

Finch-Kennedy GO Station

GO Expansion

GO service is expanding to serve you better – with more frequent service, more stations, cleaner technology, and more connections. Across the entire network, our goal is to deliver over 10,000 train trips a week – so you won't need a schedule because you know the next train will be coming soon.

GO Expansion will transform the GO rail network from a commuter service into an all-day, rapid transit network.

SmartTrack

Complementing GO Expansion, SmartTrack is bringing five new GO rail stations to Toronto.

Leveraging roughly 40 km of pre-existing GO rail corridors within Toronto, SmartTrack will significantly expand the existing and planned transit network.

This means there will be new rail stations closer to where you live in Toronto, to help get you where you need to go in the city, and beyond.

Finch-Kennedy Station

- Finch-Kennedy GO Station will be located on Finch Avenue East, between Milliken Boulevard and Midland Avenue, on the Stouffville line.
- A new rail bridge over Finch Avenue will support future two-way, all-day rail service on the Stouffville line, while keeping motorists, pedestrians and cyclists moving safely along Finch Avenue.
- The station will feature:
 - Two GO train platforms with canopies and heated shelters to keep passengers warm and dry
 - Bike parking
 - A passenger pick-up and drop-off (PUDO) area with a dedicated accessible PUDO
 - Two new bike lanes and sidewalks under the rail bridge
 - Station access structures, with elevators and stairs on both sides of Finch Avenue East, for convenient access to the station

- Two dedicated bus lanes at the station, allowing customers to seamlessly connect to the TTC

What you need to know

- Work at Finch-Kennedy GO Station is already underway, which includes:
 - Track and signal work
 - Civil works, such as grading, drainage, noise walls and utility relocations

These changes will support future service increases under the GO Expansion program.

Metrolinx will communicate with the community and customers to ensure they are aware of construction impacts. To ask a question about this project please e-mail our community engagement team.

SmartTrack Overview

SmartTrack will provide more reliable and convenient route options in Toronto to shorten commutes and increase quality of life for locals and visitors alike.

The new stations are projected to bring 110,000 new daily riders to the rail network, and will provide easy access to more than 52 major regional destinations located within 800 metres of transit stations, including major shopping centres, community facilities and educational institutions.
