

# Overnight Noise Wall Installation

## Zone 2

November 18, 2024 - January 17, 2025

### Project Overview

GO service is expanding to serve you better - with more frequent service, more stations, cleaner technology, and more connections. Across the entire network, our goal is to deliver over 10,000 train trips a week - so you won't need a schedule because you know the next train will be coming soon. GO Expansion will transform the GO rail network from a commuter service into an all-day, rapid system.

## What You Need to Know

The Barrie Double Track Enabling Works includes changes and upgrades to the existing rail corridor that will allow for the future installation of a second set of tracks to support two-way, all-day service.

The Project Area is within the City of Toronto and extends from King Street West to the south and Finch Avenue West to the north. Zone 2 extends from Davenport Road from the south to St. Clair Avenue West to the north.

Metrolinx will be completing construction work to provide for an additional set of tracks. To prepare for the main work, noise walls are being installed in the rail corridor in Zone 2. Noise barrier construction will include drilling of posts and installing noise barrier panels. Due to the proximity to tracks, some of the works must occur at night when there are no trains running.

### WHAT TO EXPECT

- All work will occur within the rail corridor with designated access routes for construction staff.
- Some noise and vibration that is typical of construction activities. Residents and businesses near the work site can expect to hear noise caused by trucks, backhoes and other construction equipment related to this work.
- All work will occur when there is no train service. Overnight work may result in disruptions to nearby residents consistent with small scale construction.
- Equipment lights and bright flood lights will be used during overnight work. Flood lights will be pointed downwards to minimize impacts to residents.
- Noise levels and vibration levels will be within Project requirements.
- Efforts will be made to minimize dust.

### HOURS OF WORK

- Works will occur Monday through Saturday, 10:00 p.m. to 7:00 a.m. These works will occur until January 2025.
- Daytime work activities will continue to occur during this period.

### TRAFFIC DETAILS

- There will be no traffic impacts.

### PEDESTRIAN DETAILS

- There will be no pedestrian impacts.

### Information as of: November 2024
