

Monitoring device installation on Berkeley Street and King Street East

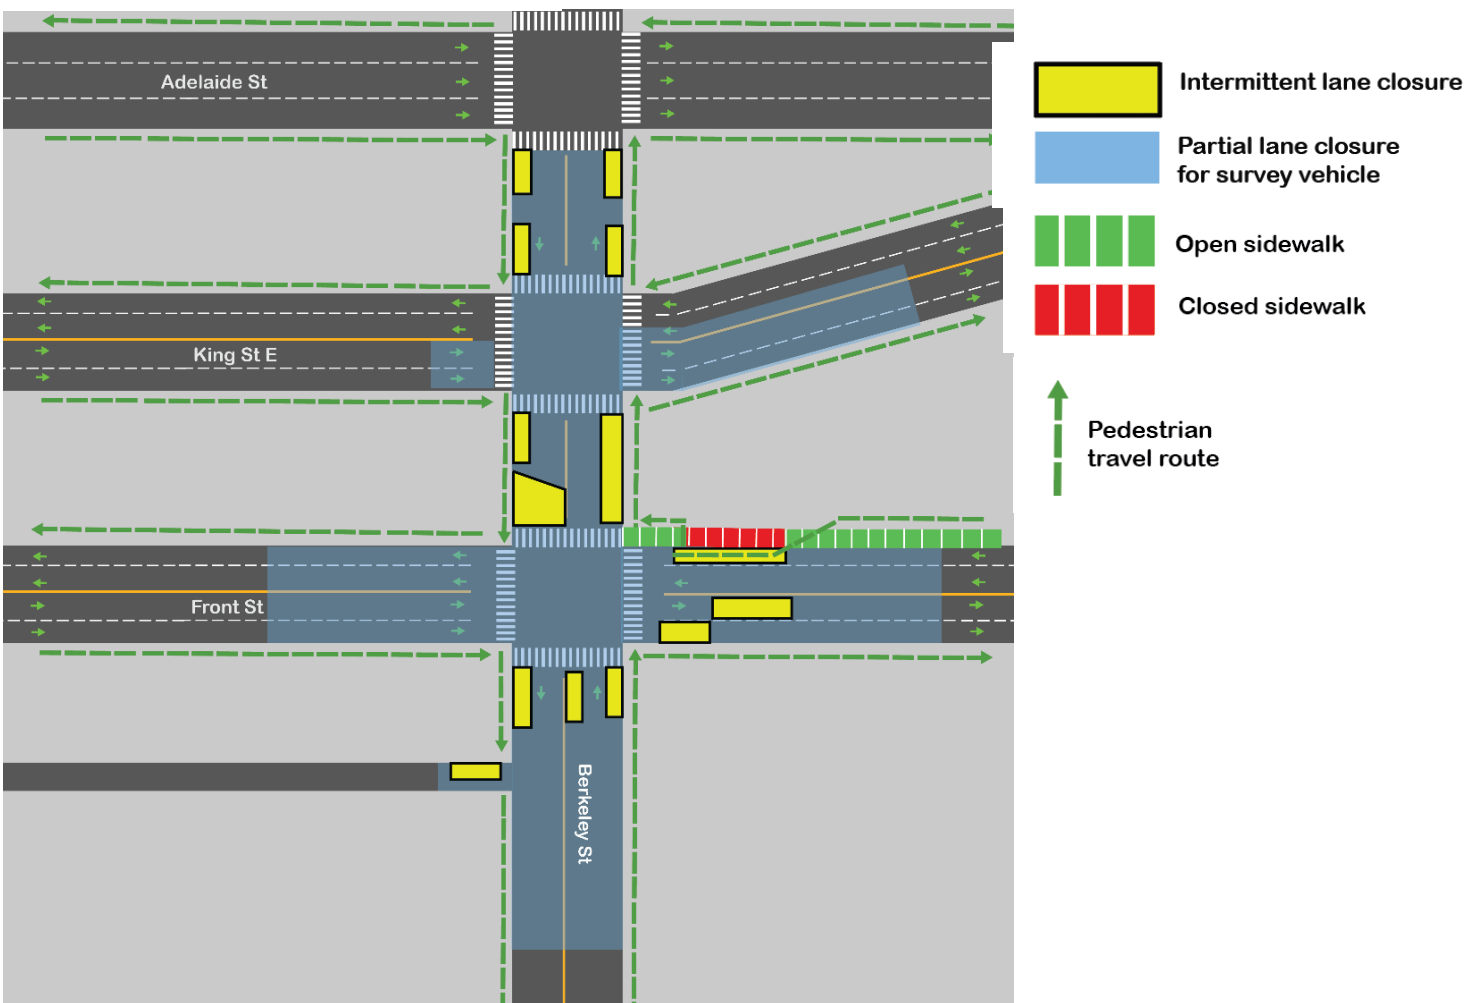

Expected start date: As early as October 19, 2023

Expected completion: Approximately five (5) weeks

Hours of work: Berkeley Street: Weekdays from 7 a.m. to 7 p.m.

King Street: Weekdays from 9 a.m. to 4 p.m.

Map of work area:

PLEASE SEE BACK OF NOTICE FOR MORE DETAILS

What is happening?

- Construction crews will be surveying utilities and conducting sewer inspections in the areas shown in yellow on the map above.
- Work crews will drill several holes on Berkley Street and King Street East to install monitoring devices in preparation for future construction of the Ontario Line.
- This monitoring is necessary to test and monitor the ground conditions under the street during the construction of the Ontario Line subway tunnels.
- Work is expected to take place during the daytime hours on weekdays between 7 a.m. and 7 p.m. on Berkley Street and from 9 a.m. to 4 p.m. on King Street

What to expect

- There will be intermittent closures of sidewalk and traffic lanes around active work zones; only one section will be closed at a time to minimize impacts.
- Nearby residents and businesses can expect to hear continuous noise related to concrete drilling, a hydrovac truck and the use of heavy equipment while work is being undertaken. Crews will take measures to minimize noise impacts wherever possible.
- After each work shift, each area will be securely covered and marked for safety until workers return or the work is complete. The areas will be returned to public use upon completion of the monitoring device installation.
- All the necessary construction permits have been obtained.
- Work may be delayed or rescheduled due to unforeseen weather conditions.
- As always, please take care when travelling near work sites.
- For more information about upcoming station work please see [Metrolinx.com/Ontarioline](https://www.metrolinx.com/Ontarioline) or sign up for the e-newsletter.

About the project

- 15.6-kilometre subway line that will make it faster and easier to travel within Toronto and beyond.
- 15 stops and more than 40 connections to other transit, including GO train, subway, LRT, streetcar, and bus lines.
- Less than 30 minutes from one end of the line to the other.
- 28,000 fewer cars on the road each day.
- Sure, here are those points in plain language:
