

Geotechnical Investigative Work within the Lakeshore East Corridor

March 20, 2023

Project Overview

GO service is expanding to serve you better - with more frequent service, more stations, cleaner technology, and more connections. Across the entire network, our goal is to deliver over 10,000 train trips a week - so you won't need a schedule because you know the next train will be coming soon. GO Expansion will transform the GO rail network from a commuter service into an all-day, rapid system.

What work is taking place?

As part of investigative work for the GO Expansion project, crews will be drilling vertical boreholes to assess ground conditions within the Lakeshore East rail corridor. This work will support future track and infrastructure updates.

What to Expect

- Crews will use a drill rig to perform the investigation works. The drill is rotated and pushed into the ground by the drill head. Once the desired depth is reached, a soil sample is retrieved for analysis.
- A vac-truck may be used at certain borehole locations to identify utilities in advance of drilling.
- Residents may experience some noise and minor vibration from construction vehicles and equipment.
- Noise and vibration monitoring will take place to make sure all levels are within allowable limits.
- Work will take place within the rail corridor.
- Site lighting will be pointed away from residences.
- We apologize for any inconvenience and ask for your patience as we complete this critical work.

Hours of Work

- Drilling is expected to take place Monday - Friday beginning as early as March 20, 2023.
- Work will progress in stages within the area highlighted on the map for approximately eight (8) weeks.
- Drilling will move along this section of the corridor gradually.
- Work may be scheduled for daytime or overnight hours.
- Daytime working hours are scheduled whenever possible, however, some activities are required to take place overnight when trains are not in service
