

Phase II Environmental Site Assessment of 11 & 13 Hollis Street

March 20, 2023 - April 14, 2023

The Eglinton Crosstown West Extension is one of four new subway projects that will transform transit in our region; getting people where they need to be better, faster and easier.

WHAT WORK IS HAPPENING HERE?

The scope of work is for the Phase II Environmental Site Assessment and Designated Substances Survey, which includes the removal of a section of wooden fence at 1 Hollis Street and 11 & 13 Hollis Street to allow a small drill rig into the backyards of 11 & 13 Hollis Street, the drilling of four (4) - 50ft deep boreholes and installation of monitoring wells, and reinstalling of the wooden fence section. Development and sampling of the monitoring wells will follow; but does not require the use of any equipment. All the work will be confined to 11 & 13 Hollis Street and access will be through 1 Hollis Street as represented by the yellow arrows on the map above.

- Staff will be onsite between March 27 and April 14 from 7am to 7pm, Monday to Friday.
- Private locates (sweep of the area using handheld equipment) and site reconnaissance (assessment of proposed drill locations), and Designated Substance Survey (review of interior of buildings to obtain samples) will occur from March 20-March 24.
- The drilling work will occur from March 27-31, with the development of the wells from April 3-7.
- Sampling of the wells will occur from April 10-14.
- Work may be rescheduled or extended due to weather conditions or unforeseen circumstances.

WHAT TO EXPECT:

- Impacts to traffic will be minimal (i.e., short-term lane diversions).
- Pedestrian paths will be kept clear.
- No vegetation will be affected.
- No large equipment will be used.
- Little disruption to the adjacent properties aside from construction noise.

IMPACTS:

- Drilling noise expected during normal daytime operations (7am-7pm).
