

Upcoming Construction Activities and Impacts on Lower Jarvis Street

Ongoing until Summer 2025

What is happening?

We have been removing and relocating infrastructure on the south side of the Union Station Rail Corridor east of Union Station and reinforcing the corridor to support the widening of the rail bridges that pass over Lower Jarvis and Lower Sherbourne Streets. This will allow for two additional sections of track to be installed, and will provide an increased transit capacity, offer a more efficient and reliable service with faster trains, and allow for future electrification as part of the larger GO Expansion Program.

Below is a list of ongoing and upcoming sequential construction activities at Lower Jarvis Street for your early awareness:

Secant Wall Installations:

Secant pile walls consist of a series of overlapping drilled concrete piles, that are reinforced with rebar. These secant pile walls are installed as a retaining wall for the rail corridor to enable foundation work for the future bridge expansion.

Wingwall Demolitions:

Wing walls at the east and west portion of the rail bridges south of the corridor will be demolished to make room for caisson foundations.

Caisson Drilling and Foundation Installations:

Caisson foundations are constructed by drilling a series of concrete piles that are reinforced with rebar. These foundations will be supporting the future bridge extensions.

Updated February 27, 2025

Bridge Fascia Demolition:

The south fascia of the existing rail bridges will be demolished in preparation for the bridge expansion work. This work will span the entire length of the bridge resulting in a full street closure.

Abutment Installations:

Bridge abutments will be installed as substructures to support the future bridge superstructures.

What does this mean for you?

Continuing into 2025, there will be increased construction activity at street level on Lower Jarvis Street and Lower Sherbourne Street south of the rail corridor as work crews begin bridge demolition activities to enable foundation work in preparation of rail bridge expansions. To facilitate this needed work, there will be closures to traffic lanes, sidewalks, and bike lanes to accommodate these complex activities. Please refer to the table below for all upcoming activities and their associated impacts at Lower Jarvis Street. As work progresses, this table will be updated with scheduling updates and an updated notice will be circulated.

Activity		Dates	Impacts
Secant Wall Installations	Jarvis East	<i>Complete</i>	<ul style="list-style-type: none">Overnight work, noise, dust, vibration impactsLane closures to facilitate concrete pours
	Jarvis West	<i>Complete</i>	
Wingwall Demolitions	Jarvis East	<i>Complete</i>	<ul style="list-style-type: none">East sidewalk closureNorthbound single lane closureNoise (overnight work), dust, vibration, visual impacts
	Jarvis West	March 24 – March 25, 2025	<ul style="list-style-type: none">Southbound single lane closureWest sidewalk closureNoise (overnight work), dust, vibration, visual impacts
Bridge Fascia Demolition		March 28 – March 30, 2025	<ul style="list-style-type: none">Full road and sidewalk closureNoise (overnight work), dust, vibration, visual impacts
