

# Tunnel boring machine disassembly at Scarlett Road

**Scheduled start:** May 2024

**Expected completion:** August 2024

**Timing:** Between the hours of 7:00 a.m. and 11:00 p.m., including overnight work as required

## Map of Work Area

## What is happening?

- The tunnel boring machines (TBMs), Renny and Rexy, used to excavate the tunnels for the Eglinton Crosstown West Extension will complete the mining of the twin tunnels when they arrive at the extraction shaft just west of Scarlett Road and Eglinton Avenue West.
- After Renny and Rexy complete their tunnelling at the extraction shaft, crews will begin dismantling the TBMs.

## What to expect

- A crane will be on site transferring the TBM parts out of the extraction shaft and placing them on a large flatbed truck during the day. The truck will then remove the TBM parts from the site overnight.
- Nearby residents can expect to hear noise from equipment, such as a crane, drilling, hauling trucks, and generators.
- Construction lighting will be used when overnight work is necessary.
- Work may be delayed due to unforeseen circumstances. Residents will be provided with updates as they are made available.
- The information provided in this notice is anticipated based on the current construction schedule and is subject to change.
- Remember to reduce your speed when approaching work zones and watch for slow-moving vehicles entering at exiting work areas.
- There will be no traffic or pedestrian impacts.

## About the project

- The Eglinton Crosstown West Extension will bring even more rapid transit to Etobicoke and Mississauga, making it easier for people to get where they need to be each day.
- The extension of the Eglinton Crosstown LRT will run 9.2 kilometres from the Mount Dennis station to Renforth Drive and will operate mainly underground. Once complete, it will create a continuous rapid transit line that stretches from Scarborough, through midtown Toronto, and into Mississauga.
