

Operation of Tamping Machine for Sub-Ballast Work

December 11, 2024

Project Overview

GO service is expanding to serve you better - with more frequent service, more stations, cleaner technology, and more connections. Across the entire network, our goal is to deliver over 10,000 train trips a week - so you won't need a schedule because you know the next train will be coming soon. GO Expansion will transform the GO rail network from a commuter service into an all-day, rapid system.

What You Need to Know

As part of the improvement work for the GO Expansion project, as early as the 16th of December 2024, crews will commence sub-ballast operations within the rail corridor. The work will be on pause between the 20th of December 2024 until the 6th of January 2025 and recommence afterwards. This involves the usage of a tamping machine which packs the sub-ballast that is under the tracks. Proper installation of the sub-ballast is critical for ensuring the safe installation of tracks and operation future of trains. The schedule of work is subject to change based on weather conditions and unforeseen elements.

What does this mean for you?

Residents can expect to hear noises and experience vibrations from the operation of the tamping machine. The tamping machine operates linearly and **will move westbound starting from Woodbine Avenue to Coxwell Avenue**. All work will take place within the rail corridor and pedestrians will not be impacted by this work. We apologize for any inconvenience and ask for your patience as we complete this critical work.

Hours of Work

The work listed above will be done during the day. Day shift work will occur between the hours of 7:00 a.m. and 7:00 p.m. five (5) days per week (Monday to Friday). This work is anticipated to be completed by mid to late January 2025. Please exercise caution around active construction sites. We apologize for the inconvenience. If you have any questions or concerns about this work, please contact us any time at TorontoEast@metrolinx.com.
