**Subject:** Ontario Line Project - Invitation to Meet & provide input on First Parliament Site  
**Date:** Monday, April 12, 2021 3:53:25 PM  
**Attachments:** [REDACTED]

---

Dear Mr. Detlor,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. We recently communicated with your Nation about the proposed Corktown Station which is along the planned alignment of the Ontario Line. This location includes parcels of land which were once the site of Upper Canada's First Parliament buildings. Metrolinx and its partners are exploring opportunities to commemorate the history of this site, and have been engaging with various parties including the City of Toronto and the Mississaugas of the Credit First Nation, on whose treaty territory this project is occurring.

Given the significant chance of recovering Indigenous and European artifacts during the Corktown Station Early Works, a detailed archaeological workplan is being developed. Metrolinx recognizes the importance and value of Indigenous monitors for any archaeology related to the Ontario Line Project. In our previous communication, an invitation was included for your Nation to participate in any archaeological fieldwork and monitoring during the Corktown Station Early Works, including demolition of modern buildings currently on the First Parliament site.

This work is anticipated to commence in Fall 2021, and if you have not yet expressed interest in participating, please feel free to do so at your earliest convenience. As a reminder any comments on the draft Corktown Station Early Works Report should be provided no later than **April 15, 2021**.

Metrolinx recognizes that the history of this location extends beyond European use, and as such, wants to take the opportunity to understand any significance it may have to Indigenous Nations. Metrolinx would like to meet with your Nation to discuss the First Parliament site, its commemoration, as well as review the broader Ontario Line project if you wish. We recognize that traditional knowledge of this area may be sacred and/or not appropriate to be shared, but would appreciate any information that may be appropriate for Metrolinx to consider.

This letter is not intended to replace engagement but to provide a high level summary for your information. We would very much appreciate meeting with your Nation to discuss in more detail. Please let me know if you have any questions or concerns. We appreciate the volume of documents that Metrolinx has shared with your Nation. If you have any questions or concerns, please do not hesitate to contact me.

Miigwetch,

Fallon

**Fallon Melander**

Ohsweken, ON N0A 1M0  
**Delivered by Email**

Dear Ms. General,

**RE: Ontario Line Project - First Parliament Site and Lime Kiln Site**

Metrolinx, a regional transportation agency, is helping to transform the way the Greater Golden Horseshoe moves by building a fast, convenient and integrated transit network. As part of this work, Metrolinx is continuing the pre-construction planning of the Ontario Line which will bring nearly 16 kilometres of subway service to Toronto.

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Haudenosaunee Confederacy Chiefs Council. Metrolinx appreciates and respects Haudenosaunee Confederacy Chiefs Council's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to share with Haudenosaunee Confederacy Chiefs Council information regarding Corktown Station early works and additional information regarding upcoming field visits and investigations at the Corktown Station early works site, which includes two registered archaeological sites, the First Parliament site and the Lime Kiln site.

**Project Description**

The proposed Ontario Line is a new 16-kilometer subway line, which will occupy an exclusive right-of-way system encompassing a combination of below-grade, above-grade, and at-grade alignment. The route (Figure 1) will run from Ontario Place/Exhibition through downtown Toronto to the Ontario Science Centre in the City of Toronto, with six (6) potential interchange stations and 17 new connections to GO Transit, existing subways and streetcars. More information on the Project can be found on our website: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)

**Corktown Station Early Works**

As communicated in the letter sent to Haudenosaunee Confederacy Chiefs Council on March 11, 2021, the Corktown Station site has been identified for launching tunnel excavation equipment for the downtown and Don Yard segments of the proposed Ontario Line alignment, as well as the location of the Corktown Station. The First Parliament and Lime Kiln Sites, located within the Corktown Station area, are known archaeological sites which require additional archaeological study ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures, followed by completion of necessary archaeological studies, is required. Completion of this preparatory work on an expedited basis is essential to allow for the timely delivery of the overall Project and is anticipated to begin in the Fall 2021, subject to the completion of the Corktown Station early works process in accordance with Ontario Regulation 341/20: Ontario Line Project.

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These activities will enable completion of environmental due diligence investigations, including archaeological assessments. These activities will occur on properties within the Corktown Station early works project footprint, as shown in **Figure 1**.

Figure 1: Map of Corktown Station Early Works

Environmental impacts of Corktown Station early works are being assessed in accordance with O. Reg. 341/20. Metrolinx shared the draft Corktown Station Early Works Report and associated discipline reports with Haudenosaunee Confederacy Chiefs Council on March 11, 2021 and had requested any comments to be provided by April 9, 2021.

## **Archaeological Work at the First Parliament Site and Lime Kiln Site**

Metrolinx appreciates the significance of archaeology to Haudenosaunee Confederacy Chiefs Council. The properties at 265 Front Street East, 271 Front Street East, and 25 Berkeley Street, in the St. Lawrence neighbourhood of the City of Toronto, are collectively host to the First Parliament Site. It is located on the southwest corner of Parliament Street and King Street, between Parliament Street and Berkeley Street. The First Parliament Site is a registered archaeological site (AjGu-41) which may include resources associated with the First and Second Parliament Buildings, the Home District Gaol, and Consumers' Gas company buildings. The surface of the property is currently occupied by automotive businesses, including a car dealership, car wash, and surface parking lot. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and remnants of early Toronto industry may be found at this site.

North of the First Parliament Site is another registered archaeological site (AjGu-64), the Lime Kiln Site, which includes remains from the Toronto Lime Works Company. A variety of structural features, in various states of preservation, have been documented on this site. The location of the Lime Kiln Site and the First Parliament Site are shown in **Figure 2**.

Figure 2: Location of First Parliament Site and Lime Kiln Site Areas

The First Parliament Site and Lime Kiln Site require additional archaeological studies ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures is necessary. Completion of this preparatory work is essential to allow for the timely delivery of the Ontario Line.

Archaeological fieldwork to remove or protect archaeological resources is anticipated to commence in early Fall 2021, and a workplan for these archaeological investigations is under development. As mentioned in the letter sent on March 11, 2021, Haudenosaunee Confederacy Chiefs Council is invited to participate in all archaeological fieldwork, and to review and provide comments on forthcoming reports.

### **Feedback on Commemoration of First Parliament Site**

Metrolinx appreciates that the history of the First Parliament site is not one simply of Canadian origin, but rather holds longer history and tradition. Metrolinx also appreciates that the site of the First Parliament of Upper Canada is linked to a history of colonization and harmful practices towards Indigenous Peoples. Given the significance of this site, Metrolinx is engaging with Indigenous Nations, City of Toronto and the broader community to identify opportunities for commemoration. Metrolinx is committed to ensuring that any feedback from Haudenosaunee Confederacy Chiefs Council regarding the significance of this site is considered as part of this commemoration. Metrolinx appreciates that traditional or cultural knowledge about this site may be sacred and/or not be appropriate to be shared but welcomes any comments or ideas from Haudenosaunee Confederacy Chiefs Council that may be appropriate to commemorate Indigenous Peoples.

### **Engagement**

Metrolinx is committed to an open, respectful, and transparent relationship with Haudenosaunee Confederacy Chiefs Council. We would like to meet with Haudenosaunee Confederacy Chiefs Council to better understand any significance the First Parliament site may have to your Nation. We are also happy to assist in reviewing the Corktown Station Early Works Report or reviewing the proposed archaeological workplan for this site. If Haudenosaunee Confederacy Chiefs Council requires additional information or materials, or you wish to discuss this project in more detail or set up a meeting, please contact Fallon Melander, Manager, Indigenous Relations at Metrolinx. She can be contacted at [IndigenousRelations@metrolinx.com](mailto:IndigenousRelations@metrolinx.com).

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*. Thank you for your time in reviewing these assessments.

Thank you for your time in reviewing this letter.

Yours Truly,

**Subject:** Ontario Line - Project Update and Draft Corktown Station Early Works Report for Review + Invitation to Participate in Archaeological Fieldwork

Dear Ms. General,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. Attached you will find a letter providing an update on the project. The purpose of this letter is to:

- Provide an update on the scope of the project work
- share the initial draft of the Early Works Report for the proposed Corktown

## Station

- Invite your Nation to participate in upcoming archaeological fieldwork

In an effort to streamline your review, we draw your attention to the attachment which provides an overview of the expected environmental impacts and proposed mitigations, as we know this may be of specific interest to you.

Metrolinx is also preparing a letter specific to works being planned within the Don Valley as we recognize the significance of this waterway to many Nations. We hope to share that letter soon. We are happy to meet with your Nation to discuss the Ontario Line and address any questions or concerns that your Nation may have.

We ask that any comments on the draft Corktown Station Early Works Report be provided no later than **April 15, 2021**. Please note that the Noise and Vibration Report, which will be part of the Early Works Report is still being prepared and we will share with your Nation by March 19, 2021.

The draft Corktown Station Early Works Report is available at the following link:

[REDACTED]

Please let us know as soon as possible if your Nation has interest in participating in future archaeological fieldwork.

We appreciate the volume of documents that Metrolinx has shared with your Nation.

If you have any questions or concerns, please do not hesitate to contact me.

Miigwetch,

Fallon

Dear Ms. General,

**RE: Ontario Line Project - Corktown Station Early Works Report**

Metrolinx, a regional transportation agency, is helping to transform the way the Greater Golden Horseshoe region moves by building a fast, convenient and integrated transit network. As part of this work, Metrolinx is proceeding with the Ontario Line which will bring nearly 16 kilometres of subway service to Toronto. The purpose of this letter is to share information regarding the Ontario Line project with Haudenosaunee Confederacy Chiefs Council.

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Haudenosaunee Confederacy Chiefs Council. Metrolinx appreciates and respects Haudenosaunee Confederacy Chiefs Council's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to share with Haudenosaunee Confederacy Chiefs Council information regarding Corktown Station early works and invite feedback on the initial draft of the Corktown Station Early Works Report.

**Project Description**

The Project is a new subway line with connections to Line 1 (Yonge-University) subway service at Osgoode and Queen Stations, Line 2 (Bloor-Danforth) subway service at Pape Station, and Line 5 (Eglinton Crosstown) service at the future Science Centre Station. Fifteen stations are proposed, with additional connections to three GO Transit lines (Lakeshore East, Lakeshore West and Stouffville), and the Queen, King, Bathurst, Spadina, Harbourfront and Gerrard/Carlton streetcar routes. The Project will reduce crowding on Line 1 and provide connections to new high-order rapid transit neighbourhoods. More information on the Project can be found on our website: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)

**Ontario Line Environmental Assessment Process and Reports**

10 Bay Street  
Toronto, ON M5J 2N8

416.202.4967  
[metrolinx.com](http://metrolinx.com)

In 2020, Metrolinx provided Haudenosaunee Confederacy Chiefs Council with an outline of the Ontario Line environmental assessment process. The environmental assessment for the Ontario Line Project is being completed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20) made under the *Environmental Assessment Act*. The regulation outlines a Project-specific environmental assessment that includes an Environmental Conditions Report, an Environmental Impact Assessment Report and provides opportunity for Early Works Reports for assessment of works that are ready to proceed in advance of the Environmental Impact Assessment Report. An overview of the reports is outlined below and their anticipated publication timeline is provided in **Attachment 1**.

### Environmental Conditions Report

The Environmental Conditions Report characterizes existing environmental conditions within the Ontario Line study area through a combination of desktop review and field studies and was finalized in November 2020. The report also summarizes potential impacts and mitigation measures for consideration during project planning and design. Potential impacts and mitigation measures identified in the Environmental Conditions Report will be confirmed and refined within the Early Works Reports and the Environmental Impact Assessment Report.

### Early Works Reports

Metrolinx is assessing several early works components to support the main construction of the Ontario Line project. Early works are components of the Ontario Line Project that are anticipated to be ready to proceed before completion of the Environmental Impact Assessment Report, such as station construction, rail corridor expansion, utility relocation or bridge replacement or expansion, as defined in O. Reg. 341/20.

Initially, the early works required to support the Ontario Line project were assessed in a single report, which was shared in July 2020 and included Exhibition Station, Lower Don Bridges, Lakeshore East Joint Corridor and East Harbour early works.

Since then, the single Early Works Report has been split into several Early Works Reports, each covering either a single early works location or multiple locations if they are in close proximity. Each Early Works Report provides a description of the early works and alternatives considered, documents local environmental conditions, and outlines early works-specific environmental impacts, mitigation measures,

monitoring activities, potentially required permits and approvals and other components.

It is important to note that two new early works projects, Don Yard and Corktown Station, have been added as well. The Early Works Reports, including this new scope of work are summarized below:

- Exhibition Station Early Works  
Exhibition Station early works are documented in the Exhibition Station Early Works Report, finalized in February 2021.
- Lakeshore East Joint Corridor Early Works  
Lakeshore East Joint Corridor early works will be documented under a separate Early Works Report which will also include East Harbour Station.
- Lower Don Bridges & Don Yard Early Works  
Lower Don Bridges early works will be documented in the Lower Don Bridges and Don Yard Early Works Report. Don Yard is a new early works project that will include construction of Ontario Line tunnel and portal structures between Cherry Street and the Lower Don River and accompanying shift of the Richmond Hill and Lakeshore East GO tracks; installation or upgrading of retaining walls and noise barriers, where appropriate; and utility and signal infrastructure relocation or protection. The initial draft of the Lower Don Bridges and Don Yard Early Works Report is anticipated to be shared with Haudenosaunee Confederacy Chiefs Council in mid to late April.
- Corktown Station Early Works  
Corktown Station is a new early works project. Further information on Corktown Station early works is provided below.

### Environmental Impact Assessment Report

The main report produced as part of this process is the Environmental Impact Assessment Report. It will cover the construction and operation of the Ontario Line. The report will include a final description of the Ontario Line Project, environmental impact evaluation results, mitigation measures, monitoring activities, potentially required permits and approvals and other components as outlined in O. Reg. 341/20.

## **Work along the Don River and within the vicinity of the Don Valley**

Metrolinx appreciates the significance of waterways to Haudenosaunee Confederacy Chiefs Council. As such, Metrolinx is preparing an information letter specific to work occurring near or along the Don River and within the Valley. Metrolinx will provide details about the scope of work and anticipated natural environmental and archaeological assessments. Metrolinx is committed to exploring opportunities for Haudenosaunee Confederacy Chiefs Council to participate in these assessments should Haudenosaunee Confederacy Chiefs Council express interest.

## **Corktown Station Early Works**

The Corktown Station site has been identified for launching tunnel excavation equipment for the downtown and Don Yard segments of the proposed Ontario Line alignment, as well as the location for the Corktown Station. The First Parliament site, located within the Corktown Station area, is a known archaeological site which requires additional archaeological study ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures, followed by completion of necessary archaeological studies, is required. Completion of this preparatory work on an expedited basis is essential to allow for the timely delivery of the overall Project.

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These activities will enable completion of environmental due diligence investigations, including archaeological assessments. These activities will occur on properties within the Corktown Station early works project footprint, as shown in **Figure 2**.

Figure 2: Map of Corktown Station Early Works

Environmental impacts of Corktown Station early works are being assessed in accordance with O. Reg. 341/20.

Metrolinx is sharing the initial draft of the Corktown Station Early Works Report, including the Corktown Station Natural Environment Report, via the Dropbox link enclosed in the email for Haudenosaunee Confederacy Chiefs Council's review. The Corktown Station Early Works Report documents the assessment of Corktown Station early works. It also outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures, and a consultation record. For a summary of the potential mitigation measures identified, please see the table found as **Attachment 2**.

Note that the initial draft of the report enclosed in the email currently does not include information on noise and vibration as the Corktown Station Noise and Vibration Report is still being prepared. The initial draft of the Corktown Station Noise and Vibration Report is anticipated to be shared with Haudenosaunee Confederacy Chiefs Council on **March 19, 2021** for review.

Metrolinx welcomes any comments or feedback on the initial draft of the Corktown Station Early Works Report from Haudenosaunee Confederacy Chiefs Council. Please provide these in writing no later than **April 15, 2021**.

Based on our currently anticipated schedule (**Figure 1**), the Notice of Publication of Draft Corktown Station Early Works Report is planned for late-April 2021, at which point the draft report will be available to all interested parties for review, including Haudenosaunee Confederacy Chiefs Council, the public and regulatory agencies.

### Archaeology

As outlined above, archaeological assessments are anticipated to take place as part of advancing Corktown Station Early Works. Metrolinx would appreciate any interest Haudenosaunee Confederacy Chiefs Council may have in participating in planned future archaeological fieldwork for this site. The maps in **Attachment 3** illustrate the areas that will be subject to future archaeological assessments that include fieldwork. Upon receipt of Haudenosaunee Confederacy Chiefs Council's interest in participating, Metrolinx will work to coordinate your Nation's involvement.

Metrolinx acknowledges that Haudenosaunee Confederacy Chiefs Council should be aware of and engaged regarding any future archaeological work, especially the discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will ensure that future archaeological assessments are provided to Haudenosaunee Confederacy Chiefs Council in draft form, prior to submission to MHSTCI.

### **Engagement**

Metrolinx is committed to an open, respectful, and transparent relationship with Haudenosaunee Confederacy Chiefs Council. We appreciate the significant volume of documents related to this Project that have been shared with Haudenosaunee Confederacy Chiefs Council. We are happy to assist in the review of these documents by meeting with Haudenosaunee Confederacy Chiefs Council or working to address any questions that Haudenosaunee Confederacy Chiefs Council may have about this Project. If you require additional information or materials or if you wish to discuss these Projects in more detail or set up a meeting, please contact Fallon Melander, Manager of Metrolinx's Indigenous Relations Office at [IndigenousRelations@metrolinx.com](mailto:IndigenousRelations@metrolinx.com).

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*. Thank you for your time in reviewing these assessments.

Thank you for your time in reviewing this letter.

| Vegetation Communities                                                                                      | <ul style="list-style-type: none"><li>City and private tree removal</li></ul>                                                                                                                            | <ul style="list-style-type: none"><li>An Arborist Report by an International Society of Arboriculture Certified Arborist will be prepared, if required, in accordance with the Ontario Forestry Act R.S.O. 1990, and other regulations and best management practices as applicable.</li><li>The Arborist Report will include, but not be limited to the individual identification of all trees within the Corktown Station early works construction areas including those that require removal or preservation, or trees that may be injured. Trees to be identified may include those on Metrolinx property, trees on public and private lands, and boundary trees. City of Toronto by-laws dictate the minimum area buffers to be inventoried and Diameter at Breast Height which requires inventory.</li><li>Prior to the undertaking of tree removals, a Tree Removal Strategy/Tree Preservation Plan will be developed to document tree protection and mitigation measures that follow the City of Toronto Tree Protection Policy and Specifications for Construction Near Trees Guidelines (2016b) and adherence with best practices, standards and regulations on safety, environmental and wildlife protections.</li><li>Compensation for tree removals will be undertaken in accordance with provisions outlined in the Metrolinx Vegetation Guideline (2020).</li><li>Pruning of branches will be conducted through the implementation of proper arboricultural techniques.</li><li>Tree Protection Zone fencing will be established to protect and prevent tree injuries. Tree Protection Zones will be clearly staked prior to construction using barriers in accordance with local by-law requirements.</li></ul> | <ul style="list-style-type: none"><li>Regular inspection in areas of vegetation removal will be undertaken as required during construction to ensure that fencing is intact, only specified trees are removed and no damage is caused to the remaining trees and adjacent vegetation communities.</li><li>On-site inspection will be undertaken to confirm the implementation of the mitigation measures and identify corrective actions if required. Corrective actions may include additional site maintenance and alteration of activities to minimize impacts.</li><li>If required, the approach to compensation monitoring will be developed in accordance with Metrolinx’s Vegetation Guideline (2020).</li></ul> |

| Environmental Component                               | Potential Impact                                                                                                                                                                              | Mitigation Measure(s)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Monitoring Activities                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|-------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Vegetation Communities</b>                         | <ul style="list-style-type: none"><li>▪ Soil contamination as a result of spills (e.g., grease and/or fuel) from equipment use</li><li>▪ Introduction or spread of Invasive Species</li></ul> | <ul style="list-style-type: none"><li>▪ A Spill Prevention and Contingency Plan will be developed and adhered to. Spills will be immediately contained and cleaned up in accordance with provincial regulatory requirements and the contingency plan.</li><li>▪ Refuelling shall be done within refuelling stations lined with appropriate material to prevent seepage and fuel discharge.</li><li>▪ All machinery, construction equipment and vehicles arriving on site should be in clean condition (e.g., free of fluid leaks, soils containing seeds of plant material from invasive species) and be inspected and washed in accordance with the Clean Equipment Protocol for Industry (Halloran et al., 2013) prior to arriving and leaving the construction site in order to prevent the spread of invasive species to other locations.</li></ul>                  | <ul style="list-style-type: none"><li>▪ On-site inspection will be undertaken to confirm the implementation of the mitigation measures and identify corrective actions if required. Corrective actions may include additional site maintenance and alteration of activities to minimize impacts.</li><li>▪ Ensure precautions are being taken to minimize the spread of invasive species by implementing the Clean Equipment Protocol for Industry (Halloran et al., 2013) on equipment and machinery prior to moving sites.</li><li>▪</li></ul> |
| <b>Wildlife and Wildlife Habitat – General</b>        | <ul style="list-style-type: none"><li>▪ Disturbance, displacement or mortality of wildlife</li></ul>                                                                                          | <ul style="list-style-type: none"><li>▪ Prior to construction, investigation of the Corktown Station early works construction areas for wildlife and wildlife habitat that may have established following the completion of previous surveys will be undertaken, as appropriate.</li><li>▪ If wildlife is encountered, measures will be implemented to avoid destruction, injury, or interference with the species, and/or its habitat. For example, construction activities will cease or be reduced, and wildlife will be encouraged to move off-site and away from the construction area on its own. A qualified Biologist will be contacted to define the appropriate buffer required from wildlife.</li></ul>                                                                                                                                                       | <ul style="list-style-type: none"><li>▪ On-site inspection by on-site environmental workers or construction staff should occur daily within the construction area to ensure that no wildlife is trapped within the construction area.</li><li>▪ On-site inspection will be undertaken to confirm the implementation of the mitigation measures and identify corrective actions if required. Corrective actions may include additional site maintenance and alteration of activities to minimize impacts.</li></ul>                               |
| <b>Significant Wildlife Habitat: Common Nighthawk</b> | <ul style="list-style-type: none"><li>▪ Removal of candidate nesting habitat for Common Nighthawk</li></ul>                                                                                   | <ul style="list-style-type: none"><li>▪ Refer below to mitigation measures described for Migratory Breeding Birds and Nests.</li><li>▪ Demolition of buildings should be scheduled outside of the breeding bird season of April 1 to August 31. If this is not possible and buildings must be demolished during this period, the following will be completed:</li><li>▪ The roofs will be checked for presence of gravel. If gravel is not present, then the building is unlikely to provide suitable nesting habitat for Common Nighthawk. If gravel is present, a search for eggs and nesting activity for Common Nighthawk on the roof will be conducted. If nests or nesting activity of Common Nighthawk are confirmed, the building cannot be demolished until it is confirmed by a Qualified Biologist that young have fully fledged and left the nest.</li></ul> | <ul style="list-style-type: none"><li>▪ Refer below for monitoring requirements described for Migratory Breeding Birds and Nests.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                      |
| <b>Migratory Breeding Birds and Nests</b>             | <ul style="list-style-type: none"><li>▪ Disturbance or destruction of migratory bird nests</li></ul>                                                                                          | <ul style="list-style-type: none"><li>▪ All works must comply with the Migratory Birds Convention Act, including timing windows for the nesting period (April 1 to August 31 in Ontario).</li><li>▪ If activities are proposed to occur during the general nesting period, a breeding bird and nest survey will be undertaken prior to required activities. Nest searches by an experienced searcher are required and will be completed by a qualified Biologist no more than 48 hours prior to vegetation removal.</li><li>▪ If a nest of a migratory bird is found outside of this nesting period (including a ground nest) it still receives protection.</li></ul>                                                                                                                                                                                                    | <ul style="list-style-type: none"><li>▪ Regular monitoring (field observations, on-site inspections) will be undertaken to confirm that activities do not encroach into nesting areas or disturb active nesting sites.</li></ul>                                                                                                                                                                                                                                                                                                                 |

If clarification is required regarding regulatory requirements, the appropriate regulatory agencies will be consulted.

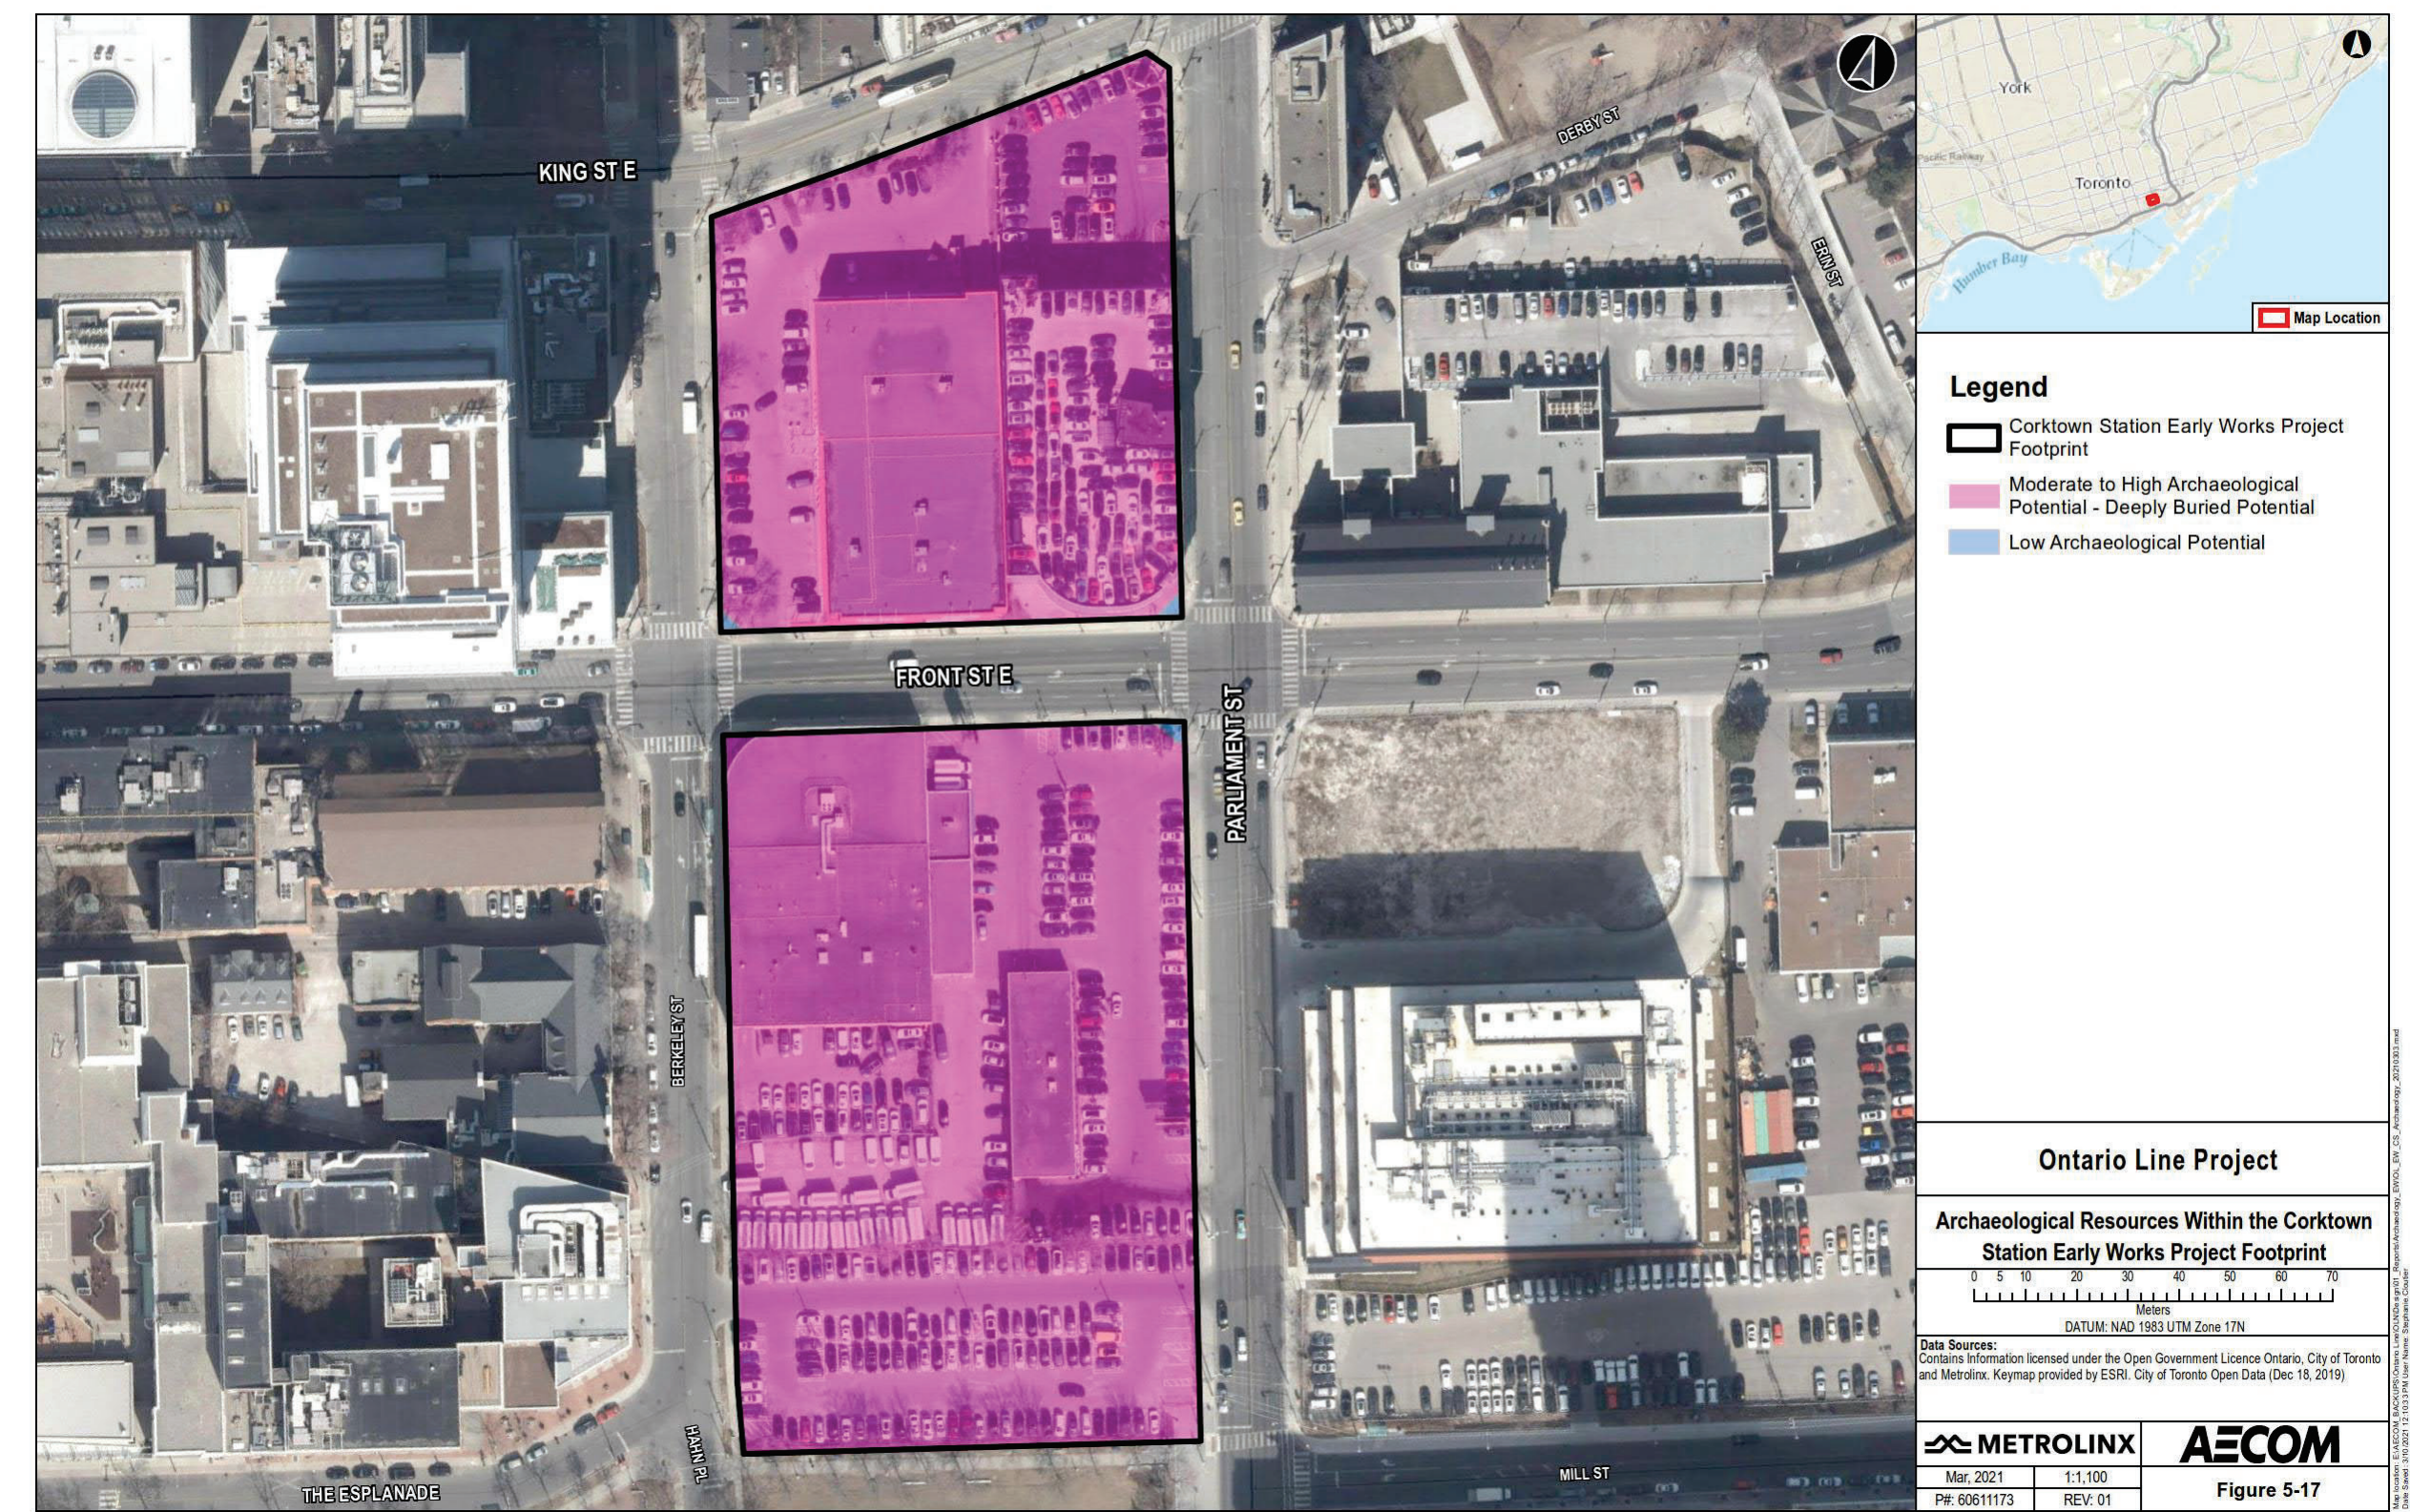

Table 6-8: Potential Impacts, Mitigation Measures and Monitoring Activities – Archaeological Resources

| Environmental Component  | Potential Impact                                                                                                                                                            | Mitigation Measure(s)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Monitoring Activities                                                                                                                                                                                                          |
|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Archaeological Potential | <ul style="list-style-type: none"><li>Potential for the disturbance of registered archaeological sites and/or archaeological resources not previously identified.</li></ul> | <ul style="list-style-type: none"><li>Areas identified as retaining archaeological potential in the Corktown Station Early Works Project Footprint, as per the Ontario Line South Stage 1 Archaeological Assessment Report (AECOM, 2020c), are shown in <b>Figure 5-17</b>, and include the following. Should ground disturbing activities<sup>29</sup> be planned within these areas, further archaeological assessment must be completed prior to any ground disturbing activities.<ul style="list-style-type: none"><li>The majority of the Corktown Station Early Works Project Footprint on either side of Front Street retains moderate to high archaeological potential where deeply buried archaeological potential remains, such as for discovering pre-contact Indigenous materials and/or materials related to the early development and expansion of the City of Toronto, including the First and Second Parliament Buildings, the Home District Gaol, and the Consumers’ Gas company buildings.</li></ul></li><li>Given the significance of the First Parliament Site, all previous site specific archaeological assessments should be reviewed to determine what additional archaeological work is required.</li><li>Any additional Archaeological Assessments (e.g., Stage 2, Stage 3 if recommended by the Stage 2) shall be completed as early as possible, and prior to any ground disturbing activities. This work shall be done in accordance with the Ministry of Heritage, Sport, Tourism and Culture Industries’ Standards and Guidelines for Consultant Archaeologists (2011) to identify any archaeological resources that may be present.</li><li>Indigenous Nations will be invited to participate in monitoring requirements for any subsequent archaeological work is recommended. Any person discovering human remains must immediately notify the police or coroner and the Registrar of Cemeteries, Ministry of Government Services. In addition, consultation with relevant Indigenous Nations will be initiated in the event that archaeological resources or human remains are discovered.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <ul style="list-style-type: none"><li>None identified at this time.</li><li>Metrolinx will adhere to all recommendations in any subsequent archaeological assessments, including monitoring activities, as required.</li></ul> |

<sup>29</sup> Ground disturbing activities can be defined as any and all activities that will or have the potential to impact/disturb the area below the surface. Example of activities include, but is not limited to, heavy machine movement/weight, clearing, grading, excavating, trenching, drilling, and transporting and filling of land.

---

Dear Chief Carr,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. Attached you will find a letter providing an update on the project. The purpose of this letter is to share the Draft Corktown Station Early Works Report (EWR) prepared for the Ontario Line Project and provide a continued invitation for feedback.

In an effort to streamline your review, we draw your attention to the attachment which provides an overview of the expected environmental impacts and proposed mitigations, as we know this may be of specific interest to you.

We ask that you provide any comments no later than June 11, 2021.

The reports are available at the following link:

We appreciate the volume of documents that Metrolinx has shared with your Nation. If you have any questions or concerns, please do not hesitate to contact the Indigenous Relations Office.

Miigwetch,

Fallon

## Notice of Publication of Draft Corktown Station Early Works Report

### Ontario Line Project

#### The Project

The Ontario Line will bring 15.6 kilometres of new subway service to Toronto to make it faster and easier for people to get where they need to be each day. The line will stretch across the city, from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line is proposed to include 15 potential stations, including six interchange stations, and connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 of its stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable commutes.

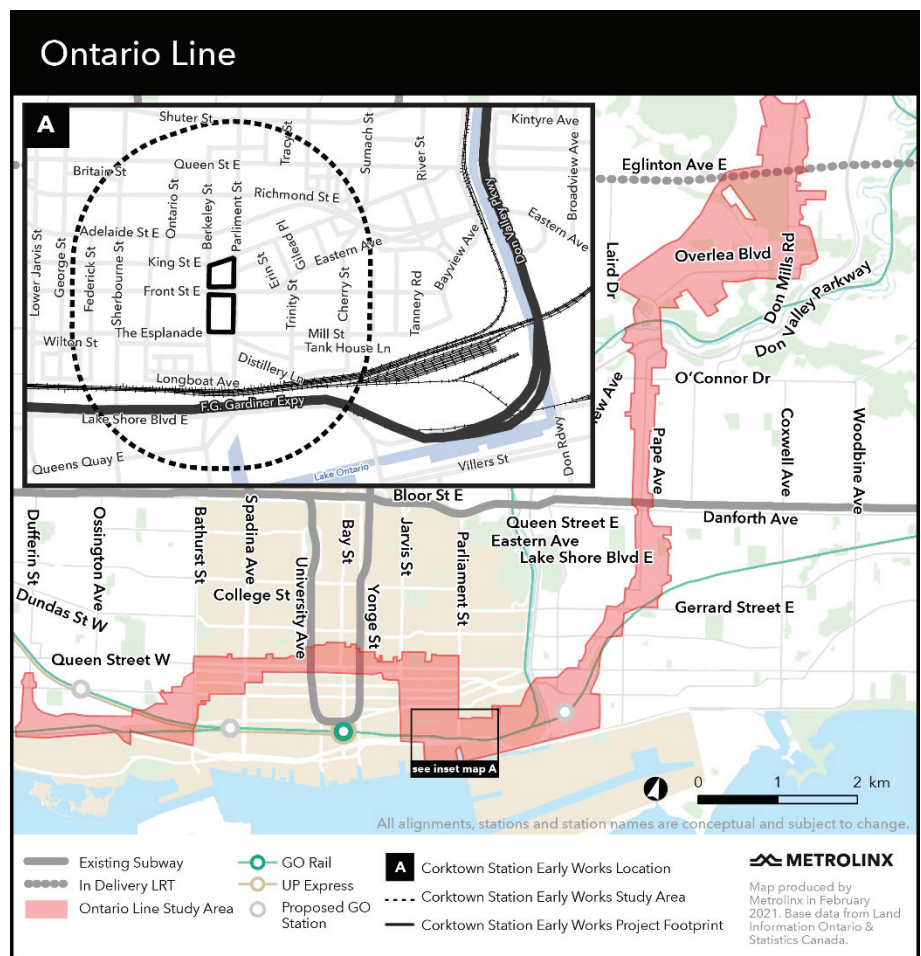

#### Corktown Station Early Works

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These early works are being advanced to prepare the site for future construction staging and laydown to support tunneling and below ground construction activities, and work associated with the future Corktown Station.

The First Parliament site, located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail), and remnants of early Toronto industry may be found here.

Metrolinx is eager to unlock the potential of the site and work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

Environmental impacts of Corktown Station early works are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*. In accordance with Section 8 of O. Reg. 341/20, Metrolinx has prepared the Draft Corktown Station Early Works Report (EWR) that is now available for public review.

The Draft EWR documents the assessment of Corktown Station early works. The report outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures and a consultation record.

### **The Draft Early Works Report Review and Consultation Process**

Effective **May 12, 2021**, the Draft Corktown Station EWR will be available for review on the project webpage ([www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)).

As we temporarily shift to virtual open houses, please join us online from **May 12 to June 11, 2021** to find out more about and provide your feedback on the Draft Corktown Station EWR via the webpage form.

Those who wish to provide comments on the Draft Corktown Station EWR must do so by **June 11, 2021** and submit them using the webpage form or address them to the following email: [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com).

Section 10 of O. Reg. 341/20 requires Metrolinx to establish an issues resolution process to attempt to resolve any concerns raised by the public or Indigenous Nations during the review period. At the end of the review period, Metrolinx will update the Draft Corktown Station EWR by adding a description of the issues resolution process, what Metrolinx did to address any concerns, and if the early works implementation timeline will be impacted as a result of addressing concerns. Metrolinx will then publish the Final Corktown Station EWR on the project webpage: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline) and issue a Notice of Publication of Final Corktown Station EWR.

To obtain a copy of the Draft Corktown Station EWR, please contact the project email listed above.

**Josh Vandezande (T: 416-202-5100, E: [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com)) may be contacted on behalf of Metrolinx.**

RR #2  
Hiawatha, ON K9J 0E6  
**Delivered by email**

Dear Chief Carr,

**RE: Ontario Line Project - Notice of Publication of Draft Corktown Station Early Works Report**

Metrolinx, a regional transportation agency, is helping to transform the way the Greater Golden Horseshoe region moves by building a fast, convenient and integrated transit network. As part of this work, Metrolinx is proceeding with the Ontario Line which will bring 15.6 kilometres of subway service to Toronto. The purpose of this letter is to share information regarding the Ontario Line project with Hiawatha First Nation.

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Hiawatha First Nation. Metrolinx appreciates and respects Hiawatha First Nation's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to share with Hiawatha First Nation the Draft Corktown Station Early Works Report (EWR).

**Project Description**

The Ontario Line will stretch from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line is proposed to include 15 stations, including six interchange stations, and connections to three GO train lines, two existing subway lines, the Eglinton Crosstown LRT, and streetcar lines. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable commutes. More information on the Project can be found on our website:  
[www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)

The initial draft of the Corktown Station EWR and a letter outlining Corktown Station early works were shared with Hiawatha First Nation on March 11, 2021. As outlined in

the letter, environmental impacts of the Ontario Line Project are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*.

## Draft Corktown Station Early Works Report

In accordance with Section 8 of O. Reg. 341/20, Metrolinx has prepared a Draft Corktown Station EWR that documents the assessment of Corktown Station early works.

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These early works are being advanced to prepare the site for future construction staging and laydown to support tunneling and below ground construction activities, and work associated with the future Corktown Station. The location of the Corktown Station early works project footprint and study area can be viewed below in **Figure 1**.

Figure 1: Map of Corktown Station Early Works

10 Bay Street  
Toronto, ON M5J 2N8

metrolinx.com

The First Parliament site, located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail) and remnants of early Toronto industry may be found here. Metrolinx is eager to work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

The EWR documents the assessment of Corktown Station early works and outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures, and a consultation record.

The Draft EWR is available for your review and can be found via the Dropbox link shared in the body of the email that is associated with this letter. We welcome any additional comments you may have on the Draft EWR. The Draft EWR is available for review and comment starting **May 12, 2021** and ending on **June 11, 2021**. The Notice of Publication of Draft Corktown Station EWR is provided in **Attachment 1**. The Draft EWR will be updated following the review period, and the Final EWR will be published on the Project webpage ([www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)) and shared with Hiawatha First Nation.

#### Potential Impacts and Mitigation Measures

The tables found enclosed in **Attachment 2 and 3** provide a summary of natural environment and archaeology potential impacts and mitigation measures identified as part of the Draft EWR that may be of interest to *Hiawatha First Nation*. If *Hiawatha First Nation* has any feedback about these potential impacts and/or mitigation strategies, or any other aspects of the Ontario Line, we welcome the opportunity to discuss further.

#### Revisions to the Initial Draft of the Corktown Station Early Works Report

In accordance with O. Reg. 341/20, Metrolinx has now incorporated comments and feedback from the initial round of engagement with Indigenous Nations and agencies on the initial draft of the Corktown Station EWR into the Draft EWR.

To streamline capacity for Hiawatha First Nation to provide comments or feedback, a summary of revisions to the EWR since the circulation of the initial draft of the EWR is as follows:

- Minor editorial changes to address grammatical and syntax errors and updates to reflect comments received from agencies;
- Clarification that the project operations, construction of Corktown Station and other project components will be assessed in the Ontario Line Environmental Impact Assessment Report;
- Inclusion of information on the Parkland Strategy (City of Toronto, 2019), First Parliament Master Plan (City of Toronto, 2020) and additional information on planned community services and facilities in the Corktown Station Early Works Study Area;
- Edits to the text to reflect that the Ministry of Heritage, Sport, Tourism and Culture Industries' (MHSTCI) Minister's Consent has been granted for the demolition and removal of the non-heritage buildings at 265 Front Street East and removal of the heritage attributes at 265 Front Street East, 271 Front Street East and 25 Berkeley Street located on the First Parliament Site, and affirming Metrolinx's commitment to fulfilling the conditions outlined in the Minister's Consent, including completion of archaeological requirements;
- Additional mitigation measures for environmental disciplines such as archaeology, air quality and traffic and transportation, that include:
  - Coordination and completion of required archaeological investigations, early works activities and/or activities that have the potential for vibration effects such that buried archaeological resources are appropriately considered;
  - Use of non-chloride dust suppressants; and
  - Consultation with the City of Toronto to minimize potential impacts during special events (e.g., the Toronto Christmas Market at the Distillery District) should closures or long-term impacts be required.
- Revision of traffic and transportation figures to include additional information such as intersection names and inclusion of an additional noise and vibration figure to show representative receptor locations.

## Engagement

Metrolinx is committed to an open, respectful, and transparent relationship with Hiawatha First Nation. We appreciate the significant volume of documents related to this Project that have been shared with Hiawatha First Nation. We are happy to assist in the review of these documents by meeting with Hiawatha First Nation or working to address any questions that Hiawatha First Nation may have about this Project. If you require additional information or materials or if you wish to discuss these Projects in more detail or set up a meeting, please contact Fallon Melander, Manager of Metrolinx's Indigenous Relations Office at [IndigenousRelations@metrolinx.com](mailto:IndigenousRelations@metrolinx.com).

Metrolinx welcomes any comments or feedback on the Draft EWR from Hiawatha First Nation. Please provide these in writing no later than **June 11, 2021**. Comments and information regarding this draft report will be collected to assist in meeting the requirements of the *Environmental Assessment Act* and may be included in study documentation. With the exception of personal information, all comments will become part of the public record. Kindly note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*.

Thank you for your time in reviewing this letter.

Yours Truly,

A handwritten signature in black ink, appearing to read 'Maria Zintchenko', with a long, sweeping horizontal stroke at the end.

---

Dear Chief Carr,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. We recently communicated with your Nation about the proposed Corktown Station which is along the planned alignment of the Ontario Line. This location includes parcels of land which were once the site of Upper Canada's First Parliament buildings. Metrolinx and its partners are exploring opportunities to commemorate the history of this site, and have been engaging with various parties including the City of Toronto and the Mississaugas of the Credit First Nation, on whose treaty territory this project is occurring.

Given the significant chance of recovering Indigenous and European artifacts during the Corktown Station Early Works, a detailed archaeological workplan is being developed. Metrolinx recognizes the importance and value of Indigenous monitors for any archaeology related to the Ontario Line Project. In our previous communication, an invitation was included for your Nation to participate in any archaeological fieldwork and monitoring during the Corktown Station Early Works, including demolition of modern buildings currently on the First Parliament site.

This work is anticipated to commence in Fall 2021, and if you have not yet expressed interest in participating, please feel free to do so at your earliest convenience. As a reminder any comments on the draft Corktown Station Early Works Report should be provided no later than **April 15, 2021**.

Metrolinx recognizes that the history of this location extends beyond European use, and as such, wants to take the opportunity to understand any significance it may have to Indigenous Nations. Metrolinx would like to meet with your Nation to discuss the First Parliament site, its commemoration, as well as review the broader Ontario Line project if you wish. We recognize that traditional knowledge of this area may be sacred and/or not appropriate to be shared, but would appreciate any information that may be appropriate for Metrolinx to consider.

This letter is not intended to replace engagement but to provide a high level summary for your information. We would very much appreciate meeting with your Nation to discuss in more detail. Please let me know if you have any questions or concerns. We appreciate the volume of documents that Metrolinx has shared with your Nation. If you have any questions or concerns, please do not hesitate to contact me.

Miigwetch,

Fallon

**Delivered by email**

Dear Chief Carr,

**RE: Ontario Line Project - First Parliament Site and Lime Kiln Site**

Metrolinx, a regional transportation agency, is helping to transform the way the Greater Golden Horseshoe moves by building a fast, convenient and integrated transit network. As part of this work, Metrolinx is continuing the pre-construction planning of the Ontario Line which will bring nearly 16 kilometres of subway service to Toronto.

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Hiawatha First Nation. Metrolinx appreciates and respects Hiawatha First Nation's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to share with Hiawatha First Nation information regarding Corktown Station early works and additional information regarding upcoming field visits and investigations at the Corktown Station early works site, which includes two registered archaeological sites, the First Parliament site and the Lime Kiln site.

**Project Description**

The proposed Ontario Line is a new 16-kilometer subway line, which will occupy an exclusive right-of-way system encompassing a combination of below-grade, above-grade, and at-grade alignment. The route (Figure 1) will run from Ontario Place/Exhibition through downtown Toronto to the Ontario Science Centre in the City of Toronto, with six (6) potential interchange stations and 17 new connections to GO Transit, existing subways and streetcars. More information on the Project can be found on our website: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)

**Corktown Station Early Works**

As communicated in the letter sent to Hiawatha First Nation on March 11, 2021, the Corktown Station site has been identified for launching tunnel excavation equipment for the downtown and Don Yard segments of the proposed Ontario Line alignment, as well as the location of the Corktown Station. The First Parliament and Lime Kiln Sites, located within the Corktown Station area, are known archaeological sites which require additional archaeological study ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures, followed by completion of necessary archaeological studies, is required. Completion of this preparatory work on an expedited basis is essential to allow for the timely delivery of the overall Project and is anticipated to begin in the Fall 2021, subject to the completion of the Corktown Station early works process in accordance with Ontario Regulation 341/20: Ontario Line Project.

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These activities will enable completion of environmental due diligence investigations, including archaeological assessments. These activities will occur on properties within the Corktown Station early works project footprint, as shown in **Figure 1**.

Figure 1: Map of Corktown Station Early Works

Environmental impacts of Corktown Station early works are being assessed in accordance with O. Reg. 341/20. Metrolinx shared the draft Corktown Station Early Works Report and associated discipline reports with Hiawatha First Nation on March 11, 2021 and had requested any comments to be provided by April 9, 2021.

## Archaeological Work at the First Parliament Site and Lime Kiln Site

Metrolinx appreciates the significance of archaeology to Hiawatha First Nation. The properties at 265 Front Street East, 271 Front Street East, and 25 Berkeley Street, in the St. Lawrence neighbourhood of the City of Toronto, are collectively host to the First Parliament Site. It is located on the southwest corner of Parliament Street and King Street, between Parliament Street and Berkeley Street. The First Parliament Site is a registered archaeological site (AjGu-41) which may include resources associated with the First and Second Parliament Buildings, the Home District Gaol, and Consumers' Gas company buildings. The surface of the property is currently occupied by automotive businesses, including a car dealership, car wash, and surface parking lot. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and remnants of early Toronto industry may be found at this site.

North of the First Parliament Site is another registered archaeological site (AjGu-64), the Lime Kiln Site, which includes remains from the Toronto Lime Works Company. A variety of structural features, in various states of preservation, have been documented on this site. The location of the Lime Kiln Site and the First Parliament Site are shown in **Figure 2**.

Figure 2: Location of First Parliament Site and Lime Kiln Site Areas

The First Parliament Site and Lime Kiln Site require additional archaeological studies ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures is necessary. Completion of this preparatory work is essential to allow for the timely delivery of the Ontario Line.

Archaeological fieldwork to remove or protect archaeological resources is anticipated to commence in early Fall 2021, and a workplan for these archaeological investigations is under development. As mentioned in the letter sent on March 11, 2021, Hiawatha First Nation is invited to participate in all archaeological fieldwork, and to review and provide comments on forthcoming reports.

### **Feedback on Commemoration of First Parliament Site**

Metrolinx appreciates that the history of the First Parliament site is not one simply of Canadian origin, but rather holds longer history and tradition. Metrolinx also appreciates that the site of the First Parliament of Upper Canada is linked to a history of colonization and harmful practices towards Indigenous Peoples. Given the significance of this site, Metrolinx is engaging with Indigenous Nations, City of Toronto and the broader community to identify opportunities for commemoration. Metrolinx is committed to ensuring that any feedback from Hiawatha First Nation regarding the significance of this site is considered as part of this commemoration. Metrolinx appreciates that traditional or cultural knowledge about this site may be sacred and/or not be appropriate to be shared but welcomes any comments or ideas from Hiawatha First Nation that may be appropriate to commemorate Indigenous Peoples.

### **Engagement**

Metrolinx is committed to an open, respectful, and transparent relationship with Hiawatha First Nation. We would like to meet with Hiawatha First Nation to better understand any significance the First Parliament site may have to your Nation. We are also happy to assist in reviewing the Corktown Station Early Works Report or reviewing the proposed archaeological workplan for this site. If Hiawatha First Nation requires additional information or materials, or you wish to discuss this project in more detail or set up a meeting, please contact Fallon Melander, Manager, Indigenous Relations at Metrolinx. She can be contacted at [IndigenousRelations@metrolinx.com](mailto:IndigenousRelations@metrolinx.com).

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*. Thank you for your time in reviewing these assessments.

Thank you for your time in reviewing this letter.

**Subject:** Ontario Line - Project Update and Draft Corktown Station Early Works Report for Review + Invitation to Participate in Archaeological Fieldwork

Dear Chief Carr,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. Attached you will find a letter providing an update on the project. The purpose of this letter is to:

- Provide an update on the scope of the project work
- share the initial draft of the Early Works Report for the proposed Corktown

## Station

- Invite your Nation to participate in upcoming archaeological fieldwork

In an effort to streamline your review, we draw your attention to the attachment which provides an overview of the expected environmental impacts and proposed mitigations, as we know this may be of specific interest to you.

Metrolinx is also preparing a letter specific to works being planned within the Don Valley as we recognize the significance of this waterway to many Nations. We hope to share that letter soon. We are happy to meet with your Nation to discuss the Ontario Line and address any questions or concerns that your Nation may have.

We ask that any comments on the draft Corktown Station Early Works Report be provided no later than **April 15, 2021**. Please note that the Noise and Vibration Report, which will be part of the Early Works Report is still being prepared and we will share with your Nation by March 19, 2021.

The draft Corktown Station Early Works Report is available at the following link:

[REDACTED]

Please let us know as soon as possible if your Nation has interest in participating in future archaeological fieldwork.

We appreciate the volume of documents that Metrolinx has shared with your Nation.

If you have any questions or concerns, please do not hesitate to contact me.

Miigwetch,

Fallon

Dear Chief Carr,

**RE: Ontario Line Project - Corktown Station Early Works Report**

Metrolinx, a regional transportation agency, is helping to transform the way the Greater Golden Horseshoe region moves by building a fast, convenient and integrated transit network. As part of this work, Metrolinx is proceeding with the Ontario Line which will bring nearly 16 kilometres of subway service to Toronto. The purpose of this letter is to share information regarding the Ontario Line project with Hiawatha First Nation.

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Hiawatha First Nation. Metrolinx appreciates and respects Hiawatha First Nation's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to share with Hiawatha First Nation information regarding Corktown Station early works and invite feedback on the initial draft of the Corktown Station Early Works Report.

**Project Description**

The Project is a new subway line with connections to Line 1 (Yonge-University) subway service at Osgoode and Queen Stations, Line 2 (Bloor-Danforth) subway service at Pape Station, and Line 5 (Eglinton Crosstown) service at the future Science Centre Station. Fifteen stations are proposed, with additional connections to three GO Transit lines (Lakeshore East, Lakeshore West and Stouffville), and the Queen, King, Bathurst, Spadina, Harbourfront and Gerrard/Carlton streetcar routes. The Project will reduce crowding on Line 1 and provide connections to new high-order rapid transit neighbourhoods. More information on the Project can be found on our website: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)

**Ontario Line Environmental Assessment Process and Reports**

10 Bay Street  
Toronto, ON M5J 2N8

416.202.4967  
metrolinx.com

In 2020, Metrolinx provided Hiawatha First Nation with an outline of the Ontario Line environmental assessment process. The environmental assessment for the Ontario Line Project is being completed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20) made under the *Environmental Assessment Act*. The regulation outlines a Project-specific environmental assessment that includes an Environmental Conditions Report, an Environmental Impact Assessment Report and provides opportunity for Early Works Reports for assessment of works that are ready to proceed in advance of the Environmental Impact Assessment Report. An overview of the reports is outlined below and their anticipated publication timeline is provided in **Attachment 1**.

### Environmental Conditions Report

The Environmental Conditions Report characterizes existing environmental conditions within the Ontario Line study area through a combination of desktop review and field studies and was finalized in November 2020. The report also summarizes potential impacts and mitigation measures for consideration during project planning and design. Potential impacts and mitigation measures identified in the Environmental Conditions Report will be confirmed and refined within the Early Works Reports and the Environmental Impact Assessment Report.

### Early Works Reports

Metrolinx is assessing several early works components to support the main construction of the Ontario Line project. Early works are components of the Ontario Line Project that are anticipated to be ready to proceed before completion of the Environmental Impact Assessment Report, such as station construction, rail corridor expansion, utility relocation or bridge replacement or expansion, as defined in O. Reg. 341/20.

Initially, the early works required to support the Ontario Line project were assessed in a single report, which was shared in June 2020 and included Exhibition Station, Lower Don Bridges, Lakeshore East Joint Corridor and East Harbour early works.

Since then, the single Early Works Report has been split into several Early Works Reports, each covering either a single early works location or multiple locations if they are in close proximity. Each Early Works Report provides a description of the early works and alternatives considered, documents local environmental conditions, and outlines early works-specific environmental impacts, mitigation measures,

monitoring activities, potentially required permits and approvals and other components.

It is important to note that two new early works projects, Don Yard and Corktown Station, have been added as well. The Early Works Reports, including this new scope of work are summarized below:

- Exhibition Station Early Works  
Exhibition Station early works are documented in the Exhibition Station Early Works Report, finalized in February 2021.
- Lakeshore East Joint Corridor Early Works  
Lakeshore East Joint Corridor early works will be documented under a separate Early Works Report which will also include East Harbour Station.
- Lower Don Bridges & Don Yard Early Works  
Lower Don Bridges early works will be documented in the Lower Don Bridges and Don Yard Early Works Report. Don Yard is a new early works project that will include construction of Ontario Line tunnel and portal structures between Cherry Street and the Lower Don River and accompanying shift of the Richmond Hill and Lakeshore East GO tracks; installation or upgrading of retaining walls and noise barriers, where appropriate; and utility and signal infrastructure relocation or protection. The initial draft of the Lower Don Bridges and Don Yard Early Works Report is anticipated to be shared with Hiawatha First Nation in mid to late April.
- Corktown Station Early Works  
Corktown Station is a new early works project. Further information on Corktown Station early works is provided below.

### Environmental Impact Assessment Report

The main report produced as part of this process is the Environmental Impact Assessment Report. It will cover the construction and operation of the Ontario Line. The report will include a final description of the Ontario Line Project, environmental impact evaluation results, mitigation measures, monitoring activities, potentially required permits and approvals and other components as outlined in O. Reg. 341/20.

## **Work along the Don River and within the vicinity of the Don Valley**

Metrolinx appreciates the significance of waterways to Hiawatha First Nation. As such, Metrolinx is preparing an information letter specific to work occurring near or along the Don River and within the Valley. Metrolinx will provide details about the scope of work and anticipated natural environmental and archaeological assessments. Metrolinx is committed to exploring opportunities for Hiawatha First Nation to participate in these assessments should Hiawatha First Nation express interest.

## **Corktown Station Early Works**

The Corktown Station site has been identified for launching tunnel excavation equipment for the downtown and Don Yard segments of the proposed Ontario Line alignment, as well as the location for the Corktown Station. The First Parliament site, located within the Corktown Station area, is a known archaeological site which requires additional archaeological study ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures, followed by completion of necessary archaeological studies, is required. Completion of this preparatory work on an expedited basis is essential to allow for the timely delivery of the overall Project.

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These activities will enable completion of environmental due diligence investigations, including archaeological assessments. These activities will occur on properties within the Corktown Station early works project footprint, as shown in **Figure 2**.

Environmental impacts of Corktown Station early works are being assessed in accordance with O. Reg. 341/20.

Metrolinx is sharing the initial draft of the Corktown Station Early Works Report, including the Corktown Station Natural Environment Report, via the Dropbox link enclosed in the email for Hiawatha First Nation's review. The Corktown Station Early Works Report documents the assessment of Corktown Station early works. It also outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures, and a consultation record. For a summary of the potential mitigation measures identified, please see the table found as **Attachment 2**.

Note that the initial draft of the report enclosed in the email currently does not include information on noise and vibration as the Corktown Station Noise and Vibration Report is still being prepared. The initial draft of the Corktown Station Noise and Vibration Report is anticipated to be shared with Hiawatha First Nation on **March 19, 2021** for review.

Metrolinx welcomes any comments or feedback on the initial draft of the Corktown Station Early Works Report from Hiawatha First Nation. Please provide these in writing no later than **April 15, 2021**.

Based on our currently anticipated schedule (**Figure 1**), the Notice of Publication of Draft Corktown Station Early Works Report is planned for late-April 2021, at which point the draft report will be available to all interested parties for review, including Hiawatha First Nation, the public and regulatory agencies.

### Archaeology

As outlined above, archaeological assessments are anticipated to take place as part of advancing Corktown Station Early Works. Metrolinx would appreciate any interest Hiawatha First Nation may have in participating in planned future archaeological fieldwork for this site. The maps in **Attachment 3** illustrate the areas that will be subject to future archaeological assessments that include fieldwork. Upon receipt of Hiawatha First Nation's interest in participating, Metrolinx will work to coordinate your Nation's involvement.

Metrolinx acknowledges that Hiawatha First Nation should be aware of and engaged regarding any future archaeological work, especially the discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will ensure that future archaeological assessments are provided to Hiawatha First Nation in draft form, prior to submission to MHSTCI.

### **Engagement**

Metrolinx is committed to an open, respectful, and transparent relationship with Hiawatha First Nation. We appreciate the significant volume of documents related to this Project that have been shared with Hiawatha First Nation. We are happy to assist in the review of these documents by meeting with Hiawatha First Nation or working to address any questions that Hiawatha First Nation may have about this Project. If you require additional information or materials or if you wish to discuss these Projects in more detail or set up a meeting, please contact Fallon Melander, Manager of Metrolinx's Indigenous Relations Office at [IndigenousRelations@metrolinx.com](mailto:IndigenousRelations@metrolinx.com).

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*. Thank you for your time in reviewing these assessments.

Thank you for your time in reviewing this letter.

If clarification is required regarding regulatory requirements, the appropriate regulatory agencies will be consulted.

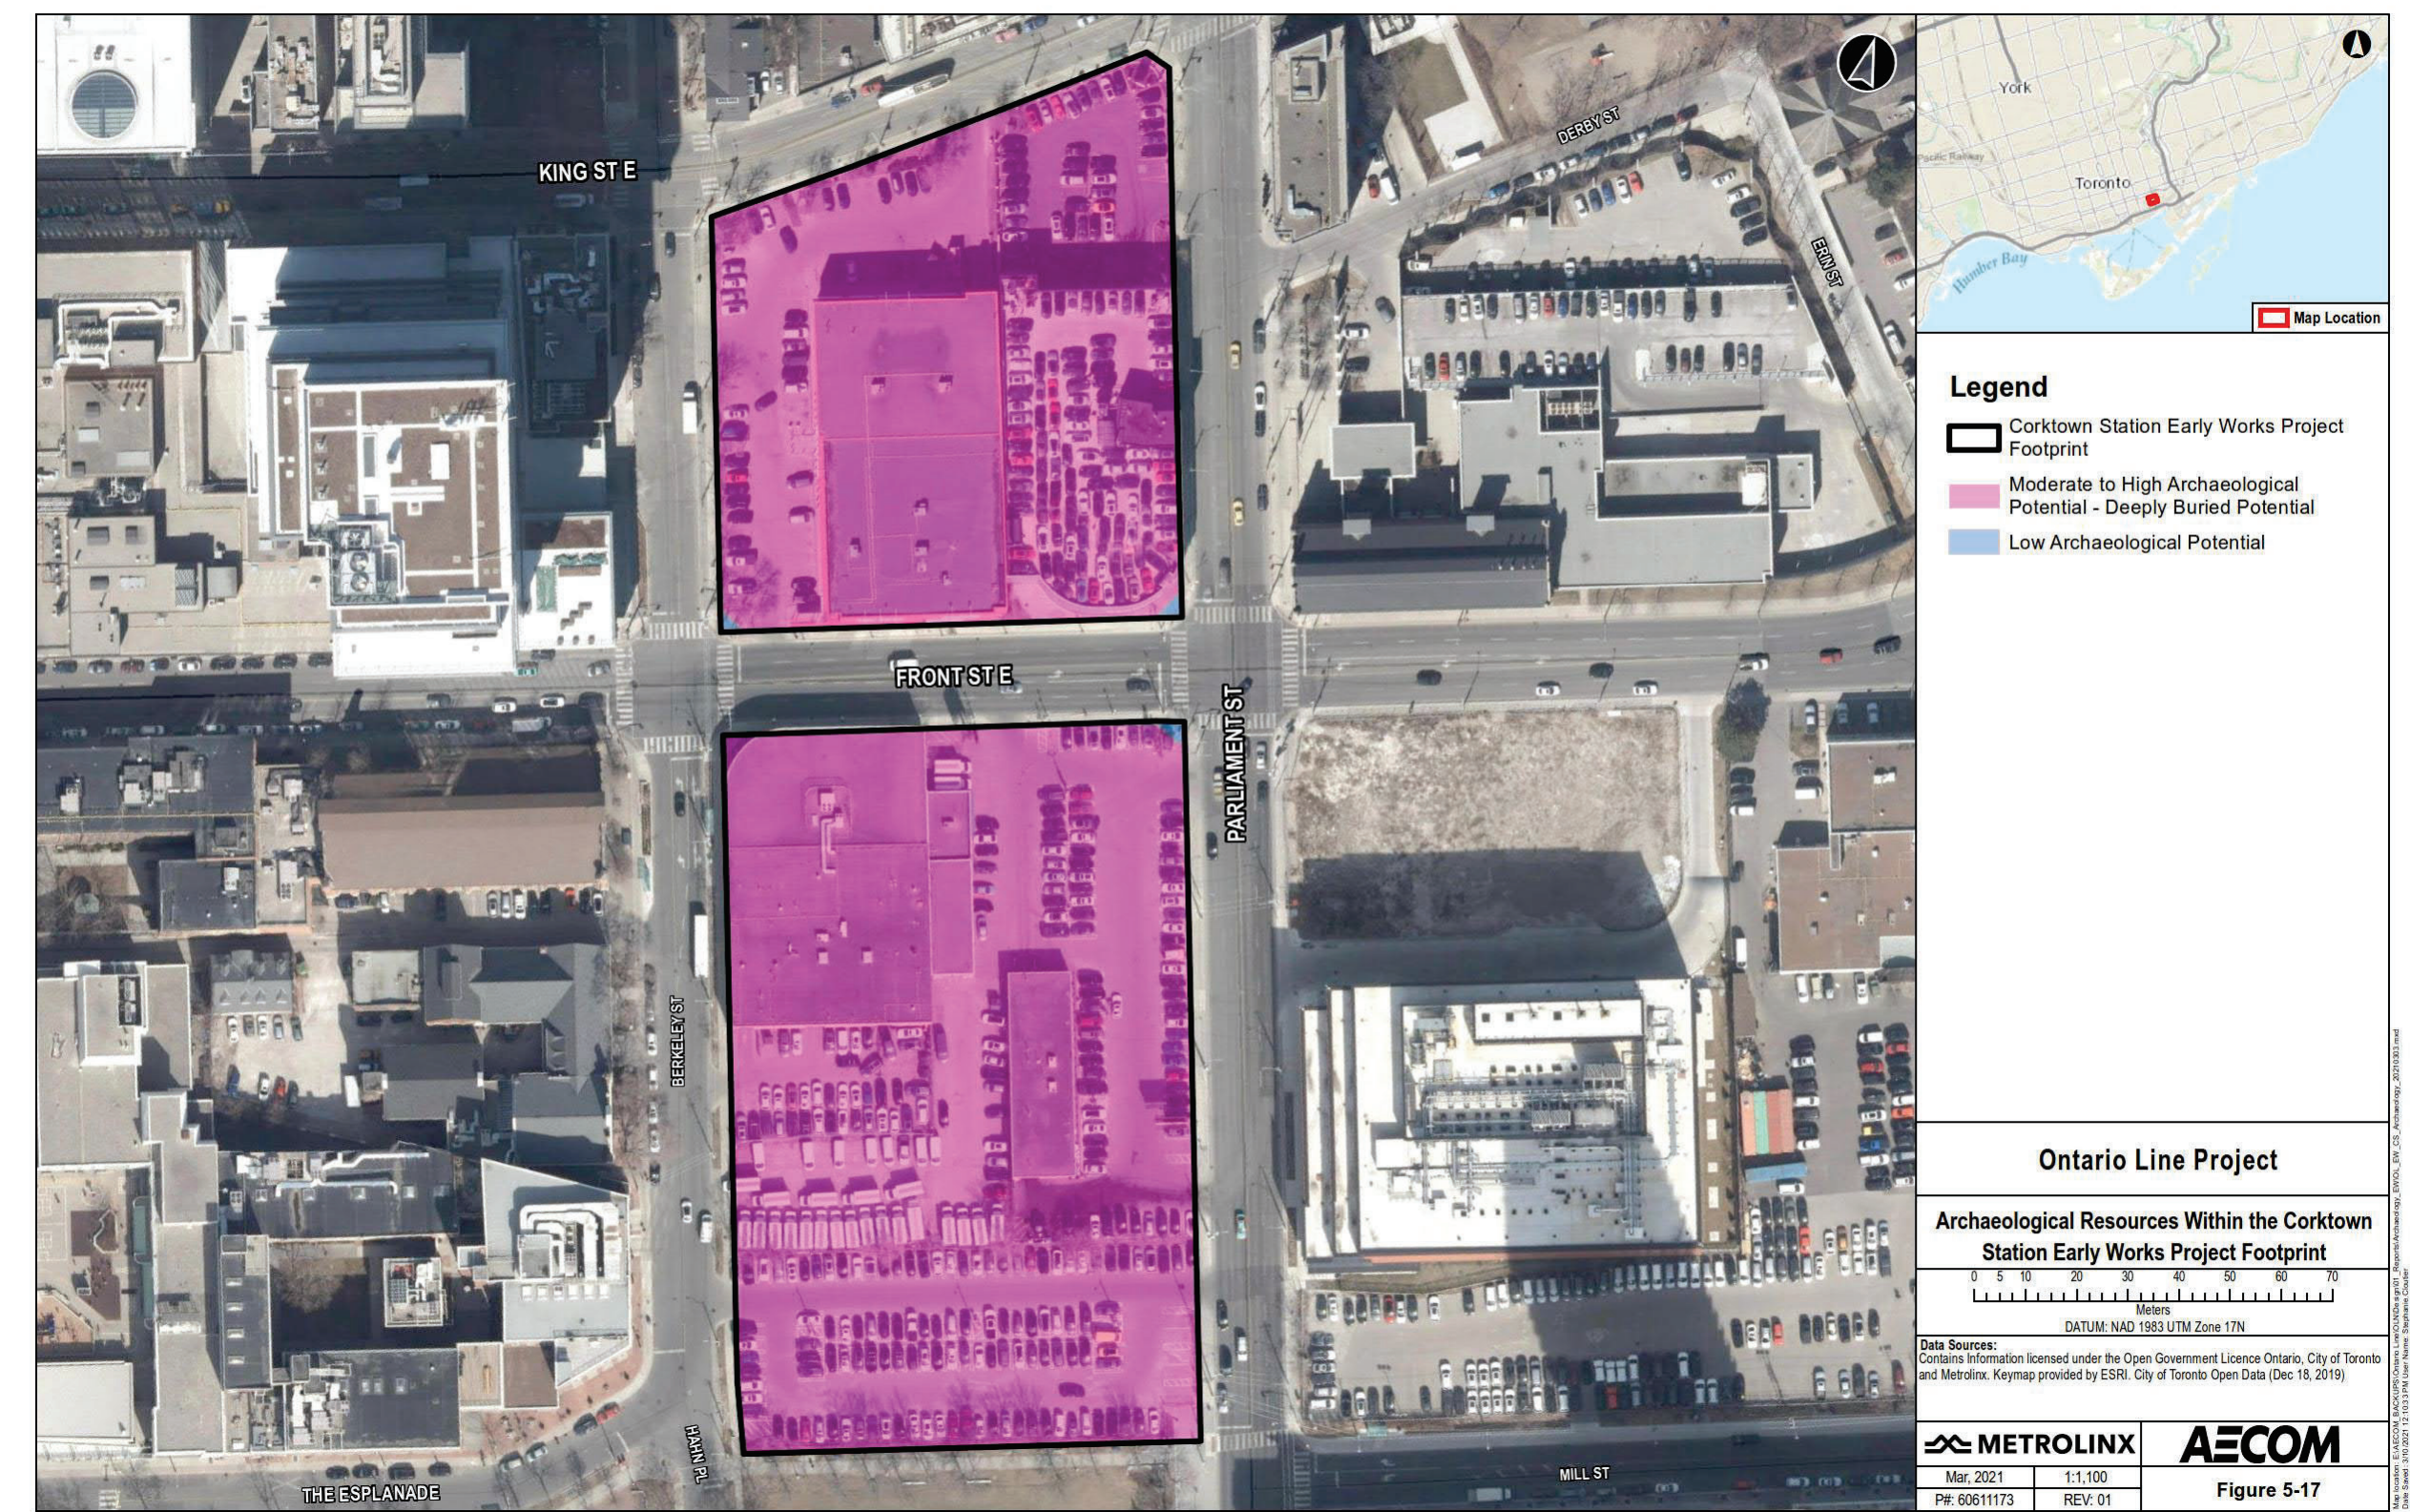

Table 6-8: Potential Impacts, Mitigation Measures and Monitoring Activities – Archaeological Resources

| Environmental Component  | Potential Impact                                                                                                                                                            | Mitigation Measure(s)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Monitoring Activities                                                                                                                                                                                                          |
|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Archaeological Potential | <ul style="list-style-type: none"><li>Potential for the disturbance of registered archaeological sites and/or archaeological resources not previously identified.</li></ul> | <ul style="list-style-type: none"><li>Areas identified as retaining archaeological potential in the Corktown Station Early Works Project Footprint, as per the Ontario Line South Stage 1 Archaeological Assessment Report (AECOM, 2020c), are shown in <b>Figure 5-17</b>, and include the following. Should ground disturbing activities<sup>29</sup> be planned within these areas, further archaeological assessment must be completed prior to any ground disturbing activities.<ul style="list-style-type: none"><li>The majority of the Corktown Station Early Works Project Footprint on either side of Front Street retains moderate to high archaeological potential where deeply buried archaeological potential remains, such as for discovering pre-contact Indigenous materials and/or materials related to the early development and expansion of the City of Toronto, including the First and Second Parliament Buildings, the Home District Gaol, and the Consumers’ Gas company buildings.</li></ul></li><li>Given the significance of the First Parliament Site, all previous site specific archaeological assessments should be reviewed to determine what additional archaeological work is required.</li><li>Any additional Archaeological Assessments (e.g., Stage 2, Stage 3 if recommended by the Stage 2) shall be completed as early as possible, and prior to any ground disturbing activities. ---

Dear Mr. Gros-Louis,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. Attached you will find a letter providing an update on the project. The purpose of this letter is to share the Draft Corktown Station Early Works Report (EWR) prepared for the Ontario Line Project and provide a continued invitation for feedback.

In an effort to streamline your review, we draw your attention to the attachment which provides an overview of the expected environmental impacts and proposed mitigations, as we know this may be of specific interest to you.

We ask that you provide any comments no later than June 11, 2021.

The reports are available at the following link:

We appreciate the volume of documents that Metrolinx has shared with your Nation. If you have any questions or concerns, please do not hesitate to contact the Indigenous Relations Office.

Miigwetch,

Fallon

## Notice of Publication of Draft Corktown Station Early Works Report Ontario Line Project

### The Project

The Ontario Line will bring 15.6 kilometres of new subway service to Toronto to make it faster and easier for people to get where they need to be each day. The line will stretch across the city, from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line is proposed to include 15 potential stations, including six interchange stations, and connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 of its stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable commutes.

### Corktown Station Early Works

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These early works are being advanced to prepare the site for future construction staging and laydown to support tunneling and below ground construction activities, and work associated with the future Corktown Station.

The First Parliament site, located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail), and remnants of early Toronto industry may be found here.

Metrolinx is eager to unlock the potential of the site and work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

Environmental impacts of Corktown Station early works are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*. In accordance with Section 8 of O. Reg. 341/20, Metrolinx has prepared the Draft Corktown Station Early Works Report (EWR) that is now available for public review.

The Draft EWR documents the assessment of Corktown Station early works. The report outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures and a consultation record.

### **The Draft Early Works Report Review and Consultation Process**

Effective **May 12, 2021**, the Draft Corktown Station EWR will be available for review on the project webpage ([www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)).

As we temporarily shift to virtual open houses, please join us online from **May 12 to June 11, 2021** to find out more about and provide your feedback on the Draft Corktown Station EWR via the webpage form.

Those who wish to provide comments on the Draft Corktown Station EWR must do so by **June 11, 2021** and submit them using the webpage form or address them to the following email: [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com).

Section 10 of O. Reg. 341/20 requires Metrolinx to establish an issues resolution process to attempt to resolve any concerns raised by the public or Indigenous Nations during the review period. At the end of the review period, Metrolinx will update the Draft Corktown Station EWR by adding a description of the issues resolution process, what Metrolinx did to address any concerns, and if the early works implementation timeline will be impacted as a result of addressing concerns. Metrolinx will then publish the Final Corktown Station EWR on the project webpage: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline) and issue a Notice of Publication of Final Corktown Station EWR.

To obtain a copy of the Draft Corktown Station EWR, please contact the project email listed above.

**Josh Vandezande (T: 416-202-5100, E: [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com)) may be contacted on behalf of Metrolinx.**

Grand Chief Rémy Vincent  
Huron-Wendat Nation  
255 Place Chef Michel Laveau  
**Delivered by email**

Dear Grand Chief Vincent,

**RE: Ontario Line Project - Notice of Publication of Draft Corktown Station Early Works Report**

Metrolinx, a regional transportation agency, is helping to transform the way the Greater Golden Horseshoe region moves by building a fast, convenient and integrated transit network. As part of this work, Metrolinx is proceeding with the Ontario Line which will bring 15.6 kilometres of subway service to Toronto. The purpose of this letter is to share information regarding the Ontario Line project with Huron-Wendat Nation.

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Huron-Wendat Nation. Metrolinx appreciates and respects Huron-Wendat Nation's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to share with Huron-Wendat Nation the Draft Corktown Station Early Works Report (EWR).

**Project Description**

The Ontario Line will stretch from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line is proposed to include 15 stations, including six interchange stations, and connections to three GO train lines, two existing subway lines, the Eglinton Crosstown LRT, and streetcar lines. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable commutes. More information on the Project can be found on our website:  
[www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)

The initial draft of the Corktown Station EWR and a letter outlining Corktown Station early works were shared with Huron-Wendat Nation on March 11, 2021. As outlined in the letter, environmental impacts of the Ontario Line Project are being assessed in

accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*.

## Draft Corktown Station Early Works Report

In accordance with Section 8 of O. Reg. 341/20, Metrolinx has prepared a Draft Corktown Station EWR that documents the assessment of Corktown Station early works.

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These early works are being advanced to prepare the site for future construction staging and laydown to support tunneling and below ground construction activities, and work associated with the future Corktown Station. The location of the Corktown Station early works project footprint and study area can be viewed below in **Figure 1**.

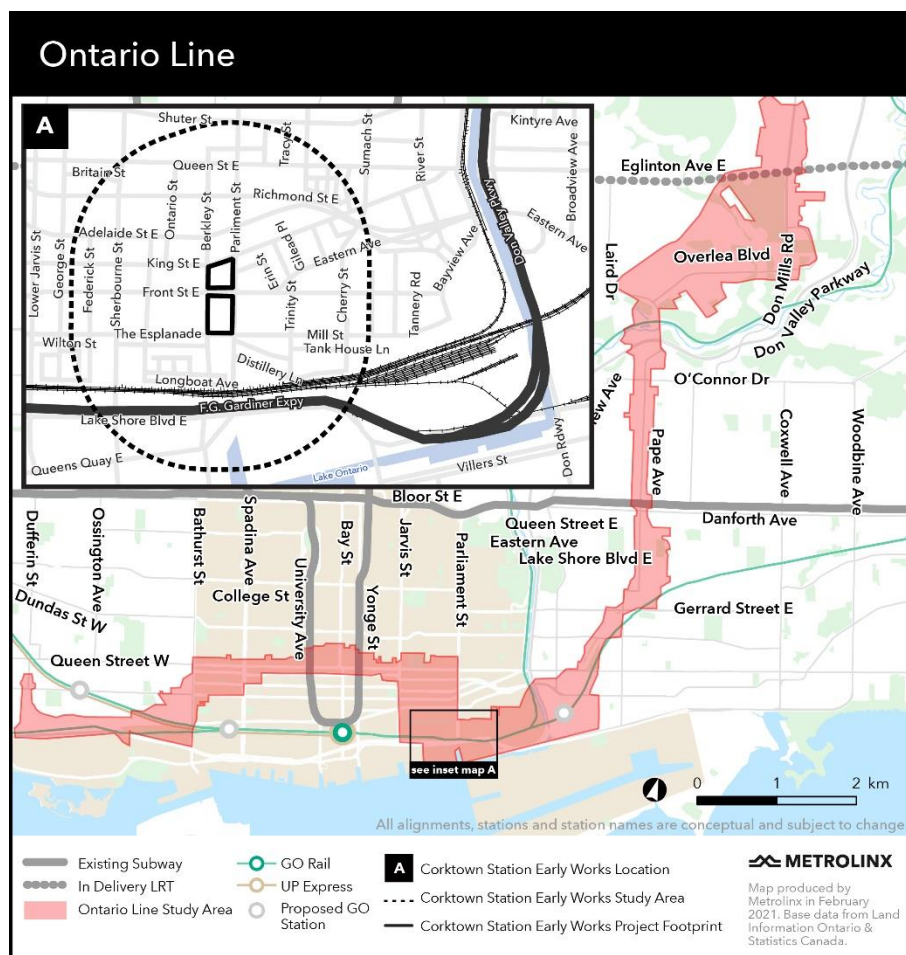

Figure 1: Map of Corktown Station Early Works

10 Bay Street  
Toronto, ON M5J 2N8

metrolinx.com

The First Parliament site, located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail) and remnants of early Toronto industry may be found here. Metrolinx is eager to work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

The EWR documents the assessment of Corktown Station early works and outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures, and a consultation record.

The Draft EWR is available for your review and can be found via the Dropbox link shared in the body of the email that is associated with this letter. We welcome any additional comments you may have on the Draft EWR. The Draft EWR is available for review and comment starting **May 12, 2021** and ending on **June 11, 2021**. The Notice of Publication of Draft Corktown Station EWR is provided in **Attachment 1**. The Draft EWR will be updated following the review period, and the Final EWR will be published on the Project webpage ([www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)) and shared with Huron-Wendat Nation.

#### Potential Impacts and Mitigation Measures

The tables found enclosed in **Attachment 2 and 3** provide a summary of natural environment and archaeology potential impacts and mitigation measures identified as part of the Draft EWR that may be of interest to *Huron-Wendat Nation*. If *Huron-Wendat Nation* has any feedback about these potential impacts and/or mitigation strategies, or any other aspects of the Ontario Line, we welcome the opportunity to discuss further.

#### Revisions to the Initial Draft of the Corktown Station Early Works Report

In accordance with O. Reg. 341/20, Metrolinx has now incorporated comments and feedback from the initial round of engagement with Indigenous Nations and agencies on the initial draft of the Corktown Station EWR into the Draft EWR.

To streamline capacity for Huron-Wendat Nation to provide comments or feedback, a summary of revisions to the EWR since the circulation of the initial draft of the EWR is as follows:

- Minor editorial changes to address grammatical and syntax errors and updates to reflect comments received from agencies;
- Clarification that the project operations, construction of Corktown Station and other project components will be assessed in the Ontario Line Environmental Impact Assessment Report;
- Inclusion of information on the Parkland Strategy (City of Toronto, 2019), First Parliament Master Plan (City of Toronto, 2020) and additional information on planned community services and facilities in the Corktown Station Early Works Study Area;
- Edits to the text to reflect that the Ministry of Heritage, Sport, Tourism and Culture Industries' (MHSTCI) Minister's Consent has been granted for the demolition and removal of the non-heritage buildings at 265 Front Street East and removal of the heritage attributes at 265 Front Street East, 271 Front Street East and 25 Berkeley Street located on the First Parliament Site, and affirming Metrolinx's commitment to fulfilling the conditions outlined in the Minister's Consent, including completion of archaeological requirements;
- Additional mitigation measures for environmental disciplines such as archaeology, air quality and traffic and transportation, that include:
  - Coordination and completion of required archaeological investigations, early works activities and/or activities that have the potential for vibration effects such that buried archaeological resources are appropriately considered;
  - Use of non-chloride dust suppressants; and
  - Consultation with the City of Toronto to minimize potential impacts during special events (e.g., the Toronto Christmas Market at the Distillery District) should closures or long-term impacts be required.
- Revision of traffic and transportation figures to include additional information such as intersection names and inclusion of an additional noise and vibration figure to show representative receptor locations.

## Engagement

Metrolinx is committed to an open, respectful, and transparent relationship with Huron-Wendat Nation. We appreciate the significant volume of documents related to this Project that have been shared with Huron-Wendat Nation. We are happy to assist in the review of these documents by meeting with Huron-Wendat Nation or working to address any questions that Huron-Wendat Nation may have about this Project. If you require additional information or materials or if you wish to discuss these Projects in more detail or set up a meeting, please do not hesitate to contact me at your earliest convenience.

Metrolinx welcomes any comments or feedback on the Draft EWR from Huron-Wendat Nation. Please provide these in writing no later than **June 11, 2021**.

Comments and information regarding this draft report will be collected to assist in meeting the requirements of the *Environmental Assessment Act* and may be included in study documentation. With the exception of personal information, all comments will become part of the public record. Kindly note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*.

Thank you for your time in reviewing this letter.

Yours Truly,

A handwritten signature in dark ink, appearing to read 'f. melander'.

---

Dear Ms. Vincent, Mr. Gros-Louis, and Mr. Lesage,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. We recently communicated with your Nation about the proposed Corktown Station which is along the planned alignment of the Ontario Line. This location includes parcels of land which were once the site of Upper Canada's First Parliament buildings. Metrolinx and its partners are exploring opportunities to commemorate the history of this site, and have been engaging with various parties including the City of Toronto and the Mississaugas of the Credit First Nation, on whose treaty territory this project is occurring.

Given the significant chance of recovering Indigenous and European artifacts during the Corktown Station Early Works, a detailed archaeological workplan is being developed. Metrolinx recognizes the importance and value of Indigenous monitors for any archaeology related to the Ontario Line Project. In our previous communication, an invitation was included for your Nation to participate in any archaeological fieldwork and monitoring during the Corktown Station Early Works, including demolition of modern buildings currently on the First Parliament site.

This work is anticipated to commence in Fall 2021, and if you have not yet expressed interest in participating, please feel free to do so at your earliest convenience. As a reminder any comments on the draft Corktown Station Early Works Report should be provided no later than **April 15, 2021**.

Metrolinx recognizes that the history of this location extends beyond European use, and as such, wants to take the opportunity to understand any significance it may have to Indigenous Nations. Metrolinx would like to meet with your Nation to discuss the First Parliament site, its commemoration, as well as review the broader Ontario Line project if you wish. We recognize that traditional knowledge of this area may be sacred and/or not appropriate to be shared, but would appreciate any information that may be appropriate for Metrolinx to consider.

We would very much appreciate meeting with your Nation to discuss in more detail. Please let me know if you have any questions or concerns.

Miigwetch,

Fallon

**Delivered by email**

Dear Grand Chief Vincent,

**RE: Ontario Line Project - First Parliament Site and Lime Kiln Site**

Metrolinx, a regional transportation agency, is helping to transform the way the Greater Golden Horseshoe moves by building a fast, convenient and integrated transit network. As part of this work, Metrolinx is continuing the pre-construction planning of the Ontario Line which will bring nearly 16 kilometres of subway service to Toronto.

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Huron-Wendat Nation. Metrolinx appreciates and respects Huron-Wendat Nation's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to share with Huron-Wendat Nation information regarding Corktown Station early works and additional information regarding upcoming field visits and investigations at the Corktown Station early works site, which includes two registered archaeological sites, the First Parliament site and the Lime Kiln site.

**Project Description**

The proposed Ontario Line is a new 16-kilometer subway line, which will occupy an exclusive right-of-way system encompassing a combination of below-grade, above-grade, and at-grade alignment. The route (Figure 1) will run from Ontario Place/Exhibition through downtown Toronto to the Ontario Science Centre in the City of Toronto, with six (6) potential interchange stations and 17 new connections to GO Transit, existing subways and streetcars. More information on the Project can be found on our website: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)

**Corktown Station Early Works**

As communicated in the letter sent to Huron-Wendat Nation on March 11, 2021, the Corktown Station site has been identified for launching tunnel excavation equipment

for the downtown and Don Yard segments of the proposed Ontario Line alignment, as well as the location of the Corktown Station. The First Parliament and Lime Kiln Sites, located within the Corktown Station area, are known archaeological sites which require additional archaeological study ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures, followed by completion of necessary archaeological studies, is required. Completion of this preparatory work on an expedited basis is essential to allow for the timely delivery of the overall Project and is anticipated to begin in the Fall 2021, subject to the completion of the Corktown Station early works process in accordance with Ontario Regulation 341/20: Ontario Line Project.

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These activities will enable completion of environmental due diligence investigations, including archaeological assessments. These activities will occur on properties within the Corktown Station early works project footprint, as shown in **Figure 1**.

Figure 1: Map of Corktown Station Early Works

Environmental impacts of Corktown Station early works are being assessed in accordance with O. Reg. 341/20. Metrolinx shared the draft Corktown Station Early

Works Report and associated discipline reports with Huron-Wendat Nation on March 11, 2021 and had requested any comments to be provided by April 9, 2021.

## Archaeological Work at the First Parliament Site and Lime Kiln Site

Metrolinx appreciates the significance of archaeology to Huron-Wendat Nation. The properties at 265 Front Street East, 271 Front Street East, and 25 Berkeley Street, in the St. Lawrence neighbourhood of the City of Toronto, are collectively host to the First Parliament Site. It is located on the southwest corner of Parliament Street and King Street, between Parliament Street and Berkeley Street. The First Parliament Site is a registered archaeological site (AjGu-41) which may include resources associated with the First and Second Parliament Buildings, the Home District Gaol, and Consumers' Gas company buildings. The surface of the property is currently occupied by automotive businesses, including a car dealership, car wash, and surface parking lot. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and remnants of early Toronto industry may be found at this site.

North of the First Parliament Site is another registered archaeological site (AjGu-64), the Lime Kiln Site, which includes remains from the Toronto Lime Works Company. A variety of structural features, in various states of preservation, have been documented on this site. The location of the Lime Kiln Site and the First Parliament Site are shown in **Figure 2**.

Figure 2: Location of First Parliament Site and Lime Kiln Site Areas

The First Parliament Site and Lime Kiln Site require additional archaeological studies ahead of any ground disturbance activities. To prepare the Corktown Station site,

demolition of existing buildings and structures is necessary. Completion of this preparatory work is essential to allow for the timely delivery of the Ontario Line.

Archaeological fieldwork to remove or protect archaeological resources is anticipated to commence in early Fall 2021, and a workplan for these archaeological investigations is under development. As mentioned in the letter sent on March 11, 2021, Huron-Wendat Nation is invited to participate in all archaeological fieldwork, and to review and provide comments on forthcoming reports.

### **Feedback on Commemoration of First Parliament Site**

Metrolinx appreciates that the history of the First Parliament site is not one simply of Canadian origin, but rather holds longer history and tradition. Metrolinx also appreciates that the site of the First Parliament of Upper Canada is linked to a history of colonization and harmful practices towards Indigenous Peoples. Given the significance of this site, Metrolinx is engaging with Indigenous Nations, City of Toronto and the broader community to identify opportunities for commemoration. Metrolinx is committed to ensuring that any feedback from Huron-Wendat Nation regarding the significance of this site is considered as part of this commemoration. Metrolinx appreciates that traditional or cultural knowledge about this site may be sacred and/or not be appropriate to be shared but welcomes any comments or ideas from Huron-Wendat Nation that may be appropriate to commemorate Indigenous Peoples.

### **Engagement**

Metrolinx is committed to an open, respectful, and transparent relationship with Huron-Wendat Nation. We would like to meet with Huron-Wendat Nation to better understand any significance the First Parliament site may have to your Nation. We are also happy to assist in reviewing the Corktown Station Early Works Report or reviewing the proposed archaeological workplan for this site. If Huron-Wendat Nation requires additional information or materials, or you wish to discuss this project in more detail or set up a meeting, please contact us at [IndigenousRelations@metrolinx.com](mailto:IndigenousRelations@metrolinx.com).

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*. Thank you for your time in reviewing these assessments.

Thank you for your time in reviewing this letter.

**Objet :** Ontario Line - Project Update and Draft Corktown Station Early Works Report for Review + Invitation to Participate in Archaeological Fieldwork

Dear Maxime,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. Attached you will find a letter providing an update on the project. The purpose of this letter is to:

- Provide an update on the scope of the project work
- share the initial draft of the Early Works Report for the proposed Corktown Station
- Invite your Nation to participate in upcoming archaeological fieldwork

In an effort to streamline your review, we draw your attention to the attachment which provides an overview of the expected environmental impacts and proposed mitigations, as we know this may be of specific interest to you.

Metrolinx is also preparing a letter specific to works being planned within the Don Valley as we recognize the significance of this waterway to many Nations. We hope to share that letter soon. We are happy to meet with your Nation to discuss the Ontario Line and address any questions or concerns that your Nation may have.

We ask that any comments on the draft Corktown Station Early Works Report be provided no later than **April 15, 2021**. Please note that the Noise and Vibration Report, which will be part of the Early Works Report is still being prepared and we will share with your Nation by March 19, 2021.

The draft Corktown Station Early Works Report is available at the following link:

[REDACTED]

Please let us know as soon as possible if your Nation has interest in participating in future archaeological fieldwork.

We appreciate the volume of documents that Metrolinx has shared with your Nation.

If you have any questions or concerns, please do not hesitate to contact me.

Miigwetch,

Fallon

Huron-Wendat Nation  
255 Place Chef Michel Laveau  
**Delivered by email**

Dear Grand Chief Vincent,

## **RE: Ontario Line Project - Corktown Station Early Works Report**

Metrolinx, a regional transportation agency, is helping to transform the way the Greater Golden Horseshoe region moves by building a fast, convenient and integrated transit network. As part of this work, Metrolinx is proceeding with the Ontario Line which will bring nearly 16 kilometres of subway service to Toronto. The purpose of this letter is to share information regarding the Ontario Line project with Huron-Wendat Nation.

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Huron-Wendat Nation. Metrolinx appreciates and respects Huron-Wendat Nation's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to share with Huron-Wendat Nation information regarding Corktown Station early works and invite feedback on the initial draft of the Corktown Station Early Works Report.

## **Project Description**

The Project is a new subway line with connections to Line 1 (Yonge-University) subway service at Osgoode and Queen Stations, Line 2 (Bloor-Danforth) subway service at Pape Station, and Line 5 (Eglinton Crosstown) service at the future Science Centre Station. Fifteen stations are proposed, with additional connections to three GO Transit lines (Lakeshore East, Lakeshore West and Stouffville), and the Queen, King, Bathurst, Spadina, Harbourfront and Gerrard/Carlton streetcar routes. The Project will reduce crowding on Line 1 and provide connections to new high-order rapid transit neighbourhoods. More information on the Project can be found on our website: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)

## **Ontario Line Environmental Assessment Process and Reports**

In 2020, Metrolinx provided Huron-Wendat Nation with an outline of the Ontario Line environmental assessment process. The environmental assessment for the Ontario

Line Project is being completed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20) made under the *Environmental Assessment Act*. The regulation outlines a Project-specific environmental assessment that includes an Environmental Conditions Report, an Environmental Impact Assessment Report and provides opportunity for Early Works Reports for assessment of works that are ready to proceed in advance of the Environmental Impact Assessment Report. An overview of the reports is outlined below and their anticipated publication timeline is provided in **Attachment 1**.

### Environmental Conditions Report

The Environmental Conditions Report characterizes existing environmental conditions within the Ontario Line study area through a combination of desktop review and field studies and was finalized in November 2020. The report also summarizes potential impacts and mitigation measures for consideration during project planning and design. Potential impacts and mitigation measures identified in the Environmental Conditions Report will be confirmed and refined within the Early Works Reports and the Environmental Impact Assessment Report.

### Early Works Reports

Metrolinx is assessing several early works components to support the main construction of the Ontario Line project. Early works are components of the Ontario Line Project that are anticipated to be ready to proceed before completion of the Environmental Impact Assessment Report, such as station construction, rail corridor expansion, utility relocation or bridge replacement or expansion, as defined in O. Reg. 341/20.

Initially, the early works required to support the Ontario Line project were assessed in a single report, which was shared in June 2020 and included Exhibition Station, Lower Don Bridges, Lakeshore East Joint Corridor and East Harbour early works.

Since then, the single Early Works Report has been split into several Early Works Reports, each covering either a single early works location or multiple locations if they are in close proximity. Each Early Works Report provides a description of the early works and alternatives considered, documents local environmental conditions, and outlines early works-specific environmental impacts, mitigation measures, monitoring activities, potentially required permits and approvals and other components.

It is important to note that two new early works projects, Don Yard and Corktown Station, have been added as well. The Early Works Reports, including this new scope of work are summarized below:

- [Exhibition Station Early Works](#)  
Exhibition Station early works are documented in the Exhibition Station Early Works Report, finalized in February 2021.
- [Lakeshore East Joint Corridor Early Works](#)  
Lakeshore East Joint Corridor early works will be documented under a separate Early Works Report which will also include East Harbour Station.
- [Lower Don Bridges & Don Yard Early Works](#)  
Lower Don Bridges early works will be documented in the Lower Don Bridges and Don Yard Early Works Report. Don Yard is a new early works project that will include construction of Ontario Line tunnel and portal structures between Cherry Street and the Lower Don River and accompanying shift of the Richmond Hill and Lakeshore East GO tracks; installation or upgrading of retaining walls and noise barriers, where appropriate; and utility and signal infrastructure relocation or protection. The initial draft of the Lower Don Bridges and Don Yard Early Works Report is anticipated to be shared with Huron-Wendat Nation in mid to late April.
- [Corktown Station Early Works](#)  
Corktown Station is a new early works project. Further information on Corktown Station early works is provided below.

### Environmental Impact Assessment Report

The main report produced as part of this process is the Environmental Impact Assessment Report. It will cover the construction and operation of the Ontario Line. The report will include a final description of the Ontario Line Project, environmental impact evaluation results, mitigation measures, monitoring activities, potentially required permits and approvals and other components as outlined in O. Reg. 341/20.

### **Work along the Don River and within the vicinity of the Don Valley**

Metrolinx appreciates the significance of waterways to Huron-Wendat Nation. As such, Metrolinx is preparing an information letter specific to work occurring near or along the Don River and within the Valley. Metrolinx will provide details about the scope of work and anticipated natural environmental and archaeological assessments. Metrolinx is committed to exploring opportunities for Huron-Wendat Nation to participate in these assessments should Huron-Wendat Nation express interest.

### **Corktown Station Early Works**

The Corktown Station site has been identified for launching tunnel excavation equipment for the downtown and Don Yard segments of the proposed Ontario Line alignment, as well as the location for the Corktown Station. The First Parliament site, located within the Corktown Station area, is a known archaeological site which requires additional archaeological study ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures, followed by completion of necessary archaeological studies, is required. Completion of this preparatory work on an expedited basis is essential to allow for the timely delivery of the overall Project.

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These activities will enable completion of environmental due diligence investigations, including archaeological assessments. These activities will occur on properties within the Corktown Station early works project footprint, as shown in **Figure 2**.

Figure 2: Map of Corktown Station Early Works

Environmental impacts of Corktown Station early works are being assessed in accordance with O. Reg. 341/20.

Metrolinx is sharing the initial draft of the Corktown Station Early Works Report, including the Corktown Station Natural Environment Report, via the Dropbox link enclosed in the email for Huron-Wendat Nation's review. The Corktown Station Early Works Report documents the assessment of Corktown Station early works. It also outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures, and a consultation record. For a summary of the potential mitigation measures identified, please see the table found as **Attachment 2**.

Note that the initial draft of the report enclosed in the email currently does not include information on noise and vibration as the Corktown Station Noise and Vibration Report is still being prepared. The initial draft of the Corktown Station Noise and Vibration Report is anticipated to be shared with Huron-Wendat Nation on **March 19, 2021** for review.

Metrolinx welcomes any comments or feedback on the initial draft of the Corktown Station Early Works Report from Huron-Wendat Nation. Please provide these in writing no later than **April 15, 2021**.

Based on our currently anticipated schedule (**Figure 1**), the Notice of Publication of Draft Corktown Station Early Works Report is planned for late-April 2021, at which point the draft report will be available to all interested parties for review, including Huron-Wendat Nation, the public and regulatory agencies.

### Archaeology

As outlined above, archaeological assessments are anticipated to take place as part of advancing Corktown Station Early Works. Metrolinx would appreciate any interest Huron-Wendat Nation may have in participating in planned future archaeological fieldwork for this site. The maps in **Attachment 3** illustrate the areas that will be subject to future archaeological assessments that include fieldwork. Upon receipt of Huron-Wendat Nation's interest in participating, Metrolinx will work to coordinate your Nation's involvement.

Metrolinx acknowledges that Huron-Wendat Nation should be aware of and engaged regarding any future archaeological work, especially the discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will ensure that future archaeological assessments are provided to Huron-Wendat Nation in draft form, prior to submission to MHSTCI.

### **Engagement**

Metrolinx is committed to an open, respectful, and transparent relationship with Huron-Wendat Nation. We appreciate the significant volume of documents related to this Project that have been shared with Huron-Wendat Nation. We are happy to assist in the review of these documents by meeting with Huron-Wendat Nation or working to address any questions that Huron-Wendat Nation may have about this Project. If you require additional information or materials or if you wish to discuss these Projects in more detail or set up a meeting, please feel free to contact my office at your earliest convenience at [IndigenousRelations@metrolinx.com](mailto:IndigenousRelations@metrolinx.com).

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*. Thank you for your time in reviewing these assessments.

Thank you for your time in reviewing this letter.

Yours Truly,

A handwritten signature in dark ink that reads 'f. melander'.

| Vegetation Communities                                                                                      | <ul style="list-style-type: none"><li>City and private tree removal</li></ul>                                                                                                                            | <ul style="list-style-type: none"><li>An Arborist Report by an International Society of Arboriculture Certified Arborist will be prepared, if required, in accordance with the Ontario Forestry Act R.S.O. 1990, and other regulations and best management practices as applicable.</li><li>The Arborist Report will include, but not be limited to the individual identification of all trees within the Corktown Station early works construction areas including those that require removal or preservation, or trees that may be injured. Trees to be identified may include those on Metrolinx property, trees on public and private lands, and boundary trees. City of Toronto by-laws dictate the minimum area buffers to be inventoried and Diameter at Breast Height which requires inventory.</li><li>Prior to the undertaking of tree removals, a Tree Removal Strategy/Tree Preservation Plan will be developed to document tree protection and mitigation measures that follow the City of Toronto Tree Protection Policy and Specifications for Construction Near Trees Guidelines (2016b) and adherence with best practices, standards and regulations on safety, environmental and wildlife protections.</li><li>Compensation for tree removals will be undertaken in accordance with provisions outlined in the Metrolinx Vegetation Guideline (2020).</li><li>Pruning of branches will be conducted through the implementation of proper arboricultural techniques.</li><li>Tree Protection Zone fencing will be established to protect and prevent tree injuries. Tree Protection Zones will be clearly staked prior to construction using barriers in accordance with local by-law requirements.</li></ul> | <ul style="list-style-type: none"><li>Regular inspection in areas of vegetation removal will be undertaken as required during construction to ensure that fencing is intact, only specified trees are removed and no damage is caused to the remaining trees and adjacent vegetation communities.</li><li>On-site inspection will be undertaken to confirm the implementation of the mitigation measures and identify corrective actions if required. Corrective actions may include additional site maintenance and alteration of activities to minimize impacts.</li><li>If required, the approach to compensation monitoring will be developed in accordance with Metrolinx’s Vegetation Guideline (2020).</li></ul> |

| Environmental Component                               | Potential Impact                                                                                                                                                                              | Mitigation Measure(s)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Monitoring Activities                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|-------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Vegetation Communities</b>                         | <ul style="list-style-type: none"><li>▪ Soil contamination as a result of spills (e.g., grease and/or fuel) from equipment use</li><li>▪ Introduction or spread of Invasive Species</li></ul> | <ul style="list-style-type: none"><li>▪ A Spill Prevention and Contingency Plan will be developed and adhered to. Spills will be immediately contained and cleaned up in accordance with provincial regulatory requirements and the contingency plan.</li><li>▪ Refuelling shall be done within refuelling stations lined with appropriate material to prevent seepage and fuel discharge.</li><li>▪ All machinery, construction equipment and vehicles arriving on site should be in clean condition (e.g., free of fluid leaks, soils containing seeds of plant material from invasive species) and be inspected and washed in accordance with the Clean Equipment Protocol for Industry (Halloran et al., 2013) prior to arriving and leaving the construction site in order to prevent the spread of invasive species to other locations.</li></ul>                  | <ul style="list-style-type: none"><li>▪ On-site inspection will be undertaken to confirm the implementation of the mitigation measures and identify corrective actions if required. Corrective actions may include additional site maintenance and alteration of activities to minimize impacts.</li><li>▪ Ensure precautions are being taken to minimize the spread of invasive species by implementing the Clean Equipment Protocol for Industry (Halloran et al., 2013) on equipment and machinery prior to moving sites.</li><li>▪</li></ul> |
| <b>Wildlife and Wildlife Habitat – General</b>        | <ul style="list-style-type: none"><li>▪ Disturbance, displacement or mortality of wildlife</li></ul>                                                                                          | <ul style="list-style-type: none"><li>▪ Prior to construction, investigation of the Corktown Station early works construction areas for wildlife and wildlife habitat that may have established following the completion of previous surveys will be undertaken, as appropriate.</li><li>▪ If wildlife is encountered, measures will be implemented to avoid destruction, injury, or interference with the species, and/or its habitat. For example, construction activities will cease or be reduced, and wildlife will be encouraged to move off-site and away from the construction area on its own. A qualified Biologist will be contacted to define the appropriate buffer required from wildlife.</li></ul>                                                                                                                                                       | <ul style="list-style-type: none"><li>▪ On-site inspection by on-site environmental workers or construction staff should occur daily within the construction area to ensure that no wildlife is trapped within the construction area.</li><li>▪ On-site inspection will be undertaken to confirm the implementation of the mitigation measures and identify corrective actions if required. Corrective actions may include additional site maintenance and alteration of activities to minimize impacts.</li></ul>                               |
| <b>Significant Wildlife Habitat: Common Nighthawk</b> | <ul style="list-style-type: none"><li>▪ Removal of candidate nesting habitat for Common Nighthawk</li></ul>                                                                                   | <ul style="list-style-type: none"><li>▪ Refer below to mitigation measures described for Migratory Breeding Birds and Nests.</li><li>▪ Demolition of buildings should be scheduled outside of the breeding bird season of April 1 to August 31. If this is not possible and buildings must be demolished during this period, the following will be completed:</li><li>▪ The roofs will be checked for presence of gravel. If gravel is not present, then the building is unlikely to provide suitable nesting habitat for Common Nighthawk. If gravel is present, a search for eggs and nesting activity for Common Nighthawk on the roof will be conducted. If nests or nesting activity of Common Nighthawk are confirmed, the building cannot be demolished until it is confirmed by a Qualified Biologist that young have fully fledged and left the nest.</li></ul> | <ul style="list-style-type: none"><li>▪ Refer below for monitoring requirements described for Migratory Breeding Birds and Nests.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                      |
| <b>Migratory Breeding Birds and Nests</b>             | <ul style="list-style-type: none"><li>▪ Disturbance or destruction of migratory bird nests</li></ul>                                                                                          | <ul style="list-style-type: none"><li>▪ All works must comply with the Migratory Birds Convention Act, including timing windows for the nesting period (April 1 to August 31 in Ontario).</li><li>▪ If activities are proposed to occur during the general nesting period, a breeding bird and nest survey will be undertaken prior to required activities. Nest searches by an experienced searcher are required and will be completed by a qualified Biologist no more than 48 hours prior to vegetation removal.</li><li>▪ If a nest of a migratory bird is found outside of this nesting period (including a ground nest) it still receives protection.</li></ul>                                                                                                                                                                                                    | <ul style="list-style-type: none"><li>▪ Regular monitoring (field observations, on-site inspections) will be undertaken to confirm that activities do not encroach into nesting areas or disturb active nesting sites.</li></ul>                                                                                                                                                                                                                                                                                                                 |

If clarification is required regarding regulatory requirements, the appropriate regulatory agencies will be consulted.

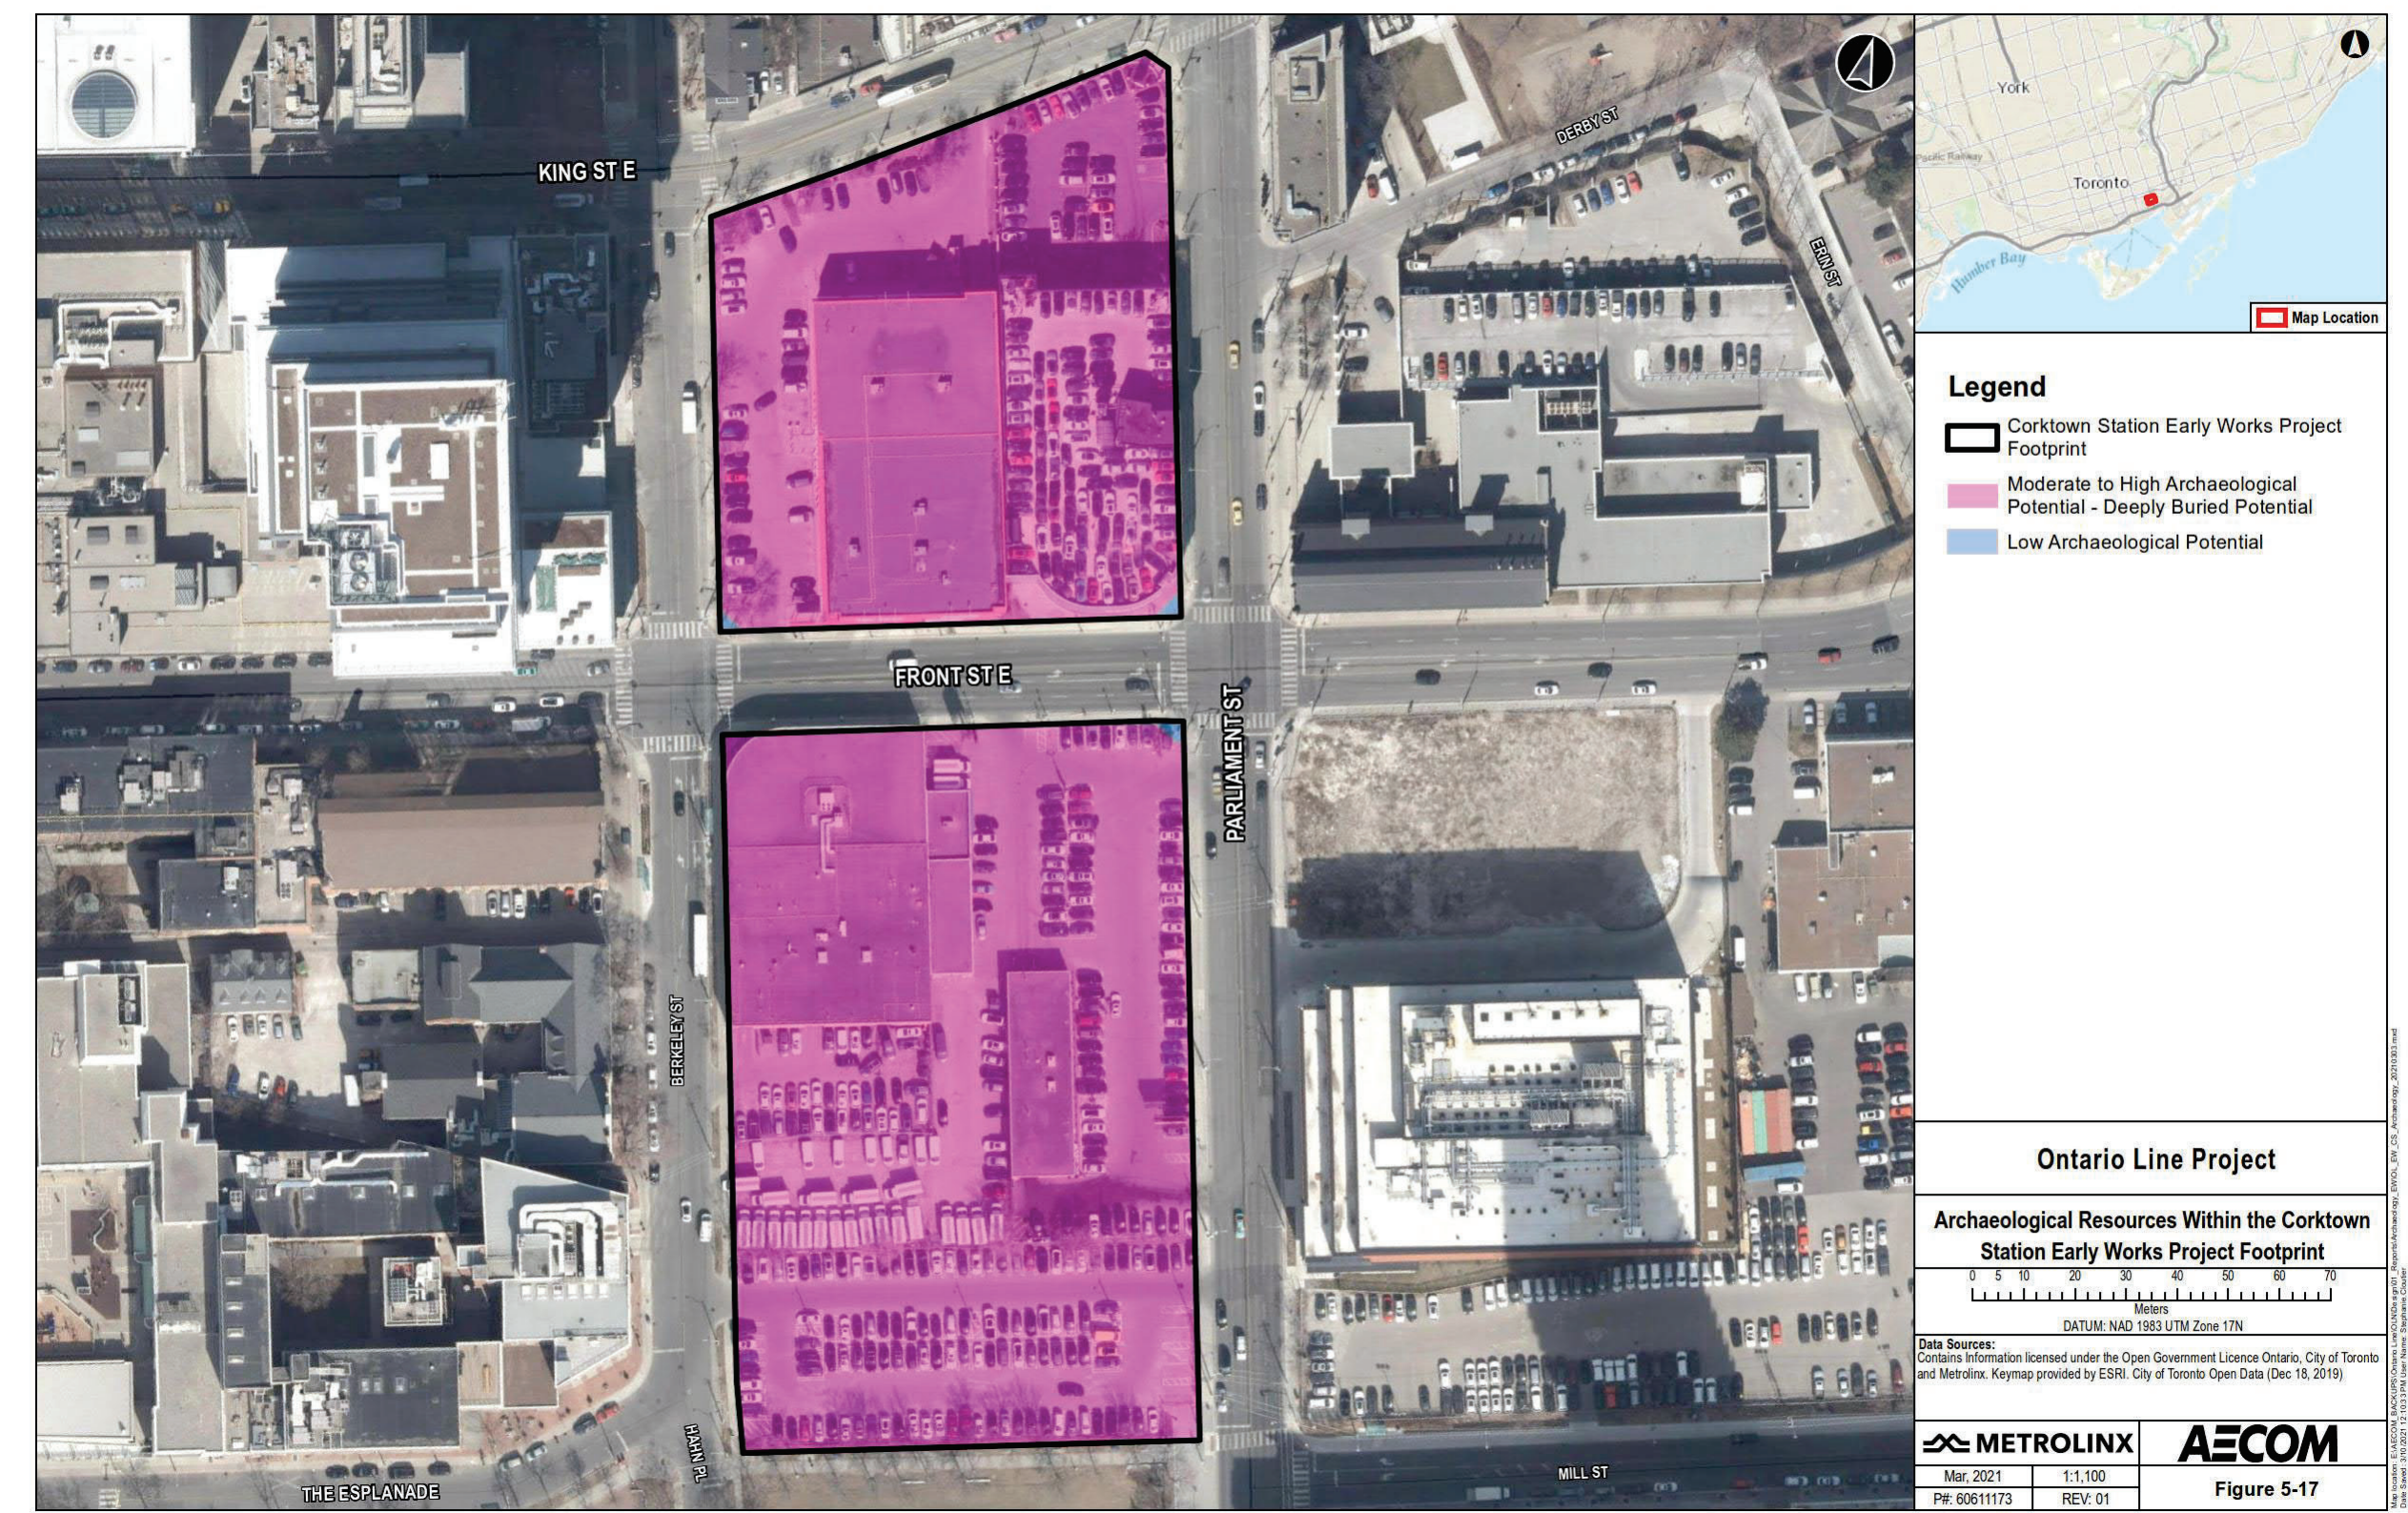

Table 6-8: Potential Impacts, Mitigation Measures and Monitoring Activities – Archaeological Resources

| Environmental Component  | Potential Impact                                                                                                                                                            | Mitigation Measure(s)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Monitoring Activities                                                                                                                                                                                                          |
|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Archaeological Potential | <ul style="list-style-type: none"><li>Potential for the disturbance of registered archaeological sites and/or archaeological resources not previously identified.</li></ul> | <ul style="list-style-type: none"><li>Areas identified as retaining archaeological potential in the Corktown Station Early Works Project Footprint, as per the Ontario Line South Stage 1 Archaeological Assessment Report (AECOM, 2020c), are shown in <b>Figure 5-17</b>, and include the following. Should ground disturbing activities<sup>29</sup> be planned within these areas, further archaeological assessment must be completed prior to any ground disturbing activities.<ul style="list-style-type: none"><li>The majority of the Corktown Station Early Works Project Footprint on either side of Front Street retains moderate to high archaeological potential where deeply buried archaeological potential remains, such as for discovering pre-contact Indigenous materials and/or materials related to the early development and expansion of the City of Toronto, including the First and Second Parliament Buildings, the Home District Gaol, and the Consumers’ Gas company buildings.</li></ul></li><li>Given the significance of the First Parliament Site, all previous site specific archaeological assessments should be reviewed to determine what additional archaeological work is required.</li><li>Any additional Archaeological Assessments (e.g., Stage 2, Stage 3 if recommended by the Stage 2) shall be completed as early as possible, and prior to any ground disturbing activities. This work shall be done in accordance with the Ministry of Heritage, Sport, Tourism and Culture Industries’ Standards and Guidelines for Consultant Archaeologists (2011) to identify any archaeological resources that may be present.</li><li>Indigenous Nations will be invited to participate in monitoring requirements for any subsequent archaeological work is recommended. All future archaeological assessment findings will be shared with the Indigenous Nations that were engaged during the Stage 1 archaeological assessment.</li></ul> | <ul style="list-style-type: none"><li>None identified at this time.</li><li>Metrolinx will adhere to all recommendations in any subsequent archaeological assessments, including monitoring activities, as required.</li></ul> |
| Archaeological Resources | <ul style="list-style-type: none"><li>Potential recovery of unexpected archaeological resources during construction.</li></ul>                                              | <ul style="list-style-type: none"><li>Should previously unknown or unassessed deeply buried archaeological resources be uncovered during construction activities, they may be a new archaeological site and therefore subject to Section 48(1) of the Ontario Heritage Act. The proponent or person discovering the archaeological resources must cease alteration of the site immediately and engage a licensed archaeologist to carry out archaeological field work, in compliance with Section 48(1) of the Ontario Heritage Act. Any person discovering human remains must immediately notify the police or coroner and the Registrar of Cemeteries, Ministry of Government Services. In addition, consultation with relevant Indigenous Nations will be initiated in the event that archaeological resources or human remains are discovered.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <ul style="list-style-type: none"><li>None identified at this time.</li><li>Metrolinx will adhere to all recommendations in any subsequent archaeological assessments, including monitoring activities, as required.</li></ul> |

<sup>29</sup> Ground disturbing activities can be defined as any and all activities that will or have the potential to impact/disturb the area below the surface. Example of activities include, but is not limited to, heavy machine movement/weight, clearing, grading, excavating, trenching, drilling, and transporting and filling of land.

# AGENDA

1. Introductions
2. Metrolinx update of Subway Program
3. Project Overview: Ontario Line
  - First Parliament/Corktown Station
  - Don Valley River Crossings
4. Next Steps

# Subway Program

# METROLINX - THE SUBWAY PROGRAM

Metrolinx and its partners are delivering on a bold, forward-looking transportation plan. The goals of the 2041 Regional Transportation Plan (RTP) are to create strong connections, complete travel experiences and sustainable communities. The Subway Program is a key component of this plan.

The Subway Program consists of four (4) transit projects:

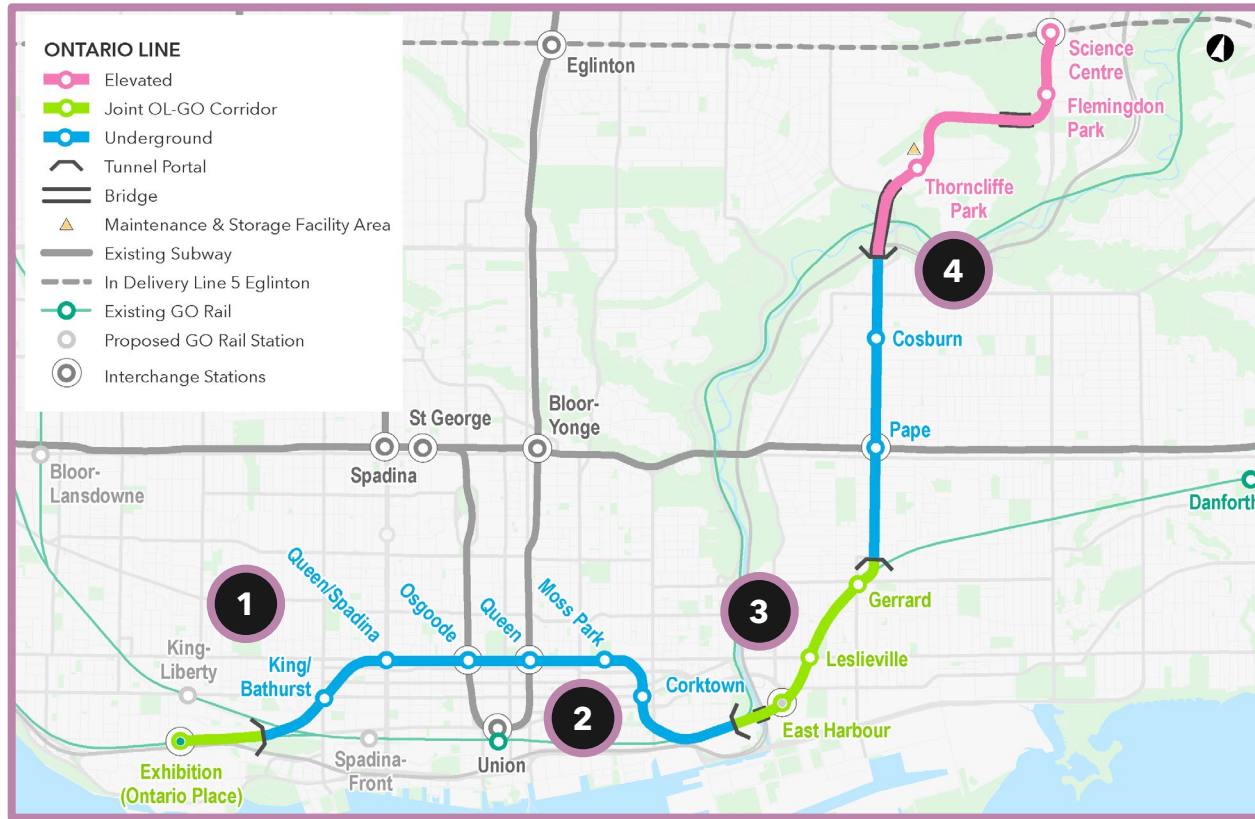

1. The Ontario Line

- [REDACTED]
- [REDACTED]
- [REDACTED]

Today we will be discussing Ontario Line and specifically the First Parliament site/ Corktown station and Don Valley River crossings

# Ontario Line

# ONTARIO LINE

- 1 West**  
(Exhibition to Queen/Spadina)
- 2 Downtown**  
(Osgoode to Don Yard)
- 3 East**  
(East Harbour to Pape South)
- 4 North**  
(Pape to Science Centre)

15.6  
kilometres  
long

15 stations

As frequent as every 90  
seconds during rush hour

388,000 daily  
boardings

40+ connections to  
other transit options

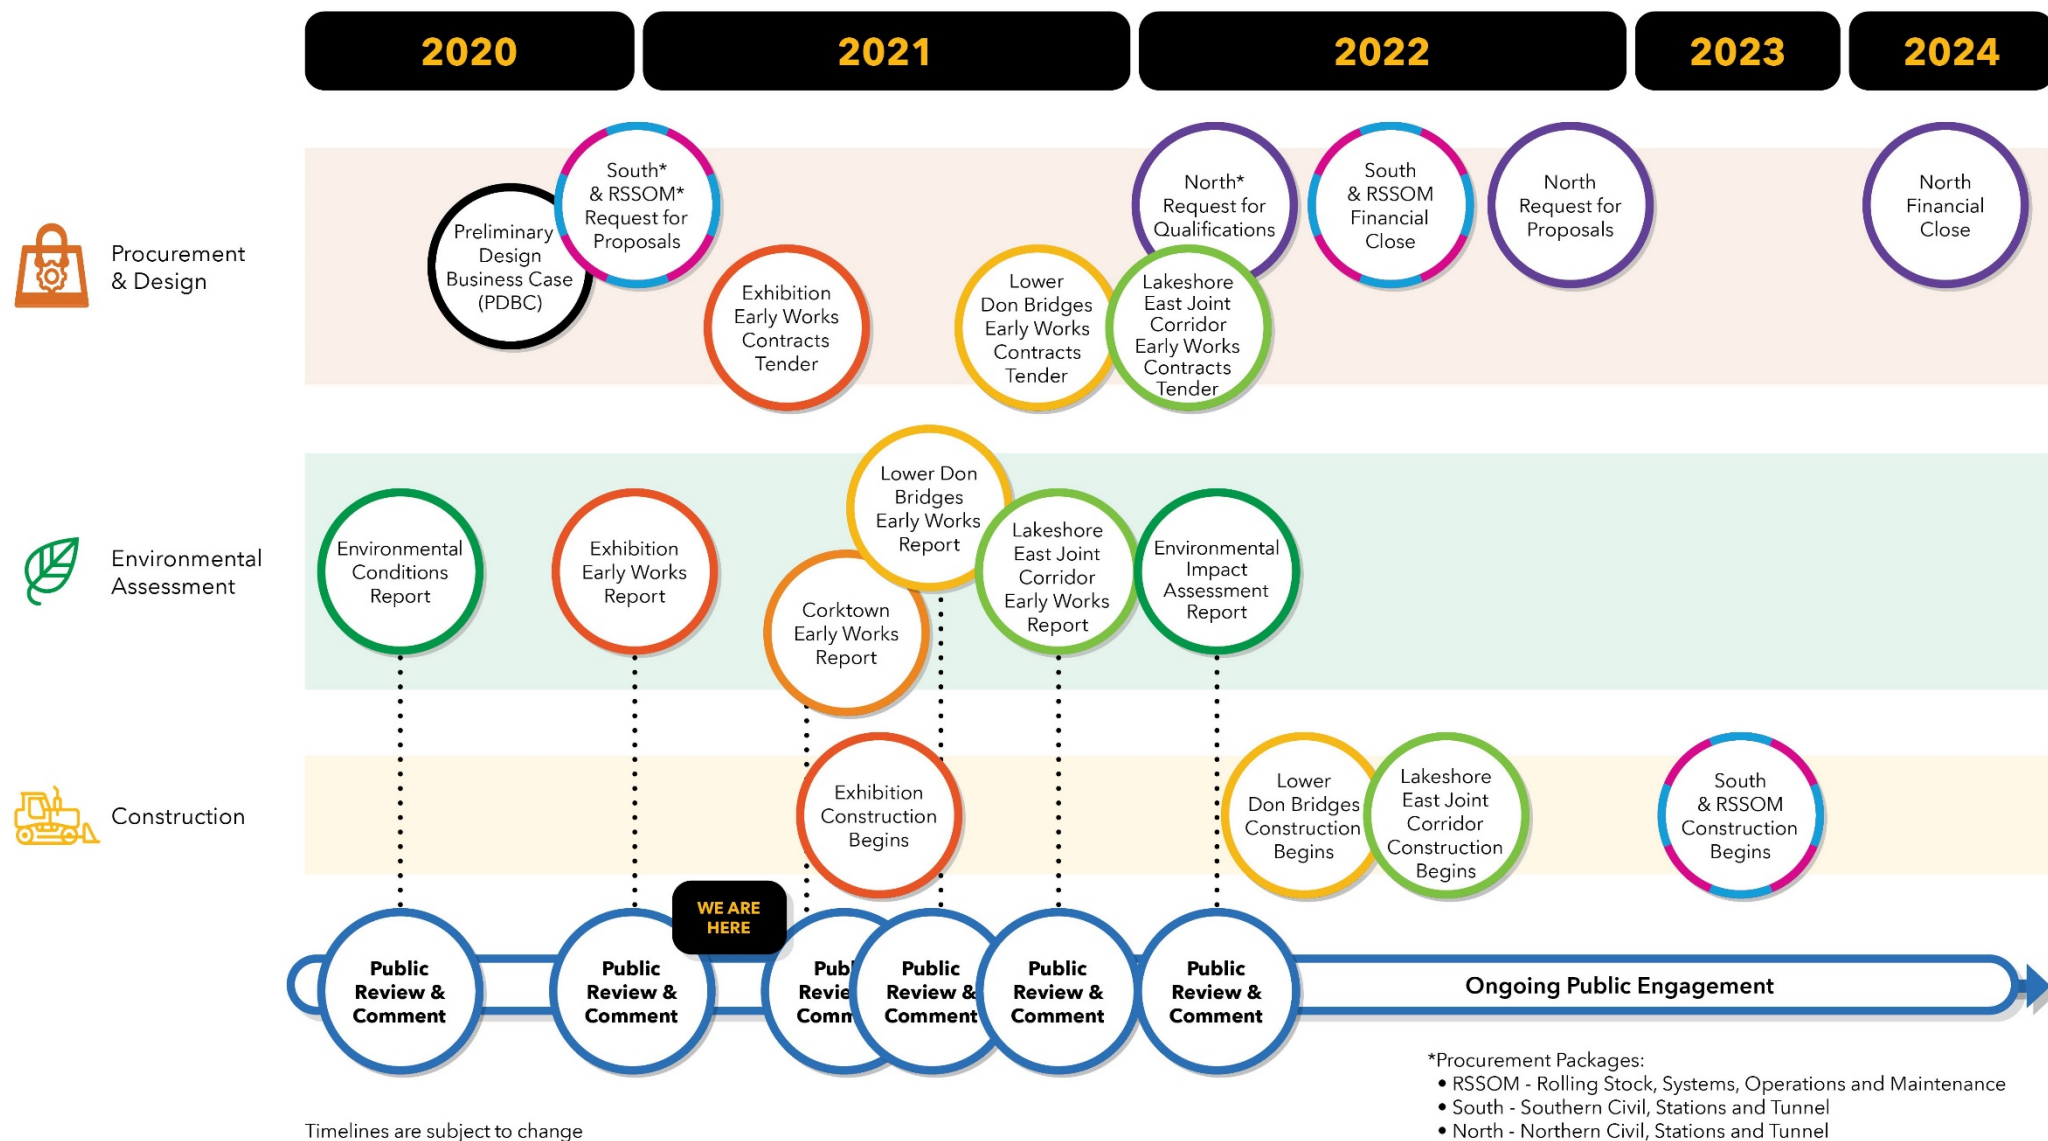

255,000 more people  
within walking distance  
to transit

Up to 47,000 more jobs  
accessible in 45 minutes or  
less, on average

# THE ONTARIO LINE: TIMELINE

# First Parliament/Corktown Station

# CORKTOWN STATION

- Streetcar Stop
- Bus Stop
- Streetcar Line
- Tunneled
- Station Platform

0 100 Metres

# CONSTRUCTION AND STAGING

Sample TBMs

Tunnel Boring Machine (TBM)  
assembly then segment storage

TBM launch box

Water treatment and laydown area

Previously identified as approximate  
site of First Parliament and Gaol

Removed soil handling

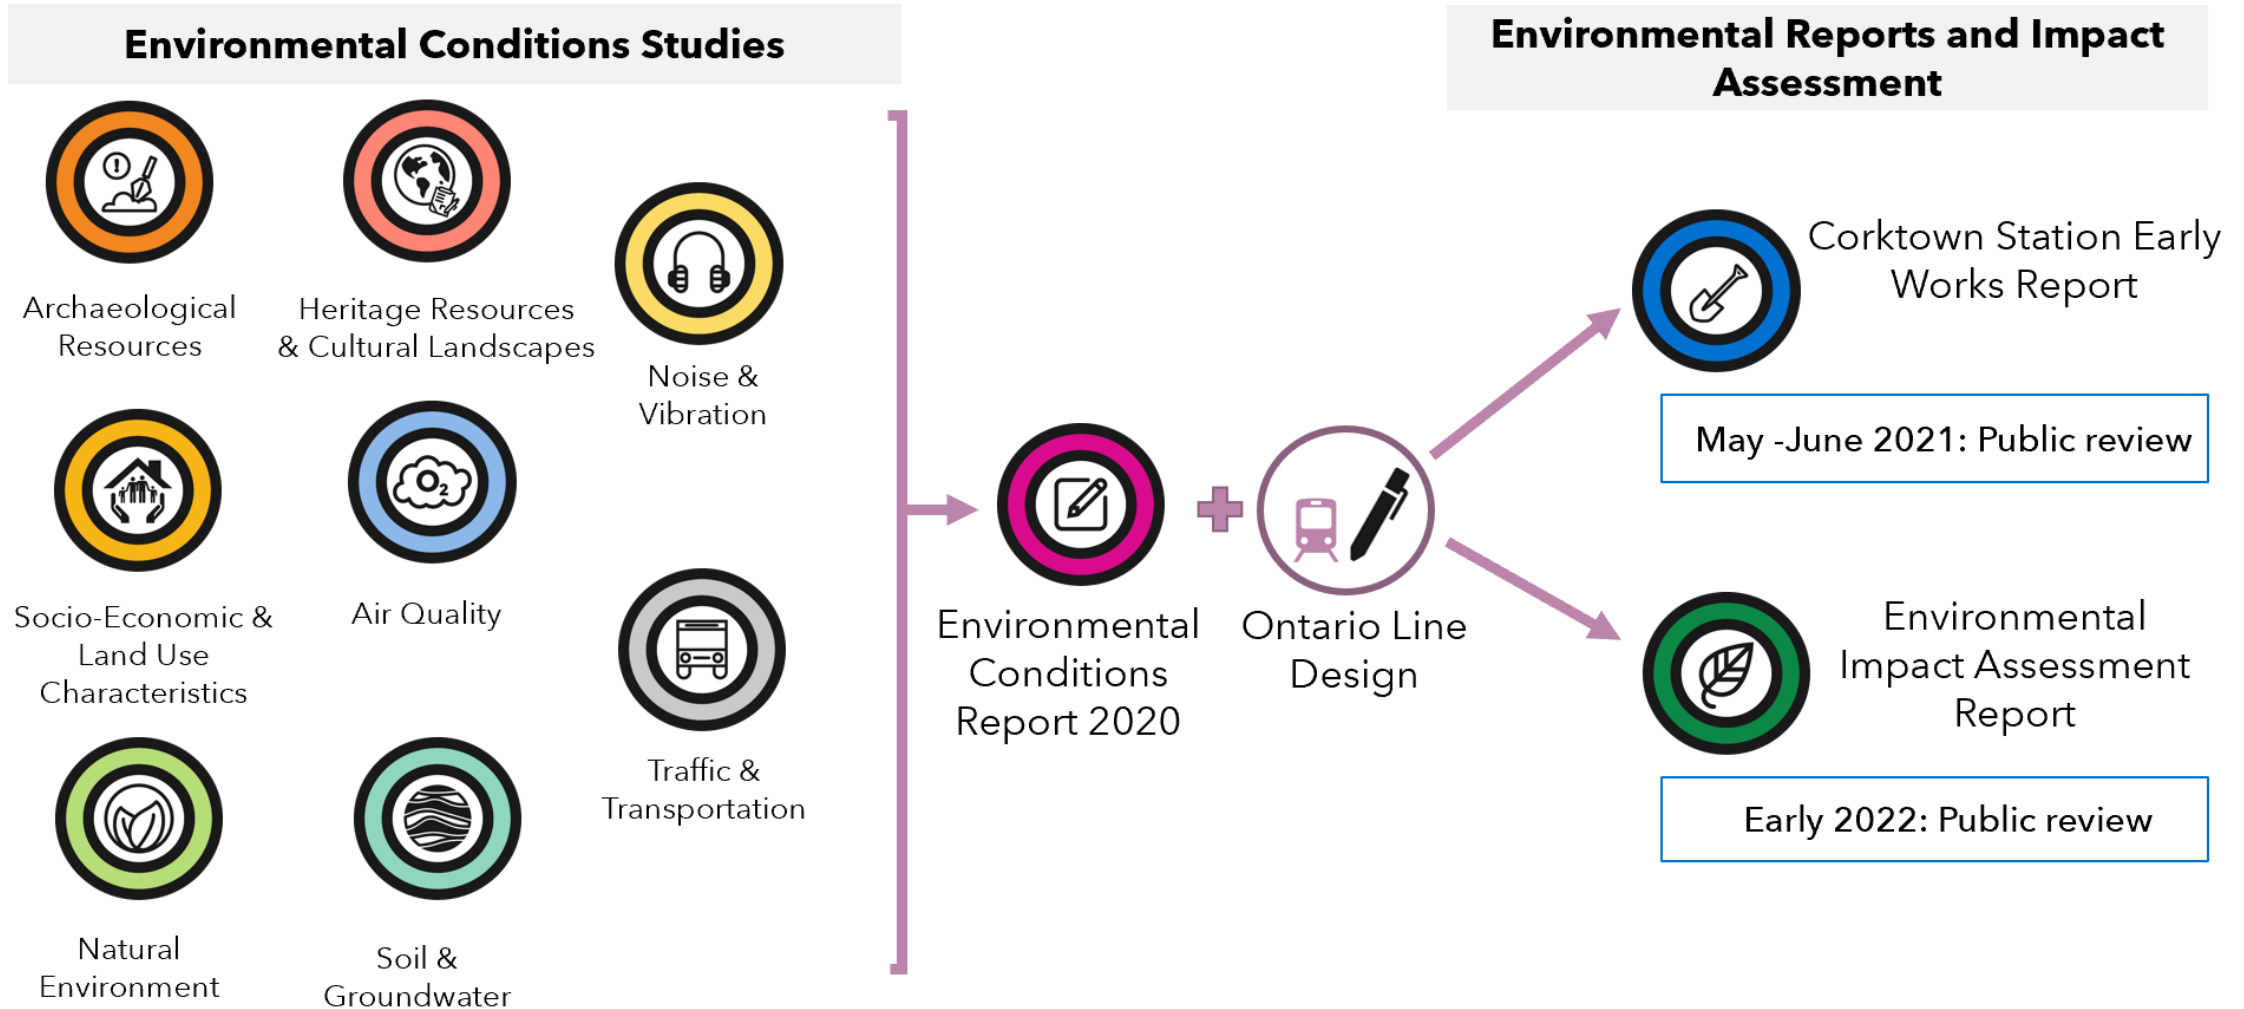

Tunnel construction staging

# TIMELINE - CORKTOWN STATION

# ENVIRONMENT

# Corktown Station Early Works

- Corktown Station early works include demolition of existing buildings, removal of structures and asphalt, decommissioning of utilities and soil removal and/or remediation where required.
- These early works will allow for the completion of environmental due diligence investigations, including archaeological assessments in advance of future construction staging and laydown to support tunneling and work associated with the future Corktown Station.
- The First Parliament Site, located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities.

## Legend

-  Corktown Station Early Works Project Footprint
-  First Parliament Site

## Image:

Source: Metrolinx, 2021.

# Archaeology

## Key Findings

- Much of the Corktown Station early works project footprint contains moderate to high deeply buried archaeological potential, where Indigenous artifacts and/or material related to the early development and expansion of the City of Toronto may remain.
- The First Parliament Site and the Lime Kiln Site are located within the study area. These sites require additional archaeological studies in advance of any ground disturbance activities.
- Where archaeological potential is present and disturbance is anticipated, further archaeological assessment(s) will be completed. The assessments may include deeply buried investigative techniques, such as mechanical topsoil removal and mechanical trenching.

## Potential Effects & Mitigation Measures

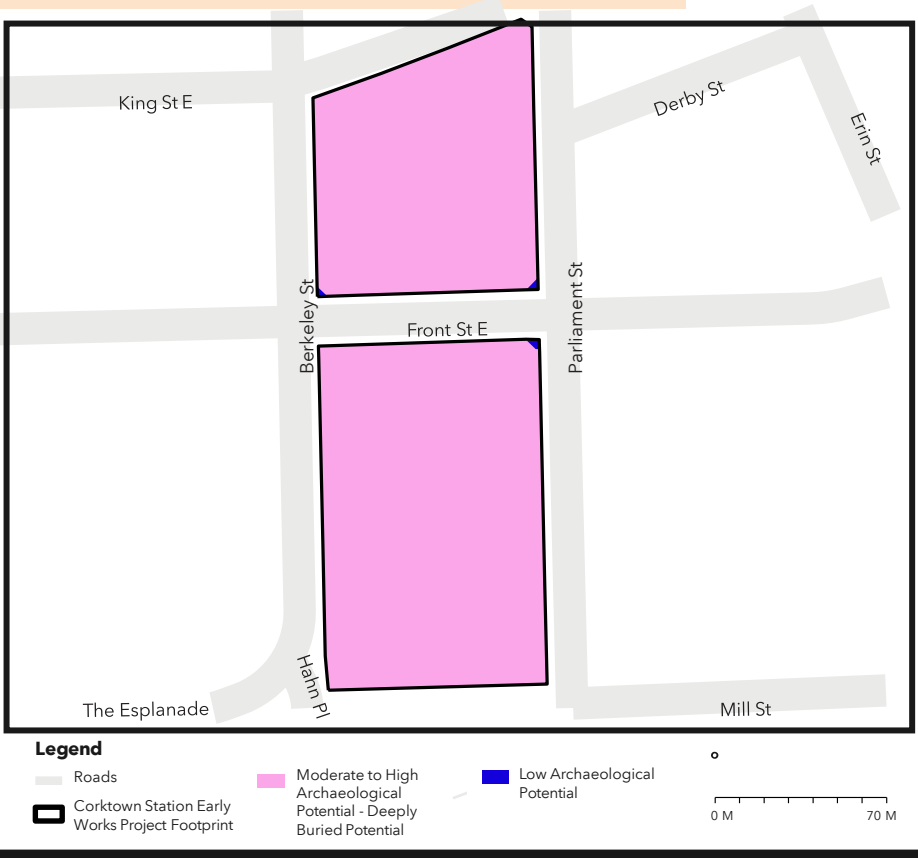

### Potential Effects:

- Potential for disturbance of registered archaeological sites (i.e., First Parliament Site, Lime Kiln Site) and/or archaeological resources not previously identified due to early works activities.
- Potential for recovery of unexpected archaeological resources (e.g., Indigenous artifacts) during early works.

### Mitigation Measures:

- Complete additional archaeological assessments where required as early as possible and in advance of any ground disturbance.
- If archaeological materials are encountered (or suspected) during early works activities, all work will stop. The site will be protected from impact and additional assessment will be undertaken.
- The Huron Wendat Nation will be invited to participate in archaeological fieldwork.

## Archaeological Potential within Corktown Station Early Works Project Footprint

# ENVIRONMENTAL ASSESSMENTS AND CONTAMINATION

- Significant known contamination on site due to past uses by the Consumer's Gas Company and based on Phase 2 Environmental Site Assessment (ESA) results:
  - Soil impacts include polycyclic aromatic hydrocarbons (PAHs), petroleum hydrocarbons (PHCs), metals, volatile organic compounds (VOCs), salt
  - Groundwater impacts include PHC, PAHs, benzene, chloride, sodium
- Archaeological plans to be informed on ongoing basis by results of environmental testing and contamination work
- Archaeological preservation, excavation, analysis and curation of artifacts may require alternative methodologies to accommodate health and safety concerns due to contamination

(Stantec 2021)

# ARCHAEOLOGY OVERVIEW

## 265-271 Front Street East and 25 Berkeley Street

- Subject to four previous archaeological assessments

## 44 Parliament Street

- Subject to two previous archaeological assessments

### Approach:

- Archaeological assessments (stage 2-4) required and will continue in accordance with Ministry standards and guidelines
- Construction/staging work will not happen until all archaeological assessments are complete.
- Coordination with Indigenous Nations for archaeological fieldwork and review of draft reporting
- Building demolition essential to carry out thorough archaeology work and proceed with Ontario Line construction
- Licensed archaeologists to be on site to monitor demolition and removal of at-grade components of structures, along with Indigenous field monitors

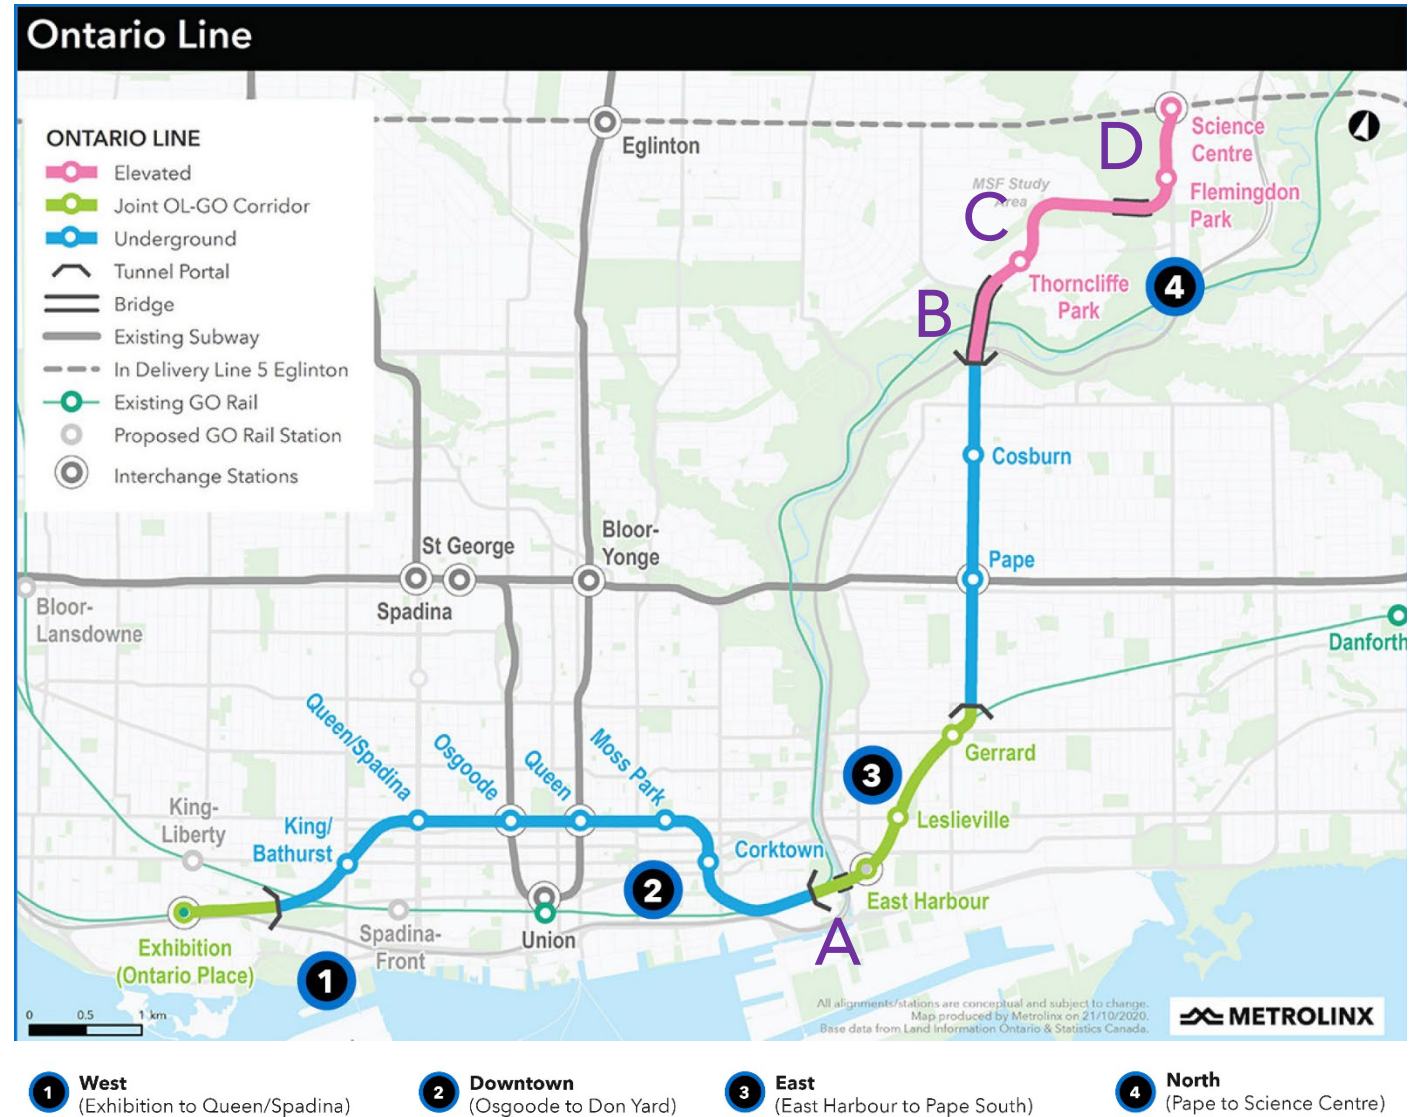

# Ontario Line: Don Valley River Crossings

# OL - OVERVIEW OF THE DON VALLEY CROSSINGS

- Don Valley Crossings:

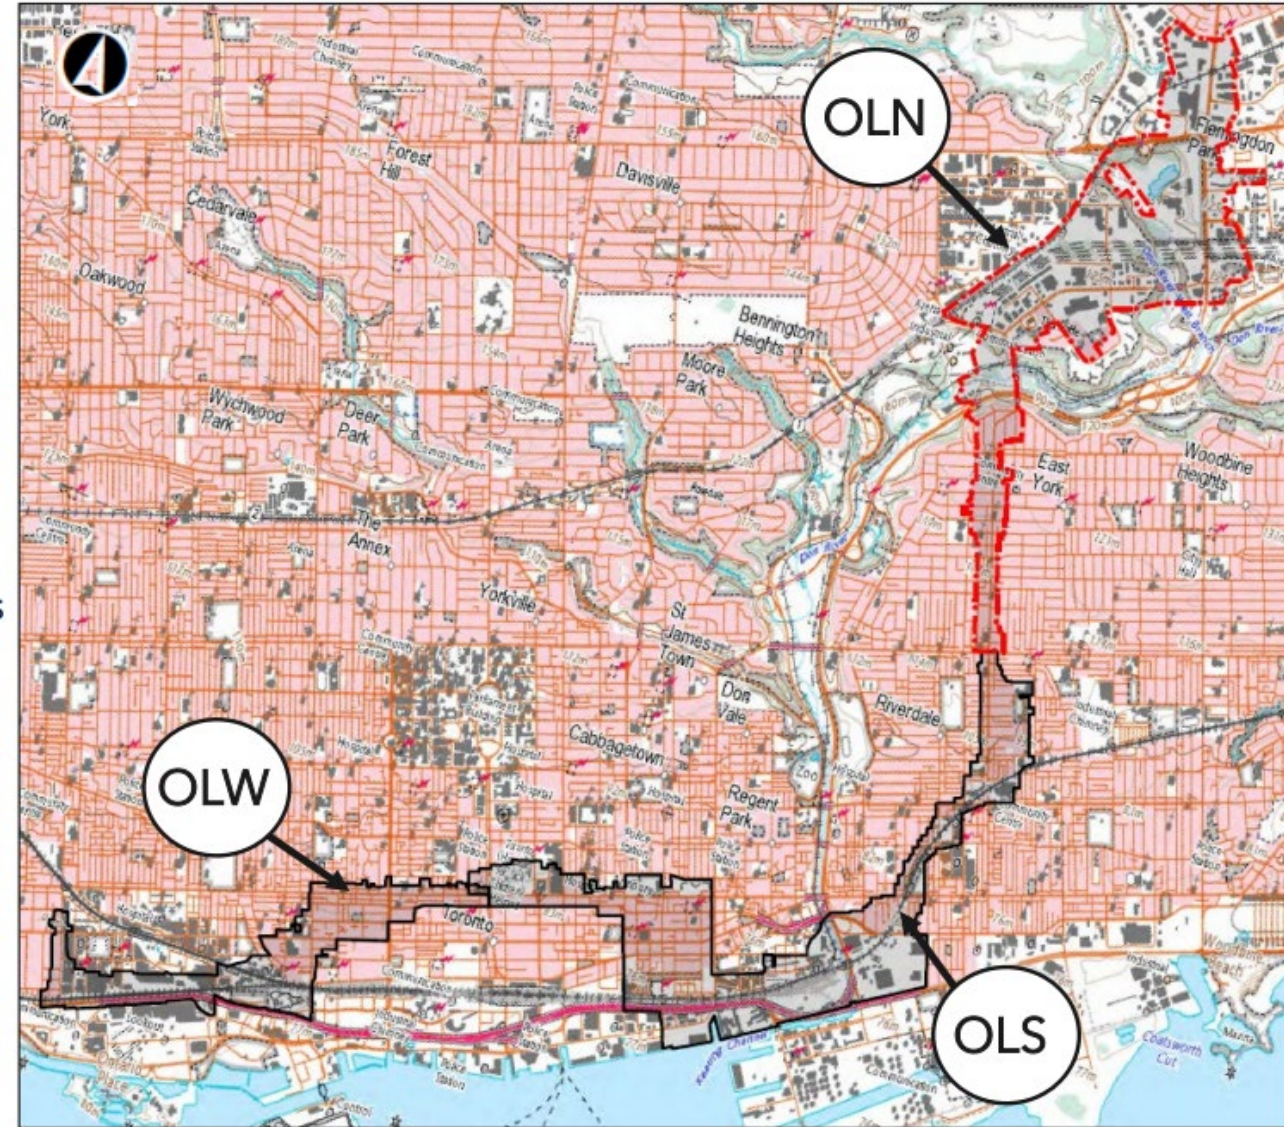

- A - Lower Don Crossing (Lower Don Bridges) at existing Lakeshore East rail bridge
- B - Don River Crossing at Millwood Road
- C - West Don River (Walmsley Brook) Crossing near Beth Neilson Drive
- D - West Don River Crossing at Overlea Boulevard

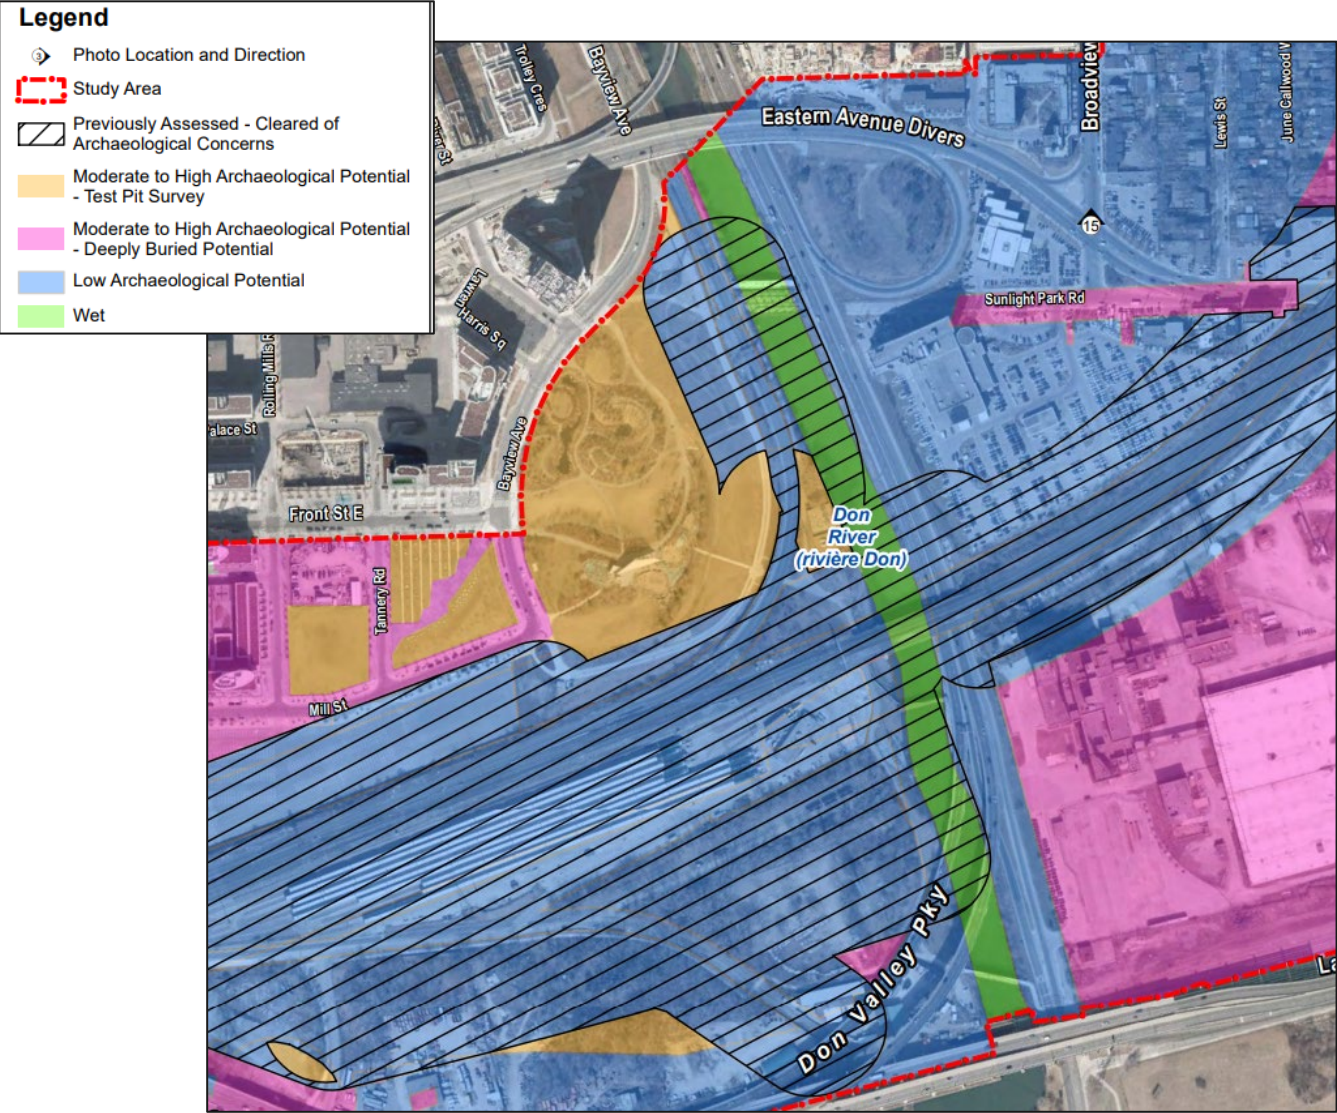

# OL - ARCHAEOLOGICAL WORK AND ENGAGEMENT OVERVIEW

- Archaeological assessments conducted in three sections: Ontario Line West (OLW), Ontario Line South (OLS) and Ontario Line North (OLN)
- Stage 1 work:
  - Draft reports shared with Indigenous Nations in March 2020
  - Reports submitted to MHSTCI in May 2020 and accepted into Registry
- Stage 2 work:
  - Stage 2 assessments in Don Valley areas that are anticipated to be impacted are planned to start in Summer 2021, subject to further design detail confirmation and Permission to Enter agreements
  - To facilitate Indigenous monitors involvement, Metrolinx will share the details of the planned Stage 2 work as soon as this information is available

### MINUTES

#### TOPIC / COMMENTS

#### Welcome and Introductions

- The purpose of this meeting was to discuss the proposed plans relating to archaeology for First Parliament site/Corktown Station for the Ontario Line Project. Also, to provide an overview of archaeological work around the Don Valley River for the Ontario Line Project
- The meeting was chaired by Fallon Melander, Manager of Indigenous Relations at Metrolinx
- Round table of introductions took place

#### Overview of Subway Program

- Jaimi O’Hara provided a high-level overview of the Subway Program

#### Ontario Line Project

##### Ontario Line: Corktown Station/First Parliament Site

- Bismah and Daniel provided an overview of the Ontario Line and also the proposed First Parliament/Corktown Station
- Maria provided an overview of the Early Works that will be completed on the Corktown Station Site/First Parliament site including archaeological work that will need to be done
- Carrie provided an overview of the Environmental Site Assessments and contamination on the site – and how this may impact the archaeological work and how to proceed with health and safety being at the forefront
- Carrie provided an archaeological overview
- Louis asked for more information about the First Parliament buildings of Upper Canada. Carrie explained that the buildings burnt down and now the site is a parking lot and car dealership. The heritage value is below the modern buildings that are currently on the site and the modern buildings will have to come down.
- Metrolinx stated that it will provide invitations for the archaeological work that will be taking place and will be also providing all arch assessments for review in draft form to Huron Wendat Nation

##### Ontario Line: Don Valley River Crossings

- Maria provided an overview of the four proposed Don River Crossings and proposed archaeology. There will potentially be four total crossings which are being assessed over the Don River in multiple locations.
- Arch reports were shared with HWN in March 2020 and were accepted into the registry in May 2020.
- Mario asked when the arch fieldwork will take place. Maria stated that we should know in the coming weeks when the stage 2 works will take place and let HWN know as soon as possible.

---

Dear Chief Nahrgang,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. Attached you will find a letter providing an update on the project. The purpose of this letter is to share the Draft Corktown Station Early Works Report (EWR) prepared for the Ontario Line Project and provide a continued invitation for feedback.

In an effort to streamline your review, we draw your attention to the attachment which provides an overview of the expected environmental impacts and proposed mitigations, as we know this may be of specific interest to you.

We ask that you provide any comments no later than June 11, 2021.

The reports are available at the following link:

[REDACTED]

We know that your First Nation does not have capacity as per emails received from Christopher Reid. We would be happy to address a way to assist you with capacity for these projects and welcome an opportunity to speak further about what we can do.

If you have any questions or concerns, please do not hesitate to contact the Indigenous Relations Office.

Miigwetch,

Fallon

**Fallon Melander**

Manager, Indigenous Relations

## Notice of Publication of Draft Corktown Station Early Works Report

### Ontario Line Project

#### The Project

The Ontario Line will bring 15.6 kilometres of new subway service to Toronto to make it faster and easier for people to get where they need to be each day. The line will stretch across the city, from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line is proposed to include 15 potential stations, including six interchange stations, and connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 of its stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable commutes.

#### Corktown Station Early Works

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These early works are being advanced to prepare the site for future construction staging and laydown to support tunneling and below ground construction activities, and work associated with the future Corktown Station.

The First Parliament site, located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail), and remnants of early Toronto industry may be found here.

Metrolinx is eager to unlock the potential of the site and work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

Environmental impacts of Corktown Station early works are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*. In accordance with Section 8 of O. Reg. 341/20, Metrolinx has prepared the Draft Corktown Station Early Works Report (EWR) that is now available for public review.

The Draft EWR documents the assessment of Corktown Station early works. The report outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures and a consultation record.

### **The Draft Early Works Report Review and Consultation Process**

Effective **May 12, 2021**, the Draft Corktown Station EWR will be available for review on the project webpage ([www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)).

As we temporarily shift to virtual open houses, please join us online from **May 12 to June 11, 2021** to find out more about and provide your feedback on the Draft Corktown Station EWR via the webpage form.

Those who wish to provide comments on the Draft Corktown Station EWR must do so by **June 11, 2021** and submit them using the webpage form or address them to the following email: [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com).

Section 10 of O. Reg. 341/20 requires Metrolinx to establish an issues resolution process to attempt to resolve any concerns raised by the public or Indigenous Nations during the review period. At the end of the review period, Metrolinx will update the Draft Corktown Station EWR by adding a description of the issues resolution process, what Metrolinx did to address any concerns, and if the early works implementation timeline will be impacted as a result of addressing concerns. Metrolinx will then publish the Final Corktown Station EWR on the project webpage: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline) and issue a Notice of Publication of Final Corktown Station EWR.

To obtain a copy of the Draft Corktown Station EWR, please contact the project email listed above.

**Josh Vandezande (T: 416-202-5100, E: [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com)) may be contacted on behalf of Metrolinx.**

Chief Kris Nahrgang  
Kawartha Nishnawbe First Nation  
Box 1432 RR#4  
Lakefield, ON K0L 2H0  
**Delivered by email**

Dear Chief Nahrgang,

**RE: Ontario Line Project – Notice of Publication of Draft Corktown Station Early Works Report**

Metrolinx, a regional transportation agency, is helping to transform the way the Greater Golden Horseshoe region moves by building a fast, convenient and integrated transit network. As part of this work, Metrolinx is proceeding with the Ontario Line which will bring 15.6 kilometres of subway service to Toronto. The purpose of this letter is to share information regarding the Ontario Line project with Kawartha Nishnawbe First Nation.

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Kawartha Nishnawbe First Nation. Metrolinx appreciates and respects Kawartha Nishnawbe First Nation's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to share with Kawartha Nishnawbe First Nation the Draft Corktown Station Early Works Report (EWR).

**Project Description**

The Ontario Line will stretch from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line is proposed to include 15 stations, including six interchange stations, and connections to three GO train lines, two existing subway lines, the Eglinton Crosstown LRT, and streetcar lines. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable commutes. More information on the Project can be found on our website:

[www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)

The initial draft of the Corktown Station EWR and a letter outlining Corktown Station early works were shared with Kawartha Nishnawbe First Nation on March 11, 2021. As outlined in the letter, environmental impacts of the Ontario Line Project are being

assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*.

## Draft Corktown Station Early Works Report

In accordance with Section 8 of O. Reg. 341/20, Metrolinx has prepared a Draft Corktown Station EWR that documents the assessment of Corktown Station early works.

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These early works are being advanced to prepare the site for future construction staging and laydown to support tunneling and below ground construction activities, and work associated with the future Corktown Station. The location of the Corktown Station early works project footprint and study area can be viewed below in **Figure 1**.

metrolinx.com

The First Parliament site, located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail) and remnants of early Toronto industry may be found here. Metrolinx is eager to work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

The EWR documents the assessment of Corktown Station early works and outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures, and a consultation record.

The Draft EWR is available for your review and can be found via the Dropbox link shared in the body of the email that is associated with this letter. We welcome any additional comments you may have on the Draft EWR. The Draft EWR is available for review and comment starting **May 12, 2021** and ending on **June 11, 2021**. The Notice of Publication of Draft Corktown Station EWR is provided in **Attachment 1**. The Draft EWR will be updated following the review period, and the Final EWR will be published on the Project webpage ([www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)) and shared with Kawartha Nishnawbe First Nation.

#### Potential Impacts and Mitigation Measures

The tables found enclosed in **Attachment 2 and 3** provide a summary of natural environment and archaeology potential impacts and mitigation measures identified as part of the Draft EWR that may be of interest to *Kawartha Nishnawbe First Nation*. If *Kawartha Nishnawbe First Nation* has any feedback about these potential impacts and/or mitigation strategies, or any other aspects of the Ontario Line, we welcome the opportunity to discuss further.

#### Revisions to the Initial Draft of the Corktown Station Early Works Report

In accordance with O. Reg. 341/20, Metrolinx has now incorporated comments and feedback from the initial round of engagement with Indigenous Nations and agencies on the initial draft of the Corktown Station EWR into the Draft EWR.

To streamline capacity for Kawartha Nishnawbe First Nation to provide comments or feedback, a summary of revisions to the EWR since the circulation of the initial draft of the EWR is as follows:

- Minor editorial changes to address grammatical and syntax errors and updates to reflect comments received from agencies;
- Clarification that the project operations, construction of Corktown Station and other project components will be assessed in the Ontario Line Environmental Impact Assessment Report;
- Inclusion of information on the Parkland Strategy (City of Toronto, 2019), First Parliament Master Plan (City of Toronto, 2020) and additional information on planned community services and facilities in the Corktown Station Early Works Study Area;
- Edits to the text to reflect that the Ministry of Heritage, Sport, Tourism and Culture Industries' (MHSTCI) Minister's Consent has been granted for the demolition and removal of the non-heritage buildings at 265 Front Street East and removal of the heritage attributes at 265 Front Street East, 271 Front Street East and 25 Berkeley Street located on the First Parliament Site, and affirming Metrolinx's commitment to fulfilling the conditions outlined in the Minister's Consent, including completion of archaeological requirements;
- Additional mitigation measures for environmental disciplines such as archaeology, air quality and traffic and transportation, that include:
  - Coordination and completion of required archaeological investigations, early works activities and/or activities that have the potential for vibration effects such that buried archaeological resources are appropriately considered;
  - Use of non-chloride dust suppressants; and
  - Consultation with the City of Toronto to minimize potential impacts during special events (e.g., the Toronto Christmas Market at the Distillery District) should closures or long-term impacts be required.
- Revision of traffic and transportation figures to include additional information such as intersection names and inclusion of an additional noise and vibration figure to show representative receptor locations.

## Engagement

Metrolinx is committed to an open, respectful, and transparent relationship with Kawartha Nishnawbe First Nation. We appreciate the significant volume of documents related to this Project that have been shared with Kawartha Nishnawbe First Nation. We are happy to assist in the review of these documents by meeting with Kawartha Nishnawbe First Nation or working to address any questions that Kawartha Nishnawbe First Nation may have about this Project. If you require additional information or materials or if you wish to discuss these Projects in more detail or set up a meeting, please contact Fallon Melander, Manager of Metrolinx's Indigenous Relations Office at [IndigenousRelations@metrolinx.com](mailto:IndigenousRelations@metrolinx.com).

Metrolinx welcomes any comments or feedback on the Draft EWR from Kawartha Nishnawbe First Nation. Please provide these in writing no later than **June 11, 2021**. Comments and information regarding this draft report will be collected to assist in meeting the requirements of the *Environmental Assessment Act* and may be included in study documentation. With the exception of personal information, all comments will become part of the public record. Kindly note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*.

Thank you for your time in reviewing this letter.

Yours Truly,

---

Dear Chief Nahrgang,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. We recently communicated with your Nation about the proposed Corktown Station which is along the planned alignment of the Ontario Line. This location includes parcels of land which were once the site of Upper Canada's First Parliament buildings. Metrolinx and its partners are exploring opportunities to commemorate the history of this site, and have been engaging with various parties including the City of Toronto and the Mississaugas of the Credit First Nation, on whose treaty territory this project is occurring.

Given the significant chance of recovering Indigenous and European artifacts during the Corktown Station Early Works, a detailed archaeological workplan is being developed. Metrolinx recognizes the importance and value of Indigenous monitors for any archaeology related to the Ontario Line Project. In our previous communication, an invitation was included for your Nation to participate in any archaeological fieldwork and monitoring during the Corktown Station Early Works, including demolition of modern buildings currently on the First Parliament site.

This work is anticipated to commence in Fall 2021, and if you have not yet expressed interest in participating, please feel free to do so at your earliest convenience. As a reminder any comments on the draft Corktown Station Early Works Report should be provided no later than **April 15, 2021**.

Metrolinx recognizes that the history of this location extends beyond European use, and as such, wants to take the opportunity to understand any significance it may have to Indigenous Nations. Metrolinx would like to meet with your Nation to discuss the First Parliament site, its commemoration, as well as review the broader Ontario Line project if you wish. We recognize that traditional knowledge of this area may be sacred and/or not appropriate to be shared, but would appreciate any information that may be appropriate for Metrolinx to consider.

This letter is not intended to replace engagement but to provide a high level summary for your information. We would very much appreciate meeting with your Nation to discuss in more detail. Please let me know if you have any questions or concerns. We know that your First Nation does not have capacity as per emails received from [REDACTED]. We would be happy to address a way to assist you with capacity for these projects and welcome an opportunity to speak further about what we can do.

If you have any questions or concerns, please do not hesitate to contact me.

Miigwetch,

Fallon

Chief Kris Nahrgang  
Kawartha Nishnawbe First Nation  
Box 1432 RR#4  
Lakefield, ON K0L 2H0  
**Delivered by email**

Dear Chief Nahrgang,

**RE: Ontario Line Project - First Parliament Site and Lime Kiln Site**

Metrolinx, a regional transportation agency, is helping to transform the way the Greater Golden Horseshoe moves by building a fast, convenient and integrated transit network. As part of this work, Metrolinx is continuing the pre-construction planning of the Ontario Line which will bring nearly 16 kilometres of subway service to Toronto.

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Kawartha Nishnawbe First Nation. Metrolinx appreciates and respects Kawartha Nishnawbe First Nation's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to share with Kawartha Nishnawbe First Nation information regarding Corktown Station early works and additional information regarding upcoming field visits and investigations at the Corktown Station early works site, which includes two registered archaeological sites, the First Parliament site and the Lime Kiln site.

**Project Description**

The proposed Ontario Line is a new 16-kilometer subway line, which will occupy an exclusive right-of-way system encompassing a combination of below-grade, above-grade, and at-grade alignment. The route (Figure 1) will run from Ontario Place/Exhibition through downtown Toronto to the Ontario Science Centre in the City of Toronto, with six (6) potential interchange stations and 17 new connections to GO Transit, existing subways and streetcars. More information on the Project can be found on our website: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)

**Corktown Station Early Works**

As communicated in the letter sent to Kawartha Nishnawbe First Nation on March 11, 2021, the Corktown Station site has been identified for launching tunnel excavation equipment for the downtown and Don Yard segments of the proposed Ontario Line alignment, as well as the location of the Corktown Station. The First Parliament and Lime Kiln Sites, located within the Corktown Station area, are known archaeological sites which require additional archaeological study ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures, followed by completion of necessary archaeological studies, is required. Completion of this preparatory work on an expedited basis is essential to allow for the timely delivery of the overall Project and is anticipated to begin in the Fall 2021, subject to the completion of the Corktown Station early works process in accordance with Ontario Regulation 341/20: Ontario Line Project.

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These activities will enable completion of environmental due diligence investigations, including archaeological assessments. These activities will occur on properties within the Corktown Station early works project footprint, as shown in **Figure 1**.

Figure 1: Map of Corktown Station Early Works

Environmental impacts of Corktown Station early works are being assessed in accordance with O. Reg. 341/20. Metrolinx shared the draft Corktown Station Early Works Report and associated discipline reports with Kawartha Nishnawbe First Nation on March 11, 2021 and had requested any comments to be provided by April 9, 2021.

## **Archaeological Work at the First Parliament Site and Lime Kiln Site**

Metrolinx appreciates the significance of archaeology to Kawartha Nishnawbe First Nation. The properties at 265 Front Street East, 271 Front Street East, and 25 Berkeley Street, in the St. Lawrence neighbourhood of the City of Toronto, are collectively host to the First Parliament Site. It is located on the southwest corner of Parliament Street and King Street, between Parliament Street and Berkeley Street. The First Parliament Site is a registered archaeological site (AjGu-41) which may include resources associated with the First and Second Parliament Buildings, the Home District Gaol, and Consumers' Gas company buildings. The surface of the property is currently occupied by automotive businesses, including a car dealership, car wash, and surface parking lot. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and remnants of early Toronto industry may be found at this site.

North of the First Parliament Site is another registered archaeological site (AjGu-64), the Lime Kiln Site, which includes remains from the Toronto Lime Works Company. A variety of structural features, in various states of preservation, have been documented on this site. The location of the Lime Kiln Site and the First Parliament Site are shown in **Figure 2**.

Figure 2: Location of First Parliament Site and Lime Kiln Site Areas

The First Parliament Site and Lime Kiln Site require additional archaeological studies ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures is necessary. Completion of this preparatory work is essential to allow for the timely delivery of the Ontario Line.

Archaeological fieldwork to remove or protect archaeological resources is anticipated to commence in early Fall 2021, and a workplan for these archaeological investigations is under development. As mentioned in the letter sent on March 11, 2021, Kawartha Nishnawbe First Nation is invited to participate in all archaeological fieldwork, and to review and provide comments on forthcoming reports.

### **Feedback on Commemoration of First Parliament Site**

Metrolinx appreciates that the history of the First Parliament site is not one simply of Canadian origin, but rather holds longer history and tradition. Metrolinx also appreciates that the site of the First Parliament of Upper Canada is linked to a history of colonization and harmful practices towards Indigenous Peoples. Given the significance of this site, Metrolinx is engaging with Indigenous Nations, City of Toronto and the broader community to identify opportunities for commemoration. Metrolinx is committed to ensuring that any feedback from Kawartha Nishnawbe First Nation regarding the significance of this site is considered as part of this commemoration. Metrolinx appreciates that traditional or cultural knowledge about this site may be sacred and/or not be appropriate to be shared but welcomes any comments or ideas from Kawartha Nishnawbe First Nation that may be appropriate to commemorate Indigenous Peoples.

### **Engagement**

Metrolinx is committed to an open, respectful, and transparent relationship with Kawartha Nishnawbe First Nation. We would like to meet with Kawartha Nishnawbe First Nation to better understand any significance the First Parliament site may have to your Nation. We are also happy to assist in reviewing the Corktown Station Early Works Report or reviewing the proposed archaeological workplan for this site. If Kawartha Nishnawbe First Nation requires additional information or materials, or you wish to discuss this project in more detail or set up a meeting, please contact Fallon Melander, Manager, Indigenous Relations at Metrolinx. She can be contacted at [IndigenousRelations@metrolinx.com](mailto:IndigenousRelations@metrolinx.com).

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*. Thank you for your time in reviewing these assessments.

Thank you for your time in reviewing this letter.

**Subject:** Ontario Line - Project Update and Draft Corktown Station Early Works Report for Review + Invitation to Participate in Archaeological Fieldwork

Dear Chief Nahrgang,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. Attached you will find a letter providing an update on the project. The purpose of this letter is to:

- Provide an update on the scope of the project work
- share the initial draft of the Early Works Report for the proposed Corktown Station

Invite your Nation to participate in upcoming archaeological fieldwork

In an effort to streamline your review, we draw your attention to the attachment which provides an overview of the expected environmental impacts and proposed mitigations, as we know this may be of specific interest to you.

Metrolinx is also preparing a letter specific to works being planned within the Don Valley as we recognize the significance of this waterway to many Nations. We hope to share that letter soon. We are happy to meet with your Nation to discuss the Ontario Line and address any questions or concerns that your Nation may have.

We ask that any comments on the draft Corktown Station Early Works Report be provided no later than **April 15, 2021**. Please note that the Noise and Vibration Report, which will be part of the Early Works Report is still being prepared and we will share with your Nation by March 19, 2021.

The draft Corktown Station Early Works Report is available at the following link:

[REDACTED]

Please let us know as soon as possible if your Nation has interest in participating in future archaeological fieldwork.

We know that your First Nation does not have capacity as per emails received from [REDACTED]. We would be happy to address a way to assist you with capacity for these projects and welcome an opportunity to speak further about what we can do.

If you have any questions or concerns, please do not hesitate to contact me.

Miigwetch,

Fallon

**Delivered by email**

Dear Chief Nahrgang,

**RE: Ontario Line Project - Corktown Station Early Works Report**

Metrolinx, a regional transportation agency, is helping to transform the way the Greater Golden Horseshoe region moves by building a fast, convenient and integrated transit network. As part of this work, Metrolinx is proceeding with the Ontario Line which will bring nearly 16 kilometres of subway service to Toronto. The purpose of this letter is to share information regarding the Ontario Line project with Kawartha Nishnawbe First Nation.

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Kawartha Nishnawbe First Nation. Metrolinx appreciates and respects Kawartha Nishnawbe First Nation's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to share with Kawartha Nishnawbe First Nation information regarding Corktown Station early works and invite feedback on the initial draft of the Corktown Station Early Works Report.

**Project Description**

The Project is a new subway line with connections to Line 1 (Yonge-University) subway service at Osgoode and Queen Stations, Line 2 (Bloor-Danforth) subway service at Pape Station, and Line 5 (Eglinton Crosstown) service at the future Science Centre Station. Fifteen stations are proposed, with additional connections to three GO Transit lines (Lakeshore East, Lakeshore West and Stouffville), and the Queen, King, Bathurst, Spadina, Harbourfront and Gerrard/Carlton streetcar routes. The Project will reduce crowding on Line 1 and provide connections to new high-order rapid transit neighbourhoods. More information on the Project can be found on our website: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)

**Ontario Line Environmental Assessment Process and Reports**

In 2020, Metrolinx provided Kawartha Nishnawbe First Nation with an outline of the Ontario Line environmental assessment process. The environmental assessment for the Ontario Line Project is being completed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20) made under the *Environmental Assessment Act*. The regulation outlines a Project-specific environmental assessment that includes an Environmental Conditions Report, an Environmental Impact Assessment Report and provides opportunity for Early Works Reports for assessment of works that are ready to proceed in advance of the Environmental Impact Assessment Report. An overview of the reports is outlined below and their anticipated publication timeline is provided in **Attachment 1**.

### Environmental Conditions Report

The Environmental Conditions Report characterizes existing environmental conditions within the Ontario Line study area through a combination of desktop review and field studies and was finalized in November 2020. The report also summarizes potential impacts and mitigation measures for consideration during project planning and design. Potential impacts and mitigation measures identified in the Environmental Conditions Report will be confirmed and refined within the Early Works Reports and the Environmental Impact Assessment Report.

### Early Works Reports

Metrolinx is assessing several early works components to support the main construction of the Ontario Line project. Early works are components of the Ontario Line Project that are anticipated to be ready to proceed before completion of the Environmental Impact Assessment Report, such as station construction, rail corridor expansion, utility relocation or bridge replacement or expansion, as defined in O. Reg. 341/20.

Initially, the early works required to support the Ontario Line project were assessed in a single report, which was shared in June 2020 and included Exhibition Station, Lower Don Bridges, Lakeshore East Joint Corridor and East Harbour early works.

Since then, the single Early Works Report has been split into several Early Works Reports, each covering either a single early works location or multiple locations if they are in close proximity. Each Early Works Report provides a description of the early works and alternatives considered, documents local environmental conditions, and outlines early works-specific environmental impacts, mitigation measures,

monitoring activities, potentially required permits and approvals and other components.

It is important to note that two new early works projects, Don Yard and Corktown Station, have been added as well. The Early Works Reports, including this new scope of work are summarized below:

- Exhibition Station Early Works  
Exhibition Station early works are documented in the Exhibition Station Early Works Report, finalized in February 2021.
- Lakeshore East Joint Corridor Early Works  
Lakeshore East Joint Corridor early works will be documented under a separate Early Works Report which will also include East Harbour Station.
- Lower Don Bridges & Don Yard Early Works  
Lower Don Bridges early works will be documented in the Lower Don Bridges and Don Yard Early Works Report. Don Yard is a new early works project that will include construction of Ontario Line tunnel and portal structures between Cherry Street and the Lower Don River and accompanying shift of the Richmond Hill and Lakeshore East GO tracks; installation or upgrading of retaining walls and noise barriers, where appropriate; and utility and signal infrastructure relocation or protection. The initial draft of the Lower Don Bridges and Don Yard Early Works Report is anticipated to be shared with Kawartha Nishnawbe First Nation in mid to late April.
- Corktown Station Early Works  
Corktown Station is a new early works project. Further information on Corktown Station early works is provided below.

### Environmental Impact Assessment Report

The main report produced as part of this process is the Environmental Impact Assessment Report. It will cover the construction and operation of the Ontario Line. The report will include a final description of the Ontario Line Project, environmental impact evaluation results, mitigation measures, monitoring activities, potentially required permits and approvals and other components as outlined in O. Reg. 341/20.

## **Work along the Don River and within the vicinity of the Don Valley**

Metrolinx appreciates the significance of waterways to Kawartha Nishnawbe First Nation. As such, Metrolinx is preparing an information letter specific to work occurring near or along the Don River and within the Valley. Metrolinx will provide details about the scope of work and anticipated natural environmental and archaeological assessments. Metrolinx is committed to exploring opportunities for Kawartha Nishnawbe First Nation to participate in these assessments should Kawartha Nishnawbe First Nation express interest.

## **Corktown Station Early Works**

The Corktown Station site has been identified for launching tunnel excavation equipment for the downtown and Don Yard segments of the proposed Ontario Line alignment, as well as the location for the Corktown Station. The First Parliament site, located within the Corktown Station area, is a known archaeological site which requires additional archaeological study ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures, followed by completion of necessary archaeological studies, is required. Completion of this preparatory work on an expedited basis is essential to allow for the timely delivery of the overall Project.

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These activities will enable completion of environmental due diligence investigations, including archaeological assessments. These activities will occur on properties within the Corktown Station early works project footprint, as shown in **Figure 2**.

Figure 2: Map of Corktown Station Early Works

Environmental impacts of Corktown Station early works are being assessed in accordance with O. Reg. 341/20.

Metrolinx is sharing the initial draft of the Corktown Station Early Works Report, including the Corktown Station Natural Environment Report, via the Dropbox link enclosed in the email for Kawartha Nishnawbe First Nation's review. The Corktown Station Early Works Report documents the assessment of Corktown Station early works. It also outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures, and a consultation record. For a summary of the potential mitigation measures identified, please see the table found as **Attachment 2**.

Note that the initial draft of the report enclosed in the email currently does not include information on noise and vibration as the Corktown Station Noise and Vibration Report is still being prepared. The initial draft of the Corktown Station Noise and Vibration Report is anticipated to be shared with Kawartha Nishnawbe First Nation on **March 19, 2021** for review.

Metrolinx welcomes any comments or feedback on the initial draft of the Corktown Station Early Works Report from Kawartha Nishnawbe First Nation. Please provide these in writing no later than **April 15, 2021**.

Based on our currently anticipated schedule (**Figure 1**), the Notice of Publication of Draft Corktown Station Early Works Report is planned for late-April 2021, at which point the draft report will be available to all interested parties for review, including Kawartha Nishnawbe First Nation, the public and regulatory agencies.

### Archaeology

As outlined above, archaeological assessments are anticipated to take place as part of advancing Corktown Station Early Works. Metrolinx would appreciate any interest Kawartha Nishnawbe First Nation may have in participating in planned future archaeological fieldwork for this site. The maps in **Attachment 3** illustrate the areas that will be subject to future archaeological assessments that include fieldwork. Upon receipt of Kawartha Nishnawbe First Nation's interest in participating, Metrolinx will work to coordinate your Nation's involvement.

Metrolinx acknowledges that Kawartha Nishnawbe First Nation should be aware of and engaged regarding any future archaeological work, especially the discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will ensure that future archaeological assessments are provided to Kawartha Nishnawbe First Nation in draft form, prior to submission to MHSTCI.

### **Engagement**

Metrolinx is committed to an open, respectful, and transparent relationship with Kawartha Nishnawbe First Nation. We appreciate the significant volume of documents related to this Project that have been shared with Kawartha Nishnawbe First Nation. We are happy to assist in the review of these documents by meeting with Kawartha Nishnawbe First Nation or working to address any questions that Kawartha Nishnawbe First Nation may have about this Project. If you require additional information or materials or if you wish to discuss these Projects in more detail or set up a meeting, please contact Fallon Melander, Manager of Metrolinx's Indigenous Relations Office at [IndigenousRelations@metrolinx.com](mailto:IndigenousRelations@metrolinx.com).

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*. Thank you for your time in reviewing these assessments.

Thank you for your time in reviewing this letter.

| Vegetation Communities                                                                                      | <ul style="list-style-type: none"><li>City and private tree removal</li></ul>                                                                                                                            | <ul style="list-style-type: none"><li>An Arborist Report by an International Society of Arboriculture Certified Arborist will be prepared, if required, in accordance with the Ontario Forestry Act R.S.O. 1990, and other regulations and best management practices as applicable.</li><li>The Arborist Report will include, but not be limited to the individual identification of all trees within the Corktown Station early works construction areas including those that require removal or preservation, or trees that may be injured. Trees to be identified may include those on Metrolinx property, trees on public and private lands, and boundary trees. City of Toronto by-laws dictate the minimum area buffers to be inventoried and Diameter at Breast Height which requires inventory.</li><li>Prior to the undertaking of tree removals, a Tree Removal Strategy/Tree Preservation Plan will be developed to document tree protection and mitigation measures that follow the City of Toronto Tree Protection Policy and Specifications for Construction Near Trees Guidelines (2016b) and adherence with best practices, standards and regulations on safety, environmental and wildlife protections.</li><li>Compensation for tree removals will be undertaken in accordance with provisions outlined in the Metrolinx Vegetation Guideline (2020).</li><li>Pruning of branches will be conducted through the implementation of proper arboricultural techniques.</li><li>Tree Protection Zone fencing will be established to protect and prevent tree injuries. Tree Protection Zones will be clearly staked prior to construction using barriers in accordance with local by-law requirements.</li></ul> | <ul style="list-style-type: none"><li>Regular inspection in areas of vegetation removal will be undertaken as required during construction to ensure that fencing is intact, only specified trees are removed and no damage is caused to the remaining trees and adjacent vegetation communities.</li><li>On-site inspection will be undertaken to confirm the implementation of the mitigation measures and identify corrective actions if required. Corrective actions may include additional site maintenance and alteration of activities to minimize impacts.</li><li>If required, the approach to compensation monitoring will be developed in accordance with Metrolinx’s Vegetation Guideline (2020).</li></ul> |

| Environmental Component                               | Potential Impact                                                                                                                                                                              | Mitigation Measure(s)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Monitoring Activities                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|-------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Vegetation Communities</b>                         | <ul style="list-style-type: none"><li>▪ Soil contamination as a result of spills (e.g., grease and/or fuel) from equipment use</li><li>▪ Introduction or spread of Invasive Species</li></ul> | <ul style="list-style-type: none"><li>▪ A Spill Prevention and Contingency Plan will be developed and adhered to. Spills will be immediately contained and cleaned up in accordance with provincial regulatory requirements and the contingency plan.</li><li>▪ Refuelling shall be done within refuelling stations lined with appropriate material to prevent seepage and fuel discharge.</li><li>▪ All machinery, construction equipment and vehicles arriving on site should be in clean condition (e.g., free of fluid leaks, soils containing seeds of plant material from invasive species) and be inspected and washed in accordance with the Clean Equipment Protocol for Industry (Halloran et al., 2013) prior to arriving and leaving the construction site in order to prevent the spread of invasive species to other locations.</li></ul>                  | <ul style="list-style-type: none"><li>▪ On-site inspection will be undertaken to confirm the implementation of the mitigation measures and identify corrective actions if required. Corrective actions may include additional site maintenance and alteration of activities to minimize impacts.</li><li>▪ Ensure precautions are being taken to minimize the spread of invasive species by implementing the Clean Equipment Protocol for Industry (Halloran et al., 2013) on equipment and machinery prior to moving sites.</li><li>▪</li></ul> |
| <b>Wildlife and Wildlife Habitat – General</b>        | <ul style="list-style-type: none"><li>▪ Disturbance, displacement or mortality of wildlife</li></ul>                                                                                          | <ul style="list-style-type: none"><li>▪ Prior to construction, investigation of the Corktown Station early works construction areas for wildlife and wildlife habitat that may have established following the completion of previous surveys will be undertaken, as appropriate.</li><li>▪ If wildlife is encountered, measures will be implemented to avoid destruction, injury, or interference with the species, and/or its habitat. For example, construction activities will cease or be reduced, and wildlife will be encouraged to move off-site and away from the construction area on its own. A qualified Biologist will be contacted to define the appropriate buffer required from wildlife.</li></ul>                                                                                                                                                       | <ul style="list-style-type: none"><li>▪ On-site inspection by on-site environmental workers or construction staff should occur daily within the construction area to ensure that no wildlife is trapped within the construction area.</li><li>▪ On-site inspection will be undertaken to confirm the implementation of the mitigation measures and identify corrective actions if required. Corrective actions may include additional site maintenance and alteration of activities to minimize impacts.</li></ul>                               |
| <b>Significant Wildlife Habitat: Common Nighthawk</b> | <ul style="list-style-type: none"><li>▪ Removal of candidate nesting habitat for Common Nighthawk</li></ul>                                                                                   | <ul style="list-style-type: none"><li>▪ Refer below to mitigation measures described for Migratory Breeding Birds and Nests.</li><li>▪ Demolition of buildings should be scheduled outside of the breeding bird season of April 1 to August 31. If this is not possible and buildings must be demolished during this period, the following will be completed:</li><li>▪ The roofs will be checked for presence of gravel. If gravel is not present, then the building is unlikely to provide suitable nesting habitat for Common Nighthawk. If gravel is present, a search for eggs and nesting activity for Common Nighthawk on the roof will be conducted. If nests or nesting activity of Common Nighthawk are confirmed, the building cannot be demolished until it is confirmed by a Qualified Biologist that young have fully fledged and left the nest.</li></ul> | <ul style="list-style-type: none"><li>▪ Refer below for monitoring requirements described for Migratory Breeding Birds and Nests.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                      |
| <b>Migratory Breeding Birds and Nests</b>             | <ul style="list-style-type: none"><li>▪ Disturbance or destruction of migratory bird nests</li></ul>                                                                                          | <ul style="list-style-type: none"><li>▪ All works must comply with the Migratory Birds Convention Act, including timing windows for the nesting period (April 1 to August 31 in Ontario).</li><li>▪ If activities are proposed to occur during the general nesting period, a breeding bird and nest survey will be undertaken prior to required activities. Nest searches by an experienced searcher are required and will be completed by a qualified Biologist no more than 48 hours prior to vegetation removal.</li><li>▪ If a nest of a migratory bird is found outside of this nesting period (including a ground nest) it still receives protection.</li></ul>                                                                                                                                                                                                    | <ul style="list-style-type: none"><li>▪ Regular monitoring (field observations, on-site inspections) will be undertaken to confirm that activities do not encroach into nesting areas or disturb active nesting sites.</li></ul>                                                                                                                                                                                                                                                                                                                 |

If clarification is required regarding regulatory requirements, the appropriate regulatory agencies will be consulted.

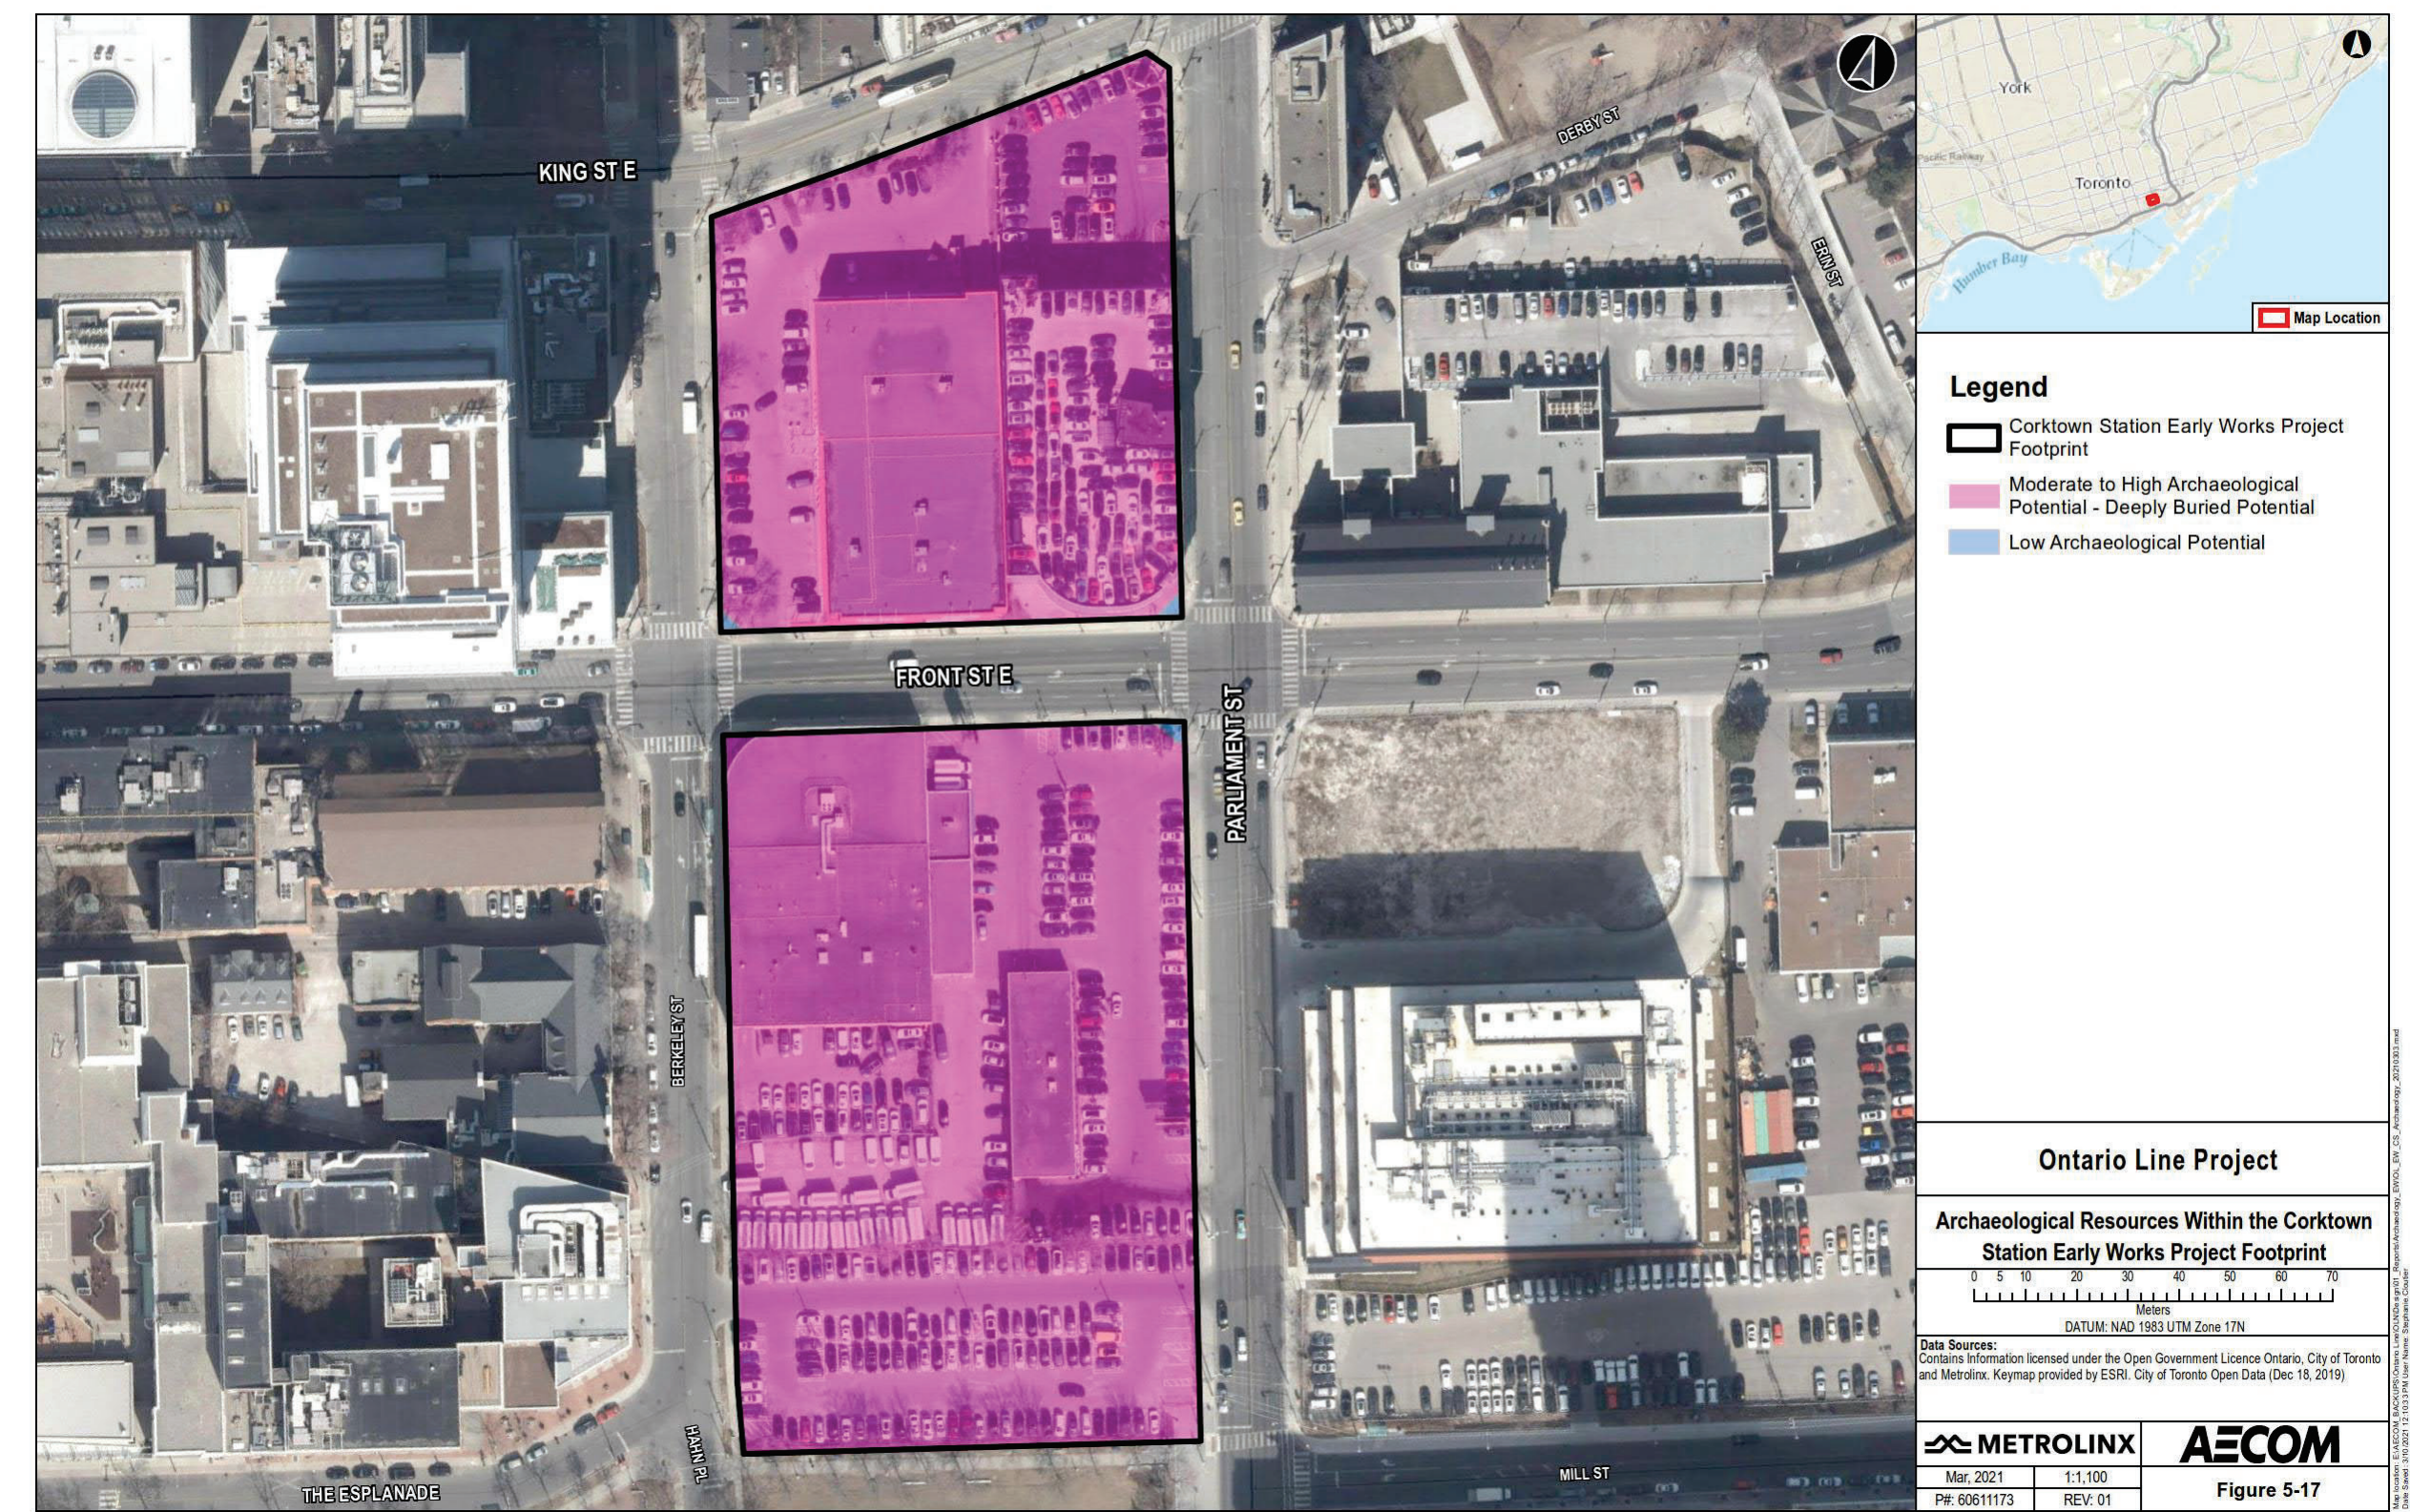

Table 6-8: Potential Impacts, Mitigation Measures and Monitoring Activities – Archaeological Resources

| Environmental Component  | Potential Impact                                                                                                                                                            | Mitigation Measure(s)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Monitoring Activities                                                                                                                                                                                                          |
|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

The proponent or person discovering the archaeological resources must cease alteration of the site immediately and engage a licensed archaeologist to carry out archaeological field work, in compliance with Section 48(1) of the Ontario Heritage Act. Any person discovering human remains must immediately notify the police or coroner and the Registrar of Cemeteries, Ministry of Government Services. In addition, consultation with relevant Indigenous Nations will be initiated in the event that archaeological resources or human remains are discovered.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <ul style="list-style-type: none"><li>None identified at this time.</li><li>Metrolinx will adhere to all recommendations in any subsequent archaeological assessments, including monitoring activities, as required.</li></ul> |

<sup>29</sup> Ground disturbing activities can be defined as any and all activities that will or have the potential to impact/disturb the area below the surface. Example of activities include, but is not limited to, heavy machine movement/weight, clearing, grading, excavating, trenching, drilling, and transporting and filling of land.

---

Dear Sir/Madam,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. Attached you will find a letter providing an update on the project. The purpose of this letter is to share the Draft Corktown Station Early Works Report (EWR) prepared for the Ontario Line Project and provide a continued invitation for feedback.

In an effort to streamline your review, we draw your attention to the attachment which provides an overview of the expected environmental impacts and proposed mitigations, as we know this may be of specific interest to you.

We ask that you provide any comments no later than June 11, 2021.

The reports are available at the following link:

We appreciate the volume of documents that Metrolinx has shared with MNO. If you have any questions or concerns, please do not hesitate to contact the Indigenous Relations Office.

Miigwetch,

Fallon

## Notice of Publication of Draft Corktown Station Early Works Report

### Ontario Line Project

#### The Project

The Ontario Line will bring 15.6 kilometres of new subway service to Toronto to make it faster and easier for people to get where they need to be each day. The line will stretch across the city, from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line is proposed to include 15 potential stations, including six interchange stations, and connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 of its stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable commutes.

#### Corktown Station Early Works

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These early works are being advanced to prepare the site for future construction staging and laydown to support tunneling and below ground construction activities, and work associated with the future Corktown Station.

The First Parliament site, located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail), and remnants of early Toronto industry may be found here.

Metrolinx is eager to unlock the potential of the site and work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

Environmental impacts of Corktown Station early works are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*. In accordance with Section 8 of O. Reg. 341/20, Metrolinx has prepared the Draft Corktown Station Early Works Report (EWR) that is now available for public review.

The Draft EWR documents the assessment of Corktown Station early works. The report outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures and a consultation record.

### **The Draft Early Works Report Review and Consultation Process**

Effective **May 12, 2021**, the Draft Corktown Station EWR will be available for review on the project webpage ([www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)).

As we temporarily shift to virtual open houses, please join us online from **May 12 to June 11, 2021** to find out more about and provide your feedback on the Draft Corktown Station EWR via the webpage form.

Those who wish to provide comments on the Draft Corktown Station EWR must do so by **June 11, 2021** and submit them using the webpage form or address them to the following email: [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com).

Section 10 of O. Reg. 341/20 requires Metrolinx to establish an issues resolution process to attempt to resolve any concerns raised by the public or Indigenous Nations during the review period. At the end of the review period, Metrolinx will update the Draft Corktown Station EWR by adding a description of the issues resolution process, what Metrolinx did to address any concerns, and if the early works implementation timeline will be impacted as a result of addressing concerns. Metrolinx will then publish the Final Corktown Station EWR on the project webpage: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline) and issue a Notice of Publication of Final Corktown Station EWR.

To obtain a copy of the Draft Corktown Station EWR, please contact the project email listed above.

**Josh Vandezande (T: 416-202-5100, E: [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com)) may be contacted on behalf of Metrolinx.**

Métis Consultation Unit  
Métis Nation of Ontario  
500 Old St. Patrick Street, Unit D  
Ottawa, ON K1N 9G4  
**Delivered by Email**

Dear Sir/Madam,

**RE: Ontario Line Project – Notice of Publication of Draft Corktown Station Early Works Report**

Metrolinx, a regional transportation agency, is helping to transform the way the Greater Golden Horseshoe region moves by building a fast, convenient and integrated transit network. As part of this work, Metrolinx is proceeding with the Ontario Line which will bring 15.6 kilometres of subway service to Toronto. The purpose of this letter is to share information regarding the Ontario Line project with Métis Nation of Ontario.

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Métis Nation of Ontario. Metrolinx appreciates and respects Métis Nation of Ontario's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to share with Métis Nation of Ontario the Draft Corktown Station Early Works Report (EWR).

**Project Description**

The Ontario Line will stretch from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line is proposed to include 15 stations, including six interchange stations, and connections to three GO train lines, two existing subway lines, the Eglinton Crosstown LRT, and streetcar lines. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable commutes. More information on the Project can be found on our website:

[www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)

The initial draft of the Corktown Station EWR and a letter outlining Corktown Station early works were shared with Métis Nation of Ontario on March 11, 2021. As outlined in the letter, environmental impacts of the Ontario Line Project are being assessed in

accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*.

## Draft Corktown Station Early Works Report

In accordance with Section 8 of O. Reg. 341/20, Metrolinx has prepared a Draft Corktown Station EWR that documents the assessment of Corktown Station early works.

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These early works are being advanced to prepare the site for future construction staging and laydown to support tunneling and below ground construction activities, and work associated with the future Corktown Station. The location of the Corktown Station early works project footprint and study area can be viewed below in **Figure 1**.

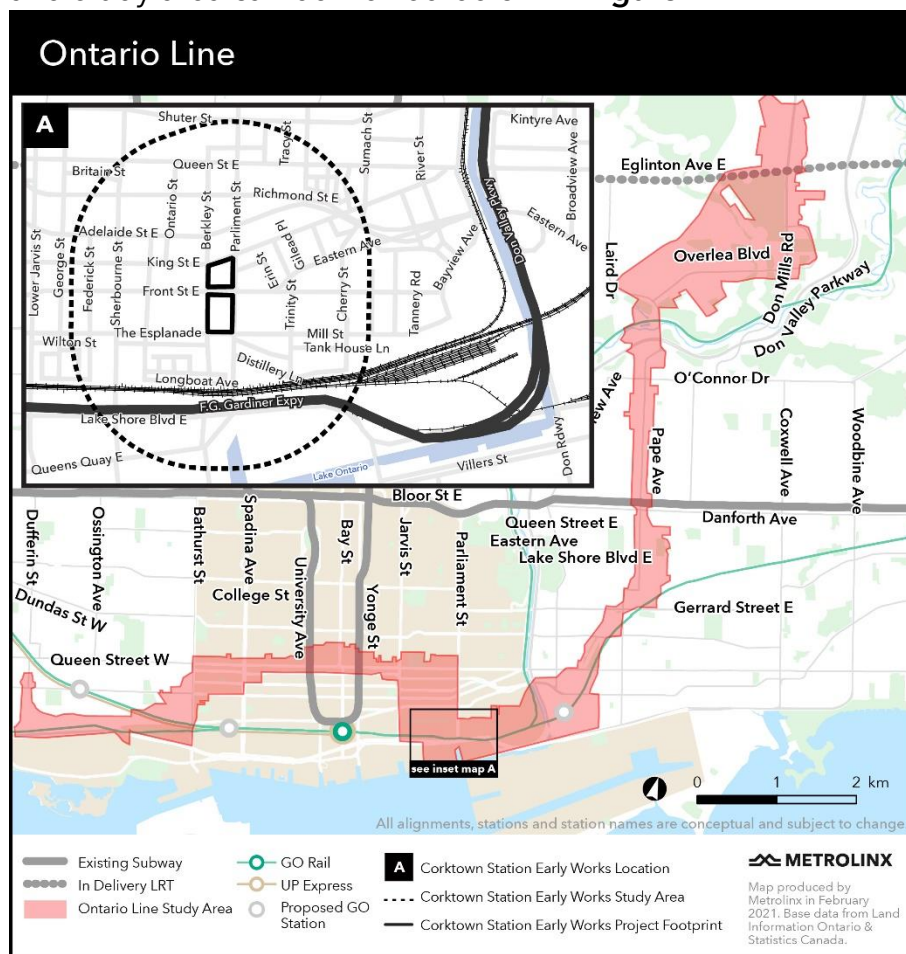

Figure 1: Map of Corktown Station Early Works

The First Parliament site, located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail) and remnants of early Toronto industry may be found here. Metrolinx is eager to work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

The EWR documents the assessment of Corktown Station early works and outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures, and a consultation record.

The Draft EWR is available for your review and can be found via the Dropbox link shared in the body of the email that is associated with this letter. We welcome any additional comments you may have on the Draft EWR. The Draft EWR is available for review and comment starting **May 12, 2021** and ending on **June 11, 2021**. The Notice of Publication of Draft Corktown Station EWR is provided in **Attachment 1**. The Draft EWR will be updated following the review period, and the Final EWR will be published on the Project webpage ([www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)) and shared with Métis Nation of Ontario.

#### Potential Impacts and Mitigation Measures

The tables found enclosed in **Attachment 2 and 3** provide a summary of natural environment and archaeology potential impacts and mitigation measures identified as part of the Draft EWR that may be of interest to *Métis Nation of Ontario*. If *Métis Nation of Ontario* has any feedback about these potential impacts and/or mitigation strategies, or any other aspects of the Ontario Line, we welcome the opportunity to discuss further.

#### Revisions to the Initial Draft of the Corktown Station Early Works Report

In accordance with O. Reg. 341/20, Metrolinx has now incorporated comments and feedback from the initial round of engagement with Indigenous Nations and agencies on the initial draft of the Corktown Station EWR into the Draft EWR.

To streamline capacity for Métis Nation of Ontario to provide comments or feedback, a summary of revisions to the EWR since the circulation of the initial draft of the EWR is as follows:

- Minor editorial changes to address grammatical and syntax errors and updates to reflect comments received from agencies;
- Clarification that the project operations, construction of Corktown Station and other project components will be assessed in the Ontario Line Environmental Impact Assessment Report;
- Inclusion of information on the Parkland Strategy (City of Toronto, 2019), First Parliament Master Plan (City of Toronto, 2020) and additional information on planned community services and facilities in the Corktown Station Early Works Study Area;
- Edits to the text to reflect that the Ministry of Heritage, Sport, Tourism and Culture Industries' (MHSTCI) Minister's Consent has been granted for the demolition and removal of the non-heritage buildings at 265 Front Street East and removal of the heritage attributes at 265 Front Street East, 271 Front Street East and 25 Berkeley Street located on the First Parliament Site, and affirming Metrolinx's commitment to fulfilling the conditions outlined in the Minister's Consent, including completion of archaeological requirements;
- Additional mitigation measures for environmental disciplines such as archaeology, air quality and traffic and transportation, that include:
  - Coordination and completion of required archaeological investigations, early works activities and/or activities that have the potential for vibration effects such that buried archaeological resources are appropriately considered;
  - Use of non-chloride dust suppressants; and
  - Consultation with the City of Toronto to minimize potential impacts during special events (e.g., the Toronto Christmas Market at the Distillery District) should closures or long-term impacts be required.
- Revision of traffic and transportation figures to include additional information such as intersection names and inclusion of an additional noise and vibration figure to show representative receptor locations.

## Engagement

Metrolinx is committed to an open, respectful, and transparent relationship with Métis Nation of Ontario. We appreciate the significant volume of documents related to this Project that have been shared with Métis Nation of Ontario. We are happy to assist in the review of these documents by meeting with Métis Nation of Ontario or working to address any questions that Métis Nation of Ontario may have about this Project. If you require additional information or materials or if you wish to discuss these Projects in more detail or set up a meeting, please contact Fallon Melander, Manager of Metrolinx's Indigenous Relations Office at [IndigenousRelations@metrolinx.com](mailto:IndigenousRelations@metrolinx.com).

Metrolinx welcomes any comments or feedback on the Draft EWR from Métis Nation of Ontario. Please provide these in writing no later than **June 11, 2021**. Comments and information regarding this draft report will be collected to assist in meeting the requirements of the *Environmental Assessment Act* and may be included in study documentation. With the exception of personal information, all comments will become part of the public record. Kindly note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*.

Thank you for your time in reviewing this letter.

Yours Truly,

A handwritten signature in black ink, appearing to read 'Maria Zintchenko', with a long horizontal flourish extending to the right.

---

Dear Sir/Madam,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. We recently communicated with MNO about the proposed Corktown Station which is along the planned alignment of the Ontario Line. This location includes parcels of land which were once the site of Upper Canada's First Parliament buildings. Metrolinx and its partners are exploring opportunities to commemorate the history of this site, and have been engaging with various parties including the City of Toronto and the Mississaugas of the Credit First Nation, on whose treaty territory this project is occurring.

Given the significant chance of recovering Indigenous and European artifacts during the Corktown Station Early Works, a detailed archaeological workplan is being developed. Metrolinx recognizes the importance and value of Indigenous monitors for any archaeology related to the Ontario Line Project. In our previous communication, an invitation was included for your Nation to participate in any archaeological fieldwork and monitoring during the Corktown Station Early Works, including demolition of modern buildings currently on the First Parliament site.

This work is anticipated to commence in Fall 2021, and if you have not yet expressed interest in participating, please feel free to do so at your earliest convenience. As a reminder any comments on the draft Corktown Station Early Works Report should be provided no later than **April 15, 2021**.

Metrolinx recognizes that the history of this location extends beyond European use, and as such, wants to take the opportunity to understand any significance it may have to Indigenous Nations. Metrolinx would like to meet with MNO to discuss the First Parliament site, its commemoration, as well as review the broader Ontario Line project if you wish. We recognize that traditional knowledge of this area may be sacred and/or not appropriate to be shared, but would appreciate any information that may be appropriate for Metrolinx to consider.

This letter is not intended to replace engagement but to provide a high level summary for your information. We would very much appreciate meeting with MNO to discuss in more detail. Please let me know if you have any questions or concerns. We appreciate the volume of documents that Metrolinx has shared with MNO. If you have any questions or concerns, please do not hesitate to contact me.

Miigwetch,

Fallon

**Delivered by Email**

Dear Sir/Madam,

**RE: Ontario Line Project - First Parliament Site and Lime Kiln Site**

Metrolinx, a regional transportation agency, is helping to transform the way the Greater Golden Horseshoe moves by building a fast, convenient and integrated transit network. As part of this work, Metrolinx is continuing the pre-construction planning of the Ontario Line which will bring nearly 16 kilometres of subway service to Toronto.

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Métis Nation of Ontario. Metrolinx appreciates and respects Métis Nation of Ontario's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to share with Métis Nation of Ontario information regarding Corktown Station early works and additional information regarding upcoming field visits and investigations at the Corktown Station early works site, which includes two registered archaeological sites, the First Parliament site and the Lime Kiln site.

**Project Description**

The proposed Ontario Line is a new 16-kilometer subway line, which will occupy an exclusive right-of-way system encompassing a combination of below-grade, above-grade, and at-grade alignment. The route (Figure 1) will run from Ontario Place/Exhibition through downtown Toronto to the Ontario Science Centre in the City of Toronto, with six (6) potential interchange stations and 17 new connections to GO Transit, existing subways and streetcars. More information on the Project can be found on our website: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)

**Corktown Station Early Works**

As communicated in the letter sent to Métis Nation of Ontario on March 11, 2021, the Corktown Station site has been identified for launching tunnel excavation equipment for the downtown and Don Yard segments of the proposed Ontario Line alignment, as well as the location of the Corktown Station. The First Parliament and Lime Kiln Sites, located within the Corktown Station area, are known archaeological sites which require additional archaeological study ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures, followed by completion of necessary archaeological studies, is required. Completion of this preparatory work on an expedited basis is essential to allow for the timely delivery of the overall Project and is anticipated to begin in the Fall 2021, subject to the completion of the Corktown Station early works process in accordance with Ontario Regulation 341/20: Ontario Line Project.

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These activities will enable completion of environmental due diligence investigations, including archaeological assessments. These activities will occur on properties within the Corktown Station early works project footprint, as shown in **Figure 1**.

Figure 1: Map of Corktown Station Early Works

Environmental impacts of Corktown Station early works are being assessed in accordance with O. Reg. 341/20. Metrolinx shared the draft Corktown Station Early Works Report and associated discipline reports with Métis Nation of Ontario on March 11, 2021 and had requested any comments to be provided by April 9, 2021.

## **Archaeological Work at the First Parliament Site and Lime Kiln Site**

Metrolinx appreciates the significance of archaeology to Métis Nation of Ontario. The properties at 265 Front Street East, 271 Front Street East, and 25 Berkeley Street, in the St. Lawrence neighbourhood of the City of Toronto, are collectively host to the First Parliament Site. It is located on the southwest corner of Parliament Street and King Street, between Parliament Street and Berkeley Street. The First Parliament Site is a registered archaeological site (AjGu-41) which may include resources associated with the First and Second Parliament Buildings, the Home District Gaol, and Consumers' Gas company buildings. The surface of the property is currently occupied by automotive businesses, including a car dealership, car wash, and surface parking lot. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and remnants of early Toronto industry may be found at this site.

North of the First Parliament Site is another registered archaeological site (AjGu-64), the Lime Kiln Site, which includes remains from the Toronto Lime Works Company. A variety of structural features, in various states of preservation, have been documented on this site. The location of the Lime Kiln Site and the First Parliament Site are shown in **Figure 2**.

Figure 2: Location of First Parliament Site and Lime Kiln Site Areas

The First Parliament Site and Lime Kiln Site require additional archaeological studies ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures is necessary. Completion of this preparatory work is essential to allow for the timely delivery of the Ontario Line.

Archaeological fieldwork to remove or protect archaeological resources is anticipated to commence in early Fall 2021, and a workplan for these archaeological investigations is under development. As mentioned in the letter sent on March 11, 2021, Métis Nation of Ontario is invited to participate in all archaeological fieldwork, and to review and provide comments on forthcoming reports.

### **Feedback on Commemoration of First Parliament Site**

Metrolinx appreciates that the history of the First Parliament site is not one simply of Canadian origin, but rather holds longer history and tradition. Metrolinx also appreciates that the site of the First Parliament of Upper Canada is linked to a history of colonization and harmful practices towards Indigenous Peoples. Given the significance of this site, Metrolinx is engaging with Indigenous Nations, City of Toronto and the broader community to identify opportunities for commemoration. Metrolinx is committed to ensuring that any feedback from Métis Nation of Ontario regarding the significance of this site is considered as part of this commemoration. Metrolinx appreciates that traditional or cultural knowledge about this site may be sacred and/or not be appropriate to be shared but welcomes any comments or ideas from Métis Nation of Ontario that may be appropriate to commemorate Indigenous Peoples.

### **Engagement**

Metrolinx is committed to an open, respectful, and transparent relationship with Métis Nation of Ontario. We would like to meet with Métis Nation of Ontario to better understand any significance the First Parliament site may have to Métis Nation of Ontario. We are also happy to assist in reviewing the Corktown Station Early Works Report or reviewing the proposed archaeological workplan for this site. If Métis Nation of Ontario requires additional information or materials, or you wish to discuss this project in more detail or set up a meeting, please contact Fallon Melander, Manager, Indigenous Relations at Metrolinx. She can be contacted at [IndigenousRelations@metrolinx.com](mailto:IndigenousRelations@metrolinx.com).

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*. Thank you for your time in reviewing these assessments.

Thank you for your time in reviewing this letter.

Yours Truly,

**Subject:** Ontario Line - Project Update and Draft Corktown Station Early Works Report for Review + Invitation to Participate in Archaeological Fieldwork

Dear Sir/Madam,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. Attached you will find a letter providing an update on the project. The purpose of this letter is to:

- Provide an update on the scope of the project work
- share the initial draft of the Early Works Report for the proposed Corktown Station

Invite MNO to participate in upcoming archaeological fieldwork

In an effort to streamline your review, we draw your attention to the attachment which provides an overview of the expected environmental impacts and proposed mitigations, as we know this may be of specific interest to you.

Metrolinx is also preparing a letter specific to works being planned within the Don Valley as we recognize the significance of this waterway to many Nations. We hope to share that letter soon. We are happy to meet with MNO to discuss the Ontario Line and address any questions or concerns that MNO may have.

We ask that any comments on the draft Corktown Station Early Works Report be provided no later than **April 15, 2021**. Please note that the Noise and Vibration Report, which will be part of the Early Works Report is still being prepared and we will share with MNO by March 19, 2021.

The draft Corktown Station Early Works Report is available at the following link:

[REDACTED]

Please let us know as soon as possible if MNO has interest in participating in future archaeological fieldwork.

We appreciate the volume of documents that Metrolinx has shared with MNO.

If you have any questions or concerns, please do not hesitate to contact me.

Miigwetch,

Fallon

Dear Sir/Madam,

## **RE: Ontario Line Project - Corktown Station Early Works Report**

Metrolinx, a regional transportation agency, is helping to transform the way the Greater Golden Horseshoe region moves by building a fast, convenient and integrated transit network. As part of this work, Metrolinx is proceeding with the Ontario Line which will bring nearly 16 kilometres of subway service to Toronto. The purpose of this letter is to share information regarding the Ontario Line project with Métis Nation of Ontario.

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Métis Nation of Ontario. Metrolinx appreciates and respects Métis Nation of Ontario's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to share with Métis Nation of Ontario information regarding Corktown Station early works and invite feedback on the initial draft of the Corktown Station Early Works Report.

## **Project Description**

The Project is a new subway line with connections to Line 1 (Yonge-University) subway service at Osgoode and Queen Stations, Line 2 (Bloor-Danforth) subway service at Pape Station, and Line 5 (Eglinton Crosstown) service at the future Science Centre Station. Fifteen stations are proposed, with additional connections to three GO Transit lines (Lakeshore East, Lakeshore West and Stouffville), and the Queen, King, Bathurst, Spadina, Harbourfront and Gerrard/Carlton streetcar routes. The Project will reduce crowding on Line 1 and provide connections to new high-order rapid transit neighbourhoods. More information on the Project can be found on our website: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)

## **Ontario Line Environmental Assessment Process and Reports**

In 2020, Metrolinx provided Métis Nation of Ontario with an outline of the Ontario Line environmental assessment process. The environmental assessment for the Ontario Line Project is being completed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20) made under the *Environmental Assessment Act*. The regulation outlines a Project-specific environmental assessment that includes an Environmental Conditions Report, an Environmental Impact Assessment Report and provides opportunity for Early Works Reports for assessment of works that are ready to proceed in advance of the Environmental Impact Assessment Report. An overview of the reports is outlined below and their anticipated publication timeline is provided in **Attachment 1**.

### Environmental Conditions Report

The Environmental Conditions Report characterizes existing environmental conditions within the Ontario Line study area through a combination of desktop review and field studies and was finalized in November 2020. The report also summarizes potential impacts and mitigation measures for consideration during project planning and design. Potential impacts and mitigation measures identified in the Environmental Conditions Report will be confirmed and refined within the Early Works Reports and the Environmental Impact Assessment Report.

### Early Works Reports

Metrolinx is assessing several early works components to support the main construction of the Ontario Line project. Early works are components of the Ontario Line Project that are anticipated to be ready to proceed before completion of the Environmental Impact Assessment Report, such as station construction, rail corridor expansion, utility relocation or bridge replacement or expansion, as defined in O. Reg. 341/20.

Initially, the early works required to support the Ontario Line project were assessed in a single report, which was shared in June 2020 and included Exhibition Station, Lower Don Bridges, Lakeshore East Joint Corridor and East Harbour early works.

Since then, the single Early Works Report has been split into several Early Works Reports, each covering either a single early works location or multiple locations if they are in close proximity. Each Early Works Report provides a description of the early works and alternatives considered, documents local environmental conditions, and outlines early works-specific environmental impacts, mitigation measures,

monitoring activities, potentially required permits and approvals and other components.

It is important to note that two new early works projects, Don Yard and Corktown Station, have been added as well. The Early Works Reports, including this new scope of work are summarized below:

- Exhibition Station Early Works  
Exhibition Station early works are documented in the Exhibition Station Early Works Report, finalized in February 2021.
- Lakeshore East Joint Corridor Early Works  
Lakeshore East Joint Corridor early works will be documented under a separate Early Works Report which will also include East Harbour Station.
- Lower Don Bridges & Don Yard Early Works  
Lower Don Bridges early works will be documented in the Lower Don Bridges and Don Yard Early Works Report. Don Yard is a new early works project that will include construction of Ontario Line tunnel and portal structures between Cherry Street and the Lower Don River and accompanying shift of the Richmond Hill and Lakeshore East GO tracks; installation or upgrading of retaining walls and noise barriers, where appropriate; and utility and signal infrastructure relocation or protection. The initial draft of the Lower Don Bridges and Don Yard Early Works Report is anticipated to be shared with Métis Nation of Ontario in mid to late April.
- Corktown Station Early Works  
Corktown Station is a new early works project. Further information on Corktown Station early works is provided below.

### Environmental Impact Assessment Report

The main report produced as part of this process is the Environmental Impact Assessment Report. It will cover the construction and operation of the Ontario Line. The report will include a final description of the Ontario Line Project, environmental impact evaluation results, mitigation measures, monitoring activities, potentially required permits and approvals and other components as outlined in O. Reg. 341/20.

## **Work along the Don River and within the vicinity of the Don Valley**

Metrolinx appreciates the significance of waterways to Métis Nation of Ontario. As such, Metrolinx is preparing an information letter specific to work occurring near or along the Don River and within the Valley. Metrolinx will provide details about the scope of work and anticipated natural environmental and archaeological assessments. Metrolinx is committed to exploring opportunities for Métis Nation of Ontario to participate in these assessments should Métis Nation of Ontario express interest.

## **Corktown Station Early Works**

The Corktown Station site has been identified for launching tunnel excavation equipment for the downtown and Don Yard segments of the proposed Ontario Line alignment, as well as the location for the Corktown Station. The First Parliament site, located within the Corktown Station area, is a known archaeological site which requires additional archaeological study ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures, followed by completion of necessary archaeological studies, is required. Completion of this preparatory work on an expedited basis is essential to allow for the timely delivery of the overall Project.

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These activities will enable completion of environmental due diligence investigations, including archaeological assessments. These activities will occur on properties within the Corktown Station early works project footprint, as shown in **Figure 2**.

Environmental impacts of Corktown Station early works are being assessed in accordance with O. Reg. 341/20.

Metrolinx is sharing the initial draft of the Corktown Station Early Works Report, including the Corktown Station Natural Environment Report, via the Dropbox link enclosed in the email for Métis Nation of Ontario's review. The Corktown Station Early Works Report documents the assessment of Corktown Station early works. It also outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures, and a consultation record. For a summary of the potential mitigation measures identified, please see the table found as **Attachment 2**.

Note that the initial draft of the report enclosed in the email currently does not include information on noise and vibration as the Corktown Station Noise and Vibration Report is still being prepared. The initial draft of the Corktown Station Noise and Vibration Report is anticipated to be shared with Métis Nation of Ontario on **March 19, 2021** for review.

Metrolinx welcomes any comments or feedback on the initial draft of the Corktown Station Early Works Report from Métis Nation of Ontario. Please provide these in writing no later than **April 15, 2021**.

Based on our currently anticipated schedule (**Figure 1**), the Notice of Publication of Draft Corktown Station Early Works Report is planned for late-April 2021, at which point the draft report will be available to all interested parties for review, including Métis Nation of Ontario, the public and regulatory agencies.

### Archaeology

As outlined above, archaeological assessments are anticipated to take place as part of advancing Corktown Station Early Works. Metrolinx would appreciate any interest Métis Nation of Ontario may have in participating in planned future archaeological fieldwork for this site. The maps in **Attachment 3** illustrate the areas that will be subject to future archaeological assessments that include fieldwork. Upon receipt of Métis Nation of Ontario's interest in participating, Metrolinx will work to coordinate your Nation's involvement.

Metrolinx acknowledges that Métis Nation of Ontario should be aware of and engaged regarding any future archaeological work, especially the discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will ensure that future archaeological assessments are provided to Métis Nation of Ontario in draft form, prior to submission to MHSTCI.

### **Engagement**

Metrolinx is committed to an open, respectful, and transparent relationship with Métis Nation of Ontario. We appreciate the significant volume of documents related to this Project that have been shared with Métis Nation of Ontario. We are happy to assist in the review of these documents by meeting with Métis Nation of Ontario or working to address any questions that Métis Nation of Ontario may have about this Project. If you require additional information or materials or if you wish to discuss these Projects in more detail or set up a meeting, please contact Fallon Melander, Manager of Metrolinx's Indigenous Relations Office at [IndigenousRelations@metrolinx.com](mailto:IndigenousRelations@metrolinx.com).

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*. Thank you for your time in reviewing these assessments.

Thank you for your time in reviewing this letter.

| Vegetation Communities                                                                                      | <ul style="list-style-type: none"><li>City and private tree removal</li></ul>                                                                                                                            | <ul style="list-style-type: none"><li>An Arborist Report by an International Society of Arboriculture Certified Arborist will be prepared, if required, in accordance with the Ontario Forestry Act R.S.O. 1990, and other regulations and best management practices as applicable.</li><li>The Arborist Report will include, but not be limited to the individual identification of all trees within the Corktown Station early works construction areas including those that require removal or preservation, or trees that may be injured. Trees to be identified may include those on Metrolinx property, trees on public and private lands, and boundary trees. City of Toronto by-laws dictate the minimum area buffers to be inventoried and Diameter at Breast Height which requires inventory.</li><li>Prior to the undertaking of tree removals, a Tree Removal Strategy/Tree Preservation Plan will be developed to document tree protection and mitigation measures that follow the City of Toronto Tree Protection Policy and Specifications for Construction Near Trees Guidelines (2016b) and adherence with best practices, standards and regulations on safety, environmental and wildlife protections.</li><li>Compensation for tree removals will be undertaken in accordance with provisions outlined in the Metrolinx Vegetation Guideline (2020).</li><li>Pruning of branches will be conducted through the implementation of proper arboricultural techniques.</li><li>Tree Protection Zone fencing will be established to protect and prevent tree injuries. Tree Protection Zones will be clearly staked prior to construction using barriers in accordance with local by-law requirements.</li></ul> | <ul style="list-style-type: none"><li>Regular inspection in areas of vegetation removal will be undertaken as required during construction to ensure that fencing is intact, only specified trees are removed and no damage is caused to the remaining trees and adjacent vegetation communities.</li><li>On-site inspection will be undertaken to confirm the implementation of the mitigation measures and identify corrective actions if required. Corrective actions may include additional site maintenance and alteration of activities to minimize impacts.</li><li>If required, the approach to compensation monitoring will be developed in accordance with Metrolinx’s Vegetation Guideline (2020).</li></ul> |

| Environmental Component                               | Potential Impact                                                                                                                                                                              | Mitigation Measure(s)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Monitoring Activities                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|-------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Vegetation Communities</b>                         | <ul style="list-style-type: none"><li>▪ Soil contamination as a result of spills (e.g., grease and/or fuel) from equipment use</li><li>▪ Introduction or spread of Invasive Species</li></ul> | <ul style="list-style-type: none"><li>▪ A Spill Prevention and Contingency Plan will be developed and adhered to. Spills will be immediately contained and cleaned up in accordance with provincial regulatory requirements and the contingency plan.</li><li>▪ Refuelling shall be done within refuelling stations lined with appropriate material to prevent seepage and fuel discharge.</li><li>▪ All machinery, construction equipment and vehicles arriving on site should be in clean condition (e.g., free of fluid leaks, soils containing seeds of plant material from invasive species) and be inspected and washed in accordance with the Clean Equipment Protocol for Industry (Halloran et al., 2013) prior to arriving and leaving the construction site in order to prevent the spread of invasive species to other locations.</li></ul>                  | <ul style="list-style-type: none"><li>▪ On-site inspection will be undertaken to confirm the implementation of the mitigation measures and identify corrective actions if required. Corrective actions may include additional site maintenance and alteration of activities to minimize impacts.</li><li>▪ Ensure precautions are being taken to minimize the spread of invasive species by implementing the Clean Equipment Protocol for Industry (Halloran et al., 2013) on equipment and machinery prior to moving sites.</li><li>▪</li></ul> |
| <b>Wildlife and Wildlife Habitat – General</b>        | <ul style="list-style-type: none"><li>▪ Disturbance, displacement or mortality of wildlife</li></ul>                                                                                          | <ul style="list-style-type: none"><li>▪ Prior to construction, investigation of the Corktown Station early works construction areas for wildlife and wildlife habitat that may have established following the completion of previous surveys will be undertaken, as appropriate.</li><li>▪ If wildlife is encountered, measures will be implemented to avoid destruction, injury, or interference with the species, and/or its habitat. For example, construction activities will cease or be reduced, and wildlife will be encouraged to move off-site and away from the construction area on its own. A qualified Biologist will be contacted to define the appropriate buffer required from wildlife.</li></ul>                                                                                                                                                       | <ul style="list-style-type: none"><li>▪ On-site inspection by on-site environmental workers or construction staff should occur daily within the construction area to ensure that no wildlife is trapped within the construction area.</li><li>▪ On-site inspection will be undertaken to confirm the implementation of the mitigation measures and identify corrective actions if required. Corrective actions may include additional site maintenance and alteration of activities to minimize impacts.</li></ul>                               |
| <b>Significant Wildlife Habitat: Common Nighthawk</b> | <ul style="list-style-type: none"><li>▪ Removal of candidate nesting habitat for Common Nighthawk</li></ul>                                                                                   | <ul style="list-style-type: none"><li>▪ Refer below to mitigation measures described for Migratory Breeding Birds and Nests.</li><li>▪ Demolition of buildings should be scheduled outside of the breeding bird season of April 1 to August 31. If this is not possible and buildings must be demolished during this period, the following will be completed:</li><li>▪ The roofs will be checked for presence of gravel. If gravel is not present, then the building is unlikely to provide suitable nesting habitat for Common Nighthawk. If gravel is present, a search for eggs and nesting activity for Common Nighthawk on the roof will be conducted. If nests or nesting activity of Common Nighthawk are confirmed, the building cannot be demolished until it is confirmed by a Qualified Biologist that young have fully fledged and left the nest.</li></ul> | <ul style="list-style-type: none"><li>▪ Refer below for monitoring requirements described for Migratory Breeding Birds and Nests.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                      |
| <b>Migratory Breeding Birds and Nests</b>             | <ul style="list-style-type: none"><li>▪ Disturbance or destruction of migratory bird nests</li></ul>                                                                                          | <ul style="list-style-type: none"><li>▪ All works must comply with the Migratory Birds Convention Act, including timing windows for the nesting period (April 1 to August 31 in Ontario).</li><li>▪ If activities are proposed to occur during the general nesting period, a breeding bird and nest survey will be undertaken prior to required activities. Nest searches by an experienced searcher are required and will be completed by a qualified Biologist no more than 48 hours prior to vegetation removal.</li><li>▪ If a nest of a migratory bird is found outside of this nesting period (including a ground nest) it still receives protection.</li></ul>                                                                                                                                                                                                    | <ul style="list-style-type: none"><li>▪ Regular monitoring (field observations, on-site inspections) will be undertaken to confirm that activities do not encroach into nesting areas or disturb active nesting sites.</li></ul>                                                                                                                                                                                                                                                                                                                 |

If clarification is required regarding regulatory requirements, the appropriate regulatory agencies will be consulted.

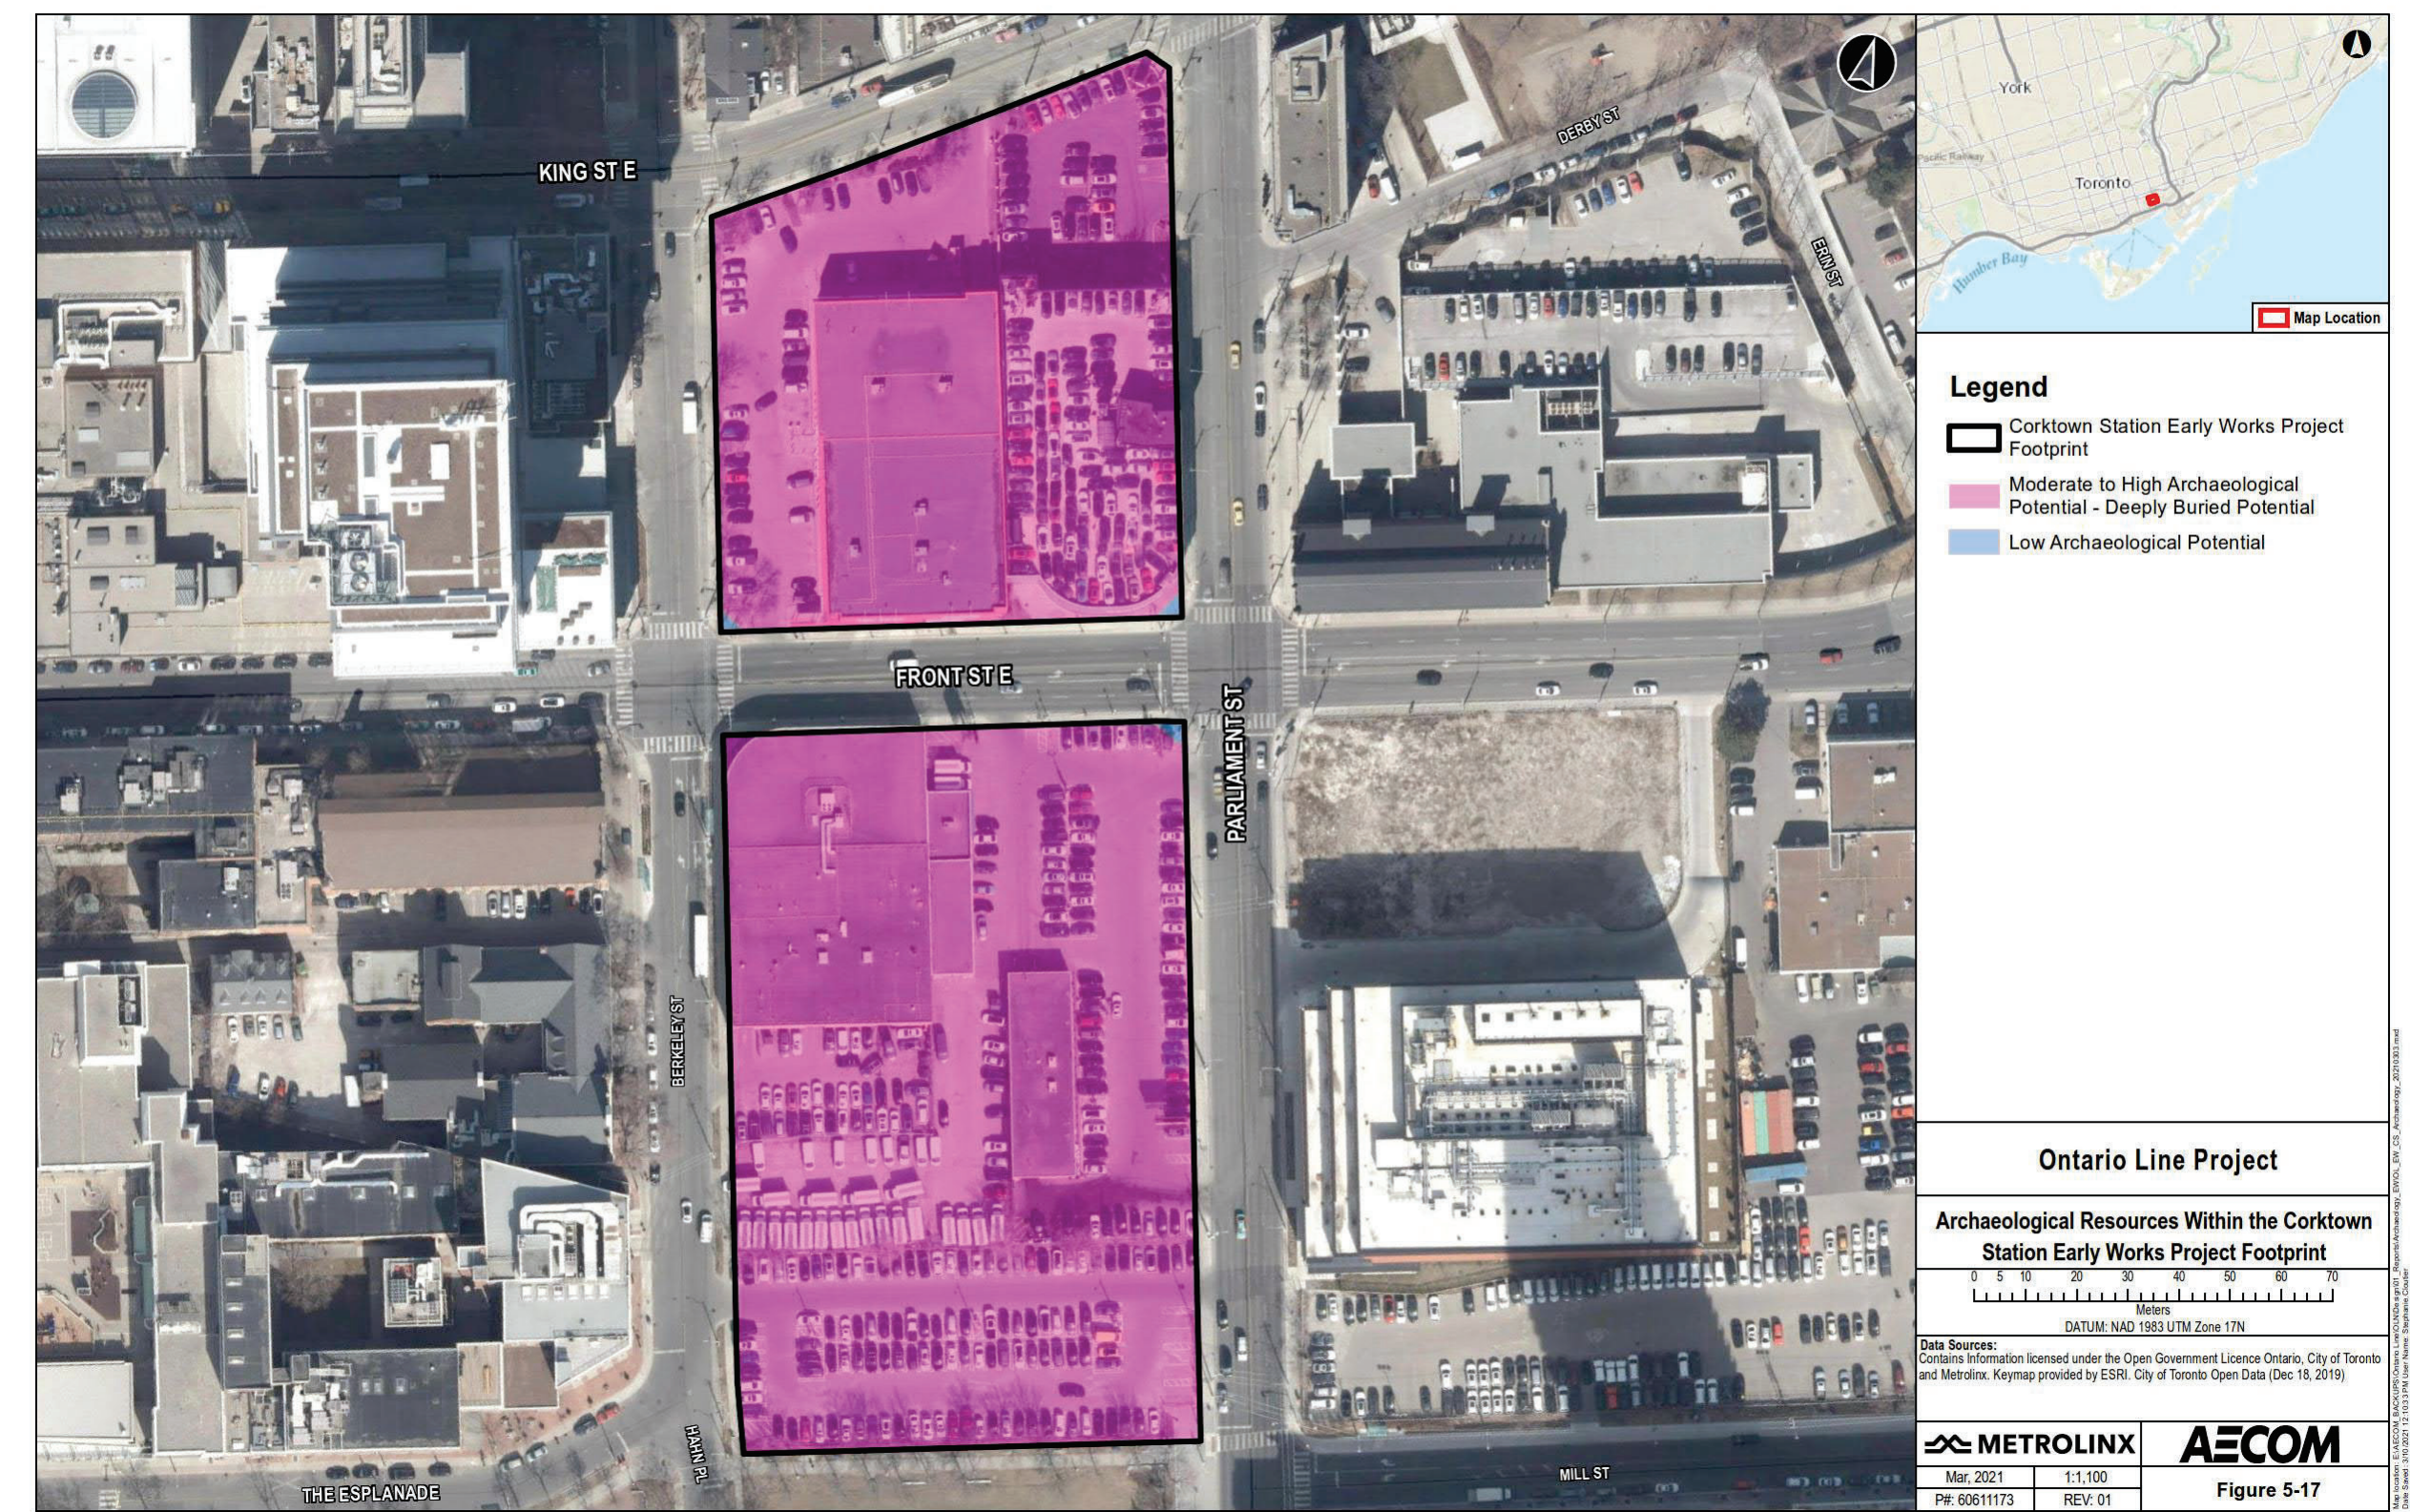

Table 6-8: Potential Impacts, Mitigation Measures and Monitoring Activities – Archaeological Resources

| Environmental Component  | Potential Impact                                                                                                                                                              | Mitigation Measure(s)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | Monitoring Activities                                                                                                                                                                                                              |
|--------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Archaeological Potential | <ul style="list-style-type: none"><li>▪ Potential for the disturbance of registered archaeological sites and/or archaeological resources not previously identified.</li></ul> | <ul style="list-style-type: none"><li>▪ Areas identified as retaining archaeological potential in the Corktown Station Early Works Project Footprint, as per the Ontario Line South Stage 1 Archaeological Assessment Report (AECOM, 2020c), are shown in <b>Figure 5-17</b>, and include the following. Should ground disturbing activities<sup>29</sup> be planned within these areas, further archaeological assessment must be completed prior to any ground disturbing activities.<ul style="list-style-type: none"><li>– The majority of the Corktown Station Early Works Project Footprint on either side of Front Street retains moderate to high archaeological potential where deeply buried archaeological potential remains, such as for discovering pre-contact Indigenous materials and/or materials related to the early development and expansion of the City of Toronto, including the First and Second Parliament Buildings, the Home District Gaol, and the Consumers’ Gas company buildings.</li></ul></li><li>▪ Given the significance of the First Parliament Site, all previous site specific archaeological assessments should be reviewed to determine what additional archaeological work is required.</li><li>▪ Any additional Archaeological Assessments (e.g., Stage 2, Stage 3 if recommended by the Stage 2) shall be completed as early as possible, and prior to any ground disturbing activities. This work shall be done in accordance with the Ministry of Heritage, Sport, Tourism and Culture Industries’ Standards and Guidelines for Consultant Archaeologists (2011) to identify any archaeological resources that may be present.</li><li>▪ Indigenous Nations will be invited to participate in monitoring requirements for any subsequent archaeological work is recommended. All future archaeological assessment findings will be shared with the Indigenous Nations that were engaged during the Stage 1 archaeological assessment.</li></ul> | <ul style="list-style-type: none"><li>▪ None identified at this time.</li><li>▪ Metrolinx will adhere to all recommendations in any subsequent archaeological assessments, including monitoring activities, as required.</li></ul> |

The proponent or person discovering the archaeological resources must cease alteration of the site immediately and engage a licensed archaeologist to carry out archaeological field work, in compliance with Section 48(1) of the Ontario Heritage Act. Any person discovering human remains must immediately notify the police or coroner and the Registrar of Cemeteries, Ministry of Government Services. In addition, consultation with relevant Indigenous Nations will be initiated in the event that archaeological resources or human remains are discovered.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | <ul style="list-style-type: none"><li>▪ None identified at this time.</li><li>▪ Metrolinx will adhere to all recommendations in any subsequent archaeological assessments, including monitoring activities, as required.</li></ul> |

<sup>29</sup> Ground disturbing activities can be defined as any and all activities that will or have the potential to impact/disturb the area below the surface. Example of activities include, but is not limited to, heavy machine movement/weight, clearing, grading, excavating, trenching, drilling, and transporting and filling of land.

**Subject:** Ontario Line: Draft Corktown Station Early Works Report for Review

Dear Fawn and Mark,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. Attached you will find a letter providing an update on the project. The purpose of this letter is to share the Draft Corktown Station Early Works Report (EWR) prepared for the Ontario Line Project and provide a continued invitation for feedback.

In an effort to streamline your review, we draw your attention to the attachment which provides an overview of the expected environmental impacts and proposed mitigations, as we know this may be of specific interest to you.

We ask that you provide any comments no later than June 11, 2021.

The reports are available at the following link:

[Redacted link]

We appreciate the volume of documents that Metrolinx has shared with your Nation. If you have any questions or concerns, please do not hesitate to contact the Indigenous Relations Office.

Miigwetch,

Fallon

## Notice of Publication of Draft Corktown Station Early Works Report Ontario Line Project

### The Project

The Ontario Line will bring 15.6 kilometres of new subway service to Toronto to make it faster and easier for people to get where they need to be each day. The line will stretch across the city, from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line is proposed to include 15 potential stations, including six interchange stations, and connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 of its stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable commutes.

### Corktown Station Early Works

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These early works are being advanced to prepare the site for future construction staging and laydown to support tunneling and below ground construction activities, and work associated with the future Corktown Station.

The First Parliament site, located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail), and remnants of early Toronto industry may be found here.

Metrolinx is eager to unlock the potential of the site and work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

Environmental impacts of Corktown Station early works are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*. In accordance with Section 8 of O. Reg. 341/20, Metrolinx has prepared the Draft Corktown Station Early Works Report (EWR) that is now available for public review.

The Draft EWR documents the assessment of Corktown Station early works. The report outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures and a consultation record.

### **The Draft Early Works Report Review and Consultation Process**

Effective **May 12, 2021**, the Draft Corktown Station EWR will be available for review on the project webpage ([www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)).

As we temporarily shift to virtual open houses, please join us online from **May 12 to June 11, 2021** to find out more about and provide your feedback on the Draft Corktown Station EWR via the webpage form.

Those who wish to provide comments on the Draft Corktown Station EWR must do so by **June 11, 2021** and submit them using the webpage form or address them to the following email: [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com).

Section 10 of O. Reg. 341/20 requires Metrolinx to establish an issues resolution process to attempt to resolve any concerns raised by the public or Indigenous Nations during the review period. At the end of the review period, Metrolinx will update the Draft Corktown Station EWR by adding a description of the issues resolution process, what Metrolinx did to address any concerns, and if the early works implementation timeline will be impacted as a result of addressing concerns. Metrolinx will then publish the Final Corktown Station EWR on the project webpage: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline) and issue a Notice of Publication of Final Corktown Station EWR.

To obtain a copy of the Draft Corktown Station EWR, please contact the project email listed above.

**Josh Vandezande (T: 416-202-5100, E: [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com)) may be contacted on behalf of Metrolinx.**

**Delivered by email**

Dear Ms. Sault,

**RE: Ontario Line Project - Notice of Publication of Draft Corktown Station Early Works Report**

Metrolinx, a regional transportation agency, is helping to transform the way the Greater Golden Horseshoe region moves by building a fast, convenient and integrated transit network. As part of this work, Metrolinx is proceeding with the Ontario Line which will bring 15.6 kilometres of subway service to Toronto. The purpose of this letter is to share information regarding the Ontario Line project with Mississaugas of the Credit First Nation.

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Mississaugas of the Credit First Nation. Metrolinx appreciates and respects Mississaugas of the Credit First Nation's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to share with Mississaugas of the Credit First Nation the Draft Corktown Station Early Works Report (EWR).

**Project Description**

The Ontario Line will stretch from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line is proposed to include 15 stations, including six interchange stations, and connections to three GO train lines, two existing subway lines, the Eglinton Crosstown LRT, and streetcar lines. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable commutes. More information on the Project can be found on our website:  
[www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)

The initial draft of the Corktown Station EWR and a letter outlining Corktown Station early works were shared with Mississaugas of the Credit First Nation on March 11,

2021. As outlined in the letter, environmental impacts of the Ontario Line Project are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*.

## Draft Corktown Station Early Works Report

In accordance with Section 8 of O. Reg. 341/20, Metrolinx has prepared a Draft Corktown Station EWR that documents the assessment of Corktown Station early works.

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These early works are being advanced to prepare the site for future construction staging and laydown to support tunneling and below ground construction activities, and work associated with the future Corktown Station. The location of the Corktown Station early works project footprint and study area can be viewed below in **Figure 1**.

Figure 1: Map of Corktown Station Early Works

The First Parliament site, located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail) and remnants of early Toronto industry may be found here. Metrolinx is eager to work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

The EWR documents the assessment of Corktown Station early works and outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures, and a consultation record.

The Draft EWR is available for your review and can be found via the Dropbox link shared in the body of the email that is associated with this letter. We welcome any additional comments you may have on the Draft EWR. The Draft EWR is available for review and comment starting **May 12, 2021** and ending on **June 11, 2021**. The Notice of Publication of Draft Corktown Station EWR is provided in **Attachment 1**. The Draft EWR will be updated following the review period, and the Final EWR will be published on the Project webpage ([www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)) and shared with Mississaugas of the Credit First Nation.

#### Potential Impacts and Mitigation Measures

The tables found enclosed in **Attachment 2 and 3** provide a summary of natural environment and archaeology potential impacts and mitigation measures identified as part of the Draft EWR that may be of interest to *Mississaugas of the Credit First Nation*. If *Mississaugas of the Credit First Nation* has any feedback about these potential impacts and/or mitigation strategies, or any other aspects of the Ontario Line, we welcome the opportunity to discuss further.

#### Revisions to the Initial Draft of the Corktown Station Early Works Report

In accordance with O. Reg. 341/20, Metrolinx has now incorporated comments and feedback from the initial round of engagement with Indigenous Nations and agencies on the initial draft of the Corktown Station EWR into the Draft EWR.

To streamline capacity for Mississaugas of the Credit First Nation to provide comments or feedback, a summary of revisions to the EWR since the circulation of the initial draft of the EWR is as follows:

- Minor editorial changes to address grammatical and syntax errors and updates to reflect comments received from agencies;
- Clarification that the project operations, construction of Corktown Station and other project components will be assessed in the Ontario Line Environmental Impact Assessment Report;
- Inclusion of information on the Parkland Strategy (City of Toronto, 2019), First Parliament Master Plan (City of Toronto, 2020) and additional information on planned community services and facilities in the Corktown Station Early Works Study Area;
- Edits to the text to reflect that the Ministry of Heritage, Sport, Tourism and Culture Industries' (MHSTCI) Minister's Consent has been granted for the demolition and removal of the non-heritage buildings at 265 Front Street East and removal of the heritage attributes at 265 Front Street East, 271 Front Street East and 25 Berkeley Street located on the First Parliament Site, and affirming Metrolinx's commitment to fulfilling the conditions outlined in the Minister's Consent, including completion of archaeological requirements;
- Additional mitigation measures for environmental disciplines such as archaeology, air quality and traffic and transportation, that include:
  - Coordination and completion of required archaeological investigations, early works activities and/or activities that have the potential for vibration effects such that buried archaeological resources are appropriately considered;
  - Use of non-chloride dust suppressants; and
  - Consultation with the City of Toronto to minimize potential impacts during special events (e.g., the Toronto Christmas Market at the Distillery District) should closures or long-term impacts be required.
- Revision of traffic and transportation figures to include additional information such as intersection names and inclusion of an additional noise and vibration figure to show representative receptor locations.

## Engagement

Metrolinx is committed to an open, respectful, and transparent relationship with Mississaugas of the Credit First Nation. We appreciate the significant volume of documents related to this Project that have been shared with Mississaugas of the Credit First Nation. We are happy to assist in the review of these documents by meeting with Mississaugas of the Credit First Nation or working to address any questions that Mississaugas of the Credit First Nation may have about this Project. If you require additional information or materials or if you wish to discuss these Projects in more detail or set up a meeting, please contact Fallon Melander, Manager of Metrolinx's Indigenous Relations Office at [IndigenousRelations@metrolinx.com](mailto:IndigenousRelations@metrolinx.com).

Metrolinx welcomes any comments or feedback on the Draft EWR from Mississaugas of the Credit First Nation. Please provide these in writing no later than **June 11, 2021**. Comments and information regarding this draft report will be collected to assist in meeting the requirements of the *Environmental Assessment Act* and may be included in study documentation. With the exception of personal information, all comments will become part of the public record. Kindly note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*.

Thank you for your time in reviewing this letter.

Yours Truly,

Maria Zintchenko, Environmental Project Manager  
Environmental Programs & Assessment  
Metrolinx

---

Dear Fawn,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. We recently communicated with your Nation about the proposed Corktown Station which is along the planned alignment of the Ontario Line. This location includes parcels of land which were once the site of Upper Canada's First Parliament buildings. Metrolinx and its partners are exploring opportunities to commemorate the history of this site, and have been engaging with various parties and we appreciate the contributions of the Mississaugas of the Credit First Nation to the working group and we acknowledge that this project is occurring on your Nation's treaty territory.

Given the significant chance of recovering Indigenous and European artifacts during the Corktown Station Early Works, a detailed archaeological workplan is being developed. Metrolinx recognizes the importance and value of Indigenous monitors for any archaeology related to the Ontario Line Project. In our previous communication, an invitation was included for your Nation to participate in any archaeological fieldwork and monitoring during the Corktown Station Early Works, including demolition of modern buildings currently on the First Parliament site.

This work is anticipated to commence in Fall 2021, and if you have not yet expressed interest in participating, please feel free to do so at your earliest convenience. As a reminder any comments on the draft Corktown Station Early Works Report should be provided no later than **April 15, 2021**.

Metrolinx recognizes that the history of this location extends beyond European use, and as such, wants to take the opportunity to understand any significance it may have to Indigenous Nations. Metrolinx would like to meet with your Nation to discuss the First Parliament site, its commemoration, as well as review the broader Ontario Line project if you wish. We recognize that traditional knowledge of this area may be sacred and/or not appropriate to be shared, but would appreciate any information that may be appropriate for Metrolinx to consider.

This letter is not intended to replace engagement but to provide a high level summary for your information. We would very much appreciate meeting with your Nation to discuss in more detail. Please let me know if you have any questions or concerns. We appreciate the volume of documents that Metrolinx has shared with your Nation. If you have any questions or concerns, please do not hesitate to contact me.

Miigwetch,

Fallon

**Delivered by email**

Dear Ms. Sault,

**RE: Ontario Line Project - First Parliament Site and Lime Kiln Site**

Metrolinx, a regional transportation agency, is helping to transform the way the Greater Golden Horseshoe moves by building a fast, convenient and integrated transit network. As part of this work, Metrolinx is continuing the pre-construction planning of the Ontario Line which will bring nearly 16 kilometres of subway service to Toronto.

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Mississaugas of the Credit First Nation. Metrolinx appreciates and respects Mississaugas of the Credit First Nation's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to share with Mississaugas of the Credit First Nation information regarding Corktown Station early works and additional information regarding upcoming field visits and investigations at the Corktown Station early works site, which includes two registered archaeological sites, the First Parliament site and the Lime Kiln site.

**Project Description**

The proposed Ontario Line is a new 16-kilometer subway line, which will occupy an exclusive right-of-way system encompassing a combination of below-grade, above-grade, and at-grade alignment. The route (Figure 1) will run from Ontario Place/Exhibition through downtown Toronto to the Ontario Science Centre in the City of Toronto, with six (6) potential interchange stations and 17 new connections to GO Transit, existing subways and streetcars. More information on the Project can be found on our website: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)

**Corktown Station Early Works**

As communicated in the letter sent to Mississaugas of the Credit First Nation on March 11, 2021, the Corktown Station site has been identified for launching tunnel excavation equipment for the downtown and Don Yard segments of the proposed Ontario Line alignment, as well as the location of the Corktown Station. The First Parliament and Lime Kiln Sites, located within the Corktown Station area, are known archaeological sites which require additional archaeological study ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures, followed by completion of necessary archaeological studies, is required. Completion of this preparatory work on an expedited basis is essential to allow for the timely delivery of the overall Project and is anticipated to begin in the Fall 2021, subject to the completion of the Corktown Station early works process in accordance with Ontario Regulation 341/20: Ontario Line Project.

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These activities will enable completion of environmental due diligence investigations, including archaeological assessments. These activities will occur on properties within the Corktown Station early works project footprint, as shown in **Figure 1**.

Figure 1: Map of Corktown Station Early Works

Environmental impacts of Corktown Station early works are being assessed in accordance with O. Reg. 341/20. Metrolinx shared the draft Corktown Station Early Works Report and associated discipline reports with Mississaugas of the Credit First Nation on March 11, 2021 and had requested any comments to be provided by April 9, 2021.

## **Archaeological Work at the First Parliament Site and Lime Kiln Site**

Metrolinx appreciates the significance of archaeology to Mississaugas of the Credit First Nation. The properties at 265 Front Street East, 271 Front Street East, and 25 Berkeley Street, in the St. Lawrence neighbourhood of the City of Toronto, are collectively host to the First Parliament Site. It is located on the southwest corner of Parliament Street and King Street, between Parliament Street and Berkeley Street. The First Parliament Site is a registered archaeological site (AjGu-41) which may include resources associated with the First and Second Parliament Buildings, the Home District Gaol, and Consumers' Gas company buildings. The surface of the property is currently occupied by automotive businesses, including a car dealership, car wash, and surface parking lot. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and remnants of early Toronto industry may be found at this site.

North of the First Parliament Site is another registered archaeological site (AjGu-64), the Lime Kiln Site, which includes remains from the Toronto Lime Works Company. A variety of structural features, in various states of preservation, have been documented on this site. The location of the Lime Kiln Site and the First Parliament Site are shown in **Figure 2**.

Figure 2: Location of First Parliament Site and Lime Kiln Site Areas

The First Parliament Site and Lime Kiln Site require additional archaeological studies ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures is necessary. Completion of this preparatory work is essential to allow for the timely delivery of the Ontario Line.

Archaeological fieldwork to remove or protect archaeological resources is anticipated to commence in early Fall 2021, and a workplan for these archaeological investigations is under development. As mentioned in the letter sent on March 11, 2021, Mississaugas of the Credit First Nation is invited to participate in all archaeological fieldwork, and to review and provide comments on forthcoming reports.

### **Feedback on Commemoration of First Parliament Site**

Metrolinx appreciates that the history of the First Parliament site is not one simply of Canadian origin, but rather holds longer history and tradition. Metrolinx also appreciates that the site of the First Parliament of Upper Canada is linked to a history of colonization and harmful practices towards Indigenous Peoples. Given the significance of this site, Metrolinx is engaging with Indigenous Nations, City of Toronto and the broader community to identify opportunities for commemoration. Metrolinx is committed to ensuring that any feedback from Mississaugas of the Credit First Nation regarding the significance of this site is considered as part of this commemoration. Metrolinx appreciates that traditional or cultural knowledge about this site may be sacred and/or not be appropriate to be shared but welcomes any comments or ideas from Mississaugas of the Credit First Nation that may be appropriate to commemorate Indigenous Peoples.

### **Engagement**

Metrolinx is committed to an open, respectful, and transparent relationship with Mississaugas of the Credit First Nation. We would like to meet with Mississaugas of the Credit First Nation to better understand any significance the First Parliament site may have to your Nation. We are also happy to assist in reviewing the Corktown Station Early Works Report or reviewing the proposed archaeological workplan for this site. If Mississaugas of the Credit First Nation requires additional information or materials, or you wish to discuss this project in more detail or set up a meeting, please contact Fallon Melander, Manager, Indigenous Relations at Metrolinx. She can be contacted at [IndigenousRelations@metrolinx.com](mailto:IndigenousRelations@metrolinx.com).

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*. Thank you for your time in reviewing these assessments.

Thank you for your time in reviewing this letter.

Yours Truly,

Good morning Fallon,

Our Field Archaeologist, Adrian Blake, has reviewed the archaeological information that is part of the Draft Corktown Station Early Works report. At this time, we have no further concerns with the contents and the proposed scope of work. However, we do want to confirm our interest in participating in future archaeological assessment activities associated with the project, including monitoring for deeply buried deposits. We appreciate Metrolinx continuing to keep MCFN-DOCA updated on the project.

Sincerely,  
Megan.

**Subject:** Ontario Line - Project Update and Draft Corktown Station Early Works Report for Review + Invitation to Participate in Archaeological Fieldwork

Dear Fawn and Megan,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. Attached you will find a letter providing an update on the project. The purpose of this letter is to:

- Provide an update on the scope of the project work
- share the initial draft of the Early Works Report for the proposed Corktown Station
- Invite your Nation to participate in upcoming archaeological fieldwork

In an effort to streamline your review, we draw your attention to the attachment which provides an overview of the expected environmental impacts and proposed mitigations, as we know this may be of specific interest to you.

Metrolinx is also preparing a letter specific to works being planned within the Don

Valley as we recognize the significance of this waterway to many Nations. We hope to share that letter soon. We are happy to meet with your Nation to discuss the Ontario Line and address any questions or concerns that your Nation may have.

We ask that any comments on the draft Corktown Station Early Works Report be provided no later than **April 15, 2021**. Please note that the Noise and Vibration Report, which will be part of the Early Works Report is still being prepared and we will share with your Nation by March 19, 2021.

The draft Corktown Station Early Works Report is available at the following link:

[REDACTED]

Please let us know as soon as possible if your Nation has interest in participating in future archaeological fieldwork.

[REDACTED]

We appreciate the volume of documents that Metrolinx has shared with your Nation.

If you have any questions or concerns, please do not hesitate to contact me.

Miigwetch,

Fallon

**Delivered by email**

Dear Ms. Sault,

## **RE: Ontario Line Project - Corktown Station Early Works Report**

Metrolinx, a regional transportation agency, is helping to transform the way the Greater Golden Horseshoe region moves by building a fast, convenient and integrated transit network. As part of this work, Metrolinx is proceeding with the Ontario Line which will bring nearly 16 kilometres of subway service to Toronto. The purpose of this letter is to share information regarding the Ontario Line project with Mississaugas of the Credit First Nation.

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Mississaugas of the Credit First Nation. Metrolinx appreciates and respects Mississaugas of the Credit First Nation's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to share with Mississaugas of the Credit First Nation information regarding Corktown Station early works and invite feedback on the initial draft of the Corktown Station Early Works Report.

## **Project Description**

The Project is a new subway line with connections to Line 1 (Yonge-University) subway service at Osgoode and Queen Stations, Line 2 (Bloor-Danforth) subway service at Pape Station, and Line 5 (Eglinton Crosstown) service at the future Science Centre Station. Fifteen stations are proposed, with additional connections to three GO Transit lines (Lakeshore East, Lakeshore West and Stouffville), and the Queen, King, Bathurst, Spadina, Harbourfront and Gerrard/Carlton streetcar routes. The Project will reduce crowding on Line 1 and provide connections to new high-order rapid transit neighbourhoods. More information on the Project can be found on our website: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)

## **Ontario Line Environmental Assessment Process and Reports**

10 Bay Street  
Toronto, ON M5J 2N8

416.202.4967  
[metrolinx.com](http://metrolinx.com)

In 2020, Metrolinx provided Mississaugas of the Credit First Nation with an outline of the Ontario Line environmental assessment process. The environmental assessment for the Ontario Line Project is being completed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20) made under the *Environmental Assessment Act*. The regulation outlines a Project-specific environmental assessment that includes an Environmental Conditions Report, an Environmental Impact Assessment Report and provides opportunity for Early Works Reports for assessment of works that are ready to proceed in advance of the Environmental Impact Assessment Report. An overview of the reports is outlined below and their anticipated publication timeline is provided in **Attachment 1**.

### Environmental Conditions Report

The Environmental Conditions Report characterizes existing environmental conditions within the Ontario Line study area through a combination of desktop review and field studies and was finalized in November 2020. The report also summarizes potential impacts and mitigation measures for consideration during project planning and design. Potential impacts and mitigation measures identified in the Environmental Conditions Report will be confirmed and refined within the Early Works Reports and the Environmental Impact Assessment Report.

### Early Works Reports

Metrolinx is assessing several early works components to support the main construction of the Ontario Line project. Early works are components of the Ontario Line Project that are anticipated to be ready to proceed before completion of the Environmental Impact Assessment Report, such as station construction, rail corridor expansion, utility relocation or bridge replacement or expansion, as defined in O. Reg. 341/20.

Initially, the early works required to support the Ontario Line project were assessed in a single report, which was shared in June 2020 and included Exhibition Station, Lower Don Bridges, Lakeshore East Joint Corridor and East Harbour early works.

Since then, the single Early Works Report has been split into several Early Works Reports, each covering either a single early works location or multiple locations if they are in close proximity. Each Early Works Report provides a description of the early works and alternatives considered, documents local environmental conditions, and outlines early works-specific environmental impacts, mitigation measures,

monitoring activities, potentially required permits and approvals and other components.

It is important to note that two new early works projects, Don Yard and Corktown Station, have been added as well. The Early Works Reports, including this new scope of work are summarized below:

- Exhibition Station Early Works  
Exhibition Station early works are documented in the Exhibition Station Early Works Report, finalized in February 2021.
- Lakeshore East Joint Corridor Early Works  
Lakeshore East Joint Corridor early works will be documented under a separate Early Works Report which will also include East Harbour Station.
- Lower Don Bridges & Don Yard Early Works  
Lower Don Bridges early works will be documented in the Lower Don Bridges and Don Yard Early Works Report. Don Yard is a new early works project that will include construction of Ontario Line tunnel and portal structures between Cherry Street and the Lower Don River and accompanying shift of the Richmond Hill and Lakeshore East GO tracks; installation or upgrading of retaining walls and noise barriers, where appropriate; and utility and signal infrastructure relocation or protection. The initial draft of the Lower Don Bridges and Don Yard Early Works Report is anticipated to be shared with Mississaugas of the Credit First Nation in mid to late April.
- Corktown Station Early Works  
Corktown Station is a new early works project. Further information on Corktown Station early works is provided below.

### Environmental Impact Assessment Report

The main report produced as part of this process is the Environmental Impact Assessment Report. It will cover the construction and operation of the Ontario Line. The report will include a final description of the Ontario Line Project, environmental impact evaluation results, mitigation measures, monitoring activities, potentially required permits and approvals and other components as outlined in O. Reg. 341/20.

## **Work along the Don River and within the vicinity of the Don Valley**

Metrolinx appreciates the significance of waterways to Mississaugas of the Credit First Nation. As such, Metrolinx is preparing an information letter specific to work occurring near or along the Don River and within the Valley. Metrolinx will provide details about the scope of work and anticipated natural environmental and archaeological assessments. Metrolinx is committed to exploring opportunities for Mississaugas of the Credit First Nation to participate in these assessments should Mississaugas of the Credit First Nation express interest.

## **Corktown Station Early Works**

The Corktown Station site has been identified for launching tunnel excavation equipment for the downtown and Don Yard segments of the proposed Ontario Line alignment, as well as the location for the Corktown Station. The First Parliament site, located within the Corktown Station area, is a known archaeological site which requires additional archaeological study ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures, followed by completion of necessary archaeological studies, is required. Completion of this preparatory work on an expedited basis is essential to allow for the timely delivery of the overall Project.

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These activities will enable completion of environmental due diligence investigations, including archaeological assessments. These activities will occur on properties within the Corktown Station early works project footprint, as shown in **Figure 2**.

Figure 2: Map of Corktown Station Early Works

Environmental impacts of Corktown Station early works are being assessed in accordance with O. Reg. 341/20.

Metrolinx is sharing the initial draft of the Corktown Station Early Works Report, including the Corktown Station Natural Environment Report, via the Dropbox link enclosed in the email for Mississaugas of the Credit First Nation's review. The Corktown Station Early Works Report documents the assessment of Corktown Station early works. It also outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures, and a consultation record. For a summary of the potential mitigation measures identified, please see the table found as **Attachment 2**.

Note that the initial draft of the report enclosed in the email currently does not include information on noise and vibration as the Corktown Station Noise and Vibration Report is still being prepared. The initial draft of the Corktown Station Noise and Vibration Report is anticipated to be shared with Mississaugas of the Credit First Nation on **March 19, 2021** for review.

Metrolinx welcomes any comments or feedback on the initial draft of the Corktown Station Early Works Report from Mississaugas of the Credit First Nation. Please provide these in writing no later than **April 15, 2021**.

Based on our currently anticipated schedule (**Figure 1**), the Notice of Publication of Draft Corktown Station Early Works Report is planned for late-April 2021, at which point the draft report will be available to all interested parties for review, including Mississaugas of the Credit First Nation, the public and regulatory agencies.

### Archaeology

As outlined above, archaeological assessments are anticipated to take place as part of advancing Corktown Station Early Works. Metrolinx would appreciate any interest Mississaugas of the Credit First Nation may have in participating in planned future archaeological fieldwork for this site. The maps in **Attachment 3** illustrate the areas that will be subject to future archaeological assessments that include fieldwork. Upon receipt of Mississaugas of the Credit First Nation's interest in participating, Metrolinx will work to coordinate your Nation's involvement.

Metrolinx acknowledges that Mississaugas of the Credit First Nation should be aware of and engaged regarding any future archaeological work, especially the discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will ensure that future archaeological assessments are provided to Mississaugas of the Credit First Nation in draft form, prior to submission to MHSTCI.

### **Engagement**

Metrolinx is committed to an open, respectful, and transparent relationship with Mississaugas of the Credit First Nation. We appreciate the significant volume of documents related to this Project that have been shared with Mississaugas of the Credit First Nation. We are happy to assist in the review of these documents by meeting with Mississaugas of the Credit First Nation or working to address any questions that Mississaugas of the Credit First Nation may have about this Project. If you require additional information or materials or if you wish to discuss these Projects in more detail or set up a meeting, please contact Fallon Melander, Manager of Metrolinx's Indigenous Relations Office at [IndigenousRelations@metrolinx.com](mailto:IndigenousRelations@metrolinx.com).

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*. Thank you for your time in reviewing these assessments.

| Vegetation Communities                                                                                      | <ul style="list-style-type: none"><li>City and private tree removal</li></ul>                                                                                                                            | <ul style="list-style-type: none"><li>An Arborist Report by an International Society of Arboriculture Certified Arborist will be prepared, if required, in accordance with the Ontario Forestry Act R.S.O. 1990, and other regulations and best management practices as applicable.</li><li>The Arborist Report will include, but not be limited to the individual identification of all trees within the Corktown Station early works construction areas including those that require removal or preservation, or trees that may be injured. Trees to be identified may include those on Metrolinx property, trees on public and private lands, and boundary trees. City of Toronto by-laws dictate the minimum area buffers to be inventoried and Diameter at Breast Height which requires inventory.</li><li>Prior to the undertaking of tree removals, a Tree Removal Strategy/Tree Preservation Plan will be developed to document tree protection and mitigation measures that follow the City of Toronto Tree Protection Policy and Specifications for Construction Near Trees Guidelines (2016b) and adherence with best practices, standards and regulations on safety, environmental and wildlife protections.</li><li>Compensation for tree removals will be undertaken in accordance with provisions outlined in the Metrolinx Vegetation Guideline (2020).</li><li>Pruning of branches will be conducted through the implementation of proper arboricultural techniques.</li><li>Tree Protection Zone fencing will be established to protect and prevent tree injuries. Tree Protection Zones will be clearly staked prior to construction using barriers in accordance with local by-law requirements.</li></ul> | <ul style="list-style-type: none"><li>Regular inspection in areas of vegetation removal will be undertaken as required during construction to ensure that fencing is intact, only specified trees are removed and no damage is caused to the remaining trees and adjacent vegetation communities.</li><li>On-site inspection will be undertaken to confirm the implementation of the mitigation measures and identify corrective actions if required. Corrective actions may include additional site maintenance and alteration of activities to minimize impacts.</li><li>If required, the approach to compensation monitoring will be developed in accordance with Metrolinx’s Vegetation Guideline (2020).</li></ul> |

| Environmental Component                               | Potential Impact                                                                                                                                                                              | Mitigation Measure(s)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Monitoring Activities                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|-------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Vegetation Communities</b>                         | <ul style="list-style-type: none"><li>▪ Soil contamination as a result of spills (e.g., grease and/or fuel) from equipment use</li><li>▪ Introduction or spread of Invasive Species</li></ul> | <ul style="list-style-type: none"><li>▪ A Spill Prevention and Contingency Plan will be developed and adhered to. Spills will be immediately contained and cleaned up in accordance with provincial regulatory requirements and the contingency plan.</li><li>▪ Refuelling shall be done within refuelling stations lined with appropriate material to prevent seepage and fuel discharge.</li><li>▪ All machinery, construction equipment and vehicles arriving on site should be in clean condition (e.g., free of fluid leaks, soils containing seeds of plant material from invasive species) and be inspected and washed in accordance with the Clean Equipment Protocol for Industry (Halloran et al., 2013) prior to arriving and leaving the construction site in order to prevent the spread of invasive species to other locations.</li></ul>                  | <ul style="list-style-type: none"><li>▪ On-site inspection will be undertaken to confirm the implementation of the mitigation measures and identify corrective actions if required. Corrective actions may include additional site maintenance and alteration of activities to minimize impacts.</li><li>▪ Ensure precautions are being taken to minimize the spread of invasive species by implementing the Clean Equipment Protocol for Industry (Halloran et al., 2013) on equipment and machinery prior to moving sites.</li><li>▪</li></ul> |
| <b>Wildlife and Wildlife Habitat – General</b>        | <ul style="list-style-type: none"><li>▪ Disturbance, displacement or mortality of wildlife</li></ul>                                                                                          | <ul style="list-style-type: none"><li>▪ Prior to construction, investigation of the Corktown Station early works construction areas for wildlife and wildlife habitat that may have established following the completion of previous surveys will be undertaken, as appropriate.</li><li>▪ If wildlife is encountered, measures will be implemented to avoid destruction, injury, or interference with the species, and/or its habitat. For example, construction activities will cease or be reduced, and wildlife will be encouraged to move off-site and away from the construction area on its own. A qualified Biologist will be contacted to define the appropriate buffer required from wildlife.</li></ul>                                                                                                                                                       | <ul style="list-style-type: none"><li>▪ On-site inspection by on-site environmental workers or construction staff should occur daily within the construction area to ensure that no wildlife is trapped within the construction area.</li><li>▪ On-site inspection will be undertaken to confirm the implementation of the mitigation measures and identify corrective actions if required. Corrective actions may include additional site maintenance and alteration of activities to minimize impacts.</li></ul>                               |
| <b>Significant Wildlife Habitat: Common Nighthawk</b> | <ul style="list-style-type: none"><li>▪ Removal of candidate nesting habitat for Common Nighthawk</li></ul>                                                                                   | <ul style="list-style-type: none"><li>▪ Refer below to mitigation measures described for Migratory Breeding Birds and Nests.</li><li>▪ Demolition of buildings should be scheduled outside of the breeding bird season of April 1 to August 31. If this is not possible and buildings must be demolished during this period, the following will be completed:</li><li>▪ The roofs will be checked for presence of gravel. If gravel is not present, then the building is unlikely to provide suitable nesting habitat for Common Nighthawk. If gravel is present, a search for eggs and nesting activity for Common Nighthawk on the roof will be conducted. If nests or nesting activity of Common Nighthawk are confirmed, the building cannot be demolished until it is confirmed by a Qualified Biologist that young have fully fledged and left the nest.</li></ul> | <ul style="list-style-type: none"><li>▪ Refer below for monitoring requirements described for Migratory Breeding Birds and Nests.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                      |
| <b>Migratory Breeding Birds and Nests</b>             | <ul style="list-style-type: none"><li>▪ Disturbance or destruction of migratory bird nests</li></ul>                                                                                          | <ul style="list-style-type: none"><li>▪ All works must comply with the Migratory Birds Convention Act, including timing windows for the nesting period (April 1 to August 31 in Ontario).</li><li>▪ If activities are proposed to occur during the general nesting period, a breeding bird and nest survey will be undertaken prior to required activities. Nest searches by an experienced searcher are required and will be completed by a qualified Biologist no more than 48 hours prior to vegetation removal.</li><li>▪ If a nest of a migratory bird is found outside of this nesting period (including a ground nest) it still receives protection.</li></ul>                                                                                                                                                                                                    | <ul style="list-style-type: none"><li>▪ Regular monitoring (field observations, on-site inspections) will be undertaken to confirm that activities do not encroach into nesting areas or disturb active nesting sites.</li></ul>                                                                                                                                                                                                                                                                                                                 |

If clarification is required regarding regulatory requirements, the appropriate regulatory agencies will be consulted.

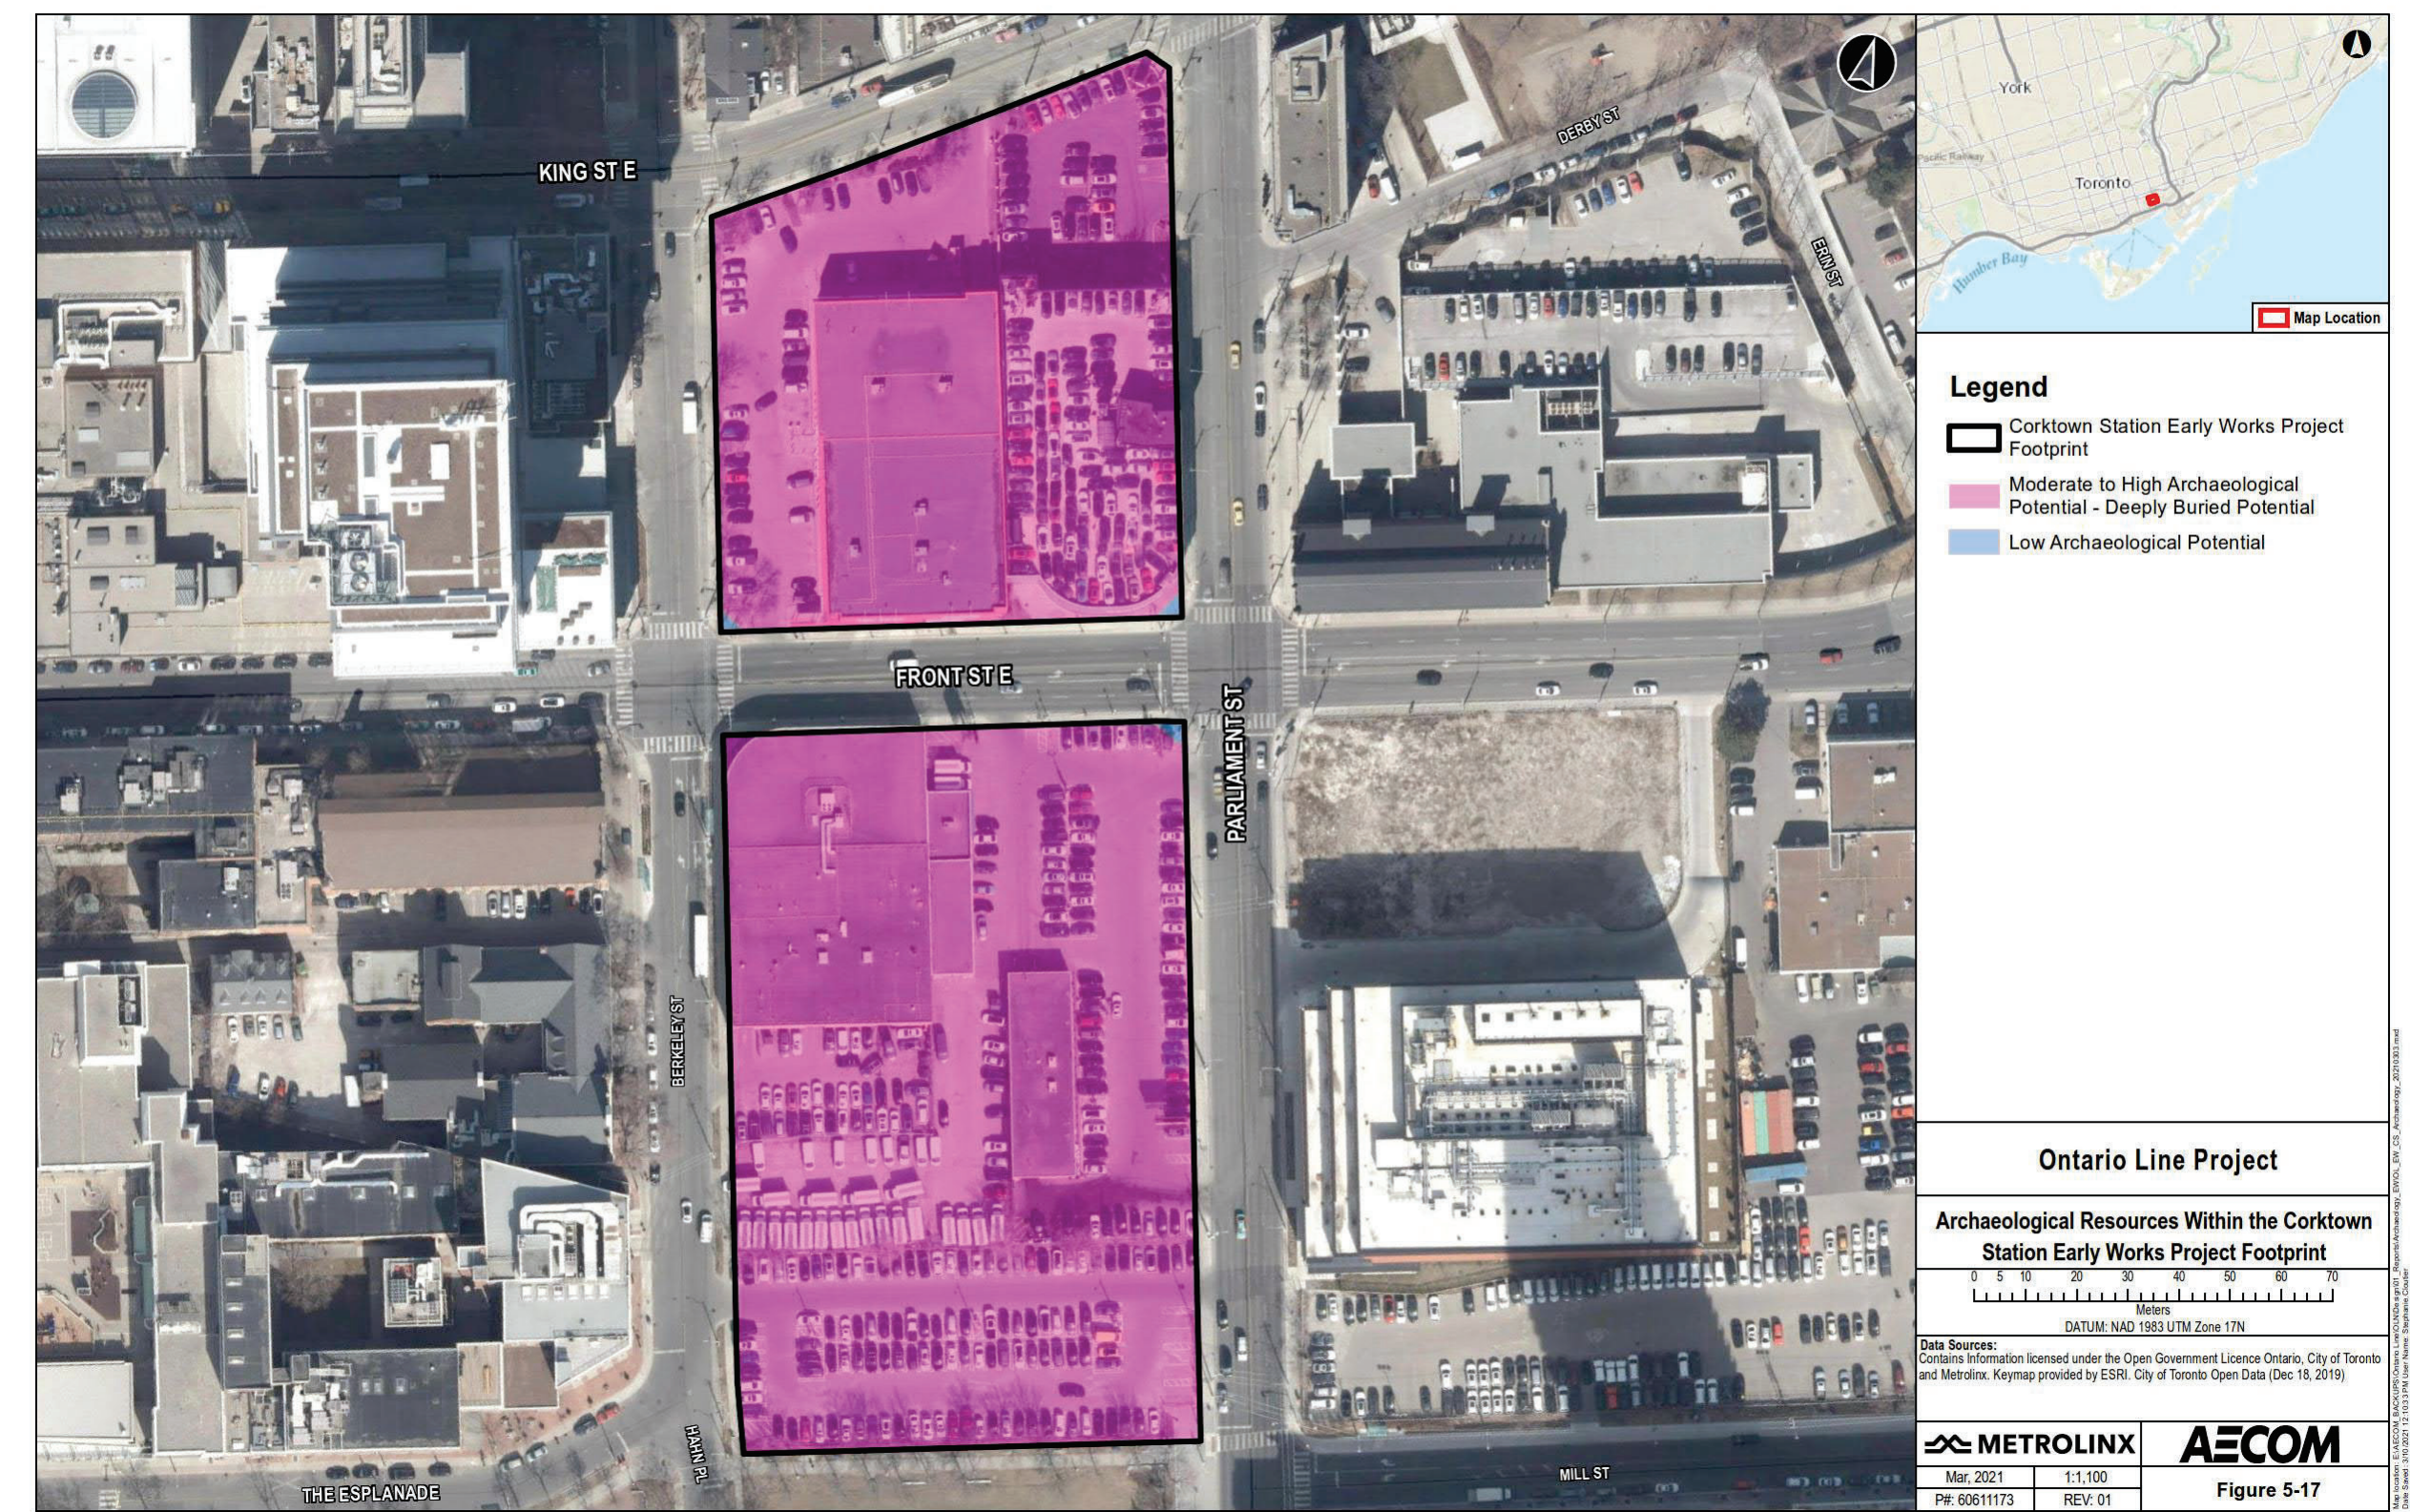

Table 6-8: Potential Impacts, Mitigation Measures and Monitoring Activities – Archaeological Resources

| Environmental Component  | Potential Impact                                                                                                                                                              | Mitigation Measure(s)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | Monitoring Activities                                                                                                                                                                                                              |
|--------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Archaeological Potential | <ul style="list-style-type: none"><li>▪ Potential for the disturbance of registered archaeological sites and/or archaeological resources not previously identified.</li></ul> | <ul style="list-style-type: none"><li>▪ Areas identified as retaining archaeological potential in the Corktown Station Early Works Project Footprint, as per the Ontario Line South Stage 1 Archaeological Assessment Report (AECOM, 2020c), are shown in <b>Figure 5-17</b>, and include the following. Should ground disturbing activities<sup>29</sup> be planned within these areas, further archaeological assessment must be completed prior to any ground disturbing activities.<ul style="list-style-type: none"><li>– The majority of the Corktown Station Early Works Project Footprint on either side of Front Street retains moderate to high archaeological potential where deeply buried archaeological potential remains, such as for discovering pre-contact Indigenous materials and/or materials related to the early development and expansion of the City of Toronto, including the First and Second Parliament Buildings, the Home District Gaol, and the Consumers’ Gas company buildings.</li></ul></li><li>▪ Given the significance of the First Parliament Site, all previous site specific archaeological assessments should be reviewed to determine what additional archaeological work is required.</li><li>▪ Any additional Archaeological Assessments (e.g., Stage 2, Stage 3 if recommended by the Stage 2) shall be completed as early as possible, and prior to any ground disturbing activities. This work shall be done in accordance with the Ministry of Heritage, Sport, Tourism and Culture Industries’ Standards and Guidelines for Consultant Archaeologists (2011) to identify any archaeological resources that may be present.</li><li>▪ Indigenous Nations will be invited to participate in monitoring requirements for any subsequent archaeological work is recommended. All future archaeological assessment findings will be shared with the Indigenous Nations that were engaged during the Stage 1 archaeological assessment.</li></ul> | <ul style="list-style-type: none"><li>▪ None identified at this time.</li><li>▪ Metrolinx will adhere to all recommendations in any subsequent archaeological assessments, including monitoring activities, as required.</li></ul> |
| Archaeological Resources | <ul style="list-style-type: none"><li>▪ Potential recovery of unexpected archaeological resources during construction.</li></ul>                                              | <ul style="list-style-type: none"><li>▪ Should previously unknown or unassessed deeply buried archaeological resources be uncovered during construction activities, they may be a new archaeological site and therefore subject to Section 48(1) of the Ontario Heritage Act. The proponent or person discovering the archaeological resources must cease alteration of the site immediately and engage a licensed archaeologist to carry out archaeological field work, in compliance with Section 48(1) of the Ontario Heritage Act. Any person discovering human remains must immediately notify the police or coroner and the Registrar of Cemeteries, Ministry of Government Services. In addition, consultation with relevant Indigenous Nations will be initiated in the event that archaeological resources or human remains are discovered.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | <ul style="list-style-type: none"><li>▪ None identified at this time.</li><li>▪ Metrolinx will adhere to all recommendations in any subsequent archaeological assessments, including monitoring activities, as required.</li></ul> |

<sup>29</sup> Ground disturbing activities can be defined as any and all activities that will or have the potential to impact/disturb the area below the surface. Example of activities include, but is not limited to, heavy machine movement/weight, clearing, grading, excavating, trenching, drilling, and transporting and filling of land.

# METROLINX - THE SUBWAY PROGRAM UPDATE

Metrolinx and its partners are delivering on a bold, forward-looking transportation plan. The goals of the 2041 Regional Transportation Plan (RTP) are to create strong connections, complete travel experiences and sustainable communities. The Subway Program is a key component of this plan.

The Subway Program consists of four (4) transit projects:

1. The Ontario Line

Today we will be discussing Ontario Line  and specifically the waterways around the projects

# Ontario Line

# THE ONTARIO LINE

**1 West**  
(Exhibition to Queen/Spadina)

**2 Downtown**  
(Osgoode to Don Yard)

**3 East**  
(East Harbour to Pape South)

**4 North**  
(Pape to Science Centre)

~16 kilometres  
long

15 stations

As frequent as  
every 90 seconds  
during rush hour

388,000 daily  
boardings

40+ connections  
to other transit  
options

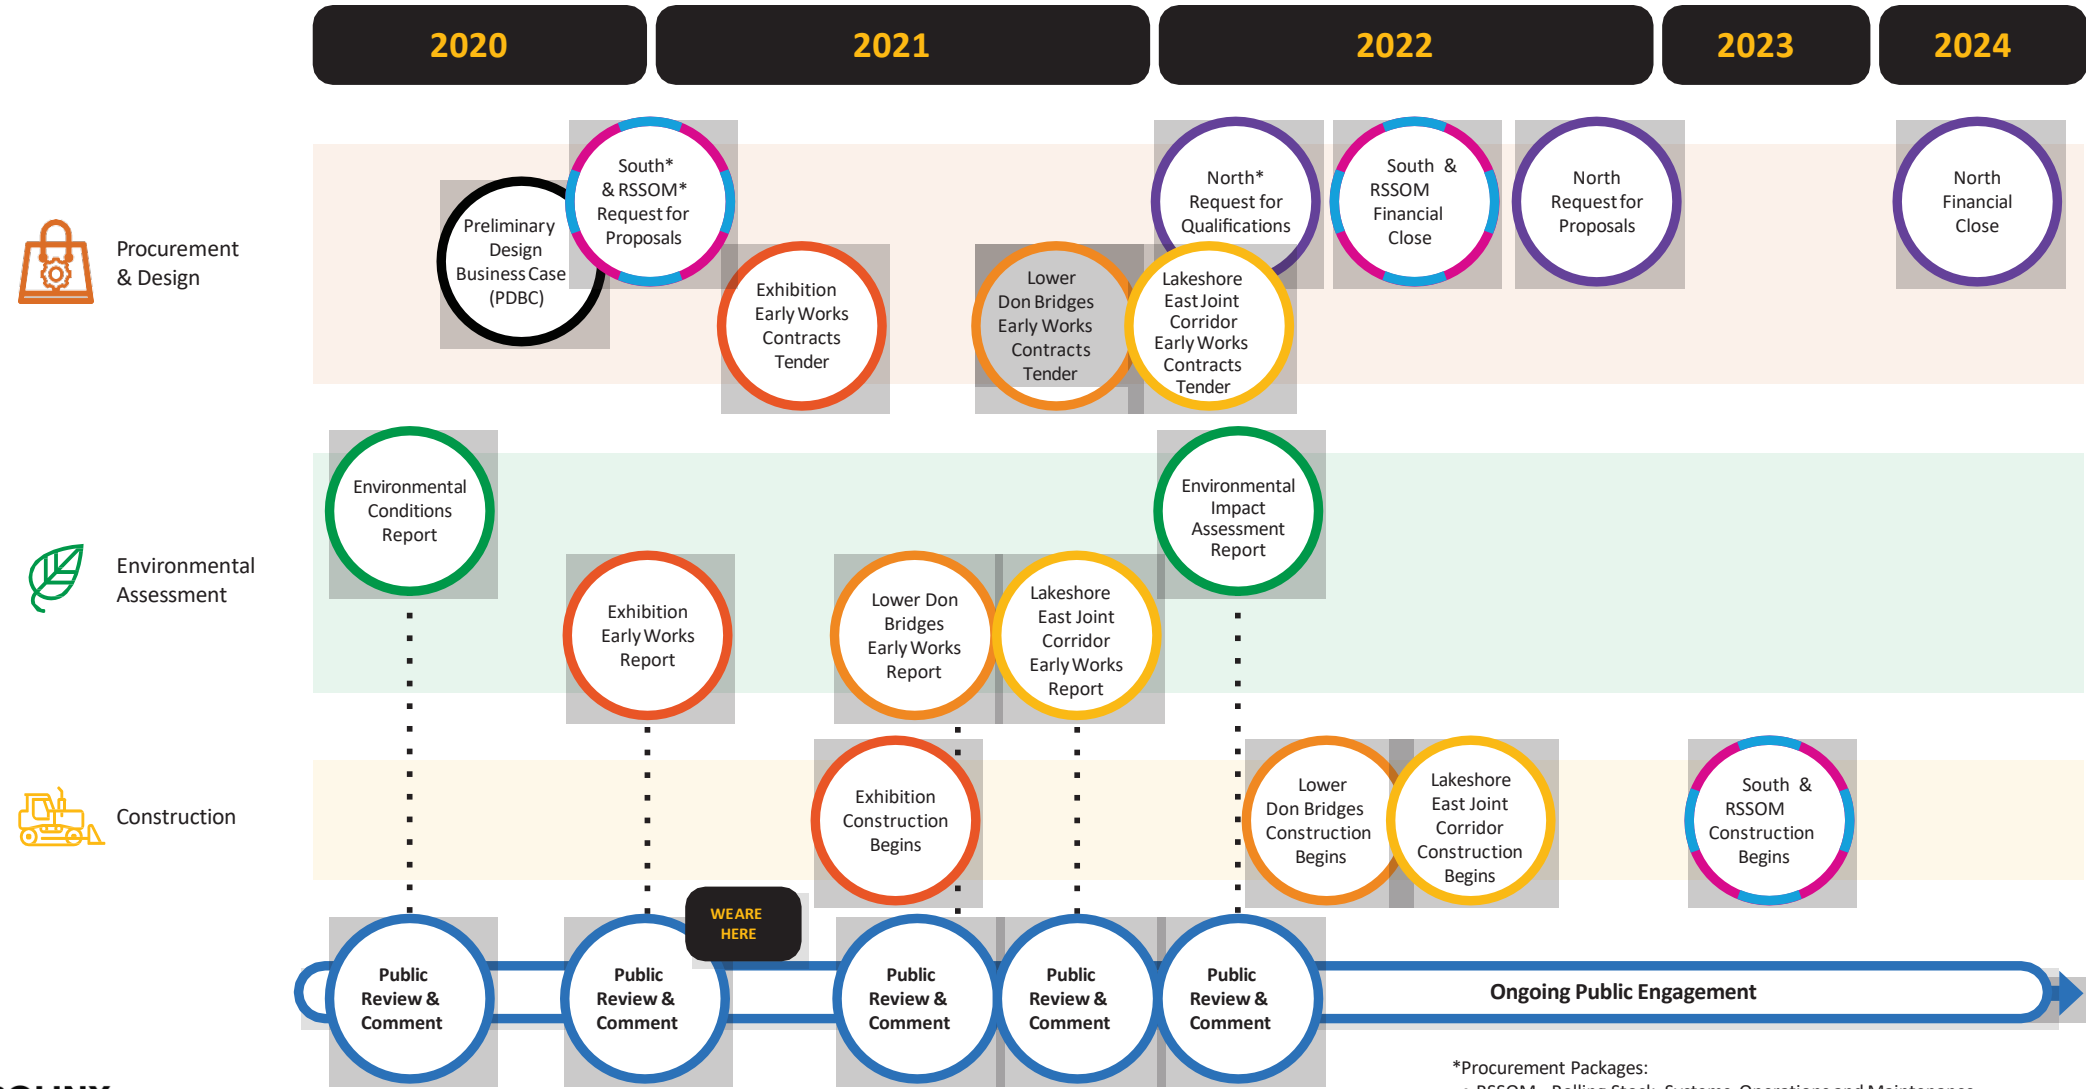

255,000 more  
people within  
walking distance  
to transit

Up to 47,000 more  
jobs accessible in 45  
minutes or less, on  
average

# Timeline

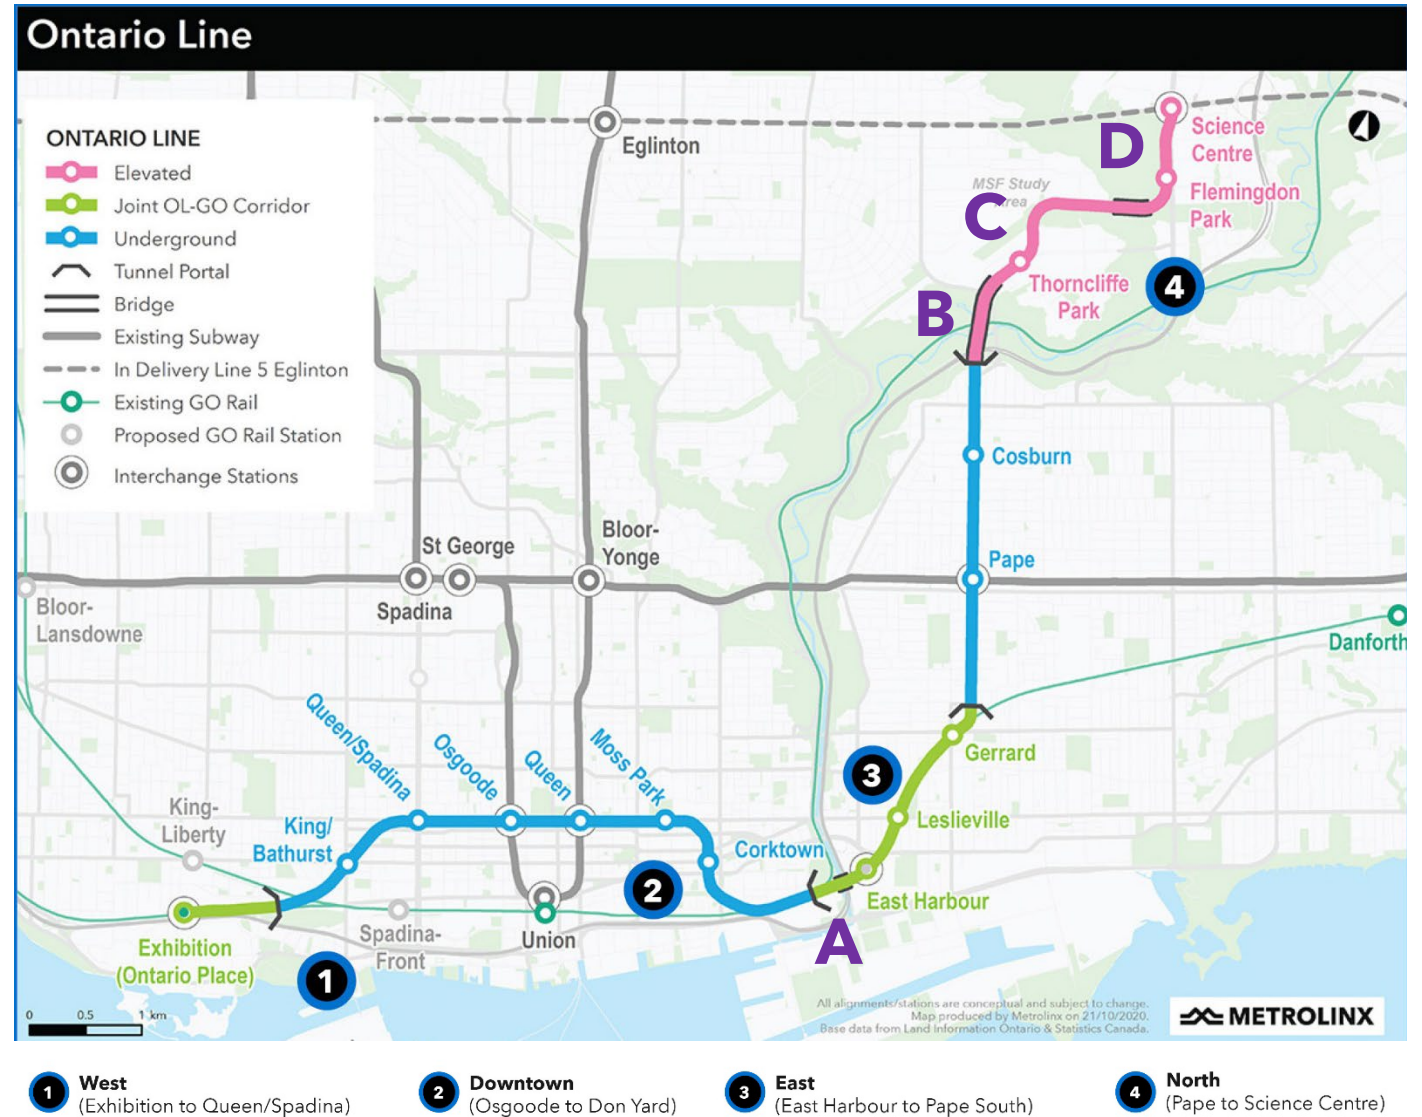

\*Procurement Packages:  
• RSSOM - Rolling Stock, Systems, Operations and Maintenance  
• South - Southern Civil, Stations and Tunnel  
• North - Northern Civil, Stations and Tunnel

# **EA Highlights - Ontario Line Don River Crossings**

# OL - OVERVIEW OF THE DON VALLEY CROSSINGS

- Don Valley Crossings:

- A - Lower Don Crossing (Lower Don Bridges) at existing Lakeshore East rail bridge
- B - Don River Crossing at Millwood Road
- C - West Don River (Walmsley Brook) Crossing near Beth Neilson Drive
- D - West Don River Crossing at Overlea Boulevard

- OL Environmental Conditions Report outlines impacts, mitigation measures and monitoring activities, including those related to:
  - Vegetation and Vegetation Communities
  - Wildlife and Wildlife Habitat
  - Aquatic Environment (Fish and Fish Habitat, Wetlands and Waterbodies)
  - Species at Risk (SAR)
- These impacts, mitigation measures and monitoring activities will be further studied and refined in the forthcoming Lower Don Bridges Early Works Report and the Environmental Impact Assessment Report
- Once more project details are available (e.g., specific alignment of crossings and anticipated areas of construction disturbance), further studies will be completed, which may include:
  - Species-specific SAR surveys
  - Additional plant community surveys
  - Detailed fish and fish habitat assessments
- These studies will also support further consultation with applicable regulatory agencies (e.g., DFO) and the necessary permits/approvals

ONTARIO LINE & ECWE UPDATE, FEB 23 2021 - MISSISSAUGAS OF THE CREDIT FIRST NATION

15

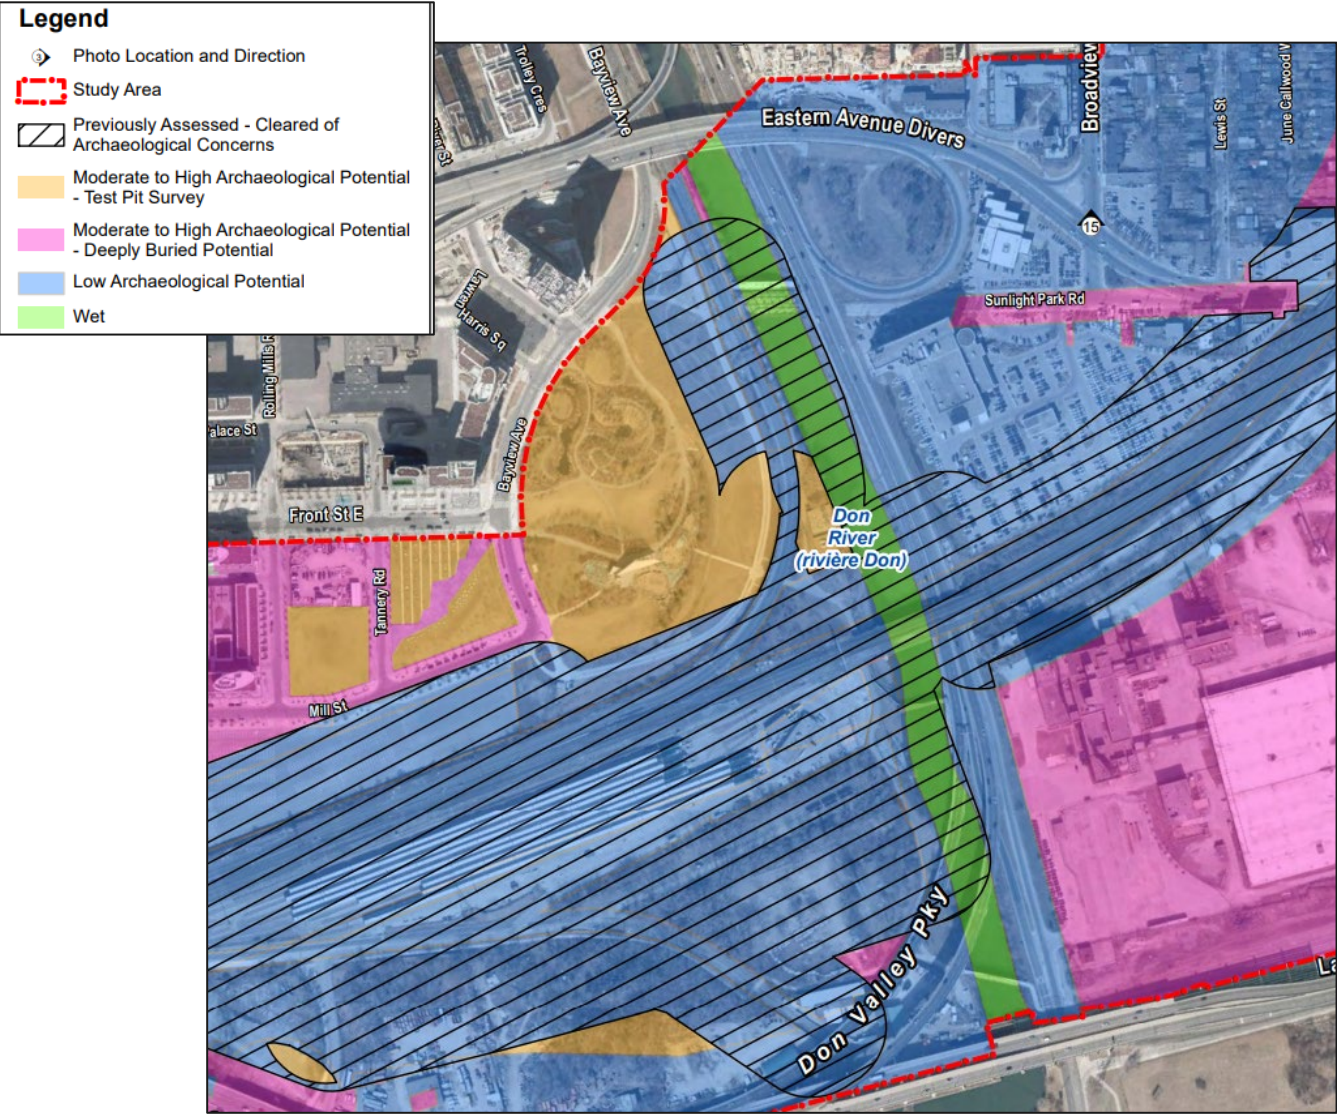

# OL - ARCHAEOLOGICAL WORK AND ENGAGEMENT OVERVIEW

- Archaeological assessments conducted in three sections: Ontario Line West (OLW), Ontario Line South (OLS) and Ontario Line North (OLN)
- Stage 1 work:
  - Draft reports shared with Indigenous communities in March 2020
  - Reports submitted to MHSTCI in May 2020 and accepted into Registry
  - Draft Addendum to OLS Stage 1 AA report that corrects a mapping error in the Lower Don Bridges area was shared with MCFN on February 5 2021
- Stage 2 work:
  - Stage 2 assessments in Don Valley areas that are anticipated to be impacted are planned to start in Summer 2021, subject to further design detail confirmation and Permission to Enter agreements
  - To facilitate FLR involvement, Metrolinx will share the details of the planned Stage 2 work as soon as this information is available

# LOWER DON BRIDGES CROSSING AREA

**Image:** Northern view of the existing rail bridge crossing the Lower Don River.  
Source: Metrolinx, 2020

# LOWER DON BRIDGES CROSSING AREA

- Existing Conditions Overview:
  - Crossing area is within the Don River floodplain, though no provincially or locally significant wetlands, areas of natural and scientific interest, woodlands, valleylands or environmentally significant areas are present in vicinity of this crossing.
  - Lower Don River provides fish habitat important for migration, feeding and refuge.
  - Species of Conservation Concern (Northern Map Turtle) and Species at Risk (Barn Swallow and Chimney Swift) may occur. There are no recent records of aquatic Species at Risk.
- Anticipated Impacts Summary:
  - Removal of/damage to trees, terrestrial vegetation and wildlife habitat; impacts to aquatic/riparian vegetation.
  - Erosion and sedimentation, and potential for impacts to fish and fish habitat.
  - Disturbance or displacement of wildlife species, and reduced habitat connectivity.
- Mitigation Measures Summary:
  - Tree/vegetation removals will be kept to a minimum and limited to the construction footprint. Temporarily disturbed areas will be restored/re-vegetated.
  - Construction activities will maintain buffers established during the design phase to minimize potential impacts to the Lower Don River. Erosion and sediment control measures will be implemented.
  - Ensure that all in-water activities do not interfere with fish passage, constrict the channel width, or reduce flows.
  - Prior to construction, species-specific surveys will be completed, as required, to avoid or minimize potential impacts and meet all Species at Risk regulatory requirements.

### MINUTES

#### TOPIC / COMMENTS

#### Welcome and Introductions

- The purpose of this meeting was to discuss the proposed plans that are on or near waterways for the Ontario Line and [REDACTED] Subway Projects and to ensure participation of MCFN in the projects
- The meeting was chaired by Fallon Melander, Manager of Indigenous Relations at Metrolinx
- Mark LaForme provided a brief overview of DOCA and thanks Metrolinx for embracing the responsibility of working with MCFN
- [REDACTED]
- Fawn Sault indicated that MCFN receives approximately 180 notices a month from various proponents
- Fallon Melander recognized the importance of water and indicated that Metrolinx wanted to understand the expectations of the Nation and expressed a desire to meet with the right people, including if required, chief and council in order to address and hear any concerns. She mentioned that the work along the Humber River fell on lands that are within the boundaries of the TRCA, [REDACTED]

#### Overview of Subway Program

- Tyler Mayhew provided a high-level overview of the Subway Program, the Ontario Line and the time line related to the Don Bridges
- Mark LaForme had a question about difference between existing conditions report and environmental impact report – James Francis indicated that the reports are connected. The Early Works Report will be included in the Environmental Impact Assessment. He stated that the existing conditions was a smaller look at the project area and the environmental impact report will be the entire project area including four new bridges over Don River and a pedestrian cyclist connection over the river. The Environmental Impact Assessment will also include the operational impacts separate from construction
- Mark LaForme asked if it was a provincial or federal impact assessment. James Francis stated it was a provincial assessment under the provincial EA Act
- [REDACTED]

#### Environmental and Archaeological Works

## Ontario Line EA

- James Francis presented slides on the four proposed Don River Crossings. There will be four total crossings which are being assessed over the Don River in multiple locations. He indicated that the Early Works report had been completed for the Lower Don crossing, but that the other three crossings would be studied in the Environmental Impact Assessment Report and included Natural environment studies that would provide much more detail
- Mark LaForme asked if the lands presented in slide 16 all fall within the TRCA boundaries. James Francis indicated that while much of it does, it is a mixture of landowners including private property owners.
- Mark LaForme asked if there would be any in-water works. James Francis indicated that in-water works are not anticipated for this location.
- James Francis went over the vegetation removal policy – Metrolinx plans to employ a 3:1 tree replacement ratio as we try to lower our impact on the environment, but that those ratios go up within any Designated Natural Areas, for which much of the study area along the Don River is. Ratios within DNAs are compensated also based on the ecological value of specific species which go above and beyond 3:1. **ACTION ITEM:** Follow up with Vegetation Guideline and tree replacement counts
- James Francis indicated that there will be protections in place for soil, and that Metrolinx will be completing a series of species-specific studies in advance of construction
- James Francis indicated that Stage 2 Archaeology (Millwood) would be occurring this year [REDACTED]
- Mark LaForme asked how archaeological potential was determined. James Francis indicated that this was explored and identified through the Stage 1 Archaeological Assessment which had been shared with MCFN
- Megan DeVries indicated that MCFN was reviewing the Ontario Line South Stage 1 Archaeological Assessment Addendum and stated that MCFN's field archaeologists may have technical questions about tunnels. Subways are new to DOCA and would like to possibly have a technical discussion with engineers to provide some clarity about what work would entail in the near future.
- Megan DeVries also commented that the river crossings include natural heritage and environmental field work [REDACTED]  
[REDACTED] To date MCFN hasn't had that participation in Mx projects but want to ensure that they will on subways. MCFN continues to have Stewardship responsibilities for the lands and waters which requires an understanding of risk
- [REDACTED] **ACTION ITEM:** Fallon Melander to book another meeting with Megan DeVries
- Fallon Melander inquired as to whether or not the forecast that is sent by IRO is helpful and what other ways IRO could support DOCA
- James Francis confirmed that a technical meeting could be set up to discuss the OLS Addendum if needed
- Fawn Sault inquired about opportunities for education within Stations. Fallon Melander identified that Head Sponsors on the project have identified opportunities for MCFN to have educational components about Indigenous peoples, MCFN, treaties etc. in stations, trains or part of design. One opportunity could be looking to funding partners to fund land acknowledgement art etc. Fallon Melander discussed the development of the Metrolinx network-wide transit map which now includes the treaties. Fallon Melander indicated that Metrolinx is open to ideas about how to acknowledge the original keepers of the land.
- Mark LaForme stated that the Mississauga Business Development Corp has been in touch with Metrolinx to discuss opportunities. Fawn Sault indicated there are many opportunities outside of DOCA to engage MCFN and perhaps Mx could canvas a few people to brainstorm

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                      |

| <div data-bbox="115 359 1502 1293"> <div data-bbox="115 359 1502 401" style="background-color: black; width: 100%; height: 20px;"></div> <div data-bbox="115 401 1502 1293"> <div data-bbox="162 367 178 388" style="display: inline-block; width: 10px; height: 10px; background-color: black; margin-right: 10px;"></div> <div data-bbox="207 359 1502 537" style="background-color: black; width: 100%; height: 85px;"></div> <div data-bbox="1156 436 1409 462" style="background-color: white; color: black; padding: 2px 5px; display: inline-block; font-weight: bold;">ACTION ITEM: Fallon</div> <div data-bbox="207 472 1044 499" style="background-color: black; width: 100%; height: 13px;"></div> <div data-bbox="162 546 1502 1255"> <ul style="list-style-type: none"> <li>• Fallon Melander identified the First Parliament site and reviewed Metrolinx engagement with MCFN regarding participation in the borehole drilling that took place in February and continues into March. She indicated that IRO identified that it may be appropriate that the location of Canada's first parliament commemorate Indigenous Peoples as well. Metrolinx is looking to have a working group and opportunity to engage with others about what the future station site will look like to capture the history of the area</li> <li>• Malcolm McKay inquired about who would be appropriate to represent Indigenous Nations for the commemoration of the site and working group</li> <li>• Fallon Melander said she did not know, and that Metrolinx would have to ask the Nations who lived and gathered in the area at the time</li> <li>• Malcom McKay provided an overview, that the site was in the Don Yard and was planned to be used for a future station and tunneling works. One area of the site was the location of the first parliament and second parliament of Canada, as well as a jail. Metrolinx is looking to develop a working group or table to talk about how to go about archaeological investigations, possible soil contamination due to previous gas station, and how to educate and commemorate the significance of the site. Work is planned to begin Summer of 2021, and Metrolinx is looking for representatives who could provide guidance and input on commemoration.</li> <li>• Mark LaForme said that this would need to be more of a political discussion by Chief and Council and that would ask and explore what MCFN's historical connection to the site may be. He asked for further information about the site.</li> <li>• Malcolm McKay said he would provide slide deck to Fallon with an overview of the site and proposed working group to share with Mark <b>ACTION ITEM:</b> Fallon Melander to send slide deck to Mark LaForme</li> </ul> </div> </div> </div> |                                                                                                      |

---

Dear Chief LaRocca,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. Attached you will find a letter providing an update on the project. The purpose of this letter is to share the Draft Corktown Station Early Works Report (EWR) prepared for the Ontario Line Project and provide a continued invitation for feedback.

In an effort to streamline your review, we draw your attention to the attachment which provides an overview of the expected environmental impacts and proposed mitigations, as we know this may be of specific interest to you.

We ask that you provide any comments no later than June 11, 2021.

The reports are available at the following link:

We appreciate the volume of documents that Metrolinx has shared with your Nation. If you have any questions or concerns, please do not hesitate to contact the Indigenous Relations Office.

Miigwetch,

Fallon

## Notice of Publication of Draft Corktown Station Early Works Report Ontario Line Project

### The Project

The Ontario Line will bring 15.6 kilometres of new subway service to Toronto to make it faster and easier for people to get where they need to be each day. The line will stretch across the city, from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line is proposed to include 15 potential stations, including six interchange stations, and connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 of its stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable commutes.

### Corktown Station Early Works

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These early works are being advanced to prepare the site for future construction staging and laydown to support tunneling and below ground construction activities, and work associated with the future Corktown Station.

The First Parliament site, located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail), and remnants of early Toronto industry may be found here.

Metrolinx is eager to unlock the potential of the site and work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

Environmental impacts of Corktown Station early works are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*. In accordance with Section 8 of O. Reg. 341/20, Metrolinx has prepared the Draft Corktown Station Early Works Report (EWR) that is now available for public review.

The Draft EWR documents the assessment of Corktown Station early works. The report outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures and a consultation record.

### **The Draft Early Works Report Review and Consultation Process**

Effective **May 12, 2021**, the Draft Corktown Station EWR will be available for review on the project webpage ([www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)).

As we temporarily shift to virtual open houses, please join us online from **May 12 to June 11, 2021** to find out more about and provide your feedback on the Draft Corktown Station EWR via the webpage form.

Those who wish to provide comments on the Draft Corktown Station EWR must do so by **June 11, 2021** and submit them using the webpage form or address them to the following email: [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com).

Section 10 of O. Reg. 341/20 requires Metrolinx to establish an issues resolution process to attempt to resolve any concerns raised by the public or Indigenous Nations during the review period. At the end of the review period, Metrolinx will update the Draft Corktown Station EWR by adding a description of the issues resolution process, what Metrolinx did to address any concerns, and if the early works implementation timeline will be impacted as a result of addressing concerns. Metrolinx will then publish the Final Corktown Station EWR on the project webpage: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline) and issue a Notice of Publication of Final Corktown Station EWR.

To obtain a copy of the Draft Corktown Station EWR, please contact the project email listed above.

**Josh Vandezande (T: 416-202-5100, E: [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com)) may be contacted on behalf of Metrolinx.**

Port Perry, ON L9L 1B6  
**Delivered by Email**

Dear Chief LaRocca,

**RE: Ontario Line Project - Notice of Publication of Draft Corktown Station Early Works Report**

Metrolinx, a regional transportation agency, is helping to transform the way the Greater Golden Horseshoe region moves by building a fast, convenient and integrated transit network. As part of this work, Metrolinx is proceeding with the Ontario Line which will bring 15.6 kilometres of subway service to Toronto. The purpose of this letter is to share information regarding the Ontario Line project with Mississaugas of Scugog Island First Nation.

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Mississaugas of Scugog Island First Nation. Metrolinx appreciates and respects Mississaugas of Scugog Island First Nation's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to share with Mississaugas of Scugog Island First Nation the Draft Corktown Station Early Works Report (EWR).

**Project Description**

The Ontario Line will stretch from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line is proposed to include 15 stations, including six interchange stations, and connections to three GO train lines, two existing subway lines, the Eglinton Crosstown LRT, and streetcar lines. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable commutes. More information on the Project can be found on our website:

[www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)

The initial draft of the Corktown Station EWR and a letter outlining Corktown Station early works were shared with Mississaugas of Scugog Island First Nation on March 11, 2021. As outlined in the letter, environmental impacts of the Ontario Line Project are

being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*.

## Draft Corktown Station Early Works Report

In accordance with Section 8 of O. Reg. 341/20, Metrolinx has prepared a Draft Corktown Station EWR that documents the assessment of Corktown Station early works.

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These early works are being advanced to prepare the site for future construction staging and laydown to support tunneling and below ground construction activities, and work associated with the future Corktown Station. The location of the Corktown Station early works project footprint and study area can be viewed below in **Figure 1**.

metrolinx.com

The First Parliament site, located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail) and remnants of early Toronto industry may be found here. Metrolinx is eager to work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

The EWR documents the assessment of Corktown Station early works and outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures, and a consultation record.

The Draft EWR is available for your review and can be found via the Dropbox link shared in the body of the email that is associated with this letter. We welcome any additional comments you may have on the Draft EWR. The Draft EWR is available for review and comment starting **May 12, 2021** and ending on **June 11, 2021**. The Notice of Publication of Draft Corktown Station EWR is provided in **Attachment 1**. The Draft EWR will be updated following the review period, and the Final EWR will be published on the Project webpage ([www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)) and shared with Mississaugas of Scugog Island First Nation.

#### Potential Impacts and Mitigation Measures

The tables found enclosed in **Attachment 2 and 3** provide a summary of natural environment and archaeology potential impacts and mitigation measures identified as part of the Draft EWR that may be of interest to *Mississaugas of Scugog Island First Nation*. If *Mississaugas of Scugog Island First Nation* has any feedback about these potential impacts and/or mitigation strategies, or any other aspects of the Ontario Line, we welcome the opportunity to discuss further.

#### Revisions to the Initial Draft of the Corktown Station Early Works Report

In accordance with O. Reg. 341/20, Metrolinx has now incorporated comments and feedback from the initial round of engagement with Indigenous Nations and agencies on the initial draft of the Corktown Station EWR into the Draft EWR.

To streamline capacity for Mississaugas of Scugog Island First Nation to provide comments or feedback, a summary of revisions to the EWR since the circulation of the initial draft of the EWR is as follows:

- Minor editorial changes to address grammatical and syntax errors and updates to reflect comments received from agencies;
- Clarification that the project operations, construction of Corktown Station and other project components will be assessed in the Ontario Line Environmental Impact Assessment Report;
- Inclusion of information on the Parkland Strategy (City of Toronto, 2019), First Parliament Master Plan (City of Toronto, 2020) and additional information on planned community services and facilities in the Corktown Station Early Works Study Area;
- Edits to the text to reflect that the Ministry of Heritage, Sport, Tourism and Culture Industries' (MHSTCI) Minister's Consent has been granted for the demolition and removal of the non-heritage buildings at 265 Front Street East and removal of the heritage attributes at 265 Front Street East, 271 Front Street East and 25 Berkeley Street located on the First Parliament Site, and affirming Metrolinx's commitment to fulfilling the conditions outlined in the Minister's Consent, including completion of archaeological requirements;
- Additional mitigation measures for environmental disciplines such as archaeology, air quality and traffic and transportation, that include:
  - Coordination and completion of required archaeological investigations, early works activities and/or activities that have the potential for vibration effects such that buried archaeological resources are appropriately considered;
  - Use of non-chloride dust suppressants; and
  - Consultation with the City of Toronto to minimize potential impacts during special events (e.g., the Toronto Christmas Market at the Distillery District) should closures or long-term impacts be required.
- Revision of traffic and transportation figures to include additional information such as intersection names and inclusion of an additional noise and vibration figure to show representative receptor locations.

## Engagement

Metrolinx is committed to an open, respectful, and transparent relationship with Mississaugas of Scugog Island First Nation. We appreciate the significant volume of documents related to this Project that have been shared with Mississaugas of Scugog Island First Nation. We are happy to assist in the review of these documents by meeting with Mississaugas of Scugog Island First Nation or working to address any questions that Mississaugas of Scugog Island First Nation may have about this Project. If you require additional information or materials or if you wish to discuss these Projects in more detail or set up a meeting, please contact Fallon Melander,

Manager of Metrolinx's Indigenous Relations Office at  
[IndigenousRelations@metrolinx.com](mailto:IndigenousRelations@metrolinx.com).

Metrolinx welcomes any comments or feedback on the Draft EWR from Mississaugas of Scugog Island First Nation. Please provide these in writing no later than **June 11, 2021**. Comments and information regarding this draft report will be collected to assist in meeting the requirements of the *Environmental Assessment Act* and may be included in study documentation. With the exception of personal information, all comments will become part of the public record. Kindly note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*.

Thank you for your time in reviewing this letter.

Yours Truly,

**Subject:** Ontario Line Project - Invitation to Meet & provide input on First Parliament Site  
**Date:** Monday, April 12, 2021 4:04:28 PM  
**Attachments:** 

---

Dear Chief LaRocca,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. We recently communicated with your Nation about the proposed Corktown Station which is along the planned alignment of the Ontario Line. This location includes parcels of land which were once the site of Upper Canada's First Parliament buildings. Metrolinx and its partners are exploring opportunities to commemorate the history of this site, and have been engaging with various parties including the City of Toronto and the Mississaugas of the Credit First Nation, on whose treaty territory this project is occurring.

Given the significant chance of recovering Indigenous and European artifacts during the Corktown Station Early Works, a detailed archaeological workplan is being developed. Metrolinx recognizes the importance and value of Indigenous monitors for any archaeology related to the Ontario Line Project. In our previous communication, an invitation was included for your Nation to participate in any archaeological fieldwork and monitoring during the Corktown Station Early Works, including demolition of modern buildings currently on the First Parliament site.

This work is anticipated to commence in Fall 2021, and if you have not yet expressed interest in participating, please feel free to do so at your earliest convenience. As a reminder any comments on the draft Corktown Station Early Works Report should be provided no later than **April 15, 2021**.

Metrolinx recognizes that the history of this location extends beyond European use, and as such, wants to take the opportunity to understand any significance it may have to Indigenous Nations. Metrolinx would like to meet with your Nation to discuss the First Parliament site, its commemoration, as well as review the broader Ontario Line project if you wish. We recognize that traditional knowledge of this area may be sacred and/or not appropriate to be shared, but would appreciate any information that may be appropriate for Metrolinx to consider.

This letter is not intended to replace engagement but to provide a high level summary for your information. We would very much appreciate meeting with your Nation to discuss in more detail. Please let me know if you have any questions or concerns. We appreciate the volume of documents that Metrolinx has shared with your Nation. If you have any questions or concerns, please do not hesitate to contact me.

Miigwetch,

Fallon

**Delivered by Email**

Dear Chief LaRocca,

**RE: Ontario Line Project - First Parliament Site and Lime Kiln Site**

Metrolinx, a regional transportation agency, is helping to transform the way the Greater Golden Horseshoe moves by building a fast, convenient and integrated transit network. As part of this work, Metrolinx is continuing the pre-construction planning of the Ontario Line which will bring nearly 16 kilometres of subway service to Toronto.

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Mississaugas of Scugog Island First Nation. Metrolinx appreciates and respects Mississaugas of Scugog Island First Nation's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to share with Mississaugas of Scugog Island First Nation information regarding Corktown Station early works and additional information regarding upcoming field visits and investigations at the Corktown Station early works site, which includes two registered archaeological sites, the First Parliament site and the Lime Kiln site.

**Project Description**

The proposed Ontario Line is a new 16-kilometer subway line, which will occupy an exclusive right-of-way system encompassing a combination of below-grade, above-grade, and at-grade alignment. The route (Figure 1) will run from Ontario Place/Exhibition through downtown Toronto to the Ontario Science Centre in the City of Toronto, with six (6) potential interchange stations and 17 new connections to GO Transit, existing subways and streetcars. More information on the Project can be found on our website: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)

**Corktown Station Early Works**

As communicated in the letter sent to Mississaugas of Scugog Island First Nation on March 11, 2021, the Corktown Station site has been identified for launching tunnel excavation equipment for the downtown and Don Yard segments of the proposed Ontario Line alignment, as well as the location of the Corktown Station. The First Parliament and Lime Kiln Sites, located within the Corktown Station area, are known archaeological sites which require additional archaeological study ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures, followed by completion of necessary archaeological studies, is required. Completion of this preparatory work on an expedited basis is essential to allow for the timely delivery of the overall Project and is anticipated to begin in the Fall 2021, subject to the completion of the Corktown Station early works process in accordance with Ontario Regulation 341/20: Ontario Line Project.

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These activities will enable completion of environmental due diligence investigations, including archaeological assessments. These activities will occur on properties within the Corktown Station early works project footprint, as shown in **Figure 1**.

Figure 1: Map of Corktown Station Early Works

Environmental impacts of Corktown Station early works are being assessed in accordance with O. Reg. 341/20. Metrolinx shared the draft Corktown Station Early Works Report and associated discipline reports with Mississaugas of Scugog Island First Nation on March 11, 2021 and had requested any comments to be provided by April 9, 2021.

## **Archaeological Work at the First Parliament Site and Lime Kiln Site**

Metrolinx appreciates the significance of archaeology to Mississaugas of Scugog Island First Nation. The properties at 265 Front Street East, 271 Front Street East, and 25 Berkeley Street, in the St. Lawrence neighbourhood of the City of Toronto, are collectively host to the First Parliament Site. It is located on the southwest corner of Parliament Street and King Street, between Parliament Street and Berkeley Street. The First Parliament Site is a registered archaeological site (AjGu-41) which may include resources associated with the First and Second Parliament Buildings, the Home District Gaol, and Consumers' Gas company buildings. The surface of the property is currently occupied by automotive businesses, including a car dealership, car wash, and surface parking lot. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and remnants of early Toronto industry may be found at this site.

North of the First Parliament Site is another registered archaeological site (AjGu-64), the Lime Kiln Site, which includes remains from the Toronto Lime Works Company. A variety of structural features, in various states of preservation, have been documented on this site. The location of the Lime Kiln Site and the First Parliament Site are shown in **Figure 2**.

Figure 2: Location of First Parliament Site and Lime Kiln Site Areas

The First Parliament Site and Lime Kiln Site require additional archaeological studies ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures is necessary. Completion of this preparatory work is essential to allow for the timely delivery of the Ontario Line.

Archaeological fieldwork to remove or protect archaeological resources is anticipated to commence in early Fall 2021, and a workplan for these archaeological investigations is under development. As mentioned in the letter sent on March 11, 2021, Mississaugas of Scugog Island First Nation is invited to participate in all archaeological fieldwork, and to review and provide comments on forthcoming reports.

### **Feedback on Commemoration of First Parliament Site**

Metrolinx appreciates that the history of the First Parliament site is not one simply of Canadian origin, but rather holds longer history and tradition. Metrolinx also appreciates that the site of the First Parliament of Upper Canada is linked to a history of colonization and harmful practices towards Indigenous Peoples. Given the significance of this site, Metrolinx is engaging with Indigenous Nations, City of Toronto and the broader community to identify opportunities for commemoration. Metrolinx is committed to ensuring that any feedback from Mississaugas of Scugog Island First Nation regarding the significance of this site is considered as part of this commemoration. Metrolinx appreciates that traditional or cultural knowledge about this site may be sacred and/or not be appropriate to be shared but welcomes any comments or ideas from Mississaugas of Scugog Island First Nation that may be appropriate to commemorate Indigenous Peoples.

### **Engagement**

Metrolinx is committed to an open, respectful, and transparent relationship with Mississaugas of Scugog Island First Nation. We would like to meet with Mississaugas of Scugog Island First Nation to better understand any significance the First Parliament site may have to your Nation. We are also happy to assist in reviewing the Corktown Station Early Works Report or reviewing the proposed archaeological workplan for this site. If Mississaugas of Scugog Island First Nation requires additional information or materials, or you wish to discuss this project in more detail or set up a meeting, please contact Fallon Melander, Manager, Indigenous Relations at Metrolinx. She can be contacted at [IndigenousRelations@metrolinx.com](mailto:IndigenousRelations@metrolinx.com).

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*. Thank you for your time in reviewing these assessments.

Thank you for your time in reviewing this letter.

**Subject:** Ontario Line - Project Update and Draft Corktown Station Early Works Report for Review + Invitation to Participate in Archaeological Fieldwork

Dear Chief LaRocca,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. Attached you will find a letter providing an update on the project. The purpose of this letter is to:

- Provide an update on the scope of the project work
- share the initial draft of the Early Works Report for the proposed Corktown

## Station

- Invite your Nation to participate in upcoming archaeological fieldwork

In an effort to streamline your review, we draw your attention to the attachment which provides an overview of the expected environmental impacts and proposed mitigations, as we know this may be of specific interest to you.

Metrolinx is also preparing a letter specific to works being planned within the Don Valley as we recognize the significance of this waterway to many Nations. We hope to share that letter soon. We are happy to meet with your Nation to discuss the Ontario Line and address any questions or concerns that your Nation may have.

We ask that any comments on the draft Corktown Station Early Works Report be provided no later than **April 15, 2021**. Please note that the Noise and Vibration Report, which will be part of the Early Works Report is still being prepared and we will share with your Nation by March 19, 2021.

The draft Corktown Station Early Works Report is available at the following link:

[REDACTED]

Please let us know as soon as possible if your Nation has interest in participating in future archaeological fieldwork.

We appreciate the volume of documents that Metrolinx has shared with your Nation.

If you have any questions or concerns, please do not hesitate to contact me.

Miigwetch,

Fallon

Dear Chief LaRocca,

**RE: Ontario Line Project - Corktown Station Early Works Report**

Metrolinx, a regional transportation agency, is helping to transform the way the Greater Golden Horseshoe region moves by building a fast, convenient and integrated transit network. As part of this work, Metrolinx is proceeding with the Ontario Line which will bring nearly 16 kilometres of subway service to Toronto. The purpose of this letter is to share information regarding the Ontario Line project with Mississaugas of Scugog Island First Nation.

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Mississaugas of Scugog Island First Nation. Metrolinx appreciates and respects Mississaugas of Scugog Island First Nation's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to share with Mississaugas of Scugog Island First Nation information regarding Corktown Station early works and invite feedback on the initial draft of the Corktown Station Early Works Report.

**Project Description**

The Project is a new subway line with connections to Line 1 (Yonge-University) subway service at Osgoode and Queen Stations, Line 2 (Bloor-Danforth) subway service at Pape Station, and Line 5 (Eglinton Crosstown) service at the future Science Centre Station. Fifteen stations are proposed, with additional connections to three GO Transit lines (Lakeshore East, Lakeshore West and Stouffville), and the Queen, King, Bathurst, Spadina, Harbourfront and Gerrard/Carlton streetcar routes. The Project will reduce crowding on Line 1 and provide connections to new high-order rapid transit neighbourhoods. More information on the Project can be found on our website: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)

**Ontario Line Environmental Assessment Process and Reports**

In 2020, Metrolinx provided Mississaugas of Scugog Island First Nation with an outline of the Ontario Line environmental assessment process. The environmental assessment for the Ontario Line Project is being completed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20) made under the *Environmental Assessment Act*. The regulation outlines a Project-specific environmental assessment that includes an Environmental Conditions Report, an Environmental Impact Assessment Report and provides opportunity for Early Works Reports for assessment of works that are ready to proceed in advance of the Environmental Impact Assessment Report. An overview of the reports is outlined below and their anticipated publication timeline is provided in **Attachment 1**.

### Environmental Conditions Report

The Environmental Conditions Report characterizes existing environmental conditions within the Ontario Line study area through a combination of desktop review and field studies and was finalized in November 2020. The report also summarizes potential impacts and mitigation measures for consideration during project planning and design. Potential impacts and mitigation measures identified in the Environmental Conditions Report will be confirmed and refined within the Early Works Reports and the Environmental Impact Assessment Report.

### Early Works Reports

Metrolinx is assessing several early works components to support the main construction of the Ontario Line project. Early works are components of the Ontario Line Project that are anticipated to be ready to proceed before completion of the Environmental Impact Assessment Report, such as station construction, rail corridor expansion, utility relocation or bridge replacement or expansion, as defined in O. Reg. 341/20.

Initially, the early works required to support the Ontario Line project were assessed in a single report, which was shared in June 2020 and included Exhibition Station, Lower Don Bridges, Lakeshore East Joint Corridor and East Harbour early works.

Since then, the single Early Works Report has been split into several Early Works Reports, each covering either a single early works location or multiple locations if they are in close proximity. Each Early Works Report provides a description of the early works and alternatives considered, documents local environmental conditions, and outlines early works-specific environmental impacts, mitigation measures,

monitoring activities, potentially required permits and approvals and other components.

It is important to note that two new early works projects, Don Yard and Corktown Station, have been added as well. The Early Works Reports, including this new scope of work are summarized below:

- Exhibition Station Early Works  
Exhibition Station early works are documented in the Exhibition Station Early Works Report, finalized in February 2021.
- Lakeshore East Joint Corridor Early Works  
Lakeshore East Joint Corridor early works will be documented under a separate Early Works Report which will also include East Harbour Station.
- Lower Don Bridges & Don Yard Early Works  
Lower Don Bridges early works will be documented in the Lower Don Bridges and Don Yard Early Works Report. Don Yard is a new early works project that will include construction of Ontario Line tunnel and portal structures between Cherry Street and the Lower Don River and accompanying shift of the Richmond Hill and Lakeshore East GO tracks; installation or upgrading of retaining walls and noise barriers, where appropriate; and utility and signal infrastructure relocation or protection. The initial draft of the Lower Don Bridges and Don Yard Early Works Report is anticipated to be shared with Mississaugas of Scugog Island First Nation in mid to late April.
- Corktown Station Early Works  
Corktown Station is a new early works project. Further information on Corktown Station early works is provided below.

### Environmental Impact Assessment Report

The main report produced as part of this process is the Environmental Impact Assessment Report. It will cover the construction and operation of the Ontario Line. The report will include a final description of the Ontario Line Project, environmental impact evaluation results, mitigation measures, monitoring activities, potentially required permits and approvals and other components as outlined in O. Reg. 341/20.

## **Work along the Don River and within the vicinity of the Don Valley**

Metrolinx appreciates the significance of waterways to Mississaugas of Scugog Island First Nation. As such, Metrolinx is preparing an information letter specific to work occurring near or along the Don River and within the Valley. Metrolinx will provide details about the scope of work and anticipated natural environmental and archaeological assessments. Metrolinx is committed to exploring opportunities for Mississaugas of Scugog Island First Nation to participate in these assessments should Mississaugas of Scugog Island First Nation express interest.

## **Corktown Station Early Works**

The Corktown Station site has been identified for launching tunnel excavation equipment for the downtown and Don Yard segments of the proposed Ontario Line alignment, as well as the location for the Corktown Station. The First Parliament site, located within the Corktown Station area, is a known archaeological site which requires additional archaeological study ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures, followed by completion of necessary archaeological studies, is required. Completion of this preparatory work on an expedited basis is essential to allow for the timely delivery of the overall Project.

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These activities will enable completion of environmental due diligence investigations, including archaeological assessments. These activities will occur on properties within the Corktown Station early works project footprint, as shown in **Figure 2**.

Figure 2: Map of Corktown Station Early Works

Environmental impacts of Corktown Station early works are being assessed in accordance with O. Reg. 341/20.

Metrolinx is sharing the initial draft of the Corktown Station Early Works Report, including the Corktown Station Natural Environment Report, via the Dropbox link enclosed in the email for Mississaugas of Scugog Island First Nation's review. The Corktown Station Early Works Report documents the assessment of Corktown Station early works. It also outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures, and a consultation record. For a summary of the potential mitigation measures identified, please see the table found as **Attachment 2**.

Note that the initial draft of the report enclosed in the email currently does not include information on noise and vibration as the Corktown Station Noise and Vibration Report is still being prepared. The initial draft of the Corktown Station Noise and Vibration Report is anticipated to be shared with Mississaugas of Scugog Island First Nation on **March 19, 2021** for review.

Metrolinx welcomes any comments or feedback on the initial draft of the Corktown Station Early Works Report from Mississaugas of Scugog Island First Nation. Please provide these in writing no later than **April 15, 2021**.

Based on our currently anticipated schedule (**Figure 1**), the Notice of Publication of Draft Corktown Station Early Works Report is planned for late-April 2021, at which point the draft report will be available to all interested parties for review, including Mississaugas of Scugog Island First Nation, the public and regulatory agencies.

### Archaeology

As outlined above, archaeological assessments are anticipated to take place as part of advancing Corktown Station Early Works. Metrolinx would appreciate any interest Mississaugas of Scugog Island First Nation may have in participating in planned future archaeological fieldwork for this site. The maps in **Attachment 3** illustrate the areas that will be subject to future archaeological assessments that include fieldwork. Upon receipt of Mississaugas of Scugog Island First Nation's interest in participating, Metrolinx will work to coordinate your Nation's involvement.

Metrolinx acknowledges that Mississaugas of Scugog Island First Nation should be aware of and engaged regarding any future archaeological work, especially the discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will ensure that future archaeological assessments are provided to Mississaugas of Scugog Island First Nation in draft form, prior to submission to MHSTCI.

### **Engagement**

Metrolinx is committed to an open, respectful, and transparent relationship with Mississaugas of Scugog Island First Nation. We appreciate the significant volume of documents related to this Project that have been shared with Mississaugas of Scugog Island First Nation. We are happy to assist in the review of these documents by meeting with Mississaugas of Scugog Island First Nation or working to address any questions that Mississaugas of Scugog Island First Nation may have about this Project. If you require additional information or materials or if you wish to discuss these Projects in more detail or set up a meeting, please contact Fallon Melander, Manager of Metrolinx's Indigenous Relations Office at [IndigenousRelations@metrolinx.com](mailto:IndigenousRelations@metrolinx.com).

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*. Thank you for your time in reviewing these assessments.

Thank you for your time in reviewing this letter.

| Vegetation Communities                                                                                      | <ul style="list-style-type: none"><li>City and private tree removal</li></ul>                                                                                                                            | <ul style="list-style-type: none"><li>An Arborist Report by an International Society of Arboriculture Certified Arborist will be prepared, if required, in accordance with the Ontario Forestry Act R.S.O. 1990, and other regulations and best management practices as applicable.</li><li>The Arborist Report will include, but not be limited to the individual identification of all trees within the Corktown Station early works construction areas including those that require removal or preservation, or trees that may be injured. Trees to be identified may include those on Metrolinx property, trees on public and private lands, and boundary trees. City of Toronto by-laws dictate the minimum area buffers to be inventoried and Diameter at Breast Height which requires inventory.</li><li>Prior to the undertaking of tree removals, a Tree Removal Strategy/Tree Preservation Plan will be developed to document tree protection and mitigation measures that follow the City of Toronto Tree Protection Policy and Specifications for Construction Near Trees Guidelines (2016b) and adherence with best practices, standards and regulations on safety, environmental and wildlife protections.</li><li>Compensation for tree removals will be undertaken in accordance with provisions outlined in the Metrolinx Vegetation Guideline (2020).</li><li>Pruning of branches will be conducted through the implementation of proper arboricultural techniques.</li><li>Tree Protection Zone fencing will be established to protect and prevent tree injuries. Tree Protection Zones will be clearly staked prior to construction using barriers in accordance with local by-law requirements.</li></ul> | <ul style="list-style-type: none"><li>Regular inspection in areas of vegetation removal will be undertaken as required during construction to ensure that fencing is intact, only specified trees are removed and no damage is caused to the remaining trees and adjacent vegetation communities.</li><li>On-site inspection will be undertaken to confirm the implementation of the mitigation measures and identify corrective actions if required. Corrective actions may include additional site maintenance and alteration of activities to minimize impacts.</li><li>If required, the approach to compensation monitoring will be developed in accordance with Metrolinx’s Vegetation Guideline (2020).</li></ul> |

| Environmental Component                               | Potential Impact                                                                                                                                                                              | Mitigation Measure(s)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Monitoring Activities                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|-------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Vegetation Communities</b>                         | <ul style="list-style-type: none"><li>▪ Soil contamination as a result of spills (e.g., grease and/or fuel) from equipment use</li><li>▪ Introduction or spread of Invasive Species</li></ul> | <ul style="list-style-type: none"><li>▪ A Spill Prevention and Contingency Plan will be developed and adhered to. Spills will be immediately contained and cleaned up in accordance with provincial regulatory requirements and the contingency plan.</li><li>▪ Refuelling shall be done within refuelling stations lined with appropriate material to prevent seepage and fuel discharge.</li><li>▪ All machinery, construction equipment and vehicles arriving on site should be in clean condition (e.g., free of fluid leaks, soils containing seeds of plant material from invasive species) and be inspected and washed in accordance with the Clean Equipment Protocol for Industry (Halloran et al., 2013) prior to arriving and leaving the construction site in order to prevent the spread of invasive species to other locations.</li></ul>                  | <ul style="list-style-type: none"><li>▪ On-site inspection will be undertaken to confirm the implementation of the mitigation measures and identify corrective actions if required. Corrective actions may include additional site maintenance and alteration of activities to minimize impacts.</li><li>▪ Ensure precautions are being taken to minimize the spread of invasive species by implementing the Clean Equipment Protocol for Industry (Halloran et al., 2013) on equipment and machinery prior to moving sites.</li><li>▪</li></ul> |
| <b>Wildlife and Wildlife Habitat – General</b>        | <ul style="list-style-type: none"><li>▪ Disturbance, displacement or mortality of wildlife</li></ul>                                                                                          | <ul style="list-style-type: none"><li>▪ Prior to construction, investigation of the Corktown Station early works construction areas for wildlife and wildlife habitat that may have established following the completion of previous surveys will be undertaken, as appropriate.</li><li>▪ If wildlife is encountered, measures will be implemented to avoid destruction, injury, or interference with the species, and/or its habitat. For example, construction activities will cease or be reduced, and wildlife will be encouraged to move off-site and away from the construction area on its own. A qualified Biologist will be contacted to define the appropriate buffer required from wildlife.</li></ul>                                                                                                                                                       | <ul style="list-style-type: none"><li>▪ On-site inspection by on-site environmental workers or construction staff should occur daily within the construction area to ensure that no wildlife is trapped within the construction area.</li><li>▪ On-site inspection will be undertaken to confirm the implementation of the mitigation measures and identify corrective actions if required. Corrective actions may include additional site maintenance and alteration of activities to minimize impacts.</li></ul>                               |
| <b>Significant Wildlife Habitat: Common Nighthawk</b> | <ul style="list-style-type: none"><li>▪ Removal of candidate nesting habitat for Common Nighthawk</li></ul>                                                                                   | <ul style="list-style-type: none"><li>▪ Refer below to mitigation measures described for Migratory Breeding Birds and Nests.</li><li>▪ Demolition of buildings should be scheduled outside of the breeding bird season of April 1 to August 31. If this is not possible and buildings must be demolished during this period, the following will be completed:</li><li>▪ The roofs will be checked for presence of gravel. If gravel is not present, then the building is unlikely to provide suitable nesting habitat for Common Nighthawk. If gravel is present, a search for eggs and nesting activity for Common Nighthawk on the roof will be conducted. If nests or nesting activity of Common Nighthawk are confirmed, the building cannot be demolished until it is confirmed by a Qualified Biologist that young have fully fledged and left the nest.</li></ul> | <ul style="list-style-type: none"><li>▪ Refer below for monitoring requirements described for Migratory Breeding Birds and Nests.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                      |
| <b>Migratory Breeding Birds and Nests</b>             | <ul style="list-style-type: none"><li>▪ Disturbance or destruction of migratory bird nests</li></ul>                                                                                          | <ul style="list-style-type: none"><li>▪ All works must comply with the Migratory Birds Convention Act, including timing windows for the nesting period (April 1 to August 31 in Ontario).</li><li>▪ If activities are proposed to occur during the general nesting period, a breeding bird and nest survey will be undertaken prior to required activities. Nest searches by an experienced searcher are required and will be completed by a qualified Biologist no more than 48 hours prior to vegetation removal.</li><li>▪ If a nest of a migratory bird is found outside of this nesting period (including a ground nest) it still receives protection.</li></ul>                                                                                                                                                                                                    | <ul style="list-style-type: none"><li>▪ Regular monitoring (field observations, on-site inspections) will be undertaken to confirm that activities do not encroach into nesting areas or disturb active nesting sites.</li></ul>                                                                                                                                                                                                                                                                                                                 |

If clarification is required regarding regulatory requirements, the appropriate regulatory agencies will be consulted.

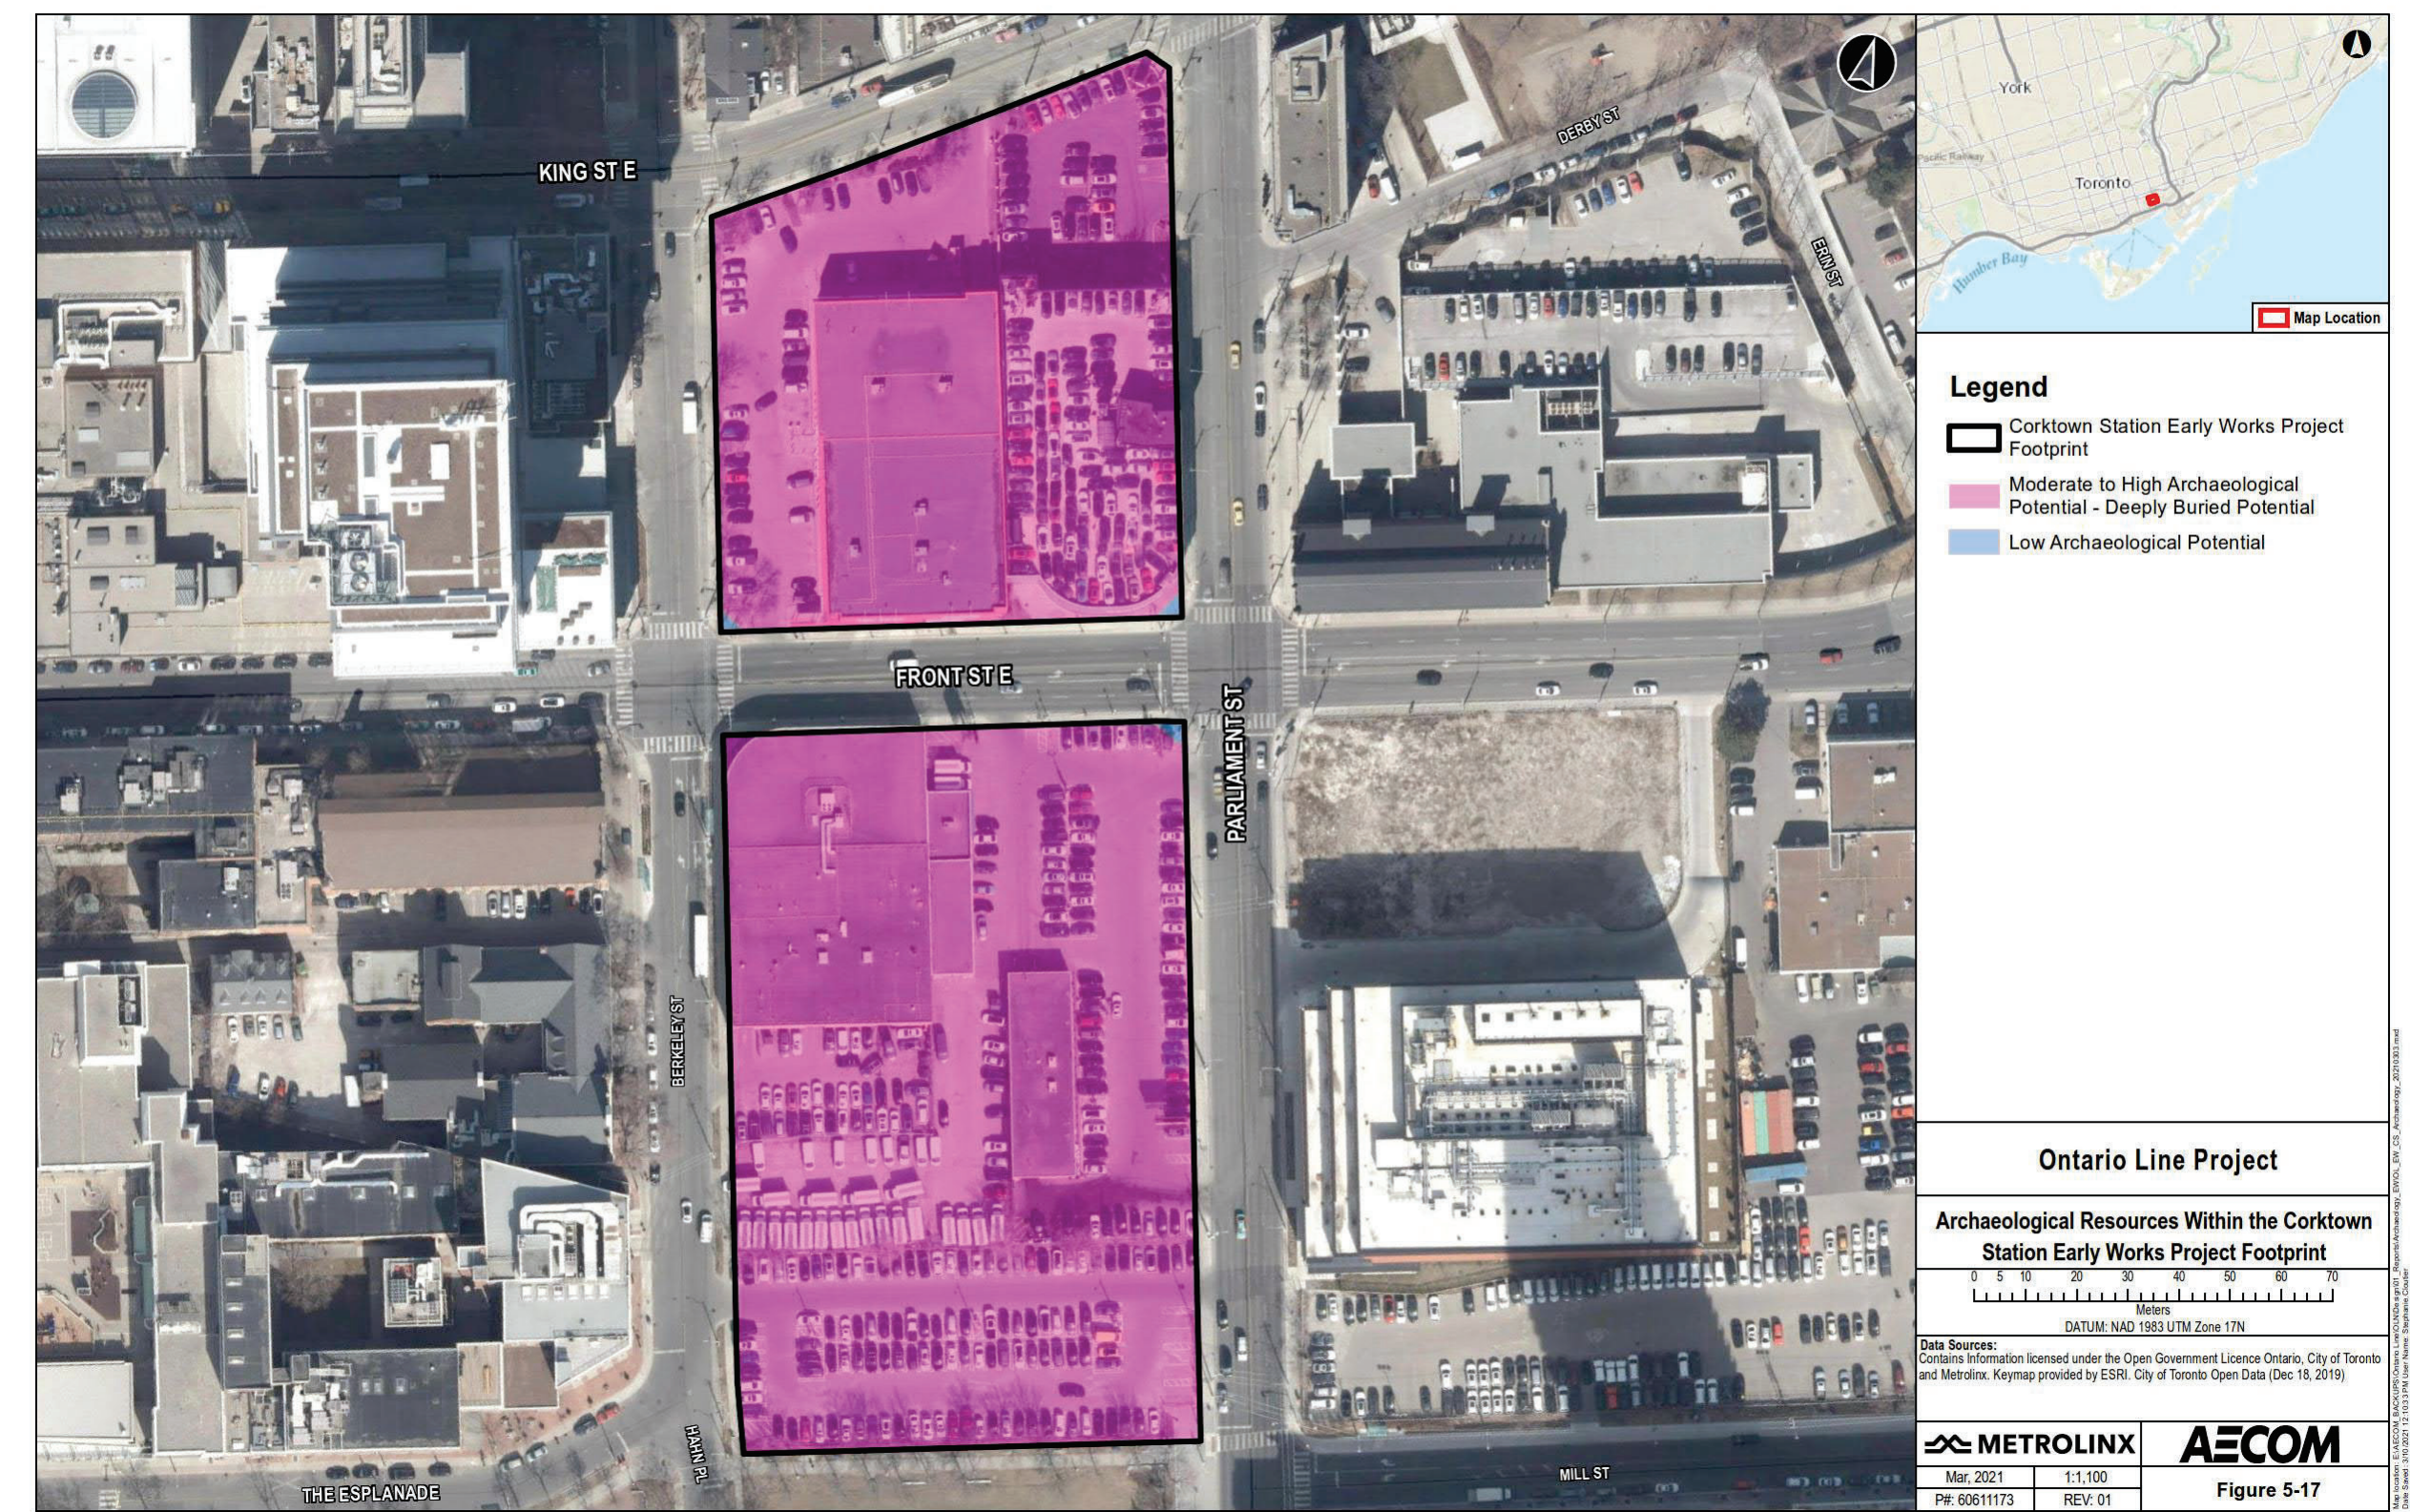

Table 6-8: Potential Impacts, Mitigation Measures and Monitoring Activities – Archaeological Resources

| Environmental Component  | Potential Impact                                                                                                                                                              | Mitigation Measure(s)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | Monitoring Activities                                                                                                                                                                                                              |
|--------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Archaeological Potential | <ul style="list-style-type: none"><li>▪ Potential for the disturbance of registered archaeological sites and/or archaeological resources not previously identified.</li></ul> | <ul style="list-style-type: none"><li>▪ Areas identified as retaining archaeological potential in the Corktown Station Early Works Project Footprint, as per the Ontario Line South Stage 1 Archaeological Assessment Report (AECOM, 2020c), are shown in <b>Figure 5-17</b>, and include the following. Should ground disturbing activities<sup>29</sup> be planned within these areas, further archaeological assessment must be completed prior to any ground disturbing activities.<ul style="list-style-type: none"><li>– The majority of the Corktown Station Early Works Project Footprint on either side of Front Street retains moderate to high archaeological potential where deeply buried archaeological potential remains, such as for discovering pre-contact Indigenous materials and/or materials related to the early development and expansion of the City of Toronto, including the First and Second Parliament Buildings, the Home District Gaol, and the Consumers’ Gas company buildings.</li></ul></li><li>▪ Given the significance of the First Parliament Site, all previous site specific archaeological assessments should be reviewed to determine what additional archaeological work is required.</li><li>▪ Any additional Archaeological Assessments (e.g., Stage 2, Stage 3 if recommended by the Stage 2) shall be completed as early as possible, and prior to any ground disturbing activities. This work shall be done in accordance with the Ministry of Heritage, Sport, Tourism and Culture Industries’ Standards and Guidelines for Consultant Archaeologists (2011) to identify any archaeological resources that may be present.</li><li>▪ Indigenous Nations will be invited to participate in monitoring requirements for any subsequent archaeological work is recommended. Any person discovering human remains must immediately notify the police or coroner and the Registrar of Cemeteries, Ministry of Government Services. In addition, consultation with relevant Indigenous Nations will be initiated in the event that archaeological resources or human remains are discovered.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | <ul style="list-style-type: none"><li>▪ None identified at this time.</li><li>▪ Metrolinx will adhere to all recommendations in any subsequent archaeological assessments, including monitoring activities, as required.</li></ul> |

<sup>29</sup> Ground disturbing activities can be defined as any and all activities that will or have the potential to impact/disturb the area below the surface. Example of activities include, but is not limited to, heavy machine movement/weight, clearing, grading, excavating, trenching, drilling, and transporting and filling of land.

---

Dear Lonny & Team,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. Attached you will find a letter providing an update on the project. The purpose of this letter is to share the Draft Corktown Station Early Works Report (EWR) prepared for the Ontario Line Project and provide a continued invitation for feedback.

In an effort to streamline your review, we draw your attention to the attachment which provides an overview of the expected environmental impacts and proposed mitigations, as we know this may be of specific interest to you.

We ask that you provide any comments no later than June 11, 2021.

The reports are available at the following link:

We appreciate the volume of documents that Metrolinx has shared with your Nation. If you have any questions or concerns, please do not hesitate to contact the Indigenous Relations Office.

Miigwetch,

Fallon

## Notice of Publication of Draft Corktown Station Early Works Report

### Ontario Line Project

#### The Project

The Ontario Line will bring 15.6 kilometres of new subway service to Toronto to make it faster and easier for people to get where they need to be each day. The line will stretch across the city, from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line is proposed to include 15 potential stations, including six interchange stations, and connections to three GO train lines, two existing subway lines, the new Eglinton Crosstown LRT, and streetcar lines at 10 of its stations. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable commutes.

#### Corktown Station Early Works

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These early works are being advanced to prepare the site for future construction staging and laydown to support tunneling and below ground construction activities, and work associated with the future Corktown Station.

The First Parliament site, located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail), and remnants of early Toronto industry may be found here.

Metrolinx is eager to unlock the potential of the site and work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

Environmental impacts of Corktown Station early works are being assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*. In accordance with Section 8 of O. Reg. 341/20, Metrolinx has prepared the Draft Corktown Station Early Works Report (EWR) that is now available for public review.

The Draft EWR documents the assessment of Corktown Station early works. The report outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures and a consultation record.

### **The Draft Early Works Report Review and Consultation Process**

Effective **May 12, 2021**, the Draft Corktown Station EWR will be available for review on the project webpage ([www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)).

As we temporarily shift to virtual open houses, please join us online from **May 12 to June 11, 2021** to find out more about and provide your feedback on the Draft Corktown Station EWR via the webpage form.

Those who wish to provide comments on the Draft Corktown Station EWR must do so by **June 11, 2021** and submit them using the webpage form or address them to the following email: [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com).

Section 10 of O. Reg. 341/20 requires Metrolinx to establish an issues resolution process to attempt to resolve any concerns raised by the public or Indigenous Nations during the review period. At the end of the review period, Metrolinx will update the Draft Corktown Station EWR by adding a description of the issues resolution process, what Metrolinx did to address any concerns, and if the early works implementation timeline will be impacted as a result of addressing concerns. Metrolinx will then publish the Final Corktown Station EWR on the project webpage: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline) and issue a Notice of Publication of Final Corktown Station EWR.

To obtain a copy of the Draft Corktown Station EWR, please contact the project email listed above.

**Josh Vandezande (T: 416-202-5100, E: [ontarioline@metrolinx.com](mailto:ontarioline@metrolinx.com)) may be contacted on behalf of Metrolinx.**

Ohsweken, ON N0A 1M0  
**Delivered by Email**

Dear Mr. Bomberry,

**RE: Ontario Line Project - Notice of Publication of Draft Corktown Station Early Works Report**

Metrolinx, a regional transportation agency, is helping to transform the way the Greater Golden Horseshoe region moves by building a fast, convenient and integrated transit network. As part of this work, Metrolinx is proceeding with the Ontario Line which will bring 15.6 kilometres of subway service to Toronto. The purpose of this letter is to share information regarding the Ontario Line project with Six Nations of the Grand River.

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Six Nations of the Grand River. Metrolinx appreciates and respects Six Nations of the Grand River's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to share with Six Nations of the Grand River the Draft Corktown Station Early Works Report (EWR).

**Project Description**

The Ontario Line will stretch from the Ontario Science Centre in the northeast to Exhibition/Ontario Place in the southwest. The Ontario Line is proposed to include 15 stations, including six interchange stations, and connections to three GO train lines, two existing subway lines, the Eglinton Crosstown LRT, and streetcar lines. The project will feature a combination of tunneled, surface and elevated segments, and will be completely separated from traffic to provide fast and reliable commutes. More information on the Project can be found on our website:  
[www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)

The initial draft of the Corktown Station EWR and a letter outlining Corktown Station early works were shared with Six Nations of the Grand River on March 11, 2021. As outlined in the letter, environmental impacts of the Ontario Line Project are being

assessed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20), under the *Environmental Assessment Act*.

## Draft Corktown Station Early Works Report

In accordance with Section 8 of O. Reg. 341/20, Metrolinx has prepared a Draft Corktown Station EWR that documents the assessment of Corktown Station early works.

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These early works are being advanced to prepare the site for future construction staging and laydown to support tunneling and below ground construction activities, and work associated with the future Corktown Station. The location of the Corktown Station early works project footprint and study area can be viewed below in **Figure 1**.

Figure 1: Map of Corktown Station Early Works

The First Parliament site, located within the Corktown Station early works project footprint, is a known archaeological site which requires additional archaeological studies ahead of any ground disturbance activities. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and the Home District Gaol (Jail) and remnants of early Toronto industry may be found here. Metrolinx is eager to work with the City of Toronto, Indigenous Nations and the community to identify opportunities for commemoration. Initial archaeological and environmental investigations are underway.

The EWR documents the assessment of Corktown Station early works and outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures, and a consultation record.

The Draft EWR is available for your review and can be found via the Dropbox link shared in the body of the email that is associated with this letter. We welcome any additional comments you may have on the Draft EWR. The Draft EWR is available for review and comment starting **May 12, 2021** and ending on **June 11, 2021**. The Notice of Publication of Draft Corktown Station EWR is provided in **Attachment 1**. The Draft EWR will be updated following the review period, and the Final EWR will be published on the Project webpage ([www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)) and shared with Six Nations of the Grand River.

#### Potential Impacts and Mitigation Measures

The tables found enclosed in **Attachment 2 and 3** provide a summary of natural environment and archaeology potential impacts and mitigation measures identified as part of the Draft EWR that may be of interest to *Six Nations of the Grand River*. If *Six Nations of the Grand River* has any feedback about these potential impacts and/or mitigation strategies, or any other aspects of the Ontario Line, we welcome the opportunity to discuss further.

#### Revisions to the Initial Draft of the Corktown Station Early Works Report

In accordance with O. Reg. 341/20, Metrolinx has now incorporated comments and feedback from the initial round of engagement with Indigenous Nations and agencies on the initial draft of the Corktown Station EWR into the Draft EWR.

To streamline capacity for Six Nations of the Grand River to provide comments or feedback, a summary of revisions to the EWR since the circulation of the initial draft of the EWR is as follows:

- Minor editorial changes to address grammatical and syntax errors and updates to reflect comments received from agencies;
- Clarification that the project operations, construction of Corktown Station and other project components will be assessed in the Ontario Line Environmental Impact Assessment Report;
- Inclusion of information on the Parkland Strategy (City of Toronto, 2019), First Parliament Master Plan (City of Toronto, 2020) and additional information on planned community services and facilities in the Corktown Station Early Works Study Area;
- Edits to the text to reflect that the Ministry of Heritage, Sport, Tourism and Culture Industries' (MHSTCI) Minister's Consent has been granted for the demolition and removal of the non-heritage buildings at 265 Front Street East and removal of the heritage attributes at 265 Front Street East, 271 Front Street East and 25 Berkeley Street located on the First Parliament Site, and affirming Metrolinx's commitment to fulfilling the conditions outlined in the Minister's Consent, including completion of archaeological requirements;
- Additional mitigation measures for environmental disciplines such as archaeology, air quality and traffic and transportation, that include:
  - Coordination and completion of required archaeological investigations, early works activities and/or activities that have the potential for vibration effects such that buried archaeological resources are appropriately considered;
  - Use of non-chloride dust suppressants; and
  - Consultation with the City of Toronto to minimize potential impacts during special events (e.g., the Toronto Christmas Market at the Distillery District) should closures or long-term impacts be required.
- Revision of traffic and transportation figures to include additional information such as intersection names and inclusion of an additional noise and vibration figure to show representative receptor locations.

## Engagement

Metrolinx is committed to an open, respectful, and transparent relationship with Six Nations of the Grand River. We appreciate the significant volume of documents related to this Project that have been shared with Six Nations of the Grand River. We are happy to assist in the review of these documents by meeting with Six Nations of the Grand River or working to address any questions that Six Nations of the Grand River may have about this Project. If you require additional information or materials or if you wish to discuss these Projects in more detail or set up a meeting, please contact Fallon Melander, Manager of Metrolinx's Indigenous Relations Office at

[IndigenousRelations@metrolinx.com](mailto:IndigenousRelations@metrolinx.com).

Metrolinx welcomes any comments or feedback on the Draft EWR from Six Nations of the Grand River. Please provide these in writing no later than **June 11, 2021**.

Comments and information regarding this draft report will be collected to assist in meeting the requirements of the *Environmental Assessment Act* and may be included in study documentation. With the exception of personal information, all comments will become part of the public record. Kindly note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*.

Thank you for your time in reviewing this letter.

Yours Truly,

A handwritten signature in black ink, appearing to read 'Maria Zintchenko', with a stylized flourish at the end.

---

Dear Lonny and Team,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. We recently communicated with your Nation about the proposed Corktown Station which is along the planned alignment of the Ontario Line. This location includes parcels of land which were once the site of Upper Canada's First Parliament buildings. Metrolinx and its partners are exploring opportunities to commemorate the history of this site, and have been engaging with various parties including the City of Toronto and the Mississaugas of the Credit First Nation, on whose treaty territory this project is occurring.

Given the significant chance of recovering Indigenous and European artifacts during the Corktown Station Early Works, a detailed archaeological workplan is being developed. Metrolinx recognizes the importance and value of Indigenous monitors for any archaeology related to the Ontario Line Project. In our previous communication, an invitation was included for your Nation to participate in any archaeological fieldwork and monitoring during the Corktown Station Early Works, including demolition of modern buildings currently on the First Parliament site.

This work is anticipated to commence in Fall 2021, and if you have not yet expressed interest in participating, please feel free to do so at your earliest convenience. As a reminder any comments on the draft Corktown Station Early Works Report should be provided no later than **April 15, 2021**.

Metrolinx recognizes that the history of this location extends beyond European use, and as such, wants to take the opportunity to understand any significance it may have to Indigenous Nations. Metrolinx would like to meet with your Nation to discuss the First Parliament site, its commemoration, as well as review the broader Ontario Line project if you wish. We recognize that traditional knowledge of this area may be sacred and/or not appropriate to be shared, but would appreciate any information that may be appropriate for Metrolinx to consider.

This letter is not intended to replace engagement but to provide a high level summary for your information. We would very much appreciate meeting with your Nation to discuss in more detail. [REDACTED]

We appreciate the volume of documents that Metrolinx has shared with your Nation. If you have any questions or concerns, please do not hesitate to contact me.

Miigwetch,

Fallon

**Delivered by Email**

Dear Mr. Bomberry,

**RE: Ontario Line Project - First Parliament Site and Lime Kiln Site**

Metrolinx, a regional transportation agency, is helping to transform the way the Greater Golden Horseshoe moves by building a fast, convenient and integrated transit network. As part of this work, Metrolinx is continuing the pre-construction planning of the Ontario Line which will bring nearly 16 kilometres of subway service to Toronto.

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Six Nations of the Grand River. Metrolinx appreciates and respects Six Nations of the Grand River's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to share with Six Nations of the Grand River information regarding Corktown Station early works and additional information regarding upcoming field visits and investigations at the Corktown Station early works site, which includes two registered archaeological sites, the First Parliament site and the Lime Kiln site.

**Project Description**

The proposed Ontario Line is a new 16-kilometer subway line, which will occupy an exclusive right-of-way system encompassing a combination of below-grade, above-grade, and at-grade alignment. The route (Figure 1) will run from Ontario Place/Exhibition through downtown Toronto to the Ontario Science Centre in the City of Toronto, with six (6) potential interchange stations and 17 new connections to GO Transit, existing subways and streetcars. More information on the Project can be found on our website: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)

**Corktown Station Early Works**

As communicated in the letter sent to Six Nations of the Grand River on March 11, 2021, the Corktown Station site has been identified for launching tunnel excavation equipment for the downtown and Don Yard segments of the proposed Ontario Line alignment, as well as the location of the Corktown Station. The First Parliament and Lime Kiln Sites, located within the Corktown Station area, are known archaeological sites which require additional archaeological study ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures, followed by completion of necessary archaeological studies, is required. Completion of this preparatory work on an expedited basis is essential to allow for the timely delivery of the overall Project and is anticipated to begin in the Fall 2021, subject to the completion of the Corktown Station early works process in accordance with Ontario Regulation 341/20: Ontario Line Project.

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These activities will enable completion of environmental due diligence investigations, including archaeological assessments. These activities will occur on properties within the Corktown Station early works project footprint, as shown in **Figure 1**.

Figure 1: Map of Corktown Station Early Works

Environmental impacts of Corktown Station early works are being assessed in accordance with O. Reg. 341/20. Metrolinx shared the draft Corktown Station Early Works Report and associated discipline reports with Six Nations of the Grand River on March 11, 2021 and had requested any comments to be provided by April 9, 2021.

## Archaeological Work at the First Parliament Site and Lime Kiln Site

Metrolinx appreciates the significance of archaeology to Six Nations of the Grand River. The properties at 265 Front Street East, 271 Front Street East, and 25 Berkeley Street, in the St. Lawrence neighbourhood of the City of Toronto, are collectively host to the First Parliament Site. It is located on the southwest corner of Parliament Street and King Street, between Parliament Street and Berkeley Street. The First Parliament Site is a registered archaeological site (AjGu-41) which may include resources associated with the First and Second Parliament Buildings, the Home District Gaol, and Consumers' Gas company buildings. The surface of the property is currently occupied by automotive businesses, including a car dealership, car wash, and surface parking lot. Artifacts from Indigenous Nations, remains of Upper Canada's First and Second Parliament Buildings and remnants of early Toronto industry may be found at this site.

North of the First Parliament Site is another registered archaeological site (AjGu-64), the Lime Kiln Site, which includes remains from the Toronto Lime Works Company. A variety of structural features, in various states of preservation, have been documented on this site. The location of the Lime Kiln Site and the First Parliament Site are shown in **Figure 2**.

Figure 2: Location of First Parliament Site and Lime Kiln Site Areas

The First Parliament Site and Lime Kiln Site require additional archaeological studies ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures is necessary. Completion of this preparatory work is essential to allow for the timely delivery of the Ontario Line.

Archaeological fieldwork to remove or protect archaeological resources is anticipated to commence in early Fall 2021, and a workplan for these archaeological investigations is under development. As mentioned in the letter sent on March 11, 2021, Six Nations of the Grand River is invited to participate in all archaeological fieldwork, and to review and provide comments on forthcoming reports.

### **Feedback on Commemoration of First Parliament Site**

Metrolinx appreciates that the history of the First Parliament site is not one simply of Canadian origin, but rather holds longer history and tradition. Metrolinx also appreciates that the site of the First Parliament of Upper Canada is linked to a history of colonization and harmful practices towards Indigenous Peoples. Given the significance of this site, Metrolinx is engaging with Indigenous Nations, City of Toronto and the broader community to identify opportunities for commemoration. Metrolinx is committed to ensuring that any feedback from Six Nations of the Grand River regarding the significance of this site is considered as part of this commemoration. Metrolinx appreciates that traditional or cultural knowledge about this site may be sacred and/or not be appropriate to be shared but welcomes any comments or ideas from Six Nations of the Grand River that may be appropriate to commemorate Indigenous Peoples.

### **Engagement**

Metrolinx is committed to an open, respectful, and transparent relationship with Six Nations of the Grand River. We would like to meet with Six Nations of the Grand River to better understand any significance the First Parliament site may have to your Nation. We are also happy to assist in reviewing the Corktown Station Early Works Report or reviewing the proposed archaeological workplan for this site. If Six Nations of the Grand River requires additional information or materials, or you wish to discuss this project in more detail or set up a meeting, please contact Fallon Melander, Manager, Indigenous Relations at Metrolinx. She can be contacted at [IndigenousRelations@metrolinx.com](mailto:IndigenousRelations@metrolinx.com).

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*. Thank you for your time in reviewing these assessments.

**Subject:** Ontario Line - Project Update and Draft Corktown Station Early Works Report for Review + Invitation to Participate in Archaeological Fieldwork

Dear Lonny & Team,

Metrolinx continues to progress its environmental studies for the Ontario Line Project as part of the Subways Program. Attached you will find a letter providing an update on the project. The purpose of this letter is to:

- Provide an update on the scope of the project work

- share the initial draft of the Early Works Report for the proposed Corktown Station
- Invite your Nation to participate in upcoming archaeological fieldwork

In an effort to streamline your review, we draw your attention to the attachment which provides an overview of the expected environmental impacts and proposed mitigations, as we know this may be of specific interest to you.

Metrolinx is also preparing a letter specific to works being planned within the Don Valley as we recognize the significance of this waterway to many Nations. We hope to share that letter soon. We are happy to meet with your Nation to discuss the Ontario Line and address any questions or concerns that your Nation may have.

We ask that any comments on the draft Corktown Station Early Works Report be provided no later than **April 15, 2021**. Please note that the Noise and Vibration Report, which will be part of the Early Works Report is still being prepared and we will share with your Nation by March 19, 2021.

The draft Corktown Station Early Works Report is available at the following link:

[REDACTED]

Please let us know as soon as possible if your Nation has interest in participating in future archaeological fieldwork.

We appreciate the volume of documents that Metrolinx has shared with your Nation.

If you have any questions or concerns, please do not hesitate to contact me.

Miigwetch,

Fallon

Dear Mr. Bomberry,

## **RE: Ontario Line Project - Corktown Station Early Works Report**

Metrolinx, a regional transportation agency, is helping to transform the way the Greater Golden Horseshoe region moves by building a fast, convenient and integrated transit network. As part of this work, Metrolinx is proceeding with the Ontario Line which will bring nearly 16 kilometres of subway service to Toronto. The purpose of this letter is to share information regarding the Ontario Line project with Six Nations of the Grand River.

Metrolinx wishes to build a strong, constructive, cooperative and mutually respectful and beneficial relationship with the Six Nations of the Grand River. Metrolinx appreciates and respects Six Nations of the Grand River's desire to be appropriately informed and aware of projects. To that end Metrolinx wishes to share with Six Nations of the Grand River information regarding Corktown Station early works and invite feedback on the initial draft of the Corktown Station Early Works Report.

## **Project Description**

The Project is a new subway line with connections to Line 1 (Yonge-University) subway service at Osgoode and Queen Stations, Line 2 (Bloor-Danforth) subway service at Pape Station, and Line 5 (Eglinton Crosstown) service at the future Science Centre Station. Fifteen stations are proposed, with additional connections to three GO Transit lines (Lakeshore East, Lakeshore West and Stouffville), and the Queen, King, Bathurst, Spadina, Harbourfront and Gerrard/Carlton streetcar routes. The Project will reduce crowding on Line 1 and provide connections to new high-order rapid transit neighbourhoods. More information on the Project can be found on our website: [www.metrolinx.com/ontarioline](http://www.metrolinx.com/ontarioline)

## **Ontario Line Environmental Assessment Process and Reports**

In 2020, Metrolinx provided Six Nations of the Grand River with an outline of the Ontario Line environmental assessment process. The environmental assessment for the Ontario Line Project is being completed in accordance with Ontario Regulation 341/20: Ontario Line Project (O. Reg. 341/20) made under the *Environmental Assessment Act*. The regulation outlines a Project-specific environmental assessment that includes an Environmental Conditions Report, an Environmental Impact Assessment Report and provides opportunity for Early Works Reports for assessment of works that are ready to proceed in advance of the Environmental Impact Assessment Report. An overview of the reports is outlined below and their anticipated publication timeline is provided in **Attachment 1**.

### Environmental Conditions Report

The Environmental Conditions Report characterizes existing environmental conditions within the Ontario Line study area through a combination of desktop review and field studies and was finalized in November 2020. The report also summarizes potential impacts and mitigation measures for consideration during project planning and design. Potential impacts and mitigation measures identified in the Environmental Conditions Report will be confirmed and refined within the Early Works Reports and the Environmental Impact Assessment Report.

### Early Works Reports

Metrolinx is assessing several early works components to support the main construction of the Ontario Line project. Early works are components of the Ontario Line Project that are anticipated to be ready to proceed before completion of the Environmental Impact Assessment Report, such as station construction, rail corridor expansion, utility relocation or bridge replacement or expansion, as defined in O. Reg. 341/20.

Initially, the early works required to support the Ontario Line project were assessed in a single report, which was shared in July 2020 and included Exhibition Station, Lower Don Bridges, Lakeshore East Joint Corridor and East Harbour early works.

Since then, the single Early Works Report has been split into several Early Works Reports, each covering either a single early works location or multiple locations if they are in close proximity. Each Early Works Report provides a description of the early works and alternatives considered, documents local environmental conditions, and outlines early works-specific environmental impacts, mitigation measures,

monitoring activities, potentially required permits and approvals and other components.

It is important to note that two new early works projects, Don Yard and Corktown Station, have been added as well. The Early Works Reports, including this new scope of work are summarized below:

- Exhibition Station Early Works  
Exhibition Station early works are documented in the Exhibition Station Early Works Report, finalized in February 2021.
- Lakeshore East Joint Corridor Early Works  
Lakeshore East Joint Corridor early works will be documented under a separate Early Works Report which will also include East Harbour Station.
- Lower Don Bridges & Don Yard Early Works  
Lower Don Bridges early works will be documented in the Lower Don Bridges and Don Yard Early Works Report. Don Yard is a new early works project that will include construction of Ontario Line tunnel and portal structures between Cherry Street and the Lower Don River and accompanying shift of the Richmond Hill and Lakeshore East GO tracks; installation or upgrading of retaining walls and noise barriers, where appropriate; and utility and signal infrastructure relocation or protection. The initial draft of the Lower Don Bridges and Don Yard Early Works Report is anticipated to be shared with Six Nations of the Grand River in mid to late April.
- Corktown Station Early Works  
Corktown Station is a new early works project. Further information on Corktown Station early works is provided below.

### Environmental Impact Assessment Report

The main report produced as part of this process is the Environmental Impact Assessment Report. It will cover the construction and operation of the Ontario Line. The report will include a final description of the Ontario Line Project, environmental impact evaluation results, mitigation measures, monitoring activities, potentially required permits and approvals and other components as outlined in O. Reg. 341/20.

## **Work along the Don River and within the vicinity of the Don Valley**

Metrolinx appreciates the significance of waterways to Six Nations of the Grand River. As such, Metrolinx is preparing an information letter specific to work occurring near or along the Don River and within the Valley. Metrolinx will provide details about the scope of work and anticipated natural environmental and archaeological assessments. Metrolinx is committed to exploring opportunities for Six Nations of the Grand River to participate in these assessments should Six Nations of the Grand River express interest.

## **Corktown Station Early Works**

The Corktown Station site has been identified for launching tunnel excavation equipment for the downtown and Don Yard segments of the proposed Ontario Line alignment, as well as the location for the Corktown Station. The First Parliament site, located within the Corktown Station area, is a known archaeological site which requires additional archaeological study ahead of any ground disturbance activities. To prepare the Corktown Station site, demolition of existing buildings and structures, followed by completion of necessary archaeological studies, is required. Completion of this preparatory work on an expedited basis is essential to allow for the timely delivery of the overall Project.

Corktown Station early works include demolition of existing buildings, removal of other structures and asphalt where required, decommissioning of utilities, and soil removal and/or remediation where required. These activities will enable completion of environmental due diligence investigations, including archaeological assessments. These activities will occur on properties within the Corktown Station early works project footprint, as shown in **Figure 2**.

Environmental impacts of Corktown Station early works are being assessed in accordance with O. Reg. 341/20.

Metrolinx is sharing the initial draft of the Corktown Station Early Works Report, including the Corktown Station Natural Environment Report, via the Dropbox link enclosed in the email for Six Nations of the Grand River's review. The Corktown Station Early Works Report documents the assessment of Corktown Station early works. It also outlines the purpose of early works, a description of local environmental conditions, potential impacts and proposed mitigation measures, and a consultation record. For a summary of the potential mitigation measures identified, please see the table found as **Attachment 2**.

Note that the initial draft of the report enclosed in the email currently does not include information on noise and vibration as the Corktown Station Noise and Vibration Report is still being prepared. The initial draft of the Corktown Station Noise and Vibration Report is anticipated to be shared with Six Nations of the Grand River on **March 19, 2021** for review.

Metrolinx welcomes any comments or feedback on the initial draft of the Corktown Station Early Works Report from Six Nations of the Grand River. Please provide these in writing no later than **April 15, 2021**.

Based on our currently anticipated schedule (**Figure 1**), the Notice of Publication of Draft Corktown Station Early Works Report is planned for late-April 2021, at which point the draft report will be available to all interested parties for review, including Six Nations of the Grand River, the public and regulatory agencies.

### Archaeology

As outlined above, archaeological assessments are anticipated to take place as part of advancing Corktown Station Early Works. Metrolinx would appreciate any interest Six Nations of the Grand River may have in participating in planned future archaeological fieldwork for this site. The maps in **Attachment 3** illustrate the areas that will be subject to future archaeological assessments that include fieldwork. Upon receipt of Six Nations of the Grand River's interest in participating, Metrolinx will work to coordinate your Nation's involvement.

Metrolinx acknowledges that Six Nations of the Grand River should be aware of and engaged regarding any future archaeological work, especially the discovery and preservation of Indigenous artifacts and sacred burial grounds. Metrolinx will ensure that future archaeological assessments are provided to Six Nations of the Grand River in draft form, prior to submission to MHSTCI.

### **Engagement**

Metrolinx is committed to an open, respectful, and transparent relationship with Six Nations of the Grand River. We appreciate the significant volume of documents related to this Project that have been shared with Six Nations of the Grand River. We are happy to assist in the review of these documents by meeting with Six Nations of the Grand River or working to address any questions that Six Nations of the Grand River may have about this Project. If you require additional information or materials or if you wish to discuss these Projects in more detail or set up a meeting, please contact Fallon Melander, Manager of Metrolinx's Indigenous Relations Office at [IndigenousRelations@metrolinx.com](mailto:IndigenousRelations@metrolinx.com).

Please note that any information you provide to Metrolinx, or its delegates, will be subject to the *Freedom of Information and Protection of Privacy Act*. Thank you for your time in reviewing these assessments.

Thank you for your time in reviewing this letter.

Yours Truly,

| Vegetation Communities                                                                                      | <ul style="list-style-type: none"><li>City and private tree removal</li></ul>                                                                                                                            | <ul style="list-style-type: none"><li>An Arborist Report by an International Society of Arboriculture Certified Arborist will be prepared, if required, in accordance with the Ontario Forestry Act R.S.O. 1990, and other regulations and best management practices as applicable.</li><li>The Arborist Report will include, but not be limited to the individual identification of all trees within the Corktown Station early works construction areas including those that require removal or preservation, or trees that may be injured. Trees to be identified may include those on Metrolinx property, trees on public and private lands, and boundary trees. City of Toronto by-laws dictate the minimum area buffers to be inventoried and Diameter at Breast Height which requires inventory.</li><li>Prior to the undertaking of tree removals, a Tree Removal Strategy/Tree Preservation Plan will be developed to document tree protection and mitigation measures that follow the City of Toronto Tree Protection Policy and Specifications for Construction Near Trees Guidelines (2016b) and adherence with best practices, standards and regulations on safety, environmental and wildlife protections.</li><li>Compensation for tree removals will be undertaken in accordance with provisions outlined in the Metrolinx Vegetation Guideline (2020).</li><li>Pruning of branches will be conducted through the implementation of proper arboricultural techniques.</li><li>Tree Protection Zone fencing will be established to protect and prevent tree injuries. Tree Protection Zones will be clearly staked prior to construction using barriers in accordance with local by-law requirements.</li></ul> | <ul style="list-style-type: none"><li>Regular inspection in areas of vegetation removal will be undertaken as required during construction to ensure that fencing is intact, only specified trees are removed and no damage is caused to the remaining trees and adjacent vegetation communities.</li><li>On-site inspection will be undertaken to confirm the implementation of the mitigation measures and identify corrective actions if required. Corrective actions may include additional site maintenance and alteration of activities to minimize impacts.</li><li>If required, the approach to compensation monitoring will be developed in accordance with Metrolinx’s Vegetation Guideline (2020).</li></ul> |

| Environmental Component                               | Potential Impact                                                                                                                                                                              | Mitigation Measure(s)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Monitoring Activities                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|-------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Vegetation Communities</b>                         | <ul style="list-style-type: none"><li>▪ Soil contamination as a result of spills (e.g., grease and/or fuel) from equipment use</li><li>▪ Introduction or spread of Invasive Species</li></ul> | <ul style="list-style-type: none"><li>▪ A Spill Prevention and Contingency Plan will be developed and adhered to. Spills will be immediately contained and cleaned up in accordance with provincial regulatory requirements and the contingency plan.</li><li>▪ Refuelling shall be done within refuelling stations lined with appropriate material to prevent seepage and fuel discharge.</li><li>▪ All machinery, construction equipment and vehicles arriving on site should be in clean condition (e.g., free of fluid leaks, soils containing seeds of plant material from invasive species) and be inspected and washed in accordance with the Clean Equipment Protocol for Industry (Halloran et al., 2013) prior to arriving and leaving the construction site in order to prevent the spread of invasive species to other locations.</li></ul>                  | <ul style="list-style-type: none"><li>▪ On-site inspection will be undertaken to confirm the implementation of the mitigation measures and identify corrective actions if required. Corrective actions may include additional site maintenance and alteration of activities to minimize impacts.</li><li>▪ Ensure precautions are being taken to minimize the spread of invasive species by implementing the Clean Equipment Protocol for Industry (Halloran et al., 2013) on equipment and machinery prior to moving sites.</li><li>▪</li></ul> |
| <b>Wildlife and Wildlife Habitat – General</b>        | <ul style="list-style-type: none"><li>▪ Disturbance, displacement or mortality of wildlife</li></ul>                                                                                          | <ul style="list-style-type: none"><li>▪ Prior to construction, investigation of the Corktown Station early works construction areas for wildlife and wildlife habitat that may have established following the completion of previous surveys will be undertaken, as appropriate.</li><li>▪ If wildlife is encountered, measures will be implemented to avoid destruction, injury, or interference with the species, and/or its habitat. For example, construction activities will cease or be reduced, and wildlife will be encouraged to move off-site and away from the construction area on its own. A qualified Biologist will be contacted to define the appropriate buffer required from wildlife.</li></ul>                                                                                                                                                       | <ul style="list-style-type: none"><li>▪ On-site inspection by on-site environmental workers or construction staff should occur daily within the construction area to ensure that no wildlife is trapped within the construction area.</li><li>▪ On-site inspection will be undertaken to confirm the implementation of the mitigation measures and identify corrective actions if required. Corrective actions may include additional site maintenance and alteration of activities to minimize impacts.</li></ul>                               |
| <b>Significant Wildlife Habitat: Common Nighthawk</b> | <ul style="list-style-type: none"><li>▪ Removal of candidate nesting habitat for Common Nighthawk</li></ul>                                                                                   | <ul style="list-style-type: none"><li>▪ Refer below to mitigation measures described for Migratory Breeding Birds and Nests.</li><li>▪ Demolition of buildings should be scheduled outside of the breeding bird season of April 1 to August 31. If this is not possible and buildings must be demolished during this period, the following will be completed:</li><li>▪ The roofs will be checked for presence of gravel. If gravel is not present, then the building is unlikely to provide suitable nesting habitat for Common Nighthawk. If gravel is present, a search for eggs and nesting activity for Common Nighthawk on the roof will be conducted. If nests or nesting activity of Common Nighthawk are confirmed, the building cannot be demolished until it is confirmed by a Qualified Biologist that young have fully fledged and left the nest.</li></ul> | <ul style="list-style-type: none"><li>▪ Refer below for monitoring requirements described for Migratory Breeding Birds and Nests.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                      |
| <b>Migratory Breeding Birds and Nests</b>             | <ul style="list-style-type: none"><li>▪ Disturbance or destruction of migratory bird nests</li></ul>                                                                                          | <ul style="list-style-type: none"><li>▪ All works must comply with the Migratory Birds Convention Act, including timing windows for the nesting period (April 1 to August 31 in Ontario).</li><li>▪ If activities are proposed to occur during the general nesting period, a breeding bird and nest survey will be undertaken prior to required activities. Nest searches by an experienced searcher are required and will be completed by a qualified Biologist no more than 48 hours prior to vegetation removal.</li><li>▪ If a nest of a migratory bird is found outside of this nesting period (including a ground nest) it still receives protection.</li></ul>                                                                                                                                                                                                    | <ul style="list-style-type: none"><li>▪ Regular monitoring (field observations, on-site inspections) will be undertaken to confirm that activities do not encroach into nesting areas or disturb active nesting sites.</li></ul>                                                                                                                                                                                                                                                                                                                 |

The proponent or person discovering the archaeological resources must cease alteration of the site immediately and engage a licensed archaeologist to carry out archaeological field work, in compliance with Section 48(1) of the Ontario Heritage Act. Any person discovering human remains must immediately notify the police or coroner and the Registrar of Cemeteries, Ministry of Government Services. In addition, consultation with relevant Indigenous Nations will be initiated in the event that archaeological resources or human remains are discovered.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <ul style="list-style-type: none"><li>None identified at this time.</li><li>Metrolinx will adhere to all recommendations in any subsequent archaeological assessments, including monitoring activities, as required.</li></ul> |

<sup>29</sup> Ground disturbing activities can be defined as any and all activities that will or have the potential to impact/disturb the area below the surface. Example of activities include, but is not limited to, heavy machine movement/weight, clearing, grading, excavating, trenching, drilling, and transporting and filling of land.

Hi Jen,

Thank you for your email. I wanted to let you know that I have brought Robin's letter and this follow up to Metrolinx's Community Relations Vice President to ensure that there is an understanding of the issues and capacity pressures at hand given the volume of reports and projects that Metrolinx is undertaking. I also am reinforcing the message to Metrolinx about the need for meaningful engagement and consultation with those whose Treaty territories Metrolinx projects are impacting.

I look forward to meeting on October 20<sup>th</sup> and will ask for my Vice President to be present so that she can also hear and understand the issues and concerns and so that Metrolinx can move forward in a good way.

Miigwetch,

Fallon

Hi Fallon,

So the letter that Robbin provided this afternoon is our current stance on Metrolinx Projects (essentially this is going to be sent out as a “blanket statement” on future projects, not just Metrolinx). It basically outlines and affirms our treaty territories and Indigenous rights as Haudenosaunee people as well as our concern for any developments that takes place within our treaty lands especially in terms of adverse impacts to said environment which would include: lands, waters, animal/plant/aviary/water life.

Having said that and something we’ve already discussed at our last meeting is due to the extremely large volume of reports and studies coming in to the Six Nations CAP team (which total thousand of pages) on Metrolinx projects, we currently do not have the resources or the capacity to be reading through each document.

In order to submit a well thought out and thorough response to these individual Metrolinx projects, we’d have to take the time to read thoroughly through all of the technical documents. As Metrolinx has already implied that they have not set aside any additional funding for Indigenous communities to be able to better participate in these projects (however they did say they are looking into it further), we cannot meet these upcoming deadlines to provide feedback.

This is not to say either that because we were unable to provide responses/feedback on each of these projects, that we are agreeable to or supportive of them and that needs to be documented. We cannot make that decision on whether or not we can support these projects because we do not have the resources to be able to analyze all of the technical documents.

With that being said, please take this email response into consideration when reading the letter that Robbin has already provided.

We can definitely discuss this further at our October 20 meeting and answer any concerns or questions you may have.

Have a great day,

jen

**Subject:** RE: Ontario Line Project - Notice of Publication of Draft Environmental Conditions Report

Hello Lonny and Team,

Please find attached, a letter outlining the Notice of Publication of Draft Environmental Conditions Report for the Ontario Line Project. The link to access the report can be found here: [REDACTED]

A copy of the formal Notice, and the impact and mitigation tables for this project have been attached. We hope these tables might help to streamline your review.

Comments and feedback are requested by **October 17, 2020**.

We appreciate the size of these documents. Please let us know if you would like a meeting to review the project with our environmental teams or speak to me further about best practices for engaging your community.

If you have any questions or concerns, please feel free to reach out to me at any time.

Miigwetch!

Fallon
