

# Removal of Utility Aerial Attachments in Rail Corridor near Main Street

December 20, 2023

## Project Overview?

GO service is expanding to serve you better - with more frequent service, more stations, cleaner technology, and more connections. Across the entire network, our goal is to deliver over 10,000 train trips a week - so you won't need a schedule because you know the next train will be coming soon. GO Expansion will transform the GO rail network from a commuter service into an all-day, rapid system.

## The Local Project

As a part of the GO Expansion Utility Early Works project, crews will be removing existing aerial attachments from utility poles within the Stouffville rail corridor. The work is part of the larger GO Expansion Program, which includes \$11 billion in early work projects currently underway to add more stations, tracks, and enhance the customer experience.

## What to expect

On December 20, 2023, Metrolinx contractors will remove an existing aerial attachment from poles within the Metrolinx right of way near Edward Street and Blake Street. **The contractor will be on site Wednesday from 9:00 a.m. to 11:15 a.m.** Nearby residents may experience increased noise levels as the work is being completed.

The south sidewalk on Main St. running parallel to the worksite will be closed for a short duration to complete the overhead work. Pedestrian barriers will be in place, as well as laborers to assist the pedestrian traffic. We apologize for the inconvenience and thank you for your patience as we complete the necessary work.

## Questions

We have a dedicated community relations team in place to work with residents and businesses in York Region. If you have any questions or concerns about this work, please contact us anytime at [YorkRegion@metrolinx.com](mailto:YorkRegion@metrolinx.com).
