

Start of tunnelling

Scheduled start: February 18th, 2025

Duration: Approximately 3 years

Timing: 24 hours a day, 7 days a week

Map of work area:

What is happening?

- Work will begin on the east tunnelled section of the Eglinton Crosstown West Extension, from Jane Street to Mount Dennis Station, on February 18th.
- Work will be carried out using the sequential excavation method (SEM), a tunnelling technique that excavates the tunnel in small sections, applying immediate ground support before moving forward.

Hours of work

- Tunnelling will take place 24 hours a day, 7 days a week to ensure timely project completion.
- Construction crews will work in shifts to maintain continuous progress.

What to expect

- Construction activities will occur at the Jane portal site and will advance under Eglinton Avenue West.
- Nearby residents and businesses may experience some noise and vibrations from tunnelling activities, material deliveries and excavation. Noise and vibration levels will be continuously monitored and measured. Measures will be taken to minimize disruptions to the surrounding residential area wherever possible.
- Soil disposal will take place during the daytime, with trucking and hauling activities expected.
- Remember to reduce your speed and be mindful of your surroundings when approaching work zones and watch for slow-moving vehicles entering and exiting work areas.
- Regular updates will be provided to keep the community informed about progress and impacts.

We're Here for You
