Organization and Department Code Standards

Context & Considerations

- The Metrolinx organisation structure is represented in Infor EAM to segregate ownership, cost, and maintenance history of assets
- All assets within Metrolinx EAM will be assigned to (1) Organisation and (1) Department

DEPARTMENT			
Organization	Description	Department	Department Description
STS	Station Services	STS	Station Services General
STS	Station Services	STS-CEN	Station Operations Central
STS	Station Services	STS-EAST	Station Operations East
STS	Station Services	STS-LOC	Station Services Locations
STS	Station Services	STS-SCC	Station Construction and Commissioning
STS	Station Services	STS-WEST	Station Operations West

Functional Asset Hierarchy

Context & Considerations

- Assets within Metrolinx EAM are associated through parent-child relationships to highlight functional hierarchy
- All new assets will either:
 - (a) Be introduced within an existing structure of the below hierarchy
 - (b) Modifications of the below hierarchy are required to account for new classification
- All assets will be associated to a functional position as its parent object
- **Load sheets will require the parent object ID to be populated**
- **TEXT in this colour are Asset (Last level in the hierarchy)**
- **TEXT in this colour are Assets in Asset Hierarchy**
- **TEXT in this colour are Positions to the Assets (Some assets do not have positions as they are either not in the hierarchy or are not in the hierarchy)**

Functional Asset Hierarchy Mnemonics

Context & Considerations

- All levels of the Functional Asset Hierarchy have a corresponding code that represents the asset
- Load sheets before being loaded into INFOR will require the codes to be unique and differentiated through a sequence number (number of occurrences)

Asset Classification Data Standards

Context and Considerations

- All assets within Metrolinx EAM will be associated with a class and category
- All new assets will either:
 - (a) Be associated with the existing class and category list found in the two tables below
 - (b) Modifications and/or additions to the existing class and category structure will be made (Metrolinx involvement in design)
- The left table highlights the existing class list with the associated code
- The right table highlights the category list available per asset class with the related class codes

Custom Field (CF) Overview

Context and Considerations

- All assets within Metrolinx EAM will be associated with a class
- Dependant on the asset class selected, class-specific attributes becom
- If additional attributes are required outside of the descriptive and clas
- Where there exists no custom fields within the class, no action is requi
- All class-specific attributed are considered Mandatory
