

# Construction Notice

# Sheppard Ave West Bridge

May 2023 to September 2023

Construction works occurring on Sheppard Avenue West Bridge, located between Bakersfield Street and Chesswood Drive.

## Project Overview

GO Expansion will transform the GO Transit rail network into a rapid transit experience on core segments of the network. Future network connections will help people connect to jobs, family and to more destinations across the region.

As part of the GO Expansion Program, Metrolinx plans to bring two-way, all-day service every 15 minutes or better, between Union Station and Bradford GO, and service every 30 minutes

up to Barrie. The Barrie Railway Corridor Expansion (BRCE) project involves enabling infrastructure for future service increases, including civil works such as new track, station improvements, grade separations, and utility relocations. The enabling infrastructure are being implemented as part of several separate construction contracts under the BRCE Project.

### **What You Need to Know**

Metrolinx will be completing construction works at the Sheppard Avenue West Bridge, including widening the rail bridge to provide for an additional set of tracks. To prepare for the main works, we will be excavating the road, constructing bridge footings and piers, and reinstating the road after the works are complete.

To support these works, one (1) lane will be closed in both east and west directions. One (1) lane in both directions will remain open for traffic. No detours will be required and there will be no impacts to driveways or intersections.

---

### **WHAT TO EXPECT**

- Limited weekend works.
- One (1) lane closure in east and west directions.
- One (1) lane in both directions will remain open for traffic.

### **HOURS OF WORK**

- 7AM to 7PM, Monday to Friday.
- Limited weekend daytime works.

### **TRAFFIC DETAILS**

- One lane closure in east and west directions.
