

Sheppard Ave West Bridge Pier Construction

January 15 - January 19, 2024

Construction works occurring on Sheppard Avenue West Bridge, located between Bakersfield Street and Chesswood Drive.

Project Overview

The Barrie Double Track Enabling Works includes changes and upgrades to the existing rail corridor that will allow for the future installation of a second set of tracks to support two-way, all day service.

The Project Area is within the City of Toronto and goes from King Street West to the South and Steeles Avenue West to the north. Construction works will be occurring along Sheppard Avenue West Bridge.

What You Need to Know

Metrolinx will be completing construction works at the Sheppard Avenue West Bridge, including widening the rail bridge to provide for an additional set of tracks and constructing a new platform bridge to accommodate a second platform at the Downsview GO Station. To prepare for the main works, we will be installing lighting on the new and existing bridge piers. To support these works, one (1) lane will be closed in both east and west directions. No detours will be required and there will be no impacts to driveways or intersections.

WHAT TO EXPECT

- The work will be conducted as efficiently as possible to minimize disturbances.
- Some noise and vibration that is typical of construction activities. Residents and businesses near the work site can expect to hear noise caused by pickup trucks, man-lifts, and other construction equipment related to this work. Noise levels and vibration levels will be within Project requirements.

HOURS OF WORK

- 7AM to 5PM, Monday to Friday.

TRAFFIC DETAILS

- One lane closure in east and west directions.
