

Track Installation and Roadworks on Hurontario Street between Harborn Road and Eglinton Avenue

January 2024 to the end of December 2024

What work is taking place?

As construction on the Hazel McCallion Line Light Rail Transit progresses, crews will complete utility relocation and upgrades. Area residents and businesses can expect to see road widening activities on both sides of Hurontario Street in 2024. This will include:

- changes to the existing boulevard, driveways, sidewalks; and
- improvements to the multi-use pathway on the east side of Hurontario Street.

These activities will make room for guideway construction, track installation, and LRT stop construction in the centre of Hurontario Street, that will also be taking place throughout 2024. Track installation work at the intersections of Marketplace, Robert Speck Parkway, The Queensway and Matthews Gate are being scheduled for January 2024.

Most work is scheduled from Monday to Saturday from 7 a.m. to 7 p.m. and will take place within the staged area separated by traffic barrels and temporary fencing. Temporary closures of roadways at intersections will be required to ensure that crews onsite are able to safely complete the work. Some overnight and weekend work may also be required. Additional notification will be provided when there is a requirement for a temporary road closure, overnight, or Sunday work. We will also communicate with individual property owners concerning potential property access requirements such as utility connections and temporary driveway closures for final restoration and boulevard grading. Additional signage will also be placed to inform motorists and pedestrians about any sidewalk closures or changes to traffic configuration.

As construction staging moves to the centre of the roadway for guideway, track, and LRT stop construction, we remind the motorists that permanent turning restrictions will be implemented to ensure the safe flow of traffic. This means that left turns will be restricted to signalized intersections. Entering and exiting properties along Hurontario Street will require motorists to make right turns.

Metrolinx has a dedicated community engagement team in place to work with residents in Mississauga and Brampton during the construction of this transformational transit project. If you require the most up-to-date information, please reach out to peel@metrolinx.com. Phone line 416-202-7500.

TIMING

- Regular work hours are 7 a.m. to 7 p.m., Monday to Saturday.
- We will provide further notification to residents if work is scheduled overnight and on Sundays.

TRAFFIC DETAILS

- Watch for slow moving vehicles entering and exiting work areas.
- Property access will be mostly limited to right in/right out vehicular movements.
- Remember to reduce your speed when approaching work zones.

WHAT TO EXPECT?

- Every effort will be made to minimize disruptions.
- Residents and businesses near the work site can expect to hear noise and vibration caused by trucks, excavators, loaders, triaxles, backhoes, and other construction equipment related to this work.

- We will reach out to impacted property owners concerning potential property access requirements such as temporary driveway closures or utility connections.

TRANSIT DETAILS

- Visit www.miway.ca/updates and www.gotransit.com/schedules for updates.

PEDESTRIAN DETAILS

- Please take care when travelling near construction areas.
- Watch for additional signs directing pedestrians as detours may be required.
- Clear and defined walking paths will be maintained during construction to ensure pedestrian safety.
