

# Kipling-Eglinton Station

The Eglinton Crosstown West Extension will bring the Eglinton Crosstown LRT 9.2 kilometres farther west, creating a continuous rapid transit line from the east end of Toronto into Mississauga.

Metrolinx is designing the light rail transit stations to foster a positive passenger experience across the alignment. Kipling-Eglinton station is one of four underground stations. Its design allows for an open plaza, a concourse and a platform, with integrated lighting, wayfinding and passenger assistance intercoms.

## Kipling-Eglinton station snapshot

- Accessible underground station on the northwest corner of Kipling Avenue and Eglinton Avenue West
- One accessible entrance on the west side of Kipling Avenue
- White/grey colour scheme and pops of orange colour on the exterior, consistent with the Eglinton Crosstown
- Bird safe vertical glass windows
- “T” marker to identify the Metrolinx network
- Ticket machines to purchase or reload Presto Card

## Station access features

-  Wayfinding to help passengers orient themselves and navigate through the station
-  Connections to bus routes
-  Up and down escalators from entrance level to platform level
-  Two elevators
-  Close to Eglinton Ave West multi use trail providing active transportation connections to transit

## Public spaces

Wi-Fi  
connection

40 bicycle parking  
spaces

Benches

Passenger  
Assistance Intercom

*\*Design is conceptual; all renderings are illustrative and subject to change*

## Sustainable station landscaping

- Station designed to minimize impact on the woodlot
- The station area will be landscaped to make the space inviting
- Trees will be planted on the boulevard south of the station, to help capture stormwater, provide shade and improve air quality
- Sustainable landscaping in station plaza including native trees, raised planters and ornamental grass planting
- Green roof provided for all station buildings per the Toronto Green Standard (requires up to 80% green roof line wide)
- Natural ventilation in the station to conserve energy and be more environmentally friendly
- Energy efficient station lighting

## Station identity

Like all other stations on the alignment, the new Kipling-Eglinton station will be recognizable as part of Line 5 (the Eglinton Crosstown LRT line). Together with municipal stakeholders, Metrolinx considers how to make each station site safe, convenient, and pleasant for users.

Metrolinx is seeking input on unique elements of the community to determine any opportunity to reflect local character into the Eglinton Crosstown West Extension project.
