Project Overview

GO service is expanding to serve you better - with more frequent service, more stations, cleaner technology, and more connections.

Across the entire network, our goal is to deliver over 10,000 train trips a week - so you won't need a schedule because you know the next train will be coming soon. GO Expansion will transform the GO rail network from a commuter service into an all-day, rapid system.

What you need to know

Metrolinx is continuing to make progress on upgrades along the Barrie rail corridor in support of GO Expansion, bringing you faster, better service to get you where you need to go.

As part of the work at Maple GO Station, we will be installing a bridge girder at the Major Mackenzie rail bridge to support the bridge structure and smaller beams.

What to expect from October 21st to 27th

Major Mackenzie Drive will be reduced to one lane in each direction, starting the evening of October 21st through to October 26th, and will undergo a **temporary full road closure on October 26th and 27th**. These road closures are necessary as we install a bridge girder at the site of the future Major Mackenzie Pedestrian Bridge.

A traffic management plan will be in place to allow vehicles and cyclists to navigate through or around this area of the street smoothly when lane closures occur. Detour signage will be in place along Major Mackenzie Drive before and after the portion of the road to be closed. During the full road closure, drivers will be directed to bypass this portion of the road via Hill Street on the East and Keele Street on the West. There will also be two paid duty York Regional Police officers scheduled to promote traffic safety and flow of commuter traffic.

Surrounding communities can expect to experience noise associated with general construction activities, including the use of a crane. Every effort will be made to mitigate impacts associated with this work. Communities will be notified if this changes at any point.

We understand that we are conducting work near a residential area and that road closures are not ideal. We appreciate and thank you for your patience as we work to get you where you need to go, faster and easier.

Questions

We have a dedicated community relations team in place to work with residents and businesses in the York Region. If you have any questions or concerns about this work, please contact us anytime at **YorkRegion@metrolinx.com**.

Write to us at: YorkRegion@metrolinx.com
