

King City GO: Caisson Drilling

November 18, 2024 - March 28, 2025

7 AM - 5 PM, Monday - Friday

Project Overview:

GO service is expanding to serve you better - with more frequent service, more stations, cleaner technology, and more connections.

Across the entire network, our goal is to deliver over 10,000 train trips a week - so you will not need a schedule because you know the next train will be coming soon.

What You Need to Know:

We will be working weekdays at King City GO to conduct caisson drilling. This work will be conducted during daytime hours.

What to Expect:

Contractors will be working to reinforce the ground through caisson drilling to support future project infrastructure at the station. Residents may experience noise and vibration from the use of heavy construction equipment including generators, drill rigs, and concrete trucks.

Our best efforts will be made to have equipment only running when in use to reduce idling noise. Drilling work will only occur during the daytime to mitigate noise disturbances.

We understand that conducting work near a residential area is not ideal. We appreciate your patience and will complete this work as efficiently as possible to get things back to normal for you.

Questions:

We have a dedicated community relations team in place to collaborate with residents and businesses in the York Region. If you have any questions or concerns about this work, please contact us anytime at YorkRegion@metrolinx.com.
