

## Updated: Utility work at on Thornridge Dr & Yonge St between Old Jane St & Elgin St

**Schedule:** November 27 - January 30, 2025

**Timing:** 7:00AM to 4:30PM

### What is happening?

To support the Yonge North Subway Extension, Alectra will be relocating electrical cables on Thornridge Dr & Yonge St between Old Jane St & Elgin St. This work will support the construction of future project infrastructure and will be conducted by Black and MacDonald on behalf of Alectra.

### About the Yonge North Subway Extension

The Yonge North Subway Extension will transform the commute in York Region, Toronto and beyond by extending the TTC's Line 1 subway service north from Finch Station to Vaughan, Markham and Richmond Hill. This extension includes five confirmed subway stations along an extension of roughly eight kilometres.

### WHAT TO EXPECT

- Residents near the work sites can expect noise and vibrations associated with general construction activities and during intermittent use of hydro-vac trucks.
- Two southbound lanes will be closed, along with the left-turn lanes from John Street to Yonge Street during trenching work. Southbound traffic will temporarily use the northbound left-turn lane as a through lane.
- When curb lanes are closed, the adjacent sidewalk will also be closed. Wayfinding signage and barriers will be present to direct pedestrians.
- Intermittent driveway closures will be required. Access to businesses will be maintained, and advanced notice will be provided to businesses prior to work.
- If power interruptions are required during the electrical changeover, advanced notice will be provided by Alectra.

### METHODOLOGY

Crews will dig open trenches and install new underground electrical concrete-encased duct banks. New hydro poles will also be installed. The excavated area will be restored upon the completion of the work.
