

In-ground Monitoring Point Installations near Pape & Danforth

Expected start date: As early as January 15, 2024

Expected completion date: March 2024

Timing: Monday to Saturday from 7 a.m. to 7 p.m.

Some overnight work will be required from 9 p.m. to 6 a.m.

Areas within the dotted red lines show where monitoring points will be installed.

What is happening?

- As early as January 15, crews will begin installing in-ground geotechnical monitoring points in the vicinity of the Pape Ave & Danforth Ave intersection.
- These points will be used to monitor underground utilities and groundwater levels during Ontario Line construction.
- Monitoring points will be installed in-ground within the roadway and sidewalks in the areas shown above in red.
- All necessary permits have been obtained and works will be monitored by Metrolinx Representatives to ensure compliance.

What to expect

- Crews will be installing in-ground monitoring points at various locations along Pape Ave, Danforth Ave, Lipton Ave, Gertrude Pl, Muriel Ave, Eaton Ave, and in the Pape Station bus loop.
- Monitoring point installation will involve the use of hand tools, a mobile drill, a coring truck, and a hydro-vac excavator.
- Work on Lipton Ave, on Pape Avenue outside of Pape Station, and on Danforth Avenue will take place in evenings and overnight to reduce impacts on bus movements around the station. Work in all other areas will take place during daytime hours.
- Short-term single-lane closures will be required. Flaggers will be on site to direct traffic around closures.
- Following monitoring point installations, crews will be visiting each monitoring point on a bi-weekly basis to gather data until summer 2024.
- Paid-duty officers will be on site when crews are working within 30 metres of a signalized intersection.
- Work may require crews to occupy street parking spots. “No Parking” signs will be posted as required a minimum of one day in advance.
- Residents may experience noise from work equipment.
- Work may be delayed or rescheduled due to inclement weather or unforeseen circumstances.
- For more information about upcoming works, please see [metrolinx.com/ontarioline](https://www.metrolinx.com/ontarioline) or sign up for the e-newsletter.

About the Ontario Line

- 15.6-kilometre subway line that will make it faster and easier to travel within Toronto and beyond.
- 15 stops and more than 40 connections to other transit, including GO train, subway, LRT, streetcar, and bus lines.
- Less than 30 minutes from one end of the line to the other.
- 28,000 fewer cars on the road each day.
