

Hurontario LRT

Construction Liaison Committee Update

Cooksville | June 2022

Thank you for continuing your participation in the Hurontario LRT Construction Liaison Committee. We will be providing our CLC members with a digital update this month (see below).

Our next email update will be scheduled for July 2022.

ONGOING CONSTRUCTION:

Utility and Road Works

The installation of watermain, storm, and sanitary systems continues in various areas along the west side of Hurontario Street between The Queensway and Matthews Gate. Crews are currently installing a new watermain between The Queensway and Dundas Street. Watermain connections are also ongoing between Fairview Road and Burnhamthorpe Road.

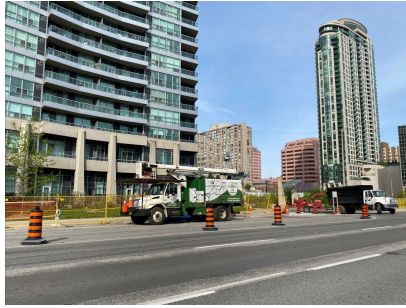

Please note that overnight watermain works in the area between The Queensway and Dundas have been completed and are now occurring during the daytime.

Lane reductions are in effect along Hurontario Street throughout the project corridor. We encourage motorists to plan for delays and recommend entering properties by turning right to get in and exiting properties by turning right to get out. Please follow the signage in place and do not use private laneways and plaza parking lots as detour routes. For safety, pedestrians and cyclists are reminded to use designated crossings and intersections and are advised to avoid jaywalking at all times. Access to worksites is restricted to authorized personnel only, and members of the general public are not permitted to enter for safety reasons.

Tree Trimming, Protections, and Removals

The Hurontario LRT team has been working with an arborist to determine any tree impacts as construction moves forward to ensure proper arboriculture techniques are employed and to confirm protection or removal requirements for trees located along the boulevard. These requirements have been developed by a certified arborist in consultation with the City of Mississauga and Metrolinx.

Every reasonable attempt has been made to protect the trees we can as well as to reduce the need for tree removals. To minimize the impacts of construction on the natural environment, Metrolinx has fenced off public trees that have been identified by an arborist for protection.

City or private trees that need to be removed will be replaced in accordance with the City of Mississauga permit requirements. We will continue to work with private property owners on an individual basis for private tree impacts that have been identified on their property.

COMMUNITY ENGAGEMENT:

Community Walks

This summer, our community engagement team will be launching community walks with each of our CLCs. For Mississauga Cooksville, we are looking to walk in the area from Cooksville GO to Dundas Street on **Thursday July 21, at 11am**. If you or a member from your organization is interested in attending, please get in touch with our engagement team.

Out in the Community

With summer events starting up again, the community will see our communications team out. From libraries to movie nights, we'll be at a range of events in Peel. If your organization is hosting an event and would like our group to set up a table, please get in touch with our engagement team. To see a list of events we'll be at this summer, check out this blog [here](#)

Safety

Safety is our number one priority and a shared responsibility. Please note and follow construction signage as you walk, cycle or drive along Hurontario Street. Pedestrians are advised to only cross at signalized intersections and always walk on designated pathways.

Contact Us

If you have any questions or concerns, please feel free to reach out to Metrolinx Community Relations team at 416-202-7500 or email Peel@metrolinx.com
