OVERVIEW:

On Tuesday, April 2, 2024, Metrolinx hosted a virtual Queen/Spadina CLC session meeting in partnership with OTG. Metrolinx and Ontario Transit Group (OTG) provided a construction update accompanied with awareness/safety tips about spring flooding. During the session, attendees were able to hear updates on current or upcoming work, the Hoarding installation in both sites and ask questions pertaining the neighbourhood. Metrolinx closed the formal presentation with information on how to contact their project team.

QUESTIONS:

- **The Downtown Yonge BIA took advantage of this CLC to introduce itself and ask Metrolinx to collaborate on the station's infrastructure and design, announcing its desire to involve the community in the Queen Spadina station project.**
- **A community member asked about signage to indicate the new TTC stop, mentioning that the new location is impossible to see or find, users don't know where the relocated streetcar stop is, no signs are visible regarding construction signs at this location.**

ACTION ITEMS:

- **Metrolinx** to coordinate a meeting with BIA downtown.
- **Metrolinx** to discuss with TTC and managing the signage traffic access for the pedestrians and users of public transportation.

Next meeting: May 7, 2024
