

Drilling Works for Retaining Wall Installation

April 3, 2024 – April 24, 2024

The Local Project

As part of the GO Expansion project, improvements are coming to Aurora GO Station. Improvements include constructing a second platform, installing a second track, upgrading rail signals, building a new pedestrian tunnel with elevators, and installing tactile tiles on the existing east platform for improved accessibility.

To support these improvements, Metrolinx contractor **Grascan Construction Ltd** will begin drilling activities at 128 Centre and 19 Birch Court to support retaining wall installation.

What is happening?

Continuing the current work taking place at 128 Centre Street and 19 Birch Court, contractors will begin drilling works to install caissons which will establish a foundational structure for the future retaining wall.

What does this mean for you?

Work will occur Monday-Friday between the hours of 7:00am – 5:00pm. Weekend and overnight work may be required on occasion, but advanced notice will be given when this is necessary.

Work is scheduled to start on April 3rd and should be completed by the end of April. As with any construction, the start of this work may be adjusted due to weather conditions or unforeseen circumstances. Residents will be given notice if there's any significant adjustment to the timelines.

Nearby residents should expect increased noise levels and vibrations from heavy construction equipment such as drill rigs, loaders, excavators, and dozers within the corridor. Our staff will take reasonable precautions to minimize disturbances to residents. Contractors will use noise and vibration technology to monitor levels and ensure they do not exceed municipal limits.

We apologize for the inconvenience, and we ask for your patience as we complete this necessary work.

Questions

If you have any questions or concerns about this work, please contact us any time at YorkRegion@metrolinx.com.
