

# King-Liberty GO: Geotechnical Investigation along Kitchener GO Line

## Beginning Early March 2023

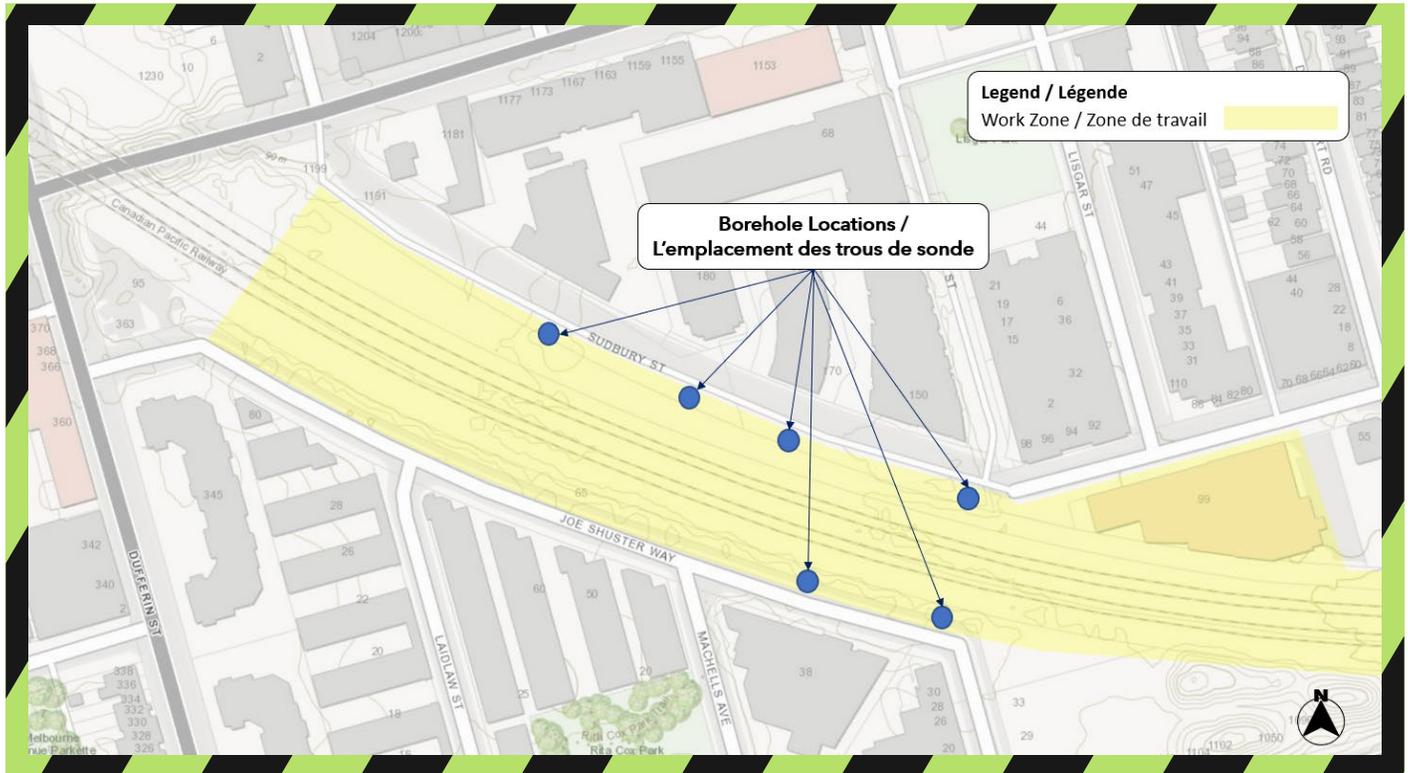

Figure 1: Map showing the approximate work zone for geo-technical drilling along the Kitchener GO Rail Corridor. Not to scale. For illustrative purposes only.

### Geotechnical Investigations

As part of early works for the SmartTrack King-Liberty GO station, crews will be drilling vertical boreholes to complete a geotechnical investigation to the north and south of the rail corridor, near the future site of the SmartTrack King-Liberty GO station. The investigation activities will inform future construction work.

### The New SmartTrack King-Liberty GO Station

SmartTrack is bringing five new GO stations to Toronto, leveraging roughly 40 km of Metrolinx's pre-existing GO rail corridors within Toronto. The program is a collaboration between the Province of Ontario, City of Toronto, and Metrolinx that will transform heavy rail infrastructure in Toronto from a regional commuter service into an urban rapid transit network, expanding your local network, creating new possibilities, and bringing you improved access to locations across the city.

The new SmartTrack King-Liberty GO Station will be located on King Street West near Hanna Avenue and Atlantic Avenue, on the Kitchener GO rail corridor.

## Hours of Work

Work is expected to occur Monday to Friday between 7:00 a.m. and 5:00 p.m.

Work may be rescheduled or extended due to weather conditions or unforeseen circumstances.

## What to Expect

Crews will use a drill rig to perform the investigation works. The work zone will be safely delineated.

Customers and residents may experience some noise and vibration from construction vehicles and equipment. Site-based noise mitigation measure will be implemented to minimize the disruption as much as possible.

## Traffic & Pedestrian Details

No impacts to motorists, cyclists, or pedestrians are anticipated during this work.

## Transit Information

No impacts to TTC, or other public transit modes are anticipated during this work.
