

Emergency Egress Construction at Aurora GO Station

June 17-28, 2024- (7:00 am - 5:00 pm)

Work zone area 1

Work zone area 2

Information as of: June 11, 2024

Project Overview

GO service is expanding to serve you better - with more frequent service, more stations, cleaner technology, and more connections.

Across the entire network, our goal is to deliver over 10,000 train trips a week - so you won't need a schedule because you know the next train will be coming soon. GO Expansion will transform the GO rail network from a commuter service into an all-day, rapid system.

What You Need to Know

Metrolinx is continuing to make progress on upgrades to the Barrie rail corridor in support of GO Expansion!

Crews have temporarily extended the station's platform to offset construction impacts near the north end during station improvements. Crews have now begun constructing an emergency egress to support the platform extension. This is necessary work to ensure customer safety at Aurora GO station. These improvements will boost service at Aurora GO and across the Barrie line, to get you where you need to go faster and easier.

What to expect

Nearby residents may experience some noise and vibration from the use of heavy construction equipment, including excavators and a dump truck. The entrance and exit at 54 and 70 Industrial Parkway will remain open at all times during work.

Work will begin in work zone 1, and, once completed, move to work zone 2. To accommodate and ensure safety, the work zones will occupy an area on the boulevard and the southbound lane. A flagger will direct the start and stop of traffic and a spotter will be stationed south of the driveway at 70 Industrial Parkway. Traffic control will be set up daily from 7:00 am - 5:00 pm.

Questions

We have a dedicated community relations team in place to work with residents and businesses in the York Region. If you have any questions or concerns about this work, please contact us anytime at **YorkRegion@metrolinx.com**.
