

Underground support structure installation

Start date: Early December - Mid-September 2025

Hours of work: Monday to Friday 7:00 a.m. to 7:00 p.m., Saturday from 7:00 a.m. to 5:00 p.m.

Note: Work may be delayed or rescheduled due to weather conditions or unforeseen circumstances

What is happening?

- Work for the Scarborough Subway Extension is ongoing. Starting in December 2024, crews will begin constructing an intervention headwall (an underground support structure) near the location of the future emergency exit building.
- The work will be located on McCowan Road, between Ellesmere Road and Hurley Crescent, as shown on the map.

Vehicle diversions

- Construction at this site will occur in two phases. For the first phase of construction, traffic will be diverted to the east side of McCowan Road, with one lane of traffic in each direction, as shown in the map above. Traffic will be diverted to the west side of McCowan Road for the second phase of construction starting in March 2025.
- Diversions will be indicated with signage and barriers, and flaggers will be present.

What to expect?

- Expect noise from the on-site construction equipment, including a front-end loader, trucks, piling rigs, and other machinery.
- Traffic barrels, fencing, and barriers will be in place to separate and secure work zones.
- To ensure pedestrian and driver safety, construction crews will occasionally temporarily close traffic lanes and sidewalks along McCowan Road. Signage will alert drivers and pedestrians to these temporary closures and detours.
- Please take care when travelling near construction areas and watch for additional signs directing pedestrians. Clear and defined walking paths will be maintained to ensure pedestrian safety.

About the project

- A nearly eight-kilometre subway extension will extend Line 2 further into Scarborough.
- Three new stops will have connections to up to six other transit options, including TTC buses, GO train, GO buses, the Eglinton Crosstown LRT, Durham Region Transit, and the proposed Sheppard Extension.
- The extension will accommodate up to 105,000 daily boardings and put 34,000 more jobs within walking distance to rapid transit.
