- Garrick McIntosh
- Julia Orsini

OVERVIEW:

The Metrolinx and OTG teams hosted a virtual meeting for the King/Bathurst CLC on December 7, 2023. The meeting commenced with **Metrolinx/Bradley Naismith** welcoming attendees, offering a land acknowledgement and sharing a safety moment for walking or biking near active construction in the area.

After this introduction, **Metrolinx/Bradley** provided updates on the action items from the November CLC meeting regarding TTC stop impacts, King Street traffic impacts, how to access the online interactive map for the new subway line and timelines for both immediate and overall construction work for the area and the entire line. **Metrolinx/Bradley** also confirmed that the presentation decks from past meetings will be available online.

OTG/Dante Mejia proceeded by sharing construction updates with attendees, including discussing completed and in-progress work for the King/Bathurst Cross Section and heritage façade retention preparation. From there, he outlined upcoming work surrounding ongoing utilities monitoring and preparation for site piling and major site excavation in the new year. He indicated that the team will provide more details on the excavation process at the next meeting.

After the construction update, **Metrolinx/Bradley** ended the meeting by highlighting the extensive community engagement planning that is underway for 2024 and displaying the contact information of the engagement team should attendees be keen to reach out.

There were no questions from attendees on the information shared at the meeting. The next meeting will take place in early 2024. Metrolinx will communicate when a date has been chosen in due time.

ACTION ITEMS:

- **Metrolinx** to communicate the date and time of the next meeting happening in the new year.
