

In-ground Monitoring Point Installations on Lipton Avenue

Expected start date: As early as January 29, 2024

Expected completion date: February, 2024

Timing: Monday to Friday, 7:00 p.m. to 5 a.m.

Areas within the dotted red lines show where monitoring points will be installed for this work.

What is happening?

- As early as January 15, crews will begin installing in-ground geotechnical monitoring points overnight on Lipton Avenue.
- During the week of January 22, crews will also be installing in-ground geotechnical monitoring points from 7 PM to 9 PM on Pape Avenue.
- These points will be used to monitor underground utilities and groundwater levels during Ontario Line construction.
- Monitoring points will be installed in-ground within the roadway and sidewalks in the areas shown above in red.
- All necessary permits have been obtained and works will be monitored by Metrolinx representatives to ensure compliance.

What to expect

- Crews will be installing in-ground monitoring points on Lipton Avenue, Pape Avenue outside of Pape Station, and Danforth Avenue.
- Monitoring point installation will involve the use of hand tools, a mobile drill, a coring truck, and a hydro-vac excavator.
- Work will take place during evenings and overnight to reduce impacts on bus movements around the station.
- Short-term single-lane closures will be required. Flaggers will be on site to direct traffic around closures.
- Following monitoring point installation, crews will be visiting each monitoring point on a bi-weekly basis to gather data until summer 2024.
- A paid-duty officer will be on site as required.
- Work will require crews to occupy street parking spots. “No Parking” signs will be posted as required a minimum of one day in advance.
- Residents may experience noise from work equipment.
- Work may be delayed or rescheduled due to inclement weather or unforeseen circumstances.
- For more information about upcoming works, please see [metrolinx.com/ontarioline](https://www.metrolinx.com/ontarioline) or sign up for the e-newsletter.

About the Ontario Line

- 15.6-kilometre subway line that will make it faster and easier to travel within Toronto and beyond.
- 15 stops and more than 40 connections to other transit, including GO train, subway, LRT, streetcar, and bus lines.
- Less than 30 minutes from one end of the line to the other.
- 28,000 fewer cars on the road each day.
