

# Subsurface Utilities Engineering investigations at Jane St. and Eglinton Ave. West

**Scheduled start:** May 15, 2023 to May 26, 2023

**Timing:** From 8:00 a.m. to 4:00 p.m.

## Map of work area

## What is happening?

- Metrolinx is undertaking Subsurface Utility Engineering (SUE) work. This work involves investigation, documenting, and mapping existing underground utility networks such as pipelines and cable lines and retrieving information on existing conditions to determine when and how to relocate subsurface utilities. This work reduces the likelihood of existing utilities being damaged by new construction projects.

## What to expect

- One or more lanes at Jane St. and Eglinton Ave. W. will be occupied by staff, vehicles, and equipment during site for a short period of time per day.
- No tree or vegetation removals are required for the work.
- There will be no major property or pedestrian impacts associated with this work.
- Sidewalks within work areas will be maintained.
- Work may be delayed or rescheduled due to inclement weather or unforeseen circumstances.

## About the project

- The Eglinton Crosstown West Extension will bring even more rapid transit to Etobicoke and Mississauga, making it easier for people to get where they need to be each day.
- The extension of the Eglinton Crosstown LRT will run 9.2 kilometres from the Mount Dennis station to Renforth Drive and will operate mainly underground. Once complete, it will create a continuous rapid transit line that stretches from Scarborough, through midtown Toronto, and into Mississauga.
