville First Nation on March 11, 2021 and had requested any comments to be provided by April 9, 2021.

## Archaeological Work at the First Parliament Site and Lime Kiln Site

Metrolinx appreciates the significance of archaeology to Alderville First Nation. The properties at 265 Front Street East, 271 Front Street East, and 25 Berkeley Street, in the St. Lawrence neighbourhood of the City of Toronto, are collectively host to the First Parliament Site. It is located on the southwest corner of Parliament Street and King Street, between Parliament Street and Berkeley Street. The First Parliament Site is a registered archaeological site (AjGu-41) which may include resources associated with the First and Second Parliament Buildings, the Home District Gaol, and Consumers' Gas company buildings. The surface of the property is currently occupied by automotive businesses, including a car dealership, car wash, and surface parking lot. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and remnants of early Toronto industry may be found at this site.

North of the First Parliament Site is another registered archaeological site (AjGu-64), the Lime Kiln Site, which includes remains from the Toronto Lime Works Company. A variety of structural features, in various states of preservation, have been documented on this site. The location of the Lime Kiln Site and the First Parliament Site are shown in **Figure 2**.

Figure 2: Location of First Parliament Site and Lime Kiln Site Areas

The First Parliament Site and Lime Kiln Site require additional archaeological studies ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures is necessary. Completion of this preparatory work is essential to allow for the timely delivery of the Ontario Line.

Archaeological fieldwork to remove or protect archaeological resources is anticipated to commence in early Fall 2021, and a workplan for these archaeological investigations is under development. As mentioned in the letter sent on March 11, 2021, Alderville First Nation is invited to participate in all archaeological fieldwork, and to review and provide comments on forthcoming reports.

### **Feedback on Commemoration of First Parliament Site**

Metrolinx appreciates that the history of the First Parliament site is not one simply of Canadian origin, but rather holds longer history and tradition. Metrolinx also appreciates that the site of the First Parliament of Upper Canada is linked to a history of colonization and harmful practices towards Indigenous Peoples. Given the significance of this site, Metrolinx is engaging with Indigenous Nations, City of Toronto and the broader community to identify opportunities for commemoration. Metrolinx is committed to ensuring that any feedback from Alderville First Nation regarding the significance of this site is considered as part of this commemoration. Metrolinx appreciates that traditional or cultural knowledge about this site may be sacred and/or not be appropriate to be shared but welcomes any comments or ideas from Alderville First Nation that may be appropriate to commemorate Indigenous Peoples.

### **Engagement**

Metrolinx is committed to an open, respectful, and transparent relationship with Alderville First Nation. We would like to meet with Alderville First Nation to better understand any significance the First Parliament site may have to your Nation. We are also happy to assist in reviewing the Corktown Station Early Works Report or reviewing the proposed archaeological workplan for this site. If Alderville First Nation requires additional information or materials, or you wish to discuss this project in more detail or set up a meeting, please contact Fallon Melander, Manager, Indigenous Relations at Metrolinx. She can be contacted at [IndigenousRelations@metrolinx.com](mailto:IndigenousRelations@metrolinx.com).

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*. Thank you for your time in reviewing these assessments.

Thank you for your time in reviewing this letter.

**Subject:** Ontario Line - Project Update and Draft Corktown Station Early Works Report for Review + Invitation to Participate in Archaeological Fieldwork

Dear Chief Mowat,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. Attached you will find a letter providing an update on the project. The purpose of this letter is to:

- Provide an update on the scope of the project work
- share the initial draft of the Early Works Report for the proposed Corktown Station

- Invite your Nation to participate in upcoming archaeological fieldwork

In an effort to streamline your review, we draw your attention to the attachment which provides an overview of the expected environmental impacts and proposed mitigations, as we know this may be of specific interest to you.

MetroLinx is also preparing a letter specific to works being planned within the Don Valley as we recognize the significance of this waterway to many Nations. We hope to share that letter soon. We are happy to meet with your Nation to discuss the Ontario Line and address any questions or concerns that your Nation may have.

We ask that any comments on the draft Corktown Station Early Works Report be provided no later than **April 15, 2021**. Please note that the Noise and Vibration Report, which will be part of the Early Works Report is still being prepared and we will share with your Nation by March 19, 2021.

The draft Corktown Station Early Works Report is available at the following link:

[REDACTED]

Please let us know as soon as possible if your Nation has interest in participating in future archaeological fieldwork.

We appreciate the volume of documents that MetroLinx has shared with your Nation.

If you have any questions or concerns, please do not hesitate to contact me.

Miigwetch,

Fallon

Dear Chief Mowat,

## **RE: Ontario Line Project - Corktown Station Early Works Report**

Metrolinx, a regional transportation agency, is helping to transform the way the Greater Golden Horseshoe region moves by building a fast, convenient and integrated transit network. As part of this work, Metrolinx is proceeding with the Ontario Line which will bring nearly 16 kilometres of subway service to Toronto. The purpose of this letter is to share information regarding the Ontario Line project with Alderville First Nation.

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Alderville First Nation. Metrolinx appreciates and respects Alderville First Nation's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to share with Alderville First Nation information regarding Corktown Station early works and invite feedback on the initial draft of the Corktown Station Early Works Report.

## **Project Description**

The Project is a new subway line with connections to Line 1 (Yonge-University) subway service at Osgoode and Queen Stations, Line 2 (Bloor-Danforth) subway service at Pape Station, and Line 5 (Eglinton Crosstown) service at the future Science Centre Station. Fifteen stations are proposed, with additional connections to three GO Transit lines (Lakeshore East, Lakeshore West and Stouffville), and the Queen, King, Bathurst, Spadina, Harbourfront and Gerrard/Carlton streetcar routes. The Project will reduce crowding on Line 1 and provide connections to new high-order rapid transit neighbourhoods. More information on the Project can be found on our website: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)

## **Ontario Line Environmental Assessment Process and Reports**

In 2020, Metrolinx provided Alderville First Nation with an outline of the Ontario Line environmental assessment process. The environmental assessment for the Ontario Line Project is being completed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20) made under the *Environmental Assessment Act*. The regulation outlines a Project-specific environmental assessment that includes an Environmental Conditions Report, an Environmental Impact Assessment Report and provides opportunity for Early Works Reports for assessment of works that are ready to proceed in advance of the Environmental Impact Assessment Report. An overview of the reports is outlined below and their anticipated publication timeline is provided in **Attachment 1**.

### Environmental Conditions Report

The Environmental Conditions Report characterizes existing environmental conditions within the Ontario Line study area through a combination of desktop review and field studies and was finalized in November 2020. The report also summarizes potential impacts and mitigation measures for consideration during project planning and design. Potential impacts and mitigation measures identified in the Environmental Conditions Report will be confirmed and refined within the Early Works Reports and the Environmental Impact Assessment Report.

### Early Works Reports

Metrolinx is assessing several early works components to support the main construction of the Ontario Line project. Early works are components of the Ontario Line Project that are anticipated to be ready to proceed before completion of the Environmental Impact Assessment Report, such as station construction, rail corridor expansion, utility relocation or bridge replacement or expansion, as defined in O. Reg. 341/20.

Initially, the early works required to support the Ontario Line project were assessed in a single report, which was shared in June 2020 and included Exhibition Station, Lower Don Bridges, Lakeshore East Joint Corridor and East Harbour early works.

Since then, the single Early Works Report has been split into several Early Works Reports, each covering either a single early works location or multiple locations if they are in close proximity. Each Early Works Report provides a description of the early works and alternatives considered, documents local environmental conditions, and outlines early works-specific environmental impacts, mitigation measures,

monitoring activities, potentially required permits and approvals and other components.

It is important to note that two new early works projects, Don Yard and Corktown Station, have been added as well. The Early Works Reports, including this new scope of work are summarized below:

- Exhibition Station Early Works  
Exhibition Station early works are documented in the Exhibition Station Early Works Report, finalized in February 2021.
- Lakeshore East Joint Corridor Early Works  
Lakeshore East Joint Corridor early works will be documented under a separate Early Works Report which will also include East Harbour Station.
- Lower Don Bridges & Don Yard Early Works  
Lower Don Bridges early works will be documented in the Lower Don Bridges and Don Yard Early Works Report. Don Yard is a new early works project that will include construction of Ontario Line tunnel and portal structures between Cherry Street and the Lower Don River and accompanying shift of the Richmond Hill and Lakeshore East GO tracks; installation or upgrading of retaining walls and noise barriers, where appropriate; and utility and signal infrastructure relocation or protection. The initial draft of the Lower Don Bridges and Don Yard Early Works Report is anticipated to be shared with Alderville First Nation in mid to late April.
- Corktown Station Early Works  
Corktown Station is a new early works project. Further information on Corktown Station early works is provided below.

### Environmental Impact Assessment Report

The main report produced as part of this process is the Environmental Impact Assessment Report. It will cover the construction and operation of the Ontario Line. The report will include a final description of the Ontario Line Project, environmental impact evaluation results, mitigation measures, monitoring activities, potentially required permits and approvals and other components as outlined in O. Reg. 341/20.

## **Work along the Don River and within the vicinity of the Don Valley**

Metrolinx appreciates the significance of waterways to Alderville First Nation. As such, Metrolinx is preparing an information letter specific to work occurring near or along the Don River and within the Valley. Metrolinx will provide details about the scope of work and anticipated natural environmental and archaeological assessments. Metrolinx is committed to exploring opportunities for Alderville First Nation to participate in these assessments should Alderville First Nation express interest.

## **Corktown Station Early Works**

The Corktown Station site has been identified for launching tunnel excavation equipment for the downtown and Don Yard segments of the proposed Ontario Line alignment, as well as the location for the Corktown Station. The First Parliament site, located within the Corktown Station area, is a known archaeological site which requires additional archaeological study ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures, followed by completion of necessary archaeological studies, is required. Completion of this preparatory work on an expedited basis is essential to allow for the timely delivery of the overall Project.

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These activities will enable completion of environmental due diligence investigations, including archaeological assessments. These activities will occur on properties within the Corktown Station early works project footprint, as shown in **Figure 2**.

Figure 2: Map of Corktown Station Early Works

Environmental impacts of Corktown Station early works are being assessed in accordance with O. Reg. 341/20.

Metrolinx is sharing the initial draft of the Corktown Station Early Works Report, including the Corktown Station Natural Environment Report, via the Dropbox link enclosed in the email for Alderville First Nation's review. The Corktown Station Early Works Report documents the assessment of Corktown Station early works. It also outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures, and a consultation record. For a summary of the potential mitigation measures identified, please see the table found as **Attachment 2**.

Note that the initial draft of the report enclosed in the email currently does not include information on noise and vibration as the Corktown Station Noise and Vibration Report is still being prepared. The initial draft of the Corktown Station Noise and Vibration Report is anticipated to be shared with Alderville First Nation on **March 19, 2021** for review.

Metrolinx welcomes any comments or feedback on the initial draft of the Corktown Station Early Works Report from Alderville First Nation. Please provide these in writing no later than **April 15, 2021**.

Based on our currently anticipated schedule (**Figure 1**), the Notice of Publication of Draft Corktown Station Early Works Report is planned for late-April 2021, at which point the draft report will be available to all interested parties for review, including Alderville First Nation, the public and regulatory agencies.

### Archaeology

As outlined above, archaeological assessments are anticipated to take place as part of advancing Corktown Station Early Works. Metrolinx would appreciate any interest Alderville First Nation may have in participating in planned future archaeological fieldwork for this site. The maps in **Attachment 3** illustrate the areas that will be subject to future archaeological assessments that include fieldwork. Upon receipt of Alderville First Nation's interest in participating, Metrolinx will work to coordinate your Nation's involvement.

Metrolinx acknowledges that Alderville First Nation should be aware of and engaged regarding any future archaeological work, especially the discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will ensure that future archaeological assessments are provided to Alderville First Nation in draft form, prior to submission to MHSTCI.

### **Engagement**

Metrolinx is committed to an open, respectful, and transparent relationship with Alderville First Nation. We appreciate the significant volume of documents related to this Project that have been shared with Alderville First Nation. We are happy to assist in the review of these documents by meeting with Alderville First Nation or working to address any questions that Alderville First Nation may have about this Project. If you require additional information or materials or if you wish to discuss these Projects in more detail or set up a meeting, please contact Fallon Melander, Manager of Metrolinx's Indigenous Relations Office at [IndigenousRelations@metrolinx.com](mailto:IndigenousRelations@metrolinx.com).

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*. Thank you for your time in reviewing these assessments.

Thank you for your time in reviewing this letter.

| Vegetation Communities                                                                                      | <ul style="list-style-type: none"><li>City and private tree removal</li></ul>                                                                                                                            | <ul style="list-style-type: none"><li>An Arborist Report by an International Society of Arboriculture Certified Arborist will be prepared, if required, in accordance with the Ontario Forestry Act R.S.O. 1990, and other regulations and best management practices as applicable.</li><li>The Arborist Report will include, but not be limited to the individual identification of all trees within the Corktown Station early works construction areas including those that require removal or preservation, or trees that may be injured. Trees to be identified may include those on Metrolinx property, trees on public and private lands, and boundary trees. City of Toronto by-laws dictate the minimum area buffers to be inventoried and Diameter at Breast Height which requires inventory.</li><li>Prior to the undertaking of tree removals, a Tree Removal Strategy/Tree Preservation Plan will be developed to document tree protection and mitigation measures that follow the City of Toronto Tree Protection Policy and Specifications for Construction Near Trees Guidelines (2016b) and adherence with best practices, standards and regulations on safety, environmental and wildlife protections.</li><li>Compensation for tree removals will be undertaken in accordance with provisions outlined in the Metrolinx Vegetation Guideline (2020).</li><li>Pruning of branches will be conducted through the implementation of proper arboricultural techniques.</li><li>Tree Protection Zone fencing will be established to protect and prevent tree injuries. Tree Protection Zones will be clearly staked prior to construction using barriers in accordance with local by-law requirements.</li></ul> | <ul style="list-style-type: none"><li>Regular inspection in areas of vegetation removal will be undertaken as required during construction to ensure that fencing is intact, only specified trees are removed and no damage is caused to the remaining trees and adjacent vegetation communities.</li><li>On-site inspection will be undertaken to confirm the implementation of the mitigation measures and identify corrective actions if required. Corrective actions may include additional site maintenance and alteration of activities to minimize impacts.</li><li>If required, the approach to compensation monitoring will be developed in accordance with Metrolinx’s Vegetation Guideline (2020).</li></ul> |

| Environmental Component                               | Potential Impact                                                                                                                                                                              | Mitigation Measure(s)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Monitoring Activities                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|-------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Vegetation Communities</b>                         | <ul style="list-style-type: none"><li>▪ Soil contamination as a result of spills (e.g., grease and/or fuel) from equipment use</li><li>▪ Introduction or spread of Invasive Species</li></ul> | <ul style="list-style-type: none"><li>▪ A Spill Prevention and Contingency Plan will be developed and adhered to. Spills will be immediately contained and cleaned up in accordance with provincial regulatory requirements and the contingency plan.</li><li>▪ Refuelling shall be done within refuelling stations lined with appropriate material to prevent seepage and fuel discharge.</li><li>▪ All machinery, construction equipment and vehicles arriving on site should be in clean condition (e.g., free of fluid leaks, soils containing seeds of plant material from invasive species) and be inspected and washed in accordance with the Clean Equipment Protocol for Industry (Halloran et al., 2013) prior to arriving and leaving the construction site in order to prevent the spread of invasive species to other locations.</li></ul>                  | <ul style="list-style-type: none"><li>▪ On-site inspection will be undertaken to confirm the implementation of the mitigation measures and identify corrective actions if required. Corrective actions may include additional site maintenance and alteration of activities to minimize impacts.</li><li>▪ Ensure precautions are being taken to minimize the spread of invasive species by implementing the Clean Equipment Protocol for Industry (Halloran et al., 2013) on equipment and machinery prior to moving sites.</li><li>▪</li></ul> |
| <b>Wildlife and Wildlife Habitat – General</b>        | <ul style="list-style-type: none"><li>▪ Disturbance, displacement or mortality of wildlife</li></ul>                                                                                          | <ul style="list-style-type: none"><li>▪ Prior to construction, investigation of the Corktown Station early works construction areas for wildlife and wildlife habitat that may have established following the completion of previous surveys will be undertaken, as appropriate.</li><li>▪ If wildlife is encountered, measures will be implemented to avoid destruction, injury, or interference with the species, and/or its habitat. For example, construction activities will cease or be reduced, and wildlife will be encouraged to move off-site and away from the construction area on its own. A qualified Biologist will be contacted to define the appropriate buffer required from wildlife.</li></ul>                                                                                                                                                       | <ul style="list-style-type: none"><li>▪ On-site inspection by on-site environmental workers or construction staff should occur daily within the construction area to ensure that no wildlife is trapped within the construction area.</li><li>▪ On-site inspection will be undertaken to confirm the implementation of the mitigation measures and identify corrective actions if required. Corrective actions may include additional site maintenance and alteration of activities to minimize impacts.</li></ul>                               |
| <b>Significant Wildlife Habitat: Common Nighthawk</b> | <ul style="list-style-type: none"><li>▪ Removal of candidate nesting habitat for Common Nighthawk</li></ul>                                                                                   | <ul style="list-style-type: none"><li>▪ Refer below to mitigation measures described for Migratory Breeding Birds and Nests.</li><li>▪ Demolition of buildings should be scheduled outside of the breeding bird season of April 1 to August 31. If this is not possible and buildings must be demolished during this period, the following will be completed:</li><li>▪ The roofs will be checked for presence of gravel. If gravel is not present, then the building is unlikely to provide suitable nesting habitat for Common Nighthawk. If gravel is present, a search for eggs and nesting activity for Common Nighthawk on the roof will be conducted. If nests or nesting activity of Common Nighthawk are confirmed, the building cannot be demolished until it is confirmed by a Qualified Biologist that young have fully fledged and left the nest.</li></ul> | <ul style="list-style-type: none"><li>▪ Refer below for monitoring requirements described for Migratory Breeding Birds and Nests.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                      |
| <b>Migratory Breeding Birds and Nests</b>             | <ul style="list-style-type: none"><li>▪ Disturbance or destruction of migratory bird nests</li></ul>                                                                                          | <ul style="list-style-type: none"><li>▪ All works must comply with the Migratory Birds Convention Act, including timing windows for the nesting period (April 1 to August 31 in Ontario).</li><li>▪ If activities are proposed to occur during the general nesting period, a breeding bird and nest survey will be undertaken prior to required activities. Nest searches by an experienced searcher are required and will be completed by a qualified Biologist no more than 48 hours prior to vegetation removal.</li><li>▪ If a nest of a migratory bird is found outside of this nesting period (including a ground nest) it still receives protection.</li></ul>                                                                                                                                                                                                    | <ul style="list-style-type: none"><li>▪ Regular monitoring (field observations, on-site inspections) will be undertaken to confirm that activities do not encroach into nesting areas or disturb active nesting sites.</li></ul>                                                                                                                                                                                                                                                                                                                 |

If clarification is required regarding regulatory requirements, the appropriate regulatory agencies will be consulted.

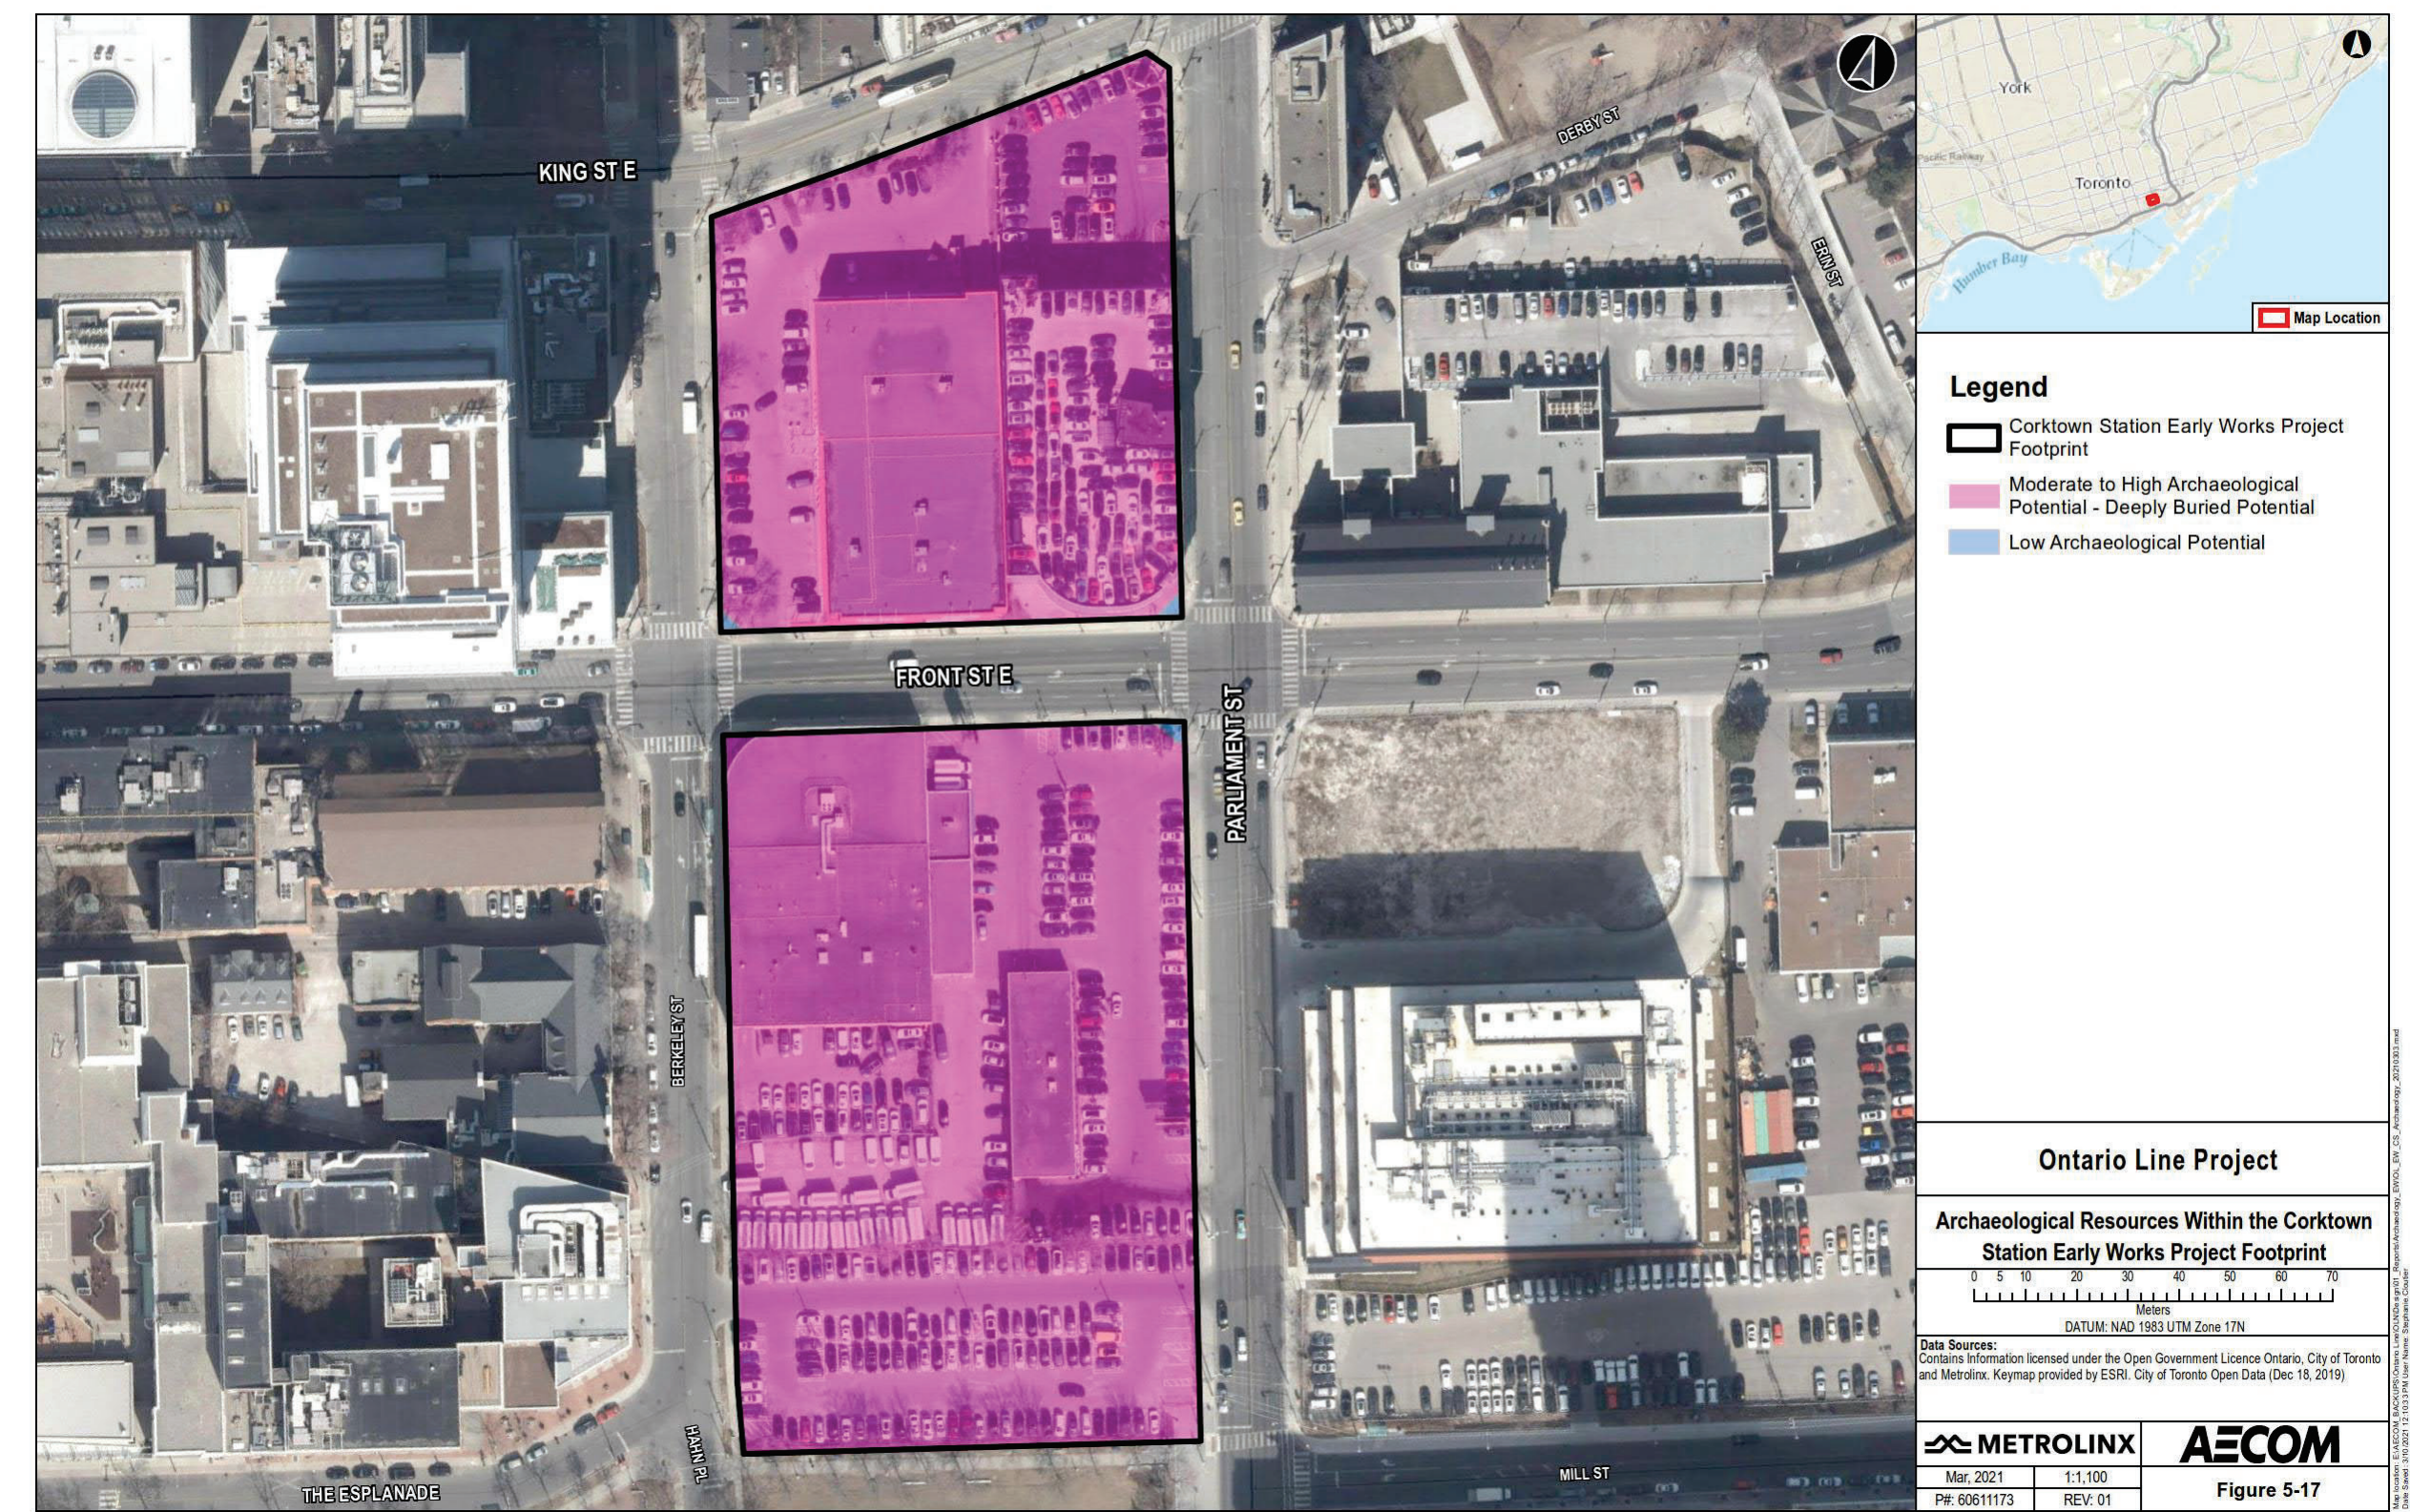

Table 6-8: Potential Impacts, Mitigation Measures and Monitoring Activities – Archaeological Resources

| Environmental Component  | Potential Impact                                                                                                                                                            | Mitigation Measure(s)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Monitoring Activities                                                                                                                                                                                                          |
|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Archaeological Potential | <ul style="list-style-type: none"><li>Potential for the disturbance of registered archaeological sites and/or archaeological resources not previously identified.</li></ul> | <ul style="list-style-type: none"><li>Areas identified as retaining archaeological potential in the Corktown Station Early Works Project Footprint, as per the Ontario Line South Stage 1 Archaeological Assessment Report (AECOM, 2020c), are shown in <b>Figure 5-17</b>, and include the following. Should ground disturbing activities<sup>29</sup> be planned within these areas, further archaeological assessment must be completed prior to any ground disturbing activities.<ul style="list-style-type: none"><li>The majority of the Corktown Station Early Works Project Footprint on either side of Front Street retains moderate to high archaeological potential where deeply buried archaeological potential remains, such as for discovering pre-contact Indigenous materials and/or materials related to the early development and expansion of the City of Toronto, including the First and Second Parliament Buildings, the Home District Gaol, and the Consumers’ Gas company buildings.</li></ul></li><li>Given the significance of the First Parliament Site, all previous site specific archaeological assessments should be reviewed to determine what additional archaeological work is required.</li><li>Any additional Archaeological Assessments (e.g., Stage 2, Stage 3 if recommended by the Stage 2) shall be completed as early as possible, and prior to any ground disturbing activities. This work shall be done in accordance with the Ministry of Heritage, Sport, Tourism and Culture Industries’ Standards and Guidelines for Consultant Archaeologists (2011) to identify any archaeological resources that may be present.</li><li>Indigenous Nations will be invited to participate in monitoring requirements for any subsequent archaeological work is recommended. All future archaeological assessment findings will be shared with the Indigenous Nations that were engaged during the Stage 1 archaeological assessment.</li></ul> | <ul style="list-style-type: none"><li>None identified at this time.</li><li>Metrolinx will adhere to all recommendations in any subsequent archaeological assessments, including monitoring activities, as required.</li></ul> |
| Archaeological Resources | <ul style="list-style-type: none"><li>Potential recovery of unexpected archaeological resources during construction.</li></ul>                                              | <ul style="list-style-type: none"><li>Should previously unknown or unassessed deeply buried archaeological resources be uncovered during construction activities, they may be a new archaeological site and therefore subject to Section 48(1) of the Ontario Heritage Act. The proponent or person discovering the archaeological resources must cease alteration of the site immediately and engage a licensed archaeologist to carry out archaeological field work, in compliance with Section 48(1) of the Ontario Heritage Act. Any person discovering human remains must immediately notify the police or coroner and the Registrar of Cemeteries, Ministry of Government Services. In addition, consultation with relevant Indigenous Nations will be initiated in the event that archaeological resources or human remains are discovered.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <ul style="list-style-type: none"><li>None identified at this time.</li><li>Metrolinx will adhere to all recommendations in any subsequent archaeological assessments, including monitoring activities, as required.</li></ul> |

<sup>29</sup> Ground disturbing activities can be defined as any and all activities that will or have the potential to impact/disturb the area below the surface. Example of activities include, but is not limited to, heavy machine movement/weight, clearing, grading, excavating, trenching, drilling, and transporting and filling of land.

---

Dear Chief Monague,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. Attached you will find a letter providing an update on the project. The purpose of this letter is to share the Draft Corktown Station Early Works Report (EWR) prepared for the Ontario Line Project and provide a continued invitation for feedback.

In an effort to streamline your review, we draw your attention to the attachment which provides an overview of the expected environmental impacts and proposed mitigations, as we know this may be of specific interest to you.

We ask that you provide any comments no later than June 11, 2021.

The reports are available at the following link:

We appreciate the volume of documents that Metrolinx has shared with your Nation. If you have any questions or concerns, please do not hesitate to contact the Indigenous Relations Office.

Miigwetch,

Fallon

## Notice of Publication of Draft Corktown Station Early Works Report Ontario Line Project

### The Project

The Ontario Line will bring 15.6 kilometres of new subway service to Toronto to make it faster and easier for people to get where they need to be each day. The line will stretch across the city, from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line is proposed to include 15 potential stations, including six interchange stations, and connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 of its stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable commutes.

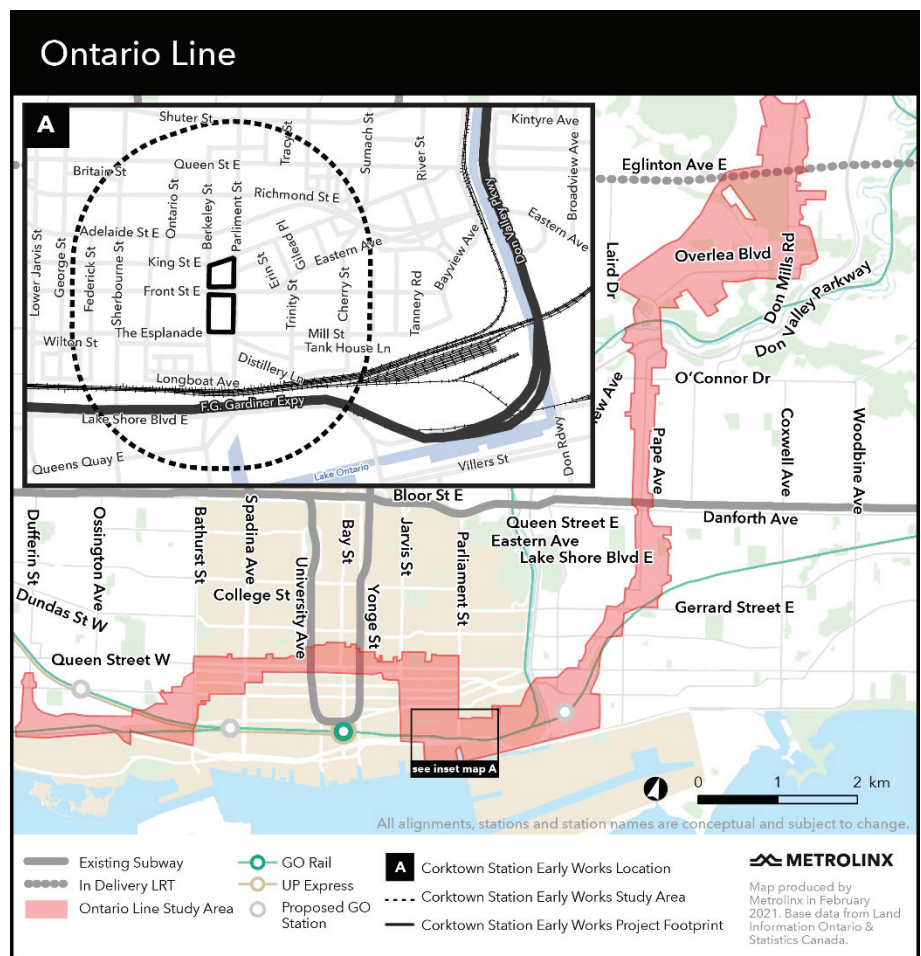

### Corktown Station Early Works

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These early works are being advanced to prepare the site for future construction staging and laydown to support tunneling and below ground construction activities, and work associated with the future Corktown Station.

The First Parliament site, located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail), and remnants of early Toronto industry may be found here.

Metrolinx is eager to unlock the potential of the site and work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

Environmental impacts of Corktown Station early works are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*. In accordance with Section 8 of O. Reg. 341/20, Metrolinx has prepared the Draft Corktown Station Early Works Report (EWR) that is now available for public review.

The Draft EWR documents the assessment of Corktown Station early works. The report outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures and a consultation record.

### **The Draft Early Works Report Review and Consultation Process**

Effective **May 12, 2021**, the Draft Corktown Station EWR will be available for review on the project webpage ([www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)).

As we temporarily shift to virtual open houses, please join us online from **May 12 to June 11, 2021** to find out more about and provide your feedback on the Draft Corktown Station EWR via the webpage form.

Those who wish to provide comments on the Draft Corktown Station EWR must do so by **June 11, 2021** and submit them using the webpage form or address them to the following email: [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com).

Section 10 of O. Reg. 341/20 requires Metrolinx to establish an issues resolution process to attempt to resolve any concerns raised by the public or Indigenous Nations during the review period. At the end of the review period, Metrolinx will update the Draft Corktown Station EWR by adding a description of the issues resolution process, what Metrolinx did to address any concerns, and if the early works implementation timeline will be impacted as a result of addressing concerns. Metrolinx will then publish the Final Corktown Station EWR on the project webpage: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline) and issue a Notice of Publication of Final Corktown Station EWR.

To obtain a copy of the Draft Corktown Station EWR, please contact the project email listed above.

**Josh Vandezande (T: 416-202-5100, E: [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com)) may be contacted on behalf of Metrolinx.**

Dear Chief Monague,

**RE: Ontario Line Project - Notice of Publication of Draft Corktown Station Early Works Report**

Metrolinx, a regional transportation agency, is helping to transform the way the Greater Golden Horseshoe region moves by building a fast, convenient and integrated transit network. As part of this work, Metrolinx is proceeding with the Ontario Line which will bring 15.6 kilometres of subway service to Toronto. The purpose of this letter is to share information regarding the Ontario Line project with Beausoleil First Nation.

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Beausoleil First Nation. Metrolinx appreciates and respects Beausoleil First Nation's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to share with Beausoleil First Nation the Draft Corktown Station Early Works Report (EWR).

**Project Description**

The Ontario Line will stretch from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line is proposed to include 15 stations, including six interchange stations, and connections to three GO train lines, two existing subway lines, the Eglinton Crosstown LRT, and streetcar lines. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable commutes.

More information on the Project can be found on our website:

[www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)

The initial draft of the Corktown Station EWR and a letter outlining Corktown Station early works were shared with Beausoleil First Nation on March 11, 2021. As outlined in the letter, environmental impacts of the Ontario Line Project are being assessed in

accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*.

## Draft Corktown Station Early Works Report

In accordance with Section 8 of O. Reg. 341/20, Metrolinx has prepared a Draft Corktown Station EWR that documents the assessment of Corktown Station early works.

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These early works are being advanced to prepare the site for future construction staging and laydown to support tunneling and below ground construction activities, and work associated with the future Corktown Station. The location of the Corktown Station early works project footprint and study area can be viewed below in **Figure 1**.

Figure 1: Map of Corktown Station Early Works

10 Bay Street  
Toronto, ON M5J 2N8

416.202.4967  
metrolinx.com

The First Parliament site, located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail) and remnants of early Toronto industry may be found here. Metrolinx is eager to work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

The EWR documents the assessment of Corktown Station early works and outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures, and a consultation record.

The Draft EWR is available for your review and can be found via the Dropbox link shared in the body of the email that is associated with this letter. We welcome any additional comments you may have on the Draft EWR. The Draft EWR is available for review and comment starting **May 12, 2021** and ending on **June 11, 2021**. The Notice of Publication of Draft Corktown Station EWR is provided in **Attachment 1**. The Draft EWR will be updated following the review period, and the Final EWR will be published on the Project webpage ([www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)) and shared with Beausoleil First Nation.

#### Potential Impacts and Mitigation Measures

The tables found enclosed in **Attachment 2 and 3** provide a summary of natural environment and archaeology potential impacts and mitigation measures identified as part of the Draft EWR that may be of interest to *Beausoleil First Nation*. If *Beausoleil First Nation* has any feedback about these potential impacts and/or mitigation strategies, or any other aspects of the Ontario Line, we welcome the opportunity to discuss further.

#### Revisions to the Initial Draft of the Corktown Station Early Works Report

In accordance with O. Reg. 341/20, Metrolinx has now incorporated comments and feedback from the initial round of engagement with Indigenous Nations and agencies on the initial draft of the Corktown Station EWR into the Draft EWR.

To streamline capacity for Beausoleil First Nation to provide comments or feedback, a summary of revisions to the EWR since the circulation of the initial draft of the EWR is as follows:

- Minor editorial changes to address grammatical and syntax errors and updates to reflect comments received from agencies;
- Clarification that the project operations, construction of Corktown Station and other project components will be assessed in the Ontario Line Environmental Impact Assessment Report;
- Inclusion of information on the Parkland Strategy (City of Toronto, 2019), First Parliament Master Plan (City of Toronto, 2020) and additional information on planned community services and facilities in the Corktown Station Early Works Study Area;
- Edits to the text to reflect that the Ministry of Heritage, Sport, Tourism and Culture Industries' (MHSTCI) Minister's Consent has been granted for the demolition and removal of the non-heritage buildings at 265 Front Street East and removal of the heritage attributes at 265 Front Street East, 271 Front Street East and 25 Berkeley Street located on the First Parliament Site, and affirming Metrolinx's commitment to fulfilling the conditions outlined in the Minister's Consent, including completion of archaeological requirements;
- Additional mitigation measures for environmental disciplines such as archaeology, air quality and traffic and transportation, that include:
  - Coordination and completion of required archaeological investigations, early works activities and/or activities that have the potential for vibration effects such that buried archaeological resources are appropriately considered;
  - Use of non-chloride dust suppressants; and
  - Consultation with the City of Toronto to minimize potential impacts during special events (e.g., the Toronto Christmas Market at the Distillery District) should closures or long-term impacts be required.
- Revision of traffic and transportation figures to include additional information such as intersection names and inclusion of an additional noise and vibration figure to show representative receptor locations.

## Engagement

Metrolinx is committed to an open, respectful, and transparent relationship with Beausoleil First Nation. We appreciate the significant volume of documents related to this Project that have been shared with Beausoleil First Nation. We are happy to assist in the review of these documents by meeting with Beausoleil First Nation or working to address any questions that Beausoleil First Nation may have about this Project. If you require additional information or materials or if you wish to discuss these Projects in more detail or set up a meeting, please contact Fallon Melander, Manager of Metrolinx's Indigenous Relations Office at [IndigenousRelations@metrolinx.com](mailto:IndigenousRelations@metrolinx.com).

Metrolinx welcomes any comments or feedback on the Draft EWR from Beausoleil First Nation. Please provide these in writing no later than **June 11, 2021**. Comments and information regarding this draft report will be collected to assist in meeting the requirements of the *Environmental Assessment Act* and may be included in study documentation. With the exception of personal information, all comments will become part of the public record. Kindly note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*.

Thank you for your time in reviewing this letter.

Yours Truly,

**Subject:** Ontario Line Project - Invitation to Meet & provide input on First Parliament Site  
**Date:** Monday, April 12, 2021 3:47:47 PM  
**Attachments:** [REDACTED]

---

Dear Chief Monague,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. We recently communicated with your Nation about the proposed Corktown Station which is along the planned alignment of the Ontario Line. This location includes parcels of land which were once the site of Upper Canada's First Parliament buildings. Metrolinx and its partners are exploring opportunities to commemorate the history of this site, and have been engaging with various parties including the City of Toronto and the Mississaugas of the Credit First Nation, on whose treaty territory this project is occurring.

Given the significant chance of recovering Indigenous and European artifacts during the Corktown Station Early Works, a detailed archaeological workplan is being developed. Metrolinx recognizes the importance and value of Indigenous monitors for any archaeology related to the Ontario Line Project. In our previous communication, an invitation was included for your Nation to participate in any archaeological fieldwork and monitoring during the Corktown Station Early Works, including demolition of modern buildings currently on the First Parliament site.

This work is anticipated to commence in Fall 2021, and if you have not yet expressed interest in participating, please feel free to do so at your earliest convenience. As a reminder any comments on the draft Corktown Station Early Works Report should be provided no later than **April 15, 2021**.

Metrolinx recognizes that the history of this location extends beyond European use, and as such, wants to take the opportunity to understand any significance it may have to Indigenous Nations. Metrolinx would like to meet with your Nation to discuss the First Parliament site, its commemoration, as well as review the broader Ontario Line project if you wish. We recognize that traditional knowledge of this area may be sacred and/or not appropriate to be shared, but would appreciate any information that may be appropriate for Metrolinx to consider.

This letter is not intended to replace engagement but to provide a high level summary for your information. We would very much appreciate meeting with your Nation to discuss in more detail. Please let me know if you have any questions or concerns. We appreciate the volume of documents that Metrolinx has shared with your Nation. If you have any questions or concerns, please do not hesitate to contact me.

Miigwetch,

Fallon

Christian Island, ON L9M 0A9  
**Delivered by Email**

Dear Chief Monague,

**RE: Ontario Line Project - First Parliament Site and Lime Kiln Site**

Metrolinx, a regional transportation agency, is helping to transform the way the Greater Golden Horseshoe moves by building a fast, convenient and integrated transit network. As part of this work, Metrolinx is continuing the pre-construction planning of the Ontario Line which will bring nearly 16 kilometres of subway service to Toronto.

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Beausoleil First Nation. Metrolinx appreciates and respects Beausoleil First Nation's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to share with Beausoleil First Nation information regarding Corktown Station early works and additional information regarding upcoming field visits and investigations at the Corktown Station early works site, which includes two registered archaeological sites, the First Parliament site and the Lime Kiln site.

**Project Description**

The proposed Ontario Line is a new 16-kilometer subway line, which will occupy an exclusive right-of-way system encompassing a combination of below-grade, above-grade, and at-grade alignment. The route (Figure 1) will run from Ontario Place/Exhibition through downtown Toronto to the Ontario Science Centre in the City of Toronto, with six (6) potential interchange stations and 17 new connections to GO Transit, existing subways and streetcars. More information on the Project can be found on our website: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)

**Corktown Station Early Works**

As communicated in the letter sent to Beausoleil First Nation on March 11, 2021, the Corktown Station site has been identified for launching tunnel excavation equipment for the downtown and Don Yard segments of the proposed Ontario Line alignment, as well as the location of the Corktown Station. The First Parliament and Lime Kiln Sites, located within the Corktown Station area, are known archaeological sites which require additional archaeological study ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures, followed by completion of necessary archaeological studies, is required. Completion of this preparatory work on an expedited basis is essential to allow for the timely delivery of the overall Project and is anticipated to begin in the Fall 2021, subject to the completion of the Corktown Station early works process in accordance with Ontario Regulation 341/20: Ontario Line Project.

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These activities will enable completion of environmental due diligence investigations, including archaeological assessments. These activities will occur on properties within the Corktown Station early works project footprint, as shown in **Figure 1**.

Figure 1: Map of Corktown Station Early Works

Environmental impacts of Corktown Station early works are being assessed in accordance with O. Reg. 341/20. Metrolinx shared the draft Corktown Station Early Works Report and associated discipline reports with Beausoleil First Nation on March 11, 2021 and had requested any comments to be provided by April 9, 2021.

## Archaeological Work at the First Parliament Site and Lime Kiln Site

Metrolinx appreciates the significance of archaeology to Beausoleil First Nation. The properties at 265 Front Street East, 271 Front Street East, and 25 Berkeley Street, in the St. Lawrence neighbourhood of the City of Toronto, are collectively host to the First Parliament Site. It is located on the southwest corner of Parliament Street and King Street, between Parliament Street and Berkeley Street. The First Parliament Site is a registered archaeological site (AjGu-41) which may include resources associated with the First and Second Parliament Buildings, the Home District Gaol, and Consumers' Gas company buildings. The surface of the property is currently occupied by automotive businesses, including a car dealership, car wash, and surface parking lot. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and remnants of early Toronto industry may be found at this site.

North of the First Parliament Site is another registered archaeological site (AjGu-64), the Lime Kiln Site, which includes remains from the Toronto Lime Works Company. A variety of structural features, in various states of preservation, have been documented on this site. The location of the Lime Kiln Site and the First Parliament Site are shown in **Figure 2**.

Figure 2: Location of First Parliament Site and Lime Kiln Site Areas

The First Parliament Site and Lime Kiln Site require additional archaeological studies ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures is necessary. Completion of this preparatory work is essential to allow for the timely delivery of the Ontario Line.

Archaeological fieldwork to remove or protect archaeological resources is anticipated to commence in early Fall 2021, and a workplan for these archaeological investigations is under development. As mentioned in the letter sent on March 11, 2021, Beausoleil First Nation is invited to participate in all archaeological fieldwork, and to review and provide comments on forthcoming reports.

### **Feedback on Commemoration of First Parliament Site**

Metrolinx appreciates that the history of the First Parliament site is not one simply of Canadian origin, but rather holds longer history and tradition. Metrolinx also appreciates that the site of the First Parliament of Upper Canada is linked to a history of colonization and harmful practices towards Indigenous Peoples. Given the significance of this site, Metrolinx is engaging with Indigenous Nations, City of Toronto and the broader community to identify opportunities for commemoration. Metrolinx is committed to ensuring that any feedback from Beausoleil First Nation regarding the significance of this site is considered as part of this commemoration. Metrolinx appreciates that traditional or cultural knowledge about this site may be sacred and/or not be appropriate to be shared but welcomes any comments or ideas from Beausoleil First Nation that may be appropriate to commemorate Indigenous Peoples.

### **Engagement**

Metrolinx is committed to an open, respectful, and transparent relationship with Beausoleil First Nation. We would like to meet with Beausoleil First Nation to better understand any significance the First Parliament site may have to your Nation. We are also happy to assist in reviewing the Corktown Station Early Works Report or reviewing the proposed archaeological workplan for this site. If Beausoleil First Nation requires additional information or materials, or you wish to discuss this project in more detail or set up a meeting, please contact Fallon Melander, Manager, Indigenous Relations at Metrolinx. She can be contacted at [IndigenousRelations@metrolinx.com](mailto:IndigenousRelations@metrolinx.com).

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*. Thank you for your time in reviewing these assessments.

Thank you for your time in reviewing this letter.

**Subject:** Ontario Line - Project Update and Draft Corktown Station Early Works Report for Review + Invitation to Participate in Archaeological Fieldwork

Dear Chief Monauge,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. Attached you will find a letter providing an update on the project. The purpose of this letter is to:

- Provide an update on the scope of the project work
- share the initial draft of the Early Works Report for the proposed Corktown Station

- Invite your Nation to participate in upcoming archaeological fieldwork

In an effort to streamline your review, we draw your attention to the attachment which provides an overview of the expected environmental impacts and proposed mitigations, as we know this may be of specific interest to you.

Metrolinx is also preparing a letter specific to works being planned within the Don Valley as we recognize the significance of this waterway to many Nations. We hope to share that letter soon. We are happy to meet with your Nation to discuss the Ontario Line and address any questions or concerns that your Nation may have.

We ask that any comments on the draft Corktown Station Early Works Report be provided no later than **April 15, 2021**. Please note that the Noise and Vibration Report, which will be part of the Early Works Report is still being prepared and we will share with your Nation by March 19, 2021.

The draft Corktown Station Early Works Report is available at the following link:

[REDACTED]

Please let us know as soon as possible if your Nation has interest in participating in future archaeological fieldwork.

We appreciate the volume of documents that Metrolinx has shared with your Nation.

If you have any questions or concerns, please do not hesitate to contact me.

Miigwetch,

Fallon

Chief Guy Monague  
Beausoleil First Nation  
11 O'Gema Miikaan  
Christian Island, ON L9M 0A9  
**Delivered by Email**

Dear Chief Monague,

**RE: Ontario Line Project - Corktown Station Early Works Report**

Metrolinx, a regional transportation agency, is helping to transform the way the Greater Golden Horseshoe region moves by building a fast, convenient and integrated transit network. As part of this work, Metrolinx is proceeding with the Ontario Line which will bring nearly 16 kilometres of subway service to Toronto. The purpose of this letter is to share information regarding the Ontario Line project with Beausoleil First Nation.

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Beausoleil First Nation. Metrolinx appreciates and respects Beausoleil First Nation's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to share with Beausoleil First Nation information regarding Corktown Station early works and invite feedback on the initial draft of the Corktown Station Early Works Report.

**Project Description**

The Project is a new subway line with connections to Line 1 (Yonge-University) subway service at Osgoode and Queen Stations, Line 2 (Bloor-Danforth) subway service at Pape Station, and Line 5 (Eglinton Crosstown) service at the future Science Centre Station. Fifteen stations are proposed, with additional connections to three GO Transit lines (Lakeshore East, Lakeshore West and Stouffville), and the Queen, King, Bathurst, Spadina, Harbourfront and Gerrard/Carlton streetcar routes. The Project will reduce crowding on Line 1 and provide connections to new high-order rapid transit neighbourhoods. More information on the Project can be found on our website: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)

**Ontario Line Environmental Assessment Process and Reports**

In 2020, Metrolinx provided Beausoleil First Nation with an outline of the Ontario Line environmental assessment process. The environmental assessment for the Ontario Line Project is being completed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20) made under the *Environmental Assessment Act*. The regulation outlines a Project-specific environmental assessment that includes an Environmental Conditions Report, an Environmental Impact Assessment Report and provides opportunity for Early Works Reports for assessment of works that are ready to proceed in advance of the Environmental Impact Assessment Report. An overview of the reports is outlined below and their anticipated publication timeline is provided in **Attachment 1**.

### Environmental Conditions Report

The Environmental Conditions Report characterizes existing environmental conditions within the Ontario Line study area through a combination of desktop review and field studies and was finalized in November 2020. The report also summarizes potential impacts and mitigation measures for consideration during project planning and design. Potential impacts and mitigation measures identified in the Environmental Conditions Report will be confirmed and refined within the Early Works Reports and the Environmental Impact Assessment Report.

### Early Works Reports

Metrolinx is assessing several early works components to support the main construction of the Ontario Line project. Early works are components of the Ontario Line Project that are anticipated to be ready to proceed before completion of the Environmental Impact Assessment Report, such as station construction, rail corridor expansion, utility relocation or bridge replacement or expansion, as defined in O. Reg. 341/20.

Initially, the early works required to support the Ontario Line project were assessed in a single report, which was shared in June 2020 and included Exhibition Station, Lower Don Bridges, Lakeshore East Joint Corridor and East Harbour early works.

Since then, the single Early Works Report has been split into several Early Works Reports, each covering either a single early works location or multiple locations if they are in close proximity. Each Early Works Report provides a description of the early works and alternatives considered, documents local environmental conditions, and outlines early works-specific environmental impacts, mitigation measures,

monitoring activities, potentially required permits and approvals and other components.

It is important to note that two new early works projects, Don Yard and Corktown Station, have been added as well. The Early Works Reports, including this new scope of work are summarized below:

- Exhibition Station Early Works  
Exhibition Station early works are documented in the Exhibition Station Early Works Report, finalized in February 2021.
- Lakeshore East Joint Corridor Early Works  
Lakeshore East Joint Corridor early works will be documented under a separate Early Works Report which will also include East Harbour Station.
- Lower Don Bridges & Don Yard Early Works  
Lower Don Bridges early works will be documented in the Lower Don Bridges and Don Yard Early Works Report. Don Yard is a new early works project that will include construction of Ontario Line tunnel and portal structures between Cherry Street and the Lower Don River and accompanying shift of the Richmond Hill and Lakeshore East GO tracks; installation or upgrading of retaining walls and noise barriers, where appropriate; and utility and signal infrastructure relocation or protection. The initial draft of the Lower Don Bridges and Don Yard Early Works Report is anticipated to be shared with Beausoleil First Nation in mid to late April.
- Corktown Station Early Works  
Corktown Station is a new early works project. Further information on Corktown Station early works is provided below.

### Environmental Impact Assessment Report

The main report produced as part of this process is the Environmental Impact Assessment Report. It will cover the construction and operation of the Ontario Line. The report will include a final description of the Ontario Line Project, environmental impact evaluation results, mitigation measures, monitoring activities, potentially required permits and approvals and other components as outlined in O. Reg. 341/20.

## **Work along the Don River and within the vicinity of the Don Valley**

Metrolinx appreciates the significance of waterways to Beausoleil First Nation. As such, Metrolinx is preparing an information letter specific to work occurring near or along the Don River and within the Valley. Metrolinx will provide details about the scope of work and anticipated natural environmental and archaeological assessments. Metrolinx is committed to exploring opportunities for Beausoleil First Nation to participate in these assessments should Beausoleil First Nation express interest.

## **Corktown Station Early Works**

The Corktown Station site has been identified for launching tunnel excavation equipment for the downtown and Don Yard segments of the proposed Ontario Line alignment, as well as the location for the Corktown Station. The First Parliament site, located within the Corktown Station area, is a known archaeological site which requires additional archaeological study ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures, followed by completion of necessary archaeological studies, is required. Completion of this preparatory work on an expedited basis is essential to allow for the timely delivery of the overall Project.

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These activities will enable completion of environmental due diligence investigations, including archaeological assessments. These activities will occur on properties within the Corktown Station early works project footprint, as shown in **Figure 2**.

Figure 2: Map of Corktown Station Early Works

Environmental impacts of Corktown Station early works are being assessed in accordance with O. Reg. 341/20.

Metrolinx is sharing the initial draft of the Corktown Station Early Works Report, including the Corktown Station Natural Environment Report, via the Dropbox link enclosed in the email for Beausoleil First Nation's review. The Corktown Station Early Works Report documents the assessment of Corktown Station early works. It also outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures, and a consultation record. For a summary of the potential mitigation measures identified, please see the table found as **Attachment 2**.

Note that the initial draft of the report enclosed in the email currently does not include information on noise and vibration as the Corktown Station Noise and Vibration Report is still being prepared. The initial draft of the Corktown Station Noise and Vibration Report is anticipated to be shared with Beausoleil First Nation on **March 19, 2021** for review.

Metrolinx welcomes any comments or feedback on the initial draft of the Corktown Station Early Works Report from Beausoleil First Nation. Please provide these in writing no later than **April 15, 2021**.

Based on our currently anticipated schedule (**Figure 1**), the Notice of Publication of Draft Corktown Station Early Works Report is planned for late-April 2021, at which point the draft report will be available to all interested parties for review, including Beausoleil First Nation, the public and regulatory agencies.

### Archaeology

As outlined above, archaeological assessments are anticipated to take place as part of advancing Corktown Station Early Works. Metrolinx would appreciate any interest Beausoleil First Nation may have in participating in planned future archaeological fieldwork for this site. The maps in **Attachment 3** illustrate the areas that will be subject to future archaeological assessments that include fieldwork. Upon receipt of Beausoleil First Nation's interest in participating, Metrolinx will work to coordinate your Nation's involvement.

Metrolinx acknowledges that Beausoleil First Nation should be aware of and engaged regarding any future archaeological work, especially the discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will ensure that future archaeological assessments are provided to Beausoleil First Nation in draft form, prior to submission to MHSTCI.

### **Engagement**

Metrolinx is committed to an open, respectful, and transparent relationship with Beausoleil First Nation. We appreciate the significant volume of documents related to this Project that have been shared with Beausoleil First Nation. We are happy to assist in the review of these documents by meeting with Beausoleil First Nation or working to address any questions that Beausoleil First Nation may have about this Project. If you require additional information or materials or if you wish to discuss these Projects in more detail or set up a meeting, please contact Fallon Melander, Manager of Metrolinx's Indigenous Relations Office at [IndigenousRelations@metrolinx.com](mailto:IndigenousRelations@metrolinx.com).

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*. Thank you for your time in reviewing these assessments.

Thank you for your time in reviewing this letter.

| Vegetation Communities                                                                                      | <ul style="list-style-type: none"><li>City and private tree removal</li></ul>                                                                                                                            | <ul style="list-style-type: none"><li>An Arborist Report by an International Society of Arboriculture Certified Arborist will be prepared, if required, in accordance with the Ontario Forestry Act R.S.O. 1990, and other regulations and best management practices as applicable.</li><li>The Arborist Report will include, but not be limited to the individual identification of all trees within the Corktown Station early works construction areas including those that require removal or preservation, or trees that may be injured. Trees to be identified may include those on Metrolinx property, trees on public and private lands, and boundary trees. City of Toronto by-laws dictate the minimum area buffers to be inventoried and Diameter at Breast Height which requires inventory.</li><li>Prior to the undertaking of tree removals, a Tree Removal Strategy/Tree Preservation Plan will be developed to document tree protection and mitigation measures that follow the City of Toronto Tree Protection Policy and Specifications for Construction Near Trees Guidelines (2016b) and adherence with best practices, standards and regulations on safety, environmental and wildlife protections.</li><li>Compensation for tree removals will be undertaken in accordance with provisions outlined in the Metrolinx Vegetation Guideline (2020).</li><li>Pruning of branches will be conducted through the implementation of proper arboricultural techniques.</li><li>Tree Protection Zone fencing will be established to protect and prevent tree injuries. Tree Protection Zones will be clearly staked prior to construction using barriers in accordance with local by-law requirements.</li></ul> | <ul style="list-style-type: none"><li>Regular inspection in areas of vegetation removal will be undertaken as required during construction to ensure that fencing is intact, only specified trees are removed and no damage is caused to the remaining trees and adjacent vegetation communities.</li><li>On-site inspection will be undertaken to confirm the implementation of the mitigation measures and identify corrective actions if required. Corrective actions may include additional site maintenance and alteration of activities to minimize impacts.</li><li>If required, the approach to compensation monitoring will be developed in accordance with Metrolinx’s Vegetation Guideline (2020).</li></ul> |

| Environmental Component                               | Potential Impact                                                                                                                                                                              | Mitigation Measure(s)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Monitoring Activities                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|-------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Vegetation Communities</b>                         | <ul style="list-style-type: none"><li>▪ Soil contamination as a result of spills (e.g., grease and/or fuel) from equipment use</li><li>▪ Introduction or spread of Invasive Species</li></ul> | <ul style="list-style-type: none"><li>▪ A Spill Prevention and Contingency Plan will be developed and adhered to. Spills will be immediately contained and cleaned up in accordance with provincial regulatory requirements and the contingency plan.</li><li>▪ Refuelling shall be done within refuelling stations lined with appropriate material to prevent seepage and fuel discharge.</li><li>▪ All machinery, construction equipment and vehicles arriving on site should be in clean condition (e.g., free of fluid leaks, soils containing seeds of plant material from invasive species) and be inspected and washed in accordance with the Clean Equipment Protocol for Industry (Halloran et al., 2013) prior to arriving and leaving the construction site in order to prevent the spread of invasive species to other locations.</li></ul>                  | <ul style="list-style-type: none"><li>▪ On-site inspection will be undertaken to confirm the implementation of the mitigation measures and identify corrective actions if required. Corrective actions may include additional site maintenance and alteration of activities to minimize impacts.</li><li>▪ Ensure precautions are being taken to minimize the spread of invasive species by implementing the Clean Equipment Protocol for Industry (Halloran et al., 2013) on equipment and machinery prior to moving sites.</li><li>▪</li></ul> |
| <b>Wildlife and Wildlife Habitat – General</b>        | <ul style="list-style-type: none"><li>▪ Disturbance, displacement or mortality of wildlife</li></ul>                                                                                          | <ul style="list-style-type: none"><li>▪ Prior to construction, investigation of the Corktown Station early works construction areas for wildlife and wildlife habitat that may have established following the completion of previous surveys will be undertaken, as appropriate.</li><li>▪ If wildlife is encountered, measures will be implemented to avoid destruction, injury, or interference with the species, and/or its habitat. For example, construction activities will cease or be reduced, and wildlife will be encouraged to move off-site and away from the construction area on its own. A qualified Biologist will be contacted to define the appropriate buffer required from wildlife.</li></ul>                                                                                                                                                       | <ul style="list-style-type: none"><li>▪ On-site inspection by on-site environmental workers or construction staff should occur daily within the construction area to ensure that no wildlife is trapped within the construction area.</li><li>▪ On-site inspection will be undertaken to confirm the implementation of the mitigation measures and identify corrective actions if required. Corrective actions may include additional site maintenance and alteration of activities to minimize impacts.</li></ul>                               |
| <b>Significant Wildlife Habitat: Common Nighthawk</b> | <ul style="list-style-type: none"><li>▪ Removal of candidate nesting habitat for Common Nighthawk</li></ul>                                                                                   | <ul style="list-style-type: none"><li>▪ Refer below to mitigation measures described for Migratory Breeding Birds and Nests.</li><li>▪ Demolition of buildings should be scheduled outside of the breeding bird season of April 1 to August 31. If this is not possible and buildings must be demolished during this period, the following will be completed:</li><li>▪ The roofs will be checked for presence of gravel. If gravel is not present, then the building is unlikely to provide suitable nesting habitat for Common Nighthawk. If gravel is present, a search for eggs and nesting activity for Common Nighthawk on the roof will be conducted. If nests or nesting activity of Common Nighthawk are confirmed, the building cannot be demolished until it is confirmed by a Qualified Biologist that young have fully fledged and left the nest.</li></ul> | <ul style="list-style-type: none"><li>▪ Refer below for monitoring requirements described for Migratory Breeding Birds and Nests.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                      |
| <b>Migratory Breeding Birds and Nests</b>             | <ul style="list-style-type: none"><li>▪ Disturbance or destruction of migratory bird nests</li></ul>                                                                                          | <ul style="list-style-type: none"><li>▪ All works must comply with the Migratory Birds Convention Act, including timing windows for the nesting period (April 1 to August 31 in Ontario).</li><li>▪ If activities are proposed to occur during the general nesting period, a breeding bird and nest survey will be undertaken prior to required activities. Nest searches by an experienced searcher are required and will be completed by a qualified Biologist no more than 48 hours prior to vegetation removal.</li><li>▪ If a nest of a migratory bird is found outside of this nesting period (including a ground nest) it still receives protection.</li></ul>                                                                                                                                                                                                    | <ul style="list-style-type: none"><li>▪ Regular monitoring (field observations, on-site inspections) will be undertaken to confirm that activities do not encroach into nesting areas or disturb active nesting sites.</li></ul>                                                                                                                                                                                                                                                                                                                 |

If clarification is required regarding regulatory requirements, the appropriate regulatory agencies will be consulted.

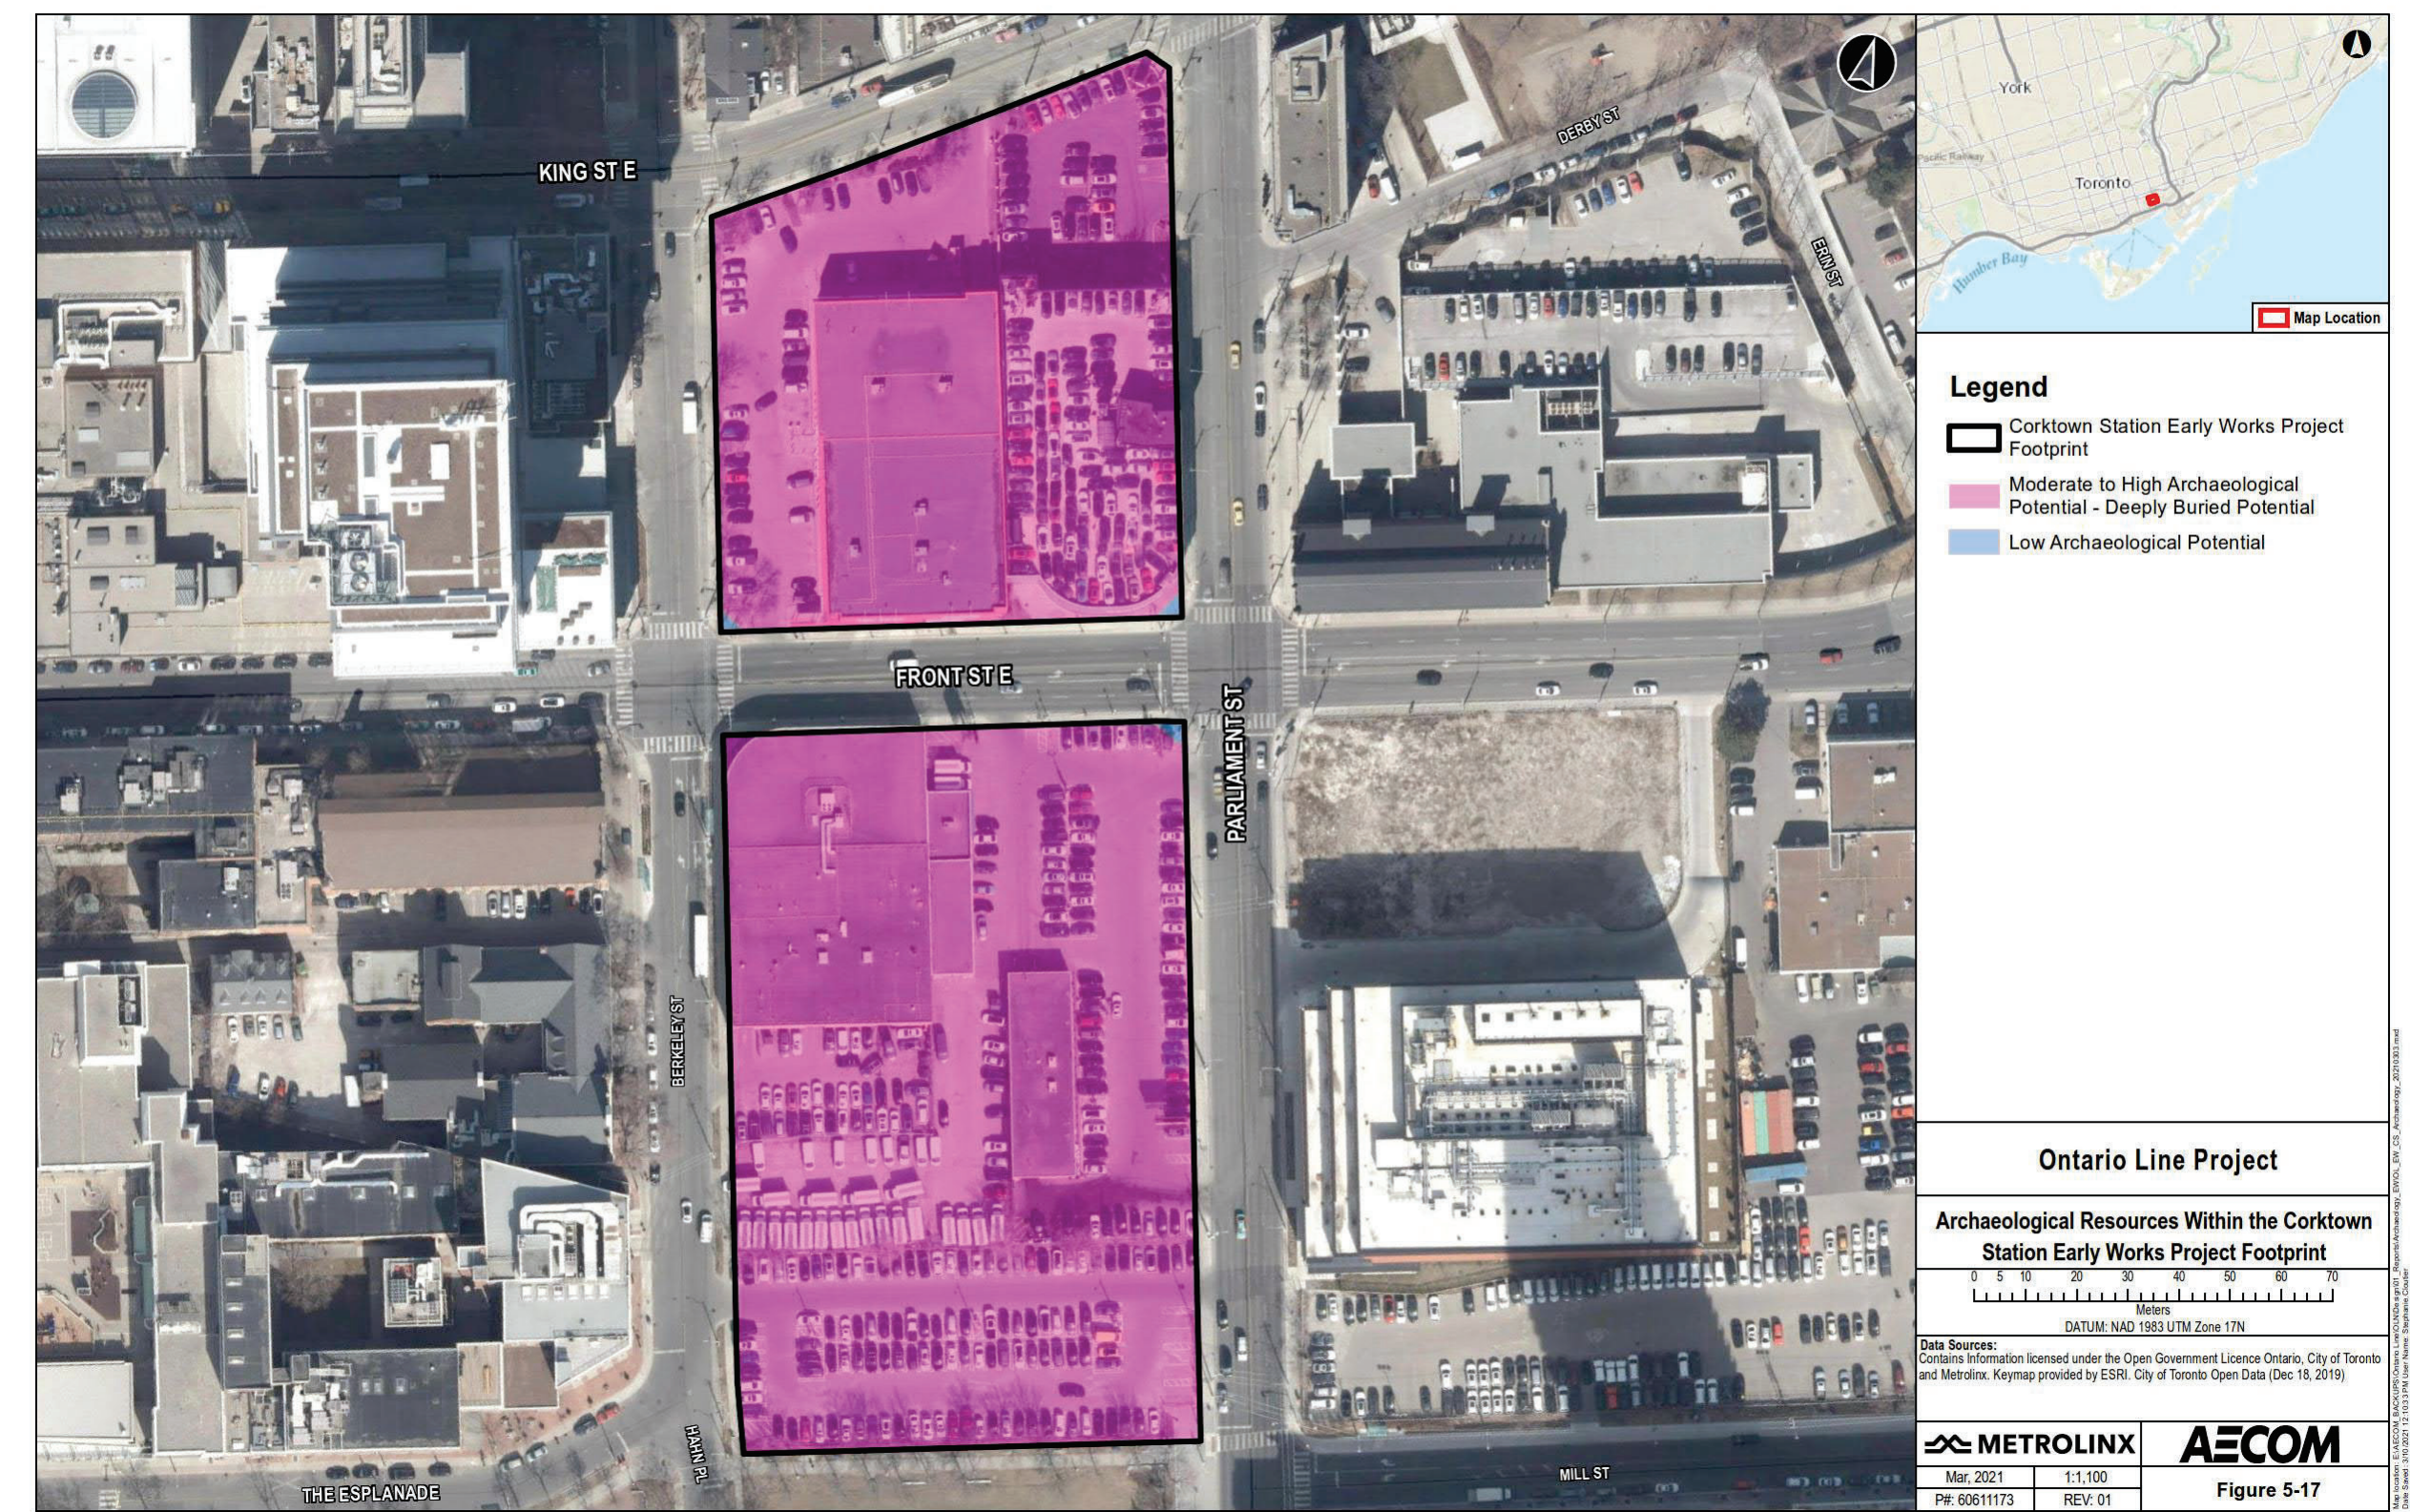

Table 6-8: Potential Impacts, Mitigation Measures and Monitoring Activities – Archaeological Resources

| Environmental Component  | Potential Impact                                                                                                                                                            | Mitigation Measure(s)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Monitoring Activities                                                                                                                                                                                                          |
|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Archaeological Potential | <ul style="list-style-type: none"><li>Potential for the disturbance of registered archaeological sites and/or archaeological resources not previously identified.</li></ul> | <ul style="list-style-type: none"><li>Areas identified as retaining archaeological potential in the Corktown Station Early Works Project Footprint, as per the Ontario Line South Stage 1 Archaeological Assessment Report (AECOM, 2020c), are shown in <b>Figure 5-17</b>, and include the following. Any person discovering human remains must immediately notify the police or coroner and the Registrar of Cemeteries, Ministry of Government Services. In addition, consultation with relevant Indigenous Nations will be initiated in the event that archaeological resources or human remains are discovered.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <ul style="list-style-type: none"><li>None identified at this time.</li><li>Metrolinx will adhere to all recommendations in any subsequent archaeological assessments, including monitoring activities, as required.</li></ul> |

<sup>29</sup> Ground disturbing activities can be defined as any and all activities that will or have the potential to impact/disturb the area below the surface. Example of activities include, but is not limited to, heavy machine movement/weight, clearing, grading, excavating, trenching, drilling, and transporting and filling of land.

---

Dear Chief Big Canoe,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. Attached you will find a letter providing an update on the project. The purpose of this letter is to share the Draft Corktown Station Early Works Report (EWR) prepared for the Ontario Line Project and provide a continued invitation for feedback.

In an effort to streamline your review, we draw your attention to the attachment which provides an overview of the expected environmental impacts and proposed mitigations, as we know this may be of specific interest to you.

We ask that you provide any comments no later than June 11, 2021.

The reports are available at the following link:

[REDACTED]

We appreciate the volume of documents that Metrolinx has shared with your Nation. If you have any questions or concerns, please do not hesitate to contact the Indigenous Relations Office.  
Miigwetch,

Fallon

## Notice of Publication of Draft Corktown Station Early Works Report

### Ontario Line Project

#### The Project

The Ontario Line will bring 15.6 kilometres of new subway service to Toronto to make it faster and easier for people to get where they need to be each day. The line will stretch across the city, from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line is proposed to include 15 potential stations, including six interchange stations, and connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 of its stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable commutes.

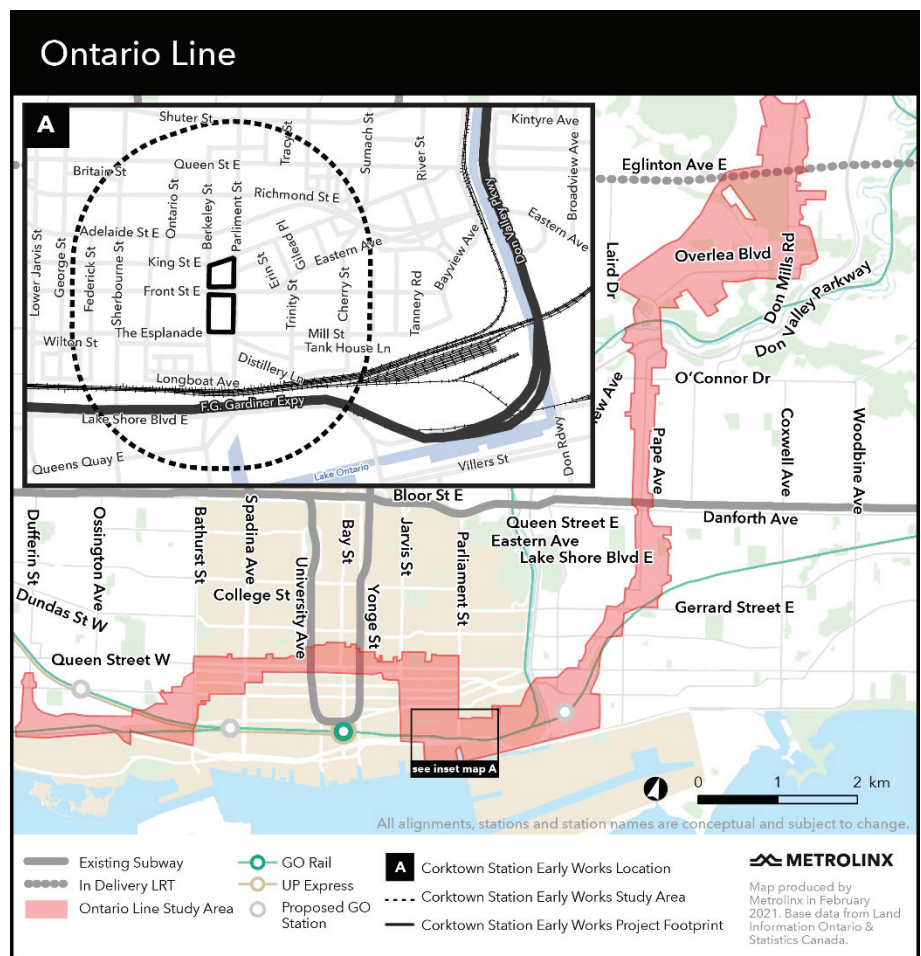

#### Corktown Station Early Works

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These early works are being advanced to prepare the site for future construction staging and laydown to support tunneling and below ground construction activities, and work associated with the future Corktown Station.

The First Parliament site, located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail), and remnants of early Toronto industry may be found here.

Metrolinx is eager to unlock the potential of the site and work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

Environmental impacts of Corktown Station early works are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*. In accordance with Section 8 of O. Reg. 341/20, Metrolinx has prepared the Draft Corktown Station Early Works Report (EWR) that is now available for public review.

The Draft EWR documents the assessment of Corktown Station early works. The report outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures and a consultation record.

### **The Draft Early Works Report Review and Consultation Process**

Effective **May 12, 2021**, the Draft Corktown Station EWR will be available for review on the project webpage ([www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)).

As we temporarily shift to virtual open houses, please join us online from **May 12 to June 11, 2021** to find out more about and provide your feedback on the Draft Corktown Station EWR via the webpage form.

Those who wish to provide comments on the Draft Corktown Station EWR must do so by **June 11, 2021** and submit them using the webpage form or address them to the following email: [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com).

Section 10 of O. Reg. 341/20 requires Metrolinx to establish an issues resolution process to attempt to resolve any concerns raised by the public or Indigenous Nations during the review period. At the end of the review period, Metrolinx will update the Draft Corktown Station EWR by adding a description of the issues resolution process, what Metrolinx did to address any concerns, and if the early works implementation timeline will be impacted as a result of addressing concerns. Metrolinx will then publish the Final Corktown Station EWR on the project webpage: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline) and issue a Notice of Publication of Final Corktown Station EWR.

To obtain a copy of the Draft Corktown Station EWR, please contact the project email listed above.

**Josh Vandezande (T: 416-202-5100, E: [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com)) may be contacted on behalf of Metrolinx.**

Chief Donna Big Canoe  
Chippewas of Georgina Island  
RR #2, Box 13  
Sutton West, ON L0E 1R0  
**Delivered by Email**

Dear Chief Big Canoe,

**RE: Ontario Line Project - Notice of Publication of Draft Corktown Station Early Works Report**

Metrolinx, a regional transportation agency, is helping to transform the way the Greater Golden Horseshoe region moves by building a fast, convenient and integrated transit network. As part of this work, Metrolinx is proceeding with the Ontario Line which will bring 15.6 kilometres of subway service to Toronto. The purpose of this letter is to share information regarding the Ontario Line project with Chippewas of Georgina Island.

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Chippewas of Georgina Island. Metrolinx appreciates and respects Chippewas of Georgina Island's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to share with Chippewas of Georgina Island the Draft Corktown Station Early Works Report (EWR).

**Project Description**

The Ontario Line will stretch from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line is proposed to include 15 stations, including six interchange stations, and connections to three GO train lines, two existing subway lines, the Eglinton Crosstown LRT, and streetcar lines. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable commutes.

More information on the Project can be found on our website:

[www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)

The initial draft of the Corktown Station EWR and a letter outlining Corktown Station early works were shared with Chippewas of Georgina Island on March 11, 2021. As outlined in the letter, environmental impacts of the Ontario Line Project are being

assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*.

## Draft Corktown Station Early Works Report

In accordance with Section 8 of O. Reg. 341/20, Metrolinx has prepared a Draft Corktown Station EWR that documents the assessment of Corktown Station early works.

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These early works are being advanced to prepare the site for future construction staging and laydown to support tunneling and below ground construction activities, and work associated with the future Corktown Station. The location of the Corktown Station early works project footprint and study area can be viewed below in **Figure 1**.

Figure 1: Map of Corktown Station Early Works

10 Bay Street  
Toronto, ON M5J 2N8

416.202.4967  
metrolinx.com

The First Parliament site, located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail) and remnants of early Toronto industry may be found here. Metrolinx is eager to work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

The EWR documents the assessment of Corktown Station early works and outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures, and a consultation record.

The Draft EWR is available for your review and can be found via the Dropbox link shared in the body of the email that is associated with this letter. We welcome any additional comments you may have on the Draft EWR. The Draft EWR is available for review and comment starting **May 12, 2021** and ending on **June 11, 2021**. The Notice of Publication of Draft Corktown Station EWR is provided in **Attachment 1**. The Draft EWR will be updated following the review period, and the Final EWR will be published on the Project webpage ([www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)) and shared with Chippewas of Georgina Island.

#### Potential Impacts and Mitigation Measures

The tables found enclosed in **Attachment 2 and 3** provide a summary of natural environment and archaeology potential impacts and mitigation measures identified as part of the Draft EWR that may be of interest to *Chippewas of Georgina Island*. If *Chippewas of Georgina Island* has any feedback about these potential impacts and/or mitigation strategies, or any other aspects of the Ontario Line, we welcome the opportunity to discuss further.

#### Revisions to the Initial Draft of the Corktown Station Early Works Report

In accordance with O. Reg. 341/20, Metrolinx has now incorporated comments and feedback from the initial round of engagement with Indigenous Nations and agencies on the initial draft of the Corktown Station EWR into the Draft EWR.

To streamline capacity for Chippewas of Georgina Island to provide comments or feedback, a summary of revisions to the EWR since the circulation of the initial draft of the EWR is as follows:

- Minor editorial changes to address grammatical and syntax errors and updates to reflect comments received from agencies;
- Clarification that the project operations, construction of Corktown Station and other project components will be assessed in the Ontario Line Environmental Impact Assessment Report;
- Inclusion of information on the Parkland Strategy (City of Toronto, 2019), First Parliament Master Plan (City of Toronto, 2020) and additional information on planned community services and facilities in the Corktown Station Early Works Study Area;
- Edits to the text to reflect that the Ministry of Heritage, Sport, Tourism and Culture Industries' (MHSTCI) Minister's Consent has been granted for the demolition and removal of the non-heritage buildings at 265 Front Street East and removal of the heritage attributes at 265 Front Street East, 271 Front Street East and 25 Berkeley Street located on the First Parliament Site, and affirming Metrolinx's commitment to fulfilling the conditions outlined in the Minister's Consent, including completion of archaeological requirements;
- Additional mitigation measures for environmental disciplines such as archaeology, air quality and traffic and transportation, that include:
  - Coordination and completion of required archaeological investigations, early works activities and/or activities that have the potential for vibration effects such that buried archaeological resources are appropriately considered;
  - Use of non-chloride dust suppressants; and
  - Consultation with the City of Toronto to minimize potential impacts during special events (e.g., the Toronto Christmas Market at the Distillery District) should closures or long-term impacts be required.
- Revision of traffic and transportation figures to include additional information such as intersection names and inclusion of an additional noise and vibration figure to show representative receptor locations.

## Engagement

Metrolinx is committed to an open, respectful, and transparent relationship with Chippewas of Georgina Island. We appreciate the significant volume of documents related to this Project that have been shared with Chippewas of Georgina Island. We are happy to assist in the review of these documents by meeting with Chippewas of Georgina Island or working to address any questions that Chippewas of Georgina Island may have about this Project. If you require additional information or materials or if you wish to discuss these Projects in more detail or set up a meeting, please contact Fallon Melander, Manager of Metrolinx's Indigenous Relations Office at [IndigenousRelations@metrolinx.com](mailto:IndigenousRelations@metrolinx.com).

Metrolinx welcomes any comments or feedback on the Draft EWR from Chippewas of Georgina Island. Please provide these in writing no later than **June 11, 2021**.

Comments and information regarding this draft report will be collected to assist in meeting the requirements of the *Environmental Assessment Act* and may be included in study documentation. With the exception of personal information, all comments will become part of the public record. Kindly note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*.

Thank you for your time in reviewing this letter.

Yours Truly,

---

Dear Chief Big Canoe,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. We recently communicated with your Nation about the proposed Corktown Station which is along the planned alignment of the Ontario Line. This location includes parcels of land which were once the site of Upper Canada's First Parliament buildings. Metrolinx and its partners are exploring opportunities to commemorate the history of this site, and have been engaging with various parties including the City of Toronto and the Mississaugas of the Credit First Nation, on whose treaty territory this project is occurring.

Given the significant chance of recovering Indigenous and European artifacts during the Corktown Station Early Works, a detailed archaeological workplan is being developed. Metrolinx recognizes the importance and value of Indigenous monitors for any archaeology related to the Ontario Line Project. In our previous communication, an invitation was included for your Nation to participate in any archaeological fieldwork and monitoring during the Corktown Station Early Works, including demolition of modern buildings currently on the First Parliament site.

This work is anticipated to commence in Fall 2021, and if you have not yet expressed interest in participating, please feel free to do so at your earliest convenience. As a reminder any comments on the draft Corktown Station Early Works Report should be provided no later than **April 15, 2021**.

Metrolinx recognizes that the history of this location extends beyond European use, and as such, wants to take the opportunity to understand any significance it may have to Indigenous Nations. Metrolinx would like to meet with your Nation to discuss the First Parliament site, its commemoration, as well as review the broader Ontario Line project if you wish. We recognize that traditional knowledge of this area may be sacred and/or not appropriate to be shared, but would appreciate any information that may be appropriate for Metrolinx to consider.

This letter is not intended to replace engagement but to provide a high level summary for your information. We would very much appreciate meeting with your Nation to discuss in more detail. Please let me know if you have any questions or concerns. We appreciate the volume of documents that Metrolinx has shared with your Nation. If you have any questions or concerns, please do not hesitate to contact me.

Miigwetch,

Fallon

Chief Donna Big Canoe  
Chippewas of Georgina Island  
RR #2, Box 13  
Sutton West, ON L0E 1R0  
**Delivered by Email**

Dear Chief Big Canoe,

**RE: Ontario Line Project - First Parliament Site and Lime Kiln Site**

Metrolinx, a regional transportation agency, is helping to transform the way the Greater Golden Horseshoe moves by building a fast, convenient and integrated transit network. As part of this work, Metrolinx is continuing the pre-construction planning of the Ontario Line which will bring nearly 16 kilometres of subway service to Toronto.

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Chippewas of Georgina Island. Metrolinx appreciates and respects Chippewas of Georgina Island's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to share with Chippewas of Georgina Island information regarding Corktown Station early works and additional information regarding upcoming field visits and investigations at the Corktown Station early works site, which includes two registered archaeological sites, the First Parliament site and the Lime Kiln site.

**Project Description**

The proposed Ontario Line is a new 16-kilometer subway line, which will occupy an exclusive right-of-way system encompassing a combination of below-grade, above-grade, and at-grade alignment. The route (Figure 1) will run from Ontario Place/Exhibition through downtown Toronto to the Ontario Science Centre in the City of Toronto, with six (6) potential interchange stations and 17 new connections to GO Transit, existing subways and streetcars. More information on the Project can be found on our website: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)

**Corktown Station Early Works**

As communicated in the letter sent to Chippewas of Georgina Island on March 11, 2021, the Corktown Station site has been identified for launching tunnel excavation equipment for the downtown and Don Yard segments of the proposed Ontario Line alignment, as well as the location of the Corktown Station. The First Parliament and Lime Kiln Sites, located within the Corktown Station area, are known archaeological sites which require additional archaeological study ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures, followed by completion of necessary archaeological studies, is required. Completion of this preparatory work on an expedited basis is essential to allow for the timely delivery of the overall Project and is anticipated to begin in the Fall 2021, subject to the completion of the Corktown Station early works process in accordance with Ontario Regulation 341/20: Ontario Line Project.

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These activities will enable completion of environmental due diligence investigations, including archaeological assessments. These activities will occur on properties within the Corktown Station early works project footprint, as shown in **Figure 1**.

Figure 1: Map of Corktown Station Early Works

Environmental impacts of Corktown Station early works are being assessed in accordance with O. Reg. 341/20. Metrolinx shared the draft Corktown Station Early Works Report and associated discipline reports with Chippewas of Georgina Island on March 11, 2021 and had requested any comments to be provided by April 9, 2021.

## **Archaeological Work at the First Parliament Site and Lime Kiln Site**

Metrolinx appreciates the significance of archaeology to Chippewas of Georgina Island. The properties at 265 Front Street East, 271 Front Street East, and 25 Berkeley Street, in the St. Lawrence neighbourhood of the City of Toronto, are collectively host to the First Parliament Site. It is located on the southwest corner of Parliament Street and King Street, between Parliament Street and Berkeley Street. The First Parliament Site is a registered archaeological site (AjGu-41) which may include resources associated with the First and Second Parliament Buildings, the Home District Gaol, and Consumers' Gas company buildings. The surface of the property is currently occupied by automotive businesses, including a car dealership, car wash, and surface parking lot. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and remnants of early Toronto industry may be found at this site.

North of the First Parliament Site is another registered archaeological site (AjGu-64), the Lime Kiln Site, which includes remains from the Toronto Lime Works Company. A variety of structural features, in various states of preservation, have been documented on this site. The location of the Lime Kiln Site and the First Parliament Site are shown in **Figure 2**.

Figure 2: Location of First Parliament Site and Lime Kiln Site Areas

The First Parliament Site and Lime Kiln Site require additional archaeological studies ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures is necessary. Completion of this preparatory work is essential to allow for the timely delivery of the Ontario Line.

Archaeological fieldwork to remove or protect archaeological resources is anticipated to commence in early Fall 2021, and a workplan for these archaeological investigations is under development. As mentioned in the letter sent on March 11, 2021, Chippewas of Georgina Island is invited to participate in all archaeological fieldwork, and to review and provide comments on forthcoming reports.

### **Feedback on Commemoration of First Parliament Site**

Metrolinx appreciates that the history of the First Parliament site is not one simply of Canadian origin, but rather holds longer history and tradition. Metrolinx also appreciates that the site of the First Parliament of Upper Canada is linked to a history of colonization and harmful practices towards Indigenous Peoples. Given the significance of this site, Metrolinx is engaging with Indigenous Nations, City of Toronto and the broader community to identify opportunities for commemoration. Metrolinx is committed to ensuring that any feedback from Chippewas of Georgina Island regarding the significance of this site is considered as part of this commemoration. Metrolinx appreciates that traditional or cultural knowledge about this site may be sacred and/or not be appropriate to be shared but welcomes any comments or ideas from Chippewas of Georgina Island that may be appropriate to commemorate Indigenous Peoples.

### **Engagement**

Metrolinx is committed to an open, respectful, and transparent relationship with Chippewas of Georgina Island. We would like to meet with Chippewas of Georgina Island to better understand any significance the First Parliament site may have to your Nation. We are also happy to assist in reviewing the Corktown Station Early Works Report or reviewing the proposed archaeological workplan for this site. If Chippewas of Georgina Island requires additional information or materials, or you wish to discuss this project in more detail or set up a meeting, please contact Fallon Melander, Manager, Indigenous Relations at Metrolinx. She can be contacted at [IndigenousRelations@metrolinx.com](mailto:IndigenousRelations@metrolinx.com).

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*. Thank you for your time in reviewing these assessments.

Thank you for your time in reviewing this letter.

**Subject:** Ontario Line - Project Update and Draft Corktown Station Early Works Report for Review + Invitation to Participate in Archaeological Fieldwork

Dear Chief Big Canoe,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. Attached you will find a letter providing an update on the project. The purpose of this letter is to:

- Provide an update on the scope of the project work
- share the initial draft of the Early Works Report for the proposed Corktown

## Station

- Invite your Nation to participate in upcoming archaeological fieldwork

In an effort to streamline your review, we draw your attention to the attachment which provides an overview of the expected environmental impacts and proposed mitigations, as we know this may be of specific interest to you.

Metrolinx is also preparing a letter specific to works being planned within the Don Valley as we recognize the significance of this waterway to many Nations. We hope to share that letter soon. We are happy to meet with your Nation to discuss the Ontario Line and address any questions or concerns that your Nation may have.

We ask that any comments on the draft Corktown Station Early Works Report be provided no later than **April 15, 2021**. Please note that the Noise and Vibration Report, which will be part of the Early Works Report is still being prepared and we will share with your Nation by March 19, 2021.

The draft Corktown Station Early Works Report is available at the following link:

[REDACTED]

Please let us know as soon as possible if your Nation has interest in participating in future archaeological fieldwork.

We appreciate the volume of documents that Metrolinx has shared with your Nation.

If you have any questions or concerns, please do not hesitate to contact me.

Miigwetch,

Fallon

**Delivered by Email**

Dear Chief Big Canoe,

**RE: Ontario Line Project - Corktown Station Early Works Report**

Metrolinx, a regional transportation agency, is helping to transform the way the Greater Golden Horseshoe region moves by building a fast, convenient and integrated transit network. As part of this work, Metrolinx is proceeding with the Ontario Line which will bring nearly 16 kilometres of subway service to Toronto. The purpose of this letter is to share information regarding the Ontario Line project with Chippewas of Georgina Island.

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Chippewas of Georgina Island. Metrolinx appreciates and respects Chippewas of Georgina Island's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to share with Chippewas of Georgina Island information regarding Corktown Station early works and invite feedback on the initial draft of the Corktown Station Early Works Report.

**Project Description**

The Project is a new subway line with connections to Line 1 (Yonge-University) subway service at Osgoode and Queen Stations, Line 2 (Bloor-Danforth) subway service at Pape Station, and Line 5 (Eglinton Crosstown) service at the future Science Centre Station. Fifteen stations are proposed, with additional connections to three GO Transit lines (Lakeshore East, Lakeshore West and Stouffville), and the Queen, King, Bathurst, Spadina, Harbourfront and Gerrard/Carlton streetcar routes. The Project will reduce crowding on Line 1 and provide connections to new high-order rapid transit neighbourhoods. More information on the Project can be found on our website: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)

**Ontario Line Environmental Assessment Process and Reports**

In 2020, Metrolinx provided Chippewas of Georgina Island with an outline of the Ontario Line environmental assessment process. The environmental assessment for the Ontario Line Project is being completed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20) made under the *Environmental Assessment Act*. The regulation outlines a Project-specific environmental assessment that includes an Environmental Conditions Report, an Environmental Impact Assessment Report and provides opportunity for Early Works Reports for assessment of works that are ready to proceed in advance of the Environmental Impact Assessment Report. An overview of the reports is outlined below and their anticipated publication timeline is provided in **Attachment 1**.

### Environmental Conditions Report

The Environmental Conditions Report characterizes existing environmental conditions within the Ontario Line study area through a combination of desktop review and field studies and was finalized in November 2020. The report also summarizes potential impacts and mitigation measures for consideration during project planning and design. Potential impacts and mitigation measures identified in the Environmental Conditions Report will be confirmed and refined within the Early Works Reports and the Environmental Impact Assessment Report.

### Early Works Reports

Metrolinx is assessing several early works components to support the main construction of the Ontario Line project. Early works are components of the Ontario Line Project that are anticipated to be ready to proceed before completion of the Environmental Impact Assessment Report, such as station construction, rail corridor expansion, utility relocation or bridge replacement or expansion, as defined in O. Reg. 341/20.

Initially, the early works required to support the Ontario Line project were assessed in a single report, which was shared in June 2020 and included Exhibition Station, Lower Don Bridges, Lakeshore East Joint Corridor and East Harbour early works.

Since then, the single Early Works Report has been split into several Early Works Reports, each covering either a single early works location or multiple locations if they are in close proximity. Each Early Works Report provides a description of the early works and alternatives considered, documents local environmental conditions, and outlines early works-specific environmental impacts, mitigation measures,

monitoring activities, potentially required permits and approvals and other components.

It is important to note that two new early works projects, Don Yard and Corktown Station, have been added as well. The Early Works Reports, including this new scope of work are summarized below:

- Exhibition Station Early Works  
Exhibition Station early works are documented in the Exhibition Station Early Works Report, finalized in February 2021.
- Lakeshore East Joint Corridor Early Works  
Lakeshore East Joint Corridor early works will be documented under a separate Early Works Report which will also include East Harbour Station.
- Lower Don Bridges & Don Yard Early Works  
Lower Don Bridges early works will be documented in the Lower Don Bridges and Don Yard Early Works Report. Don Yard is a new early works project that will include construction of Ontario Line tunnel and portal structures between Cherry Street and the Lower Don River and accompanying shift of the Richmond Hill and Lakeshore East GO tracks; installation or upgrading of retaining walls and noise barriers, where appropriate; and utility and signal infrastructure relocation or protection. The initial draft of the Lower Don Bridges and Don Yard Early Works Report is anticipated to be shared with Chippewas of Georgina Island in mid to late April.
- Corktown Station Early Works  
Corktown Station is a new early works project. Further information on Corktown Station early works is provided below.

### Environmental Impact Assessment Report

The main report produced as part of this process is the Environmental Impact Assessment Report. It will cover the construction and operation of the Ontario Line. The report will include a final description of the Ontario Line Project, environmental impact evaluation results, mitigation measures, monitoring activities, potentially required permits and approvals and other components as outlined in O. Reg. 341/20.

## **Work along the Don River and within the vicinity of the Don Valley**

Metrolinx appreciates the significance of waterways to Chippewas of Georgina Island. As such, Metrolinx is preparing an information letter specific to work occurring near or along the Don River and within the Valley. Metrolinx will provide details about the scope of work and anticipated natural environmental and archaeological assessments. Metrolinx is committed to exploring opportunities for Chippewas of Georgina Island to participate in these assessments should Chippewas of Georgina Island express interest.

## **Corktown Station Early Works**

The Corktown Station site has been identified for launching tunnel excavation equipment for the downtown and Don Yard segments of the proposed Ontario Line alignment, as well as the location for the Corktown Station. The First Parliament site, located within the Corktown Station area, is a known archaeological site which requires additional archaeological study ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures, followed by completion of necessary archaeological studies, is required. Completion of this preparatory work on an expedited basis is essential to allow for the timely delivery of the overall Project.

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These activities will enable completion of environmental due diligence investigations, including archaeological assessments. These activities will occur on properties within the Corktown Station early works project footprint, as shown in **Figure 2**.

Figure 2: Map of Corktown Station Early Works

Environmental impacts of Corktown Station early works are being assessed in accordance with O. Reg. 341/20.

Metrolinx is sharing the initial draft of the Corktown Station Early Works Report, including the Corktown Station Natural Environment Report, via the Dropbox link enclosed in the email for Chippewas of Georgina Island's review. The Corktown Station Early Works Report documents the assessment of Corktown Station early works. It also outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures, and a consultation record. For a summary of the potential mitigation measures identified, please see the table found as **Attachment 2**.

Note that the initial draft of the report enclosed in the email currently does not include information on noise and vibration as the Corktown Station Noise and Vibration Report is still being prepared. The initial draft of the Corktown Station Noise and Vibration Report is anticipated to be shared with Chippewas of Georgina Island on **March 19, 2021** for review.

Metrolinx welcomes any comments or feedback on the initial draft of the Corktown Station Early Works Report from Chippewas of Georgina Island. Please provide these in writing no later than **April 15, 2021**.

Based on our currently anticipated schedule (**Figure 1**), the Notice of Publication of Draft Corktown Station Early Works Report is planned for late-April 2021, at which point the draft report will be available to all interested parties for review, including Chippewas of Georgina Island, the public and regulatory agencies.

### Archaeology

As outlined above, archaeological assessments are anticipated to take place as part of advancing Corktown Station Early Works. Metrolinx would appreciate any interest Chippewas of Georgina Island may have in participating in planned future archaeological fieldwork for this site. The maps in **Attachment 3** illustrate the areas that will be subject to future archaeological assessments that include fieldwork. Upon receipt of Chippewas of Georgina Island's interest in participating, Metrolinx will work to coordinate your Nation's involvement.

Metrolinx acknowledges that Chippewas of Georgina Island should be aware of and engaged regarding any future archaeological work, especially the discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will ensure that future archaeological assessments are provided to Chippewas of Georgina Island in draft form, prior to submission to MHSTCI.

### **Engagement**

Metrolinx is committed to an open, respectful, and transparent relationship with Chippewas of Georgina Island. We appreciate the significant volume of documents related to this Project that have been shared with Chippewas of Georgina Island. We are happy to assist in the review of these documents by meeting with Chippewas of Georgina Island or working to address any questions that Chippewas of Georgina Island may have about this Project. If you require additional information or materials or if you wish to discuss these Projects in more detail or set up a meeting, please contact Fallon Melander, Manager of Metrolinx's Indigenous Relations Office at [IndigenousRelations@metrolinx.com](mailto:IndigenousRelations@metrolinx.com).

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*. Thank you for your time in reviewing these assessments.

Thank you for your time in reviewing this letter.

| Vegetation Communities                                                                                      | <ul style="list-style-type: none"><li>City and private tree removal</li></ul>                                                                                                                            | <ul style="list-style-type: none"><li>An Arborist Report by an International Society of Arboriculture Certified Arborist will be prepared, if required, in accordance with the Ontario Forestry Act R.S.O. 1990, and other regulations and best management practices as applicable.</li><li>The Arborist Report will include, but not be limited to the individual identification of all trees within the Corktown Station early works construction areas including those that require removal or preservation, or trees that may be injured. Trees to be identified may include those on Metrolinx property, trees on public and private lands, and boundary trees. City of Toronto by-laws dictate the minimum area buffers to be inventoried and Diameter at Breast Height which requires inventory.</li><li>Prior to the undertaking of tree removals, a Tree Removal Strategy/Tree Preservation Plan will be developed to document tree protection and mitigation measures that follow the City of Toronto Tree Protection Policy and Specifications for Construction Near Trees Guidelines (2016b) and adherence with best practices, standards and regulations on safety, environmental and wildlife protections.</li><li>Compensation for tree removals will be undertaken in accordance with provisions outlined in the Metrolinx Vegetation Guideline (2020).</li><li>Pruning of branches will be conducted through the implementation of proper arboricultural techniques.</li><li>Tree Protection Zone fencing will be established to protect and prevent tree injuries. Tree Protection Zones will be clearly staked prior to construction using barriers in accordance with local by-law requirements.</li></ul> | <ul style="list-style-type: none"><li>Regular inspection in areas of vegetation removal will be undertaken as required during construction to ensure that fencing is intact, only specified trees are removed and no damage is caused to the remaining trees and adjacent vegetation communities.</li><li>On-site inspection will be undertaken to confirm the implementation of the mitigation measures and identify corrective actions if required. Corrective actions may include additional site maintenance and alteration of activities to minimize impacts.</li><li>If required, the approach to compensation monitoring will be developed in accordance with Metrolinx’s Vegetation Guideline (2020).</li></ul> |

| Environmental Component                               | Potential Impact                                                                                                                                                                              | Mitigation Measure(s)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Monitoring Activities                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|-------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Vegetation Communities</b>                         | <ul style="list-style-type: none"><li>▪ Soil contamination as a result of spills (e.g., grease and/or fuel) from equipment use</li><li>▪ Introduction or spread of Invasive Species</li></ul> | <ul style="list-style-type: none"><li>▪ A Spill Prevention and Contingency Plan will be developed and adhered to. Spills will be immediately contained and cleaned up in accordance with provincial regulatory requirements and the contingency plan.</li><li>▪ Refuelling shall be done within refuelling stations lined with appropriate material to prevent seepage and fuel discharge.</li><li>▪ All machinery, construction equipment and vehicles arriving on site should be in clean condition (e.g., free of fluid leaks, soils containing seeds of plant material from invasive species) and be inspected and washed in accordance with the Clean Equipment Protocol for Industry (Halloran et al., 2013) prior to arriving and leaving the construction site in order to prevent the spread of invasive species to other locations.</li></ul>                  | <ul style="list-style-type: none"><li>▪ On-site inspection will be undertaken to confirm the implementation of the mitigation measures and identify corrective actions if required. Corrective actions may include additional site maintenance and alteration of activities to minimize impacts.</li><li>▪ Ensure precautions are being taken to minimize the spread of invasive species by implementing the Clean Equipment Protocol for Industry (Halloran et al., 2013) on equipment and machinery prior to moving sites.</li><li>▪</li></ul> |
| <b>Wildlife and Wildlife Habitat – General</b>        | <ul style="list-style-type: none"><li>▪ Disturbance, displacement or mortality of wildlife</li></ul>                                                                                          | <ul style="list-style-type: none"><li>▪ Prior to construction, investigation of the Corktown Station early works construction areas for wildlife and wildlife habitat that may have established following the completion of previous surveys will be undertaken, as appropriate.</li><li>▪ If wildlife is encountered, measures will be implemented to avoid destruction, injury, or interference with the species, and/or its habitat. For example, construction activities will cease or be reduced, and wildlife will be encouraged to move off-site and away from the construction area on its own. A qualified Biologist will be contacted to define the appropriate buffer required from wildlife.</li></ul>                                                                                                                                                       | <ul style="list-style-type: none"><li>▪ On-site inspection by on-site environmental workers or construction staff should occur daily within the construction area to ensure that no wildlife is trapped within the construction area.</li><li>▪ On-site inspection will be undertaken to confirm the implementation of the mitigation measures and identify corrective actions if required. Corrective actions may include additional site maintenance and alteration of activities to minimize impacts.</li></ul>                               |
| <b>Significant Wildlife Habitat: Common Nighthawk</b> | <ul style="list-style-type: none"><li>▪ Removal of candidate nesting habitat for Common Nighthawk</li></ul>                                                                                   | <ul style="list-style-type: none"><li>▪ Refer below to mitigation measures described for Migratory Breeding Birds and Nests.</li><li>▪ Demolition of buildings should be scheduled outside of the breeding bird season of April 1 to August 31. If this is not possible and buildings must be demolished during this period, the following will be completed:</li><li>▪ The roofs will be checked for presence of gravel. If gravel is not present, then the building is unlikely to provide suitable nesting habitat for Common Nighthawk. If gravel is present, a search for eggs and nesting activity for Common Nighthawk on the roof will be conducted. If nests or nesting activity of Common Nighthawk are confirmed, the building cannot be demolished until it is confirmed by a Qualified Biologist that young have fully fledged and left the nest.</li></ul> | <ul style="list-style-type: none"><li>▪ Refer below for monitoring requirements described for Migratory Breeding Birds and Nests.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                      |
| <b>Migratory Breeding Birds and Nests</b>             | <ul style="list-style-type: none"><li>▪ Disturbance or destruction of migratory bird nests</li></ul>                                                                                          | <ul style="list-style-type: none"><li>▪ All works must comply with the Migratory Birds Convention Act, including timing windows for the nesting period (April 1 to August 31 in Ontario).</li><li>▪ If activities are proposed to occur during the general nesting period, a breeding bird and nest survey will be undertaken prior to required activities. Nest searches by an experienced searcher are required and will be completed by a qualified Biologist no more than 48 hours prior to vegetation removal.</li><li>▪ If a nest of a migratory bird is found outside of this nesting period (including a ground nest) it still receives protection.</li></ul>                                                                                                                                                                                                    | <ul style="list-style-type: none"><li>▪ Regular monitoring (field observations, on-site inspections) will be undertaken to confirm that activities do not encroach into nesting areas or disturb active nesting sites.</li></ul>                                                                                                                                                                                                                                                                                                                 |

If clarification is required regarding regulatory requirements, the appropriate regulatory agencies will be consulted.

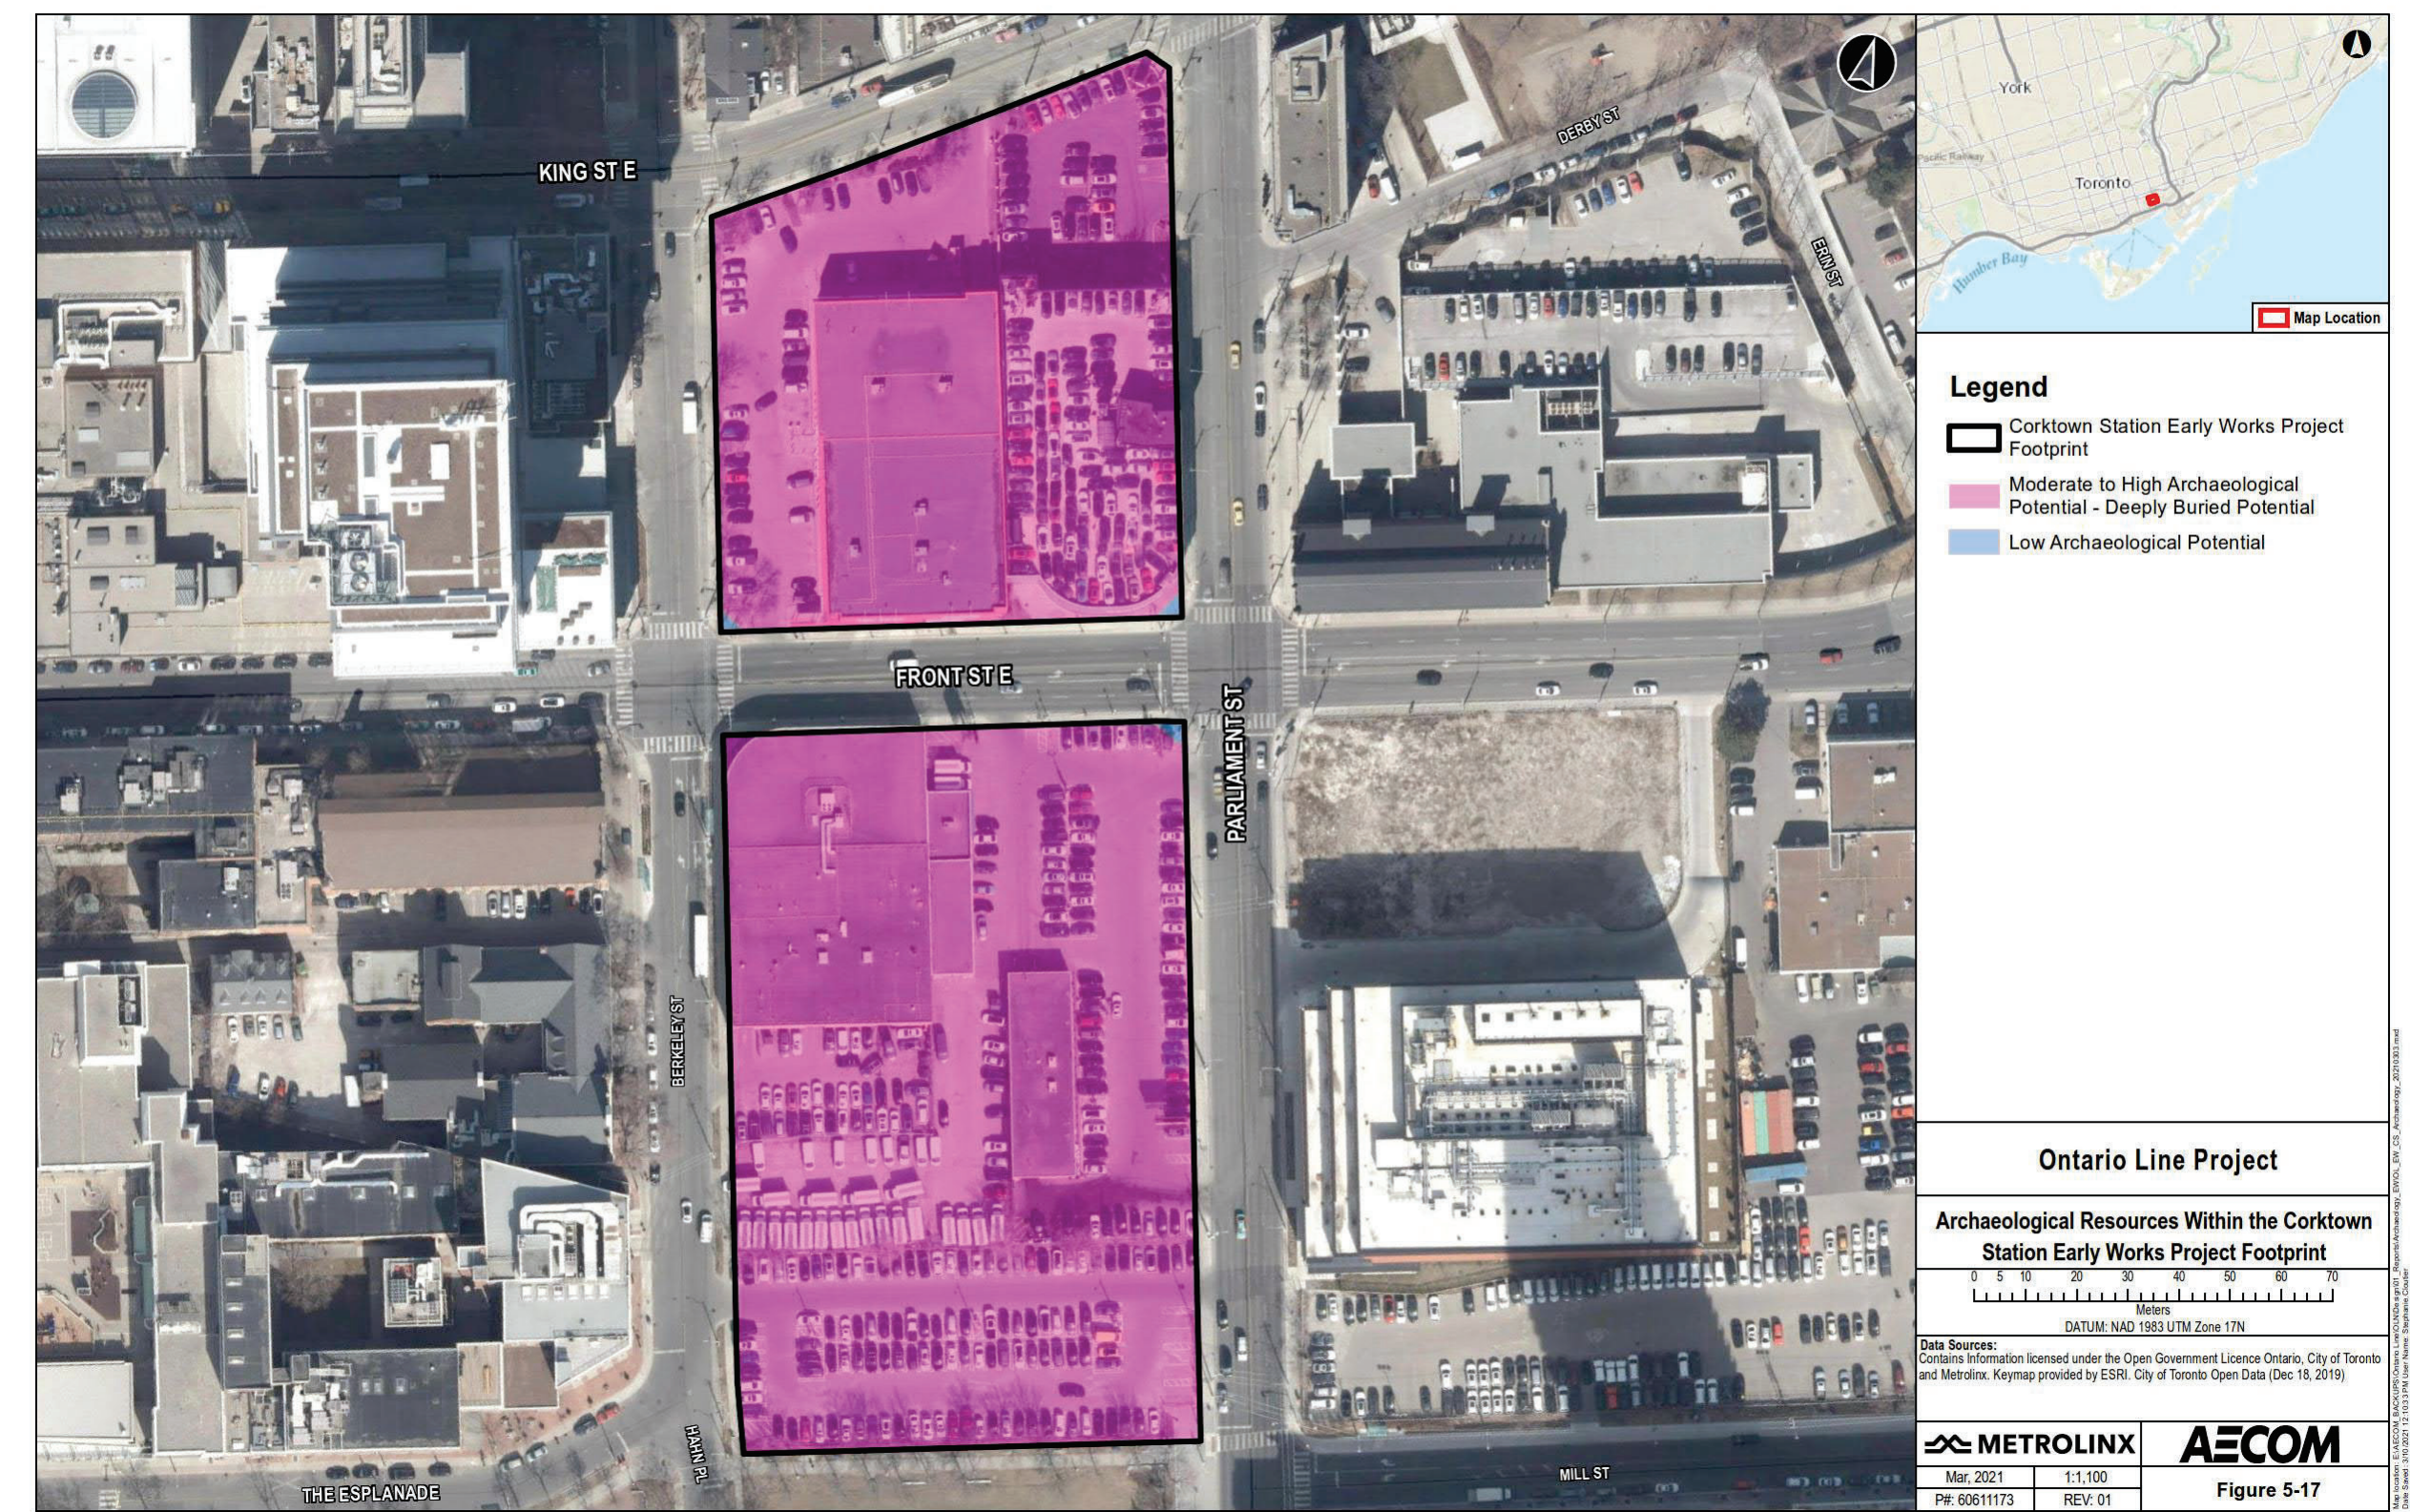

Table 6-8: Potential Impacts, Mitigation Measures and Monitoring Activities – Archaeological Resources

| Environmental Component  | Potential Impact                                                                                                                                                              | Mitigation Measure(s)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | Monitoring Activities                                                                                                                                                                                                              |
|--------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Archaeological Potential | <ul style="list-style-type: none"><li>▪ Potential for the disturbance of registered archaeological sites and/or archaeological resources not previously identified.</li></ul> | <ul style="list-style-type: none"><li>▪ Areas identified as retaining archaeological potential in the Corktown Station Early Works Project Footprint, as per the Ontario Line South Stage 1 Archaeological Assessment Report (AECOM, 2020c), are shown in <b>Figure 5-17</b>, and include the following. Should ground disturbing activities<sup>29</sup> be planned within these areas, further archaeological assessment must be completed prior to any ground disturbing activities.<ul style="list-style-type: none"><li>– The majority of the Corktown Station Early Works Project Footprint on either side of Front Street retains moderate to high archaeological potential where deeply buried archaeological potential remains, such as for discovering pre-contact Indigenous materials and/or materials related to the early development and expansion of the City of Toronto, including the First and Second Parliament Buildings, the Home District Gaol, and the Consumers’ Gas company buildings.</li></ul></li><li>▪ Given the significance of the First Parliament Site, all previous site specific archaeological assessments should be reviewed to determine what additional archaeological work is required.</li><li>▪ Any additional Archaeological Assessments (e.g., Stage 2, Stage 3 if recommended by the Stage 2) shall be completed as early as possible, and prior to any ground disturbing activities. This work shall be done in accordance with the Ministry of Heritage, Sport, Tourism and Culture Industries’ Standards and Guidelines for Consultant Archaeologists (2011) to identify any archaeological resources that may be present.</li><li>▪ Indigenous Nations will be invited to participate in monitoring requirements for any subsequent archaeological work is recommended. Any person discovering human remains must immediately notify the police or coroner and the Registrar of Cemeteries, Ministry of Government Services. In addition, consultation with relevant Indigenous Nations will be initiated in the event that archaeological resources or human remains are discovered.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | <ul style="list-style-type: none"><li>▪ None identified at this time.</li><li>▪ Metrolinx will adhere to all recommendations in any subsequent archaeological assessments, including monitoring activities, as required.</li></ul> |

<sup>29</sup> Ground disturbing activities can be defined as any and all activities that will or have the potential to impact/disturb the area below the surface. Example of activities include, but is not limited to, heavy machine movement/weight, clearing, grading, excavating, trenching, drilling, and transporting and filling of land.

---

Dear Sharday,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. Attached you will find a letter providing an update on the project. The purpose of this letter is to share the Draft Corktown Station Early Works Report (EWR) prepared for the Ontario Line Project and provide a continued invitation for feedback. I am working on filling out the consultation form as requested.

In an effort to streamline your review, we draw your attention to the attachment which provides an overview of the expected environmental impacts and proposed mitigations, as we know this may be of specific interest to you.

We ask that you provide any comments no later than June 11, 2021.

The reports are available at the following link:

We appreciate the volume of documents that Metrolinx has shared with your Nation. If you have any questions or concerns, please do not hesitate to contact the Indigenous Relations Office.

Miigwetch,

Fallon

## Notice of Publication of Draft Corktown Station Early Works Report

### Ontario Line Project

#### The Project

The Ontario Line will bring 15.6 kilometres of new subway service to Toronto to make it faster and easier for people to get where they need to be each day. The line will stretch across the city, from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line is proposed to include 15 potential stations, including six interchange stations, and connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 of its stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable commutes.

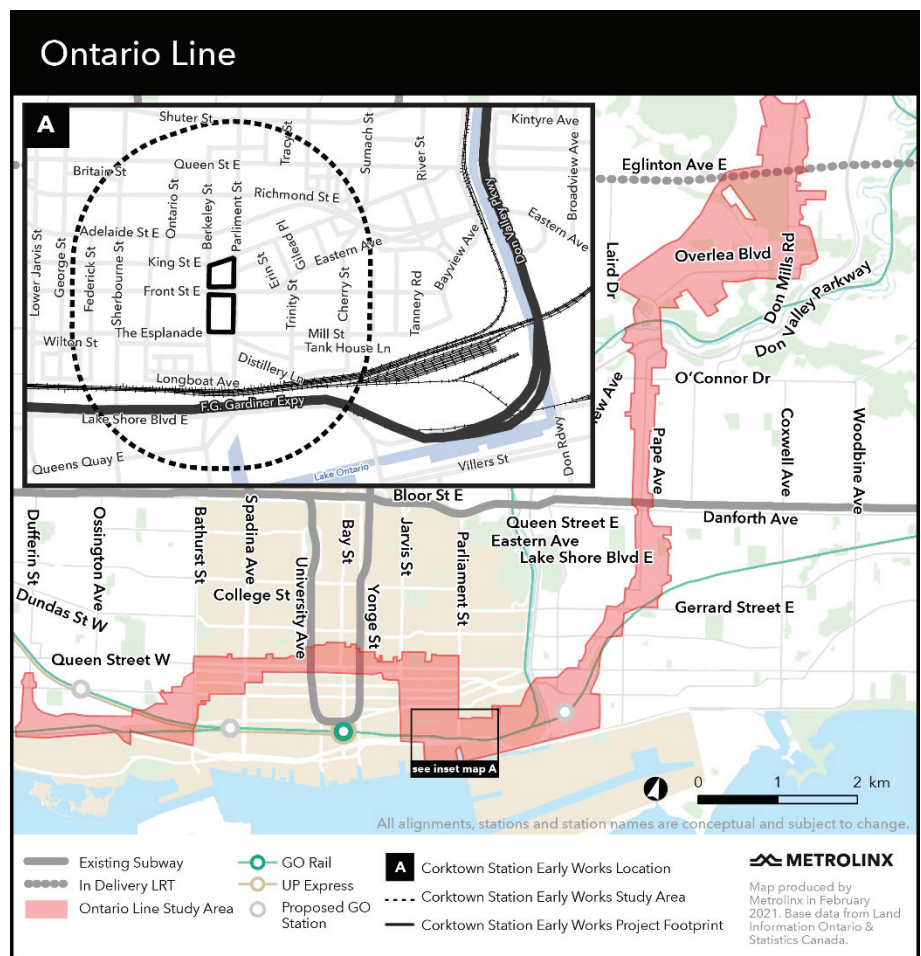

#### Corktown Station Early Works

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These early works are being advanced to prepare the site for future construction staging and laydown to support tunneling and below ground construction activities, and work associated with the future Corktown Station.

The First Parliament site, located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail), and remnants of early Toronto industry may be found here.

Metrolinx is eager to unlock the potential of the site and work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

Environmental impacts of Corktown Station early works are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*. In accordance with Section 8 of O. Reg. 341/20, Metrolinx has prepared the Draft Corktown Station Early Works Report (EWR) that is now available for public review.

The Draft EWR documents the assessment of Corktown Station early works. The report outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures and a consultation record.

### **The Draft Early Works Report Review and Consultation Process**

Effective **May 12, 2021**, the Draft Corktown Station EWR will be available for review on the project webpage ([www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)).

As we temporarily shift to virtual open houses, please join us online from **May 12 to June 11, 2021** to find out more about and provide your feedback on the Draft Corktown Station EWR via the webpage form.

Those who wish to provide comments on the Draft Corktown Station EWR must do so by **June 11, 2021** and submit them using the webpage form or address them to the following email: [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com).

Section 10 of O. Reg. 341/20 requires Metrolinx to establish an issues resolution process to attempt to resolve any concerns raised by the public or Indigenous Nations during the review period. At the end of the review period, Metrolinx will update the Draft Corktown Station EWR by adding a description of the issues resolution process, what Metrolinx did to address any concerns, and if the early works implementation timeline will be impacted as a result of addressing concerns. Metrolinx will then publish the Final Corktown Station EWR on the project webpage: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline) and issue a Notice of Publication of Final Corktown Station EWR.

To obtain a copy of the Draft Corktown Station EWR, please contact the project email listed above.

**Josh Vandezande (T: 416-202-5100, E: [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com)) may be contacted on behalf of Metrolinx.**

**Delivered by Email**

Dear Ms. James,

**RE: Ontario Line Project - Notice of Publication of Draft Corktown Station Early Works Report**

Metrolinx, a regional transportation agency, is helping to transform the way the Greater Golden Horseshoe region moves by building a fast, convenient and integrated transit network. As part of this work, Metrolinx is proceeding with the Ontario Line which will bring 15.6 kilometres of subway service to Toronto. The purpose of this letter is to share information regarding the Ontario Line project with Chippewas of Rama First Nation.

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Chippewas of Rama First Nation. Metrolinx appreciates and respects Chippewas of Rama First Nation's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to share with Chippewas of Rama First Nation the Draft Corktown Station Early Works Report (EWR).

**Project Description**

The Ontario Line will stretch from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line is proposed to include 15 stations, including six interchange stations, and connections to three GO train lines, two existing subway lines, the Eglinton Crosstown LRT, and streetcar lines. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable commutes. More information on the Project can be found on our website: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)

The initial draft of the Corktown Station EWR and a letter outlining Corktown Station early works were shared with Chippewas of Rama First Nation on March 11, 2021. As

outlined in the letter, environmental impacts of the Ontario Line Project are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*.

## Draft Corktown Station Early Works Report

In accordance with Section 8 of O. Reg. 341/20, Metrolinx has prepared a Draft Corktown Station EWR that documents the assessment of Corktown Station early works.

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These early works are being advanced to prepare the site for future construction staging and laydown to support tunneling and below ground construction activities, and work associated with the future Corktown Station. The location of the Corktown Station early works project footprint and study area can be viewed below in **Figure 1**.

Figure 1: Map of Corktown Station Early Works

The First Parliament site, located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail) and remnants of early Toronto industry may be found here. Metrolinx is eager to work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

The EWR documents the assessment of Corktown Station early works and outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures, and a consultation record.

The Draft EWR is available for your review and can be found via the Dropbox link shared in the body of the email that is associated with this letter. We welcome any additional comments you may have on the Draft EWR. The Draft EWR is available for review and comment starting **May 12, 2021** and ending on **June 11, 2021**. The Notice of Publication of Draft Corktown Station EWR is provided in **Attachment 1**. The Draft EWR will be updated following the review period, and the Final EWR will be published on the Project webpage ([www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)) and shared with Chippewas of Rama First Nation.

#### Potential Impacts and Mitigation Measures

The tables found enclosed in **Attachment 2 and 3** provide a summary of natural environment and archaeology potential impacts and mitigation measures identified as part of the Draft EWR that may be of interest to *Chippewas of Rama First Nation*. If *Chippewas of Rama First Nation* has any feedback about these potential impacts and/or mitigation strategies, or any other aspects of the Ontario Line, we welcome the opportunity to discuss further.

#### Revisions to the Initial Draft of the Corktown Station Early Works Report

In accordance with O. Reg. 341/20, Metrolinx has now incorporated comments and feedback from the initial round of engagement with Indigenous Nations and agencies on the initial draft of the Corktown Station EWR into the Draft EWR.

To streamline capacity for Chippewas of Rama First Nation to provide comments or feedback, a summary of revisions to the EWR since the circulation of the initial draft of the EWR is as follows:

- Minor editorial changes to address grammatical and syntax errors and updates to reflect comments received from agencies;
- Clarification that the project operations, construction of Corktown Station and other project components will be assessed in the Ontario Line Environmental Impact Assessment Report;
- Inclusion of information on the Parkland Strategy (City of Toronto, 2019), First Parliament Master Plan (City of Toronto, 2020) and additional information on planned community services and facilities in the Corktown Station Early Works Study Area;
- Edits to the text to reflect that the Ministry of Heritage, Sport, Tourism and Culture Industries' (MHSTCI) Minister's Consent has been granted for the demolition and removal of the non-heritage buildings at 265 Front Street East and removal of the heritage attributes at 265 Front Street East, 271 Front Street East and 25 Berkeley Street located on the First Parliament Site, and affirming Metrolinx's commitment to fulfilling the conditions outlined in the Minister's Consent, including completion of archaeological requirements;
- Additional mitigation measures for environmental disciplines such as archaeology, air quality and traffic and transportation, that include:
  - Coordination and completion of required archaeological investigations, early works activities and/or activities that have the potential for vibration effects such that buried archaeological resources are appropriately considered;
  - Use of non-chloride dust suppressants; and
  - Consultation with the City of Toronto to minimize potential impacts during special events (e.g., the Toronto Christmas Market at the Distillery District) should closures or long-term impacts be required.
- Revision of traffic and transportation figures to include additional information such as intersection names and inclusion of an additional noise and vibration figure to show representative receptor locations.

## Engagement

Metrolinx is committed to an open, respectful, and transparent relationship with Chippewas of Rama First Nation. We appreciate the significant volume of documents related to this Project that have been shared with Chippewas of Rama First Nation. We are happy to assist in the review of these documents by meeting with Chippewas of Rama First Nation or working to address any questions that Chippewas of Rama First Nation may have about this Project. If you require additional information or materials or if you wish to discuss these Projects in more detail or set up a meeting, please contact Fallon Melander, Manager of Metrolinx's Indigenous Relations Office at [IndigenousRelations@metrolinx.com](mailto:IndigenousRelations@metrolinx.com).

Metrolinx welcomes any comments or feedback on the Draft EWR from Chippewas of Rama First Nation. Please provide these in writing no later than **June 11, 2021**.

Comments and information regarding this draft report will be collected to assist in meeting the requirements of the *Environmental Assessment Act* and may be included in study documentation. With the exception of personal information, all comments will become part of the public record. Kindly note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*.

Thank you for your time in reviewing this letter.

Yours Truly,

A handwritten signature in black ink, appearing to read 'Maria Zintchenko', with a stylized flourish at the end.

---

Dear Sharday,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. We recently communicated with your Nation about the proposed Corktown Station which is along the planned alignment of the Ontario Line. This location includes parcels of land which were once the site of Upper Canada's First Parliament buildings. Metrolinx and its partners are exploring opportunities to commemorate the history of this site, and have been engaging with various parties including the City of Toronto and the Mississaugas of the Credit First Nation, on whose treaty territory this project is occurring.

Given the significant chance of recovering Indigenous and European artifacts during the Corktown Station Early Works, a detailed archaeological workplan is being developed. Metrolinx recognizes the importance and value of Indigenous monitors for any archaeology related to the Ontario Line Project. In our previous communication, an invitation was included for your Nation to participate in any archaeological fieldwork and monitoring during the Corktown Station Early Works, including demolition of modern buildings currently on the First Parliament site.

This work is anticipated to commence in Fall 2021, and if you have not yet expressed interest in participating, please feel free to do so at your earliest convenience. As a reminder any comments on the draft Corktown Station Early Works Report should be provided no later than **April 15, 2021**.

Metrolinx recognizes that the history of this location extends beyond European use, and as such, wants to take the opportunity to understand any significance it may have to Indigenous Nations. Metrolinx would like to meet with your Nation to discuss the First Parliament site, its commemoration, as well as review the broader Ontario Line project if you wish. We recognize that traditional knowledge of this area may be sacred and/or not appropriate to be shared, but would appreciate any information that may be appropriate for Metrolinx to consider.

This letter is not intended to replace engagement but to provide a high level summary for your information. We would very much appreciate meeting with your Nation to discuss in more detail. Please let me know if you have any questions or concerns. We appreciate the volume of documents that Metrolinx has shared with your Nation. If you have any questions or concerns, please do not hesitate to contact me.

Miigwetch,

Fallon

**Delivered by Email**

Dear Ms. James,

**RE: Ontario Line Project - First Parliament Site and Lime Kiln Site**

Metrolinx, a regional transportation agency, is helping to transform the way the Greater Golden Horseshoe moves by building a fast, convenient and integrated transit network. As part of this work, Metrolinx is continuing the pre-construction planning of the Ontario Line which will bring nearly 16 kilometres of subway service to Toronto.

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Chippewas of Rama First Nation. Metrolinx appreciates and respects Chippewas of Rama First Nation's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to share with Chippewas of Rama First Nation information regarding Corktown Station early works and additional information regarding upcoming field visits and investigations at the Corktown Station early works site, which includes two registered archaeological sites, the First Parliament site and the Lime Kiln site.

**Project Description**

The proposed Ontario Line is a new 16-kilometer subway line, which will occupy an exclusive right-of-way system encompassing a combination of below-grade, above-grade, and at-grade alignment. The route (Figure 1) will run from Ontario Place/Exhibition through downtown Toronto to the Ontario Science Centre in the City of Toronto, with six (6) potential interchange stations and 17 new connections to GO Transit, existing subways and streetcars. More information on the Project can be found on our website: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)

**Corktown Station Early Works**

As communicated in the letter sent to Chippewas of Rama First Nation on March 11, 2021, the Corktown Station site has been identified for launching tunnel excavation equipment for the downtown and Don Yard segments of the proposed Ontario Line alignment, as well as the location of the Corktown Station. The First Parliament and Lime Kiln Sites, located within the Corktown Station area, are known archaeological sites which require additional archaeological study ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures, followed by completion of necessary archaeological studies, is required. Completion of this preparatory work on an expedited basis is essential to allow for the timely delivery of the overall Project and is anticipated to begin in the Fall 2021, subject to the completion of the Corktown Station early works process in accordance with Ontario Regulation 341/20: Ontario Line Project.

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These activities will enable completion of environmental due diligence investigations, including archaeological assessments. These activities will occur on properties within the Corktown Station early works project footprint, as shown in **Figure 1**.

Figure 1: Map of Corktown Station Early Works

Environmental impacts of Corktown Station early works are being assessed in accordance with O. Reg. 341/20. Metrolinx shared the draft Corktown Station Early Works Report and associated discipline reports with Chippewas of Rama First Nation on March 11, 2021 and had requested any comments to be provided by April 9, 2021.

## Archaeological Work at the First Parliament Site and Lime Kiln Site

Metrolinx appreciates the significance of archaeology to Chippewas of Rama First Nation. The properties at 265 Front Street East, 271 Front Street East, and 25 Berkeley Street, in the St. Lawrence neighbourhood of the City of Toronto, are collectively host to the First Parliament Site. It is located on the southwest corner of Parliament Street and King Street, between Parliament Street and Berkeley Street. The First Parliament Site is a registered archaeological site (AjGu-41) which may include resources associated with the First and Second Parliament Buildings, the Home District Gaol, and Consumers' Gas company buildings. The surface of the property is currently occupied by automotive businesses, including a car dealership, car wash, and surface parking lot. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and remnants of early Toronto industry may be found at this site.

North of the First Parliament Site is another registered archaeological site (AjGu-64), the Lime Kiln Site, which includes remains from the Toronto Lime Works Company. A variety of structural features, in various states of preservation, have been documented on this site. The location of the Lime Kiln Site and the First Parliament Site are shown in **Figure 2**.

Figure 2: Location of First Parliament Site and Lime Kiln Site Areas

The First Parliament Site and Lime Kiln Site require additional archaeological studies ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures is necessary. Completion of this preparatory work is essential to allow for the timely delivery of the Ontario Line.

Archaeological fieldwork to remove or protect archaeological resources is anticipated to commence in early Fall 2021, and a workplan for these archaeological investigations is under development. As mentioned in the letter sent on March 11, 2021, Chippewas of Rama First Nation is invited to participate in all archaeological fieldwork, and to review and provide comments on forthcoming reports.

### **Feedback on Commemoration of First Parliament Site**

Metrolinx appreciates that the history of the First Parliament site is not one simply of Canadian origin, but rather holds longer history and tradition. Metrolinx also appreciates that the site of the First Parliament of Upper Canada is linked to a history of colonization and harmful practices towards Indigenous Peoples. Given the significance of this site, Metrolinx is engaging with Indigenous Nations, City of Toronto and the broader community to identify opportunities for commemoration. Metrolinx is committed to ensuring that any feedback from Chippewas of Rama First Nation regarding the significance of this site is considered as part of this commemoration. Metrolinx appreciates that traditional or cultural knowledge about this site may be sacred and/or not be appropriate to be shared but welcomes any comments or ideas from Chippewas of Rama First Nation that may be appropriate to commemorate Indigenous Peoples.

### **Engagement**

Metrolinx is committed to an open, respectful, and transparent relationship with Chippewas of Rama First Nation. We would like to meet with Chippewas of Rama First Nation to better understand any significance the First Parliament site may have to your Nation. We are also happy to assist in reviewing the Corktown Station Early Works Report or reviewing the proposed archaeological workplan for this site. If Chippewas of Rama First Nation requires additional information or materials, or you wish to discuss this project in more detail or set up a meeting, please contact Fallon Melander, Manager, Indigenous Relations at Metrolinx. She can be contacted at [IndigenousRelations@metrolinx.com](mailto:IndigenousRelations@metrolinx.com).

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*. Thank you for your time in reviewing these assessments.

Thank you for your time in reviewing this letter.

Yours Truly,

**Subject:** Ontario Line - Project Update and Draft Corktown Station Early Works Report for Review + Invitation to Participate in Archaeological Fieldwork

Dear Ms. James,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. Attached you will find a letter providing an update on the project. The purpose of this letter is to:

- Provide an update on the scope of the project work
- share the initial draft of the Early Works Report for the proposed Corktown Station

Invite your Nation to participate in upcoming archaeological fieldwork

In an effort to streamline your review, we draw your attention to the attachment which provides an overview of the expected environmental impacts and proposed mitigations, as we know this may be of specific interest to you.

Metrolinx is also preparing a letter specific to works being planned within the Don Valley as we recognize the significance of this waterway to many Nations. We hope to share that letter soon. We are happy to meet with your Nation to discuss the Ontario Line and address any questions or concerns that your Nation may have.

We ask that any comments on the draft Corktown Station Early Works Report be provided no later than **April 15, 2021**. Please note that the Noise and Vibration Report, which will be part of the Early Works Report is still being prepared and we will share with your Nation by March 19, 2021.

The draft Corktown Station Early Works Report is available at the following link |

[REDACTED]

Please let us know as soon as possible if your Nation has interest in participating in future archaeological fieldwork.

We appreciate the volume of documents that Metrolinx has shared with your Nation.

If you have any questions or concerns, please do not hesitate to contact me.

Miigwetch,

Fallon

Dear Ms. James,

**RE: Ontario Line Project - Corktown Station Early Works Report**

Metrolinx, a regional transportation agency, is helping to transform the way the Greater Golden Horseshoe region moves by building a fast, convenient and integrated transit network. As part of this work, Metrolinx is proceeding with the Ontario Line which will bring nearly 16 kilometres of subway service to Toronto. The purpose of this letter is to share information regarding the Ontario Line project with Chippewas of Rama First Nation.

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Chippewas of Rama First Nation. Metrolinx appreciates and respects Chippewas of Rama First Nation's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to share with Chippewas of Rama First Nation information regarding Corktown Station early works and invite feedback on the initial draft of the Corktown Station Early Works Report.

**Project Description**

The Project is a new subway line with connections to Line 1 (Yonge-University) subway service at Osgoode and Queen Stations, Line 2 (Bloor-Danforth) subway service at Pape Station, and Line 5 (Eglinton Crosstown) service at the future Science Centre Station. Fifteen stations are proposed, with additional connections to three GO Transit lines (Lakeshore East, Lakeshore West and Stouffville), and the Queen, King, Bathurst, Spadina, Harbourfront and Gerrard/Carlton streetcar routes. The Project will reduce crowding on Line 1 and provide connections to new high-order rapid transit neighbourhoods. More information on the Project can be found on our website: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)

**Ontario Line Environmental Assessment Process and Reports**

10 Bay Street  
Toronto, ON M5J 2N8

416.202.4967  
[metrolinx.com](http://metrolinx.com)

In 2020, Metrolinx provided Chippewas of Rama First Nation with an outline of the Ontario Line environmental assessment process. The environmental assessment for the Ontario Line Project is being completed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20) made under the *Environmental Assessment Act*. The regulation outlines a Project-specific environmental assessment that includes an Environmental Conditions Report, an Environmental Impact Assessment Report and provides opportunity for Early Works Reports for assessment of works that are ready to proceed in advance of the Environmental Impact Assessment Report. An overview of the reports is outlined below and their anticipated publication timeline is provided in **Attachment 1**.

### Environmental Conditions Report

The Environmental Conditions Report characterizes existing environmental conditions within the Ontario Line study area through a combination of desktop review and field studies and was finalized in November 2020. The report also summarizes potential impacts and mitigation measures for consideration during project planning and design. Potential impacts and mitigation measures identified in the Environmental Conditions Report will be confirmed and refined within the Early Works Reports and the Environmental Impact Assessment Report.

### Early Works Reports

Metrolinx is assessing several early works components to support the main construction of the Ontario Line project. Early works are components of the Ontario Line Project that are anticipated to be ready to proceed before completion of the Environmental Impact Assessment Report, such as station construction, rail corridor expansion, utility relocation or bridge replacement or expansion, as defined in O. Reg. 341/20.

Initially, the early works required to support the Ontario Line project were assessed in a single report, which was shared in June 2020 and included Exhibition Station, Lower Don Bridges, Lakeshore East Joint Corridor and East Harbour early works.

Since then, the single Early Works Report has been split into several Early Works Reports, each covering either a single early works location or multiple locations if they are in close proximity. Each Early Works Report provides a description of the early works and alternatives considered, documents local environmental conditions, and outlines early works-specific environmental impacts, mitigation measures,

monitoring activities, potentially required permits and approvals and other components.

It is important to note that two new early works projects, Don Yard and Corktown Station, have been added as well. The Early Works Reports, including this new scope of work are summarized below:

- Exhibition Station Early Works  
Exhibition Station early works are documented in the Exhibition Station Early Works Report, finalized in February 2021.
- Lakeshore East Joint Corridor Early Works  
Lakeshore East Joint Corridor early works will be documented under a separate Early Works Report which will also include East Harbour Station.
- Lower Don Bridges & Don Yard Early Works  
Lower Don Bridges early works will be documented in the Lower Don Bridges and Don Yard Early Works Report. Don Yard is a new early works project that will include construction of Ontario Line tunnel and portal structures between Cherry Street and the Lower Don River and accompanying shift of the Richmond Hill and Lakeshore East GO tracks; installation or upgrading of retaining walls and noise barriers, where appropriate; and utility and signal infrastructure relocation or protection. The initial draft of the Lower Don Bridges and Don Yard Early Works Report is anticipated to be shared with Chippewas of Rama First Nation in mid to late April.
- Corktown Station Early Works  
Corktown Station is a new early works project. Further information on Corktown Station early works is provided below.

### Environmental Impact Assessment Report

The main report produced as part of this process is the Environmental Impact Assessment Report. It will cover the construction and operation of the Ontario Line. The report will include a final description of the Ontario Line Project, environmental impact evaluation results, mitigation measures, monitoring activities, potentially required permits and approvals and other components as outlined in O. Reg. 341/20.

## **Work along the Don River and within the vicinity of the Don Valley**

Metrolinx appreciates the significance of waterways to Chippewas of Rama First Nation. As such, Metrolinx is preparing an information letter specific to work occurring near or along the Don River and within the Valley. Metrolinx will provide details about the scope of work and anticipated natural environmental and archaeological assessments. Metrolinx is committed to exploring opportunities for Chippewas of Rama First Nation to participate in these assessments should Chippewas of Rama First Nation express interest.

## **Corktown Station Early Works**

The Corktown Station site has been identified for launching tunnel excavation equipment for the downtown and Don Yard segments of the proposed Ontario Line alignment, as well as the location for the Corktown Station. The First Parliament site, located within the Corktown Station area, is a known archaeological site which requires additional archaeological study ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures, followed by completion of necessary archaeological studies, is required. Completion of this preparatory work on an expedited basis is essential to allow for the timely delivery of the overall Project.

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These activities will enable completion of environmental due diligence investigations, including archaeological assessments. These activities will occur on properties within the Corktown Station early works project footprint, as shown in **Figure 2**.

Figure 2: *Map of Corktown Station Early Works*

Environmental impacts of Corktown Station early works are being assessed in accordance with O. Reg. 341/20.

Metrolinx is sharing the initial draft of the Corktown Station Early Works Report, including the Corktown Station Natural Environment Report, via the Dropbox link enclosed in the email for Chippewas of Rama First Nation's review. The Corktown Station Early Works Report documents the assessment of Corktown Station early works. It also outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures, and a consultation record. For a summary of the potential mitigation measures identified, please see the table found as **Attachment 2**.

Note that the initial draft of the report enclosed in the email currently does not include information on noise and vibration as the Corktown Station Noise and Vibration Report is still being prepared. The initial draft of the Corktown Station Noise and Vibration Report is anticipated to be shared with Chippewas of Rama First Nation on **March 19, 2021** for review.

Metrolinx welcomes any comments or feedback on the initial draft of the Corktown Station Early Works Report from Chippewas of Rama First Nation. Please provide these in writing no later than **April 15, 2021**.

Based on our currently anticipated schedule (**Figure 1**), the Notice of Publication of Draft Corktown Station Early Works Report is planned for late-April 2021, at which point the draft report will be available to all interested parties for review, including Chippewas of Rama First Nation, the public and regulatory agencies.

### Archaeology

As outlined above, archaeological assessments are anticipated to take place as part of advancing Corktown Station Early Works. Metrolinx would appreciate any interest Chippewas of Rama First Nation may have in participating in planned future archaeological fieldwork for this site. The maps in **Attachment 3** illustrate the areas that will be subject to future archaeological assessments that include fieldwork. Upon receipt of Chippewas of Rama First Nation's interest in participating, Metrolinx will work to coordinate your Nation's involvement.

Metrolinx acknowledges that Chippewas of Rama First Nation should be aware of and engaged regarding any future archaeological work, especially the discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will ensure that future archaeological assessments are provided to Chippewas of Rama First Nation in draft form, prior to submission to MHSTCI.

### **Engagement**

Metrolinx is committed to an open, respectful, and transparent relationship with Chippewas of Rama First Nation. We appreciate the significant volume of documents related to this Project that have been shared with Chippewas of Rama First Nation. We are happy to assist in the review of these documents by meeting with Chippewas of Rama First Nation or working to address any questions that Chippewas of Rama First Nation may have about this Project. If you require additional information or materials or if you wish to discuss these Projects in more detail or set up a meeting, please contact Fallon Melander, Manager of Metrolinx's Indigenous Relations Office at [IndigenousRelations@metrolinx.com](mailto:IndigenousRelations@metrolinx.com).

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*. Thank you for your time in reviewing these assessments.

Thank you for your time in reviewing this letter.

| Vegetation Communities                                                                                      | <ul style="list-style-type: none"><li>City and private tree removal</li></ul>                                                                                                                            | <ul style="list-style-type: none"><li>An Arborist Report by an International Society of Arboriculture Certified Arborist will be prepared, if required, in accordance with the Ontario Forestry Act R.S.O. 1990, and other regulations and best management practices as applicable.</li><li>The Arborist Report will include, but not be limited to the individual identification of all trees within the Corktown Station early works construction areas including those that require removal or preservation, or trees that may be injured. Trees to be identified may include those on Metrolinx property, trees on public and private lands, and boundary trees. City of Toronto by-laws dictate the minimum area buffers to be inventoried and Diameter at Breast Height which requires inventory.</li><li>Prior to the undertaking of tree removals, a Tree Removal Strategy/Tree Preservation Plan will be developed to document tree protection and mitigation measures that follow the City of Toronto Tree Protection Policy and Specifications for Construction Near Trees Guidelines (2016b) and adherence with best practices, standards and regulations on safety, environmental and wildlife protections.</li><li>Compensation for tree removals will be undertaken in accordance with provisions outlined in the Metrolinx Vegetation Guideline (2020).</li><li>Pruning of branches will be conducted through the implementation of proper arboricultural techniques.</li><li>Tree Protection Zone fencing will be established to protect and prevent tree injuries. Tree Protection Zones will be clearly staked prior to construction using barriers in accordance with local by-law requirements.</li></ul> | <ul style="list-style-type: none"><li>Regular inspection in areas of vegetation removal will be undertaken as required during construction to ensure that fencing is intact, only specified trees are removed and no damage is caused to the remaining trees and adjacent vegetation communities.</li><li>On-site inspection will be undertaken to confirm the implementation of the mitigation measures and identify corrective actions if required. Corrective actions may include additional site maintenance and alteration of activities to minimize impacts.</li><li>If required, the approach to compensation monitoring will be developed in accordance with Metrolinx’s Vegetation Guideline (2020).</li></ul> |

| Environmental Component                               | Potential Impact                                                                                                                                                                              | Mitigation Measure(s)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Monitoring Activities                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|-------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Vegetation Communities</b>                         | <ul style="list-style-type: none"><li>▪ Soil contamination as a result of spills (e.g., grease and/or fuel) from equipment use</li><li>▪ Introduction or spread of Invasive Species</li></ul> | <ul style="list-style-type: none"><li>▪ A Spill Prevention and Contingency Plan will be developed and adhered to. Spills will be immediately contained and cleaned up in accordance with provincial regulatory requirements and the contingency plan.</li><li>▪ Refuelling shall be done within refuelling stations lined with appropriate material to prevent seepage and fuel discharge.</li><li>▪ All machinery, construction equipment and vehicles arriving on site should be in clean condition (e.g., free of fluid leaks, soils containing seeds of plant material from invasive species) and be inspected and washed in accordance with the Clean Equipment Protocol for Industry (Halloran et al., 2013) prior to arriving and leaving the construction site in order to prevent the spread of invasive species to other locations.</li></ul>                  | <ul style="list-style-type: none"><li>▪ On-site inspection will be undertaken to confirm the implementation of the mitigation measures and identify corrective actions if required. Corrective actions may include additional site maintenance and alteration of activities to minimize impacts.</li><li>▪ Ensure precautions are being taken to minimize the spread of invasive species by implementing the Clean Equipment Protocol for Industry (Halloran et al., 2013) on equipment and machinery prior to moving sites.</li><li>▪</li></ul> |
| <b>Wildlife and Wildlife Habitat – General</b>        | <ul style="list-style-type: none"><li>▪ Disturbance, displacement or mortality of wildlife</li></ul>                                                                                          | <ul style="list-style-type: none"><li>▪ Prior to construction, investigation of the Corktown Station early works construction areas for wildlife and wildlife habitat that may have established following the completion of previous surveys will be undertaken, as appropriate.</li><li>▪ If wildlife is encountered, measures will be implemented to avoid destruction, injury, or interference with the species, and/or its habitat. For example, construction activities will cease or be reduced, and wildlife will be encouraged to move off-site and away from the construction area on its own. A qualified Biologist will be contacted to define the appropriate buffer required from wildlife.</li></ul>                                                                                                                                                       | <ul style="list-style-type: none"><li>▪ On-site inspection by on-site environmental workers or construction staff should occur daily within the construction area to ensure that no wildlife is trapped within the construction area.</li><li>▪ On-site inspection will be undertaken to confirm the implementation of the mitigation measures and identify corrective actions if required. Corrective actions may include additional site maintenance and alteration of activities to minimize impacts.</li></ul>                               |
| <b>Significant Wildlife Habitat: Common Nighthawk</b> | <ul style="list-style-type: none"><li>▪ Removal of candidate nesting habitat for Common Nighthawk</li></ul>                                                                                   | <ul style="list-style-type: none"><li>▪ Refer below to mitigation measures described for Migratory Breeding Birds and Nests.</li><li>▪ Demolition of buildings should be scheduled outside of the breeding bird season of April 1 to August 31. If this is not possible and buildings must be demolished during this period, the following will be completed:</li><li>▪ The roofs will be checked for presence of gravel. If gravel is not present, then the building is unlikely to provide suitable nesting habitat for Common Nighthawk. If gravel is present, a search for eggs and nesting activity for Common Nighthawk on the roof will be conducted. If nests or nesting activity of Common Nighthawk are confirmed, the building cannot be demolished until it is confirmed by a Qualified Biologist that young have fully fledged and left the nest.</li></ul> | <ul style="list-style-type: none"><li>▪ Refer below for monitoring requirements described for Migratory Breeding Birds and Nests.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                      |
| <b>Migratory Breeding Birds and Nests</b>             | <ul style="list-style-type: none"><li>▪ Disturbance or destruction of migratory bird nests</li></ul>                                                                                          | <ul style="list-style-type: none"><li>▪ All works must comply with the Migratory Birds Convention Act, including timing windows for the nesting period (April 1 to August 31 in Ontario).</li><li>▪ If activities are proposed to occur during the general nesting period, a breeding bird and nest survey will be undertaken prior to required activities. Nest searches by an experienced searcher are required and will be completed by a qualified Biologist no more than 48 hours prior to vegetation removal.</li><li>▪ If a nest of a migratory bird is found outside of this nesting period (including a ground nest) it still receives protection.</li></ul>                                                                                                                                                                                                    | <ul style="list-style-type: none"><li>▪ Regular monitoring (field observations, on-site inspections) will be undertaken to confirm that activities do not encroach into nesting areas or disturb active nesting sites.</li></ul>                                                                                                                                                                                                                                                                                                                 |

If clarification is required regarding regulatory requirements, the appropriate regulatory agencies will be consulted.

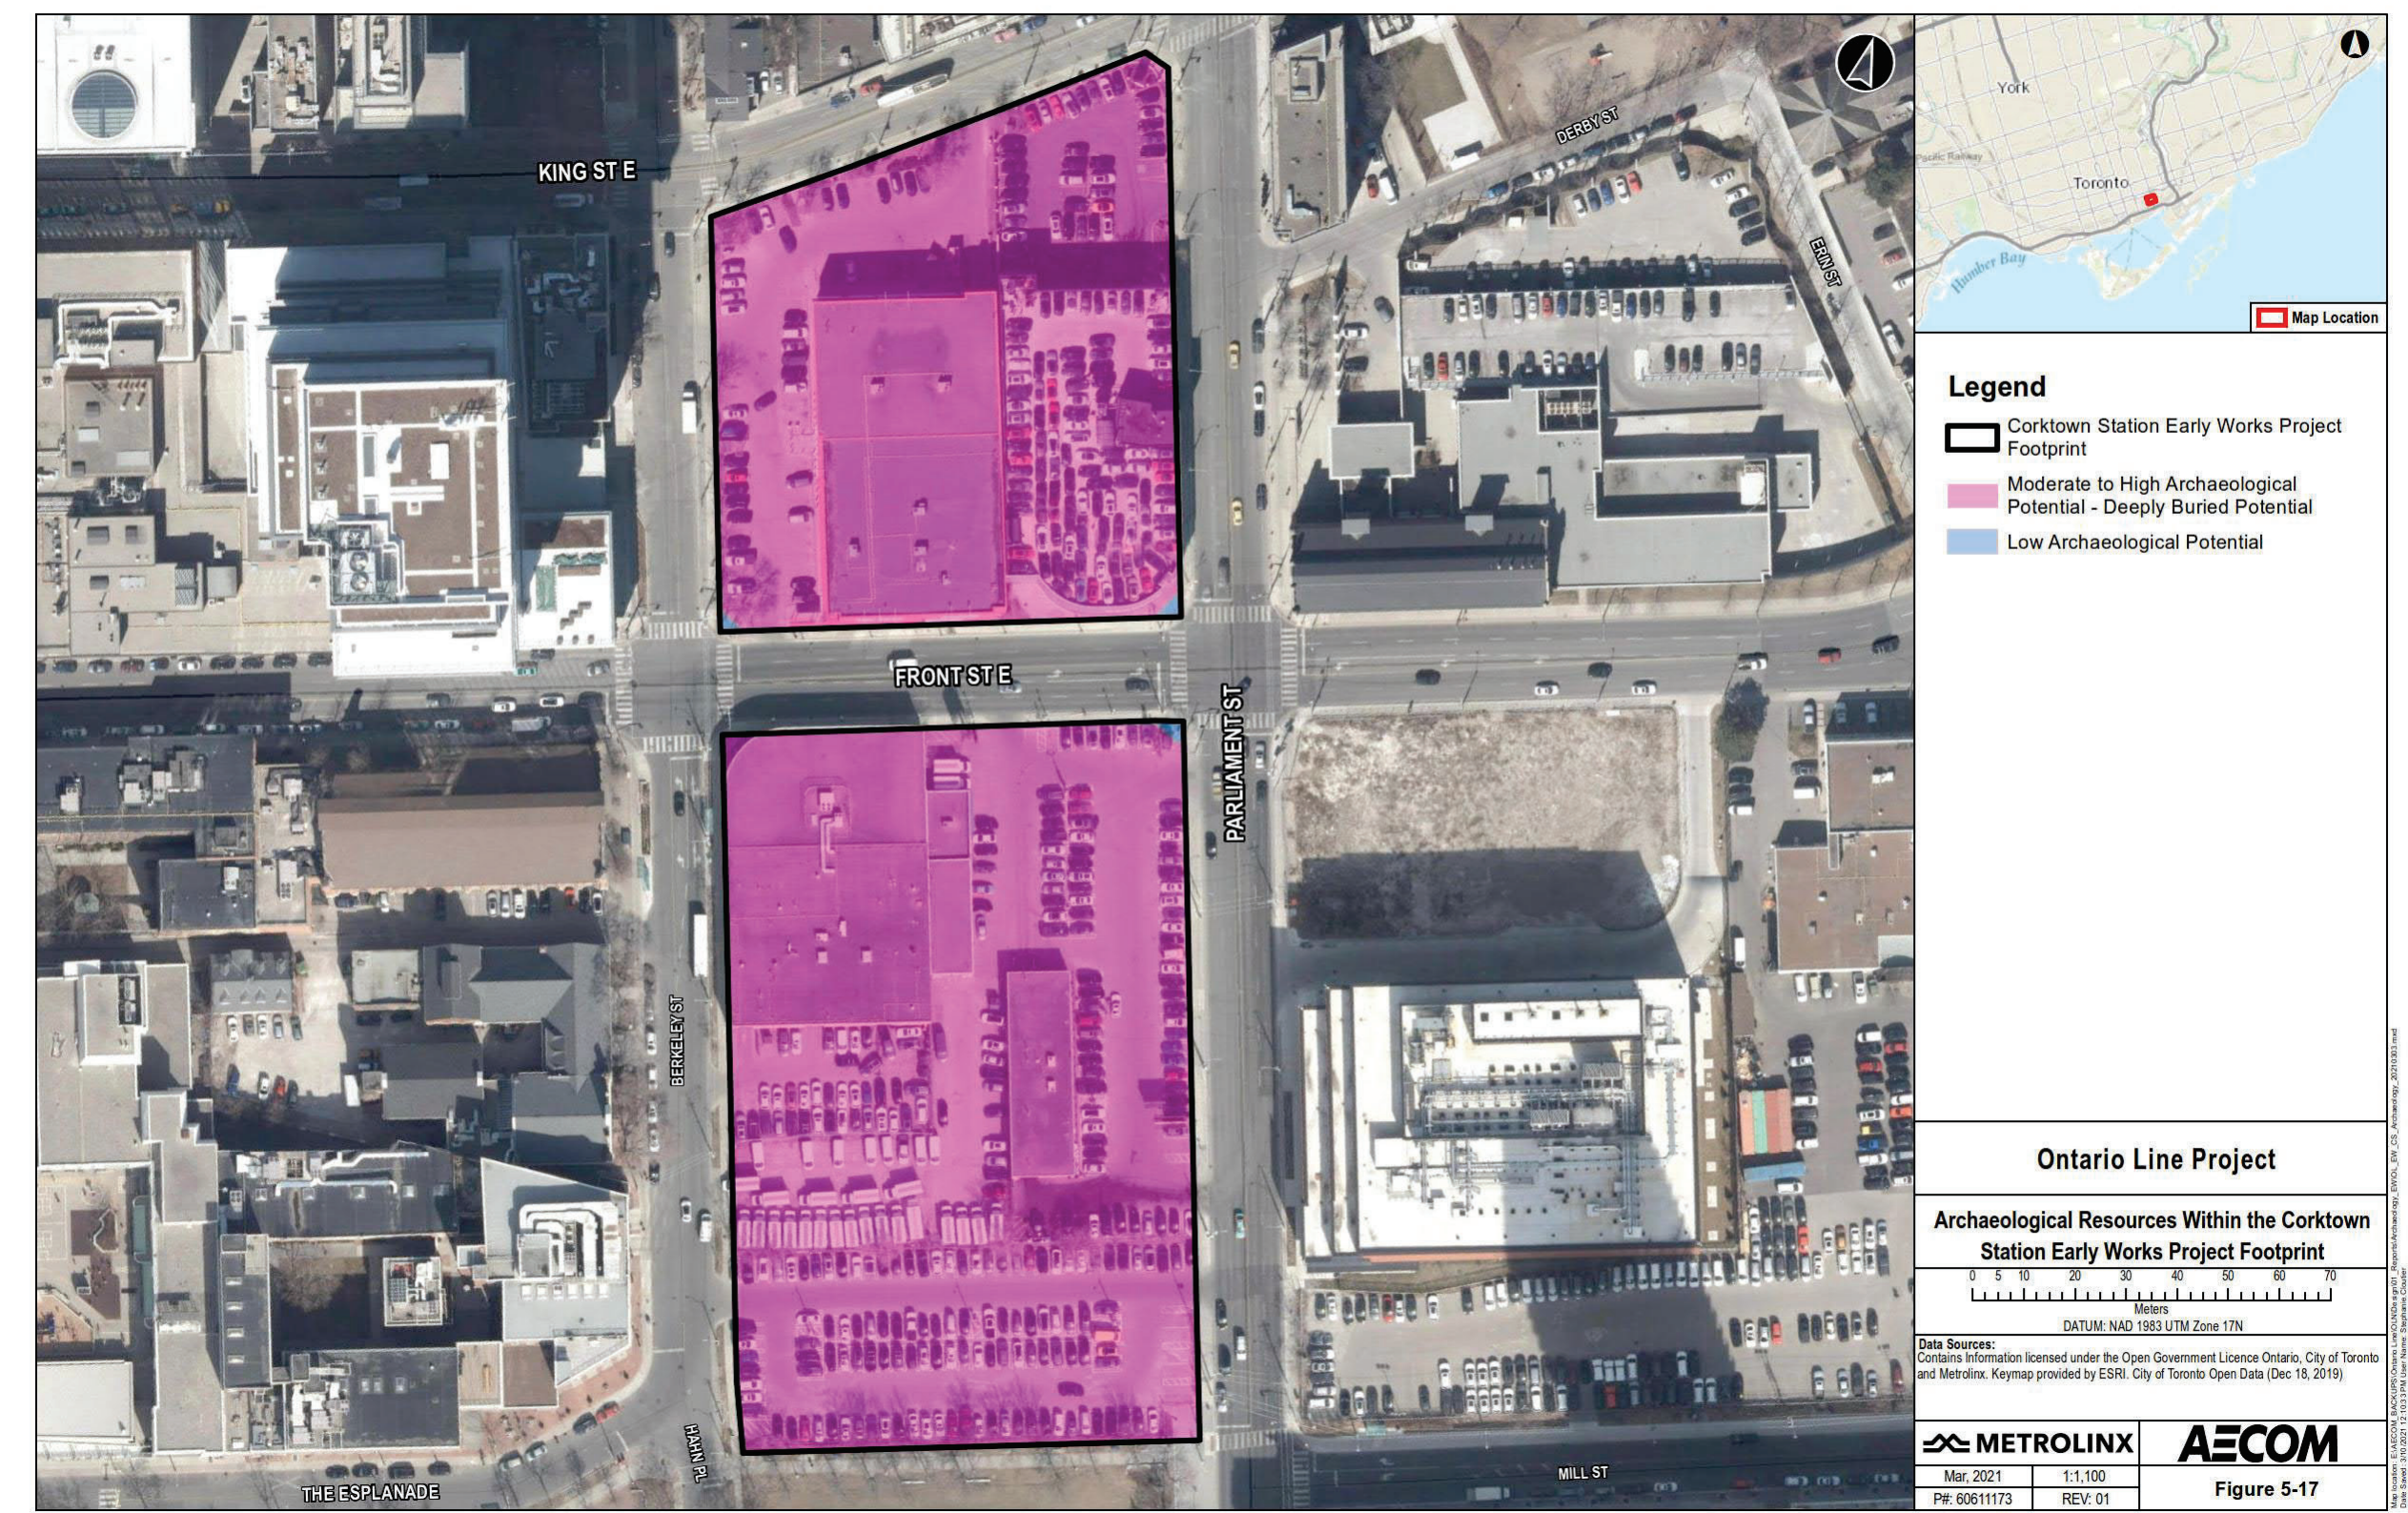

Table 6-8: Potential Impacts, Mitigation Measures and Monitoring Activities – Archaeological Resources

| Environmental Component  | Potential Impact                                                                                                                                                            | Mitigation Measure(s)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Monitoring Activities                                                                                                                                                                                                          |
|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Archaeological Potential | <ul style="list-style-type: none"><li>Potential for the disturbance of registered archaeological sites and/or archaeological resources not previously identified.</li></ul> | <ul style="list-style-type: none"><li>Areas identified as retaining archaeological potential in the Corktown Station Early Works Project Footprint, as per the Ontario Line South Stage 1 Archaeological Assessment Report (AECOM, 2020c), are shown in <b>Figure 5-17</b>, and include the following. Should ground disturbing activities<sup>29</sup> be planned within these areas, further archaeological assessment must be completed prior to any ground disturbing activities.<ul style="list-style-type: none"><li>The majority of the Corktown Station Early Works Project Footprint on either side of Front Street retains moderate to high archaeological potential where deeply buried archaeological potential remains, such as for discovering pre-contact Indigenous materials and/or materials related to the early development and expansion of the City of Toronto, including the First and Second Parliament Buildings, the Home District Gaol, and the Consumers’ Gas company buildings.</li></ul></li><li>Given the significance of the First Parliament Site, all previous site specific archaeological assessments should be reviewed to determine what additional archaeological work is required.</li><li>Any additional Archaeological Assessments (e.g., Stage 2, Stage 3 if recommended by the Stage 2) shall be completed as early as possible, and prior to any ground disturbing activities. This work shall be done in accordance with the Ministry of Heritage, Sport, Tourism and Culture Industries’ Standards and Guidelines for Consultant Archaeologists (2011) to identify any archaeological resources that may be present.</li><li>Indigenous Nations will be invited to participate in monitoring requirements for any subsequent archaeological work is recommended. All future archaeological assessment findings will be shared with the Indigenous Nations that were engaged during the Stage 1 archaeological assessment.</li></ul> | <ul style="list-style-type: none"><li>None identified at this time.</li><li>Metrolinx will adhere to all recommendations in any subsequent archaeological assessments, including monitoring activities, as required.</li></ul> |

The proponent or person discovering the archaeological resources must cease alteration of the site immediately and engage a licensed archaeologist to carry out archaeological field work, in compliance with Section 48(1) of the Ontario Heritage Act. Any person discovering human remains must immediately notify the police or coroner and the Registrar of Cemeteries, Ministry of Government Services. In addition, consultation with relevant Indigenous Nations will be initiated in the event that archaeological resources or human remains are discovered.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <ul style="list-style-type: none"><li>None identified at this time.</li><li>Metrolinx will adhere to all recommendations in any subsequent archaeological assessments, including monitoring activities, as required.</li></ul> |

<sup>29</sup> Ground disturbing activities can be defined as any and all activities that will or have the potential to impact/disturb the area below the surface. Example of activities include, but is not limited to, heavy machine movement/weight, clearing, grading, excavating, trenching, drilling, and transporting and filling of land.

---

Dear Julie and Team,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. Attached you will find a letter providing an update on the project. The purpose of this letter is to share the Draft Corktown Station Early Works Report (EWR) prepared for the Ontario Line Project and provide a continued invitation for feedback. We appreciate that Curve Lake First Nation has indicated that this project falls outside its territory and would like to be kept informed.

To that end I've uploaded the relevant documents and reports to the shared dropbox. In an effort to streamline your review, we draw your attention to the attachment which provides an overview of the expected environmental impacts and proposed mitigations, as we know this may be of specific interest to you.

Should you have any comments, please let us know no later than June 11, 2021.

If you have any questions or concerns, please do not hesitate to contact the Indigenous Relations Office.

Miigwetch,

Fallon

**Fallon Melander**

**Delivered by email**

Dear Dr. Kapyrka,

**RE: Ontario Line Project - Notice of Publication of Draft Corktown Station Early Works Report**

Metrolinx, a regional transportation agency, is helping to transform the way the Greater Golden Horseshoe region moves by building a fast, convenient and integrated transit network. As part of this work, Metrolinx is proceeding with the Ontario Line which will bring 15.6 kilometres of subway service to Toronto. The purpose of this letter is to share information regarding the Ontario Line project with Curve Lake First Nation.

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Curve Lake First Nation. Metrolinx appreciates and respects Curve Lake First Nation's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to share with Curve Lake First Nation the Draft Corktown Station Early Works Report (EWR).

**Project Description**

The Ontario Line will stretch from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line is proposed to include 15 stations, including six interchange stations, and connections to three GO train lines, two existing subway lines, the Eglinton Crosstown LRT, and streetcar lines. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable commutes. More information on the Project can be found on our website:  
[www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)

The initial draft of the Corktown Station EWR and a letter outlining Corktown Station early works were shared with Curve Lake First Nation on March 11, 2021. As outlined in the letter, environmental impacts of the Ontario Line Project are being assessed in

accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*.

## Draft Corktown Station Early Works Report

In accordance with Section 8 of O. Reg. 341/20, Metrolinx has prepared a Draft Corktown Station EWR that documents the assessment of Corktown Station early works.

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These early works are being advanced to prepare the site for future construction staging and laydown to support tunneling and below ground construction activities, and work associated with the future Corktown Station. The location of the Corktown Station early works project footprint and study area can be viewed below in **Figure 1**.

Figure 1: Map of Corktown Station Early Works

10 Bay Street  
Toronto, ON M5J 2N8

416.202.4967  
metrolinx.com

The First Parliament site, located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail) and remnants of early Toronto industry may be found here. Metrolinx is eager to work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

The EWR documents the assessment of Corktown Station early works and outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures, and a consultation record.

The Draft EWR is available for your review and can be found via the Dropbox link shared in the body of the email that is associated with this letter. We welcome any additional comments you may have on the Draft EWR. The Draft EWR is available for review and comment starting **May 12, 2021** and ending on **June 11, 2021**. The Notice of Publication of Draft Corktown Station EWR is provided in **Attachment 1**. The Draft EWR will be updated following the review period, and the Final EWR will be published on the Project webpage ([www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)) and shared with Curve Lake First Nation.

#### Potential Impacts and Mitigation Measures

The tables found enclosed in **Attachment 2 and 3** provide a summary of natural environment and archaeology potential impacts and mitigation measures identified as part of the Draft EWR that may be of interest to *Curve Lake First Nation*. If *Curve Lake First Nation* has any feedback about these potential impacts and/or mitigation strategies, or any other aspects of the Ontario Line, we welcome the opportunity to discuss further.

#### Revisions to the Initial Draft of the Corktown Station Early Works Report

In accordance with O. Reg. 341/20, Metrolinx has now incorporated comments and feedback from the initial round of engagement with Indigenous Nations and agencies on the initial draft of the Corktown Station EWR into the Draft EWR.

To streamline capacity for Curve Lake First Nation to provide comments or feedback, a summary of revisions to the EWR since the circulation of the initial draft of the EWR is as follows:

- Minor editorial changes to address grammatical and syntax errors and updates to reflect comments received from agencies;
- Clarification that the project operations, construction of Corktown Station and other project components will be assessed in the Ontario Line Environmental Impact Assessment Report;
- Inclusion of information on the Parkland Strategy (City of Toronto, 2019), First Parliament Master Plan (City of Toronto, 2020) and additional information on planned community services and facilities in the Corktown Station Early Works Study Area;
- Edits to the text to reflect that the Ministry of Heritage, Sport, Tourism and Culture Industries' (MHSTCI) Minister's Consent has been granted for the demolition and removal of the non-heritage buildings at 265 Front Street East and removal of the heritage attributes at 265 Front Street East, 271 Front Street East and 25 Berkeley Street located on the First Parliament Site, and affirming Metrolinx's commitment to fulfilling the conditions outlined in the Minister's Consent, including completion of archaeological requirements;
- Additional mitigation measures for environmental disciplines such as archaeology, air quality and traffic and transportation, that include:
  - Coordination and completion of required archaeological investigations, early works activities and/or activities that have the potential for vibration effects such that buried archaeological resources are appropriately considered;
  - Use of non-chloride dust suppressants; and
  - Consultation with the City of Toronto to minimize potential impacts during special events (e.g., the Toronto Christmas Market at the Distillery District) should closures or long-term impacts be required.
- Revision of traffic and transportation figures to include additional information such as intersection names and inclusion of an additional noise and vibration figure to show representative receptor locations.

## Engagement

Metrolinx is committed to an open, respectful, and transparent relationship with Curve Lake First Nation. We appreciate the significant volume of documents related to this Project that have been shared with Curve Lake First Nation. We are happy to assist in the review of these documents by meeting with Curve Lake First Nation or working to address any questions that Curve Lake First Nation may have about this Project. If you require additional information or materials or if you wish to discuss these Projects in more detail or set up a meeting, please contact Fallon Melander, Manager of Metrolinx's Indigenous Relations Office at

[IndigenousRelations@metrolinx.com](mailto:IndigenousRelations@metrolinx.com).

Metrolinx welcomes any comments or feedback on the Draft EWR from Curve Lake First Nation. Please provide these in writing no later than **June 11, 2021**. Comments and information regarding this draft report will be collected to assist in meeting the requirements of the *Environmental Assessment Act* and may be included in study documentation. With the exception of personal information, all comments will become part of the public record. Kindly note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*.

Thank you for your time in reviewing this letter.

Yours Truly,

## Notice of Publication of Draft Corktown Station Early Works Report Ontario Line Project

### The Project

The Ontario Line will bring 15.6 kilometres of new subway service to Toronto to make it faster and easier for people to get where they need to be each day. The line will stretch across the city, from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line is proposed to include 15 potential stations, including six interchange stations, and connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 of its stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable commutes.

### Corktown Station Early Works

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These early works are being advanced to prepare the site for future construction staging and laydown to support tunneling and below ground construction activities, and work associated with the future Corktown Station.

The First Parliament site, located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail), and remnants of early Toronto industry may be found here.

Metrolinx is eager to unlock the potential of the site and work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

Environmental impacts of Corktown Station early works are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*. In accordance with Section 8 of O. Reg. 341/20, Metrolinx has prepared the Draft Corktown Station Early Works Report (EWR) that is now available for public review.

The Draft EWR documents the assessment of Corktown Station early works. The report outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures and a consultation record.

### **The Draft Early Works Report Review and Consultation Process**

Effective **May 12, 2021**, the Draft Corktown Station EWR will be available for review on the project webpage ([www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)).

As we temporarily shift to virtual open houses, please join us online from **May 12 to June 11, 2021** to find out more about and provide your feedback on the Draft Corktown Station EWR via the webpage form.

Those who wish to provide comments on the Draft Corktown Station EWR must do so by **June 11, 2021** and submit them using the webpage form or address them to the following email: [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com).

Section 10 of O. Reg. 341/20 requires Metrolinx to establish an issues resolution process to attempt to resolve any concerns raised by the public or Indigenous Nations during the review period. At the end of the review period, Metrolinx will update the Draft Corktown Station EWR by adding a description of the issues resolution process, what Metrolinx did to address any concerns, and if the early works implementation timeline will be impacted as a result of addressing concerns. Metrolinx will then publish the Final Corktown Station EWR on the project webpage: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline) and issue a Notice of Publication of Final Corktown Station EWR.

To obtain a copy of the Draft Corktown Station EWR, please contact the project email listed above.

**Josh Vandezande (T: 416-202-5100, E: [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com)) may be contacted on behalf of Metrolinx.**

| Archaeological Potential | <ul style="list-style-type: none"><li>▪ Potential for the disturbance of registered archaeological sites and/or archaeological resources previously identified.</li></ul> | <ul style="list-style-type: none"><li>▪ Areas identified as retaining archaeological potential in the Corktown Station Early Works Project Footprint, as per the Ontario Line South Stage 1 Archaeological Assessment Report (AECOM, 2020c), are shown in <b>Figure 5-17</b>. Work plans shall be developed for the next stages of archaeological work on the First Parliament and Lime Kiln Works Sites and will be made available for review by the City of Toronto Heritage Planning, in addition to ongoing consultation with the City of Toronto, Indigenous Nations and other parties.<ul style="list-style-type: none"><li>– The majority of the Corktown Station Early Works Project Footprint retains moderate to high archaeological potential where deeply buried archaeological potential remains, such as for discovering pre-contact Indigenous materials and/or materials related to the early development and expansion of the City of Toronto, including the First and Second Parliament Buildings, the Home District Gaol, the Consumers’ Gas company buildings, and other registered archaeological sites.</li><li>– The Ministry of Heritage, Sport, Tourism and Culture Industries’ Archaeology Program Unit will be consulted prior to any ground disturbing activities within areas identified as having archaeological potential.</li></ul></li><li>▪ All archaeology on the First Parliament site on 265 Front Street East, 271 Front Street East and 25 Berkeley Street will be in accordance with the following conditions of the Minister of Heritage, Sport, Tourism and Culture Industries’ Consent:<ul style="list-style-type: none"><li>– All archaeological assessments are undertaken in accordance with the Ontario Heritage Act, the 2011 Standards and Guidelines for Consultant Archaeologists, and in accordance with the recommendations of previously completed archaeological assessment reports.</li><li>– Prior to commencing any archaeological fieldwork, the licensed consultant archaeologist will submit a detailed strategy for review and approval by the Ministry of Heritage, Sport, Tourism and Culture Industries’ Archaeology Program Unit. Additionally, where new conditions or situations are encountered that are not covered by an approved strategy, a revised strategy will be submitted to the Ministry of Heritage, Sport, Tourism and Culture Industries’ Archaeology Program Unit for approval prior to proceeding with fieldwork.</li><li>– Any construction excavation must be preceded by archaeological fieldwork according to a strategy approved by the Ministry of Heritage, Sport, Tourism and Culture Industries’ Archaeology Program Unit or must be accompanied by an excavation and monitoring strategy.</li><li>– Excavation by a licensed consultant archaeologist or under the direction of a licensed consultant archaeologist will proceed to a point that is to the satisfaction of the Ministry of Heritage, Sport, Tourism and Culture Industries’ Archaeology Program Unit. In the event that the Project will not require total excavation of the site, an avoidance and protection strategy must be implemented for the remainder of the archaeological site to the satisfaction of the ministry. Archaeological assessments on other areas within the Corktown Station Early Works Footprint will be undertaken in accordance with the Ontario Heritage Act, the 2011 Standards and Guidelines for Consultant Archaeologists, and in accordance with the recommendations of the previously completed archaeological assessment reports and in advance of ground disturbance activities.</li></ul></li><li>▪ The Mississaugas of the Credit First Nation, and other Indigenous Nations will be invited to participate in archaeological fieldwork. All future archaeological assessment findings and reports will be shared</li></ul> | <ul style="list-style-type: none"><li>▪ None identified at this time.</li><li>▪ Metrolinx will adhere to all recommendations in any subsequent archaeological assessments, including monitoring activities, as required.</li></ul> |

| Environmental Component  | Potential Impact                                                                                                               | Mitigation Measure(s)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Monitoring Activities                                                                                                                                                                                                          |

Aaniin Fallon,

Thanks for this. Certainly this can be an agenda item at our next meeting!

Miigwech.

All the best,

**Subject:** Ontario Line Project - Invitation to Meet & provide input on First Parliament Site

Dear Julie and Team,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. We recently communicated with your Nation about the proposed Corktown Station which is along the planned alignment of the Ontario Line. This location includes parcels of land which were once the site of Upper Canada's First Parliament buildings. Metrolinx and its partners are exploring opportunities to commemorate the history of this site, and have been engaging with various parties including the City of Toronto and the Mississaugas of the Credit First Nation, on whose treaty territory this project is occurring.

Given the significant chance of recovering Indigenous and European artifacts during the Corktown Station Early Works, a detailed archaeological workplan is being developed. Metrolinx recognizes the importance and value of Indigenous monitors for any archaeology related to the Ontario Line Project. In our previous communication, an invitation was included for your Nation to participate in any archaeological fieldwork and monitoring during the Corktown Station Early Works, including demolition of modern buildings currently on the First Parliament site.

This work is anticipated to commence in Fall 2021, and if you have not yet expressed interest in participating, please feel free to do so at your earliest convenience. As a reminder any comments on the draft Corktown Station Early Works Report should be provided no later than **April 15, 2021**.

Metrolinx recognizes that the history of this location extends beyond European use, and as such, wants to take the opportunity to understand any significance it may have to Indigenous Nations. Metrolinx would like to meet with your Nation to discuss the First Parliament site, its commemoration, as well as review the broader Ontario Line project if you wish. We recognize that traditional knowledge of this area may be sacred and/or not appropriate to be shared, but would appreciate any information that may be appropriate for Metrolinx to consider.

This letter is not intended to replace engagement but to provide a high level summary for your information. We suggest that this be the agenda item for the next monthly meeting, but are open to alternatives if that is your Nation's preference. [REDACTED]  
[REDACTED]

Please let me know if you have any questions or concerns. We appreciate the volume of documents that Metrolinx has shared with your Nation. If you have any questions or concerns, please do not hesitate to contact me.

Miigwetch,

Fallon

**Delivered by email**

Dear Dr. Kapyrka,

**RE: Ontario Line Project - First Parliament Site and Lime Kiln Site**

Metrolinx, a regional transportation agency, is helping to transform the way the Greater Golden Horseshoe moves by building a fast, convenient and integrated transit network. As part of this work, Metrolinx is continuing the pre-construction planning of the Ontario Line which will bring nearly 16 kilometres of subway service to Toronto.

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Curve Lake First Nation. Metrolinx appreciates and respects Curve Lake First Nation's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to share with Curve Lake First Nation information regarding Corktown Station early works and additional information regarding upcoming field visits and investigations at the Corktown Station early works site, which includes two registered archaeological sites, the First Parliament site and the Lime Kiln site.

**Project Description**

The proposed Ontario Line is a new 16-kilometer subway line, which will occupy an exclusive right-of-way system encompassing a combination of below-grade, above-grade, and at-grade alignment. The route (Figure 1) will run from Ontario Place/Exhibition through downtown Toronto to the Ontario Science Centre in the City of Toronto, with six (6) potential interchange stations and 17 new connections to GO Transit, existing subways and streetcars. More information on the Project can be found on our website: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)

**Corktown Station Early Works**

As communicated in the letter sent to Curve Lake First Nation on March 11, 2021, the Corktown Station site has been identified for launching tunnel excavation equipment for the downtown and Don Yard segments of the proposed Ontario Line alignment, as well as the location of the Corktown Station. The First Parliament and Lime Kiln Sites, located within the Corktown Station area, are known archaeological sites which require additional archaeological study ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures, followed by completion of necessary archaeological studies, is required. Completion of this preparatory work on an expedited basis is essential to allow for the timely delivery of the overall Project and is anticipated to begin in the Fall 2021, subject to the completion of the Corktown Station early works process in accordance with Ontario Regulation 341/20: Ontario Line Project.

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These activities will enable completion of environmental due diligence investigations, including archaeological assessments. These activities will occur on properties within the Corktown Station early works project footprint, as shown in **Figure 1**.

Figure 1: Map of Corktown Station Early Works

Environmental impacts of Corktown Station early works are being assessed in accordance with O. Reg. 341/20. Metrolinx shared the draft Corktown Station Early Works Report and associated discipline reports with Curve Lake First Nation on March 11, 2021 and had requested any comments to be provided by April 9, 2021.

## **Archaeological Work at the First Parliament Site and Lime Kiln Site**

Metrolinx appreciates the significance of archaeology to Curve Lake First Nation. The properties at 265 Front Street East, 271 Front Street East, and 25 Berkeley Street, in the St. Lawrence neighbourhood of the City of Toronto, are collectively host to the First Parliament Site. It is located on the southwest corner of Parliament Street and King Street, between Parliament Street and Berkeley Street. The First Parliament Site is a registered archaeological site (AjGu-41) which may include resources associated with the First and Second Parliament Buildings, the Home District Gaol, and Consumers' Gas company buildings. The surface of the property is currently occupied by automotive businesses, including a car dealership, car wash, and surface parking lot. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and remnants of early Toronto industry may be found at this site.

North of the First Parliament Site is another registered archaeological site (AjGu-64), the Lime Kiln Site, which includes remains from the Toronto Lime Works Company. A variety of structural features, in various states of preservation, have been documented on this site. The location of the Lime Kiln Site and the First Parliament Site are shown in **Figure 2**.

Figure 2: Location of First Parliament Site and Lime Kiln Site Areas

The First Parliament Site and Lime Kiln Site require additional archaeological studies ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures is necessary. Completion of this preparatory work is essential to allow for the timely delivery of the Ontario Line.

Archaeological fieldwork to remove or protect archaeological resources is anticipated to commence in early Fall 2021, and a workplan for these archaeological investigations is under development. As mentioned in the letter sent on March 11, 2021, Curve Lake First Nation is invited to participate in all archaeological fieldwork, and to review and provide comments on forthcoming reports.

### **Feedback on Commemoration of First Parliament Site**

Metrolinx appreciates that the history of the First Parliament site is not one simply of Canadian origin, but rather holds longer history and tradition. Metrolinx also appreciates that the site of the First Parliament of Upper Canada is linked to a history of colonization and harmful practices towards Indigenous Peoples. Given the significance of this site, Metrolinx is engaging with Indigenous Nations, City of Toronto and the broader community to identify opportunities for commemoration. Metrolinx is committed to ensuring that any feedback from Curve Lake First Nation regarding the significance of this site is considered as part of this commemoration. Metrolinx appreciates that traditional or cultural knowledge about this site may be sacred and/or not be appropriate to be shared but welcomes any comments or ideas from Curve Lake First Nation that may be appropriate to commemorate Indigenous Peoples.

### **Engagement**

Metrolinx is committed to an open, respectful, and transparent relationship with Curve Lake First Nation. We would like to meet with Curve Lake First Nation to better understand any significance the First Parliament site may have to your Nation. We are also happy to assist in reviewing the Corktown Station Early Works Report or reviewing the proposed archaeological workplan for this site. If Curve Lake First Nation requires additional information or materials, or you wish to discuss this project in more detail or set up a meeting, please contact Fallon Melander, Manager, Indigenous Relations at Metrolinx. She can be contacted at [IndigenousRelations@metrolinx.com](mailto:IndigenousRelations@metrolinx.com).

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*. Thank you for your time in reviewing these assessments.

Thank you for your time in reviewing this letter.

**Subject:** Ontario Line - Project Update and Draft Corktown Station Early Works Report for Review + Invitation to Participate in Archaeological Fieldwork

Dear Julie,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. [REDACTED]  
[REDACTED]

Attached you will find a letter providing an update on the project. The purpose of this

letter is to:

- Provide an update on the scope of the project work
- share the initial draft of the Early Works Report for the proposed Corktown Station
- Invite your Nation to participate in upcoming archaeological fieldwork

In an effort to streamline your review, we draw your attention to the attachment which provides an overview of the expected environmental impacts and proposed mitigations, as we know this may be of specific interest to you.

Metrolinx is also preparing a letter specific to works being planned within the Don Valley as we recognize the significance of this waterway to many Nations. We hope to share that letter soon. We are happy to meet with your Nation to discuss the Ontario Line and address any questions or concerns that your Nation may have.

We ask that any comments on the draft Corktown Station Early Works Report be provided no later than **April 15, 2021**. Please note that the Noise and Vibration Report, which will be part of the Early Works Report is still being prepared and we will share with your Nation by March 19, 2021.

Please let us know as soon as possible if your Nation has interest in participating in future archaeological fieldwork.

We appreciate the volume of documents that Metrolinx has shared with your Nation.

If you have any questions or concerns, please do not hesitate to contact me.

Miigwetch,

Fallon

Dear Dr. Kapyrka,

## **RE: Ontario Line Project - Corktown Station Early Works Report**

Metrolinx, a regional transportation agency, is helping to transform the way the Greater Golden Horseshoe region moves by building a fast, convenient and integrated transit network. As part of this work, Metrolinx is proceeding with the Ontario Line which will bring nearly 16 kilometres of subway service to Toronto. The purpose of this letter is to share information regarding the Ontario Line project with Curve Lake First Nation.

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Curve Lake First Nation. Metrolinx appreciates and respects Curve Lake First Nation's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to share with Curve Lake First Nation information regarding Corktown Station early works and invite feedback on the initial draft of the Corktown Station Early Works Report.

## **Project Description**

The Project is a new subway line with connections to Line 1 (Yonge-University) subway service at Osgoode and Queen Stations, Line 2 (Bloor-Danforth) subway service at Pape Station, and Line 5 (Eglinton Crosstown) service at the future Science Centre Station. Fifteen stations are proposed, with additional connections to three GO Transit lines (Lakeshore East, Lakeshore West and Stouffville), and the Queen, King, Bathurst, Spadina, Harbourfront and Gerrard/Carlton streetcar routes. The Project will reduce crowding on Line 1 and provide connections to new high-order rapid transit neighbourhoods. More information on the Project can be found on our website: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)

## **Ontario Line Environmental Assessment Process and Reports**

In 2020, Metrolinx provided Curve Lake First Nation with an outline of the Ontario Line environmental assessment process. The environmental assessment for the Ontario Line Project is being completed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20) made under the *Environmental Assessment Act*. The regulation outlines a Project-specific environmental assessment that includes an Environmental Conditions Report, an Environmental Impact Assessment Report and provides opportunity for Early Works Reports for assessment of works that are ready to proceed in advance of the Environmental Impact Assessment Report. An overview of the reports is outlined below and their anticipated publication timeline is provided in **Attachment 1**.

### Environmental Conditions Report

The Environmental Conditions Report characterizes existing environmental conditions within the Ontario Line study area through a combination of desktop review and field studies and was finalized in November 2020. The report also summarizes potential impacts and mitigation measures for consideration during project planning and design. Potential impacts and mitigation measures identified in the Environmental Conditions Report will be confirmed and refined within the Early Works Reports and the Environmental Impact Assessment Report.

### Early Works Reports

Metrolinx is assessing several early works components to support the main construction of the Ontario Line project. Early works are components of the Ontario Line Project that are anticipated to be ready to proceed before completion of the Environmental Impact Assessment Report, such as station construction, rail corridor expansion, utility relocation or bridge replacement or expansion, as defined in O. Reg. 341/20.

Initially, the early works required to support the Ontario Line project were assessed in a single report, which was shared in June 2020 and included Exhibition Station, Lower Don Bridges, Lakeshore East Joint Corridor and East Harbour early works.

Since then, the single Early Works Report has been split into several Early Works Reports, each covering either a single early works location or multiple locations if they are in close proximity. Each Early Works Report provides a description of the early works and alternatives considered, documents local environmental conditions, and outlines early works-specific environmental impacts, mitigation measures,

monitoring activities, potentially required permits and approvals and other components.

It is important to note that two new early works projects, Don Yard and Corktown Station, have been added as well. The Early Works Reports, including this new scope of work are summarized below:

- Exhibition Station Early Works  
Exhibition Station early works are documented in the Exhibition Station Early Works Report, finalized in February 2021.
- Lakeshore East Joint Corridor Early Works  
Lakeshore East Joint Corridor early works will be documented under a separate Early Works Report which will also include East Harbour Station.
- Lower Don Bridges & Don Yard Early Works  
Lower Don Bridges early works will be documented in the Lower Don Bridges and Don Yard Early Works Report. Don Yard is a new early works project that will include construction of Ontario Line tunnel and portal structures between Cherry Street and the Lower Don River and accompanying shift of the Richmond Hill and Lakeshore East GO tracks; installation or upgrading of retaining walls and noise barriers, where appropriate; and utility and signal infrastructure relocation or protection. The initial draft of the Lower Don Bridges and Don Yard Early Works Report is anticipated to be shared with Curve Lake First Nation in mid to late April.
- Corktown Station Early Works  
Corktown Station is a new early works project. Further information on Corktown Station early works is provided below.

### Environmental Impact Assessment Report

The main report produced as part of this process is the Environmental Impact Assessment Report. It will cover the construction and operation of the Ontario Line. The report will include a final description of the Ontario Line Project, environmental impact evaluation results, mitigation measures, monitoring activities, potentially required permits and approvals and other components as outlined in O. Reg. 341/20.

## **Work along the Don River and within the vicinity of the Don Valley**

Metrolinx appreciates the significance of waterways to Curve Lake First Nation. As such, Metrolinx is preparing an information letter specific to work occurring near or along the Don River and within the Valley. Metrolinx will provide details about the scope of work and anticipated natural environmental and archaeological assessments. Metrolinx is committed to exploring opportunities for Curve Lake First Nation to participate in these assessments should Curve Lake First Nation express interest.

## **Corktown Station Early Works**

The Corktown Station site has been identified for launching tunnel excavation equipment for the downtown and Don Yard segments of the proposed Ontario Line alignment, as well as the location for the Corktown Station. The First Parliament site, located within the Corktown Station area, is a known archaeological site which requires additional archaeological study ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures, followed by completion of necessary archaeological studies, is required. Completion of this preparatory work on an expedited basis is essential to allow for the timely delivery of the overall Project.

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These activities will enable completion of environmental due diligence investigations, including archaeological assessments. These activities will occur on properties within the Corktown Station early works project footprint, as shown in **Figure 2**.

Environmental impacts of Corktown Station early works are being assessed in accordance with O. Reg. 341/20.

Metrolinx is sharing the initial draft of the Corktown Station Early Works Report, including the Corktown Station Natural Environment Report, via the Dropbox link enclosed in the email for Curve Lake First Nation's review. The Corktown Station Early Works Report documents the assessment of Corktown Station early works. It also outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures, and a consultation record. For a summary of the potential mitigation measures identified, please see the table found as **Attachment 2**.

Note that the initial draft of the report enclosed in the email currently does not include information on noise and vibration as the Corktown Station Noise and Vibration Report is still being prepared. The initial draft of the Corktown Station Noise and Vibration Report is anticipated to be shared with Curve Lake First Nation on **March 19, 2021** for review.

Metrolinx welcomes any comments or feedback on the initial draft of the Corktown Station Early Works Report from Curve Lake First Nation. Please provide these in writing no later than **April 15, 2021**.

Based on our currently anticipated schedule (**Figure 1**), the Notice of Publication of Draft Corktown Station Early Works Report is planned for late-April 2021, at which point the draft report will be available to all interested parties for review, including Curve Lake First Nation, the public and regulatory agencies.

### Archaeology

As outlined above, archaeological assessments are anticipated to take place as part of advancing Corktown Station Early Works. Metrolinx would appreciate any interest Curve Lake First Nation may have in participating in planned future archaeological fieldwork for this site. The maps in **Attachment 3** illustrate the areas that will be subject to future archaeological assessments that include fieldwork. Upon receipt of Curve Lake First Nation's interest in participating, Metrolinx will work to coordinate your Nation's involvement.

Metrolinx acknowledges that Curve Lake First Nation should be aware of and engaged regarding any future archaeological work, especially the discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will ensure that future archaeological assessments are provided to Curve Lake First Nation in draft form, prior to submission to MHSTCI.

### **Engagement**

Metrolinx is committed to an open, respectful, and transparent relationship with Curve Lake First Nation. We appreciate the significant volume of documents related to this Project that have been shared with Curve Lake First Nation. We are happy to assist in the review of these documents by meeting with Curve Lake First Nation or working to address any questions that Curve Lake First Nation may have about this Project. If you require additional information or materials or if you wish to discuss these Projects in more detail or set up a meeting, please contact Fallon Melander, Manager of Metrolinx's Indigenous Relations Office at [IndigenousRelations@metrolinx.com](mailto:IndigenousRelations@metrolinx.com).

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*. Thank you for your time in reviewing these assessments.

Thank you for your time in reviewing this letter.

| Vegetation Communities                                                                                      | <ul style="list-style-type: none"><li>City and private tree removal</li></ul>                                                                                                                            | <ul style="list-style-type: none"><li>An Arborist Report by an International Society of Arboriculture Certified Arborist will be prepared, if required, in accordance with the Ontario Forestry Act R.S.O. 1990, and other regulations and best management practices as applicable.</li><li>The Arborist Report will include, but not be limited to the individual identification of all trees within the Corktown Station early works construction areas including those that require removal or preservation, or trees that may be injured. Trees to be identified may include those on Metrolinx property, trees on public and private lands, and boundary trees. City of Toronto by-laws dictate the minimum area buffers to be inventoried and Diameter at Breast Height which requires inventory.</li><li>Prior to the undertaking of tree removals, a Tree Removal Strategy/Tree Preservation Plan will be developed to document tree protection and mitigation measures that follow the City of Toronto Tree Protection Policy and Specifications for Construction Near Trees Guidelines (2016b) and adherence with best practices, standards and regulations on safety, environmental and wildlife protections.</li><li>Compensation for tree removals will be undertaken in accordance with provisions outlined in the Metrolinx Vegetation Guideline (2020).</li><li>Pruning of branches will be conducted through the implementation of proper arboricultural techniques.</li><li>Tree Protection Zone fencing will be established to protect and prevent tree injuries. Tree Protection Zones will be clearly staked prior to construction using barriers in accordance with local by-law requirements.</li></ul> | <ul style="list-style-type: none"><li>Regular inspection in areas of vegetation removal will be undertaken as required during construction to ensure that fencing is intact, only specified trees are removed and no damage is caused to the remaining trees and adjacent vegetation communities.</li><li>On-site inspection will be undertaken to confirm the implementation of the mitigation measures and identify corrective actions if required. Corrective actions may include additional site maintenance and alteration of activities to minimize impacts.</li><li>If required, the approach to compensation monitoring will be developed in accordance with Metrolinx’s Vegetation Guideline (2020).</li></ul> |

| Environmental Component                               | Potential Impact                                                                                                                                                                              | Mitigation Measure(s)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Monitoring Activities                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|-------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Vegetation Communities</b>                         | <ul style="list-style-type: none"><li>▪ Soil contamination as a result of spills (e.g., grease and/or fuel) from equipment use</li><li>▪ Introduction or spread of Invasive Species</li></ul> | <ul style="list-style-type: none"><li>▪ A Spill Prevention and Contingency Plan will be developed and adhered to. Spills will be immediately contained and cleaned up in accordance with provincial regulatory requirements and the contingency plan.</li><li>▪ Refuelling shall be done within refuelling stations lined with appropriate material to prevent seepage and fuel discharge.</li><li>▪ All machinery, construction equipment and vehicles arriving on site should be in clean condition (e.g., free of fluid leaks, soils containing seeds of plant material from invasive species) and be inspected and washed in accordance with the Clean Equipment Protocol for Industry (Halloran et al., 2013) prior to arriving and leaving the construction site in order to prevent the spread of invasive species to other locations.</li></ul>                  | <ul style="list-style-type: none"><li>▪ On-site inspection will be undertaken to confirm the implementation of the mitigation measures and identify corrective actions if required. Corrective actions may include additional site maintenance and alteration of activities to minimize impacts.</li><li>▪ Ensure precautions are being taken to minimize the spread of invasive species by implementing the Clean Equipment Protocol for Industry (Halloran et al., 2013) on equipment and machinery prior to moving sites.</li><li>▪</li></ul> |
| <b>Wildlife and Wildlife Habitat – General</b>        | <ul style="list-style-type: none"><li>▪ Disturbance, displacement or mortality of wildlife</li></ul>                                                                                          | <ul style="list-style-type: none"><li>▪ Prior to construction, investigation of the Corktown Station early works construction areas for wildlife and wildlife habitat that may have established following the completion of previous surveys will be undertaken, as appropriate.</li><li>▪ If wildlife is encountered, measures will be implemented to avoid destruction, injury, or interference with the species, and/or its habitat. For example, construction activities will cease or be reduced, and wildlife will be encouraged to move off-site and away from the construction area on its own. A qualified Biologist will be contacted to define the appropriate buffer required from wildlife.</li></ul>                                                                                                                                                       | <ul style="list-style-type: none"><li>▪ On-site inspection by on-site environmental workers or construction staff should occur daily within the construction area to ensure that no wildlife is trapped within the construction area.</li><li>▪ On-site inspection will be undertaken to confirm the implementation of the mitigation measures and identify corrective actions if required. Corrective actions may include additional site maintenance and alteration of activities to minimize impacts.</li></ul>                               |
| <b>Significant Wildlife Habitat: Common Nighthawk</b> | <ul style="list-style-type: none"><li>▪ Removal of candidate nesting habitat for Common Nighthawk</li></ul>                                                                                   | <ul style="list-style-type: none"><li>▪ Refer below to mitigation measures described for Migratory Breeding Birds and Nests.</li><li>▪ Demolition of buildings should be scheduled outside of the breeding bird season of April 1 to August 31. If this is not possible and buildings must be demolished during this period, the following will be completed:</li><li>▪ The roofs will be checked for presence of gravel. If gravel is not present, then the building is unlikely to provide suitable nesting habitat for Common Nighthawk. If gravel is present, a search for eggs and nesting activity for Common Nighthawk on the roof will be conducted. If nests or nesting activity of Common Nighthawk are confirmed, the building cannot be demolished until it is confirmed by a Qualified Biologist that young have fully fledged and left the nest.</li></ul> | <ul style="list-style-type: none"><li>▪ Refer below for monitoring requirements described for Migratory Breeding Birds and Nests.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                      |
| <b>Migratory Breeding Birds and Nests</b>             | <ul style="list-style-type: none"><li>▪ Disturbance or destruction of migratory bird nests</li></ul>                                                                                          | <ul style="list-style-type: none"><li>▪ All works must comply with the Migratory Birds Convention Act, including timing windows for the nesting period (April 1 to August 31 in Ontario).</li><li>▪ If activities are proposed to occur during the general nesting period, a breeding bird and nest survey will be undertaken prior to required activities. Nest searches by an experienced searcher are required and will be completed by a qualified Biologist no more than 48 hours prior to vegetation removal.</li><li>▪ If a nest of a migratory bird is found outside of this nesting period (including a ground nest) it still receives protection.</li></ul>                                                                                                                                                                                                    | <ul style="list-style-type: none"><li>▪ Regular monitoring (field observations, on-site inspections) will be undertaken to confirm that activities do not encroach into nesting areas or disturb active nesting sites.</li></ul>                                                                                                                                                                                                                                                                                                                 |

If clarification is required regarding regulatory requirements, the appropriate regulatory agencies will be consulted.

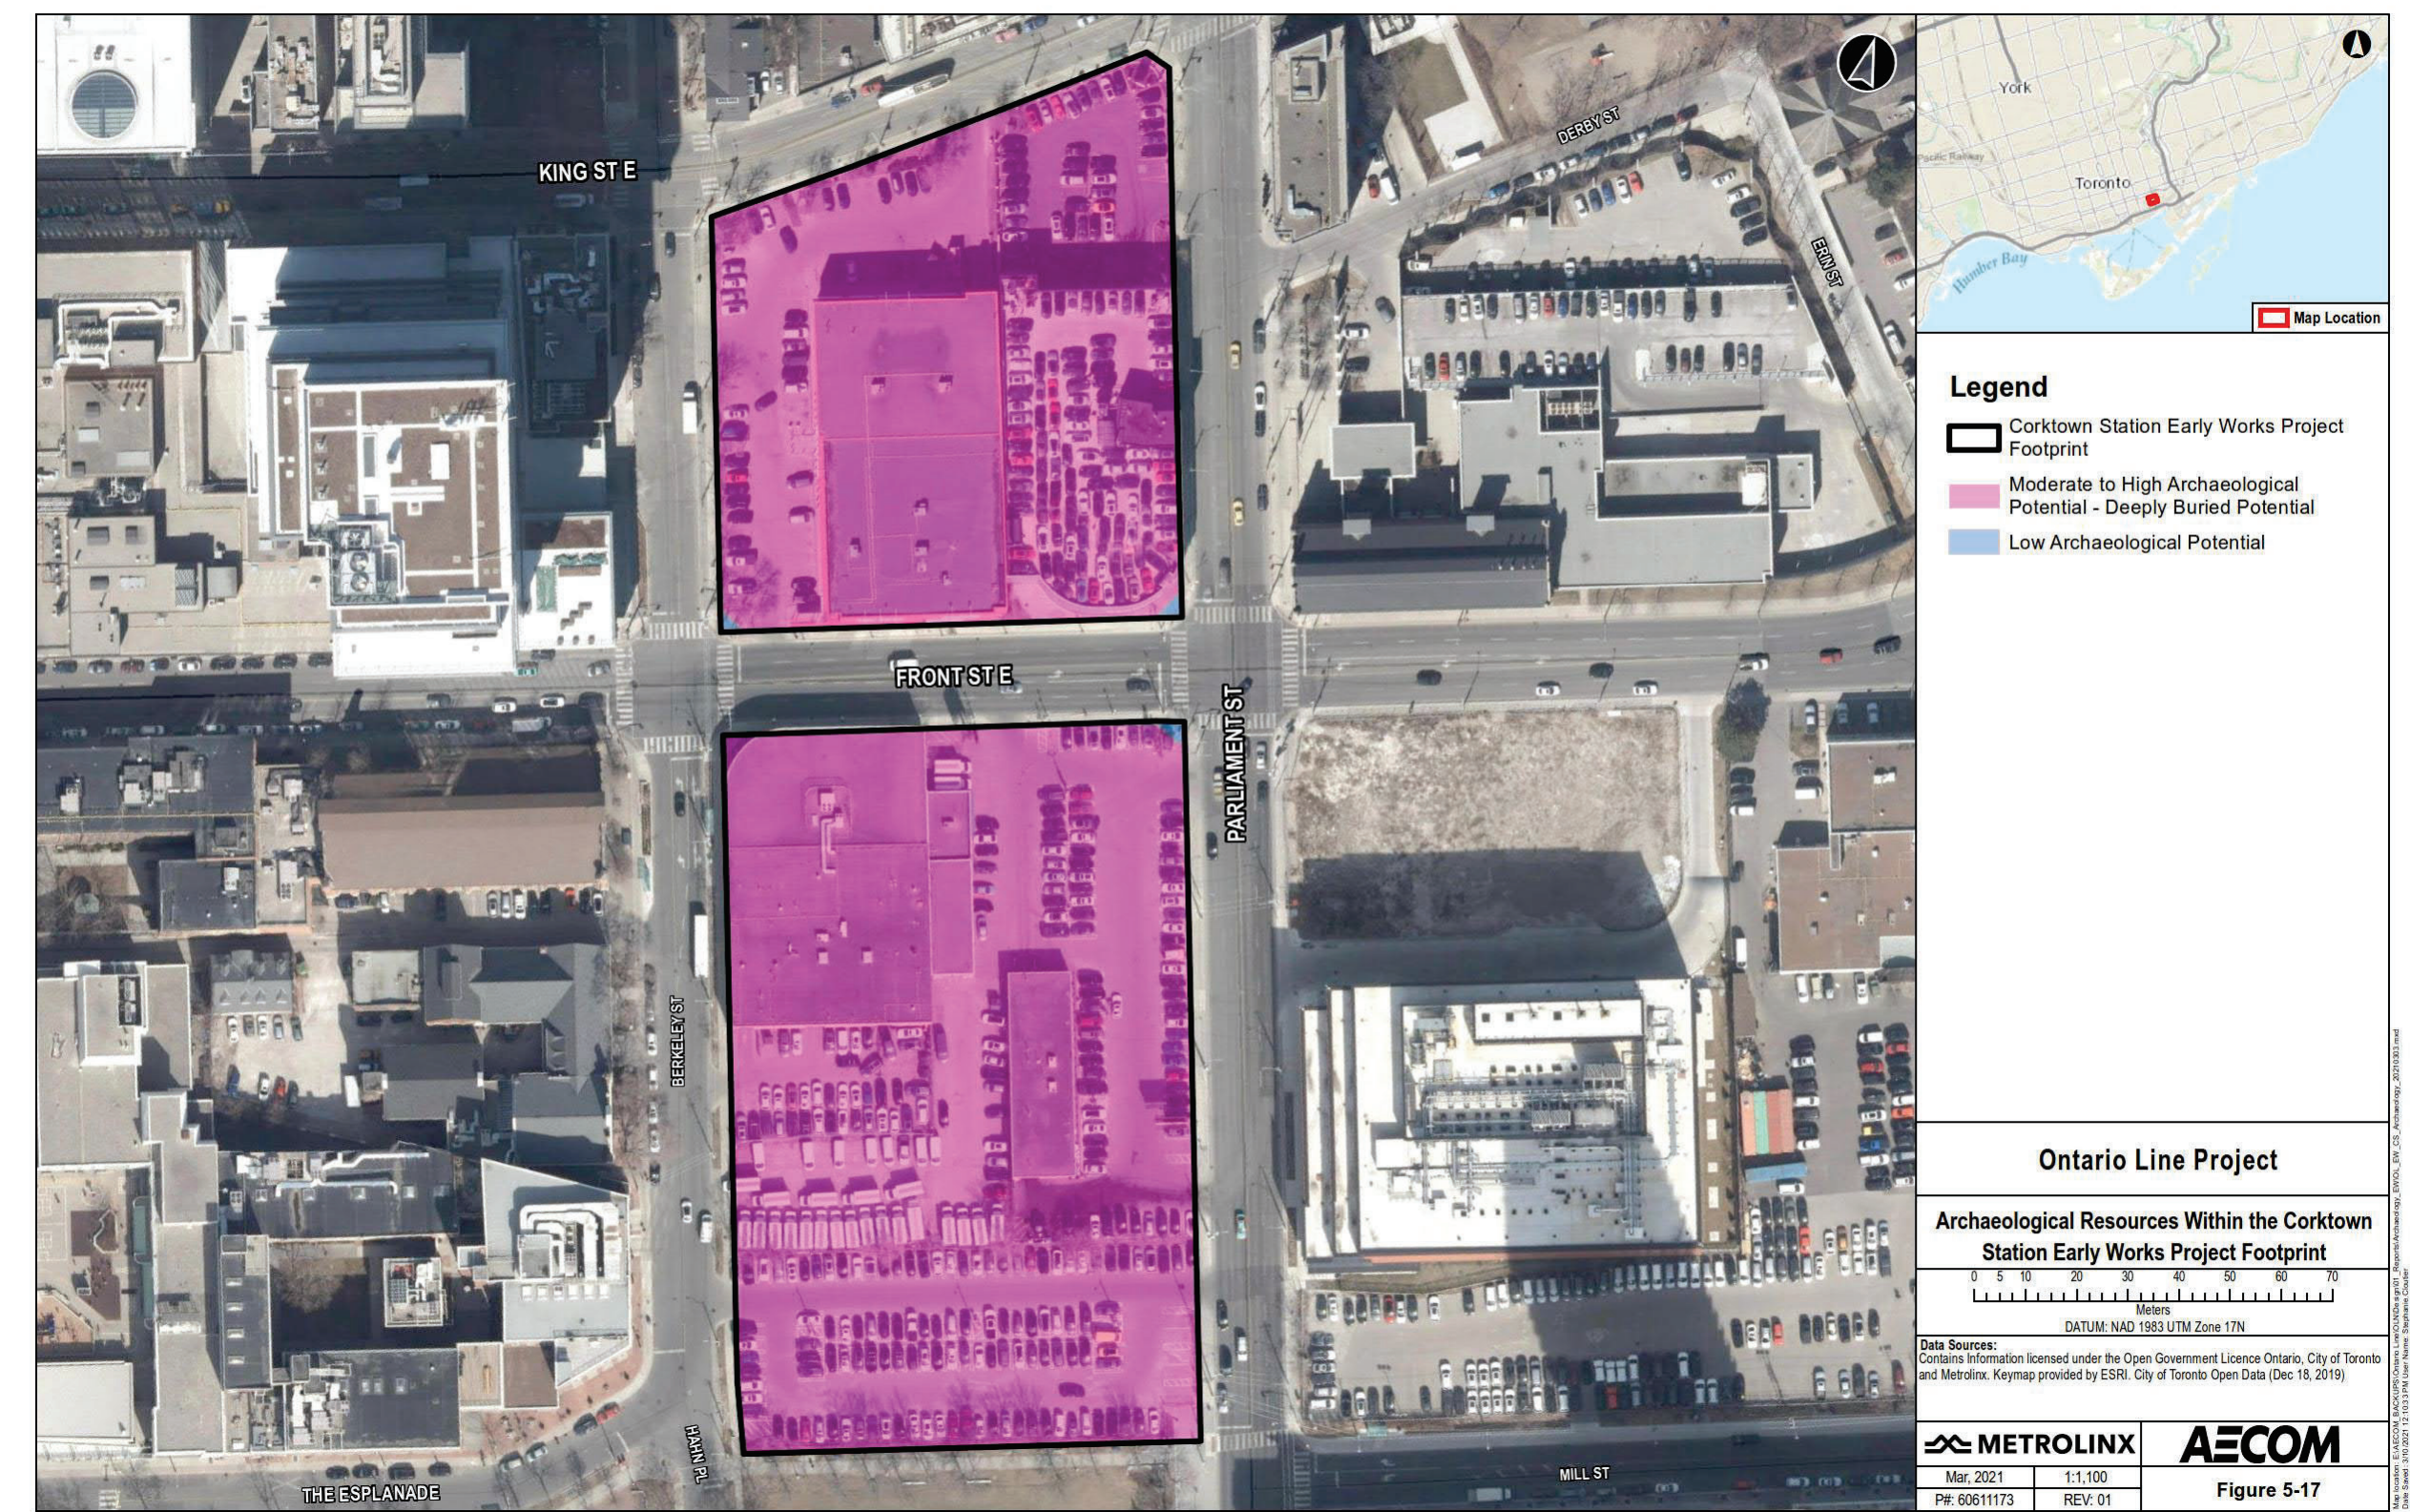

Table 6-8: Potential Impacts, Mitigation Measures and Monitoring Activities – Archaeological Resources

| Environmental Component  | Potential Impact                                                                                                                                                            | Mitigation Measure(s)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Monitoring Activities                                                                                                                                                                                                          |
|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Archaeological Potential | <ul style="list-style-type: none"><li>Potential for the disturbance of registered archaeological sites and/or archaeological resources not previously identified.</li></ul> | <ul style="list-style-type: none"><li>Areas identified as retaining archaeological potential in the Corktown Station Early Works Project Footprint, as per the Ontario Line South Stage 1 Archaeological Assessment Report (AECOM, 2020c), are shown in <b>Figure 5-17</b>, and include the following. Any person discovering human remains must immediately notify the police or coroner and the Registrar of Cemeteries, Ministry of Government Services. In addition, consultation with relevant Indigenous Nations will be initiated in the event that archaeological resources or human remains are discovered.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <ul style="list-style-type: none"><li>None identified at this time.</li><li>Metrolinx will adhere to all recommendations in any subsequent archaeological assessments, including monitoring activities, as required.</li></ul> |

<sup>29</sup> Ground disturbing activities can be defined as any and all activities that will or have the potential to impact/disturb the area below the surface. Example of activities include, but is not limited to, heavy machine movement/weight, clearing, grading, excavating, trenching, drilling, and transporting and filling of land.

**Date:** Wednesday, May 12, 2021 4:57:17 PM  
**Attachments:** 

---

Dear Mr. Detlor,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. Attached you will find a letter providing an update on the project. The purpose of this letter is to share the Draft Corktown Station Early Works Report (EWR) prepared for the Ontario Line Project and provide a continued invitation for feedback.

In an effort to streamline your review, we draw your attention to the attachment which provides an overview of the expected environmental impacts and proposed mitigations, as we know this may be of specific interest to you.

We ask that you provide any comments no later than June 11, 2021.

The reports are available at the following link:

We acknowledge that ongoing discussions have been occurring between Metrolinx and HDI. Please let me know if you have any questions or concerns.

Miigwetch,  
Fallon

## Notice of Publication of Draft Corktown Station Early Works Report

### Ontario Line Project

#### The Project

The Ontario Line will bring 15.6 kilometres of new subway service to Toronto to make it faster and easier for people to get where they need to be each day. The line will stretch across the city, from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line is proposed to include 15 potential stations, including six interchange stations, and connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 of its stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable commutes.

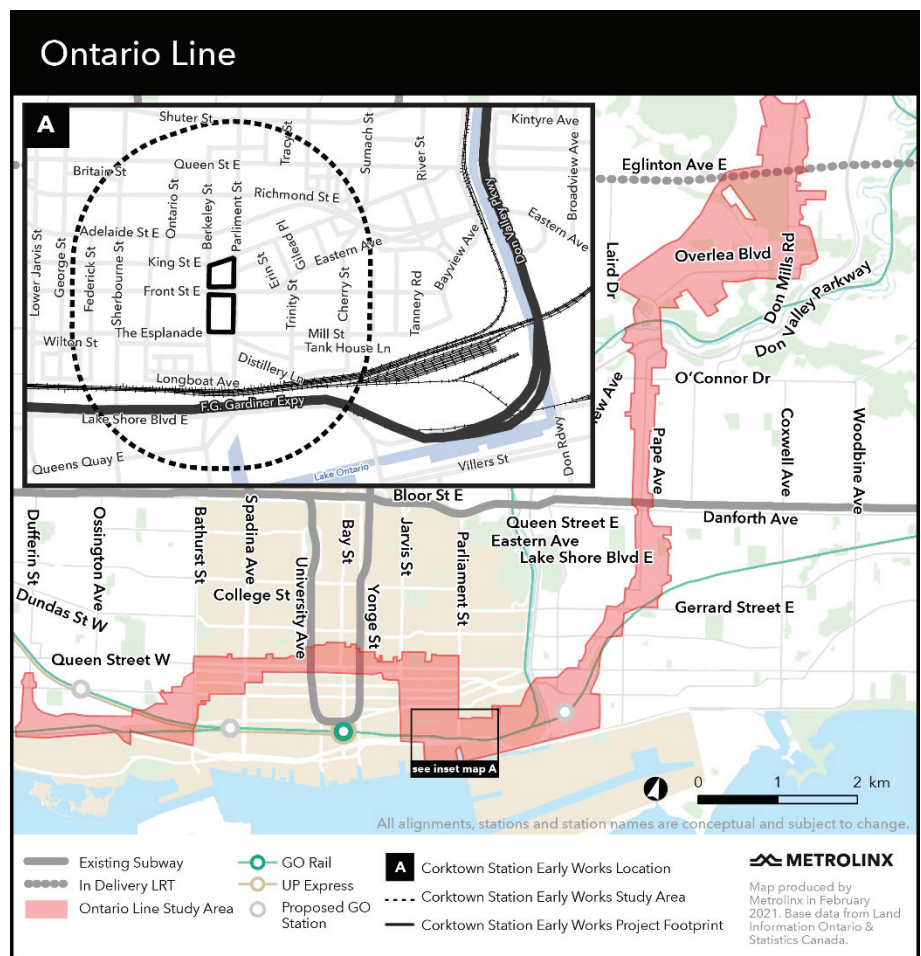

#### Corktown Station Early Works

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These early works are being advanced to prepare the site for future construction staging and laydown to support tunneling and below ground construction activities, and work associated with the future Corktown Station.

The First Parliament site, located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail), and remnants of early Toronto industry may be found here.

Metrolinx is eager to unlock the potential of the site and work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

Environmental impacts of Corktown Station early works are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*. In accordance with Section 8 of O. Reg. 341/20, Metrolinx has prepared the Draft Corktown Station Early Works Report (EWR) that is now available for public review.

The Draft EWR documents the assessment of Corktown Station early works. The report outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures and a consultation record.

### **The Draft Early Works Report Review and Consultation Process**

Effective **May 12, 2021**, the Draft Corktown Station EWR will be available for review on the project webpage ([www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)).

As we temporarily shift to virtual open houses, please join us online from **May 12 to June 11, 2021** to find out more about and provide your feedback on the Draft Corktown Station EWR via the webpage form.

Those who wish to provide comments on the Draft Corktown Station EWR must do so by **June 11, 2021** and submit them using the webpage form or address them to the following email: [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com).

Section 10 of O. Reg. 341/20 requires Metrolinx to establish an issues resolution process to attempt to resolve any concerns raised by the public or Indigenous Nations during the review period. At the end of the review period, Metrolinx will update the Draft Corktown Station EWR by adding a description of the issues resolution process, what Metrolinx did to address any concerns, and if the early works implementation timeline will be impacted as a result of addressing concerns. Metrolinx will then publish the Final Corktown Station EWR on the project webpage: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline) and issue a Notice of Publication of Final Corktown Station EWR.

To obtain a copy of the Draft Corktown Station EWR, please contact the project email listed above.

**Josh Vandezande (T: 416-202-5100, E: [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com)) may be contacted on behalf of Metrolinx.**

Ohsweken, ON N0A 1M0  
**Delivered by Email**

Dear Ms. General,

**RE: Ontario Line Project - Notice of Publication of Draft Corktown Station Early Works Report**

Metrolinx, a regional transportation agency, is helping to transform the way the Greater Golden Horseshoe region moves by building a fast, convenient and integrated transit network. As part of this work, Metrolinx is proceeding with the Ontario Line which will bring 15.6 kilometres of subway service to Toronto. The purpose of this letter is to share information regarding the Ontario Line project with Haudenosaunee Confederacy Chiefs Council.

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Haudenosaunee Confederacy Chiefs Council. Metrolinx appreciates and respects Haudenosaunee Confederacy Chiefs Council's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to share with Haudenosaunee Confederacy Chiefs Council the Draft Corktown Station Early Works Report (EWR).

**Project Description**

The Ontario Line will stretch from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line is proposed to include 15 stations, including six interchange stations, and connections to three GO train lines, two existing subway lines, the Eglinton Crosstown LRT, and streetcar lines. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable commutes. More information on the Project can be found on our website:  
[www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)

The initial draft of the Corktown Station EWR and a letter outlining Corktown Station early works were shared with Haudenosaunee Confederacy Chiefs Council on March

11, 2021. As outlined in the letter, environmental impacts of the Ontario Line Project are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*.

## Draft Corktown Station Early Works Report

In accordance with Section 8 of O. Reg. 341/20, Metrolinx has prepared a Draft Corktown Station EWR that documents the assessment of Corktown Station early works.

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These early works are being advanced to prepare the site for future construction staging and laydown to support tunneling and below ground construction activities, and work associated with the future Corktown Station. The location of the Corktown Station early works project footprint and study area can be viewed below in **Figure 1**.

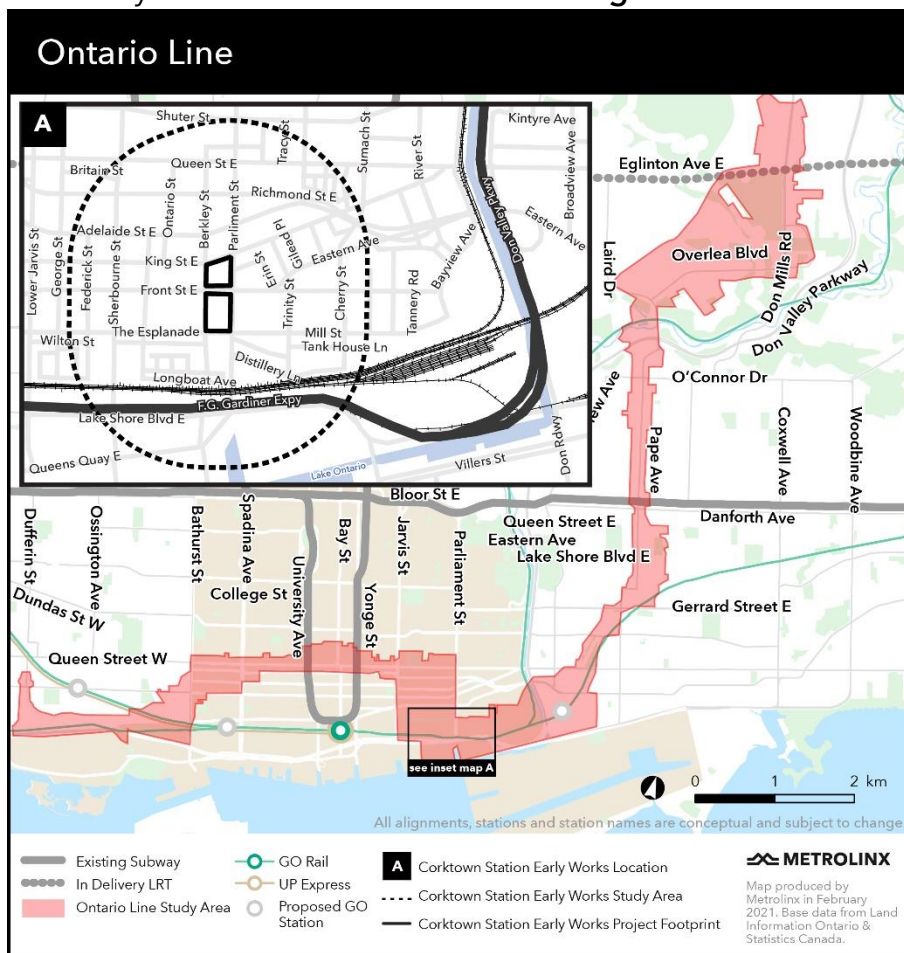

Figure 1: Map of Corktown Station Early Works

metrolinx.com

The First Parliament site, located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail) and remnants of early Toronto industry may be found here. Metrolinx is eager to work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

The EWR documents the assessment of Corktown Station early works and outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures, and a consultation record.

The Draft EWR is available for your review and can be found via the Dropbox link shared in the body of the email that is associated with this letter. We welcome any additional comments you may have on the Draft EWR. The Draft EWR is available for review and comment starting **May 12, 2021** and ending on **June 11, 2021**. The Notice of Publication of Draft Corktown Station EWR is provided in **Attachment 1**. The Draft EWR will be updated following the review period, and the Final EWR will be published on the Project webpage ([www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)) and shared with Haudenosaunee Confederacy Chiefs Council.

#### Potential Impacts and Mitigation Measures

The tables found enclosed in **Attachment 2 and 3** provide a summary of natural environment and archaeology potential impacts and mitigation measures identified as part of the Draft EWR that may be of interest to *Haudenosaunee Confederacy Chiefs Council*. If *Haudenosaunee Confederacy Chiefs Council* has any feedback about these potential impacts and/or mitigation strategies, or any other aspects of the Ontario Line, we welcome the opportunity to discuss further.

#### Revisions to the Initial Draft of the Corktown Station Early Works Report

In accordance with O. Reg. 341/20, Metrolinx has now incorporated comments and feedback from the initial round of engagement with Indigenous Nations and agencies on the initial draft of the Corktown Station EWR into the Draft EWR.

To streamline capacity for Haudenosaunee Confederacy Chiefs Council to provide comments or feedback, a summary of revisions to the EWR since the circulation of the initial draft of the EWR is as follows:

- Minor editorial changes to address grammatical and syntax errors and updates to reflect comments received from agencies;
- Clarification that the project operations, construction of Corktown Station and other project components will be assessed in the Ontario Line Environmental Impact Assessment Report;
- Inclusion of information on the Parkland Strategy (City of Toronto, 2019), First Parliament Master Plan (City of Toronto, 2020) and additional information on planned community services and facilities in the Corktown Station Early Works Study Area;
- Edits to the text to reflect that the Ministry of Heritage, Sport, Tourism and Culture Industries' (MHSTCI) Minister's Consent has been granted for the demolition and removal of the non-heritage buildings at 265 Front Street East and removal of the heritage attributes at 265 Front Street East, 271 Front Street East and 25 Berkeley Street located on the First Parliament Site, and affirming Metrolinx's commitment to fulfilling the conditions outlined in the Minister's Consent, including completion of archaeological requirements;
- Additional mitigation measures for environmental disciplines such as archaeology, air quality and traffic and transportation, that include:
  - Coordination and completion of required archaeological investigations, early works activities and/or activities that have the potential for vibration effects such that buried archaeological resources are appropriately considered;
  - Use of non-chloride dust suppressants; and
  - Consultation with the City of Toronto to minimize potential impacts during special events (e.g., the Toronto Christmas Market at the Distillery District) should closures or long-term impacts be required.
- Revision of traffic and transportation figures to include additional information such as intersection names and inclusion of an additional noise and vibration figure to show representative receptor locations.

## Engagement

Metrolinx is committed to an open, respectful, and transparent relationship with Haudenosaunee Confederacy Chiefs Council. We appreciate the significant volume of documents related to this Project that have been shared with Haudenosaunee Confederacy Chiefs Council. We are happy to assist in the review of these documents by meeting with Haudenosaunee Confederacy Chiefs Council or working to address any questions that Haudenosaunee Confederacy Chiefs Council may have about this Project. If you require additional information or materials or if you wish to discuss these Projects in more detail or set up a meeting, please contact Fallon Melander, Manager of Metrolinx's Indigenous Relations Office at

[IndigenousRelations@metrolinx.com](mailto:IndigenousRelations@metrolinx.com).

Metrolinx welcomes any comments or feedback on the Draft EWR from Haudenosaunee Confederacy Chiefs Council. Please provide these in writing no later than **June 11, 2021**. Comments and information regarding this draft report will be collected to assist in meeting the requirements of the *Environmental Assessment Act* and may be included in study documentation. With the exception of personal information, all comments will become part of the public record. Kindly note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*.

Thank you for your time in reviewing this letter.

Yours Truly,

A handwritten signature in black ink, appearing to read 'Maria Zintchenko', with a long, sweeping horizontal stroke at the end.

| Archaeological Potential | <ul style="list-style-type: none"><li>▪ Potential for the disturbance of registered archaeological sites and/or archaeological resources previously identified.</li></ul> | <ul style="list-style-type: none"><li>▪ Areas identified as retaining archaeological potential in the Corktown Station Early Works Project Footprint, as per the Ontario Line South Stage 1 Archaeological Assessment Report (AECOM, 2020c), are shown in <b>Figure 5-17</b>. Work plans shall be developed for the next stages of archaeological work on the First Parliament and Lime Kiln Works Sites and will be made available for review by the City of Toronto Heritage Planning, in addition to ongoing consultation with the City of Toronto, Indigenous Nations and other parties.<ul style="list-style-type: none"><li>– The majority of the Corktown Station Early Works Project Footprint retains moderate to high archaeological potential where deeply buried archaeological potential remains, such as for discovering pre-contact Indigenous materials and/or materials related to the early development and expansion of the City of Toronto, including the First and Second Parliament Buildings, the Home District Gaol, the Consumers’ Gas company buildings, and other registered archaeological sites.</li><li>– The Ministry of Heritage, Sport, Tourism and Culture Industries’ Archaeology Program Unit will be consulted prior to any ground disturbing activities within areas identified as having archaeological potential.</li></ul></li><li>▪ All archaeology on the First Parliament site on 265 Front Street East, 271 Front Street East and 25 Berkeley Street will be in accordance with the following conditions of the Minister of Heritage, Sport, Tourism and Culture Industries’ Consent:<ul style="list-style-type: none"><li>– All archaeological assessments are undertaken in accordance with the Ontario Heritage Act, the 2011 Standards and Guidelines for Consultant Archaeologists, and in accordance with the recommendations of previously completed archaeological assessment reports.</li><li>– Prior to commencing any archaeological fieldwork, the licensed consultant archaeologist will submit a detailed strategy for review and approval by the Ministry of Heritage, Sport, Tourism and Culture Industries’ Archaeology Program Unit. Additionally, where new conditions or situations are encountered that are not covered by an approved strategy, a revised strategy will be submitted to the Ministry of Heritage, Sport, Tourism and Culture Industries’ Archaeology Program Unit for approval prior to proceeding with fieldwork.</li><li>– Any construction excavation must be preceded by archaeological fieldwork according to a strategy approved by the Ministry of Heritage, Sport, Tourism and Culture Industries’ Archaeology Program Unit or must be accompanied by an excavation and monitoring strategy.</li><li>– Excavation by a licensed consultant archaeologist or under the direction of a licensed consultant archaeologist will proceed to a point that is to the satisfaction of the Ministry of Heritage, Sport, Tourism and Culture Industries’ Archaeology Program Unit. In the event that the Project will not require total excavation of the site, an avoidance and protection strategy must be implemented for the remainder of the archaeological site to the satisfaction of the ministry. Archaeological assessments on other areas within the Corktown Station Early Works Footprint will be undertaken in accordance with the Ontario Heritage Act, the 2011 Standards and Guidelines for Consultant Archaeologists, and in accordance with the recommendations of the previously completed archaeological assessment reports and in advance of ground disturbance activities.</li></ul></li><li>▪ The Mississaugas of the Credit First Nation, and other Indigenous Nations will be invited to participate in archaeological fieldwork. All future archaeological assessment findings and reports will be shared</li></ul> | <ul style="list-style-type: none"><li>▪ None identified at this time.</li><li>▪ Metrolinx will adhere to all recommendations in any subsequent archaeological assessments, including monitoring activities, as required.</li></ul> |
