

Geotechnical Investigation

Kitchener-Waterloo Region

Metrolinx is bringing faster, more frequent service to the Kitchener Line. Construction is now underway on projects that will make way for improvements to bring two-way, all-day service from Union Station to Kitchener GO Station.

WHAT IS HAPPENING?

- Starting May 11, crews will be conducting overnight geotechnical investigations at the track level.
- Heavy equipment, such as drill rigs, excavators, and boom trucks will be required to core through components of the Grand River Railway Bridge to assess capacity of the structure.

WHAT THIS MEANS FOR YOU

- Over the May 11-12 and June 8-9 weekends, residents may hear noise throughout the late evening and into the early morning. Crews may be on site in between these dates and work could extend to June 30.
- Work will take place within the rail corridor. Vehicles and pedestrians will not be impacted.
- Please note construction schedules could change with short notice due to weather or unforeseen circumstances. The Community Engagement team will make every effort to provide advance warning of any changes. Construction notices are posted on our website: www.metrolinx.com/kitchener.

QUESTIONS

We understand that while necessary, this work is potentially disruptive to nearby residents. We appreciate your patience and understanding. Our Community Engagement team is available to answer your questions by email, Monday - Friday, 8:30 a.m. - 4:30 p.m. at WaterlooRegion@metrolinx.com.
