

Updated: Utility work at on Thornridge Dr & Yonge St between Old Jane St & Elgin St

Schedule: January 30th - May 1st, 2025

Timing: Monday to Friday 7:00am to 6:00pm, Saturday 7:00am to 6:00pm (Weekend work until February 25th, 2025)

What is happening?

To support the Yonge North Subway Extension, Alectra will be relocating electrical cables on Thornridge Dr & Yonge St between Old Jane St & Elgin St. This work will support the construction of future project infrastructure and will be conducted by Black and MacDonald on behalf of Alectra.

About the Yonge North Subway Extension

The Yonge North Subway Extension will transform the commute in York Region, Toronto and beyond by extending the TTC's Line 1 subway service north from Finch Station to Vaughan, Markham and Richmond Hill. This extension includes five confirmed subway stations along an extension of roughly eight kilometres.

WHAT TO EXPECT

- Residents near the work sites can expect noise and vibrations associated with general construction activities and during intermittent use of hydro-vac trucks.
- Intermittent driveway closures will be required. Access to businesses will be maintained, and advanced notice will be provided to businesses prior to work.
- If power interruptions are required during the electrical changeover, advanced notice will be provided by Alectra.

TRAFFIC IMPACTS

- Two southbound lanes will be closed, along with the left-turn lanes from **John Street to Yonge Street** during trenching work until **February 25, 2025**. Southbound traffic will temporarily use the northbound left-turn lane as a through lane.
- Left turn restrictions in place **at Yonge St to 7670 Yonge St, Yonge St to John St, and John St to Yonge St.**
- Single lanes on Yonge St. will be closed on a rotating basis. Lanes in each direction will remain open to support traffic flow.
- When curb lanes are closed, the adjacent sidewalk will also be closed. Wayfinding signage and barriers will be present to direct pedestrians.

METHODOLOGY

Crews will dig open trenches and install new underground electrical concrete-encased duct banks. New hydro poles will also be installed. The excavated area will be restored upon the completion of the work.
