ED-24-001 ED-24-002	Defective Material Preventative Measures for Voids Near Bridge Abutments	00	2024-Mar-01 2024-Jul-11	Current Current	2024-Dec-12	New Engineering Directive. New Engineering Directive.
			2024 301 11	Current	2024-Dec-12	The title has been modified and updated changes below: 1.Section 3.2 - Added columns for "Length (or Diameter) of the Excavation Measured Along the Track", "Width (or Diameter) of the Excavation Measured Perpendicular to the Track", and "Depth of the Excavation from Existing Ground Surface". 2.Section 3.2 - Added two clauses from the Excavation Section of the GTTS: "[3] Excavations longer than 100 ft. (30.48 m) must be reviewed and approved in writing by a Geotechnical Engineer to ensure safe train operations. Otherwise, the excavation must
MX-TRK-FRM-001	Ground Disturbance Permit	00	2023-Oct-10	Current	2024-Nov-15	be filled in and compacted prior to train operation." and "[4] A Professional Engineer must design all excavations that exceed 12 ft. (3.65 m) in width or depth." 3.5ection 3.3 - Added one clause from the Excavation Section of the GTTS: "Backfilling shall be carried out from the bottom of excavation in lifts of 6 in. to 12 in. (152 mm to 305 mm) and compaction shall be at least 98% SPMDD." 4.Section 5.1 - Revised the title "Required Attachments for Intrusive Works in Zone 1" to " All Zones". 5.Section 5.3 and 5.4 - Inserted the word "Additional" to the titles of these sections to improve readability. 6.Section 5.5 - Removed the following note "This individual is expected to be onsite throughout the duration". This note required the presence of a TIG qualified inspector during the excavation and it has been replaced with "As a minimum, a baseline inspection by the TIG inspector is required prior to the excavation and an inspection is required prior to train service."
