

Monitoring device installation on Fraser Ave

Expected start date: December 11, 2023

Expected duration: Up to 4 days

Hours of work: Daily from 7 a.m. to 7 p.m.

Map of work area:

What is happening?

To prepare for construction of the Ontario Line connecting to Exhibition Station, crews will be undertaking several activities on and Fraser Avenue, south of Liberty Street.

- Construction crews will be surveying utilities and conducting sewer inspections in the areas shown in yellow on the map above.
- Work crews will drill several holes on Fraser Avenue to install monitoring devices in preparation for future construction of the Ontario Line.
- This monitoring is necessary to test and monitor the ground conditions under the street during the construction of the Ontario Line subway tunnels.

What to expect

- There will be intermittent closures of sidewalk and shifting of traffic lanes on Fraser Avenue, south of Liberty Street; only one section will be subject to work crews at a time, to minimize impacts. Access to area residential and commercial units will be maintained.
- Tenants and local traffic will have access to workplaces. Entrances, laneways and driveways will not be blocked, and vehicles requiring access will be escorted by work crews.
- Nearby residents and businesses can expect to hear noise related to concrete drilling, a hydrovac truck and the use of heavy equipment. Crews will take measures to minimize noise impacts wherever possible.
- Work areas will be secured and covered at the end of the day. The areas will be returned to public use upon completion of the monitoring device installation.
- A paid-duty officer will be on-site to direct both pedestrian and vehicle traffic.
- Pedestrian traffic will be redirected to the west side of Fraser Ave. The east sidewalk on Fraser will be closed during the work period.
- Barriers will be used to separate pedestrian/passageways areas from active traffic lanes.
- All necessary construction permits have been obtained.
- Work may be postponed or rescheduled due to unforeseen circumstances.
- For more information about upcoming station work please see [metrolinx.com/Ontarioline](https://www.metrolinx.com/Ontarioline) or sign up for the e-newsletter

About the Ontario Line

- 15.6-kilometre subway line that will make it faster and easier to travel within Toronto and beyond.
- 15 stops and more than 40 connections to other transit, including GO train, subway, LRT, streetcar, and bus lines.
- Less than 30 minutes from one end of the line to the other.
- 28,000 fewer cars on the road each day.
