

King-Liberty GO Station

GO Expansion

GO service is expanding to serve you better – with more frequent service, more stations, cleaner technology, and more connections. Across the entire network, our goal is to deliver over 10,000 train trips a week – so you won't need a schedule because you know the next train will be coming soon.

GO Expansion will transform the GO rail network from a commuter service into an all-day, rapid transit network.

SmartTrack

Complementing GO Expansion, SmartTrack is bringing five new GO rail stations to Toronto.

Leveraging roughly 40 km of pre-existing GO rail corridors within Toronto, SmartTrack will significantly expand the existing and planned transit network in Toronto.

This means there will be new rail stations closer to where you live in Toronto, to help get you where you need to go in the city, and beyond.

King-Liberty GO Station

- King-Liberty GO Station will be located on the Kitchener line between Union and Bloor GO stations.
- The station will feature an island platform with canopies, shelters and covered bike parking.
- Two pedestrian bridges that connect the new platforms to King Street, Sudbury Street and Joe Shuster Way providing increased connectivity in the neighbourhood.
- Increased access to multiple transit options, including TTC streetcar service on King and Queen Streets and local bus service.
- Single train connection to Union Station.
- Convenient access to destinations such as Woodbine, Guelph, and Kitchener.

What you need to know

- Work at King-Liberty GO Station is expected to begin in 2024.
- As part of the early work for this project:
 - Utility relocations will occur to support the station
 - In-corridor tree removals
 - Work to support the widening of the rail corridor such as grading, noise wall relocation, and retaining wall reconstruction

These changes will help support future service increases as part of the GO Expansion program.

Metrolinx will communicate with the community and customers to ensure they are aware of construction impacts. To ask a question about this project please e-mail our community engagement team.

SmartTrack Overview

SmartTrack will provide more reliable and convenient route options to shorten commutes and increase quality of life for locals and visitors alike.

The new stations are projected to bring 110,000 new daily riders to the rail network, and will provide easy access to more than 52 major regional destinations located within 800 metres of transit stations, including major shopping centres, community facilities and educational institutions.
