

Ontario Line

Overnight Debris Removal at Minton Place Portal - Don Valley Parkway Lane Restriction

Expected dates: February 10, 2025

February 18 - 22, 2025

Hours of work: 11 p.m. to 5 a.m.

What is happening?

- Tree removal and grubbing has occurred on the slope portion of the Minton Place Portal construction area to enable slope stabilization activities. Residual debris from these activities is still on site, which needs to be transported out of the work area.
- To enable debris removal, one right lane and the right shoulder of the northbound Don Valley Parkway will be closed to traffic between 11 p.m. and 5 a.m. starting on February 10, and from 11:00 p.m. to 5:00 a.m. each night from February 18 to February 22.

What to Expect

- During this work, vehicle lights and vibration are expected from the Don Valley Parkway (DVP) and Minton Place Portal Construction area during the specified overnight hours.
 - Construction equipment, such as a spider excavator and 30-ton excavator, will be mobilized to site. Dump trucks will also be seen entering and exiting the lane restriction area.
 - Hauling will take place from the lane occupancy on the DVP. Materials will not be hauled via Minton Place during overnight work.
 - Traffic control personnel will be present to direct traffic and traffic signage will be posted around the area. Construction pylons will be installed along the DVP to delineate the construction area from active traffic, and other traffic controls will be established.
 - Vibration and noise levels will be tracked using specialized measurement instrumentation, with mitigation measures implemented if exceedance occurs.
 - Work zones will be marked using signage, safety barriers, and energy attenuators.
 - The northbound side of the DVP will be reduced by one lane, with two active lanes remaining open.
 - Work may be delayed due to weather conditions or other unforeseen circumstances.
