

Geotechnical Instrumentation and Monitoring Program at Pape Station

Expected start date: November 8, 2023

Expected duration: 6 months

Hours of work: 8:00 a.m. to 5:00 p.m.

Days of work: Monday to Friday

What is happening?

- To advance design concepts and other structural plans for the Ontario Line, Metrolinx will be establishing a baseline monitoring on pre-installed monitoring points for the Geotechnical Instrumentation and Monitoring Program.
- Geotechnical instrumentation refers to the various instruments that are used to monitor geotechnical structures, sites, and the environment and to protect existing adjacent structures (e.g., rail tracks, underground utilities).
- There are no anticipated impacts to traffic, pedestrians, or cyclists.

- Equipment will not be left on-site outside of work hours.
- All necessary permits have been obtained.
- Work may be delayed or rescheduled due to inclement weather or unforeseen circumstances.

About the Ontario Line

- 15.6-kilometre subway line that will make it faster and easier to travel within Toronto and beyond.
- 15 stops and more than 40 connections to other transit, including GO train, subway, LRT, streetcar, and bus lines.
- Less than 30 minutes from one end of the line to the other.
- 28,000 fewer cars on the road each day.
