**Durham-Scarborough Bus Rapid Transit
Public Correspondence Summary Table**

Date	Contact	Comment Summary	Date / Response	Actions / Commitments
The following table summarizes engagement with the public from May 2019 to October 13, 2021. All comments received, responses made and actions/commitments are detailed in this table.				
2019-05-22		Hi Kristin, We are in receipt of the notice of Public Info Centre #1 for the Durham-Scarborough BRT, and would like to be added to the project mailing list. We own 2 properties on the new project line, [REDACTED] in Ajax, and [REDACTED] in Whitby.	On 2019-05-23, K. Demasi responds: Thanks for your email. We will add you to the project mailing list.	Added to project mailing list.
2019-05-23		Hello Kristin, I was forwarded the Metrolinx notice about the Durham-Scarborough Bus Rapid Transit project. In the notice it says information can be found on the metrolinxengage.com site but I can't see anything. Could you kindly forward links for my perusal?	On 2019-05-24, K. Demasi responds: The project website is still being developed – we hope to have it up and running by end of next week, ahead of the first Public Information Centre in Pickering on June 6. The website will provide information about the project, highlight upcoming public engagement opportunities and allow for opportunities for the public to comment and provide feedback to the project team. In the meantime, if you would like additional information, please see the Durham-Scarborough BRT Initial Business Case. I've also attached the presentation that was provided by our consultant to the Durham Region COW on May 15.	Added to project mailing list.

Date	Contact	Comment Summary	Date / Response	Actions / Commitments
2019-05-24		<p>Hello Kristin,</p> <p>Thanks for sending this along. I've given part of the report a scan, and there's something that I think should be included in long-term planning considerations, with regards to downtown Oshawa. Although it is not currently in the works, and could possibly never happen, there should be awareness that the existence of the one-way streets in Oshawa, including King/Bond, could be something that changes in the near or distant future. The thought gets floated from time to time, occasionally gets referenced in scattered municipal government reports on related matters, and isn't completely far-fetched. It would take considerable political will to push it out into the open and made reality, but it's there. Should it ever happen, it could affect the planning of this BRT corridor in the final eastern kilometres.</p>	<p>On 2019-05-28, K. Demasi responds:</p> <p>Thank you for making us aware of this. We have taken note of this consideration and will be meeting with City of Oshawa staff over the next few weeks to discuss all the planning issues which we will need to take into account at this location, and other constrained locations along the corridor.</p>	
2019-05-30		<p>I am a owner of [REDACTED] [REDACTED] received a letter from you regarding BRT. I just want to know that you will force close any store during construction? My tenant worries about his business.</p>	<p>On 2019-06-02, K. Demasi responds:</p> <p>Thank you for your email regarding the Durham Scarborough BRT. The letter you received is in regards to some upcoming Public Information Centres where we encourage people to come and learn about the project.</p>	Attached Notice of PIC.

**Durham-Scarborough Bus Rapid Transit

Date	Contact	Comment Summary	Date / Response	Actions / Commitments
			<p>The project is still in the planning and design phase, and we do not yet have funding available for construction. A detailed construction plan will be developed at some point in the future and shared with the community if and when construction begins.</p> <p>In the meantime, we encourage you and your tenant to come to one of the Public Information Centres to learn more about the project and speak with project staff. The notice with the times and locations for the PICs is attached for your convenience.</p>	
2019-05-30	██████████ ██████████ ██████████████████	<p>Good morning Margaret,</p> <p>Would you be so kind to include me in minutes when they are sent out. Purely from a personal interest point of view.</p>		Added to project mailing list.
2019-06-03	██████████ ██████████████████	I could not find any info on the public information meet ups about the drop in for the study. There is nothing posted on the website.	<p>On 2019-06-05 L. Caragiale responds:</p> <p>Thank you for your message about the Durham-Scarborough Bus Rapid Transit project. All project information and public meeting details should be available on our website tomorrow at the address: www.metrolinxengage.com/dsbrt</p>	Added to project mailing list.

**Durham-Scarborough Bus Rapid Transit

Date	Contact	Comment Summary	Date / Response	Actions / Commitments
			<p>In the meantime, please see below: [Chart with meeting details included]</p> <p>If you are unable to attend in person, all materials presented at the meeting will be available on the website along with a survey to allow you to provide your comments.</p>	
2019-06-18	<p>[REDACTED] [REDACTED] [REDACTED] [REDACTED] [REDACTED] [REDACTED] [REDACTED] [REDACTED]</p>	<p>Hello Kristin,</p> <p>We recently received the attached notice on the proposed Durham-Scarborough Bus Rapid Transit. We are the Managing Agent for three (3) properties that may be effected by the transit route.</p> <p>Our properties are locations are: [REDACTED] [REDACTED] [REDACTED]</p> <p>Please provide information if the transit route will effect these properties.</p>	<p>On 2019-06-26, K. Demasi responds:</p> <p>Planning and design are underway now and we do not yet know the property impacts of the corridor. This information will be developed over the next 12 months or so as the project develops. Once we have this information available we will be able to share with the community. In the meantime, please refer to our website www.metrolinxengage.com/dsbrt for up to date project information.</p>	
2019-07-12	<p>[REDACTED] [REDACTED] [REDACTED]</p>	<p>Left voicemail with A. Wong.</p> <p>Lives in Whitby, curious to know what's happening in front of their property, was not able to make the public meeting in June.</p>	<p>On 2019-07-24, M. Parkhill leaves voicemail:</p> <p>Please visit the Metrolinx Engage website, with all the material from the public meeting and an on-line survey to help shape the project. Noted that</p>

2019-09-25	[REDACTED] [REDACTED] [REDACTED] [REDACTED]	<p>Kindly see attached. Please reconsider your project options.</p> <p>This project will significantly impact our business and we are very concerned. As a growing Canadian business, we strive to ensure our business runs successfully, access to the plaza will be negatively impacted and our customers will deter from coming into the plaza, thus affecting our sales.</p>	<p>On 2019-10-16, K. Demasi responds:</p> <p>Thank you for your email and letter dated Wednesday 25th September regarding the Durham Scarborough BRT. We appreciate your interest in the project.</p> <p>The project team will be evaluating several options for BRT infrastructure along this section of Ellesmere Road over the coming months. These options range from dedicated bus lanes, to intersection improvements aimed at improving traffic flow as well as giving priority to transit vehicles when required. These options will be evaluated and presented to the public for review and feedback as the design progresses. As set out in the Durham Scarborough BRT Initial Business Case, a higher capacity form of transit will be needed to link communities and employment on both sides of the Toronto-Durham boundary. Bus frequency in 2041 is expected to be approximately 30 buses per hour, or a bus approximately every 2 minutes</p>	Added to project mailing list.

			<p>during peak times. Mixing this frequency of buses with general traffic and/or right-turning traffic will not provide reliable transit service through this section.</p> <p>We understand your concerns about congestion, left-turn access and the suggestion regarding the seven lane cross section along Ellesmere Road. It is important that the project supports the City of Toronto's policy of designing complete streets which balance the needs and priorities of the various users and uses within the right-of-way. While seven lanes cross sections do exist, they do not balance the needs of all road users, placing priority on the private automobile, and reducing the safety for pedestrians, cyclists and other vulnerable road users. Therefore, a seven-lane cross section will not be considered as part of this project.</p>

2019-09-25	██████ ██████████████ ██████████████████ ██████████ ██████████ ██████████ ██████████████ ██████████████	<p>I'm writing to make know my objection to the proposed 'recommended option' by MetroLinx. I strongly oppose this move as it would adversely affect my business. There would be increased traffic into and around my plaza therefore making it less like that my customers would be willing to make appointments to see us. This increase in congestion on an already busy street would have serious consequences to my bottom line and viability going forward.</p> <p>Please consider other options such as widening the street as is done west of Brimely etc. This proposal to have one lane access both ways will not be beneficial enough to make it a win win for all involved.</p>	<p>On 2019-10-17, K. Demasi responds:</p> <p>Thank you for your email dated Wednesday 25th September regarding the Durham Scarborough BRT. 2019-11-10	[REDACTED] [REDACTED]	<p>Dear Kristin,</p> <p>I received notice of meeting. Can you add us to mailing list and provide information on Ellesmere portion.</p> <p>We live at [REDACTED] and at moment can not safely exit drive and buses stop in non designated area in front of house.</p> <p>I would like to know reason Ellesmere a residential street was chosen instead of continuing on Highway 2, Kingston Rd. The buses are destroying a quiet community, and remove atmosphere for neighbourhood and walking.</p>	<p>On 2019-10-14, K. Demasi responds:</p> <p>Thank you for your email. We will add you to the project mailing list.</p> <p>The Durham-Scarborough Bus Rapid Transit project proposes adding dedicated bus lanes while maintaining existing traffic capacity along Ellesmere Road in the City of Toronto and Highway 2 within Durham Region. An Initial Business Case for the project was published in 2018, which recommended dedicated bus infrastructure to enhance connections between Scarborough Centre, University of Toronto Scarborough, and locations throughout Durham Region.</p> <p>Alternative routing options along Kingston Road, Highway 2A and Military Trail to connect to the University were analyzed in the Initial Business Case. Ellesmere Road was</p>	Added to project mailing list.

Date	Contact	Comment Summary	Date / Response	Actions / Commitments
			<p>found to be the preferred option for the following reasons:</p> <ul style="list-style-type: none"> • It provides the most direct connection between Downtown Oshawa and Scarborough Centre; • It maximizes access to the corridor for the existing bus network; • It provides the biggest benefit in connecting residents and employment to the wider transit network now and into the future; and • It supports future rapid transit expansion within Scarborough. <p>TTC and DRT already operate frequent service along the corridor today. The BRT project aims to reduce conflicts between all road users, while benefiting residents by improving transit service through this section of Scarborough.</p> <p>We encourage you to come out to the consultation events next week, to learn more about the project and speak to members of the project team.</p>	
2019-11-12	██████████ ██████████████████ ██████████████████	Please remove me from the mailing list. I could be listed under:		Removed from mailing list.

		[REDACTED] [REDACTED]		
2019-11-21	[REDACTED] [REDACTED]	Support BRT along Ellesmere to UTSC and Durham. Suggest you DO NOT add more lanes between Morning side and STC. It is already six lanes and can accommodate bus/bike lines without widening.		Added to project mailing list.
2019-11-21	[REDACTED] [REDACTED]	Pls add my name to the mailing list.		Added to project mailing list.
2019-11-26	[REDACTED] [REDACTED]	<p>I was not able to attend the 2nd round of public consultations for this project, but I reviewed the materials, and I wanted to provide my feedback on a part of the plan dealing with my local area (Scarborough Centre and McCowan precincts in Toronto).</p> <p>Out of the 6 options presented for the west end of the BRT corridor, I believe that option 4B presents the best benefit and least disruption to the local community. I live along [REDACTED] and have read the McCowan Precinct Study, and I believe that a route operating through this precinct will help to maximize convenience for those who live there currently, as well as those who will live in future planned developments, both north and south of the extended Bushby Drive.</p>		

**Durham-Scarborough Bus Rapid Transit
Public Correspondence Summary Table**

Date	Contact	Comment Summary	Date / Response	Actions / Commitments
		<p>My rationale for choosing 4B out of the 4 options through McCowan Precinct are as follow:</p> <p>Option 2: Grangeway Ave is not wide enough to accommodate transit vehicles, and even with widening, this street does not run through the centre of the precinct.</p> <p>Option 4A: Similar to Option 2, this alignment does not run through the heart of the precinct, and would offer little added benefit over options 1 or 3.</p> <p>Option 4C: While this alignment runs through the heart of the precinct, it puts relatively industrial properties between residents south of Ellesmere and the Westbound BRT, and would run directly adjacent to a planned TDSB school along Bushby Dr, east of Parkington North. If walking connections to Ellesmere were improved as part of the project, this may be a good alignment as well.</p> <p>For these reasons, I believe Option 4B would be best suited to serve the revitalized McCowan Precinct at the west end of the DSBRT corridor.</p>

Added to project mailing list.

**Durham-Scarborough Bus Rapid Transit
Public Correspondence Summary Table**

Date	Contact	Comment Summary	Date / Response	Actions / Commitments
		<p>I have concerns here due to:</p> <p>Steep embankments, theoretically part of valley lands, though mostly covered with non-native, invasive, dog-strangling vine.</p> <p>No sidewalk currently on north side of road.</p> <p>Sidewalk must be added.</p> <p>Sidewalk on south side is unstreetscaped and unpleasant for pedestrians in current form. Requires buffer from traffic (trees/landscaping), also being on a hill, seating at a mid-point would be desirable.</p> <p>Digging into hill side would create environmental damage, and one or two very large retaining walls which not only create a hostile condition for pedestrians, but leave no path of escape should a vehicle mount a sidewalk, or from a potential harasser.</p> <p>Does the intersection treatment address future bike lanes on Morningside Avenue?</p> <p>Wider crossings at Morningside would be hostile to pedestrians.</p>		
2019-12-04	<div data-bbox="346 1183 599 1219" style="background-color: black; width: 100px; height: 22px;"></div> <div data-bbox="346 1219 626 1255" style="background-color: black; width: 104px; height: 22px;"></div>	<p>Please add me to the email list so that I can keep abreast of the latest developments. I am a strong supporter of high speed public transit for the Scarborough Durham Regions.</p>		<p>Added to project mailing list.</p>

		<p>I fully understand the need to update our services. I would very much appreciate that the Region, and the City of Oshawa, would provide meaningful consultations with all the affected businesses prior to making design or construction decisions. Further, unless there are emergency repairs, we would appreciate construction dates to be deferred to a time when the economic conditions improve .</p> <p>My concerns include timing of construction ,the ability for continued traffic flow during construction, and most importantly, the preservation of metered parking. Convenient on street Parking has been an ongoing concern here in Downtown, and any loss of metered street parking is a blow for storefront businesses.</p> <p>We also discussed Metrolinks plans to study bus routes along Simcoe Street and other downtown routes. Once again, any loss of parking for "express" lanes is another strike against business survival.</p> <p>I would very much appreciate if you could forward this note with my thoughts to your group, and the Region and City's works committees and Metrolinks . I will also reach out to them with my comments and suggestions.</p>

		With open consultation and communication, I am sure the planned projects will proceed smoothly to the benefit of everyone involved.		
2020-05-28	██████████ ██████████	<p>Hello, what is the current status of this project?</p> <p>Considering the significant reduced Metrolinx ridership since the onset of the Covid-19 crisis and the Durham Pulse buses running with just a few passengers on board (and buses running from Scarborough U of T campus along Ellesmere Road were never full to begin with), may I assume that this project has been suspended?</p>	<p>On 2020-07-02, DS BRT team responds:</p> <p>The planning and preliminary design for Durham-Scarborough Bus Rapid Transit project is proceeding. The Highway 2 and Ellesmere Road corridor is a crucial transportation link across Scarborough and Durham Region.</p> <p>With rapid growth in the past decade and an expectation for this growth to continue into the future, demand for travel along the corridor will continue to increase. We continue to plan for a higher capacity form of transit to link communities and employment on both sides of the Toronto-Durham boundary. While travel patterns have changed as a result of COVID-19, transit remains an essential service and is required for those who do not have a vehicle or cannot drive. You can read more about how Metrolinx is keeping people safely moving and continuing work on the Metrolinx blog</p>

2020-06-28	[REDACTED]	<p>[Email sent to MPP Vijay Thanigasalam]</p> <p>This email is in regards to the proposed BRT Ellesmere Transit Plan . I have lived at [REDACTED] for 32 years. [REDACTED] This part of the city is very quiet because the area is low density. Also because Meadowvale Rd is interrupted at Kingston Rd. There is not a lot of through traffic. Ellesmere Rd. Is NEVER congested it is the end of the TTC run. The westbound Durham traffic is also very light at all times. There is very little commercial property in the area , so consequently all traffic is local. I think widening the Ellesmere Rd. Section would be a total waste of money. At most you would gain only a couple of minutes of travel time , if any. If you really want to</p>	<p>On 2020-07-09, K. Demasi responds:</p> <p>Thank you for your feedback on the proposed Durham-Scarborough BRT project. Your comments are with the project team for review. We understand there are concerns from some residents about the design options for the project along Ellesmere Rd. The project is in the planning and preliminary design phase and we are continuing work on technical areas including traffic and transit operations, and road design and will bring forward that information when it is available.</p> <p>In the meantime, please check the Durham-Scarborough BRT website</p>	Added to project mailing list.

		<p>reduse congestion in the area, the the stretch of Steeles Ave. between 10th Line and Markham Rd could be opened to 2 lanes in each direction . I know this has nothing to do with Metrolinx , but would be money well spent . This may already be a consideration for future expansion . To reiterate , the tranquillity and integrity of the Highland Creek area would be compromised for no actual benifit . It kind of reminds me of the city building all the bicycle paths to appease the electorate . I am all for the paths as I an avid cyclist . The only problem is that a lot of the paths don't connect to each other . Sounds good on paper , all the new kilometres of paths.</p>	<p>for information as it becomes available</p> <p>www.metrolinxengage.com/dsbrt</p> <p>or reach out directly to the project team at dsbrt@metrolinx.com</p>

		<p>lower property values. The disruption to our community will be disastrous.</p> <p>Two, as it stands, the Pulse Buses and even TTC carry virtually no passengers (even before COVID). I don't see the economic reasoning.</p> <p>Third, there is no consideration for possibly re-routing the buses for what is essentially U of T Scarborough students who live in Durham. Why not have the Pulse buses go down Military Trail to Old Kingston and along Old Kingston, through Highland Creek Village and continue along #2. It might slow the ride a little but, I emphasize, it's only U of T students and there aren't that many people on those buses.</p> <p>I appreciate the fact that bus transit is important but I don't see any sense in this plan. It's too damaging to the community. The addition of Pulse buses from Durham over the past couple of years has already adversely impacted our neighbourhood and it happened without community input.</p> <p>You were elected two years ago to speak for the community. I ask that you make your voice heard. Beyond the adverse effect any variations of the Metrolinx BRTP</p>	<p>The purpose of the DS BRT is to improve reliability of transit service and provide better connect people and jobs in Scarborough and Durham Region. The TTC , DRT and GO buses will utilize the proposed dedicated bus lanes to get people to where they need to go efficiently and reliably. Residents of Highland Creek and Scarborough who rely on the TTC today will benefit from the bus lanes with reliable travel times, as well as drivers who will not be delayed by buses in the curb lanes.</p> <p>Potential Impacts The area along Ellesmere Road from Military Trail to Kingston Road, including the Highland Creek area, was identified as an area requiring detailed study and is being referred to as a 'pinch point'. The pinch point was extensively evaluated in 2019 and work continues. Our objective is to find the right design which provides transit reliability yet is sensitive to the local context.</p> <p>Property impacts are still being determined as the design progresses. Impacts to properties are being avoided as much as possible. The</p>

		<p>will have on our community, it also makes no economic sense. It's a lose-lose proposition.</p> <p>I would appreciate some feedback.</p>	<p>impacts to private property is expected to be minimal as majority of the proposed design will fit in the existing Right-Of-Way. After this study concludes, property owners that are directly impacted will be contacted.</p> <p>A detailed traffic study is currently underway to identify impacts and propose mitigation measures, such as "smart traffic signals" to improve travel times for all road users. Our analysis completed to date suggests that there will not be significant impacts to traffic levels with the addition of bus lanes along Ellesmere Road.</p> <p>Alternate Transit Routes The Durham-Scarborough Initial Business Case (IBC) in 2018 analyzed alternative routing of options along Ellesmere Road, Kingston Road and Highway 2A. Ellesmere Road was the preferred option because:</p> <ul style="list-style-type: none"> • Ellesmere Road provides the most direct connection to key destinations within Scarborough saving travel time savings to transit users and operating costs • This route maximizes access to the corridor for the existing

Date	Contact	Comment Summary	Date / Response	Actions / Commitments
			<p>transit service network in Toronto and Durham Region</p> <ul style="list-style-type: none"> • Provides the biggest benefit in connecting residents and employment to the wider transit network through to 2041 • Protects for future rapid transit expansion within Scarborough • <p>Metrolinx, the City of Toronto, and the TTC strive to provide the best access to transit for all individuals.</p> <p>Transit Ridership We understand that transit demand increases further west along Ellesmere Road toward Scarborough Centre. Therefore some buses may be less full at the eastern end of Ellesmere Road where they are near the end of the route. However, this corridor connects people and employment across Scarborough and Durham Region. TTC, DRT and GO buses all regularly monitor and collect ridership information as well as forecast future ridership. Ridership was a key factor in the IBC which confirmed the project as a worthwhile investment for the next stages of planning, and is a key input into this current work.</p>

Date	Contact	Comment Summary	Date / Response	Actions / Commitments
		<p>I'm not sure why this is plan is being considered in the first place as the traffic on Ellesmere road between Kingston Road and Military Trail is light even during rush hour. Currently express Durham buses use this road to go to the University and they fly down Ellesmere Road, so I'm not sure how much faster they would move in dedicated bus lanes.</p> <p>I live just east of the UofT campus, a 15 minute walk from the campus, and feel that TTC services into my area are poor. I wouldn't mind construction and disruption if it were going to benefit my use of TTC and give me greater access to Toronto but to tear up the roads and disrupt traffic flow etc for Durham residents and we can't even access these services is unfair to the community.</p> <p>The buses that do pass by, they don't seem that full. I'm also curious as to the current ridership and the demand for this service.</p>		
2020-09-02	██████████ ██████████	<p>[Email sent to MPP Vijay Thanigasalam]</p> <p>Thank you for your email. I am fine with you forwarding on my email to Metrolinx and ministry of transport. 		<p>and I'm interested if the projection of numbers will be re-evaluated for 2041 following Covid-19 and how remote working from home may be with us to stay following the pandemic and how this will shape future demands on the transit systems.</p> <p>I also noticed that the goal of this project is to link the city centre of Durham to Scarborough centre, however, I find it interesting that the part of Ellesmere road where the plan for the dedicated bus lanes is the part that has relatively lower traffic. One would think that it would be from Markham road to McCowan road where the traffic accumulates that would be the priority for dedicated bus lanes and not where the flow of traffic is low.</p> <p>Please do forward on the above comments as well.</p>	<p>with the introduction of the BRT. While it is true there is less traffic on this section today, our traffic modelling suggest that congestion across Ellesmere Rd will increase over the next 20 years and dedicated bus lanes are required to maintain reliability of services, and reduce conflicts with motor vehicles. Buses will not be permitted to travel at speeds greater than the posted speed limits.</p> <p>Both DRT and TTC services will be using the bus lanes and servicing all stops along Ellesmere Rd, improving transit options and reliability for all residents of Scarborough.</p> <p>We understand that transit demand increases further west along Ellesmere Road toward Scarborough Centre. Therefore some buses may be less full at the eastern end of Ellesmere Road where they are near the end of the route. However, this corridor connects people and employment across Scarborough and Durham Region. TTC and DRT regularly monitor and collect ridership information as well as forecast future ridership.</p>

			<p>Ridership was a key factor in the Initial Business Case which confirmed the project as a worthwhile investment for the next stages of planning, and is a key input into this current work.</p> <p>Over the last several months, COVID-19 has had a large impact on travel patterns. While there is uncertainty surrounding the “new normal”, we know that the use of private cars for all trips is not sustainable or viable. Transit ridership patterns go up and down but over time, the long-term trend is continuing up. The region will continue to grow and we will need to find solutions to move more people more efficiently. Cities around the world have found that public transit plays a vital role in the mobility of urban areas.</p> <p>Our next round of public consultation is scheduled for the fall 2020 where we will share an updated design and results of the technical and environmental studies we have completed to date. The consultation will be virtual and hosted on the project website</p>

		<p>OR have the BRT extend through highway 401 to the morningside exit and straight to the university. Were these options considered? If so, why were they rejected? Why are the residents of Scarborough time and again neglected by your government, especially when it comes to developing transit plans that work not only for the investors and corporations that you support but the residents who live in Scarborough- the residents who pay taxes which effectively pay your salaries. The people of Scarborough matter.</p>	<p>answer your questions in your email below?</p> <p>With respects to the BRT please see attached for your review the Public Information Centre (PIC) presentation from last fall:</p> <p>https://can01.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.metrolinxengage.com%2Fsites%2Fdefault%2Ffiles%2Fds_brt_pic2_boards_191115.pdf&data=02%7C01%7Ctas.borovilos%40pc.ola.org%7C9bbc3730a6ea406d4e8708d854432fe%7C6b9fd2ec77a64ae0822a6bb9108fb274%7C0%7C1%7C637351994852703050&sdata=QpRw4XqO1WgKM2juCvpw9QNrPOQJf6Y6Gr3mZ%2F44ZK8%3D&reserved=0</p> <p>I have also attached the presentation that was shared with the Highland Creek Association. The deck prepared for the PIC has more of a general overview of the project which may be helpful to be able to you in your viewing the project as a whole including the reasoning of why Ellesmere is being considered as the best option at this time.</p>

		<p>efficiency and frequency of existing bus/go train services connecting Scarborough to the Durham region. You are welcome to share my comments with them.</p>	<p>The Durham-Scarborough BRT is not a new BRT service. The aim of the project is to provide dedicated transit lanes to support existing bus services along Ellesmere Road to operate more reliably. This includes both Durham Region Transit's existing PULSE service and TTC services. Residents of Scarborough will benefit from the more frequent and reliable bus service which will connect destinations within Scarborough and Durham Region, including existing bus and rail services. The project is currently in the preliminary design and environmental assessment phase. We will be undertaking our next round of public consultation in the fall 2020, to provide an update on the design and results of technical and environmental studies we have completed to date. The consultation will be virtual and hosted on the projects website: https://www.metrolinxengage.com/dsb_rt.</p>	
2020-09-29	M. Parkhill emails Ellesmere Rd. Businesses: McCowan Rd. to Markham Rd.	Please join us for an information session on the Durham-Scarborough Bus Rapid Transit project.		Meeting materials attached.

2020-10-08	██████████ ████████████████	Thank you for your response on the DSBRT. Although I've lived in the area for over 30 years and have not seen the traffic increase largely along Ellesmere road while the area has developed, I'm interested to know what developments would occur other than the expansion of UTSC that would see the increase of cars on Ellesmere road, considering its proximity to the 401. Most car drivers traveling long distances access the 401 instead of remaining on Ellesmere Road. Most available land in that area of Scarborough has been built on. Due to poor transit provision in this area, most people rely heavily on cars anyway which has led in the recent years to a decrease in bus service during non-rush hour times. What I find interesting is that by running dedicated bus lanes, means that express buses cannot be used because local buses	On 2020-12-21, K. Demasi responds: Thank you for the follow up email. These are interesting points and they have been passed to the project team for review. Your comments on the need to improve the overall transit network across the region are valid. Metrolinx under the 2041 Regional Transportation Plan is planning a number of corridors (including the Durham-Scarborough BRT) to improve connections around the GTHA, beyond the need to travel to and from downtown Toronto. Currently it takes approx. 100 minutes to travel from Downtown Oshawa to UTSC, and with the BRT this would be reduced to about 75 minutes. However, a big focus of the Durham-	

**Durham-Scarborough Bus Rapid Transit
Public Correspondence Summary Table**

Date	Contact	Comment Summary	Date / Response	Actions / Commitments
		<p>would slow them down. Currently, the Durham buses that come into the UTSC campus only stop at Meadowvale Road and the campus. If they shared the dedicated lanes with TTC then they could no longer be express which would slow down the speed of buses.</p> <p>I more than anyone understand the need for good public transit, but what has disappointed me about the planning for Toronto (I'm not interested in travelling to Durham), especially the areas east of Scarborough Centre, is that all planning revolves around buses. The transportation model has focused on the premise that people need to get downtown for work and buses feed the subway systems. The focus has been on speeding up buses. With buses sharing roads with traffic lights, there is only so much that can be done to speed up buses. I'm not interested in transit planning that shaves 10 minutes off of a commute time that takes 1.5 hours. I'm looking at making significant differences to commute times so that owning a car would no longer be needed. I wish that metrolinx would think outside of the box and try and connect communities together so that people can use public transit efficiently. My older brother lives in the west end and it takes me 2 hours by public transit to get to</p>	<p>Scarborough BRT is also to improve the connections to local destinations along the corridor, as well as improve the overall travel time from end to end. Over 40% of trips that begin along the corridor also end along the corridor which means that implementing the bus lanes will make bus travel both within Durham, or along Ellesmere Rd more frequent and reliable so people who live in these communities will see improvements to their local network. This is also important as the area will continue to grow in the future and a lot of development is planned around the Scarborough Centre area. Other corridors, such as the Lakeshore East GO line are better suited for Durham residents who would like to travel to downtown Toronto.</p> <p>It is also true that if we had many buses using the lanes then express buses could get held up behind buses stopping. The Durham PULSE bus will be extended over to the Scarborough bus terminal, and the intent of this project is to allow both TTC and DRT buses to pick up and drop off along Ellesmere Rd. Residents in Scarborough could get</p>

		<p>his house compared to 30min by car. My younger brother lives east end Scarborough and works in Mississauga, there is no real alternative to him driving. So you can't really say that driving is not a viable option for the future when drivers don't have suitable options. While you focus on speeding up local travel with bus lanes, think about how the person from Oshawa centre is supposed to travel quickly with public transit to Brampton? How long would the travel time by bus from Oshawa centre to Scarborough centre be? The question, I feel isn't explored enough is to find out from current drivers what it would take to get them out of their car onto public transit. I feel that most planning especially in east end Scarborough, has focused on making what options we currently have faster by a few minutes.</p> <p>I'll end this email with an experience from Pan Am games 2015. Express buses were put in place in Scarborough to help move people out to the Pan Am Centre at Morningside and 401. I can remember taking the express bus from Kennedy station to UTSC on numerous occasions heading home from work when people who were going to events at the Pan Am Centre would nervously get up and go to the front of the bus and ask the driver if they had</p>	<p>on either bus to travel to the town centre and other destinations along the corridor. We are not currently planning any express bus services, however bus networks are always being refined and the TTC and DRT will continually develop network plans that can best meet the needs of the community in the future.</p> <p>Once again, thank you for your feedback.</p>

		missed the stop. They couldn't believe how long the journey from the subway station was to the venue. I always thought it but never said, "Welcome to Scarborough, now you can see how bad the public transit is here." This was on an express bus! Imagine if they were on a local bus! What made that express bus journey long was not the traffic but the distance and the traffic lights. Please consider the whole community's feedback for this project. Promoting slow bus travel is not the solution.

		<p>better than a kneeling bus or ramp deployment. The reason that I say this is that in many instances where level boarding platforms has been implemented using low floor buses it has required the vehicles to slow down to a crawl in order to properly dock with the level platform.</p> <p>Also the Durham Region Stops are proposed to have platforms that will be fully enclosed and require buses to align their doors to the same place at each stop, this may also require buses to crawl through stations. This proposal may also limit future fleet expansion as the doors from one vehicle manufacturer may not be completely aligned with the doors or another vehicle manufacturer (Novabus LFS Artic vs. the New Flyer XD60 do not have the same door placements). In addition to this in wet, icy or snowy conditions buses may have even more trouble aligning the doors.</p> <p>*Also I posted this in the Ask a Question section and did not realize it was going to be posted publicly, if possible please delete that question from there.</p>

		<p>on Hwy 2 – [REDACTED] was invited to attend Public Information Center Number 3 purportedly starting today, but it doesn't seem to work, so I am providing you with comments/questions via this email.</p> <p>Our tenants and we are very concerned with removal of parking in the downtown core. It affects the tenants greatly. I would assume that you could locate any transit stops either east or west of the actual downtown core and just leave the downtown core as-is. There is much more room and there are more lanes available just one or 2 blocks east or west. I don't see why you would need to affect parking and the businesses in the core which is really only about a block long. I think you need to really consider the effect on businesses and property owners and locating a block or two east or west should be no problem. If there is a bit of congestion for a block or two for bus traffic, that should not be a problem I would think.</p>

2020-11-17	██████████ ██████████████ ██████████████ ██████████████ ██████████	Beyond the obvious inconvenience for homeowners making a left turn into their driveways, I have a greater concern about the impact your 'preferred' plan has on the general neighborhood. The stretch of Ellesmere from Military Trail to Meadowvale and beyond is a residential community. Adding a center median will significantly alter the look of the neighborhood and, I fear, depress property values. As it is, Ellesmere is a bumpy road sitting, I am told, on a high water table. Already, the increased bus traffic has increased vibrations caused by TTC and Pulse buses coming through. While I can understand the desire to increase public transit and all its requisite benefits, I don't see it achieving it this in this 'pinch point'. Beyond students going to and from the Scarborough College campuses, I don't see anyone else on those buses going to and from Durham region. Moreover, adding a center median in the pinch point will not speed up traffic as there is almost no one on the buses coming along Ellesmere between Kingston Rd and the university as it is and general car traffic is light. I understand your desire to improve transportation on Ellesmere along

		<p>Morningside to the Scarborough Town center. There is far more traffic flowing which tends to slow public transit, particularly during rush hour periods. But east of Military Trail, there is no such problem, so I don't see the logic in spending money increasing lanes from 4 to 6 and building these eye-sore median lanes with their property-value depreciating effects. It's all fine and well for Ontario public servants to make plans but it's another thing to be a homeowner who stands only to lose. We absorb 'cons' you've not even identified in your "Pro/Con" analysis. I'm not sure your cost/benefit analysis has factored into the equation the negative externalities we homeowners along your 'pinch point' must absorb. And, for what? A little time saved? How much time? Seconds? Really? Time to rethink your preferred option. My advice is to repave Ellesmere from Military Trail eastward to where it ends and reduce the vibrations we have to endure from buses coming through and keep all else the same. It'll be smoother on your riders and keep buses moving at the speed limit.</p> <p>Moreover, I'm not convinced the Ellesmere 'pinch point' is the best route to connect Durham to Scarborough College and Ellesmere to the west. Consider this:</p>

		<p>Durham buses coming eastward along Kingston Rd. NOT turn right onto Ellesmere (which is a difficult turn, by the way) but, rather, continue along Kingston Rd., through Highland Creek village to Military Trail where they turn right and proceed to the university. After they've dropped the few people they carry there, they make a left onto Ellesmere and continue to the Town Centre or else turn around at the loop and go back whence they came. I'm sure you've thought about it and maybe I'm missing something.</p> <p>Consider ALL COSTS and rethink what you see as BENEFITS. I'm not sure the latter outweigh the former.</p>		
2020-11-19	██████████ ██████████████████	<p>The section of the rapid transit through downtown Whitby is great for commuters but bad for local business. Whitby is primarily a car-based city. Most locals don't use transit. We are unfortunately not a pedestrian town</p> <p>The small businesses along this stretch would go. Please divert this stretch of the rapid line south of downtown.</p>		Added to project mailing list.
2020-11-19	██████████ ██████████████████	<p>My first impression your plan for downtown Whitby is wrong. Vehicle traffic cannot go past Byron in the West and Green/Perry in the East. Merchants downtown will see a</p>	Response sent to correspondence received 2020-11-22.

		drop in business. Bikes moved away from downtown. A lot of money being spent on very few people that use the public transportation. Waste of money, inconvenience to vehicles wanting to pass through downtown, bike users shunted away from downtown. Bad planning.		
2020-11-20	██████████ ████████████████████	<p>I have lived in the middle of the area in question to be redeveloped for over 10 years now and I am glad you are attempting to evolve the local road and transit systems. However, I have to say, your first attempt including this bus mall and no through traffic on why 2 at byron design has to be the worst thought through plan I have ever seen. Clearly designed by someone who has never lived or interacted with the area. I drive high way from Cochrane and Hwy2 to King and Ritson every single day and do not notice much of an issue. But if you were to stop through traffic at Byron you will effectively ruin the charm on downtown Whitby.</p> <p>What you budget should really include is dollars to expropriate all the properties along hwy 2 between brock st and the library in order to properly redevelop this area once and for all. The historic charm lacks in Whitby anyways, may as well get rid of some of the crappy store fronts and make it a proper 2 lane both way hwy with a</p>		Added to project mailing list.

		<p>further impact these struggling small businesses.</p> <p>It is our understanding that Durham Region ridership is currently 30%. This is no doubt an incredibly expensive infrastructure project that would disrupt far many more than it would it would assist.</p> <p>Our downtown historic are will be converted to a “transit mall” as described by Metrolinx. Is this what we want for Whitby?</p> <p>The few times downtown has is closed to through traffic for local events is always a nightmare for traffic trying to circumvent downtown and we most certainly would not want that to be the daily norm.</p> <p>We are very disappointed in the lack of communication/notification of this project. With all that we have been dealing with during Covid, it was only through a neighbour we were made aware of this proposal.</p> <p>While ongoing improvements to the Town and its infrastructure are necessary, we do not feel the closure of Highway 2 is an acceptable transit alternative and hope other more acceptable means can be found.</p>

		<p>My comments and concerns are outlined below:</p> <p>IT'S a HIGHWAY</p> <ul style="list-style-type: none"> Hwy 2 is a <u>highway</u> and the <u>ONLY</u> east/west thoroughfare through downtown Whitby to Oshawa and Ajax and beyond <p>TRAFFIC</p> <ul style="list-style-type: none"> the section of Hwy 2 (between Garden and Cochrane) is already a pinch-point for traffic at rush hour – we need more lanes for traffic not zero – the current proposal will make traffic in this area worse closing the downtown blocks will have a disastrous effect on the surrounding residential areas and businesses, including the diversion of transport trucks through residential neighbourhoods the negative traffic impact to nearby residential neighbourhoods will be compounded by the “no right turns” from Brock St onto Hwy 2 we have experienced the negative traffic impacts whenever the downtown is blocked for weekend parades/carnivals – this would be exponentially worse if it were 	<p>room to put many lanes of traffic. The pinch points were always going to be the problem and they have been left until the end. There are no easy choices for Whitby now because of this history.</p> <p>Dundas is a Whitby road now but both the Region and Province have the authority to take over any road they like. Metrolinx has presented two basic alternatives but neither have on-street parking through the core. One is buses and cars. With no room to widen the sidewalks or protect pedestrians, I think this would be an unsafe and uncomfortable solution and pedestrians would avoid Dundas through the core. You would end up with no pedestrians and no store-front parking which to me would be a disaster for our businesses. It is the parked cars which now make it safe for pedestrians. Remove those and you have moving vehicles right beside our narrow sidewalks. Not good.</p> <p>And though both options presented have no on-street parking, people seem to be coming away from the public information sessions with the belief that we can keep on street</p>

Public Correspondence Summary Table**

Date	Contact	Comment Summary	Date / Response	Actions / Commitments
		<p>permanent during weekday rush hours</p> <ul style="list-style-type: none"> Metrolinx' rationale that 20% will find other routes east/west like Bayly/Rossland/Taunton is illogical – if those were favourable routes, drivers would have taken them already it would be useful to know the volume of daily traffic that flows through downtown (both peak and non peak) vs the daily ridership of transit through downtown Whitby this requires a proper traffic study, not just a cell phone study <p>COMPARISONS (Vancouver – pop 0.7M, Ottawa – pop 1.4M, Calgary – pop 1.4M) – Whitby pop 135k</p> <ul style="list-style-type: none"> the cities Metrolinx offered as success stories are not comparable. These cities have <u>multiple</u> main streets through their downtown cores – downtown Whitby only has <u>one</u> main street in either direction in addition, the cited cities are significantly larger tourist areas with vibrant entertainment/bar districts and not relevant for downtown Whitby 	<p>parking. Metrolinx and DRT really need to be much more clear on the range of options.</p> <p>The other is the transit mall which would turn the two car lanes into pedestrian areas for shoppers. This would be very safe and would draw people to the stores.</p> <p>The “do nothing” option – meaning leave things as they are with on-street parking – is what most would support. I suspect Whitby council would support this if it is available. There may be a queue jump option that would somewhat help the buses stay on schedule. But the congestion is pretty severe – and will only get worse – during peak times so the buses would be in that congestion. The question is whether BRT and Metrolinx can live with that. If they cannot live with that and both alternatives involve removing the on-street parking, then I think we would want to do a trial on both options so we have information rather than speculation. That trial would have to be well post-Covid when behaviours have normalized. Certainly not in 2021.</p>

Public Correspondence Summary Table**

Date	Contact	Comment Summary	Date / Response	Actions / Commitments
		<ul style="list-style-type: none"> Metrolinx referenced London, Ontario's (pop 0.4M) rapid transit plan however, their plan maintains at least 2 traffic lanes and adds a transit lane (on mostly one-way streets) – again, not relevant to Whitby with <u>one</u> main street in either direction the presenters made no mention of Thunder Bay (pop 150k) – its' Victoriaville Centre opened in 1980 on a main east-west artery and was the city's vision of urban renewal. However, it severed Victoria St, was under-utilized and eventually led to the economic downturn in the Fort William BIA. As a result, it was deemed a failure and council voted in October 2020 to demolish it and reopen the street. Perhaps worth reviewing this experience. <p>COMMUNICATION</p> <ul style="list-style-type: none"> I have contacted a dozen of my neighbours on Reynolds/Dunlop and none of us recall receiving the letter of communication from Metrolinx and none are aware of this proposal I understand there have been 2 public forums, and that the most recent had 6 events within Toronto, 	<p>Regardless of which option is chosen, implementation is still a long ways away.</p> <p>Thank you for your thoughtful input. All my best,</p> <p>Don Mitchell, Mayor</p>

2020-11-21	██████████ ████████████████████	I don't see there being enough bus traffic to justify taking out commuter options. Change the rules surrounding the lanes. Like make them carpool/HOV lanes, motorcycles permitted, and time of use. Busses only during peak hours and then regular lanes during outside of those hours. Empty buses aren't helping anyone commute faster. High Occupancy Vehicle lanes are proven to be effective and reduce the number of cars on the road. If there's a benefit to a regular commuter and encourage them to carpool then this is a solid strategy. Otherwise put in a subway line across the town's and link them to Go Transit and get people on trains.		Added to project mailing list.

2020-11-25	<div style="background-color: black; width: 100%; height: 1.2em; margin-bottom: 2px;"></div> <div style="background-color: black; width: 100%; height: 1.2em; margin-bottom: 2px;"></div> <div style="background-color: black; width: 100%; height: 1.2em;"></div>	<p>Is this attached PDF the latest design/public document? If not, please point me where we can find it, so we can pass it on to our meeting participants. We will be enquiring about the latest planning/thinking for continuous safe cycling routes through the "pitch points" in Durham, plus over the Rouge River in Pickering, plus Oshawa's Mary Street and the existing N/S AT/Cycling corridor on Mary. Plus questions regarding the integration of the BRT AT to existing/plus planned local and Regional Cycling networks. Also Cycle Track vs On-road/MUP, plus Cross rides type Book18 treatments (rev 01) and additional safety enhancements being considered. The existing cycling in Ajax HWY 2 is completely unsafe, thus virtually</p>	<p>On 2020-11-26, M. Parkhill responds:</p> <p>Yes, the proposed design for cycling facilities generally follows OTM Book 18 guidance.</p> <p>This means uni-directional cycle tracks are proposed on either side of the road, not on-road bike lanes. Cycle tracks are raised to the level of the sidewalk and located in the boulevard.</p> <p>In some locations the design proposes bi-directional multi-use paths on one or both sides. This might be to better connect to the surrounding network, or due to buildings or other constraints along the road.</p>

		<p>no one rides there. Lastly generally about funding (i.e. will cycling corridors be funded by BRT or downloaded to Region/local municipalities?).</p> <p>Just FYI - Many Durham people on bikes are still really mad/frustrated about the mess the MTO left behind with the recent 407, 412 and 418 project, which has really screwed up Durham for generations of AT/Cyclists users. Sad for 2015/17 provincial project. We are trying to avoid a repeat of that mess with BRT. That 407/ETR Project EA is full of cycling comments, which the MTO/Province totally trashed and ignored. EA, MTO and Province Of Ontario are bad words to use in Durham Region with cyclists. The Ministry of Cars is what they are called.</p> <p>Several of us have cycled the York Region #7 BRT corridor.</p> <p>We are looking forward to this discussion, many of us have participated in previous in person BRT meetings all across Durham.</p>	<p>Maps that illustrate the integration of the BRT cycling facilities to existing and planned networks are included in this PDF: https://www.metrolinxengage.com/sites/default/files/pic3_boards_traffic_at_2020-11-12.pdf</p> <p>The current preliminary design for the whole project can be viewed through an interactive map here: www.DSBRTmap.ca And you can drop a pin to leave location-specific comments.</p> <p>You can also review the preliminary design by municipality using the videos and PDFs available at the following links: https://www.metrolinxengage.com/en/content/pickering https://www.metrolinxengage.com/en/content/ajax https://www.metrolinxengage.com/en/content/whitby https://www.metrolinxengage.com/en/content/oshawa-east-turn-around</p>

			Let me know if there is any other information you'd like to see before we meet on December 9,	
2020-11-26	██████████ ██████████████████	<p>I was recently directed to your request for feedback on the potential rapid transit lanes through Durham region. As a Whitby resident, and a commuter, there is nothing about eliminating car traffic in downtown Whitby that is convenient. The road is already busy, between regular commuter traffic, not to mention if there are accidents on major routes like the 401, diverting traffic would make crossing brock street next to impossible.</p> <p>This would inconvenience more commuters who rely on cars than it would benefit bus traffic. The lanes would be empty a huge portion of the day. It would eliminate top of mind awareness for retail locations throughout this stretch and majorly impact sales for small local business owners who are already struggling to deal with the impact of covid19</p>		Added to project mailing list.
2020-11-27	██████████ ██████████████████	<p>[Email sent to office of Whitby Council/ D. Mitchell]</p> <p>Mayor Don, (not to be read aggressively or angrily... I'm just curious 😊) With respect to the transit route downtown, what is the</p>	<p>On 2020-11-27, D. Mitchell responds:</p> <p>Thank you for your email. 			<p>buses will be able to utilize the dedicated bus lanes.</p> <p>The Durham-Scarborough Bus Rapid Transit project will provide upgrades to the entire 36 kilometre corridor by renewing infrastructure, improving active transportation facilities, and enhancing the streetscape. Cycling facilities and improved sidewalks, including filling in missing segments along the corridor, will encourage more walking and cycling. Whitby residents will realize these benefits, including an expanded public realm between Byron Street and Green Street to help animate Dundas Street and attract people to the Downtown.</p> <p>A significant number of Whitby residents currently use transit. The project will improve service for existing and new riders, reducing the demand for auto travel, which also has general benefits to the community.</p> <p>The project is currently in the preliminary design phase. As part of this phase, the project is undergoing an environmental assessment called the Transit Project Assessment</p>

		<p>downtown Whitby for many years, and have now sold that company [REDACTED] but purchased a home in downtown Whitby to retire in with my wife. The property is on [REDACTED] and once I read the plans I regretted our decision. There are two primary reasons for my opposition to the closure of Dundas to traffic in the core. It will harm local businesses, and it will harm local residents. Small businesses have a difficult time as it is in downtown Whitby, with the removal of one of the main parking lots, and the project as envisioned only worsens that. Residents in downtown Whitby enjoy the access to local restaurants and businesses, but if they fail, there is no reason to live in the area. We bought a home in teh area because we wanted to be part of a revival of the downtown core, but this project would cause it to die.</p> <p>Nobody is against rapid transit, everybody would agree that in a perfect world we all would get out of our cars and use public transit whenever possible. But this is Whitby, not downtown Toronto. We need cars for grocery shopping, getting to work, recreation etc. Our necessary services are not all within walking distance, and are not reasonably accessible via transit. When we were looking for a</p>	<p>Scarborough Bus Rapid Transit project.</p> <p>We understand your concern related to the loss of on-street parking in Downtown Whitby and its impact on local businesses. The purpose of the DS BRT is to improve reliability of transit service and provide better connections to people and jobs in Durham Region and Scarborough. To accommodate the dedicated lanes, 31 on-street parking spaces will be lost on Dundas Street. However, the project team is working with the Town of Whitby and Durham Region to find an appropriate place to relocate the lost parking spaced. It appears that 34 spaces could be accommodated near the intersection of Byron and Elm Street.</p> <p>We understand the importance of supporting local businesses. We continue to meet with business owners and residents within the study area to determine business needs and how they can best be accommodated. Delivery vehicles will be permitted to use dedicated spaces within the transit mall to service businesses. The Transit Mall will also</p>

		<p>condominium in the area we looked at Sailwinds and the other projects in the south end, we looked at the new projects like Station 3 as they were being proposed. We bought at [REDACTED] because it was one of the only options that offered parking for two cars. Although living in downtown Whitby allows us to walk to many places, and that is one of the primary reasons we bought there, the reality of the situation is that my wife and I both have cars. She will be working for another year or two in an area that is totally inaccessible by public transit, and I require a car for getting to my golf games, my volunteer activities and so forth when she is at work.</p> <p>We support a transit corridor, we absolutely do not support the closure of Dundas to traffic. Although it may be some sort of an idealized solution in some world that is 50 years away, it is not good for Whitby businesses, it is not good for Whitby residents.</p> <p>Should the project proceed in this form, extensive roadworks would be required to accommodate changing traffic patterns. Who pays for this? Is it even possible from an engineering standpoint? It would be doubly infuriating if a project that is</p>	<p>allow the public realm to be widened and improved to help animate the street and draw people to Downtown Whitby.</p> <p>A significant number of Whitby residents currently use transit. Some people do not have the resources to own a car. In fact, based on data from the Transportation Tomorrow Survey (2016), within the wards that are adjacent to Dundas Street in Whitby, 3 to 10% of households do not own a car.</p> <p>As transit reliability increases, more people will begin to choose transit over driving to complete some trips. This shift will have a positive impact on the road network and travel times for all modes.</p> <p>To cost and duration of constructing the Transit Mall would be minimal, as it would be limited to sidewalk widening and adding signage and pavement markings to distinguish the dedicated transit lanes. Outside of the Transit Mall, construction become more major, as it requires widening the road to add</p>

2020-12-05	[REDACTED] [REDACTED]	Dear Metrolinx, I believe that the pinch point in Downtown Whitby will adversely affect the downtown businesses. I do not like the idea of parking being diverted several blocks away from the businesses. I feel that it is important to be able to easily access downtown businesses and services and the proposed plan will destroy the feeling of the downtown core. Dundas Street is not a bus lane!		Added to project mailing list.
2020-12-05	[REDACTED] [REDACTED]	I am not a fan of the proposed BRT plan! I travel to work every day from Whitby to Ajax along Hwy 2. I have already had to replan my route several times due to construction for the 412, new housing areas and it takes me longer to get to work than it used to! This plan will cause a huge problem for myself and many others trying to get to work! It will increase my time getting to work even more and I am not looking at the option of taking public transit! Not to mention the horrible repercussions for the business that are located right along		Added to project mailing list.

		<p>and DRT has a mandate to follow. I sincerely hope all this public consultation is not window dressing. This is the first time I heard of a timeline. Ten to 20 years out.</p> <p>The GO Train east line now carries on average 27,000 people per day. I heard that in 2041 DRT projects 9,500 users of the line. Seems kind of small to me. Mayor Mitchell early in his comments made reference to the pedestrian malls in Ottawa and Quebec City. We go there, and come back and talk about how great they were. The Sparks Street Mall in Ottawa is Canada's oldest being over 50 years old. In Quebec City it is rue du Petit Champlain. Both are pedestrian only. The consultant vastly over sold the benefits of what amounts to be a wide sidewalk. Not only that, a sidewalk separated by two lanes where buses will go every 5 minutes. Certainly not conducive to pedestrian traffic. May I suggest the consultant look at closing Dundas at Green and Perry, and as far west as Centre St in the west. Now you have a pedestrian mall that is the anchor to downtown. The attraction that brings people downtown. Cars are going to be rerouted anyway, what is added to the mix are the buses. By then the buses will be electric, I would hope, which means they will be</p>	<p>not close until December 18. 		<p>silent. Mary and Colborne Streets would be one way from Henry/Euclid to Green/Perry. Buses and cars heading west would turn onto Perry, left onto Mary and continue to Euclid. Then a right turn to Dundas and continue west. For buses going east, they would make a right onto Henry, a left on Colborne and continue to Green. A left on Green to Dundas and then continues east. Corners would have to be widened for buses, stop lights adjusted to allow for green lights for buses (technology exists) and perhaps the town builds a parking garage sooner than it intended. All I ask is that the idea of one way streets to bypass the downtown be examined again. The consultant said it was considered, but dismissed.</p> <p>The consultant says he travels by public transit. Good for him. I did for years when I was employed in downtown Toronto. DRT to the GO train, and downtown in under 1 hour. Great. Then my employer moved the department to Scarborough in the Warden - Eglinton area. Now it was DRT to GO, off at Eglinton GO station, TTC to Kennedy Station to transfer to a bus going west on Eglinton and arrive at destination. I lasted one winter. It is no fun standing in minus 20 degrees waiting for a bus. When one comes along it is full, the second one is full</p>

		Centre or the TTC routes from STC, the proposed buses should take the 401 through the east end of Scarborough. We don't need Durham commuters messing up our quiet Scarborough neighbourhood!		
2020-12-07	██████████ ██████████████████	Kristin Please see attached letter regarding the Toronto & West Turn Around Bus Rapid Transit.	On 2020-12-11, K. Demasi responds: Thank you for your email. We are reviewing all comments for the project and these will also form part of the public record. Have a good weekend	Attached letter from ██████████ (letter was also emailed to project team and is included in the correspondence below). Added to project mailing list.
2020-12-07	██████████ ██████████████████	We have reviewed the public documentation as detailed on the Metrolinx website regarding the Durham-Scarborough Bus Rapid Transit, specifically regarding the Toronto & West Turn Around. We own the property at ██████████ ██████████████████ that currently has a full turning traffic intersection. The Rapid Transit and raised median along Ellesmere will result in access to Ellesmere and Mornelle to only be right in and right out which will restrict the flow of traffic into our property coming from the west, causing additional traffic pressures to the east for traffic doing u-turns. In addition, traffic looking to travel eastbound on Ellesmere from Mornelle with	On 2021-01-08, M. Parkhill responds: Thank you for your letter regarding the property at ██████████ ██████████████████ For safety reasons, a raised island is proposed along Ellesmere Road with the introduction of dedicated transit lanes. This raised island will prevent left-turns at unsignalized driveways and side streets. A driver wanting to turn left at an unsignalized side street would continue to the next signalized intersection and make a U-turn.	

**Durham-Scarborough Bus Rapid Transit
Public Correspondence Summary Table**

Date	Contact	Comment Summary	Date / Response	Actions / Commitments
		<p>be impacted with being forced to go west and do u-turns.</p> <p>We have concerns that the raised center medians and right in/right out intersections cause severe inconvenience for traffic patterns for property owners and residents who are looking to access their street. We would like the raised median to be stopped before Mornelle Court to allow for the full turning intersection.</p>	<p>Adding a traffic signal at Mornelle Court is not being recommended as part of the Durham-Scarborough Bus Rapid Transit project. Note that Mornelle Court is less than 200 metres from the next signal at Morningside Avenue. So drivers travelling eastbound on Ellesmere Road could continue to Morningside and use the dedicated left-turn lane to make a U-turn, and then travel westbound on Ellesmere and make a right-turn onto Mornelle Court. Drivers may also choose to take a different route, such as along Morningside Avenue instead of Ellesmere Road.</p> <p>With the bus lanes in the middle of Ellesmere Road, there is added width between the left turn/u-turn lane and the first lane of traffic in the opposite direction. This makes it easier for vehicles to make the u-turn movement at the signalized intersection, while all other traffic has a red light.</p> <p>We have added you to the project mailing list. You can unsubscribe at any time by emailing DSBRT@metrolinx.com with the subject line "unsubscribe".</p>

		<p>can be neighbors looking out for one another and feel safe”.</p> <p>We all worked hard; keeping the homes and land beautiful for all to enjoy. Many of us keep the boulevards vibrant and joyful; our trees line the roads with pride and protection of nature’s balance and the safety from the traffic.</p> <p>When we first moved into the Highland Creek neighbourhood, Ellesmere Road was under construction from a 2-lane roadway to a 4-lane roadway. During this time, we seen unfortunately many tragedies of accidents where a few lost their lives.</p> <p>My Mother said; “We are lucky to live here; when we get old and need help; we are so close to the Fire Department and the Hospital”. As it has it, my parents have gotten older and unfortunately require the emergency services of the Fire Department, Ambulance and Hospital quite frequently. Seconds count and we have been lucky that there has been no obstacles to prevent the prompt emergency services.</p> <p>We love our Highland Creek neighbourhood; we love our space; our</p>	<p>more convenient to travel and improve reliability of service. Improved transit service means more reliable connections to the places that people live, work, play and learn along this important and growing corridor.</p> <p>You must have seen a lot of change in the Highland Creek area over the last 38 years. Population and employment growth in Scarborough is predicted to continue for the next 30 years. Scarborough Centre is expected to experience a great deal of population and employment growth over the next 30 years with upwards of 40,000 residents and 23,000 jobs. This growth potential is contingent on having the required transportation infrastructure in place. Durham Region is one of North America’s fastest growing areas, with the population expected to grow to 1.2 million people by 2041. To prepare for all this growth in both Scarborough and Durham Region, and to avoid more road congestion than we see now, the plan is to introduce additional lanes to carry only bus passengers. This corridor connects people and employment across</p>

		<p>Morningside hill on the sidewalk to reach the hospital in time, as the construction and traffic blocked the way.</p> <p>Now with the proposed Durham-Scarborough Rapid Transit, construction more lives will be lost; I hope not mine or not my family or yours as a result. Why create jeopardy to all around us? We cannot replace the tree's, the animals that our children and grandchildren; great grandchildren will never see or know about except when they look on-line and old family photographs. However, we want our future generation to live and now a place they can call a home in a caring neighbourhood.</p> <p>An example of what we thought was a good thing; and now I am not so sure.</p> <p>The Eglinton Crosstown has been under construction since 2011; changing the landscape; with impact to everyone that travels along Eglinton. Business suffered; pedestrians struggling to stay safe as they move around. Emergency response times had increased; with new routes and being bogged down in traffic that could not get out of their way. No one shares or talks about</p>	<p>services access, during construction. Metrolinx and the City are aware of the impacts of construction on local businesses and will be developing a plan for this corridor as the project moves from the current planning phase to detail design.</p> <p>In summary, the aim of the project is to provide dedicated transit lanes to support existing bus services along Ellesmere Road to operate more reliably. This includes both Durham Region Transit's existing PULSE service and TTC services. Residents of Scarborough will benefit from the more frequent and reliable bus service which will connect destinations within Scarborough and Durham Region. Dedicated bus lanes will provide better service for those already using transit, encourage increased transit usage through better and more reliable services, and help reduce the pressure to build more roads for cars. The project balances local needs, environmental factors and corridor needs to achieve its objectives.</p>

2020-12-08	[REDACTED] [REDACTED]	<p>[Email sent to office of Whitby Council/ D. Mitchell]</p> <p>Thank you for your response and the information. I have always thought a pedestrian-friendly environment in the downtown core, like a pedestrian mall on a few of the streets, would be exceptional for Whitby, and something to work towards. However, the transit element is of some concern. In some cities around the world, there are pedestrian malls with intermittent transit traffic in the form of electric streetcars or modern variants thereof. Perhaps that would be something to consider.</p>	<p>On 2021-01-12, DS BRT team responds:</p> <p>Thanks again for your interest in the project. We wanted to respond to both your emails to make sure that you received responses to all of your questions.</p> <p>BRT is the preferred technology for the Durham-Scarborough corridor. LRT and BRT were evaluated as part of the Initial Business Case, completed in 2018. BRT was preferred for its cost effectiveness to 2041 the projects horizon year. The technology is also preferred for its flexibility over LRT.</p> <p>The project will make use of the PULSE buses that Durham Region Transit has invested in. The system could be converted to LRT in the future, should the increases in ridership warrant the upgrade.</p>	
2020-12-08	H. McWilliam emails Ellesmere Rd. Businesses: McCowan Rd. to Markham Rd.	Thank you for taking the time to meet with us on October 9 to discuss the Durham-Scarborough Bus Rapid Transit environmental assessment and preliminary design project.		Meeting minutes attached for review.

		<p>used as the dedicated bus lane through this section the answer was, was this something that would be of interest. The curb lane on Morningside Road has been designated as a bus lane when houses do not front unto it. While in Newmarket where rapid transit lane was built by Metrolinx no dedicated centre bus lane was run through residential area. Therefore have to ask myself why is this being allowed to happen in Scarborough/Highland Creek?</p> <p>Having our houses fronting onto six lanes of traffic means that the entire community will change and not for the better. Do not know of any residential street that sits on six lanes of traffic. Most areas in the city that have centre bus lane is through commercial / business areas.</p> <p>The reason we all chose to live in Highland Creek was for it's peacefulness, beauty and uniqueness all of which will be lost with centre bus lane from Kingston Road to Military Trail. Going for a simple walk will means transversing across 6 lanes of traffic. Having relationship with your neighbor across the street will be lost, so much for that community feeling. All the mature trees along the road will be destroyed instead of being preserved. How is this environmentally</p>	<p>selected for this project as it does not connect to several of the major destinations along the corridor, nor does it provide a direct connection between these destinations in Durham Region and Scarborough Centre. This decision was reconfirmed in the 2018 Initial Business Case, which found a good cost-benefit ratio for the proposed project. The scope of this project is to advance the design to the next stage, reconfirm the findings in the business case and complete the environmental assessment.</p> <p>In the previous stages of the project a range of potential solutions were developed. This included an option to use dedicated BRT curb lanes. There were several reasons why the curb lane option was not selected as the preferred alternative including:</p> <ul style="list-style-type: none"> • Conflict with cars turning in and out of driveways needing to cross the bus lanes • Challenges for emergency services and deliveries that would block the curbside bus lanes • Problems with enforcement

Public Correspondence Summary Table**

Date	Contact	Comment Summary	Date / Response	Actions / Commitments
		<p>healthy for us or our community. Metrolinx will be expropriating our land while telling us that will not happen. Our houses will be sitting closer to the road with exhaust fumes, pollution etc coming into our houses. Nor can we forget the fact that we will not be able to make left turns from our driveways.</p> <p>Metrolinx states that centre bus lane will be used by emergency vehicles. However, most roads in Scarborough/Ontario/Canada do not have centre bus lanes and emergency vehicles have no difficulty getting to their destinations. In fact, centre bus lane would cause delay for emergency vehicles with all the buses in them. In an emergency the lives of the residents along Ellesmere Road are being put at risk by centre bus lane, as emergency vehicles will only be able to turn at certain places. As every second count In a medical emergency lost of live could be had.</p> <p>With three lanes of traffic each way this will also mean three lanes of snow being pushed into our driveway which is currently not being opened up by the city. If it is a struggle to clean deposit of two lanes just imagine how three will be for the many seniors that live on the street.</p>	<ul style="list-style-type: none"> The mixing of traffic in the curb lanes reduces the effectiveness of the lanes by reducing the reliability needed to maintain the service. <p>There are a number of segments of the corridor where there are residential homes that face the roadway. Additionally, there are segments of other projects where similar conditions exist. There is the potential in the area east of Meadowvale to improve the streetscape and narrow the lanes to provide a safer community and reduce vehicle speed. The experience in the majority of other similar transit projects is that there is either no impact to property values, or the value of land increases as the added mobility provides a net benefit to the neighbourhood.</p> <p>Crossing the street at signalized intersections will be no different than it is today. At locations with stops, there will be an added refuge area in the middle of the road at the end of the access to the bus platform. Along Spadina Avenue and St. Clair Avenue, the less frequent transit</p>

		<p>As someone who often uses TTC, not true when Metrolinx says that Highland Creek residents who use TTC today will benefit from more reliable service. Currently the TTC service is very reliable.</p> <p>Other options such as Sheppard Ave and use of current curb lane from Kingston Road to Military Trail needs to be looked at. We need for Highland Creek politicians and leaders to stand up for Highland Creek and it's residents especially those living along Ellesmere Road. Our politicians and leaders along with other politicians who call themselves friends of Highland Creek need to demand better for this community and not allow for Highland Creek to change for the worst because it is part of Scarborough. We are proud to live in Scarborough and the uniqueness and beauty of the neighbourhood needs to be preserved.</p>	<p>vehicles provide opportunities for pedestrians to pause in the center of the road while crossing. It is unlikely that there will be any significant change for pedestrians crossing the road.</p> <p>Emergency vehicle have had the use of the Spadina and St. Clair dedicated streetcar lanes, and it has sown to be beneficial for access during bad weather, when there is local road congestion and at peak hours when traffic speeds are reduced. Allowing emergency vehicles to use the lanes when it is helpful is one of the added benefits of the transit priority infrastructure. We are also planning for the long-term future when traffic volumes will be higher and when this form of priority will provide more benefit. While transit service is reliable today in certain sections of the corridor, our modelling shows that this will change as population growth occurs and traffic volumes increase.</p> <p>Winter maintenance is a significant issue. Snow handling is being reviewed by the design team as work progresses. Removal by truck after the snowstorm has ended is one</p>

Date	Contact	Comment Summary	Date / Response	Actions / Commitments
		<p><i>Many, many concerns. Your plans for Ellesmere from Military Trail to Highway #2 are very problematic for those of us who live along what you call a 'pinch point'.</i></p> <p><i>If there were a cost-benefit analysis done for the residents of Ellesmere, I'm not sure you could find a benefit of any kind but you would surely find many 'costs' or negative externalities. I list a few below.</i></p> <p><i>#1. Your plans to expand Ellesmere to six lanes between Military Trail and Meadowvale will require the cutting down of hundreds of mature trees along the boulevards. I'm not sure that that's consistent with the long-term environmental goals set by the city of Toronto years ago.</i></p> <p><i>#2. The houses on Ellesmere between Military Trail and Highway #2 actually face the road; they do not back onto it. Thus, the reserved BRT lanes bounded by raised barriers will be unsightly and likely lower property values.</i></p> <p><i>#3. The reserved BRT lanes will create unnecessary inconvenience to the homes along Ellesmere. Only 'right turn' entrance into driveways means that many of us who live on the south side of Ellesmere will exit the 401 with our cars at Morningside rather</i></p>	<p>He continues to provide feedback on the project to Metrolinx and the Ministry of Transportation on behalf of all residents who have contacted him regarding their concerns.</p> <p>Metrolinx previously informed us and constituents that The Durham – Scarborough Initial Business (IBC) in 2018 analyzed alternative routing options along Ellesmere Rd. Kingston Rd. and Highway 2A. Ellesmere Rd. was found to be the preferred option for the following reasons:</p> <ol style="list-style-type: none"> 1. It provides the most direct connection to key destinations within Scarborough saving travel time savings to transit users and operating costs. 2. It maximizes access to the corridor for the existing transit service network in Toronto and Durham region. 3. Provides the biggest benefits in connecting residents and employment to the wider transit network through to 2041.

		<p><i>than Meadowvale. This will increase traffic through the tight intersection at Military Trail and Ellesmere where hundreds of cars and pedestrians cross during the day.</i></p> <p><i>#4. The amount of traffic on Ellesmere between Military Trail and Highway #2 is minimal. Most coming from the east along Highway 401 in their cars do not exit at Port Union to come along #2 and turn onto Ellesmere. Those that use Ellesmere in cars are mostly residents getting to and from work, shopping etc. It is not a 'thorough fare'. Those that travel by TTC through that stretch of Ellesmere are very few and they are residents who live along and on the side streets of Ellesmere. Those who use Pulse buses coming from Durham are students going to UTSC. I'm not sure why any other Durham resident would be riding Pulse into Scarborough along that route. Thus, I'm not sure the investment of money in all these changes and the disruptions caused makes any short or long-term sense.</i></p> <p><i>My overall advice would be to leave the 'pinch point' alone. There is no need for designated lanes for buses between Military Trail and Highway #2 along Ellesmere. It seems to be working fine. Keep Ellesmere from Military Trail to Highway #2 at four</i></p>	<p>4. Protects the future rapid transit expansion within Scarborough.</p> <p>At this time Metrolinx is currently hosting an online Public Information Centre #3.</p> <p>Durham-Scarborough BRT Project The purpose of the Public Information Centre is to present and seek feedback on the preliminary design and results of the technical studies, including potential impacts and proposed mitigation measures. The Public Information Centre will run until Sunday, January 10, 2021</p> <p>New metrolinx Virtual Event #3 November 16 – January 10 2020</p> <p>www.metrolinxengage.com/dsbrt</p> <p>https://www.metrolinxengage.com/en/engagement-initiatives/durham-scarborough-bus-rapid-transit-public-information-centre-3</p> <p>We had asked for an extension to January 10th based on feedback received from residents in the riding.</p>

		<p>lane through our residential community. We were stunned that this seemed to be a done deal and the only input from us that they seemed interested in were the proposed stops along the route from the Oshawa Shopping Centre to the Scarborough Shopping Centre.</p> <p>I have lived in my house for 52 years. My husband discovered this area and the house for sale in what he described as a quiet, beautiful street, outlined by mature trees heavy with snow. Over the course of the years I have seen many changes. The quiet street is now served by two bus companies, the TTC and Pulse on four lanes of traffic which necessitated the cutting down of those lovely mature trees!</p> <p>Now, this is proposed to happen all over again! The softening Linden trees will have to go with the proposed widening and isn't the City of Toronto supposed to be concerned about pollution and preserving the tree canopy to help with global warming? How does the Metrolinx plan move toward achieving these GOALS?</p> <p>The section from Meadowvale to Military Trail is totally residential. Established homes and newer ones are well maintained</p>	<p>In the meantime please let me know if I can forward your email to the Ministry of Transportation and Metrolinx staff for review and follow-up.</p> <p>Looking forward to hearing back from you soon.</p>

		<p>and the residents are proud of their gardens.</p> <p>To see the boulevards disappear with the expropriation of our properties to make way for the extra enhanced two lanes is devastating. Some of the houses will be a few feet away from the road. Nowhere else, has Metrolinx run this through residential property.</p> <p>Why is it happening in Scarborough? Interestingly, the land grab stops at Conlins Road, not impacting the U of T properties!!</p> <p>It is difficult to get to know your neighbours across four lanes of road, six lanes will make it even more challenging.</p> <p>It seems that Ellesmere from the turn-off from Kingston Road to Meadowvale Road will just have a designated bus lane as it is only two lanes wide at the present. Why can this not be the plan for Meadowvale Road to Conlins Road. These DESIGNATED bus lanes are popping up all around Eastern Scarborough—Kingston Road, Morningside, Sheppard. Once you pass the University, it is non-residential—the houses past Orton Park Rd. have houses that BACK on to Ellesmere.</p>

		<p>With this plan access to our driveways becomes frustrating and dangerous. We would not be able to make left-hand turns into them.</p> <p>Preserve the Community of Highland Creek</p> <p>The existing TTC services are reliable. They pass by my house, frequently. I don't see the increased ridership reaching 5000 daily as Metrolinx proposed. They even admitted that most Eastbound riders get off at Morningside! With Covid-19 impacting our lives, many employees will continue to work from home, university students will be taking more courses on line as businesses and schools see the benefit of this. Travel commutes will not be necessary. I fail to see why anyone in the Oshawa area would travel to Scarborough Town—they have exactly the same stores in their own area. When I mentioned this at the meeting, they said that the idea people would get off at stops along the way. If it is a short distance, I think people will still use their cars.</p> <p>There is always the option of the Go-Transit if you are going into downtown TO</p> <p>We think that other options should be considered:</p>

		<p>Commercial Properties and so stimulates the economic growth of these areas.</p> <p>If this is to go through, we will not be able to go East out of our driveways or turn in from the West. We would have to be creative to find ways to get home.</p> <p>Snow removal would be a disaster. We are supposed to be cleared at the end of our driveways after a snowstorm. Well, that hasn't happened for a long time. Can you imagine the snow build up on 6 lanes for removal, virtually impossible to clear.</p> <p>We pride ourselves as Highland Creekers. We have already gone through construction on this street when it went from 2 lanes to 4 quite a few years ago. At this time, there used to be a hill. The road was raised approximately 9 feet at that time. In the first Spring after that, I had a major flood in the basement. The City claimed no responsibility.</p> <p>I do not wish to go through another construction, which, this time would involve taking out our mature trees and entirely upsetting the eco system of our area.</p> <p>I have been observing the buses that go by my house. Very few if any passengers are</p>	<p>technical studies, and future consultation.</p> <p>As part of the work to create the 2041 Regional Transportation Plan, Metrolinx looked at a wide range of corridors and technologies. In this area the analysis selected a combination of routes that includes BRT along Ellesmere and Highway 2, and rapid transit along Sheppard Avenue, the Eglinton East corridor, and other corridors to improve connections across the region. Sheppard Avenue was not selected for this project as it does not connect to several of the major destinations along the corridor, nor does it provide a direct connection between these destinations in Durham Region and Scarborough Centre. This decision was reconfirmed in the 2018 Initial Business Case, which found a good cost-benefit ratio for the proposed project. The scope of this project is to advance the design to the next stage, reconfirm the findings in the business case and complete the environmental assessment.</p>

			<p>busier. Residents will be able to travel via both TTC and DRT services along Ellesmere Rd in Scarborough. TTC, DRT and GO buses all regularly monitor and collect ridership information as well as forecast future ridership.</p> <p>The introduction of dedicated transit lanes on Ellesmere Road will change local travel patterns. Drivers will only be able to turn left at signalized intersections. Each signalized intersection will have a dedicated left-turn lane and fully-protected left-turn “green arrow”. This means left-turn and U-turn movements can be made while all other traffic is stopped, improving safety for the travelling public.</p> <p>Roadway construction projects can be disruptive. Metrolinx and the City of Toronto will work together to maintain local access, especially emergency services access, during construction. Metrolinx and the City are aware of the impacts of construction on local areas and will be developing a plan for this corridor as the project moves from the current planning phase to detail design.</p>

		<p>I watched the recording of the Background Information Session on the Durham-Scarborough Bus Rapid Transit Project last night, and it left me with some very grave concerns, that I believe are being overlooked by council.</p> <p>As most of you are aware, Athol Street is a school zone, with Sir William Stephenson Public school situated at the end of the street. Many young students walk along Athol, as it is the only direct route to get to the school.</p> <p>If a traffic mall is constructed, and cars are unable to continue eastward along Dundas (or exit off Brock Street east onto Dundas) there is no question more traffic will be diverted off Dundas (Highway 2) and Brock Street (which as you all know, is one of the main exits off Highway 401 into Whitby) and on to our residential streets.</p> <p>If the transit mall is built, and cars are unable to continue east along Dundas, anyone wishing to do so will have to divert on to residential streets, crossing King Street, Centre Street, Byron Street, Brock Street, Green Street and finally on to Athol Street, before they can turn east to continue along Dundas Street.</p>		

**Durham-Scarborough Bus Rapid Transit
Public Correspondence Summary Table**

Date	Contact	Comment Summary	Date / Response	Actions / Commitments
		<p>Similarly, anyone travelling north on Brock Street who wishes to go east along Dundas will have to turn off Brock Street and cross Green Street and on to Athol Street, before continuing east.</p> <p>There is no doubt we will see an increase in traffic on Athol Street, which is for all intents and purposes, a school zone.</p> <p>Traffic will also be redirected onto residential streets north of Dundas, but as a resident living south of Dundas, and as a parent, my biggest concerns are for the safety of the children attending Sir William Stephenson and Henry Street high school.</p> <p>I'm opposed to this plan on other grounds, as only a small percentage of people use the buses to go shopping in downtown Whitby (and even a 25% faster bus system won't change that) and people need to park their cars somewhere in order to shop and eat in the downtown area.</p> <p>As a former resident of Newmarket, living along Davis Drive during their construction, I can also promise you that the construction of these Metrolinx lanes will take years to complete, and customers will not be able to access the shops and restaurants in the</p>

		<p>area for years, and many shops will go out of business during that period. However, that complaint will be delivered to Metrolinx, as the town of Whitby has no power to fight Metrolinx.</p> <p>This council does have the power to continue to allow traffic to travel east and west along Dundas Street, and I ask you to reconsider your plans for the transit mall.</p> <p>As Mayor Mitchell stated, safety is one of his top priorities for the downtown area. In attempting to safeguard Dundas Street for pedestrians, you are potentially increasing traffic and risking the safety of pedestrians (many of them school aged) along several residential streets.</p> <p>I ask you to please reconsider.</p>

		<p>events is a collaborative effort of multiple agencies. Conservation Authorities and local Municipalities are being consulted to develop the preliminary design of the Durham-Scarborough Bus Rapid Transit project. Due to the levels of uncertainty with both Global and Regional Climate Models, consideration of climate change has not been standardized. This project does consider extreme weather events and increased rainfall intensities to identify infrastructure climate risk and flood vulnerability following technical guidelines on valley and stream corridor crossings and stormwater management published by the Toronto Region Conservation Authority, Central Lake Ontario Conservation Authority, and local Municipalities.</p> <p>A series of criteria are used to evaluate the flood resilience and risks of climate change of the transit infrastructure. The criteria are based on hydraulic models simulating riverine flooding obtained from the Conservation Authorities. Criteria include the limit of regulatory floodplain, potential stormwater overland flooding areas, flow depth and velocities in floodway. In addition, green infrastructure is also being considered in the stormwater management to increase climate change resilience.</p>

Date	Contact	Comment Summary	Date / Response	Actions / Commitments
			<p>The preferred design between Lakeridge Rd and McQuay Boulevard is centre median transit lanes- with stops at major intersections. There are also plans for a new continuous sidewalk and bike paths along this stretch.</p> <p>Majority of the corridor can fit in within the official plan right of way. We are still refining the design to try and minimize impacts beyond this right of way. This work will continue in 2021. We do not yet have specific details on how much property may be needed beyond the official limits and whether or not it would be taken from one or both sides of Dundas St. Property owners will be contacted once we finalize the design.</p> <p>A stop is not currently proposed at Halls Rd. The proposed stops are located at Lakeridge Rd, Des Newman, McQuay Blvd before getting into downtown.</p> <p>You are correct that we do not yet have a specific timeline for construction of this segment. The corridor has not yet received a commitment for full capital funding.</p>

			<p>Timelines for implementation will be determined in a future phase of work once this current phase is complete.</p> <p>Apologies for the delay in responding- we are still going through all comments received from the recent public information centre. You can of course get in touch with someone from the project team anytime via this email address</p>	
2021-01-05	██████████ ██████████████████	<p>Good day to whom it may concern:</p> <p>I missed the window for comments so I saw this email and so I am sending my comments to this email that was shown.</p> <p>I am in favour of anything that moves folks rapidly on a dedicated pathway. It's interesting that the route proposed is starting from Scarborough Town Centre and ending up in downtown Oshawa. Hopefully this proposal gets implemented as it will help. How fast you can move folks is another thing. Hopefully you folks will be transparent on this once installed.</p> <p>If it's not as fast as moving by car or GO or Subway it's better then what is available</p>	<p>On 2021-01-14, DS BRT team responds:</p> <p>Thank you for your email and input. No problems about missing the submission deadline – you can send comments anytime to the project via this email. All comments will be considered.</p> <p>You are correct that the BRT will not be as quick as a subway or perhaps the GO Train, depending on your destination of course. It might be quicker for shorter trips. Currently can take approximately 100 minutes to travel between Oshawa and Scarborough Centre (pre COVID). This project reduces that time to approx. 75 minutes which is approx.</p>	Added to project mailing list.

		<p>now and cheaper. As a layperson I think it's a good filler only for the short term. My vision would be to take this path in the future for a standard main line which is the subway and eventually replace it with the subway same track that subway Line 1, 2 that is the well established subway standard mainline that is standard. I like standardization. Having different routes like LRT, UPX, the new Metro line is not standardized. To me that is the goal is standardization of one system not a bunch of different ones. The well established mainline for the subway is Line 1 and 2, 4. I consider line 3 not a subway but elevated and not on the same track. Could you picture the mainline for Canada's transcontinental railway system having different tracks across the country. I hope you folks see what I mean.</p> <p>If you have time would be interested in your response to my comments if at all possible.</p>	<p>25% improvement to transit travel time. It will also improve reliability so that people will likely save approx. 10minutes per trip. Approximately 40% of trips start and end along the corridor which indicates that these improvements to reliability and frequency will benefit both Durham and Scarborough residents and help people get to where they need to go quicker and more efficiently.</p> <p>You raise some interesting points about planning for the long term. Our modelling for this project is for 2041 and the results show that BRT can support the expected population and employment growth through until 2041. A benefit of BRT projects is that they can be upgraded to LRT systems if demand warrants it in the future. These things are all considered as part of the design process and in our forecasting and modelling. Metrolinx looked at a wide range of corridors and technologies when developing the 2041 Regional Transportation Plan. There are many corridors across the GTA including in Durham that are planned to have various forms of rapid transit on them, creating a frequent rapid transit</p>

			<p>provide a safer community and reduce vehicle speed.</p> <p>Over the last several months, COVID-19 has had a large impact on travel patterns. While there is uncertainty surrounding the “new normal”, we know that the use of private cars for all trips is not sustainable or viable. Transit ridership patterns go up and down but over time, the long-term trend is continuing up. The region will continue to grow and we will need to find solutions to move more people more efficiently. Cities around the world have found that public transit plays a vital role in the mobility of urban areas.</p> <p>The team is currently reviewing all feedback from the recent public information centre which closed January 10 2021. There will be additional engagement opportunities on the project in 2021 and you can always get in touch with the project team directly through email at dsbrt@metrolinx.com.</p>	
2021-01-11	<div></div> <div></div>	Thank you for the email and feedback. Thank you also for adding me to	On 2021-01-11, M. Parkhill responds:

		<p>the project mailing list – is that by email or regular mail?</p> <p>Keep me posted on the overall project timing and scope progression.</p>	<p>I've added you to the email list, but can send regular mail if you prefer? Please let me know,</p>	
2021-01-11	██████████ ██████████████████	Email is preferred. When you said 'mailing list', I figured I should clarify.		
2021-01-11	██████████ ██████████████████ ██████████████████	<p>Congratulations on what I hope was a successful PIC for the Durham-Scarborough BRT.</p> <p>I am writing on behalf of Cycle Toronto, a non-profit representing nearly 3,000 members that works to make Toronto a safer, healthier, more vibrant city for all. Would it be possible to find a time for a call between yourself and Cycle Toronto to discuss the project? We may also be able to loop in other community leaders from within Scarborough that have various active and public transportation priorities.</p>	<p>On 2021-01-11, K. Demasi responds:</p> <p>Thanks for your email. We would be happy to connect with you.</p> <p>I have cc'd Margaret Parkhill who is our consultant on this project. Margaret and Lee Caragiale from Metrolinx will work with you to find an appropriate time to connect.</p> <p>I am on leave until Spring 2021 and Lee is taking my place on this project. Please contact Lee if you have any additional questions</p>	Added to project mailing list.
2021-01-12	██████████ ██████████████████	<p>On 2021-01-12, DS BRT team emails:</p> <p>Thank you for providing input on the Durham-Scarborough Bus Rapid Transit project. You are absolutely right when you say that public transit will only succeed</p>		

**Durham-Scarborough Bus Rapid Transit
Public Correspondence Summary Table**

Date	Contact	Comment Summary	Date / Response	Actions / Commitments
		<p>when it offers the speed, comfort and convenience of the automobile.</p> <p>The purpose of the DS BRT is to improve reliability of transit service and provide better connections to people and jobs in Durham Region and Scarborough. Dedicated transit lanes are proposed to improve speed and reliability. The dedicated lanes eliminate the conflicts that buses in curb lanes experience with right-turning vehicles.</p> <p>This corridor was selected as more than 40% of the trips that are taken are in close proximity to the corridor, making them good candidates for conversion from auto trips to transit trips. The corridor also connects to a number of major destinations and north-south DRT bus routes.</p> <p>As part of the project, new transit shelters will be implemented that will feature amenities such as next vehicle arrival information systems, weather protection, and public art. Shelters will be fully accessible. In Durham Region, level boarding will be implemented, further increasing the reliability, speed and accessibility of the system. Example of the proposed shelter design can be viewed here:</p>

		<p>implementation of the BRT. Based on the preliminary results, we have determined that only 20% of traffic uses Dundas Street within Downtown Whitby to travel through Whitby. To be categorized as a trip that 'travels through Whitby', the trip must begin and end outside of Whitby. For these longer trips, drivers will divert to other arterial roads.</p> <p>46% of trips are considered medium distance trips and the remaining 34% of trips begin or end in Downtown Whitby. For the more local trips, traffic will redistribute on local streets. This will result in some minor increases in traffic on local roads.</p> <p>The purpose of the DS BRT is to improve reliability of transit service and provide better connections to people and jobs in Durham Region and Scarborough. Dedicated transit lanes are proposed to improve efficiency and reliability. Transit riders will benefit through more reliable travel times and drivers will benefit as they will not be delayed by buses in the curb lanes. As transit reliability increases, more people will begin to choose transit over driving to complete some trips. This shift will have a positive impact on the road network and travel times for all modes.</p>

		<p>including in school zones, car access and parking for the downtown area, construction duration and general safety issues.</p> <p>The project team have been doing detailed traffic analysis to understand how traffic will be redistributed on the local road network if the transit mall were to be implemented. The fairly complete grid of local streets provides many opportunities for people to change their routes and spread any impact out across several streets.</p> <p>The analysis indicates that approximately 20% of the traffic on Dundas is long distance trips that do not begin or end their trip in Whitby. These trips are likely to divert onto major arterial roads such as Rossland, Taunton or to Highway 401. More than one third of the traffic begins or ends their trip in the downtown area, meaning that they are already using local streets for much of their trip, and only the portion currently on Dundas Street will need to be moved to local streets. The balance of the traffic are medium length trips that are within the Town of Whitby. They will also need to find an alternate route for the Dundas Street portion of their trip.</p>

Public Correspondence Summary Table**

Date	Contact	Comment Summary	Date / Response	Actions / Commitments
		<p>As there are many options for people to change their routes, we do not expect that any one street will see significant increases in traffic, but rather all the streets will see some small increase in traffic volumes. There are also some missing links in the road network, which when built will provide even more route options, helping to distribute the traffic over more routes.</p> <p>School zones and other sensitive areas can also be marked with speed restrictions, encouraging people to choose other routes.</p> <p>The number of parking spaces in the downtown will not be reduced, allowing people to drive to the downtown area and access the local businesses. All of the parking spaces along Dundas will be relocated to moved to locations immediately adjacent to the downtown, including an expansion of the parking lot at Byron and Elm.</p> <p>The construction of the viva segment through downtown Newmarket was more complicated than what is proposed in downtown Whitby. The central lanes would be repaved in red, and the sidewalks can be widened in small blocks to minimize disruption. The design team are also</p>

		<p>corridor. The study will document a tree replacement requirement, which will see more trees planted than are removed. We recognize that constructing the additional lanes to provided dedicated transit will result in some short-term issues, but in the longer term the new trees and the added transit lanes will provide a community benefit. Adding transit infrastructure, to allow people to choose a more environmentally friendly mode of transport also provides some environmental benefits.</p> <p>There are a number of segments of the corridor where there are residential homes that face the roadway. Additionally, there are segments of other approved projects where the same condition exists. There is the potential in the area east of Meadowvale to improve the streetscape and narrow the lanes to provide a safer community and reduce vehicle speed. The experience in the majority of other similar transit projects is that there is either no impact to property values, or the value of land increases as the added mobility provides a net benefit to the neighbourhood.</p> <p>The dedicated transit lanes will require some local changes in traffic and travel</p>	<p>value on the implicit costs (externalities).</p> <p>I hope that others will seriously examine Sheppard Avenue (from Port Union to Morningside) which is better suited for bus lanes. It is already significantly wider and will result in little need for cutting down trees etc.</p> <p>Anyway, we'll keep on top of this as will many of my neighbors with whom I've been in contact. I hope this doesn't become a political issue. My sense is that the timelines are not very realistic and that the longer-term economic impact of Covid may alter this and many other provincial mass transit plans. Time will tell.</p> <p>Again, thank you for the response. It's appreciated.</p> <p>██████████</p> <p>P.S., I wonder if our MPP could look into the increasing vibration my neighbors and I have been feeling over the past couple of years between Morrish and Deep Dene Roads. 		<p>patterns. This has been accounted for in the overall analysis and has not been shown to result in a major increase in traffic. When combined with the potential for the traffic lanes to calm traffic the impact to local residents is minimal. A new signalized intersection at Muirbank is also being included in the project to allow for U-turns midway along this section of Ellesmere.</p> <p>The current transit routes in the area are proposed to be modified in the future. The TTC route is going to be extended to Sheppard/Port Union, and the Pulse service extended to Scarborough Center with a connection to the subway. The ridership modelling indicates a significant increase in transit ridership through this segment of the corridor. While this section of Ellesmere is not very heavily used today, as congestion grows throughout the area, we see the potential for increased traffic and for the road to be part of emergency detours when there are issues in the neighbourhood. Providing dedicated transit lanes makes the service more immune to impacts from other events that could slow down the buses and make the service less reliable.</p>	<p>of our homes or if there's something literally deeper in the structure under the road surface. It's becoming quite concerning, made even more so by these Metrolinx plans for the road in front of our homes.</p>

Public Correspondence Summary Table**

Date	Contact	Comment Summary	Date / Response	Actions / Commitments
		<p>When we look out to 2041, and beyond, the growth that is planned for the overall corridor and the potential for transit to provide a greater role in managing mobility in the corridor make a compelling argument for improved transit service and the need for dedicated lanes to provide the reliability needed to attract riders. Previous studies indicate that there is significant benefit to implementing transit priority in this corridor and that the costs are in keeping with the benefits. The Initial Business Case indicated a positive cost-benefit ratio. Once the preferred design is selected the costs and benefits will be updated as part of the Preliminary Design Business Case which will be available in 2021.</p> <p>The team is currently reviewing all feedback from the recent public information centre which closed January 10 2021. There will be additional engagement opportunities on the project in 2021 and you can always get in touch with the project team directly through email at dsbrt@metrolinx.com.</p>

		<p>local and regional travel patterns and transit ridership.</p> <p>We would first like to clarify that the project is currently in the preliminary design and environmental assessment stage.</p> <p>Completion of the project is a long-term goal that is dependent on detailed design, funding, additional technical studies, and future consultation.</p> <p>We agree that we need to protect and improve the environment. One of the ways we are doing that is by providing improved transit options to allow people to make more environmentally conscious choices in how they travel. The major objective of the Durham-Scarborough Bus Rapid Transit (DSBRT) project is to improve transit service along Ellesmere Road, Kingston Road, and Highway 2. Investing in transit will reduce reliance on motor vehicles for some trips, reduce transit travel times making it more convenient to travel and improve reliability of service. Improved transit service means more reliable connections to the places that people live, work, play and learn along this important and growing corridor. We realize this project will require a significant change to the corridor to add space for transit while balancing the needs of existing travellers and minimize impacts to the natural</p>

		<p>environment. We have completed a review of existing environmental conditions, traffic and travel patterns. We are now reviewing future impacts to the environment and will make these results available for review in 2021 as part of the environmental assessment.</p> <p>You must have seen a lot of change in the Highland Creek area. Population and employment growth in Scarborough is predicted to continue. Scarborough Centre is expected to experience a great deal of population and employment growth over the next 30 years with upwards of 40,000 residents and 23,000 jobs. This growth potential is contingent on having the required transportation infrastructure in place. Durham Region is one of North America's fastest growing areas, with the population expected to grow to 1.2 million people by 2041. To prepare for all this growth in both Scarborough and Durham Region, and to avoid more road congestion than we see now, the plan is to introduce additional lanes to carry only bus passengers. This corridor connects people and employment across Scarborough and Durham Region. The existing road capacity would be maintained for those who cannot, or choose not, to use public transit for some or all of their trips.</p>		

**Durham-Scarborough Bus Rapid Transit
Public Correspondence Summary Table**

Date	Contact	Comment Summary	Date / Response	Actions / Commitments
		<p>Transit service east of Military Trail is provided by the TTC Route 95A, which ends about four blocks or 1 kilometre east of your house. As with most bus routes, the ridership near one end of the route is lower than the other end. Transit demand increases as you travel further west along Ellesmere Road toward Scarborough Centre. Once the DSBRT is in place the TTC is considering extending Route 95A easterly to Sheppard Avenue/Port Union Road, and Durham Region Transit intends to extend the PULSE service to Scarborough Centre. These transit route extensions will increase access to services and ridership in the Highland Creek area and the buses will be busier. Residents will be able to travel via both TTC and DRT services along Ellesmere Rd in Scarborough. TTC, DRT and GO buses all regularly monitor and collect ridership information as well as forecast future ridership.</p> <p>As part of the work to create the 2041 Regional Transportation Plan, Metrolinx looked at a wide range of corridors and technologies. In this area the analysis selected a combination of routes that includes BRT along Ellesmere and Highway 2, and rapid transit along Sheppard</p>

		<p>Avenue, the Eglinton East corridor, and other corridors to improve connections across the region. Sheppard Avenue was not selected for this project as it does not connect to several of the major destinations along the corridor, nor does it provide a direct connection between these destinations in Durham Region and Scarborough Centre. This decision was reconfirmed in the 2018 Initial Business Case, which found a good cost-benefit ratio for the proposed project. The scope of this project is to advance the design to the next stage, reconfirm the findings in the business case and complete the environmental assessment.</p> <p>In the previous stages of the project a range of potential solutions were developed. This included an option to use dedicated BRT curb lanes. There were several reasons why the curb lane option was not selected as the preferred alternative including:</p> <ul style="list-style-type: none"> • Conflict with cars turning in and out of driveways needing to cross the bus lanes • Challenges for emergency services and deliveries that would block the curbside bus lanes • Problems with enforcement 		

**Durham-Scarborough Bus Rapid Transit
Public Correspondence Summary Table**

Date	Contact	Comment Summary	Date / Response	Actions / Commitments
		<ul style="list-style-type: none"> The mixing of traffic in the curb lanes reduces the effectiveness of the lanes by reducing the reliability needed to maintain the service. <p>There are a number of segments of the corridor where there are residential homes that face the roadway. Additionally, there are segments of other approved projects where similar conditions exist. There is the potential in the area east of Meadowvale to improve the streetscape and narrow the lanes to provide a safer community and reduce vehicle speed. We are still refining the design to minimize impacts to property as much as possible.</p> <p>The introduction of dedicated transit lanes on Ellesmere Road will change local travel patterns. Drivers will only be able to turn left at signalized intersections. Each signalized intersection will have a dedicated left-turn lane and fully-protected left-turn "green arrow". This means left-turn and U-turn movements can be made while all other traffic is stopped, improving safety for the travelling public. Crossing the street at signalized intersections will be no different than it is today. At locations with stops, there will be an added refuge area in the middle of the road at the end of the access to the bus platform.</p>

		<p>Ellesmere Road residents are expected to sacrifice their homes and their community to such a degree in order for your transit plan to occur.</p> <p>I urge you to develop an alternate route for this expansion (as opposed to simply attempting to mitigate the negative effects of your current plan) to ensure the properties on Ellesmere Road are not ruined/devalued. I do not appreciate my tax dollars being put towards destroying my home and community.</p>		
2021-01-19	[REDACTED]	<p>**My input re the proposed preliminary design for the DSBRT.</p> <p>As I have outlined in my previous comments to this Team, this proposal would have a negative impact on Ellesmere Road residents who originally chose to live in this area based on the present layout of the street and existing community amenities. Since Ellesmere is a Main Road, we need the existing boulevard space buffer between our driveway and the street, so that vehicles are not driving close to our houses. That DSBRT proposal would remove a significant portion of the front of the boulevard, thereby making the road traffic closer to our homes - creating a safety, noise and vibration issue. There would be also be an environmental impact</p>		

**Durham-Scarborough Bus Rapid Transit
Public Correspondence Summary Table**

Date	Contact	Comment Summary	Date / Response	Actions / Commitments
		<p>caused by the removal of boulevard trees that the City was adamant about planting in the first place, after these houses were built. There would be additional emissions released into the air from these DSBRT buses - creating a potential health issue. Students and residents are already serviced by existing transportation systems. There is no need for a rapid transit system on a residential street with children (including those of school age who walk to their neighbourhood schools), pets and seniors. If this DSBRT project were to proceed, whenever residents reverse their cars, they would be unable to have a choice of driving west - they would only be able to drive east, thereby creating a major inconvenience in terms of their personal time management.</p> <p>Ever since Durham Transit switched their route to travel along Ellesmere Road, instead of driving (actually speeding) along Old Kingston Rod to Military Trail (as they did before), the buses are never full. We residents have observed that there are only a few students who used to travel on the buses at any particular time. Now during this pandemic, ridership is significantly less. I invite you to track the number of passengers who are on the buses as they drive eastbound towards Old Kingston</p>

Public Correspondence Summary Table**

Date	Contact	Comment Summary	Date / Response	Actions / Commitments
		<p>Road. There are usually less than 5 passengers! Also, students have not had in-classroom instruction since last year due to the pandemic. How is embarking on this monumental transportation project going to be a prudent use of taxpayers money when the City has already had such large Covid-related expenditures for the last year?</p> <p>Also, why would you want to create a major road construction project and cause subsequent upheaval of residents' lives over a long period of time? The Richmond Hill/York Region vivaNext rapidway is not built on a residential street, so you cannot compare the proposed DSBRT to that rapid transit system.</p> <p>Everyone is undergoing enough stress during these pandemic times, so residents do not need the extra anxiety worrying about this unnecessary project. The opinions of residents whose lives would be adversely impacted from such a project should be given priority consideration. We do not need to hear and watch empty DSBRT buses running every 3 minutes.</p>		
2021-01-22	██████████ ██████████████████	I just was made aware of your website on the bus plans - in particular the Oshawa section. I realize the comment time is past but I would like to make one submission		Added to project mailing list.

		One question that I have I presume has been carefully investigated & covered is the new Oshawa creek bridge. I presume they have considered possible issues due to flooding dangers caused by climate change & even historic "century storms". I know historically there have been problems in high water. In my uneducated opinion this would be the time to ensure that any new structure & the area be be designed in such a way to handle greater water flow. This would be a good time to move back the retaining walls & widen the creek bed - making the bridge higher & longer would be my suggestion.

**Durham-Scarborough Bus Rapid Transit
Public Correspondence Summary Table**

Date	Contact	Comment Summary	Date / Response	Actions / Commitments
		<p>The Durham-Scarborough Bus Rapid Transit project recommends widening Ellesmere Road to maintain 4 lanes for general traffic and add 2 dedicated lanes for buses. The main objective of the Durham-Scarborough Bus Rapid Transit project is to improve transit service along Ellesmere Road, Kingston Road, and Highway 2. Dedicated transit lanes improve transit efficiency and reliability. Transit riders will benefit from more reliable travel times. Car and truck drivers will benefit from smoother traffic flows as vehicles will not be delayed by buses in the curb lanes. TTC, Durham Region Transit, and GO buses will be able to use the dedicated bus lanes.</p> <p>We understand your concerns around traffic congestion today. As travel demand increases over time, there will be increased traffic congestion and delays for both buses and cars. By providing dedicated lanes for transit in the centre of the road, transit passengers will experience shorter travel times, with more frequent, reliable and comfortable service. General traffic will also benefit as buses are separated from regular traffic. Other benefits of this transit infrastructure project include upgraded accessible sidewalks, continuous cycling facilities, and safer pedestrian crossings at intersections.</p>	<p>I would like to join the meeting today for business feedback on this project. Would you please send me the link?</p>

		<p>The suggestion to widen Ellesmere Road to seven lanes is not compatible with the City of Toronto's policy of designing complete streets which balance the needs and priorities of the various users and uses within the right-of-way. While seven lanes cross sections do exist, they do not balance the needs of all road users, placing priority on the private automobile, and reducing the safety for pedestrians, cyclists and other vulnerable road users. Therefore, a seven-lane cross section will not be considered as part of this project.</p> <p>In the previous stages of the project a range of potential solutions were developed. This included an option to use dedicated curb lanes for transit. There were several reasons why the curb lane option was not selected as the preferred alternative including:</p> <ul style="list-style-type: none"> • Conflict with cars turning in and out of driveways needing to cross the bus lanes • Challenges for emergency services and deliveries that would block the curbside bus lanes • Problems with enforcement • The mixing of traffic in the curb lanes reduces the effectiveness of the

		<p>lanes by reducing the reliability needed to maintain the service.</p> <p>Bus Rapid Transit stops are proposed at Dolly Varden and at Markham Road. These two stops will provide an enhanced transit experience to the people who work and shop at the businesses, offices and retail on the north side of Ellesmere Road.</p> <p>Roadway construction projects can be disruptive. Metrolinx and the City of Toronto will work together to maintain local access, especially driveway access for businesses, during construction. Metrolinx and the City are aware of the impacts of construction and have learned important lessons from other recent projects. Metrolinx and the City will develop a plan for this corridor to support local businesses after the project moves from the current planning phase to detail design.</p> <p>The introduction of dedicated transit lanes on Ellesmere Road will change local travel patterns. Drivers will only be able to turn left at signalized intersections. Each signalized intersection will have a dedicated left-turn lane and fully-protected left-turn "green arrow". This means left-turn and U-turn movements can be made while all</p>

		<p>other traffic is stopped, improving safety for the travelling public.</p> <p>Based on feedback we heard from Ellesmere businesses in October 2020, the preliminary design now proposes a new traffic signal at the driveway between 1970 and 1990 Ellesmere Road, opposite the driveway for the Centennial Arena. This will provide additional capacity for left-turns and u-turns, as well as a safer place for pedestrians to cross Ellesmere Road.</p> <p>We completed field studies to observe truck operations in August and September 2020. The preliminary roadway design follows current design standards, such as the Transportation Association of Canada. We have confirmed that trucks will be able to turn right into and out of driveways along Ellesmere Road.</p> <p>Markham Road currently has a 7-lane cross-section, with 6 lanes for general traffic and a two-way centre left-turn lane. This project will not include construction on Markham Road. As a result, there will be no changes to the driveway north of the 1200 Markham Road building. We are aware of the existing left-turn restriction from 3 pm to 7 pm.</p>

2021-01-29	██████████ ████████████████████ ████████████████████ ██████████ ██████████████████	<p>My name is ██████████ and I am from ██████████ ██████████████████ on behalf of ██████████ ██████████ owner of land on the north side of ████████████████████ ██████████████████ . I am emailing you today wanting to confirm the access to the two farm driveways along Kingston Road. I wanted to confirm that no road widening is required from the ██████████ as the plans do not show any road widening.</p>		
2021-02-01	██████████████ ██████████████████	<p>Just don't see why Metrolinx wants to eliminate half a dozen parking spots on Dundas west of Brock, other than to allow your buses to blow through there without having to dodge cars. The downtown core is already a bottleneck and can't be changed, unless you start demolishing buildings. Businesses don't survive due to current parking issues, why make it harder ???</p>	<p>On 2021-02-05, M. Parkhill responds:</p> <p>We received seven comments from you between December 3, 2020 and February 1, 2021. I put them all together at the end of this message. My apologies for the delay in responding. All of your comments will be included in the consultation record for the project.</p>

Date	Contact	Comment Summary	Date / Response	Actions / Commitments
			<p>It sounds like your main concerns are changes to on-street parking in Downtown Whitby and existing Durham Region Transit service.</p> <p>You are correct that the proposed Transit Mall would remove 31 on-street parking spots along Dundas Street. We understand that parking is important to the businesses in Downtown Whitby. The project team is currently working with the Town of Whitby and Durham Region to find an appropriate place to relocate the lost parking spaces. We have a potential plan to add up to 34 parking spaces near the intersection of Byron and Elm Street. The design is still being developed and refined, but we will continue to keep the public updated.</p> <p>In some of your comments, you mention that some Durham Region Transit buses run infrequently, with headways of 30 minutes to an hour, and that buses sometimes do not run on time. You may be interested to know that the DS BRT system proposes frequent 15-minute or better service, all day, seven days a week, with a bus every five minutes or less during peak hours along Highway 2.</p>	

**Durham-Scarborough Bus Rapid Transit
Public Correspondence Summary Table**

Date	Contact	Comment Summary	Date / Response	Actions / Commitments
			<p>Local DRT routes will continue to service the corridor to provide local service in between BRT stops. Some routes may be revised to eliminate overlaps, provide the more efficient service and improve service frequency. You may also be interested to know that the Durham Region Transportation Master Plan includes more frequent transit service on north-south routes, including Brock Street.</p> <p>The dedicated transit lanes proposed as part of this Bus Rapid Transit project will greatly improve travel time reliability, meaning buses will arrive on time. Improved reliability will also make it easier for people to transfer to other local routes to get where they want to go.</p> <p>If you have comments or questions about existing Durham Region Transit service, you can call 1-866-247-0055 or fill out their customer comment form: https://forms.durhamregiontransit.com/Customer-Service/Customer-Comment-Form </p>

		<p>I've measured everything out and there is no way I can have 2 vehicles parked parallel to Dundas st there will be no room to turn around vehicles will be backing into one another as i see it i will have 5 parking spaces.</p> <p>Plus move my new sign that I just installed? Transport trucks wont have room for deliveries, the zoning is commercial industrial ?</p> <p>This project (as proposed)would disable/cripple our ability to do business not to mention other business. Is the region going to pay for my prime real estate frontage? Loss of property and business value? And loss of business for the next 50yrs?</p> <p>I say merge the bike and sidewalk and adjust the alignment to the north where there are no 50yr old businesses to destroy, The proposed plan has many good parts listening to those effected and making changes is whats needed otherwise myself and all of whitby dont want it.</p>

		<p>I hope you are ensuring the following has been taken into account for this proposal</p> <ol style="list-style-type: none"> 1. That any data used for the proposal was NOT gathered from March 2020 to current as this data would not be an accurate representation of normal usage 2. The massive Durham Live complex opening 3. Seaton development with 70,000 new residents along with ongoing development in north Pickering & Ajax 4. Emergency traffic rerouting <p>While 100% in favour of busses and mass transit; ABSOLUTELY NOT at the expense of losing existing vehicle lanes. Elimination of existing through traffic lanes has historically been proven to be a very poor decision.</p> <p>I can expand on all points listed above if you like. i.e. - a review of Casino Rama's opening, negative impact on Orillia traffic & corrective actions - comparisons to similar roads like HWY 7 in Vaughan, Davis Dr in Newmarket, Dundas St in Mississauga, St Clair Ave in Toronto</p>

2021-02-12	██████████ ████████████████████	We are currently working on the noise report for proposed development located at ██████████. We understand that Metrolinx plans on building a bus rapid transitway along Ellesmere road through this area. I have looked through the project documents that are available online and were sent in the chain below and haven't been able to find any future bus volume information. Can you please let us know if estimates of the future bus volumes through this corridor are available?	On 2021-02-12, L. Caragiale responds: The infrastructure is intended to serve TTC, Durham Region Transit, and GO bus services. Service plans have not been confirmed yet but, accounting for the combined services as well as both travel directions, we expect that a bus would go by every couple of minutes. For any future questions, do not hesitate to reach out to our project email address: dsbrt@metrolinx.com	
2021-02-18	██████████████████ ██████████████████ ██████████████████ ██████████████████	On 2021-02-18, ██████████ emails K. Demasi: Hope you're keeping well. ██████ is working along the planned BRT corridor once more for another file along Kingston Road opposite ██████████ in Toronto ██████████. As part of this project we're looking at designs for this intersection in the near and long term (when the BRT is completed). The intersection today is unsignalized and is contemplated to be		Added to project mailing list.

		It's the residents who vote. It's the residents who pay the vast majority of taxes.		
2021-03-16	██████████ ██████████████████	<p>On 2021-03-16, ██████████ emails Mayor D. Mitchell:</p> <p>As a resident of the downtown, I was dismayed to hear the details of the BRT plan and equally concerned about the lack of genuine consultation with members of the community who will be significantly and seriously impacted. The total closure of the north side of Dundas St. to westbound traffic can only negatively impact residents on Mary and Dunlop streets and will inevitably spill over to smaller streets. Our historic downtown is bordered by two historically significant neighbourhoods with heritage properties and properties of historic significance. These homes are located very near the roads and are not built to withstand the disruption that will be caused by the onslaught of traffic that Metrolinx intends to send our way. This plan also entirely fails to appreciate both the reality of the demographics in the neighbourhoods and the safety risks that arise as a result.</p> <p>Efforts to create a walkable downtown are important, but they should not turn already</p>	<p>On 2021-03-29, J. Stenner responds:</p> <p>Thank you for taking the time to share your concerns about the impact of the Durham-Scarborough Bus Rapid Transit (BRT) project in the Town of Whitby.</p> <p>The Durham-Scarborough BRT project is essential to support the growth that is forecasted in the next 20 years along the corridor from downtown Oshawa to Scarborough Centre. The primary goal of the project is to improve the efficiency of the transportation network by providing transit priority to make transit travel more reliable and quicker, as well as increase its capacity to meet the growing demand. It will allow for seamless connections with local transit networks, providing the residents of Durham Region more flexibility and choice to get where they need to go. We're working hard to deliver this important project, while keeping the valuable feedback we've</p>	Added to project mailing list.

		<p>historic look to align with the town of Whitby plans for heritage signage and intersections identifying the heritage section of our downtown core. A transit mall should not be placed in the middle of a historical area. It takes away from the homogenous look, feel and sight lines of our downtown which also detracts from it being a walkable and attractive destination. Residents have not been adequately consulted on this plan and no reasonable alternatives have been provided to relocate the transit mall. Lastly, has any thought or consideration been put into implementing this plan at the Taunton and Brock St Corridor where the bulk of businesses and residences are clustered in Whitby. More time and proper community consultation is required to design a plan, not just from a Metrolinx viewpoint! The consultation period needs to be extended. Whitby has a unique downtown vastly different from Scarborough, Pickering, Ajax and Oshawa. This has not been identified or considered in your plan.</p>

		Please reconsider this plan. The moving of traffic to Mary street is unfathomable, it is a residential street that is already very busy, it houses a large daycare, a seniors building, a medical clinic, multiple residential homes. This town needs a better plan. This is not the one.		
2021-03-21	██████ ██████████████████	The plan is atrocious at best. The designs have left no room for excitement. Yes we need a better transit system, yes regional connectivity is important, but this plan will be destructive to the downtown of Whitby. It will do far more damage than good. Dundas St. cannot handle this project, residents are outraged, and local politicians don't even support this abomination. Re-route elsewhere is my recommendation, there are other routes than can far better handle a project of this magnitude.		Added to project mailing list.

2021-03-22	<div>██████████</div> <div>████████████████████</div>	<p>timelines for this project are huge. We appear to be planning for bus lanes 6 years from now.</p> <ul style="list-style-type: none"> - There are portions of this route that are busier and longer than many of the current LRT configurations being built in Ontario (Ottawa, Kitchener, Hamilton) and yet, Durham is getting more buses in 6-10 years. This seems extremely short sighted - - and dare I say political. Highway 2 is a far better candidate for light rail than King Street in Kitchener Waterloo - The 3 lane solution in Whitby is a winning and creative solution. Metrolinx though must also assist DRT with north/south connections. Currently the last mile solutions in Durham are horrible in comparison to Toronto. Peak service along major roads is still 20 minutes apart in some cases -- something unacceptable in much of Toronto. - I am very concerned that downtown Whitby will be a loud diesel smelling bus center if this is not planned for now. Though the drawings are attractive, the sound of buses coming and going in two directions and stopping to pick up passengers every 5

			<p>that we understand the potential impacts to the surrounding communities. Over the last several years, the preliminary design plan has evolved from curbside dedicated transit lanes to a full pedestrian transit mall to the newly proposed North Side Pedestrian Mall. Construction of the 36 kilometer corridor will take several years and be constructed in a phased approach to minimize impacts and disruptions as much as possible.</p> <p>The refined design creates additional space for pedestrians' comfort and safety by doubling the width of the sidewalk on the north side of Dundas Street between Brock Street and Byron Street. This space can also be used by the businesses to operate patios, sidewalk sales as well as other attractions. We have heard positive feedback about the opportunities this design will provide, and it is consistent with the vision to make the downtown more walkable and attractive without impacting any cultural heritage resources. However, we do understand that some Whitby residents may still be interested in driving to downtown Whitby and as such, we have expanded the off-street</p>

		<p>and the recently shared proposed refined preliminary design for Dundas Street has evolved in response to the feedback we have received from Town Council, the community, and businesses. Over the last several years, the preliminary design plan has evolved from curbside dedicated transit lanes to a full pedestrian transit mall to the newly proposed North Side Pedestrian Mall.</p> <p>On March 16th, we hosted a virtual public meeting to present the proposed North Side Pedestrian Mall design and we encouraged the community to provide their feedback. This design incorporates the feedback we received through our Public Information Centre held from November 16, 2020 – January 10, 2021 and addresses the concerns we have received to date about impacts to parking, traffic, accessibility, and cultural heritage. The refined design creates additional space for pedestrians' comfort and safety by doubling the width of the sidewalk on the north side of Dundas Street between Brock Street and Byron Street. This space can also be used by the businesses to operate patios, sidewalk sales as well as other attractions. We have heard positive feedback about the opportunities this design will provide, and it is consistent with the vision to make the downtown more walkable and attractive</p>

Metrolinx takes pride in having diverse representation from the community on our CLCs such as: local residents, community association member(s), business association member(s), business owner(s) and other important community organization lead(s) and chairs. We look to the CLC members to provide Metrolinx, and our future constructor with feedback on matters such as traffic calming measures, business supports, mitigation strategies for construction and noise disruption, etc. to ensure that they reflect and meet the needs of the community. We want community members to feel where they will be impacted, they will be supported.</p>

The north side pedestrian mall was designed to provide a better balance between the need for expanded transit in the region, supporting a walkable and attractive downtown, and providing capacity for general traffic. The latest design option is a reflection of the important community feedback we've received to date. The design was refined to incorporate improved local access, and to minimize local traffic impacts by adding a dedicated eastbound traffic lane as well as reducing the length of detour required for westbound motorists through the downtown centre. The northside pedestrian mall also improves accessibility and walkability in Whitby's vibrant downtown core – with sidewalks two meters wider at Brock Street, and three meters wider at Byron Street. With respect to this preliminary design, we are still looking at opportunities to improve the project's benefits while allowing for</p>

		<p>I believe that transparent engagement of the residents who live downtown is essential to the success of this project. There has been no substantial outreach to downtown residents during this process. There are established community leaders and associations, like OWINA, who are known to Town leadership and have, in the past, been called upon to actively participate and advise on projects planned for our community. The Downtown Whitby Development Steering Committee (DWDSC) is often called upon to provide critical input and even vote on recommendations for Council consideration for important projects (i.e., creating the BIA, saving RA Sennett, the Town's purchase of the Land Registry Office, endorsing Werden's neighbourhood becoming a Heritage Conservation District, supporting the development of a condo at Firehall No.3, to name a few).</p> <p>These important opinions were not sought out from these entities or individuals for this transit proposal. In fact, this proposal does not align with the DWDSC 2019-2022 Strategic Priorities.</p> <p>So, let us begin the process of listening to the residents who live downtown now. I will point out that there are 500 to 600 homes and apartments, with more than 4000 residents, in the immediate vicinity of this</p>	<p>consistent and transparent dialogue with the Town of Whitby residents, local business owners and community organizations, as we work to move this important transit project forward.</p> <p>EVOLUTION OF DURHAM-SCARBOROUGH BUS RAPID TRANSIT</p> <p>Over the last few years, our technical experts have explored a variety of options for downtown Whitby. Based on the feedback received through several rounds of public engagements, the preliminary design has evolved from curbside dedicated transit lanes, to a full pedestrian transit mall and then to the newly proposed north side pedestrian mall. The north side pedestrian mall was designed to provide a better balance between the need for expanded transit in the region, supporting a walkable and attractive downtown, and providing capacity for general traffic. The latest design option is a reflection of the important community feedback we've received to date. The design was refined to incorporate improved local access, and to minimize local traffic impacts by adding a dedicated</p>

In fact, this proposal does not align with the DWDSC 2019-2022 Strategic Priorities.</p> <p>So, let us begin the process of listening to the residents who live downtown now. I will point out that there are 500 to 600 homes and apartments, with more than 4000 residents, in the immediate vicinity of this project. Given the fact that there is no daily free press in Whitby (believe it or not The Toronto Star does not cover transit proposals in Whitby) you must work a bit harder to bring important issues like this to the attention of our residents. Let us set a meeting immediately to find a way to make certain all these residents are made aware of this project. I know that OWNA and the community leaders in Perry's Plan would be happy to work on this.</p> <p>Please know that I support first in class public transit, walkable communities, preservation of heritage, and projects that are environmentally sound. I honestly believe that by working with those who live</p>	<p>from curbside dedicated transit lanes, to a full pedestrian transit mall and then to the newly proposed north side pedestrian mall. The north side pedestrian mall was designed to provide a better balance between the need for expanded transit in the region, supporting a walkable and attractive downtown, and providing capacity for general traffic. The latest design option is a reflection of the important community feedback we've received to date. The design was refined to incorporate improved local access, and to minimize local traffic impacts by adding a dedicated eastbound traffic lane as well as reducing the length of detour required for westbound motorists through the downtown centre. The northside pedestrian mall also improves accessibility and walkability in Whitby's vibrant downtown core – with sidewalks two meters wider at Brock Street, and three meters wider at Byron Street. With respect to this preliminary design, we are still looking at opportunities to improve the project's benefits while allowing for westbound through traffic, further reducing the negative impacts that the</p>

2021-03-29	[REDACTED]	<p>[Sent to Minister of Transportation, Metrolinx CEO, Metrolinx Chair, and [REDACTED]]</p> <p>To those elected to represent the people of Whitby in the Ontario Legislature, I am sending this email as a reminder that in just over a year, your seat in the Legislature may not be as safe as you think. There is growing concern over the lack of transparency and accountability of this project. To my MPP, you remain silent on this as the constituents you are meant to serve are opposing this. Perhaps you should make a stand and try to convince your Cabinet member to go back to Metrolinx and not block all lanes in any direction on a major artery. What purpose do you serve if you just tow party lines at any cost? To the Minister and Metrolinx, more accountability is necessary when there is such vocal opposition to designs. I stand with those in opposition to the Downtown Whitby portion of the Preliminary Design and EA/TPAP for the Durham-Scarborough Bus Rapid Transit Corridor presented at a virtual public meeting on March 16, 2021, as well the previous proposals. I fully support and endorse the position of the Olde Whitby Neighbourhood Association - Werden Neighbourhood</p>	<p>On 2021-04-16, T. Tran responds:</p> <p>We want to thank you for writing to the Durham-Scarborough Bus Rapid Transit (BRT) project team with your concerns and feedback about the impact of the proposed Durham-Scarborough BRT Project in the Town of Whitby.</p> <p>Firstly, we want to acknowledge that while we have been working hard to understand the potential impacts of the Durham-Scarborough Bus Rapid Transit project to the surrounding communities, there are community members who feel their voice has not been heard. We recognize the community is keenly interested in additional engagement and we remain committed to fostering open, consistent and transparent dialogue with the Town of Whitby residents, local business owners and community organizations, as we work to move this important transit project forward.</p> <p>EVOLUTION OF DURHAM-SCARBOROUGH BUS RAPID TRANSIT</p>

		<p>meeting on March 16, 2021, as well as the previous proposals. None of these proposals make sense for the residents of Whitby.</p> <p>Frankly, if the Pickering and Ajax “improvements” to Highway 2 are any indication, this plan is going to lead to far more traffic problems than it addresses. I understand Metrolinx’ agenda is to promote transit but you have to stop attacking vehicular traffic at the same time. People will not stop using their cars and take transit because you have made it inconvenient to drive. Alternative transit routes need to be looked at, with involvement from the communities affected, if your project stands any chance at success.</p> <p>I also strongly suggest that before any more planning is done, that you take your planners and engineers and have them drive, cycle and take transit through the suggested areas so they can see first hand what they’re dealing with. Too many planners and engineers do all their work from their computers and have no concept of the real-world implications of their decisions.</p> <p>I fully support and endorse the position of the Olde Whitby Neighbourhood</p>	<p>concerns and feedback about the impact of the proposed Durham-Scarborough BRT Project in the Town of Whitby.</p> <p>Firstly, we want to acknowledge that while we have been working hard to understand the potential impacts of the Durham-Scarborough Bus Rapid Transit project to the surrounding communities, there are community members who feel their voice has not been heard. Given the fact that there is no daily free press in Whitby (believe it or not The Toronto Star does not cover transit proposals in Whitby) you must work a bit harder to bring important issues like this to the attention of our residents. Let us set a meeting immediately to find a way to make certain all these residents are made aware of this project. I know that OWNA and the community leaders in Perry's Plan would be happy to work on this.</p> <p>Please know that I support first in class public transit, walkable communities, preservation of heritage, and projects that are environmentally sound. I honestly believe that by working with those who live downtown, Metrolinx and the Town will find a solution that works in our collective best interests.</p>	<p>provide a better balance between the need for expanded transit in the region, supporting a walkable and attractive downtown, and providing capacity for general traffic. The latest design option is a reflection of the important community feedback we've received to date. The design was refined to incorporate improved local access, and to minimize local traffic impacts by adding a dedicated eastbound traffic lane as well as reducing the length of detour required for westbound motorists through the downtown centre. The northside pedestrian mall also improves accessibility and walkability in Whitby's vibrant downtown core – with sidewalks two meters wider at Brock Street, and three meters wider at Byron Street. With respect to this preliminary design, we are still looking at opportunities to improve the project's benefits while allowing for westbound through traffic, further reducing the negative impacts that the community has expressed concern for, such as traffic diversion</p> <p>The primary goal of the Durham-Scarborough Bus Rapid Transit project is to support regional growth along the</p>

			<p>corridor by improving the efficiency and capacity of the transportation network through strong transit priority – making transit travel more reliable and quicker, and therefore more attractive to more people for their trips.</p> <p>SAFETY</p> <p>At Metrolinx safety is our top priority. Both the north side pedestrian mall and the design of the other stops in Whitby are designed with safety in mind. The north side pedestrian mall would improve safety for pedestrians on Dundas Street by widening the sidewalk and enabling accessibility improvements into the local businesses. Outside the downtown, the project will upgrade sidewalks and crosswalks to be accessible, create raised and barrier protected platforms at stops for transit users, and for drivers by protecting left-turns at signalized intersections. Additional traffic-calming measures will be deployed to enhance the safety of the community, including new traffic signals, signs, and protecting road corners. We are continuing to work with Town of Whitby staff to identify</p>

		<p>I believe that transparent engagement of the residents who live downtown is essential to the success of this project. There has been no substantial outreach to downtown residents during this process. There are established community leaders and associations, like OWINA, who are known to Town leadership and have, in the past, been called upon to actively participate and advise on projects planned for our community. The Downtown Whitby Development Steering Committee (DWDSC) is often called upon to provide critical input and even vote on recommendations for Council consideration for important projects (i.e., creating the BIA, saving RA Sennett, the Town's purchase of the Land Registry Office, endorsing Werden's neighbourhood becoming a Heritage Conservation District, supporting the development of a condo at Firehall No.3, to name a few).</p> <p>These important opinions were not sought out from these entities or individuals for this transit proposal. In fact, this proposal does not align with the DWDSC 2019-2022 Strategic Priorities.</p> <p>So, let us begin the process of listening to the residents who live downtown now. I will point out that there are 500 to 600 homes and apartments, with more than 4000 residents, in the immediate vicinity of this</p>	<p>members who feel their voice has not been heard. We recognize the community is keenly interested in additional engagement and we remain committed to fostering open, consistent and transparent dialogue with the Town of Whitby residents, local business owners and community organizations, as we work to move this important transit project forward.</p> <p>EVOLUTION OF DURHAM-SCARBOROUGH BUS RAPID TRANSIT</p> <p>Over the last few years, our technical experts have explored a variety of options for downtown Whitby. Based on the feedback received through several rounds of public engagements, the preliminary design has evolved from curbside dedicated transit lanes, to a full pedestrian transit mall and then to the newly proposed north side pedestrian mall. The north side pedestrian mall was designed to provide a better balance between the need for expanded transit in the region, supporting a walkable and attractive downtown, and providing capacity for general traffic. 2021-03-31	<div style="background-color: black; width: 100px; height: 40px;"></div>	<p>I stand with those in opposition to the Downtown Whitby portion of the Preliminary Design and EA/TPAP for the Durham-Scarborough Bus Rapid Transit Corridor presented at a virtual public meeting on March 16, 2021, as well the previous proposals.</p> <p>I fully support and endorse the position of the Olde Whitby Neighbourhood Association - Werden Neighbourhood (OWNA) that has been submitted in writing to Metrolinx and the Town of Whitby. OWNA has outlined safety, heritage, and community issues, as well as a path forward, in its paper. I will not repeat that position here.</p> <p>I believe that transparent engagement of the residents who live downtown is essential to the success of this project. There has been no substantial outreach to downtown residents during this process. There are established community leaders and associations, like OWNA, who are known to Town leadership and have, in the past, been called upon to actively participate and advise on projects planned for our community. The Downtown Whitby</p>	<p>On 2021-04-16, T. Tran responds:</p> <p>We want to thank you for writing to the Durham-Scarborough Bus Rapid Transit (BRT) project team with your concerns and feedback about the impact of the proposed Durham-Scarborough BRT Project in the Town of Whitby.</p> <p>Firstly, we want to acknowledge that while we have been working hard to understand the potential impacts of the Durham-Scarborough Bus Rapid Transit project to the surrounding communities, there are community members who feel their voice has not been heard. We recognize the community is keenly interested in additional engagement and we remain committed to fostering open, consistent and transparent dialogue with the Town of Whitby residents, local business owners and community organizations, as we work to move this important transit project forward.</p>	Added to project mailing list.

		<p>Development Steering Committee (DWDSC) is often called upon to provide critical input and even vote on recommendations for Council consideration for important projects (i.e., creating the BIA, saving RA Sennett, the Town's purchase of the Land Registry Office, endorsing Werden's neighbourhood becoming a Heritage Conservation District, supporting the development of a condo at Firehall No.3, to name a few).</p> <p>These important opinions were not sought out from these entities or individuals for this transit proposal. In fact, this proposal does not align with the DWDSC 2019-2022 Strategic Priorities.</p> <p>So, let us begin the process of listening to the residents who live downtown now. I will point out that there are 500 to 600 homes and apartments, with more than 4000 residents, in the immediate vicinity of this project. Given the fact that there is no daily free press in Whitby (believe it or not The Toronto Star does not cover transit proposals in Whitby) you must work a bit harder to bring important issues like this to the attention of our residents. Let us set a meeting immediately to find a way to make certain all these residents are made aware of this project. I know that OWNA and the</p>	<p>EVOLUTION OF DURHAM-SCARBOROUGH BUS RAPID TRANSIT</p> <p>Over the last few years, our technical experts have explored a variety of options for downtown Whitby. Based on the feedback received through several rounds of public engagements, the preliminary design has evolved from curbside dedicated transit lanes, to a full pedestrian transit mall and then to the newly proposed north side pedestrian mall. The north side pedestrian mall was designed to provide a better balance between the need for expanded transit in the region, supporting a walkable and attractive downtown, and providing capacity for general traffic. The latest design option is a reflection of the important community feedback we've received to date. The design was refined to incorporate improved local access, and to minimize local traffic impacts by adding a dedicated eastbound traffic lane as well as reducing the length of detour required for westbound motorists through the downtown centre. The northside pedestrian mall also improves accessibility and walkability in Whitby's</p>

			<p>preferred option. If this option is not available, in order to collect vibration measurement on grass area, we would like to ask for your permission to conduct private utility locates on your property on the day we conduct our noise and vibration work as well. This will be done by a sub-contractor to us. In order to complete this work, we will be hammering a few stakes into your backyard to a depth of approx. 1 ft (max). Although it is quite shallow, our company Health and Safety requirements state that we will need utility locators to confirm that we will in fact be working within safe limits for any sort of ground intrusion work, including driving a stake into the ground. Not only is this for everyone's safety but we also want to minimize any potential damage that may arise from not getting these locates. The locators will mainly scan the ground and will be accompanied by one of our field staff on the day of monitoring.</p>

2021-04-01	[REDACTED]	<p>[Email sent to [REDACTED] and the office of Whitby Council/ [REDACTED]</p> <p>I am writing to share my strong opposition to the proposed Metrolinx BRT project through Whitby and my concerns regarding the lack of meaningful community engagement undertaken by Metrolinx to date.</p> <p>I am a resident of Whitby and owner of property at [REDACTED]. From a personal perspective, I am deeply concerned about the impact the proposed changes will have on the traffic volume along my residential street (as drivers along Hwy 2 will be forced to re-route along [REDACTED]) not to mention the negative impact this will undoubtedly have on property value - literally steps from our front porch (and my neighbours' homes) will be a major Regional thoroughfare with unbearable noise, pollution, loss of privacy, etc. And from a community perspective, I am concerned for the negative impact the plan will have on access to downtown Whitby</p>	<p>[REDACTED] responds on 2021-04-02:</p> <p>Thank you for your email. I share your concerns about negative impacts and about the need for a broad community consultation. Whitby council adopted a resolution on Monday asking our town staff to work with Metrolinx to support a broader community engagement. This BRT project has been underway for many years in Ajax and Pickering but the focus now is on the Whitby section and our downtown is the narrowest and most difficult pinch point. Our staff reported on the first Metrolinx option back in December 2019. Metrolinx was asked to go back and develop options that supported our council goal of a safe, walkable and vibrant downtown.</p> <p>I believe we share the same goals: a wider public space through the core of Downtown Whitby between Byron and Brock to support safety, walkability, accessibility and business prosperity in</p>

Date	Contact	Comment Summary	Date / Response	Action / Commitments
		<p>businesses as well as our overall community character. The proposed plan will result in significant negative impacts for our community and is unacceptable.</p> <p>First, a little about myself and my experience with Metrolinx's engagement and consultation efforts to date... I consider myself to be an "informed community member." I regularly follow Regional and Local council; read and listen to Durham Region local media outlets; and follow the social media platforms of numerous community organizations. Basically, if it's happening in Durham Region, I likely know about it. So, imagine my surprise when late in 2020 I was informed (by an acquaintance) about the Metrolinx proposal; and more surprisingly, that it had been "under review and discussion" for some time between Metrolinx and Whitby Council. And yet, as an engaged community member and resident who stands to be DIRECTLY IMPACTED by the project, I had heard nothing about it.</p> <p>Once I learned of the project, I participated in Metrolinx's virtual public information session in December 2020, completed the on-line survey to share my concerns and questions, and provided my contact</p>	<p>the core; the continued success of businesses along Dundas outside of the core; good transit service and minimal traffic infiltration or impact on the adjacent heritage neighbourhoods and parallel streets - like [REDACTED] It is not an easy solution given that we only have four lanes and our sidewalks are very narrow but we are getting closer and I am confident that, working together, we can get there.</p> <p>I have called a special meeting of council for April 22nd to discuss this project. Our Town staff will be providing an update and representatives from Metrolinx and BRT will be there to answer questions and provide information.</p>

		<p>information - presuming that I would then be included on some sort of mailing list for future communications.</p> <p>However, I have just learned that an additional public information session was held a couple of weeks ago - however, I had no knowledge of this recent session and was not informed about it by Metrolinx or through any Town of Whitby communications, so I did not participate. I understand participation at this session was very low, so clearly, I was not the only community member unaware of this opportunity. How could I not know about this session, especially after I participated in a previous session and clearly indicated my interest?</p> <p>A second point about myself... Prior to my recent retirement, for decades my profession was a community/stakeholder relations and communications practitioner for a large organization. I have led community engagement and consultation programs in support of numerous projects and large environmental assessments in Durham Region. I understand the definition of "meaningful engagement" and also know how to proactively reach residents in Durham. The efforts undertaken by</p>

		<p>Metrolinx to reach residents in Whitby to date have been woefully inadequate. Based on my recent experience, it seems that Metrolinx has gone out of their way to NOT inform or seek input from the community.</p> <p>The only acceptable path forward is for Metrolinx to go back to the beginning of the community engagement and consultation process and:</p> <ul style="list-style-type: none"> • Undertake wide-spread communication to all of the Whitby community to increase awareness of the project, in particular, targeted towards residents and businesses who are most likely to be impacted; • Ensure community members are informed in a timely manner about the opportunities to participate in information sessions and provide their thoughts and perspectives on the project; • Incorporate community member feedback in the development of new project options that will better balance the perspectives of the community with future transit needs, to achieve an acceptable path forward. <p>In closing, I want to share that what attracted us to purchase a home in [REDACTED] Whitby was the opportunity to enjoy a "walkable" lifestyle; in addition, we love the community character</p>

		<p>of the area. However, the Metrolinx plan stands to destroy not only the community character but the very businesses that we want to walk to in the neighbourhood.</p> <p>I acknowledge that a sound public transit plan is an important part of supporting any livable community and would welcome improvements to local transit in our community, which I believe are needed. However, the BRT plan is not a viable solution and will have a significant negative and irreparable impact on residents and businesses in our community.</p>		
2021-04-05	[REDACTED]	<p>On 2021-05-05, J. Stenner responds to [REDACTED] email from 2021-04-01:</p> <p>Thank you for writing to Vice President of Planning, [REDACTED] with your concerns and feedback about the impact of the proposed Durham-Scarborough Bus Rapid Transit Project (BRT) in the Town of Whitby.</p> <p>We want to acknowledge that while we have been working hard to understand the potential impacts of the Durham-Scarborough BRT project to the surrounding communities, there are community members who feel their voice has not been heard. 		<p>There are 500 to 600 homes and apartments, with more than 4000 residents, in the immediate vicinity of this project. Given the fact that there is no daily free press in Whitby (believe it or not The Toronto Star does not cover transit proposals in Whitby) you must work a bit harder to bring important issues like this to the attention of our residents. Let us set a meeting immediately to find a way to make certain all these residents are made aware of this project. I know that OWINA and the community leaders in Perry's Plan would be happy to work on this.</p> <p>Please know that I support first in class public transit, walkable communities, preservation of heritage, and projects that are environmentally sound. I honestly believe that by working with those who live downtown, Metrolinx and the Town will find a solution that works in our collective best interests.</p>	<p>– making transit travel more reliable and quicker, and therefore more attractive to more people for their trips.</p> <p>SAFETY</p> <p>At Metrolinx safety is our top priority. Both the north side pedestrian mall and the design of the other stops in Whitby are designed with safety in mind. The north side pedestrian mall would improve safety for pedestrians on Dundas Street by widening the sidewalk and enabling accessibility improvements into the local businesses. Outside the downtown, the project will upgrade sidewalks and crosswalks to be accessible, create raised and barrier protected platforms at stops for transit users, and for drivers by protecting left-turns at signalized intersections. Additional traffic-calming measures will be deployed to enhance the safety of the community, including new traffic signals, signs, and protecting road corners. We are continuing to work with Town of Whitby staff to identify strategies to mitigate impacts to the surrounding road network.</p> <p>HERITAGE</p>

2021-04-06	<div data-bbox="397 683 768 760" style="background-color: black; width: 138px; height: 47px;"></div>	<p>On 2021-04-06, [REDACTED] responds to correspondence received on 2021-04-06:</p> <p>Thank you for your email. I share your concerns about negative impacts and about the need for a broad community consultation. Whitby council adopted a resolution last Monday asking our town staff to work with Metrolinx to support a broader community engagement. This BRT project has been underway for many years in Ajax and Pickering but the focus now is on the Whitby section and our downtown is the narrowest and most difficult pinch point. Our staff reported on the first Metrolinx option back in December 2019. Metrolinx was asked to go back and develop options that supported our council goal of a safe, walkable and vibrant downtown.</p>

		<p>I believe we share the same goals: a wider public space through the core of Downtown Whitby between Byron and Brock to support safety, walkability, accessibility and business prosperity in the core; the continued success of businesses along Dundas outside of the core; good transit service and minimal traffic infiltration or impact on the adjacent heritage neighbourhoods and parallel streets - like [REDACTED]. It is not an easy solution given that we only have four lanes and our sidewalks are very narrow but we are getting closer and I am confident that, working together, we can get there.</p> <p>I have called a special meeting of council for April 22nd to discuss this project. Our Town staff will be providing an update and representatives from Metrolinx and BRT will be there to answer questions and provide information.</p>

		<p>There has been no substantial outreach to downtown residents during this process. There are established community leaders and associations, like OWNA, who are known to Town leadership and have, in the past, been called upon to actively participate and advise on projects planned for our community. The Downtown Whitby Development Steering Committee (DWDSC) is often called upon to provide critical input and even vote on recommendations for Council consideration for important projects (i.e., creating the BIA, saving RA Sennett, the Town's purchase of the Land Registry Office, endorsing Werden's neighbourhood becoming a Heritage Conservation District, supporting the development of a condo at Firehall No.3, to name a few).</p> <p>These important opinions were not sought out from these entities or individuals for this transit proposal. In fact, this proposal does not align with the DWDSC 2019-2022 Strategic Priorities.</p> <p>So, let us begin the process of listening to the residents who live downtown now. I will point out that there are 500 to 600 homes and apartments, with more than 4000 residents, in the immediate vicinity of this project. Given the fact that there is no daily</p>	<p>consistent and transparent dialogue with the Town of Whitby residents, local business owners and community organizations, as we work to move this important transit project forward.</p> <p>EVOLUTION OF DURHAM-SCARBOROUGH BUS RAPID TRANSIT</p> <p>Over the last few years, our technical experts have explored a variety of options for downtown Whitby. Based on the feedback received through several rounds of public engagements, the preliminary design has evolved from curbside dedicated transit lanes, to a full pedestrian transit mall and then to the newly proposed north side pedestrian mall. The north side pedestrian mall was designed to provide a better balance between the need for expanded transit in the region, supporting a walkable and attractive downtown, and providing capacity for general traffic. The latest design option is a reflection of the important community feedback we've received to date. The design was refined to incorporate improved local access, and to minimize local traffic impacts by adding a dedicated</p>

			Project Assessment Process (TPAP) slated for summer 2021 which also includes our Public Information Centre #4.	
2021-04-07		<p>I am very concerned about the design of the changes to downtown Whitby and the proposed Metrolinx transit mall shutting down traffic going both ways on Dundas Street, a main but small artery through our city. Dedicated bus lanes are one thing, but traffic should still continue to flow both east and west along Dundas to avoid dangerous traffic through the side streets. The proposed plan to close the road and reroute traffic from Dundas St. through the residential neighbourhoods is a NIGHTMARE ! It will mean all kinds of increased traffic through side streets around the core and be a safety issue that a few speed bumps will not contain. It will be noisier, have more pollutants at our doorstep and it will make trips longer for drivers who now have to drive around 4 corners, causing more speeding, stop-sign running and dangerous driving on our neighbourhood streets. Do YOU want be accountable if someone gets hit ?</p> <p>I understand that you are looking for improvements to pedestrian access and public transit, but it shouldn't be at the expense of the people who live nearby - we are not acceptable collateral damage!</p>	<p>On 2021-06-30, J. Stenner responds:</p> <p>Thank you for your feedback on the Durham-Scarborough Bus Rapid Transit Project (DSBRT). There was a lot of interest in our engagement and I appreciate your patience as we work to respond to everyone who took the time to reach out.</p> <p>Our team remains committed to fostering open, consistent, and transparent dialogue with the community as we work to move this important transit project forward. In 2021, Metrolinx hosted three virtual open houses for the Whitby community and mailed approximately 50,000 brochures to the entire municipality to ensure that everyone who has an interest in this project, has an opportunity to have their voice heard.</p> <p>The DSBRT preliminary design has evolved from curbside dedicated transit lanes, to a three-lane design with a westbound mixed traffic lane. The refined preliminary design</p>	Added to project mailing list.

		<p>In addition, the parameters have changed since your traffic studies were done and assumptions may no longer apply. The pandemic has changed the commuting volumes and many believe the volumes originally forecast will not materialize, reducing the need for public transit and negating the need for a transit mall altogether, or at the very least the size required.</p> <p>I ask that you please look at doing a new traffic volume study/projections, create new alternatives and do more consultations with downtown area residents, community leaders and associations to come up with a plan that works for all. There have to be other options that don't endanger our citizens and our neighbourhoods.</p> <p>Please respond to this email with what you will do to update your studies and have the appropriate consideration, input and engagement with the downtown area residents who would be affected by this plan before you proceed.</p>	<p>includes three lanes of traffic, giving eastbound cars and buses a dedicated lane and having westbound cars and buses share a lane between Perry Street and Byron Street. As we work to further refine the three-lane preliminary design option, Metrolinx will continue to engage and share information with the community, stakeholders, elected officials and municipal and regional partners.</p> <p>Next steps on this important transit project include finalizing the preliminary design plans, preparing the draft Environmental Project Report (EPR) and commencement of the Transit Project Assessment Process (TPAP), which includes a formal public consultation period. As part of the TPAP, Metrolinx will be hosting a virtual public information centre in fall 2021 to present the environmental impacts and proposed mitigation measures for the project and gather feedback that can be incorporated into the EPR. Beyond the TPAP, into 2022 the Preliminary Design Business Case (PDBC) will be finalized.</p> <p>The DSBRT is an important transit project in Durham Region. As we look</p>

			<p>out to 2041 and beyond, there is significant growth planned for the corridor – approximately 215,000 more residents and 66,000 more jobs; higher transit capacity is needed to link communities and employment across the region. The Durham Region Transit PULSE route has the highest transit ridership in Durham Region with 3.5 million trips taken in 2019; over 40% of trips along this corridor start or end along Highway 2/Dundas Street. This project was identified in Metrolinx's 2041 Regional Transportation Plan and in Durham Region's Transportation Master Plan as being crucial to support the anticipated growth of Durham Region. As outlined in the Initial Business Case (IBC) this project is expected to generate \$686 million in economic benefits for the Region.</p> <p>To keep informed on upcoming public engagements, please subscribe to the Metrolinx Durham regional e-newsletter, and to the project mailing list by e-mailing the team at DSBRT@metrolinx.com. 			We hope this information is helpful. Please let us know if you have any other questions.	
2021-04-12	[REDACTED]	<p>[Emailed to [REDACTED] from Town of Whitby and DSBRT]</p> <p>Can you please send our position and or confirm the relevant contact's for all interested parties in regards to the decision making process f the logistics infrastructure. We have reviewed the proposal for the westbound traffic movement from Brock St along Mary St W. and have some serious concerns as do our [REDACTED] tenants. First of all we are in high need of extra parking spaces and we will have no flexibility of losing any parking space in front of the retail stores along Mary St. We are in favour of improving the logistics for our community and realize that the ingress or egress can be much easier achieved by utilizing Elm St which is a one way Westbound road at present. In that scenario it is important to mention that we are relying on the present parking spaces along Elm St as well and do not support any reduction in the number of parking space available. Please let me know how we can proceed</p>	<p>On 2021-05-19, J. Stenner responds:</p> <p>Thanks for your message regarding the Durham-Scarborough Bus Rapid Transit (DSBRT) project. As the Community Relations Specialist on the project, I am happy to respond.</p> <p>Firstly, I wanted to let you know that Metrolinx and the DSBRT project team have heard the Whitby community clearly, and have further refined the preliminary design to maintain eastbound and westbound through traffic in the downtown core.</p> <p>I understand your concerns related to parking and would like to clarify a few things:</p> <ul style="list-style-type: none"> • The Town already has plans for cycling on Mary Street, which will connect to new cycling infrastructure on Dundas Street west of Raglan and east of Garden • The DSBRT project will not be removing any parking from Mary Street. 	Added to project mailing list.

			Again, we want to thank you for your meaningful feedback. We look forward to working with the community throughout the next phases of this project, which include fine tuning the preliminary design, and the Transit Project Assessment Process (TPAP) slated for summer 2021 which also includes our Public Information Centre #4.	
2021-04-16		<p>I stand with those in opposition to the Downtown Whitby portion of the Preliminary Design and EA/TPAP for the Durham-Scarborough Bus Rapid Transit Corridor presented at a virtual public meeting on March 16, 2021, as well the previous proposals.</p> <p>I fully support and endorse the position of the Olde Whitby Neighbourhood Association - Werden Neighbourhood (OWNA) that has been submitted in writing to Metrolinx and the Town of Whitby. OWNA has outlined safety, heritage, and community issues, as well as a path forward, in its paper. I will not repeat that position here.</p> <p>I believe that transparent engagement of the residents who live downtown is essential to the success of this project.</p>	<p>On 2021-04-16, T. Tran responds:</p> <p>We want to thank you for writing to the Durham-Scarborough Bus Rapid Transit (BRT) project team with your concerns and feedback about the impact of the proposed Durham-Scarborough BRT Project in the Town of Whitby.</p> <p>Firstly, we want to acknowledge that while we have been working hard to understand the potential impacts of the Durham-Scarborough Bus Rapid Transit project to the surrounding communities, there are community members who feel their voice has not been heard. We recognize the community is keenly interested in additional engagement and we remain committed to fostering open,</p>	Added to project mailing list.

Date	Contact	Comment Summary	Date / Response	Action / Commitments
		<p>There has been no substantial outreach to downtown residents during this process.</p> <p>There are established community leaders and associations, like OWINA, who are known to Town leadership and have, in the past, been called upon to actively participate and advise on projects planned for our community. The Downtown Whitby Development Steering Committee (DWDSC) is often called upon to provide critical input and even vote on recommendations for Council consideration for important projects (i.e., creating the BIA, saving RA Sennett, the Town's purchase of the Land Registry Office, endorsing Werden's neighbourhood becoming a Heritage Conservation District, supporting the development of a condo at Firehall No.3, to name a few).</p> <p>These important opinions were not sought out from these entities or individuals for this transit proposal. In fact, this proposal does not align with the DWDSC 2019-2022 Strategic Priorities.</p> <p>So, let us begin the process of listening to the residents who live downtown now. I will point out that there are 500 to 600 homes and apartments, with more than 4000 residents, in the immediate vicinity of this</p>	<p>consistent and transparent dialogue with the Town of Whitby residents, local business owners and community organizations, as we work to move this important transit project forward.</p> <p>EVOLUTION OF DURHAM-SCARBOROUGH BUS RAPID TRANSIT</p> <p>Over the last few years, our technical experts have explored a variety of options for downtown Whitby. Based on the feedback received through several rounds of public engagements, the preliminary design has evolved from curbside dedicated transit lanes, to a full pedestrian transit mall and then to the newly proposed north side pedestrian mall. The north side pedestrian mall was designed to provide a better balance between the need for expanded transit in the region, supporting a walkable and attractive downtown, and providing capacity for general traffic. The latest design option is a reflection of the important community feedback we've received to date. The design was refined to incorporate improved local access, and to minimize local traffic impacts by adding a dedicated</p>

		<p>project. Given the fact that there is no daily free press in Whitby (believe it or not The Toronto Star does not cover transit proposals in Whitby) you must work a bit harder to bring important issues like this to the attention of our residents. Let us set a meeting immediately to find a way to make certain all these residents are made aware of this project. I know that OWNA and the community leaders in Perry's Plan would be happy to work on this.</p> <p>Please know that I support first in class public transit, walkable communities, preservation of heritage, and projects that are environmentally sound. I honestly believe that by working with those who live downtown, Metrolinx and the Town will find a solution that works in our collective best interests</p>	<p>eastbound traffic lane as well as reducing the length of detour required for westbound motorists through the downtown centre. The northside pedestrian mall also improves accessibility and walkability in Whitby's vibrant downtown core – with sidewalks two meters wider at Brock Street, and three meters wider at Byron Street. With respect to this preliminary design, we are still looking at opportunities to improve the project's benefits while allowing for westbound through traffic, further reducing the negative impacts that the community has expressed concern for, such as traffic diversion</p> <p>The primary goal of the Durham-Scarborough Bus Rapid Transit project is to support regional growth along the corridor by improving the efficiency and capacity of the transportation network through strong transit priority – making transit travel more reliable and quicker, and therefore more attractive to more people for their trips.</p> <p>SAFETY</p> <p>At Metrolinx safety is our top priority. Both the north side pedestrian mall</p>

2021-04-17	[REDACTED]	<p>I appreciate your follow up with me and the information. Here's the problem, additional parking at Byron & Elm doesn't cut it! There is no way I'm parking up there to walk down to Brock & Colborne to spend my money in a local business.</p> <p>Adding to the problem - the Town, in their infinite wisdom, refused the acquisition of the property on Brock St. where the old firehouse was located to a local craft brewery.</p> <p>The brewery ultimately obtained property across the street, built a fantastic facility blending with the local architecture, not to mention 12welve, great restaurant & pub. Meanwhile, the Town allowed a developer to acquire the old firehall and adjacent property for a CONDO !</p> <p>I have no idea how many units, but I do know the additional traffic will be horrible in the downtown area.</p> <p>The CONDO BABIES will not what to try to get out on Brock St. , so they'll use Green St. (adjacent), [REDACTED] to get south to the GO station..</p> <p>The Green/Burns/ Brock block has a Seniors building, Seniors Activity Centre,</p>	<i>Response sent to correspondence from [REDACTED] received 2021-04-22.</i>

		Lawn Bowling Club and Centennial Park ! A lot of activity, a lot of pedestrian traffic, a lot of children. This whole thing is not an improvement, it disrupts the fabric of life !!		
2021-04-18	[REDACTED]	In your new plans, do not include bicycle lanes, NOBODY uses them !!. EVERYBODY rides bicycles, electric bikes and scooters on the sidewalks (where available), I'd be safer in a Cross Walk if Whitby had them !	<i>Response sent to correspondence from [REDACTED] received 2021-04-22.</i>	
2021-04-18	[REDACTED]	<p>I was asked by my community to add my voice again to this extremely concerning project proposal. Along with my support of the attached letter, I would just like to add a few things as a resident of downtown Whitby for nine years.</p> <p>We moved into this neighborhood for the walkability and the potential for a family-friendly place to plant some roots. For much of the time we've been here, we've had many construction projects pass our front door. It's all progress and we're happy to have it behind us. Especially now with young children.</p> <p>One major issue we had, when [REDACTED] was closed for construction, was the incredible influx of speeding traffic through our neighbourhood. Trains would come in,</p>	<p>On 2021-06-18, J. Stenner responds:</p> <p>Thanks for your email, I appreciate you taking time to voice yours and your communities concerns.</p> <p>We understand the community has concerns about the preliminary designs for the Durham-Scarborough Bus Rapid Transit project. As a result, we have explored additional design options with varying traffic configurations that allow cars to drive on Dundas Street between Byron and Brock Streets. The latest design concepts were presented for the public's feedback at the Town of Whitby's Special Council Meeting on April 22, 2021.</p>	Added to project mailing list.

**Durham-Scarborough Bus Rapid Transit
Public Correspondence Summary Table**

Date	Contact	Comment Summary	Date / Response	Action / Commitments
		<p>riders would go north on [REDACTED] and speed along [REDACTED] 90% of vehicles would drive directly through stop signs. It was an irritant for them and a massive frustration to us as it was extremely unsafe to be anywhere on the street when this was going on. This would happen every hour and during the morning rush. We were relieved when it was over.</p> <p>If this Metrolinx project plan moves forward, it will be way worse than the [REDACTED] street closure. The volume of traffic along Dundas can not be routed through residential neighbourhoods. It's extremely unsafe and, as mentioned, is not designed for this. People will speed. They will drive through stop signs out of frustration. They will disregard our children playing, riding bikes and our seniors on mobility scooters.</p> <p>Living in this neighbourhood has been a great experience and the bright future of downtown Whitby is something I would like to continue to be a part of. As [REDACTED] [REDACTED] have mentioned in their letter, a project like this and the resulting traffic nightmare brought to our doorsteps, will make downtown Whitby something to avoid and drive our community out.</p>	<p>In this meeting we proposed a new 3-lane option for the downtown Whitby area. Between Brock Street and Bryon Street, the three-lane design provides one westbound lane for all vehicles, including a mix of cars, trucks and buses; one eastbound transit-only lane; and one eastbound lane for general traffic. West of Byron Street and east of Brock Street, the proposed design is four-lanes, with two centre-median transit-only lanes and two general lanes (one in each direction).</p> <p>Over the last few years, our technical experts have explored a variety of options for downtown Whitby. Based on the feedback received through several rounds of public engagements, the preliminary design has evolved from curbside dedicated transit lanes, to a full pedestrian transit mall, to a north side pedestrian mall, and now the technically preferred three-Lane mixed traffic westbound design.</p> <p>I can appreciate your concerns related to construction impacts of the project. As we move forward with the project, we are committed to keeping the</p>

Public Correspondence Summary Table**

Date	Contact	Comment Summary	Date / Response	Action / Commitments
		<p>direction should be reserved for transit, carpool (3+ occupants) and motorcycles. The rest of the time, that lane can be left for anyone.</p> <p>One of the biggest problems with bus only lanes is they are unoccupied the majority of the time. In 30 minutes, you can have one bus pass through with 20 passengers. In that same time, hundreds of motor vehicles could still get through on that lane. By removing a lane of traffic, you're forcing motor vehicles onto other roads – mainly residential streets – to avoid the congestion caused. Just because you're building transit lanes doesn't mean you are going to displace enough motor vehicle users to justify your actions.</p> <p>It would also help the flow of ALL traffic if bus stops were built around a "cutout" in the road – so buses could pull off the roadway into their own space. Current in-lane bus stops are a traffic nightmare.</p> <p>I would also suggest that your "traffic experts" get out of their cubicles and actually travel through the areas they are working on. My biggest complaint about traffic infrastructure in Ontario is that we have too many people using computer models, sitting in their ivory towers, making</p>	<p>downtown Oshawa and the University of Toronto Scarborough Campus. The existing PULSE 900 service is the busiest bus route in Durham Region; the service carried more than 3 million passengers in 2019. Running more frequent transit service in dedicated bus lanes is expected to double ridership levels and avoid future traffic congestion.</p> <p>If we add more buses to the road, those buses would still be mixed with regular traffic. As demand increases over time, there will be increased traffic congestion and delays for both buses and cars. By providing dedicated lanes for transit in the centre of the road, transit passengers will experience shorter travel times, with more frequent, reliable and comfortable service. General traffic will also benefit from smoother traffic flow by separating buses from regular traffic.</p> <p>Having dedicated transit lane(s) at all times of the day, with clear identification also creates a more regular pattern for drivers and decreases the change of motorist confusion through the corridor.</p>

Public Correspondence Summary Table**

Date	Contact	Comment Summary	Date / Response	Action / Commitments
		<p>decisions with real-world implications. It seems that we have people designing transit that have never taken a bus; others working cycling solutions who hate cyclists and those looking after roads who don't have a license. Your "experts" – and their bosses – should travel through an area by car, bus, bicycle, on foot and in the cab of a transport before doing ANY planning work.</p>	<p>In previous stages of the project, a range of potential solutions were reviewed and assessed. This included an option to use HOV lanes, or dedicated curb lanes. There were several reasons why the HOV lanes and curb lanes were not preferred including:</p> <ul style="list-style-type: none"> • Mixing traffic and buses in the curb lane creates friction that slows down both traffic and buses. Centre-median bus lanes will carry more people, more efficiently than HOV or curb lanes. • Conflicts with turning cars in and out of driveways across the bus lanes. Centre-median bus lanes will improve the overall safety performance of the road for all road users. • Loss of parking and no pedestrian improvements which would have a great impact on local businesses • Centre-median bus lanes allow emergency vehicles to bypass general traffic.

2021-04-22		<p>My problem with bicycle lanes , aside from the fact that Nobody uses them - is they begin nowhere and end nowhere! In the older downtown areas there will “never” be enough road width available to add/continue the lanes. Case in point - Athol Street, Whitby - starts at Dundas/Hwy 2 and ends before Consumers Rd. I have no idea where the lane starts, but it isn't Dundas - running south it ends at Burns St. The lane doesn't even get a cyclist into a nearby park. I live in the area, walk my dog in the area and do not recall seeing a cyclist using the lane.</p> <p>My Snipe re: Crosswalks - I do understand the prohibitive costs associated not only in required signage for ingress to a community declaring crosswalks, but also in-town overhead signage and road painting - so, unlikely Whitby Council would approve that anytime soon. Thanks for listening.</p>	<p>On 2021-04-22, M. Parkhill responds:</p> <p>Thanks for your 3 messages over the last few days. I want to make sure you're aware of the special council meeting being held tonight, April 22 starting at 5:30 pm. You can find all the details to watch or participate in tonight's meeting on the Town's website: https://www.whitby.ca/en/news/share-your-feedback-with-metrolinx-about-the-durham-scarborough-bus-rapid-transit-route-design.aspx</p> <p>At Metrolinx safety is our top priority. Both the north side pedestrian mall and the design of the other stops in Whitby are designed with safety in mind. The north side pedestrian mall would improve safety for pedestrians on Dundas Street by widening the sidewalk and enabling accessibility improvements into the local businesses.</p> <p>Outside the downtown, the project will upgrade sidewalks and crosswalks to be accessible, create raised and barrier protected platforms at stops for transit users, and for drivers by protecting left-turns at signalized</p>

			<p>intersections. Additional traffic-calming measures will be deployed to enhance the safety of the community, including new traffic signals, signs, and protecting road corners. We are continuing to work with Town of Whitby staff to identify strategies to mitigate impacts to the surrounding road network.</p> <p>The majority of the 36 km route will have new cycling facilities. These cycle tracks will be raised at the same level as the sidewalk, and not on-road like the existing bike lanes on Highway 2 in Pickering. You are correct, in some of the constrained areas, alternate cycling routes are proposed on nearby east/west streets to provide connections. For example, through Downtown Whitby there isn't enough space for dedicated cycling with buildings set close to the road. Between Raglan and Garden, cyclists can use Mary and other planned cycling routes as alternates to Dundas Street.</p> <p>We are planning more virtual engagement for the Whitby community in May 2021. To stay informed on upcoming public engagements, please</p>

2021-04-23		<p>I watched the special meeting yesterday and am disappointed to learn this morning that you voted against having Metrolinx take another look at their original proposal of 4 lanes of traffic through the downtown pinch area.</p> <p>To flatly disregard this option being looked at again does not make sense. You would be voting for them to look at the viability of this options NOT voting for the option to be adopted.</p> <p>I am disappointed that you made this decision given that you did not consult with the residents you represent. I voted for you as I believe you had the interests of the people above anything else. This will be an election issue for the Mayor, Deputy Mayor and all Councillors and I fear that voting against even looking at the option again could jeopardize re-election, which would be a shame as I feel you and some others have done a good job thus far.</p> <p>I implore you to reconsider your position and bring a motion to reopen this option. What have you got to lose?</p>	<p>On 2021-04-24, D. Newman responds:</p> <p>Thank you for your note received yesterday.</p> <p>The issues which you have raised are important to our Town. I have taken time to respond in detail.</p> <p>I was born in Whitby, care about the people of this Town and have worked hard to consider their views and all relevant factors in making decisions on Council.</p> <p>Metrolinx has the authority to make the decision on the BRT design in Whitby after consultation with Council, residents and stakeholders.</p> <p>The BRT design in Whitby is an evolving process to find the best solution by addressing factors to ensure safety, preserve the historical downtown, protect the peace of neighbouring residents, support the businesses, and facilitate traffic flow.</p>	Not added to project mailing list as this was a forwarded email from Councillor Newman.

			<p>Communication with the community has been complicated by the pandemic. Following Council direction, Metrolinx has committed to broaden consultation with all residents of Whitby.</p> <p>Throughout this process, I have been advised by Metrolinx of the technical restraints, the space restraints, the safety impacts and the heritage impacts of the four lane design option in the downtown.</p> <p>The four lane design in the downtown limits significantly the opportunity for the preservation of the downtown as a historical and cultural hub, shifts the focus even more to public transit and vehicular flow and presents some safety issues.</p> <p>This was the first Metrolinx design option for the downtown and three successive design options have been presented by Metrolinx since that time in response to resident and Council concerns.</p> <p>As Metrolinx had already shared the constraints and impacts with the four lane option for the downtown, I did not</p>

Public Correspondence Summary Table**

Date	Contact	Comment Summary	Date / Response	Action / Commitments
			<p>consider it constructive for Metrolinx to be directed by Council to revisit that option again.</p> <p>Through this communication, I have forwarded your note and my response to Metrolinx so that you will have the benefit of their further written comment on the challenges of the four lane design option in downtown Whitby.</p> <p>At the meeting of April 22, 2021, Metrolinx outlined the advantages of the current three lane mixed traffic westbound design option (their fourth and current option) which embraced most resident concerns (and was received favourably at the meeting). This current three lane option provides the opportunity to maintain the continuous eastbound and westbound general traffic flow on Dundas in the downtown, minimizes neighbourhood infiltration, improves pedestrian access to businesses, provides more space for streetscaping with an effort to create balance on the north and south side of Dundas in the downtown, maintains the character of downtown Whitby, and relocates 31 on-street parking spaces.</p>

		<p>narrow the intersection of Brock and Dundas down to 3 lanes.</p> <p>A priority should be to keep the 4 lane option open for consideration. Anything less than 4 lanes of traffic for cars will negatively impact the side streets and all the residents and businesses on them. It will be dangerous to have all that traffic meant for a highway (Dundas St/Hwy 2) to be pushed onto side streets not meant for that kind of volume of cars. I personally will avoid the downtown completely if that intersection is narrowed to 3 lanes or less for cars. I will go to Ajax to do my shopping and dining, etc. I won't use Rossland Rd or Bonacord to get into downtown Whitby, [REDACTED]. It's already difficult to get through that Brock/Dundas intersection it's so busy now as it is. I can't even imagine how bad it will be when the BRT is built and busses every 5 min are going through and cars have to divert to the side streets to get through town. Ridiculous!! How can this even be considered? Has anyone on the Whitby Council or Metrolinx ever driven in downtown Whitby?</p> <p>I also am very upset about the idea of the busses going through the middle of Dundas St. W and allowing u-turns at the</p>	<p>appreciate your patience as we work to respond to everyone who took the time to reach out.</p> <p>Our team remains committed to fostering open, consistent, and transparent dialogue with the community as we work to move this important transit project forward. In 2021, Metrolinx hosted three virtual open houses for the Whitby community and mailed approximately 50,000 brochures to the entire municipality to ensure that everyone who has an interest in this project, has an opportunity to have their voice heard.</p> <p>The DSBRT preliminary design has evolved from curbside dedicated transit lanes, to a three-lane design with a westbound mixed traffic lane. The refined preliminary design includes three lanes of traffic, giving eastbound cars and buses a dedicated lane and having westbound cars and buses share a lane between Perry Street and Byron Street. As we work to further refine the three-lane preliminary design option, Metrolinx will continue to engage and share information with the community, stakeholders, elected</p>

		<p>intersections. I've been in York Region and have driven on those roads with the busses in the middle and I did do a u-turn and it felt dangerous and I wouldn't want that in my neighbourhood where [REDACTED] like to ride their bikes. Drivers are bad enough without having to worry about them pulling u-turns everywhere. I know there will be u-turn signals and signage, but I don't believe drivers will obey/follow them. Also, this plan also negatively impacts all the businesses along Dundas, so traffic can only get in to these stores from one direction. Not to mention all the construction that will hurt the businesses while it's being built.</p> <p>I would be happy to see the busses remain in the curb lanes and for the Brock/Dundas intersection to have 4 lanes for vehicles, buss lanes on the curb with no right/left turns at that intersection. I also hate the idea of a pedestrian/transit mall at the four corners in downtown Whitby. There is not enough space for it. I'm all for walkability in our downtown core, but not when the plan only serves Metrolinx and getting busses through.</p> <p>Finally, I do believe the rapid transit plan ultimately would be best on Rossland Rd for the section that goes through Whitby. I understand Metrolinx wants it all across</p>	<p>officials and municipal and regional partners.</p> <p>Next steps on this important transit project include finalizing the preliminary design plans, preparing the draft Environmental Project Report (EPR) and commencement of the Transit Project Assessment Process (TPAP), which includes a formal public consultation period. As part of the TPAP, Metrolinx will be hosting a virtual public information centre in fall 2021 to present the environmental impacts and proposed mitigation measures for the project and gather feedback that can be incorporated into the EPR. Beyond the TPAP, into 2022 the Preliminary Design Business Case (PDBC) will be finalized.</p> <p>The DSBRT is an important transit project in Durham Region. As we look out to 2041 and beyond, there is significant growth planned for the corridor – approximately 215,000 more residents and 66,000 more jobs; higher transit capacity is needed to link communities and employment across the region. The Durham Region Transit PULSE route has the highest transit ridership in Durham Region with</p>

		<p>Hwy 2 from Scarborough through to Oshawa. That's fine. But why not consider a detour using Lakeridge - Rossland - Thickson to get the busses around the Whitby core and not negatively impacting Dundas St and my neighbourhood? Those streets have so much more room to accomplish what Metrolinx wants.</p> <p>I also am very disturbed by the lack of communication on this BRT plan for the past 2 years. Only recently have Whitby residents and businesses begun to understand what this all entails and how we will all be impacted. Residents and businesses need to have a voice and be heard by Whitby Council and by Metrolinx. I don't support Whitby Councillors and the Mayor making decisions based on what they think is right and is their vision for the Town. They were elected by the people and they should be representing what the people want!</p>	<p>3.5 million trips taken in 2019; over 40% of trips along this corridor start or end along Highway 2/Dundas Street. This project was identified in Metrolinx's 2041 Regional Transportation Plan and in Durham Region's Transportation Master Plan as being crucial to support the anticipated growth of Durham Region. As outlined in the Initial Business Case (IBC) this project is expected to generate \$686 million in economic benefits for the Region.</p> <p>To keep informed on upcoming public engagements, please subscribe to the Metrolinx Durham regional e-newsletter, and to the project mailing list by e-mailing the team at DSBRT@metrolinx.com. 2021-05-06	[REDACTED]	<p>We are [REDACTED] and our family lives [REDACTED] that will be adversely affected by lane closures on Dundas to accommodate Public Transit and divert west bound traffic into our residential FAMILY streets !</p> <p>We want the option for 4 lane traffic to stay on Dundas ! It will only be for a few blocks where the bottleneck is. We were not informed that this was an option before our Councilors voted it down ! Those Councillors will not be in office after next election and Metrolinx will then have to deal with FULL RESISTANCE from a united neighbourhood determined to save our community !</p> <p>WE WANT THE 4 LANE OPTION TO BE CONSIDERED !</p>	<p>On 2021-05-27, J. Stenner responds:</p> <p>Thank you for writing to the Durham-Scarborough Bus Rapid Transit (DSBRT) project team to provide your comments and feedback on the most recent preliminary design plan for downtown Whitby.</p> <p>Based on provincial growth plans, the Highway 2 corridor will attract approximately 215,000 more residents and 66,000 more jobs by 2041. Higher capacity transit is needed to support regional growth and link communities and employment across Durham Region and the Toronto boundary.</p> <p>This project will build on the existing Durham Region Transit PULSE service which today, runs between downtown Oshawa and the University of Toronto Scarborough Campus. The existing PULSE 900 service is the busiest bus route in Durham Region;</p>

			<p>the service carried more than 3 million passengers in 2019. Running more frequent transit service in dedicated bus lanes is expected to double ridership levels and avoid future traffic congestion. Dedicated centre medians are the preferred design option along most of the DSBRT corridor.</p> <p>Over the last few years, our technical experts have explored a variety of options for downtown Whitby. Based on the feedback received through several rounds of public engagements, the preliminary design has evolved from curbside dedicated transit lanes, to a full pedestrian transit mall, to a north side pedestrian mall, and now the three-Lane mixed traffic westbound design.</p> <p>This design:</p> <ul style="list-style-type: none"> • Maintains continuous eastbound and westbound general traffic lanes on Dundas Street • Minimizes neighbourhood infiltration and keep school buses, trucks, large vehicles on Dundas Street 	

**Durham-Scarborough Bus Rapid Transit

			<ul style="list-style-type: none"> Improves pedestrian, transit, and driving access to businesses and support step-free access Provides more space for streetscaping and enhance the public realm on the north side of Dundas Street Maintains the character of Downtown Whitby Relocates all 31 on-street parking spaces, through an expanded parking lot at Elm and Byron Streets. <p>In previous stages of the project, a range of potential solutions were reviewed and assessed. This included an option to use HOV lanes, or dedicated curb lanes. There were several reasons why the HOV lanes and curb lanes were not preferred including:</p> <ul style="list-style-type: none"> Mixing traffic and buses in the curb lane creates friction that slows down both traffic and buses. Centre-median bus lanes will carry more people, more efficiently than HOV or curb lanes. 	

**Durham-Scarborough Bus Rapid Transit
Public Correspondence Summary Table**

Date	Contact	Comment Summary	Date / Response	Action / Commitments
			<ul style="list-style-type: none"> • Conflicts with turning cars in and out of driveways across the bus lanes. Centre-median bus lanes will improve the overall safety performance of the road for all road users. • Loss of parking and no pedestrian improvements which would have a great impact on local businesses • Centre-median bus lanes allow emergency vehicles to bypass general traffic. <p>Metrolinx will continue to consult with the community, stakeholders, elected officials and municipal and regional partners to fine tune the three-lane preliminary design option. The latest refinements reflect the valuable feedback we've received through our most recent public and stakeholder engagements. We hosted a virtual open house May 20th on Metrolinx Engage, a recording of the presentation is available here. Additional information can also be found in our latest blog post.</p>

2021-05-10	[REDACTED]	<p>On 2021-05-10, [REDACTED] emailed [REDACTED]</p> <p>I was heartened to see in the April 22 Metrolinx presentation that consideration was given to reducing the intrusive nature of the proposed highway through parts of residential old Whitby. I refer specifically to the new 1b section.</p> <p>I wonder, however why you did not extend the single lane westbound general traffic lane all the way to McQuay rather than stopping at Raglan. It is less than 300 yards and is over a bridge. Why not continue to the signalled intersection at McQuay?</p> <p>In fact why not simplify the whole stretch from McQuay to Cochrane with single lane general traffic each way as well as the two dedicated bus lanes? It will be 4 lanes instead of the currently proposed 5. This is an old residential area and in spite of whatever intensification takes place along Dundas, will still not have the same kind of density that is happening west of McQuay.</p>	<p>On 2021-05-19, [REDACTED] responds:</p> <p>Thank you for your note. I am following up to ask if you received a response from Metrolinx to your question, which I consider to be important.</p> <p>There is a public meeting which is being organized by Metrolinx on May 20, 2021 at 6:30 pm. You may register by metrolinxengage.com</p> <p>If you wish to speak further or meet outside your home following safety protocols to speak about the BRT proposal on May 21, 2021 in the late afternoon, I would be happy to do so.</p> <p><i>J. Stenner responds on 2021-05-20.</i></p>

			<p>GO Transit services, allowing transit riders to get where they are going faster than before.</p> <p>Many studies went into selecting Dundas Street and Highway 2 as the preferred transit corridor. As part of the work to create the <u>2041 Regional Transportation Plan</u>, Metrolinx worked with municipalities in the GTHA to evaluate future growth areas and transportation needs in the region. In Durham, Highway 2 was identified as a key corridor for rapid transit, building on existing Durham Region Transit services and ridership. Most importantly, Highway 2 connects key destinations, existing population and employment centres, and high growth areas in Durham Region and Toronto. Other corridors in Durham Region, like Taunton Road, have also been identified in the 2041 Regional Transportation Plan for priority bus routes. Planning and preliminary design for other corridors will happen in sequence.</p> <p>Taunton Road and Bayly/Victoria Street were identified in the 2041 Regional Transportation Plan for priority bus service. Ellesmere Road</p>

			<p>longest section of two-lane roadway has been included.</p> <p>Along the entire corridor, the traffic analysis indicates that eastbound afternoon traffic is heavier than westbound morning traffic. This is due to the nature of road network in Durham Region, particularly the way Highway 401 widens towards the Durham/Toronto boundary at the Rouge River. As a result, there are fewer westbound delays on the highway in the morning so more drivers choose the highway. In the evening, the narrowing of the highway as traffic moves east creates greater levels of congestion, and more drivers choose to exit the highway earlier and use other routes such as Dundas Street. The traffic analysis indicates that two lanes are required to carry the traffic to the western edge of downtown Whitby. At Cochrane/Annes Street as significant portion of the eastbound traffic turns off Dundas Street to access local neighbourhoods to the north and south of Dundas Street, allowing the single remaining lane to carry the traffic further east through downtown.</p>

2021-05-25	[REDACTED]	<p>On 2021-05-25, [REDACTED] responds to correspondence from 2021-05-25:</p> <p>Unfortunately can't do virtual just want to know if construction is going to happen tearing up bond street west or is it just painting the lines on the roads for the bus routes?</p>	<p>On 2021-06-28, J. Stenner responds:</p> <p>The majority of the work for the Durham-Scarborough Bus Rapid Transit project along Bond Street does not require major modifications to the existing roadway. One of the advantages of bus rapid transit (BRT) is that we can add the infrastructure while mitigating disruption to the local community.</p> <p>Work will consist of new red asphalt for the BRT lane and new lane markings. There will also be some construction associated with building the new bus stops on Bond Street West which will be located at Stevenson Road, Gibbons Street, Park Road, Centre Street and Simcoe Street.</p> <p>Additionally, we anticipate that there may be some intersection</p>	

**Durham-Scarborough Bus Rapid Transit
Public Correspondence Summary Table**

Date	Contact	Comment Summary	Date / Response	Action / Commitments
			<p>improvements to accommodate the BRT, but these should not require major construction work. This may look like sidewalk and crosswalk adjustments, traffic signal upgrades and asphalt re-surfacing.</p> <p>To get a sense of what bus stops will look like, as well as to learn more about the project overall, I have attached the presentation from our recent Virtual Open House on June 3rd. Furthermore, as I understand you were unable to attend the meeting on June 3rd, I wanted to share this link where you can view a recording of the meeting.</p> <p>To keep informed on upcoming public engagements, please subscribe to the Metrolinx Durham regional e-newsletter, and to the project mailing list by e-mailing the team at DSBRT@metrolinx.com. 2021-05-31	[REDACTED]	<p>On 2021-05-31, [REDACTED] responds to correspondence from 2021-05-25:</p> <p>I'm curious as to how the Provincial Growth Plans are separate from the Regional and Municipal growth plans? I understand we're stuck with this (in my opinion, unsustainable) growth. However, based on development permits and forecasts locally and regionally, almost all (over 80% if I recall) of the forecasted growth will be North of Taunton Road. Unless municipalities are mandated to build higher density housing in existing communities, the sprawl that we're seeing will only continue going North and East. Wouldn't it make more sense for Metrolinx to be proactive and expand where the future need will be? There's already GO train service for those living closer to the #2/401 corridor. Improve that service, at lower fees, and you'll see an improvement in transit times.</p> <p>I also find a deep flaw in your rationale for dedicated bus lanes. I'm not saying we may</p>	<p>On 2021-07-23, S. Cardenas responds:</p> <p>Thanks for your email and for your continued engagement on the Durham-Scarborough Bus Rapid Transit Project (DSBRT). There was a lot of interest in our engagement and I appreciate your patience as we work to respond to everyone who took the time to reach out.</p> <p>Provincial growth plans are mandated under the Places to Grow Act, 2005. The Province has made significant investments in transit infrastructure in the Greater Golden Horseshoe (GGH) and beyond and continues to invest in rapid transit projects to support our growing region.</p> <p>Metrolinx supports the provincial growth plan to work to improve transit options throughout the GGH. We continue to work closely with regional partners and municipalities to ensure</p>

		<p>not need them 20-30 years down the road, but to implement these now (based on the current plans) will do exactly the opposite of what Metrolinx hopes for. This misguided notion that if Metrolinx makes transit easier and commuting harder will drive your ridership is a Pollyanna pipe dream. Ontario – and Canada – are driven (literally) by commuting. By annoying commuters, you won't meet your goals. Make transit free AND efficient and you might convert some commuters.</p> <p>I'm also not clear how centre transit lanes will help Emergency vehicles. If you're saying there will be buses every 5 minutes, in addition to current traffic volumes (which won't subside), how are emergency services supposed to navigate this quagmire when there will be islands built into the roadways to prevent buses from getting out of the way. Neither lane will be fully available. There is also the further issue that because cars have been diverted onto residential streets to avoid the gridlock, that this will further block streets and make it even more difficult for emergency services to navigate. I don't feel this has been properly investigated and addressed.</p>	<p>our future growth and development plans are in alignment with municipal growth plans.</p> <p>In the last 10 years, we have seen a shift to more compact development patterns, a greater variety of housing options, more mixed-use development in urban growth centres and other strategic growth areas, and greater integration of transit and land use planning. The Highway 2 corridor is home to Urban Growth Centres in Downtown Oshawa, Downtown Pickering and Scarborough Centre.</p> <p>Bus Rapid Transit (BRT) serves a different purpose than GO trains. BRT will serve short to medium distance trips in these Urban Growth Centres along Highway 2 and will provide a reliable option for more people to choose to take transit for more of their trips.</p> <p>Centre-median lanes are the preferred design because they provide the most efficient and safest operations for buses, cars and the travelling public. Dedicated lanes for transit are recognized across North America and around the world as the best way to</p>

		<p>I understand that Whitby's mayor is just another in a long string of mayors of this Town who think that we can have a walkable "downtown". They are misguided as Whitby does NOT have a downtown – it has an intersection with some really old buildings around it. Brooklin has a downtown. Port Perry has a downtown. This project, and the traffic chaos it will bring, will not improve the "downtown" for businesses or residents. Residents have been fighting Town councils for 20+ years to remove parking from the four corners and allow traffic to flow.</p> <p>I look forward to the public consultations. My research has shown that Whitby Council has not been listening to its constituents (again). There is a very active and determined Facebook group with over 1,000 members https://www.facebook.com/groups/704348303827821/?multi_permaLinks=814491349480182&notif_id=1622137916911684&notif_t=group_highlights&ref=notif) ... if you want public consultation, I suggest you review the discussions there.</p> <p>One thing I can say is that I will be glad to move out of Whitby before this project starts. But I fear for my friends and family</p>	<p>ensure that buses are not delayed due to traffic congestion; furthermore dedicated lanes separate buses from the busy curbside.</p> <p>There are several safety benefits to centre-median transit lanes. In line with Region's Strategic Road Safety Action Plan, which incorporates Vision Zero, to reduce the number and severity of collisions in the Region, the project will improve safety for all road users:</p> <ul style="list-style-type: none"> ✓ Improves the pedestrian experience through upgraded, continuous sidewalks ✓ Protects transit users through raised and barrier-protected platforms ✓ Improves safety of cyclists with grade-separated cycling facilities ✓ Prevents collisions for drivers by incorporating a raised median and restricting mid-block left turns. Left-turns and U-turns will be permitted at

		We will let you know in the near future if we are needing to add any other guests.	If you have some time today, or Monday I'd like to connect in advance of the meeting to go over some of your concerns to ensure we have the right folks from the project team on hand to answer your questions.	
2021-06-03	[REDACTED] [REDACTED]	I have been perusing the data on this project, I noticed the mention of accessible buses and level platforms plus entry to shelter/wait areas. I did not notice any information about feedback or inclusion from a local accessibility advisory committee. Also no where on the plans, that I could see, were allocations for service animal drink and/or relieving stations. The Canadian Transportation Agency has included provisions for service animals, and other accessibility considerations, that I have not seen nor heard of from Metrolinx. When it comes to design please pay particular attention to accessibility requirements there. I constantly see glass enclosed/partially enclosed waiting areas but its glass on silver/greyish framing. This is dangerous for people who are colour blind, have vision issues such as depth perception problems. The glass does not have proper markings / decals on the glass to indicate there is something there. To many, glass is invisible. These are just a		Submitted via Metrolinx Engage.

Date	Contact	Comment Summary	Date / Response	Action / Commitments
		<p>and simple, common sense, a bad idea. Nowhere that I know of have there been dedicated bus lanes installed and regular traffic shut down. Example.... HWY 7 in Vaughan, Davis Dr in Newmarket.</p> <p>Another item which must change is the very poor design at Kingston Rd and Church St. The elimination of 1 westbound thru traffic lane on Kingston Rd at Church St makes no sense at all.</p> <p>Also using Vaughan and Newmarket as an example, you will not find a location where thru lanes have been reduced to only 1 in order to accommodate bus lanes. Myself, residents and the Town of Ajax are strongly apposed to reducing the amount of thru lanes and have been voicing our opinions.</p> <p>I am 100% in favour of transit improvements and bus lanes but absolutely NOT at the expense of existing regular vehicle lanes. Over time, with all the developing left to be done in Durham, traffic will only increase, regardless of the transit additions.</p> <p>Eliminating thru traffic lanes has never been a good idea..... anywhere!</p> <p>Go check out the traffic on HWY 7 and Davis Dr where there's dedicated bus lanes during rush hour when things are back to normal.</p>

		If you have not seen my detailed concerns regarding Kingston Rd & Church St please let me know and I will gladly pass you a copy.		
2021-06-04	[REDACTED]	Am I seeing this correctly? Is the initial plan to have Hwy. 2 in downtown Whitby exclusively open to transit traffic? I hope this is not the case, or if it was, that it has been changed. Two years ago, this would have been a terrible idea, and with the number of additional homes that have been constructed in the region recently, the population of the area will be up thousands over the next short while. If the plan is to shut down highway 2 in downtown Whitby to local traffic, this will cause so many traffic issues I don't even want to imagine how it will look. Can you please let me know if that is the current plan, and if so, how we change it? Anyone living in the area will tell you this is...unwise. To put it as nicely as I can considering the trepidation I feel if this is the current plan.	<p>On 2021-06-30, J. Stenner responds:</p> <p>Thank you for your feedback on the Durham-Scarborough Bus Rapid Transit Project (DSBRT). There was a lot of interest in our engagement and I appreciate your patience as we work to respond to everyone who took the time to reach out.</p> <p>The DSBRT preliminary design has evolved from curbside dedicated transit lanes, to a three-lane design with a westbound mixed traffic lane. The refined preliminary design includes three lanes of traffic, giving eastbound cars and buses a dedicated lane and having westbound cars and buses share a lane between Perry Street and Byron Street.</p> <p>This new option will:</p> <ul style="list-style-type: none"> • Maintain continuous eastbound and westbound general traffic movement on Dundas Street 	<p>Submitted via Metrolinx Engage.</p> <p>Added to project mailing list.</p>

		Thank you to Metrolinx for your thoughtful consideration.		
2021-06-07	[REDACTED]	On 2021-06-07, J. Stenner emails: Would you still like to connect today in advance of our meeting tomorrow evening?		
2021-06-08	[REDACTED]	On 2021-06-08, [REDACTED] emails V. Thanigasalam: Please help us to stop this poorly designed plan which will destroy our neighbourhood. The less than 5 minutes which it will save people from outside this neighbourhood makes no sense. How can this help with making the community greener? This plan will cause congestion on Ellesmere Road. It's as stupid as the bus only lane on Morningside Ave. Who knows what the future will be with respect to pandemics and epidemics? Learning can be done virtually most of the time. Why are we spending tax payers dollars on a transit system that might not even be well used? Thank you	On 2021-06-08, [REDACTED] responds: Thank you for your email. I have provided MPP Thanigasalam with your feedback. I was told that residents are always free to contact the project team via dsbrt@metrolinx.com or through the website. Feedback and comments that Metrolinx receives from the public through these channels is considered a part of the public record so it's important that residents sign up to the DSBRT website and to send comments and concerns to them directly. Stay up to date by: • Signing-up for the project mailing list: dsbrt@metrolinx.com	Not added to project mailing list as DSBRT was not recipient of email.

		<p>This area has seen an increase in the number of traffic from west rouge cars and Pickering going to the 401.</p> <p>In my last email I suggested the route could be changed at Meadowvale and 401 exit at old Kingston road. Go north adjacent to the Meadowvale ramp then west along the south side of the 401, the exit from from this route is already at Conlins Road.</p> <p>The money for the widening of the Ellesmere road could be used to create the road way. The land is owed by the government or the city. It is about 90 feet wide. This would be like a service road, similar to the one in Oakville, along the QEW.</p> <p>Thanks for the opportunity , hope you rethink the plan.</p>

Public Correspondence Summary Table**

Date	Contact	Comment Summary	Date / Response	Action / Commitments
		<p>The Durham-Scarborough Bus Rapid Transit project team recognizes the unique character of the Highland Creek community. In fact, the area along Ellesmere Road from Military Trail to Kingston Road, including the Highland Creek area, was identified as an area requiring detailed study.</p> <p>Our objective is to find the right solution which provides transit reliability and remains sensitive to the local context. Projects of this size take time to develop the concept from planning to detail design, before the bus lanes can be implemented. The planning and preliminary design for the Durham-Scarborough Bus Rapid Transit project is ongoing.</p> <p>In response to previous comments from the community and stakeholders, and in consultation with City of Toronto staff, the preliminary design for Ellesmere Road was re-evaluated. From Military Trail to Meadowvale Road, the design now proposes to convert two lanes to bus-only and maintain one lane for general traffic in each direction. This will reduce the overall project footprint and reduce impacts to the community.</p> <p>The introduction of dedicated transit lanes on Ellesmere Road will change local travel patterns. Drivers will only be able to make</p>

		<p>left turns or u turns at signalized intersections. We understand that changing access is challenging, at least initially. For safety reasons for all road users, a raised island is proposed along Ellesmere Road with the introduction of dedicated transit lanes.</p> <p>The Metrolinx regional forecasting model indicates that the DSBRT will encourage nearly twice as many transit trips in the corridor than are there today, significantly reducing pressure to expand roads to accommodate more cars.</p> <p>The proposed dedicated transit lanes will greatly improve travel time reliability, meaning buses will arrive on time. Improved reliability will also make it easier for people to transfer to other local routes to get where they want to go. The Initial Business Case found that the average DSBRT rider will save 9.5 minutes, with longer trips saving more time. Transit travel time savings are one of the primary reasons for investing in rapid transit and can be quantified to assess the value that the investment brings to its riders.</p> <p>Metrolinx will continue to consult with the community, stakeholders, elected officials and municipal and regional partners to fine tune the project through the detail design stage. The latest refinements reflect the</p>

		<p>The Whitby Public Library Board would like to express their concern regarding the lack of direct consultation by Metrolinx on the plans for the DSBRT. The Central Library at 405 Dundas Street West sees 9,000-10,000 visits on average per week (pre-pandemic) and is a major draw to the Downtown. The Board is concerned about the design plans and the impact the project will have on the Library, its users, and Celebration Square. The Board requests that they and Library users be directly engaged by Metrolinx to provide input on the DSBRT project. You may contact our [REDACTED] at [REDACTED] to facilitate this engagement.</p>		
2021-06-18	[REDACTED]	<p>On 2021-06-18, M. Parkhill emails:</p> <p>Please join us for the third business information session for Durham-Scarborough Bus Rapid Transit. Thursday, June 24 from 11:00 a.m. to 12 noon.</p> <p>The purpose of the meeting is to present the preferred preliminary design. An information package (PDF) is attached for your review in advance of the meeting.</p> <p>Due to COVID-19, the meeting will be conducted virtually. Please join using the</p>		Draft meeting presentation attached.

			<p>struggling as a result of the pandemic) out of business</p> <p>The investment in rapid transit, and the improved streetscape along Dundas Street, will support the Town's vision for a more walkable downtown Whitby. The wider sidewalks will improve accessibility to the front doors of businesses, and provide space for activities such as sidewalk sales and outdoor dining.</p> <p>We recognize that construction can be impactful to area residents and businesses. That is why we are committed to working with the local Chambers of Commerce and Business Improvement Areas to support businesses during construction.</p> <p>While most elements of our business support program will be determined once a successful proponent comes on board and a contract is in place, I'm happy to give you a sense of the kinds supports we have provided in other projects. Kindly note that business support program elements would be implemented during the construction phase of the project.</p>

2021-07-08	[REDACTED]	<p>Hope you are doing well.</p> <p>Following up on our last virtual meeting. As you have expressed during the meeting that you were interested to meet us [REDACTED] one on one, we are wondering if you are going to propose a possible meeting day.</p> <p>We are hoping to enter into stage3 opening soon, We believe that it is best we should meet on site at our office. Please let us know your thoughts.</p> <p>Keep safe and be well.</p>		
2021-07-08	[REDACTED]	<p>In all your presentations you have highlighted the transit lanes, which I thought was for illustration purposes. Can you please confirm that the coloured lanes are for illustration only - or are you planning to paint all the transit lanes red or orange or some other colour all along the route. Thank you.</p>	<p>On 2021-07-22, [REDACTED] responds:</p> <p>Red asphalt is the standard for most Bus Rapid Transit (BRT) systems, as it does not lose its visibility the way painted pavement markings tend to do over time. The asphalt uses both red aggregate and red dye that are added to the asphalt. As the pavement ages, it continues to look almost as red as the day it was installed. In some areas where traffic will be permitted in the BRT lane(s), red painted stripes may be used instead of red asphalt, which will be determined during detail design.</p>	Submitted via Metrolinx Engage.

2021-07-08	[REDACTED]	<p>I found out from a technical article on the Scarborough-Durham BRT that the road widths vary along the corridor, being wider near intersections (where turn lanes are provided) and narrower elsewhere. In Toronto, the road changes width over a distance of 50-60m, while in Pickering, the transition takes over 100m. This suggests that the design is trying to accommodate much higher vehicle speeds in Pickering, despite the speed limits being the same</p>	<p>On 2021-07-23, [REDACTED] responds:</p> <p>Thank you for your inquiry on the Durham-Scarborough Bus Rapid Transit (DSBRT) project.</p> <p>The length of tapers for auxiliary lanes is set by the design standards, the posted speed and the design speed of the road. 		<p>(50km/hr, mostly). Could you please explain what vehicle speeds the designs in Toronto and Pickering are based on, and how these compare to the speed limits in those areas?</p>	<p>for the City of Toronto, Durham Region and MTO, who control different segments of the corridor. MTO standards apply near the Highway 401 and 412 interchanges, and supersede municipal standards.</p> <p>The City of Toronto has both the lowest posted speed and the most urbanized conditions, which generally rely on shorter tapers. Ellesmere Road is posted at 50 km/hr, and Kingston Road is posted at 60 km/hr. In Toronto the design speed is set the same as the posted speed, as part of the City's desire to control traffic speeds and manage the more limited opportunities to provide enough paved area for the more generous tapers. In the MTO-controlled areas near the Highway 401 ramps, the design speed is 80 km/hr even though it is posted at 60 km/hr. This provides a more generous transition from the freeway speeds to local street speeds.</p> <p>In Durham Region the posted speed varies from 50 km/hr to 70 km/hr, and the design speed is set at 10 km/hr above the posed speed. The higher posted speed and the added buffer to</p>

2021-07-09	<p>[REDACTED]</p> <p>[REDACTED]</p>	<p>Hi [REDACTED]. This is [REDACTED] just following up with you from our Raglan St meeting [REDACTED]. If a bus parking lane was added in front of the school right next to the existing side walk that would elevate a lot of traffic congestion twice a day, five days a week. I also had a question I forgot to ask at the meeting. So if Metrolinks is asking for funding for this project, I assume that means the taxpayers are paying for it. Where does the profits (bus fares) go? Do they pay back the funding or just line their own pockets.... Hence, we need the 412 to be free right away so we have time to have a traffic study done. Thanks in advance. Regards, [REDACTED].</p>	<p>On 2021-07-10, [REDACTED] responds:</p> <p>Thank you for your note. I was pleased to meet you again at the recent outside gathering with your neighbours.</p> <p>Through this communication, I will forward your note to [REDACTED], Trustee of the Durham Catholic District School Board with respect to the proposed school bus parking lane for pick up and drop off; to Metrolinx with respect to your financial questions; to MPP [REDACTED] with respect to the removal of the Highway 412 Toll and to our Council office for a City Works request and a response from Staff.</p> <p>I look forward to being in touch.</p>	<p>Not added to project mailing list.</p>

2021-07-27		<p>On 2021-07-27,  responds to the email distributing Ellesmere Road Business Information Session #3 meeting minutes:</p> <p>Thanks for sending us the meeting summary.</p> <p>During the meeting we mentioned that we had concerns on how the initial study was performed (October 2019) for the Durham Scarborough Bus Rapid Transit. We looked at the summary report and the most concerning issues was that not enough study was done on how this long term project was going to effect the businesses, residents, schools and places of worship on Ellesmere road.</p> <p>I have highlighted the 3 pages (page 12, 16 and 17) that is directly effecting the business on Ellesmere road as it mentions that the it had "Failed to asses the impact on business/homes on Ellesmere road" (page 16).</p> <p>We would like more clarification on the study that was done so we can understand</p>		<p>DSBRT PIC #1 Summary Report attached.</p> <p>Annotated sections of PIC #1 Summary Report attached.</p>

		<p>Metrolinx paints a pretty picture, but nowhere do they show</p> <ul style="list-style-type: none"> • trucks, • traffic, • people waiting for transit, • the regular TTC buses that will also be using the curb lanes, • trucks and cars making U-turns at the signalized intersections, • Both [REDACTED] are already at capacity and congested and way busier than shown in the picture, even on Sundays! <p>The Metrolinx Busway Plan for Ellesmere is a DISASTER!</p> <p>The proposed Metrolinx Bus Rapid Transit service on Ellesmere Road will destroy our community with no benefit to residents or businesses. The centre median approach will block all left-hand turns to/from driveways and side streets on Ellesmere. U-turns at signalized intersections or re-routing through neighbourhoods will be required for you to get to where you're trying to go; your home, to work, the</p>	<p>developing mitigation strategies to address the impacts.</p> <p>The Preliminary Design Business Case (PDBC) will identify the overall costs and benefits of the project, which will be used to support a full funding decision for sections of the corridor, including the segment within the City of Toronto.</p> <p>As part of the 2041 Regional Transportation Plan (RTP), Metrolinx worked with Greater Toronto and Hamilton Area (GTHA) municipalities to review and assess the transportation needs of various corridors in the GTHA, including Highway 2/Ellesmere Rd. This corridor was identified for Bus Rapid Transit as it provides unparalleled connectivity to existing downtowns and future urban growth centres, major post-secondary institutions, TTC, future subway, and builds on the investments by Durham Region to date in the PULSE service.</p> <p>Buses and Bus Passengers</p> <p>Currently, TTC intends to operate all buses in the centre-median bus lanes from Dormington Drive to McCowan</p>

Public Correspondence Summary Table**

Date	Contact	Comment Summary	Date / Response	Action / Commitments
		<p>grocery store. Existing transit users will gain nothing as most stops will need to continue to be serviced by existing TTC services; the frequency of which is expected to be reduced. Buses will now be occupying both dedicated bus lanes and curb lanes.</p> <p>The minimal time savings for riders on this section of Ellesmere with this proposal vs. buses in mixed traffic does not warrant the significant negative impact to the residents that live here and that will have to deal with this forever.</p> <p>Residents will have to deal with the construction to widen Ellesmere, move services (hydro, sewers and catch basins, fire hydrants). Not to mention the cutting down of hundreds of mature trees.</p> <p>This is an unnecessary waste of taxpayers hard-earned money that could be put to better use elsewhere.</p> <p>1. Ellesmere Rd. is an essential area for Scarborough-Guildwood and changing vehicle movement as drastically as proposed in Metrolinx plan would have a devastating impact on the many businesses and community for years to come.</p> <p>2. Metrolinx wants to reroute all cars, trucks and transport trucks from Ellesmere to</p>	<p>Road. Along that stretch, including the intersection of Markham Road, the TTC is not intending to operate any services in the curb lanes. This is possible because, along that stretch of Ellesmere Road, the DSBRT stops are close together. East of Dormington Drive to east of Morningside Avenue, one or two TTC routes may exit the centre-median lanes and operate in the curb to service stops between the DSBRT stops. The service plan for the corridor will continue to evolve as ridership grows and the population and employment areas expand. Our ridership modelling and projections are based on the travel needs and requirements for 2041.</p> <p>Cars and Trucks</p> <p>While there will be changes for car and truck drivers, it is important to understand that the project will not involve a reduction in lanes for general traffic. All motor vehicles, including small and medium truck traffic, will remain on Ellesmere Road. The proposed design maintains 4-lanes for general traffic on Ellesmere Road, two lanes in each direction, the same number of lanes that exist today. Most</p>

		<p>Bellamy and Progress and then dump them onto Markham Rd.</p> <p>3. Metrolinx has not done any traffic studies for any of these streets and only has done traffic study for Ellesmere Road during the height of the COVID-19 lockdown so we know how accurate that is!</p> <p>4. Let's not forget that Markham Road's capacity is already at a boiling point and can't handle any more traffic. It seems that Metrolinx and city managers missed the boat dealing with this issue and re-routing more traffic onto Markham road would be unmanageable.</p> <p>5. We don't believe Metrolinx and city planners will be able to come up with a plan to support local businesses and residents on the community. We feel they have only one goal and that is to get it passed. Who cares about the people? Metrolinx knows what is best for everyone and hates cars.</p> <p>6. We believe that left turns along with U-turns in a very busy intersection will be a safety issue for pedestrians. It will only make traffic and congestion worse in an area that is already overwhelmed.</p>	<p>vehicles will have the option of using the protected U-turn phase at signalized intersections or to choose an alternate route.</p> <p>East-west through traffic on Ellesmere Road will experience time savings with DSBRT as improvements to traffic signals will allow more green time to be allocated to east-west traffic to benefit both drivers and buses.</p> <p>The project has undertaken an extensive traffic analysis to look at the impact of this project. This report will be available for review as part of the TPAP later in 2021. Data for this traffic analysis was collected before the COVID-19 pandemic. The 2041 transportation demand projections are based on plans for future land use, employment, and density and the trips that will be created by these factors. While it is true that COVID-19 has had a short term impact on ridership, population and employment growth will still occur over the long term which requires investment in rapid transit to continually improve mobility for residents.</p>

			<p>Health of the Corridor</p> <p>Metrolinx and our partners at the City are concerned about the existing and future businesses along our corridors. A strong urban structure is an important part of delivering transit to our communities. A vibrant corridor like Ellesmere with a mix of businesses and homes, representing several origins and destinations.</p> <p>The DSBRT project proposes approximately 36 kilometers of bus rapid transit infrastructure along Highway 2 and Ellesmere Road connecting Oshawa, Whitby, Ajax, Pickering, and Scarborough. Once completed, the project will allow for seamless connections with local transit networks and will provide the residents of Durham Region and Scarborough more flexibility and choice to get where they need to go, faster and more reliably. The corridor is expected to support approximately 215,000 more residents and 66,000 more jobs by 2041. Higher capacity transit is needed to link communities, employment, schools, and other major destinations along Highway 2 across the Toronto and Durham Boundary. Ellesmere</p>

			<p>Road is designated as a priority transit corridor by the City of Toronto and connects to the Scarborough Subway Extension.</p> <p>There will be property impacts and tree impacts along Ellesmere Road. The project is currently in the preliminary design and environmental assessment stage. The project team is working to minimize the project footprint to minimize impacts to property as much as possible. Most property requirements are within the City's designated right-of-way. An arborist report is underway to identify impacted trees and develop mitigation strategies. Tree impacts will be compensated following the City of Toronto and Toronto and Region Conservation Authority requirements.</p> <p>Transit projects like the DSBRT include improvements to the streetscape and landscaping along the corridor. Trees and landscaping will be included in the final design resulting in a refreshed cohesive look for Ellesmere Road.</p> <p>A commitment to future Consultation</p>

			<p>regarding your concerns with the Metrolinx's Durham-Scarborough Bus Rapid Transit System project. [REDACTED] has an update for you and he will be responding to your concerns.</p> <p><i>A. Au responds on 2021-08-04</i></p>	
2021-07-29	[REDACTED]	<p><i>[Email sent to Councilor [REDACTED]]</i></p> <p>I have a couple of questions about the DSBRT which you might be able to answer.</p> <p>What is the ridership supposed to be? I imagine largely workers at businesses located along Highway 2. The Amazon proposal for a facility in Pickering was withdrawn; do they have plans for a different site in the area? What other businesses are there that this line would serve? Nothing will persuade General Motors workers to take the bus. The route is not convenient for Durham residents working at Amazon facilities in Scarborough.</p> <p>Have you seen estimates of the number of students likely to use the service? Even if turns out to be large, I can't see that a frequency of a bus every 5 minutes would ever be justified.</p>	<p>On 2021-08-04, [REDACTED] responds:</p> <p>Hello [REDACTED],</p> <p>The specific questions in your email would be best directed to the Provincial MPP as this is a provincial project being led by Metrolinx. His contact information is:</p> <p>MPP Vijay Thanigasalam [REDACTED]</p> <p>We have heard the concerns of Highland Creek residents regarding Metrolinx's proposal for a Bus Rapid Transit (BRT) route with curbed centre lanes along Ellesmere.</p> <p>The Durham-Scarborough BRT is a provincial project by Metrolinx, the City of Toronto is not a co-proponent. However, Councillor</p>	Added to contact list.

Date	Contact	Comment Summary	Date / Response	Action / Commitments
		<p>Please let me know if you have any questions.</p>	<p>forcing large trucks down to Progress Ave. and on to Markham Rd. so they can enter Ellesmere properties is a crazy idea. Forcing them to make right hand turns into crowded intersections to get back onto Ellesmere is another bright idea that could have severe consequences. By adding more vehicles to turn left and making U-turns at an already heavily populated intersection with vehicles and pedestrians is a big problem waiting to happen.</p> <p>Let me paint a picture if you don't see it:</p> <p>A bus is at the centre lane, people are at the intersection wanting to get on the bus but the light is red so they can't cross and they see the advance turn light for the vehicles are not letting the vehicles advance straight through the intersection so they figure I can make it before oncoming traffic comes, but they don't realize that cars are making U turns and might not see them. I think that somewhat sums it up.</p> <p>We believe that having many more vehicles making left hand turns and U</p>

			<p>even aware of what is planned and being voted on.</p> <p>██████ you mentioned in your email on Aug 4,2021 that in the virtual meeting on June 4,2021 city staff have identified an opportunity for a signalized access on Markham Rd. Please note that it does not show up in the summary of the meeting produced by Metrolinx and we have found that many of the ideas that were talked about are missing from the summary.</p> <p>This shows to us that this process is not being done in a fair and open process. Metrolinx gives us 60 minute virtual meetings but starts off the meetings with a half hour presentation on how wonderful their proposal is and we get virtually no time to get our points across, I guess that's the plan.</p> <p>Regarding the proposed signalized access on Markham Rd., it appears the proposed location does not even line up with any of our existing driveways and would require us to do major relocations of our driveways to make them line up!! Would there be financial compensation to cover these costs?</p>	

**Durham-Scarborough Bus Rapid Transit
Public Correspondence Summary Table**

Date	Contact	Comment Summary	Date / Response	Action / Commitments
			<p>Sure, a signalized access on Markham Rd. connected to our property would help the community in and out of a couple of our properties but would do nothing to help the other businesses up and down Ellesmere Rd, all the way to McCowan and Markham Rd. Just throwing in an extra traffic light or two will do nothing to relieve the added volume on these two roads including Progress Ave., which will worsen if the Metrolinx plan goes into effect.</p> <p>We feel the city planners should be working for the best interest of the Scarborough/Guildwood community not the interest of outside groups. (Metrolinx)</p> <p>Also mentioned in the virtual meeting, was that Metrolinx will be organizing an one-on-one meeting with the [REDACTED]. We had reached out to Metrolinx for a meeting by email on July 8th, 2021 and have had no reply or response as of yet. This is what we find Metrolinx does, and if it does not fit with their agenda to bad for you. They said they wanted to have meeting with us but where are they?</p>

		<p>When the future expansion of the transit network is considered, community feedback is important, valued and must be heard.</p> <p>The Durham-Scarborough Bus Rapid Transit ("the BRT") route is a proposed 36km bus corridor between Durham Region and Scarborough, connecting with TTC services at Scarborough Town Centre and the UTSC site, including the future 3-stop Scarborough Subway. The corridor is expected to have more than 215,000 additional residents and 66,000 jobs by 2041. BRT will aid in connecting the Durham-Scarborough communities by improving travel times and increasing bus arrival reliability, by way of constructing a dedicated laneway separate from traffic.</p> <p>At this time, MPP Thanigasalam will always ensure that his constituent's voices are heard on the issues that matter the most to them.</p> <p>That is why he's in constant communication with Metrolinx and the Ministry of Transportation and will continue to do so throughout the project development process for the DSBRT.</p> <p>He understands and recognizes the unique character of the Highland Creek</p>	<p>Could you give me some examples of the companies which will be providing the estimated 66,000 additional jobs before 2041, apart from colleges and university campuses?</p> <p><i>C. Rapati responds on 2021-10-07.</i></p>

		<p>the residents and no one can have two cars. Where are the visitors and commercial clients going to park? All the bike riders will have plenty of parking spaces as they will have 846 bike parking spaces. This is great for city planners that believe everyone should be riding bikes even through the winter months. What a joke. I hope the planners know that developers put that into their proposals not because they believe that it is a reality, but if they don't the city would give them a harder time with the rezoning.</p> <p>Are all these condos and the impact of all these extra vehicles even being considered in your proposal? I don't see it anywhere. Oh yes, no true traffic studies are being done. Is that correct?</p> <p>██████ it seems that any questions and comments I make seem to be fall on deaf ears. Are they too hard to answer? Are they not relevant? Am I just a small cog in Metrolinx big plans to be answered? Doesn't the community and the businesses of Scarborough/Guildwood have the right to know what mess is coming to their lives and livelihoods?</p>

		<p>Scarborough/Guildwood residents and M1H postal codes?</p> <p>Why is Metrolinx still planning to do virtual meetings? Virtual meetings are controlled and don't let everyone have their say. Everyone should have a clear understanding as to what is going to effect them for the years to come. In our last meeting, Metrolinx gave us a one hour time limit, and they use up most of the time promoting this terrible project and we get a few minutes to say how wrong it is. I guess that works for Metrolinx.</p> <p>Please don't use the excuse that it has to be a virtual meeting because of Covid-19. Arrangements to have a safe mask to mask meeting in a large facility or open air grounds somewhere in Scarborough should not be that difficult to arrange. To be fair, equal time should be allotted to all parties for and against this proposal. All meetings should be held in an open forum . If you still see that being a problem than all meetings including the Transit Project Assessment Process (TPAP) and all voting should be put on standby till open meetings can be held. Is Metrolinx willing to do that so everyone is heard? I think I know the answer to that, but would like to hear it from Metrolinx. it is most evident that they just</p>

2021-09-21	[REDACTED]	Why is the Ellesmere Road segment 3 between Meadowvale Road and Military Trail proposed to be 6 lanes when segments 2 and 4 are not? Segment 3 is where houses are on both sides of Ellesmere and are closest to the street and where many old mature trees are. If it's because of traffic from UTSC to 401 then that traffic should be routed up Morningside Ave to 401 rather than through an established residential area?	On 2021-09-24, S. Cardenas responds: Thank you for your email. The draft preliminary design presented in Fall 2020 for Public Information Centre #3 proposed 6-lanes for Ellesmere Road from Meadowvale Road to Military Trail (https://www.metrolinxengage.com/en/content/toronto-west-turn-around).	Submitted via Metrolinx Engage. Added to project mailing list.

**Durham-Scarborough Bus Rapid Transit
Public Correspondence Summary Table**

Date	Contact	Comment Summary	Date / Response	Action / Commitments
		<p>In Ajax, along the DSBRT route, there is a segment of Kingston Road that passes through the old established Pickering Village area where houses are closest to the street and where many old mature trees exist. In that Pickering Village area section of Kingston Road there are only 4 lanes of mixed traffic even though there are 6 lanes of traffic on Kingston Road both east and west of that section. It is recognized that the Pickering Village section should not be bisected by a 6+ lane road. Why is the Ellesmere Highland Creek section of the DSBRT designed so differently when the road widening issues are so similar? Like Pickering Village, Highland Creek should be respected as a quiet stable residential community and NOT be bisected by and unneeded expansion of Ellesmere Road to 6+ lanes.</p> <p>There is no bus transit barrier down the middle of Highway 2 Kingston Road in Pickering or Ajax. The DSBRT there is in the curb lanes. Why is it considered necessary, in Scarborough, to build a barrier down the middle of Ellesmere Road in Highland Creek where there is even less room, more side streets and more driveways to contend with? Why is this project treating the Ellesmere Road section</p>	<p>Based on the feedback we heard from the community, and in consultation with City of Toronto, the preliminary design has been refined to maintain 4-lanes on Ellesmere Road from Meadowvale Road to Military Trail. That design proposed 2 centre-median bus lanes (one in each direction) and 2 general traffic lanes (one in each direction), with dedicated left-turn lanes at signalized intersections. The proposed design also includes new wider, accessible sidewalks and cycle tracks on both sides of Ellesmere Road from Military Trail to Kingston Road.</p> <p>The refined preliminary design will be available within the next week and will be posted on www.metrolinxengage.com.</p> <p>The sections of curbside bus lanes along Highway 2 in Pickering and Ajax were designed as a “quick start” transit priority project. Durham Region designed these with the conversion to centre-median bus lanes as the ultimate configuration. As part of the Durham-Scarborough BRT project, all of Highway 2 in Pickering and Ajax will</p>

		<p>so differently than the Pickering and Ajax Kingston Road sections?</p> <p>For the area south of 401 and north of Ellesmere Road between Meadowvale Ave and Moorish Road, does Metrolinx understand that, with left turns from side streets blocked by a center median on Ellesmere Road, almost all drivers from this area wishing to go east on Ellesmere Road will be funnelled onto Euclid which has schools at both ends? To increase traffic around school zones seems nonsensical and dangerous.</p> <p>Does Metrolinx understand that pushing the project to expand Ellesmere Road to the width of a six lane expressway is on par with what was attempted many decades ago when Highway 400 was proposed to be extended south to the Gardner Expressway through residential neighbourhoods? Forcing expressways or 6 lane arterial roads through quiet established residential neighbourhoods not designed for them should not be considered.</p> <p>The 905 Express Bus works fine with curbside painted bus lanes and minimal construction and costs. Why should the DSBRT route on Ellesmere Road be any different? Ellesmere should stay 4 lanes</p>	<p>be converted to centre-median bus lanes.</p> <p>Metrolinx worked with GTHA municipalities to review and assess the transportation needs of various corridors in the GTHA including Ellesmere Rd/Highway 2, Sheppard Avenue. Higher capacity transit is needed to link communities and employment across the Toronto and Durham boundary. Ellesmere Road and Highway 2 was identified and selected for Bus Rapid Transit as it provides unparalleled connectivity to existing downtowns and future Urban Growth Centres, several post-secondary institutions on Ellesmere Road, and the TTC subway extension as shown in Figure 1. This route also builds on the investments by Durham Region to date in the PULSE Route 900 service and infrastructure.</p> <p>To keep informed on upcoming public engagements or to speak to a Metrolinx Community Engagement Specialist, email DSBRT@metrolinx.com or visit www.metrolinxengage.com/engagement/dsbrt.</p>

		<p>through the residential sections of Highland Creek. If it's necessary to have a 6 lane Express bus route then Sheppard Ave is the obvious place to build it. Sheppard Ave was designed with the necessary room for expansion without destroying neighbourhoods. It can connect with the subway at McCowan Road and Sheppard Ave and even continue to the Don Mills Subway station.</p> <p>Right now, even in rush hour, there is not much traffic along segment 3 of Ellesmere Road. It rarely takes more than a 10 second wait to make a left turn onto Ellesmere Road from a side street. Segment 4 of Ellesmere Road is presently only 2 lanes but it is never busy and easily handles the traffic. You could double or triple the traffic along Ellesmere Road in Highland Creek without the need to widen it. To widen it to 6 lanes is overkill in the extreme and an unnecessary waste of resources. Widening Ellesmere Road to 6 lanes would slash the community in half and diminish the quality of life in the area. It's a destructive and expensive solution to a problem that doesn't exist.</p> <p>Could you publicly respond to all these points and also respond publicly to all the issues pointed out in a full page public</p>

2021-10-06		<p>On 2021-10-06,  emails:</p> <p>I am writing in regards to Metrolinx's Durham-Scarborough Bus Rapid Transit project. My main concern is Metrolinx's proposal to address the pinch point from Elizabeth's St to Rotherglen St in the Pickering Village.</p> <p>It is my understanding that Metrolinx's plans are awaiting approval and provincial funding. As a homeowner along this corridor, I have many concerns regarding how this expansion will impact me and other property owners in this area. I would appreciate knowing what considerations will be implemented, if a go ahead is given, to ensure safe access from and to our driveways during and after construction, and what plans will be put in place to accommodate the reduction of a lane for west bound traffic.</p> <p>How do you as our Provincial representative plan to ensure that there will continue to be safe access to and from Kingston Rd ? Do you plan to ask for input from the people who reside or own businesses along this corridor before a final decision is made? Will you, as our local representative, and Metrolinx's keep us informed throughout the process? Does</p>		<p>Submitted via Metrolinx Engage.</p> <p>Added to project mailing list.</p>

		<p>Metrolinx or the Provincial government plan to do a proper review of traffic flow through this corridor? Are you and Metrolinx planning to hold live or virtual Public Zoom Meetings to allow input and facilitate a mutually agreeable process will be followed?</p> <p>While I realize change is not always easy or appreciated, I do hope Metrolinx, our Provincial Government and you, as our provincial representative, have investigated how this change of lane changes and expansion, one lane for west bound traffic, two lanes for east bound traffic and two bus lanes between, will affect traffic flow and property owners, It is my understanding that Metrolinx did a Traffic Flow Study around June 2020 at the height of Covid stay at home policies. Is a second review planned now that traffic is almost back to normal?</p> <p>I strongly encourage you, as our provincial representative, to review this request by Metrolinx for funding and approval of the present proposal and to insist that another more realistic study of traffic flow be required With a more current and realistic study of Metrolinx's present proposal and probable consequences, i believe a more viable solution to Metrolinx's wants can be</p>

		<p>found and that this can be done with little or no adverse effects to historic Pickering Village, it's businesses, residents and the hundreds of vehicles who use this corridor on a daily basis.</p> <p>For example : Has Metrolinx thought of widening White's Road south or Liverpool in the City of Pickering to Bayly and using Bayly for its thoroughfare This could easily be done with very little interruption to businesses and the few houses along Bayly. Bayly would accommodate Metrolinx's buses with little or no conflict with the present traffic flow. This would allow easier access to the Pickering and Ajax terminals and accommodate better bus flow in all directions.</p> <p>I believe this would be a more economical solution and a win-win for everyone.</p> <p>Kingston Rd would remain as is. a roadway accommodating the present traffic flow, would act as an alternate route when the 401 is blocked and would continue to respect the historic nature of the Pickering Village.</p> <p>gal look forward to hearing from you at your earliest convenience regarding this matter.</p>

		<p>are single family homes with beautiful mature trees lining the street. Widening the road and removing these trees would make it undesirable for residents to enjoy walking along this stretch of Ellesmere. Instead of a peaceful, quiet walk that many of us enjoy we will experience noise, congestion. and safety issues for our children.</p> <p>Alternative options include utilizing highway 2A through military trail or morningside avenue to UTSC for the BRT. Both of these routes would make use of pre-existing infrastructure and help revitalize the highland creek village. The second option that many others have suggested is having the BRT travel through an already widened Sheppard avenue. The BRT would be able to access Northeast Scarborough Community Centre along with many other commercial buildings.</p> <p>Additionally, the proposed route through Ellesmere offers no long-term development opportunities. Given the increase in development applications around Highway 2A and Kingston Road and Sheppard Avenue, as well as the planned future Eglinton East Corridor, I believe the project committee has not provided an adequate analysis on why this route was selected</p>	<p>smoothing traffic flow and improving road safety.</p> <p>Traffic analysis undertaken for the project, which will be available as part of the final Environmental Project Report, does not indicate any significant increase in neighbourhood traffic. Some residents may change their travel patterns to adjust to the BRT lanes, but as the neighbourhood is quite self-contained this traffic is primarily generated by your local neighbours.</p> <p>Access to the plaza is provided from Ellesmere and from Morrish. The driveway along Ellesmere will still provide right-in and right-out capability. If approaching from the west drivers will have the option to turn left to Morrish and use the north entrance, or make a U-turn on the dedicated signal phase and turn right into the driveway on Ellesmere. The U-turn movement would also provide access to the library. Exiting the library will require drivers to proceed west to the next signal before making a U-turn to travel east. Some neighbourhood drivers will also alternate routes through the local</p>

		<p>aside from the desire to decrease transit time by a few minutes for students.</p> <p>If alternative routes are not an option please consider decreasing the following:</p> <ul style="list-style-type: none"> •Number of lanes. We don't need 4 additional lanes for traffic as this stretch of highland creek does not have this many vehicles passing through. •Invest in streetscape, please consider design elements that would be appealing to residents who are affected. Details and high quality investment in landscaping (e.g. planters, high quality curbside materials and sidewalk treatment). •Please adhere to the vision zero adopted by city council. Separated bike lanes are essential for human safety. •Ensure that the metrolinx bus lanes will be a shared resource with TTC vehicles and fairs should be integrated and equitable. <p>Please reconsider your current proposal and route for the BRT as this not only influences the character and liveability of Highland Creek but also represents an opportunity to invest in much needed transit infrastructure in Scarborough.</p>	<p>community to access the plaza and library.</p> <p>Alternate routes were reviewed in prior projects, as part of the both the 2041 Regional Transportation Plan and the Initial Business Case. The corridor currently being studies was found to be the most efficient and cost effective to encourage transit use and reduce the levels of future road congestion. As discussed at the meetings, the primary east-west demand in the area is for travel along the Ellesmere/Highway 2 corridor, and options that divert the service away from this corridor attract fewer future transit trips.</p> <p>The roadway east of the UTSC campus will not be widened and will remain as a four-lane roadway, with one lane in each direction for general traffic and one lane in each direction for the BRT. The proposed central median will look very much like the traffic islands at the corner of Ellesmere and Morrish, where the traffic light poles are mounted. The median will be a typical road curb with a concrete surface between the curbs. This will not form a barrier and still</p>

		parking lot design concept? Please advise as to where we are in the project plan so that I do not miss the opportunity to engage regarding this very important phase of the project.	<p>preliminary design business case work will be completed by Spring 2022.</p> <p>We have added you to the project email list, so you will receive future project notifications.</p>	
2021-06-11		I don't see anywhere in your new designs that speak to accessibility. I am a disabled senior. I use a mobility scooter to travel and my scooter is not accommodated by current transit buses. These buses can accommodate smaller scooters and wheelchairs but not bigger model scooters. I am a user of Durham Region Specialized Transit however it does not afford me the option of traveling to Scarborough Town Centre. Are there any proposals in your illustrious plans that will accommodate people like myself. I find that we are often overlooked in all aspects of travel, business access and a host of others barriers.	<p>On 2021-08-03, DSBRT Project team responds:</p> <p>Thank you for your inquiry regarding accessibility.</p> <p>The buses that will operate on the DSBRT are of the same general configuration as those operating on PULSE today. The accommodation of larger model scooters and other mobility devices will be looked at during the detailed design phase of work.</p> <p>We recommend contacting the DRT Specialized Services to inquire about options for travel into Toronto. This will likely involve a transfer between DRT Specialized Services and TTC Wheel-Trans.</p> <p>https://www.durhamregiontransit.com/en/routes-and-schedules/on-demand-specialized.aspx</p>

		<p>mistakes often happen. I can only imagine that accidents are frequent and delay the transit system more often than traditional roads. How often are pedestrians hurt? I see no difference in the design of the DSBRT.</p> <p>The recent changes to Kingston Road and Morningside are providing questionable benefits. Traffic is far more congested because of the reduced number of lanes. People sometimes ignore the rule that you cannot drive on the red portions of the road so that they can jump ahead. This causes anger in other drivers and an accident just waiting to happen. I do not believe the rules are being enforced as there are insufficient police to monitor this and I would think that it would be quite a low priority if they did observe a rule breaker. Such a waste of time and tax payor money.</p> <p>All this type of design does is make it more difficult for drivers and pedestrians to get around the city. It makes the city less friendly overall. It takes money out of the pockets of tax payors who realize little, if any, benefits. The city seems to be trying to "encourage" people to use cars less frequently and the transit system more frequently. I do not believe this is working. Rather, I will continue to drive (as will most others).</p>	<p>As the population grows, so will traffic and congestion. Bus rapid transit provides an alternative to car use, reducing traffic congestion, as well as greenhouse gas emissions.</p> <p>Bus Rapid Transit was identified as the preferred transit technology to link Durham Region and the City of Toronto through the Durham-Scarborough Bus Rapid Transit Initial Business Case (IBC), and was identified in the 2041 Regional Transportation Plan.</p> <p>Metrolinx is working with Durham Region, Durham Region Transit (DRT), City of Toronto and the Toronto Transit Commission (TTC) on the planning and design of this rapid transit corridor.</p>

		<p>Note: I was a daily user of the TTC for 29 years. I've used the buses, and could not stand them. I stopped using buses after a few years. I started driving to the subway and proceeded with the TTC when I could take a subway - it's the only way to provide massive transit to the public - in my opinion. After using the TTC I used GO Transit trains for the last 5 years that I was a transit user. No buses. To this day, if I want to head downtown, I will either drive, take a GO train or take the subway. As driving becomes more difficult with these "wonderful" new transit plans being initiated, I've chosen to take my business to Pickering or Markham - places where my drive is not hampered by the new surface transit designs.</p> <p>The bottom line... I'm not impressed and very unhappy about the use of tax payor money to pay for such useless changes to the infrastructure.</p>		
2021-09-29	[REDACTED]	<p>I like the shared curb lane alternative. How is the transition from 2 centre lanes to 2 curb lanes proposed to be accomplished? What would the transit stops in the Village look like and where would they be located?</p>	<p>At any transition point in or out of median lanes, there would be an appropriately designed transition zone. A sample of this approach can be seen at the UTSC campus in Appendix A1.1 (Sheet: TOR_14 and TOR_15) of the DSBRT Environmental Project Report (https://www.metrolinxengage.com/en/content/durham-scarborough-bus-</p>

2021-10-07	[REDACTED]	<p>As you can see from my signature line, I have a business located on [REDACTED]. There have been many rumours amongst my neighbors as to whether the Metrolinx Bus Rapid Transit Project has proposed widening the road along this section of Kingston Rd. Currently, my location and many of my business neighbors, have very little room between the front of our buildings and the road and I am quite concerned that any roadway expansion would bring Kingston Rd right up to my front door.</p> <p>Is there a plan to widen the road in this area?</p>	<p>On 2022-02-22, J. Stenner responds:</p> <p>The first design concept proposed no widening of Highway 2 between Rotherglen Road and Elizabeth Street, to minimize impacts to private property and the Heritage Conservation District. In response to that concept, we heard concerns about traffic congestion from the public and Town of Ajax staff.</p> <p>The design through the Pickering Village area balances heritage, traffic capacity, and transit priority through a five-lane cross section. This will require widening the road by one lane. Property impacts have been investigated and while it does bring the road and sidewalk closer to the buildings on either side of the road, there will still be space between the building facades and the street.</p> <p>For the detailed preliminary design, please see Appendix A1.3 of the DSBRT Environmental Project Report (https://www.metrolinxengage.com/en/content/durham-scarborough-bus-</p>

			<p>rapid-transit-environmental-assessment).</p> <p>The extent of property impact will be confirmed through the detailed design process. Consultation with property owners will occur as the project proceeds to detail design.</p> <p>For more information on the project we encourage you to visit Metrolinx Engage: https://www.metrolinxengage.com/en/engagement-initiatives/durham-scarborough-bus-rapid-transit and subscribe to our Toronto East and Durham Region e-newsletter(s) here: https://metrolinx.us4.list-manage.com/subscribe?u=e3e2dcbefa63d1ca424de38bb&id=d003ab5b57</p>	
2021-10-07	[REDACTED]	<p>Hi: we own 2 properties on the [REDACTED] During information sessions with downtown business and property owners a design with a combined westbound Bus/Car lane, a dedicated car eastbound lane and an enhanced pedestrian zone on the north side were presented. I just received an undetailed notice regarding information sessions coming up in October and went to your website to look at the design drawings and they seem to have changed and now</p>	<p>On 2022-02-22, J. Stenner responds:</p> <p>Thank you for your inquiry.</p> <p>In Whitby, between Byron Street and Brock Street, the preliminary design includes one westbound lane, which will be for buses and general traffic, and two eastbound lanes (one dedicated for buses only and one for general traffic). This configuration was developed during several rounds of</p>

		<p>show no traffic lanes in that block, a platform on the north side and an enhanced pedestrian zone on the south side. If that is the case, it was done with no notification to downtown property and business owners. Can you please clarify for me asap?</p>	<p>consultation and meetings with Town staff, local businesses and residents, the travelling public, and Durham Region Transit. The preliminary design will create space for wider sidewalks in Downtown Whitby, while providing transit priority and maintaining vehicle access.</p> <p>The website includes an archive of previous design options, so you may have been referencing an older concept. A recording overviewing the current preliminary design can be found here: https://www.metrolinxengage.com/en/dsbrtLIVEMay20</p> <p>You can find the detailed preliminary design of the area in Appendix A1.4 (Sheet: WHT_10) of the DSBRT Environmental Project Report (https://www.metrolinxengage.com/en/content/durham-scarborough-bus-rapid-transit-environmental-assessment). Or use our interactive map to see the design: www.dsbrtmap.ca.</p> <p>Consultation with property owners will occur as the project proceeds to detail design. If any property needs are</p>

			<p>identified, formal negotiations will be initiated.</p> <p>For more information on the project we encourage you to visit Metrolinx Engage: https://www.metrolinxengage.com/en/engagement-initiatives/durham-scarborough-bus-rapid-transit and subscribe to our Durham Region e-newsletter here: https://metrolinx.us4.list-manage.com/subscribe?u=e3e2dcbe63d1ca424de38bb&id=d003ab5b57</p>	
2021-10-12	[REDACTED]	Will these BRT areas be delineated as MTSA's in future policy?	<p>On 2022-02-22, J. Stenner responds:</p> <p>MTSAs are defined in the Provincial Growth Plan as "The area including and around any existing or planned higher order transit station or stop within a settlement area; or the area including and around a major bus depot in an urban core. Major transit station areas generally are defined as the area within an approximate 500 to 800 metre radius of a transit station, representing about a 10-minute walk." There are eight MTSAs proposed within Durham, four of which will be established along the future GO East extension to Bowmanville at Thornton's Corners, Ritson Road,</p>

			<p>Courtice, and Bowmanville. The four existing MTSAs are located around the Pickering, Ajax, Whitby and Oshawa GO train stations.</p> <p>You can read more about Durham Region's proposed policy directions for MTSA's here: https://www.durham.ca/en/regional-government/resources/Documents/Council/Reports/2020-Committee-Reports/Planning-and-Economic-Development/2020-P-27.pdf</p>	
2022-02-23	[REDACTED]	<p>On 2022-02-23, J. Stenner responds to the correspondence from 2021-11-26:</p> <p>For this segment of the corridor detail design work has not commenced.</p> <p>Tentative construction timelines are as follows – construction of median transit lanes in Pickering will begin in the spring of 2023, through the segments of Dixie to Bainbridge and Steeple Hill to Delta. The remaining segments of Kingston Road in Pickering will follow, with completion anticipated in summer 2027.</p> <p>I've looped in the Project Manager, Kristin Demasi from Metrolinx and David Dunn from the Region of Durham who can assist with connecting you to the Project Manager</p>
