

# Construction activity at Kennedy Station

Schedule:

- West Ventilation Fan Plant piling: End of March - August 2024
- Tunnel Ventilation System Electric Building construction: End of March - End of December 2024
- Microtunnel boring: Mid-May - October 2024

*Note: all schedules approximate and subject to change*

Timing: Weekdays from 7:00 a.m. – 5:00 p.m.

## What is Happening

As part of ongoing Kennedy station enabling efforts to accommodate the Scarborough Subway Extension several works are upcoming, including:

- Tunnel Ventilation System Electric Building (TVSEB)
  - Crews will be drilling concrete piles underground to build the tunnel ventilation system electric building (TVSEB).
  - The TVSEB will help power Line 2 trains as they service the extension's three new stations.
- West Ventilation Fan Plant (WVFP)
  - Crews will be excavating and constructing the west ventilation fan plant (WVFP).
  - With the extension of Line 2 by nearly eight kilometres, additional ventilation is needed. The WVFP will ensure air quality remains high and provide required additional ventilation in the event of a fire.
- Micro-tunnel
  - The WVFP and the TVSEB will be connected by a micro-tunnel that will be built using a small tunnel boring machine. This tunnel will connect the electrical and communication systems for both buildings.

## What to Expect

- Residents and businesses near the Kennedy Station work site can expect to hear noise caused by the pile drill, trucks and other construction equipment.
- There is no anticipated need for any sidewalk closures, pedestrian detours or traffic flow restrictions while this work is underway.
- Work may be delayed due to weather conditions or unforeseen circumstances.
- Work areas will be clearly marked or fenced off as required to ensure public safety. Fencing will feature a slit cloth, where possible, to help control dust and debris.

## About the project

- A nearly eight-kilometre subway extension will extend line 2 further into Scarborough.
- Three new stops will have connections to up to six other transit options including TTC buses, GO train, GO buses, the Eglinton Crosstown LRT, Durham Region Transit, and the proposed Sheppard Extension.
- The extension will accommodate up to 105,000 daily boardings and put 34,000 more jobs within walking distance to rapid transit.
