

Track undercutting between Markham GO Station and 16th Avenue

April 13, 2024 - April 14, 2024 (12:00 a.m. - 12:00 p.m.)

Metrolinx will be undertaking routine track maintenance work along the Stouffville rail corridor near Markham GO Station and 16th Avenue. As part of this work, we will be undercutting the tracks to remove and replace old ballasts (the material that supports track stability), to ensure proper drainage and a strong foundation. This work will be conducted by our corridor maintenance team, and it is necessary to keep our infrastructure in good shape.

What does this mean for you?

Work is being done overnight to safely replace worn-out ballast between Bur Oak Avenue and Castlemore Avenue during a larger track shutdown. Construction activities will take place from 12:00 a.m. Saturday, April 13, 2024, through to 12:00 p.m. Sunday, April 14, 2024.

Nearby residents may experience noise from the use of construction machinery and equipment (such as a surfacing tamper and ballast regulator). However, equipment will be outfitted with a white noise back-up alarm to ensure that noise levels are kept as low as possible.

Every effort will be made to minimize disruption. We understand that we are conducting rail maintenance in a residential area and that overnight work is not ideal. We appreciate your patience and will complete this critical work as efficiently as possible to get things back to normal for you.
