

# Phase one: Cycle Track construction on Eglinton Avenue West, between Jane Street and Weston Road

**Scheduled start:** Early December, 2023 to late May, 2024.

**Timing:** Weekdays, 7:00 a.m. – 5:00 p.m. Limited night work is expected.

**Map of work area:**

## What is happening?

- Crews working on behalf of Metrolinx will be constructing a new, bi-directional cycle path on the south side of Eglinton Avenue between Jane Street and Black Creek Drive.
- The cycle track will be broken up into two phases. Phase one of the cycle track will be constructed between Jane Street and Weston Road.
- The new cycle track will replace the existing cycle track on the north side of Eglinton Avenue during the construction of the Eglinton Crosstown West Extension.
- The existing cycle track on the north side of Eglinton Avenue will remain open until the south side track is completed.

## Hours of work

- Work will take place in early December 2023 from Monday - Friday, between the hours of 7:00 a.m. and 5:00 p.m.
- A limited amount of overnight work will be required.
- Construction of the new cycle path will take approximately five months to complete.
- Work may be delayed due to weather or unforeseen circumstances.

## What to expect

- The existing sidewalk on the south side of Eglinton will be removed and a new cycle path will be constructed.
- Construction will begin at Jane Street and move east towards Weston Road and will include concrete breaking (demolition), hauling, saw cutting, drilling formwork installations, and concrete pours.
- Noise from construction equipment including trucks, excavators, jackhammers, saws, and loaders can be expected.
- The majority of work will be done during the day, with the exception of line painting, and installation of concrete barriers which will be done overnight in order to complete the work safely and efficiently while minimizing impacts to vehicular traffic.
- Traffic and pedestrian access will be temporarily impacted. Short-term temporary closures will be communicated through on-site signage if required. Pedestrians will be directed to available sidewalks, crosswalks, and bus stops.
- Remember to reduce your speed when approaching work zones and watch for slow-moving vehicles entering and exiting work areas.

## About the project

- The Eglinton Crosstown West Extension will bring even more rapid transit to Etobicoke and Mississauga, making it easier for people to get where they need to be each day.
- The extension of the Eglinton Crosstown LRT will run 9.2 kilometers from the future Mount Dennis LRT station to Renforth Drive and will operate mainly underground. Once complete, it will create a continuous rapid transit line that stretches from Scarborough, through midtown Toronto, and into Mississauga.
