

DELAYED: Tunnel Ventilation System Test at Keelesdale Station

DELAYED UNTIL FURTHER NOTICE

Project Overview

Metrolinx's Eglinton Crosstown LRT will be a new 19-kilometre light rail transit line in midtown Toronto. With 25 stations and stops along the dedicated route, getting across town will be up to 60% faster than before. The Crosstown will link to 54 bus routes, three TTC subway stations and GO lines, providing important transit connections to get people to where they need to go faster than ever before.

What You Need to Know

The Tunnel Ventilation System testing previously scheduled for Tuesday, October 15, 2024, at Keele Station will now be delayed until further notice. The Tunnel Ventilation System helps release smoke in the event of a fire and/or other emergencies while providing fresh air to the tunnel and station. No changes to the traffic or pedestrian routes are expected. An updated notification will be provided when a new testing date is confirmed. Upon completion of this work short-term periodic lane reductions may be required on Eglinton Avenue West to facilitate special activities.

WHAT TO EXPECT

- An updated notification will be provided when a new testing date is confirmed.

HOURS OF WORK

- The Tunnel Ventilation System testing previously scheduled for Tuesday, October 15, 2024, at Keele Station will now be delayed until further notice.

TRAFFIC DETAILS

- No changes to the current traffic routes are expected as a result of this testing.

PEDESTRIAN DETAILS

- No changes to the current pedestrian routes are expected as a result of this testing.

TRANSIT INFORMATION

- Access to TTC will be maintained at all times.
