

St. Clair - Old Weston GO

Overnight Utility Daylighting

December 02 to December 08, 2023

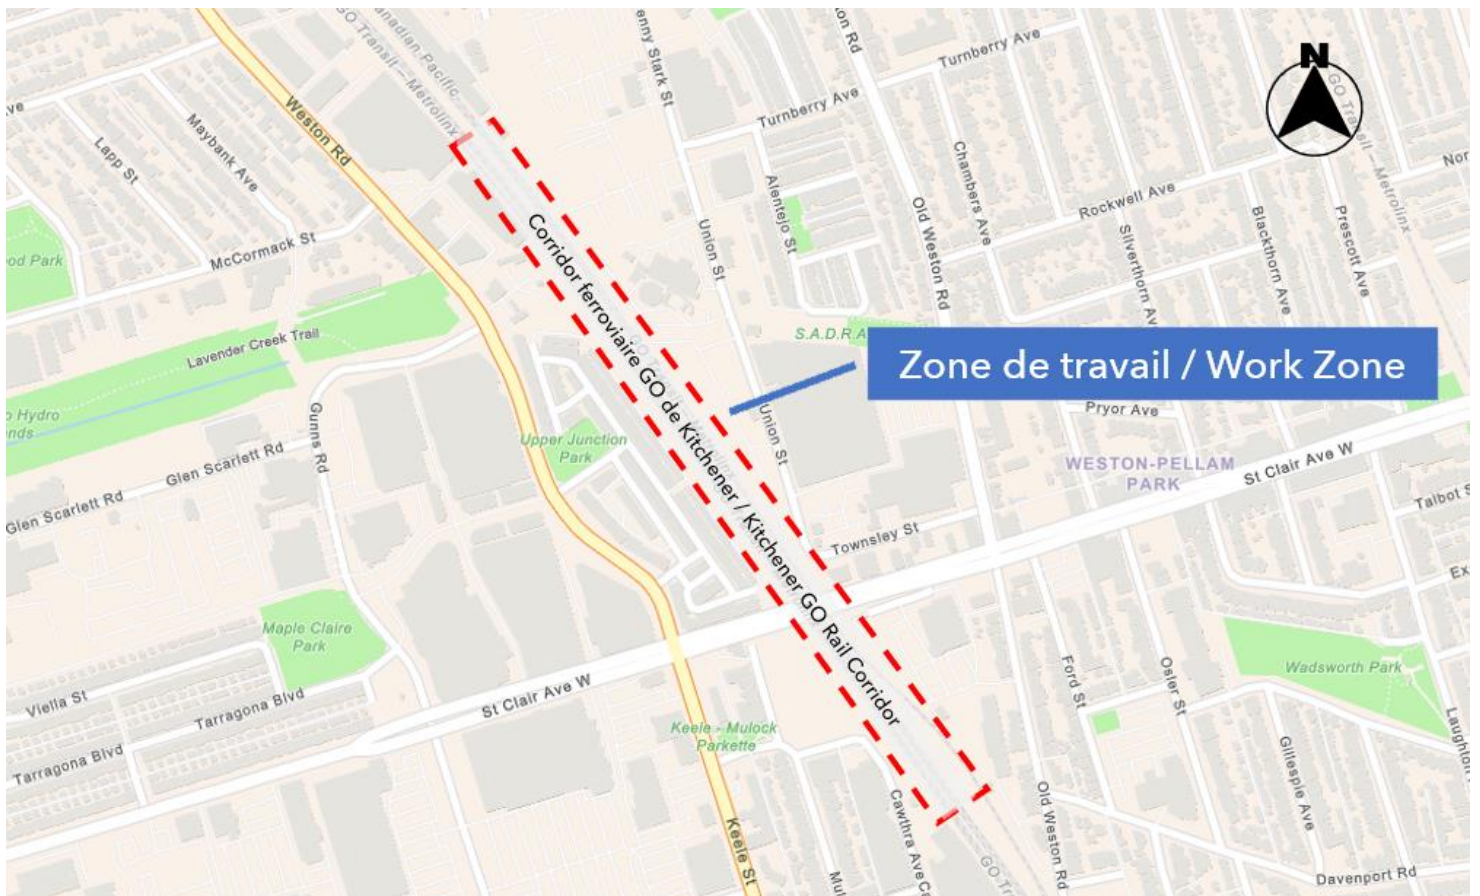

Figure 1: A map depicted the approximate work zone. Not to scale. For illustrative purposes only.

What Is Happening

As part of early works for the future SmartTrack St. Clair - Old Weston GO station, crews will be conducting subsurface utility engineering investigations in order to accurately establish the locations of buried utilities. Crews will use a hydro excavation truck (hydro-vac) to open several test-pits within the rail corridor in order to daylight the utilities and record their locations. When the work is complete, all the test-pits will be back-filled and closed. Because this work is taking place in an active rail corridor, overnight work will be required.

Project Overview

SmartTrack is bringing five new GO stations to Toronto, leveraging roughly 40 km of Metrolinx's pre-existing GO rail corridors within Toronto. The program is a collaboration between the Province of Ontario, City of Toronto, and Metrolinx that will transform heavy rail infrastructure in Toronto from a regional commuter service into an urban rapid transit network, expanding your local network, creating new possibilities, and bringing you improved access to locations across the city.

The new SmartTrack St. Clair-Old Weston GO Station will be located on Union St. north of St. Clair Ave West, between Bloor and Mount Dennis GO stations on the Kitchener GO rail corridor.

WHAT TO EXPECT

- The hydrovac truck will be used to open test-pits and expose buried utilities.
- Residents should expect some noise, vibration, and dust.
- Site lighting will also be used for the duration of the work.
- We will take all reasonable measures to minimize disturbances to residents.

HOURS OF WORK

- Day work is expected to take place between 7:00 a.m. and 5:00 p.m.
- Overnight work is expected to take place between 7:00 p.m. and 5:00 a.m.
- The work will take approximately 6 days to complete.
- Dates may be rescheduled to inclement weather or unforeseen circumstances.

LOCATION OF WORK

- The work will take place entirely within the Kitchener GO Rail Corridor between approximately Turnberry Ave McCormack

St. to the north; and Davenport Rd to the south.

PEDESTRIAN DETAILS

- Please watch for slow-moving construction vehicles and equipment which may be entering/exiting the work zone.

TRAFFIC DETAILS

- Please watch for slow-moving construction vehicles and equipment which may be entering/exiting the work zone.

TRANSIT INFORMATION

- There are no transit impacts at this time.

COMMUNITY ENGAGEMENT

- Metrolinx has a dedicated community engagement team in place that works with residents and businesses in the Toronto West area.
- If you have any questions, please contact us using the information provided below.
